II. Background

In response to Commission direction in a Staff Requirements Memorandum for SECY-08-0161 (ADAMS Accession Nos. ML082550140 and ML090850159), the NRC has developed a preliminary draft regulatory basis for a proposed rulemaking regarding non-power reactor licenses. The preliminary draft regulatory basis document describes the NRC's overall objectives, conceptual approaches, potential solutions, integration with the NRC's strategic goals, and related technical and

regulatory clarity issues for the proposed rulemaking. The NRC is soliciting comments on this preliminary draft regulatory basis document from the public, licensees, and other stakeholders to confirm that an adequate regulatory basis exists to proceed with rulemaking to issue amended license renewal regulations for non-power reactors. The NRC conducted public meetings and Webinars on September 13 (ML112710285), and December 19, 2011 (ML113630166), and on June 20, 2012 (ML12177A334), to discuss the regulatory basis and to facilitate the public's and stakeholders' submission of informed comments.

The NRC is issuing this notice to solicit public comments on the preliminary draft regulatory basis to streamline non-power reactor license renewal. After the NRC staff considers public comments, it will make a determination regarding issuance of the final regulatory basis. Any subsequent versions of the regulatory basis will be posted on www.regulations.gov in Docket ID NRC-2011-0087. Regulations.gov allows you to receive alerts when changes or additions occur in a docket folder. To subscribe: (1) Navigate to the docket folder, NRC-2011-0087; (2) click the "Email Alert" link; and (3) enter your email address and select how frequently you would like to receive emails (daily, weekly or monthly).

Dated at Rockville, Maryland, this 25th day of June, 2012.

For the Nuclear Regulatory Commission.

Jessie F. Quichocho,

Chief, Research and Test Reactors Licensing Branch, Division of Policy and Rulemaking, Office of Nuclear Reactor Regulation.

SUPPLEMENTARY INFORMATION: On March 27, 2012, the U.S. Department of Energy (DOE) published in the **Federal Register** a Notice of Proposed Rulemaking (NOPR) that would establish energy conservation standards for battery chargers and amend those that currently apply to Class A external power supplies (EPSs). (77 FR 18478) That notice also proposed to establish standards for non-Class A EPSs and possible labeling requirements for battery chargers and EPSs. The comment period for this NOPR closed on May 29, 2012.

Recently, after the closing of the comment period, DOE has received comments on this rulemaking from interested parties. These comments submit additional information for DOE to consider as part of its evaluation of potential standards for battery chargers and EPSs. In order to consider comments previously submitted after the close of the earlier comment period and to allow interested parties to submit comments on the NOPR, DOE has determined that a re-opening of the comment period in this rulemaking is appropriate and is hereby doing so. DOE will consider any comments received between March 27, 2012 and July 16, 2012 to be timely submitted.
