

contaminated prey items, and (3) how the harm to the natural resources has impacted the people that use these resources. Concurrent with the damage assessment, the Trustee Council is conducting restoration planning.

By identifying criteria and guidance to be used in selecting feasible restoration projects, the Restoration Plan provides a framework to maximize the benefits of restoration projects to the affected resources and services in the defined areas of the Lower Willamette River. The Trustee Council analyzed three alternatives including: (1) (Preferred) integrated habitat restoration actions that will benefit multiple species and services (those species listed above as potentially affected by releases of hazardous substances, such as salmon and resident fish, mammals such as mink and river otter, and aquatic-dependent birds such as osprey and bald eagle); (2) species-specific restoration actions (for example, augmenting a species population through artificial production); and (3) a no-action alternative (no action takes place and the public is not compensated). A fourth alternative for restoration without a limited geographic boundary was also considered, but was not moved forward for detailed study because it did not meet the purpose and need for the project.

The Trustee Council has opened an Administrative Record (Record). The Record includes documents that the Trustees relied upon during the development of the Draft Restoration Plan and Draft PEIS. The Record is on file at the offices of Parametrix, a contractor to NOAA. The Record is also available at: <http://www.fws.gov/oregonfwo/contaminants/PortlandHarbor/default.asp>.
