analyses. Afterwards, the Department will publish either a determination that the standards for commercial and industrial electric motors need not be amended or a NOPR proposing to amend those standards. Any NOPR will include proposed energy conservation standards for the equipment covered by this rulemaking, and interested parties will be given an opportunity to submit written and oral comments on the proposed standards.

Issued in Washington, DC, on July 10, 2012.

Kathleen B. Hogan,
Deputy Assistant Secretary, Energy Efficiency and Renewable Energy.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1926

[Docket No. OSHA–2011–0184]

RIN 1218–AC65

Updating OSHA Construction Standards Based on National Consensus Standards; Head Protection; Correction of Notice of Proposed Rulemaking

AGENCY: Occupational Safety and Health Administration (OSHA), Department of Labor.

ACTION: Notice of proposed rulemaking; correction.

SUMMARY: OSHA is correcting a notice of proposed rulemaking (NPRM) with regard to the construction industry head protection standards to eliminate confusion resulting from a drafting error. OSHA published the NPRM on June 22, 2012 (77 FR 37617). OSHA also is publishing a correction to the direct final rule that it published the same day in the Federal Register (77 FR 37587).

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: OSHA is making the following correction in FR document number 2012–15031, appearing on page 37630 in the Federal Register of Friday, June 22, 2012:

§1926.100 [Corrected]

On page 37630, correct instruction number 16, to read as follows:

16. Amend § 1926.100 as follows:

a. Remove paragraph (c).

b. Revise paragraph (b) to read as follows:

1926.100 Head protection.

(b) Criteria for head protection. (1) The employer must provide each employee with head protection that meets the specifications contained in any of the following consensus standards:

(2) The employer must ensure that the head protection provided for each employee exposed to high-voltage electric shock and burns also meets the specifications contained in Section 9.7 (“Electrical Insulation”) of any of the consensus standards identified in paragraph (b)(1) of this section.

(3) OSHA will deem any head protection device that the employer demonstrates is at least as effective as a head protection device constructed in accordance with one of the consensus standards identified in paragraph (b)(1) of this section to be in compliance with the requirements of this section.

Signed at Washington, DC on July 17, 2012.

David Michaels,
Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

Partial Approval and Partial Disapproval of Air Quality Implementation Plans for Florida, Mississippi, and South Carolina; Clean Air Act Section 110(a)(2)(D)(i)(I) Transport Requirements for the 2006 24-Hour Fine Particulate Matter National Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to partially approve and partially disapprove revisions to the State Implementation Plans (SIPs) for Florida, Mississippi, and South Carolina submitted on September 23, 2009, October 6, 2009 and September 18, 2009, respectively. EPA is proposing to approve the determinations, contained in those submittals, that the existing SIPs for Florida, Mississippi, and South Carolina are adequate to meet the obligation under section 110(a)(2)(D)(i)(I) of the Clean Air Act (CAA or Act) to address interstate transport requirements with regard to the 2006 24-hour particulate matter (PM2.5) national ambient air quality standard (NAAQS). Specifically, the interstate transport requirements contained in section 110(a)(2)(D)(i)(I) of the CAA prohibit a state’s emissions from significantly contributing to nonattainment or interfering with the maintenance of the NAAQS in any other state. EPA is proposing to approve the States’ determinations that their existing SIPs satisfy this requirement and to conclude that additional control measures are not necessary under section 110(a)(2)(D)(i)(I) because emissions from Florida, Mississippi and South Carolina do not contribute significantly to nonattainment or interfere with maintenance of the 2006 24-hour PM2.5 NAAQS in any other state. EPA is also proposing to disapprove the SIP submissions from Florida, Mississippi and South Carolina to the extent that they rely on the Clean Air Interstate Rule to meet the 110(a)(2)(D)(i)(I) requirements for the 2006 24-hour PM2.5 NAAQS. Because the Clean Air Interstate Rule has been remanded by the court and did not address the 2006 PM2.5 NAAQS, it cannot be relied upon to satisfy any requirements related to that NAAQS. In this action, EPA is only addressing the SIP revisions respecting section
I. What is the background for this proposed action?

A. 2006 24-Hour PM\textsubscript{2.5} Infrastructure Requirements

On September 21, 2006, EPA revised the 24-hour average PM\textsubscript{2.5} primary and secondary NAAQS from 65 micrograms per cubic meter (\(\mu g/m^3\)) to 35 \(\mu g/m^3\) based on a 3-year average of the 98th percentile of 24-hour concentrations. 71 FR 61144 (October 17, 2006). Section 110(a)(1) of the CAA requires states to submit to EPA SIPs that provide for the “implementation, maintenance, and enforcement” of a new or revised NAAQS within 3 years after promulgation of such standards, or within such shorter period as EPA may prescribe.\textsuperscript{1} Sections 110(a)(1) and (2) require these submissions to address basic SIP requirements, including emissions inventories, monitoring, and modeling to assure attainment and maintenance of the NAAQS. EPA thus refers to these submissions as “infrastructure” SIPs. States were required to submit such SIPs to EPA no later than September 21, 2009, for the 2006 24-hour PM\textsubscript{2.5} NAAQS. SIPs must address the requirements of section 110(a)(2), as applicable, including section 110(a)(2)(D)(I)(I), which pertains to interstate transport of certain emissions.

On July 6, 2011, WildEarth Guardians and Sierra Club filed an amended complaint alleging that EPA had failed to take final action on SIP submittals addressing the “infrastructure” requirements for the 2006 24-hour PM\textsubscript{2.5} NAAQS. On October 20, 2011, EPA entered into a consent decree with WildEarth Guardians and Sierra Club which required EPA, among other things, to sign for publication in the Federal Register a notice of the Agency’s final action either approving, disapproving, or approving in part and disapproving in part the Florida, Mississippi, and South Carolina 2006 24-hour PM\textsubscript{2.5} NAAQS infrastructure SIP submittals addressing the applicable requirements of sections 110(a)(2)(A)–(H), (J)–(M), except for section 110(a)(2)(C) the nonattainment area requirements and the visibility requirements of section 110(a)(2)(D)(I)(I) no later than September 30, 2012.

\textsuperscript{1}The rule establishing the revised PM\textsubscript{2.5} NAAQS was signed by the Administrator and publically disseminated on September 21, 2006. Because EPA did not prescribe a shorter period for 110(a) “infrastructure” SIP submittals, these submittals were due on September 21, 2009, three years from the September 21, 2006, signature date pursuant to section 110(a)(1) of the CAA. See 42 U.S.C. 7401(a)(1).
B. Background on Infrastructure Actions

Section 110(a) imposes the obligation upon states to make infrastructure SIP submissions to EPA for each new or revised NAAQS, but the contents of that submission may vary depending upon the facts and circumstances. In particular, the data and analytical tools available at the time the state develops and submits the SIP for a new or revised NAAQS affects the content of the submission. The contents of such SIP submissions may also vary depending upon what provisions the state’s existing SIP already contains. In the case of the 1997 annual and 2006 24-hour PM$_{2.5}$ NAAQS, some states may need to adopt language specific to the PM$_{2.5}$ NAAQS to ensure that they have adequate SIP provisions to implement the PM$_{2.5}$ NAAQS.

Section 110(a)(1) provides the procedural and timing requirements for SIPs. Section 110(a)(2) lists specific elements that states must meet for “infrastructure” SIP requirements related to a newly established or revised NAAQS. As mentioned above, these requirements include SIP infrastructure elements such as modeling, monitoring, and emissions inventories that are designed to assure attainment and maintenance of the NAAQS. As a general matter, the infrastructure requirements are listed in EPA’s October 2, 2007, memorandum entitled “Guidance on SIP Elements Required Under Section 110(a)(1) and (2) for the 1997 8-Hour Ozone and PM$_{2.5}$ National Ambient Air Quality Standards” and September 25, 2009, memorandum entitled “Guidance on SIP Elements Required Under Section 110(a)(1) and (2) for the 2006 24-Hour Fine Particle (PM$_{2.5}$) National Ambient Air Quality Standards.” Although all the elements are identified below, today’s action pertains only to Section 110(a)(2)(D)(i)(I).

- 110(a)(2)(B): Ambient air quality monitoring/data system.
- 110(a)(2)(C): Program for enforcement of control measures.
- 110(a)(2)(E): Adequate resources.
- 110(a)(2)(I): Areas designated nonattainment and the applicable requirements of part D.\(^2\)

Notwithstanding that section 110(a)(2) provides that “each” SIP submission must meet the list of requirements therein, EPA has long noted that this literal reading of the statute is internally inconsistent, insofar as section 110(a)(2)(I) pertains to nonattainment SIP requirements that could not be met on the schedule provided for these SIP submissions in section 110(a)(1).\(^3\) This illustrates that EPA must determine which provisions of section 110(a)(2) may be applicable for a given infrastructure SIP submission.

Similarly, EPA has previously decided that it could take action on different parts of the larger, general “infrastructure SIP” for a given NAAQS without concurrent action on all subsections, such as section 110(a)(2)(D)(i), because the Agency bifurcated the action on these latter “interstate transport” provisions within section 110(a)(2) and worked with states to address each of the four prongs of section 110(a)(2)(D)(i) with substantive administrative actions proceeding on different tracks with different schedules.\(^4\) This illustrates that EPA may conclude that subdividing the applicable requirements of section 110(a)(2) into separate SIP actions may sometimes be appropriate for a given NAAQS where a specific substantive action is necessitated, beyond a mere submission addressing basic structural aspects of the state’s implementation plans.

C. Transport Rules

EPA has previously addressed the requirements of section 110(a)(2)(D)(i)(I) in past regulatory actions such as the 1998 NO$_x$ SIP call, the 2005 Clean Interstate Rule (CAIR), and the 2011 Cross-State Air Pollution Rule (CSAPR), also known as the Transport Rule.\(^5\) In the 1998 NO$_x$ SIP call, EPA evaluated whether or not the ozone-season NO$_x$ emissions in certain states had prohibited interstate impacts, and if they had such impacts, required the states to adopt substantive SIP revisions...

\(^2\) This requirement was inadvertently omitted from EPA’s October 2, 2007, memorandum entitled “Guidance on SIP Elements Required Under Section 110(a)(1) and (2) for the 1997 8-Hour Ozone National Ambient Air Quality Standards,” and the September 25, 2009, memorandum entitled “Guidance on SIP Elements Required Under Section 110(a)(1) and (2) for the 2006 Fine Particle (PM$_{2.5}$) National Ambient Air Quality Standards,” but as mentioned above is not relevant to today’s proposed rulemaking.

\(^3\) See id., 70 FR 25172 (May 12, 2005) (explaining relationship between timing requirement of section 110(a)(2)(D) versus section 110(a)(2)(I)).

\(^4\) EPA issued separate guidance to states with respect to SIP submissions to meet section 110(a)(2)(D)(i) for the 1997 ozone and 1997 PM$_{2.5}$ NAAQS. See “Guidance for State Implementation Plan (SIP) Submissions to Meet Current Outstanding Obligations Under Section 110(a)(2)(D)(i) for the 8-Hour Ozone and PM$_{2.5}$ National Ambient Air Quality Standards,” from William T. Harnett, Director Air Quality Policy Division, October 15, 2006.

\(^5\) See 63 FR 57371 (October 27, 1998), NO$_x$ SIP Call; 70 FR 25172 (May 12, 2005), CAIR; and 76 FR 48208 (August 8, 2011) (Transport Rule, also known as Cross-State Air Pollution Rule or CSAPR).
to eliminate the NOx emissions, whether through participation in a regional cap and trade program or by other means. EPA’s general approach to section 110(a)(2)(D) in the NOx SIP call was upheld in Michigan v. EPA, 213 F.3d 663 (D.C. Cir. 2000), cert denied, 532 U.S. 904 (2001). However, EPA’s approach to interference with maintenance in the NOx SIP call was not explicitly reviewed by the court. See North Carolina v. EPA, 531 F.3d 896, 907–09 (D.C. Cir. 2008).

On May 12, 2008, EPA published the Clean Air Interstate Rule (CAIR) in the Federal Register. See 70 FR 25162. CAIR required States to reduce emissions of sulfur dioxide (SO2) and nitrogen oxides (NOx) that significantly contribute to nonattainment and interfere with maintenance of the 1997 NAAQS for PM2.5 and/or ozone in any downwind state. EPA was sued by a number of parties on various aspects of CAIR and on July 11, 2008, the U.S. Court of Appeals for the District of Columbia (D.C. Circuit) issued its decision to vacate and remand both CAIR and the associated CAIR federal implementation plans (FIPs) in their entirety. See North Carolina v. EPA, 531 F.3d 896 (D.C. Cir. 2008). Among other things, the Court found that EPA failed to give independent meaning to the term “interference with maintenance.”

Subsequently, in response to EPA’s petition for rehearing, the Court issued an order remanding CAIR to EPA without vacatur because it found that “allowing CAIR to remain in effect until it is replaced by a rule consistent with [the court’s] opinion would at least temporarily preserve the environmental values covered by CAIR.” North Carolina v. EPA, 550 F.3d at 1176 (D.C. Cir. 2008). The Court remanded the rule to EPA without vacatur because it found that “allowing CAIR to remain in effect until it is replaced by a rule consistent with [the court’s] opinion would at least temporarily preserve the environmental values covered by CAIR.” North Carolina v. EPA, 550 F.3d at 1176 (D.C. Cir. 2008).

In order to address the judicial remand of CAIR, EPA promulgated a new rule to address interstate transport pursuant to section 110(a)(2)(D)(i)(I), in the eastern United States, the “Federal Implementation Plans to Reduce Interstate Transport of Fine Particulate Matter and Ozone” (i.e., the Transport Rule, also known as the Cross-State Air Pollution Rule (CSAPR)). See 76 FR 48208 (August 8, 2011). In the Transport Rule, EPA finalized regulatory changes to sunset (i.e., discontinue) CAIR and the CAIR FIPs for control periods in 2012 and beyond. See 76 FR 48321.

On December 30, 2011, the D.C. Circuit issued an opinion addressing the status of the Transport Rule and CAIR in response to motions filed by numerous parties seeking a stay of the Transport Rule pending judicial review. In that order, the D.C. Circuit stayed the Transport Rule pending the court’s resolution of the petitions for review of that rule in EME Homer Generation, L.P. v. EPA (No. 11–1302 and consolidated cases). The court also indicated that EPA is expected to continue to administer CAIR in the interim until the court rules on the petitions for review of the Transport Rule.

II. What is EPA’s analysis of Florida’s, Mississippi’s, and South Carolina’s compliance with section 110(a)(2)(D)(i)(I) for the 2006 24-hour PM2.5 NAAQS?

On September 25, 2009, EPA issued a guidance entitled, “Guidance on SIP Elements Required Under Sections 110(a)(1) and (2) for the 2006 24-Hour Fine Particle (PM2.5) National Ambient Air Quality Standards (NAAQS)” (2006 PM2.5 NAAQS Infrastructure Guidance). EPA developed the 2006 PM2.5 NAAQS Infrastructure Guidance to provide additional recommendations to states for developing SIP submissions to meet the requirements of section 110, including 110(a)(2)(D)(i) for the revised 2006 24-hour PM2.5 NAAQS. In the 2006 24-hour PM2.5 NAAQS Infrastructure Guidance, EPA explained that submissions from states pertaining to the “significant contribution” and “interference with maintenance” requirements in section 110(a)(2)(D)(i) must contain adequate provisions to prohibit air pollutant emissions from within the state that contribute significantly to nonattainment or interfere with maintenance of the NAAQS in any other state. In the Infrastructure Guidance, EPA explained that states could not rely on the CAIR to comply with CAA section 110(a)(2)(D)(i) requirements for the 2006 24-hour PM2.5 NAAQS because CAIR does not address this NAAQS. Recognizing that the demonstration required may be a challenging task for the affected states, EPA also noted in the 2006 24-hour PM2.5 NAAQS Infrastructure Guidance the Agency’s intention to complete a rule to address interstate pollution transport in the eastern half of the continental United States (i.e., the Transport Rule). As noted above EPA published the Transport Rule in the Federal Register on August 8, 2011. See 76 FR 48208.

On September 23, 2009, October 6, 2009, and September 18, 2009, Florida, Mississippi, and South Carolina, respectively, provided EPA with infrastructure submissions certifying that their current SIPs addressed all the required infrastructure elements for the 2006 24-hour PM2.5 NAAQS. In these submissions Florida, Mississippi and South Carolina all relied on CAIR to meet section 110(a)(2)(D)(i) requirements for the 2006 PM2.5 NAAQS. CAIR addressed only the 110(a)(2)(D)(i) requirements with respect to the 1997 ozone and 1997 PM2.5 NAAQS and did not address the 2006 PM2.5 NAAQS or any requirements related to that NAAQS. In previous actions disapproving SIP revisions for 110(a)(2)(D)(i) that relied on CAIR, EPA explained both its rationale for disapproving those SIP revisions as well as describing a number of considerations for states for providing an adequate demonstration to address interstate transport requirements for the 2006 PM2.5 NAAQS. See, e.g., 76 FR 43128 (July 20, 2011); 76 FR 4588 (January 26, 2011). Among the considerations, EPA explained that the state should explain whether or not emissions from the state contribute significantly to nonattainment or interfere with maintenance of the NAAQS in any other state, and that such a conclusion should be supported by a technical analysis. As explained in the prior disapprovals, a state may not rely on CAIR to satisfy the requirements of Section 110(a)(2)(D)(i) with respect to the 2006 PM2.5 NAAQS because CAIR addressed only the 1997 PM2.5 and ozone NAAQS and did not address the 2006 PM2.5 NAAQS or any requirements related to that NAAQS. In addition, CAIR was found flawed and remanded to EPA by the court. North Carolina, 550 F.3d at 1176–1178. Therefore, EPA is proposing to disapprove the States’ submission to the extent they rely on CAIR to meet these requirements.

Since receiving these submittals, EPA conducted additional modeling, as part of the Transport Rule. This modeling supports the conclusion that these States’ existing implementation plans are adequate to satisfy the requirements of section 110(a)(2)(D)(i). This modeling is consistent with the types of analyses and considerations that EPA recommended states undertake in determining whether their SIPs were adequate to satisfy 110(a)(2)(D)(i). Thus, EPA is now proposing to determine that the SIPs for Florida, Mississippi, and South Carolina are adequate to satisfy the requirements of 110(a)(2)(D)(i) for the 2006 PM2.5 NAAQS based on modeling conducted by EPA for the Transport Rule. The Transport Rule air quality modeling technical support document can be accessed at www.epa.gov/transport using Docket ID No. EPA–R04–OAR–2012–0553. Today, EPA is also proposing to
disapprove the States’ reliance on CAIR to meet the 110(a)(2)(D)(i)(I) requirements for the 2006 24-hour PM\textsubscript{2.5} NAAQS, to the extent that this rule is relied upon in the infrastructure submissions. The air quality modeling conducted for the Transport Rule evaluated interstate contributions from emissions in upwind states to projected future downwind nonattainment and maintenance receptors for the 2006 24-hour PM\textsubscript{2.5} NAAQS. EPA used air quality thresholds to identify linkages between upwind states and downwind nonattainment and maintenance receptors. The air quality threshold was calculated as 1 percent of the NAAQS, which is 0.35 \( \mu g/m^3 \) for 2006 24-hour PM\textsubscript{2.5} NAAQS. EPA found states with emissions projected to exceed this air quality threshold at one or more downwind nonattainment receptors emissions to be linked to all such receptors. Emissions from states with one or more linkages were subject to further evaluation. EPA did not conduct further evaluation of emissions from states that were not linked to any downwind receptors. The air quality modeling for the Transport Rule did not find emissions from either Florida, Mississippi, or South Carolina linked to any downwind receptors for the 2006 24-hour PM\textsubscript{2.5} NAAQS. Below is a summary of the air quality modeling results for Florida, Mississippi, and South Carolina. A technical support document explaining the modeling in much greater detail can be found in the docket for this rulemaking.

### LARGEST CONTRIBUTION TO DOWNWIND 2006 24-HOUR PM\textsubscript{2.5} (\( \mu g/m^3 \)) NONATTAINMENT AND MAINTENANCE AREAS

<table>
<thead>
<tr>
<th>State</th>
<th>Largest downwind contribution to nonattainment for 24-hour PM\textsubscript{2.5} (( \mu g/m^3 ))</th>
<th>Largest downwind contribution to maintenance for 24-hour PM\textsubscript{2.5} (( \mu g/m^3 ))</th>
</tr>
</thead>
<tbody>
<tr>
<td>Florida</td>
<td>0.07</td>
<td>0.03</td>

<tr>
<td>Mississippi</td>
<td>0.06</td>
<td>0.07</td>
</tr>
<tr>
<td>South Carolina</td>
<td>0.29</td>
<td>0.25</td>
</tr>
</tbody>
</table>

EPA believes it is appropriate to rely on this modeling even though the U.S. Court of Appeals for the D.C. Circuit stayed the Transport Rule pending judicial review. The stay of the rule does not, by itself, invalidate the modeling and nothing in the court order staying the rule suggests that it would be improper for EPA to rely on technical modeling conducted during the lengthy rulemaking process. Further, EPA is not proposing to rely on any requirements of the Transport Rule or emission reduction associated with that rule to support its conclusion that these three states have met their 110(a)(2)(D)(i)(I) obligations with respect to the 2006 PM\textsubscript{2.5} NAAQS.

### III. Proposed Action

EPA is proposing to partially approve and partially disapprove revisions to the State Implementation Plans (SIPs) for Florida, Mississippi, and South Carolina submitted on September 23, 2009, October 6, 2009 and September 18, 2009 respectively. EPA is proposing to approve the determinations that the existing SIPs of Florida, Mississippi, and South Carolina have adequate provisions to satisfy the obligation under section 110(a)(2)(D)(i)(I) of the CAA to address interstate transport requirements with regard to the 2006 24-hour PM\textsubscript{2.5} NAAQS. EPA proposes to base this action on air quality modeling, conducted by EPA during the rulemaking process for the Transport Rule. Additionally, EPA is proposing to disapprove the SIP submissions from Florida, Mississippi and South Carolina to the extent they rely on the Clean Air Interstate Rule to meet the 110(a)(2)(D)(i)(I) requirements for the 2006 24-hour PM\textsubscript{2.5} NAAQS. EPA notes, that once finalized, the partial disapproval will not trigger a FIP for these States so long as today’s proposed determination that the requirements of 110(a)(2)(D)(i)(I) for the 2006 24-hour PM\textsubscript{2.5} NAAQS for the Florida, Mississippi, South Carolina SIPs are met, is finalized. No further action will be required on the part of Florida, Mississippi or South Carolina as a result of the proposed partial disapproval because the SIPs themselves are not deficient.

### IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. See 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this proposed action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994). In addition, this proposed rule does not have tribal implications for Florida and Mississippi as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because these SIPs are not
approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law. With regard to South Carolina, EPA notes that, pursuant to the Catawba Indian Claims Settlement Act, S.C. Code Ann. 27–16–120, the Catawba Indian Nation Reservation, which is located within the State of South Carolina, is subject to all state and local environmental laws and that South Carolina regulations apply to the Catawba Indian Nation and Reservation and are fully enforceable by all relevant state and local agencies and authorities. Thus, the South Carolina SIP applies to the Catawba Reservation. Nonetheless, EPA has preliminarily determined that today’s proposed rule determining that the South Carolina SIP meets the State’s obligation under section 110(a)(2)(D)(i)(I) and disapproving its reliance upon CAIR does not have tribal implications as specified by Executive Order 13175 (65 FR 67249). EPA has also preliminarily determined that these revisions will not impose any substantial direct costs on tribal governments or preempt tribal law in South Carolina.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Intergovernmental relations, Nitrogen dioxide, Particulate matter, Reporting and recordkeeping requirements, Volatile organic compounds.

Authority: 42 U.S.C. 7401 et seq.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

Approval and Promulgation of Air Quality Implementation Plans; Connecticut, Maine, Massachusetts, New Hampshire; Infrastructure SIPs for the 1997 and 2006 Fine Particulate Matter Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve most elements of submittals from the States of Connecticut, Maine, Massachusetts, and New Hampshire. We are also proposing to conditionally approve certain elements of these submittals, as well as disapprove a few elements of Massachusetts’ submittals. The submittals outline how each state’s State Implementation Plan (SIP) meets the requirements of section 110(a) of the Clean Air Act (CAA) for both the 1997 and 2006 fine particulate matter (PM2.5) national ambient air quality standards (NAAQS). Section 110(a) of the CAA requires that each state adopt and submit a SIP for the implementation, maintenance and enforcement of each NAAQS promulgated by the EPA. This SIP is commonly referred to as an infrastructure SIP. These actions are being taken under the Clean Air Act.

DATES: Written comments must be received on or before August 22, 2012.

1. www.regulations.gov: Follow the on-line instructions for submitting comments.

2. Email: arnold.anne@epa.gov.

3. Fax: [617] 918–0047.

5. Hand Delivery or Courier. Deliver your comments to: Ann Arnold, Manager, Air Quality Planning Unit, Office of Ecosystem Protection, U.S. Environmental Protection Agency, EPA New England Regional Office, 5 Post Office Square, Suite 100, Boston, MA 02109–3912. Such deliveries are only accepted during the Regional Office’s normal hours of operation. The Regional Office’s official hours of business are Monday through Friday, 8:30 to 4:30, excluding legal holidays.

Instructions: Direct your comments to Docket ID Numbers: EPA–R01–OAR–2011–0317 or EPA–R01–OAR–2011–0321 for comments pertaining to our proposed action for Connecticut, EPA–R01–OAR–2011–0318 or EPA–R01–OAR–2011–0322 for comments pertaining to our proposed action for Maine, EPA–R01–OAR–2009–0459 or EPA–R01–OAR–2011–0323 for comments pertaining to our proposed action for Massachusetts, and EPA–R01–OAR–2009–0460 or EPA–R01–OAR–2011–0324 for comments pertaining to our proposed action for New Hampshire. EPA’s policy is that all comments received will be included in the public docket without change and may be made available online at www.regulations.gov, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit through www.regulations.gov or email information that you consider to be CBI or otherwise protected. The www.regulations.gov Web site is an “anonymous access” system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through www.regulations.gov your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. Docket: All documents in the electronic docket are listed in the www.regulations.gov index. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is

1 For each State, the first docket number refers to the docket for the 1997 PM2.5 infrastructure submittal and the second docket number refers to the docket for the 2006 PM2.5 infrastructure submittal.
