

• To the Firm-Wide Metrics section, severance costs would be added, and certain data items that correspond to FR Y-9C would be added to the annual worksheet to collect projection data in order to compare the business line perspective of the FR Y-14 to the FR Y-9C items.

The Federal Reserve also proposes a one-time collection of the historical data only for these new data items on the *PPNR Submission worksheet*, the *PPNR NII worksheet*, and the *PPNR Metrics worksheet* (from first quarter 2009 through second quarter 2012) including elimination of the one-time data items exclusions. BHCs should have the historical data for the new data items available or would be able to calculate them. In third quarter 2011, the Federal Reserve collected data dating back to 2009 when PPNR data was collected for the first time under the FR Y-14. The historical data previously collected is used to assess trends in PPNR results among the BHCs and to assess whether the projections presented in the FR Y-14A are consistent with past performance. Based on the reasons stated above the Federal Reserve also proposes requiring BHCs that are newly subject to the FR Y-14 reporting requirements to submit historical data (back to first quarter 2009) with their first quarter data submission.

General Revisions to the FR Y-14A/Q/M

Respondent Panel

The Federal Reserve proposes revising the respondent panel to be consistent with the scope of application in the notice of proposed rulemaking regarding enhanced prudential standards. As revised, the respondent panel would be defined as: "Any top-tier bank holding company (other than a foreign banking organization), that has \$50 billion or more in total consolidated assets, as determined based on: (i) The average of the bank holding company's total consolidated assets in the four most recent quarters as reported quarterly on the bank holding company's Consolidated Financial Statements for Bank Holding Companies (FR Y-9C); or (ii) the average of the bank holding company's total consolidated assets in the most recent consecutive quarters as reported quarterly on the bank holding company's FR Y-9Cs, if the bank holding company has not filed an FR Y-9C for each of the most recent four quarters." The Federal Reserve also proposes expanding the respondent panel to include the 11 large BHCs that meet the asset threshold for reporting but that did not participate in the

previous 2009 SCAP or CCAR 2011 exercises, except for SR 01-01 firms. As of September 30, 2011, there were approximately 33 large BHCs.¹⁵ The asset threshold of \$50 billion is consistent with the threshold established by section 165 of the Dodd-Frank Act relating to enhanced supervision and prudential standards for certain BHCs.

Attestation

The Federal Reserve proposes requiring the signature of the BHCs' CFO (or the individual performing this equivalent function) on the FR Y-14 submission. The Federal Reserve proposes adding a new cover page to provide the appropriate attestation language (consistent, as appropriate, with the FR Y-9C) and stating in the general reporting instructions for the FR Y-14A, Q, and M the following:

The Capital Assessments and Stress Testing (FR Y-14A/Q/M) data submission must be signed by the Chief Financial Officer of the BHC (or by the individual performing this equivalent function). By signing the cover page of this report, the authorized officer acknowledges that any knowing and willful misrepresentation or omission of a material fact on this report constitutes fraud in the inducement and may subject the officer to legal sanctions provided by 18 U.S.C. 1001 and 1007.

Bank holding companies must maintain in their files a manually signed and attested printout of the data submitted. The cover page from the Federal Reserve's Web site reporting form should be used to fulfill the signature and attestation requirement and this page should be attached to the printout placed in the bank holding company's files.

Contact Information

The Federal Reserve proposes collecting contact information for each of the reported schedules to facilitate and expedite responses to follow up questions. Consistent with the cover page of the FR Y-9C, each schedule would include the statement, "Person to whom questions about this schedule should be directed," and would collect name/title, phone number, fax number, and email address.

Request for Additional Feedback

The Federal Reserve is seeking additional feedback on the following questions from first-time respondents of

¹⁵ Although 33 BHCs currently meet the reporting asset threshold, three are SR 01-01 BHCs and are therefore exempt from reporting. SR 01-01 (Application of the Board's Capital Adequacy Guidelines to BHCs owned by Foreign Banking Organizations) states, "as a general matter, a U.S. BHC that is owned and controlled by a foreign bank that is an FHC that the Board has determined to be well-capitalized and well-managed will not be required to comply with the Board's capital adequacy guidelines."

the FR Y-14Q/M on ways to reduce reporting burden:

1. Should the Federal Reserve allow a transition period during which first-time respondents of the FR Y-14Q/M may (1) use a tailored materiality threshold, (2) submit the schedules under an extended filing deadline, or (3) both?

2. If a transition period is allowed, how long should it be? Would a tailored materiality threshold of 25% of tier 1 capital or a threshold of 100% of tier 1 capital be more appropriate? For the quarterly and monthly filings, how much additional time should the Federal Reserve allow for filing the schedules?

The Federal Reserve is seeking feedback on the following question from all respondents on the Basel III/Dodd-Frank schedule.

3. On June 12, 2012, the Federal Reserve Board, the OCC, and the FDIC published a joint press release seeking comment on three proposed rulemakings that would revise and replace the agencies' current capital rules (the Basel III proposed rulemakings) and announcing the finalization of the Market Risk Capital rulemaking. The Board's press release with the pre-published rulemakings is available on the Board's public Web site at: www.federalreserve.gov/newsevents/press/bcreg/20120612a.htm. With respect to the annual and quarterly Basel III/Dodd-Frank schedules (except for that portion which relates to market RWAs), what are the costs and benefits associated with allowing BHCs to continue to follow existing BCBS guidance on Basel III, given that some aspects of any final rule implementing Basel III in the United States, may differ significantly from the BCBS guidance, and in particular those aspects of the guidance involving securitization exposures and credit ratings? On what basis (BCBS guidance, the proposed rulemakings, or some combination thereof) should the Basel III/Dodd-Frank schedules be based and why?

Secretary of the Board.
