**ACTION:** Notice of availability.

**SUMMARY:** The U.S. Environmental Protection Agency (EPA) Office of the Science Advisor (OSA) announces a 60-day public comment period for the external review draft of “A Framework for Human Health Risk Assessment to Inform Decision Making.” This document was developed as part of an agencywide program by the EPA Risk Assessment Forum. The EPA is releasing this draft document solely for the purpose of seeking public comment prior to external peer review. The document will undergo independent peer review during an expert peer review meeting that will be convened, organized, and conducted by a contractor of the EPA in 2012. The date of the external peer review meeting will be announced in a subsequent **Federal Register** notice. All comments received by the docket closing date September 28, 2012, will be shared with the external peer review panel for their consideration. Comments received after the close of the comment period may be considered by the agency when it finalizes the document. This document has not been formally disseminated by the EPA. This draft document does not represent and should not be construed to represent the EPA policy, viewpoint, or determination. **SUPPLEMENTARY INFORMATION:** The EPA has an established history of conducting human health risk assessments. The *Framework* is intended to foster increased implementation of existing agency guidance for conducting human health risk assessments and improve the utility of risk assessment in the decision making process.

In developing the *Framework* the recommendations presented in the National Research Council's report *Science and Decisions: Advancing Risk Assessment* have been taken into consideration. Specifically, this *Framework* addresses the recommendations that the EPA formalize and implement planning, scoping and problem formulations in the risk assessment process and that the agency adopt a framework for risk-based decision making.

The *Framework* highlights the important roles of planning and scoping as well as problem formulation in designing a risk assessment. In accordance with longstanding agency policy, it also emphasizes the importance of scientific review and public involvement. The *Framework* presents the concept of "fit for purpose" to address the development of risk assessments and associated products that are suitable and useful for informing risk management decisions. This *Framework* will enhance the agency's emphasis on the importance of transparency of the human health risk assessment and decision making.

This document is not intended to supersede existing agency guidance; rather by citing and discussing existing guidance in the context of the framework it is intended to foster increased implementation of agency guidance.

Dated: July 20, 2012.

## EXPORT-IMPORT BANK OF THE UNITED STATES

### Economic Impact Policy

This notice is to inform the public that the Export-Import Bank of the United States has received an application to support the export of approximately \$2.3 billion in U.S. petrochemical equipment and services to expand petrochemical production at an existing facility in India. The financed amount associated with the U.S. export contract is expected to total approximately \$2 billion.

The U.S. exports will enable the foreign buyer to increase its annual production of the following products: 550,000 metric tons of linear low density polyethylene (LLDPE); 400,000 metric tons of low density polyethylene (LDPE); 733,000 metric tons of monoethylene glycol (MEG); 1,800,000 metric tons of paraxylene (PX); and 152,000 metric tons of polypropylene (PP). Available information indicates the Indian petrochemical producer plans to sell its output as follows: the majority of LDPE will be consumed in India with the balance exported to China, Europe and Africa; about half of LLDPE production will be consumed in India with the remainder going to China, Europe and Africa; the entire MEG production will be consumed in India; the PX production will be exported to South and North East Asia; and the majority of the PP production will be consumed in India with the balance exported to China, Africa and Europe.
