

be able to serve sites throughout the service area based on companies' needs for FTZ designation. The proposed service area is within the Miami Customs and Border Protection port of entry. The grantee proposes to retain existing Site 4 which is located outside of the proposed service area.

The applicant is requesting authority to reorganize its existing zone project to include Sites 1 and 2 as "magnet" sites and Sites 3 and 4 as "usage-driven" sites. The ASF allows for the possible exemption of one magnet site from the "sunset" time limits that generally apply to sites under the ASF, and the applicant proposes that Site 1 be so exempted.

In accordance with the Board's regulations, Camille Evans of the FTZ Staff is designated examiner to evaluate and analyze the facts and information presented in the application and case record and to report findings and recommendations to the Board.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico and the South Atlantic Fishery Management Councils (Councils), in conjunction with NOAA Fisheries, has implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop; (2) Assessment Process including a workshop and webinars; and (3) Review Workshop. The Data Workshop produces a data report that compiles and evaluates potential datasets and recommends the appropriate datasets for assessment analyses. The product of the Assessment Process is a stock assessment report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Councils, NOAA

Fisheries Southeast Regional Office, and the NOAA Southeast Fisheries Science Center. Participants include: Data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs); international experts; and staff of the Councils, marine fisheries commissions, and state and federal agencies.
