[Project No. 14425-000]

**Liberty University, Inc.; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications**

On June 15, 2012, Liberty University, Inc., filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Scott's Mill Hydropower Project (project) to be located on the James River, in the City of Lynchburg, Virginia. The proposed project would be located in Amherst and Bedford Counties, Virginia. The project would not occupy any federal land. The sole

purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) The existing 15-foot-high, 925-foot-long Scott's Mill dam, impounding a 316-acre reservoir with a normal maximum water surface elevation of 511 feet mean sea level; (2) a new powerhouse containing four generating units with a total installed capacity of 4.8 megawatts; (3) a new 500-foot-long underground transmission line; and (4) appurtenant facilities. The project would have an estimated annual generation of 10,500 megawatt-hours, and would be sold to a local utility.
