FEDERAL REGISTER

Vol. 77 Monday,
No. 146 July 30, 2012

Book 1 of 2 Books

Pages 44429–44720

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Printing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpo@custhelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Printing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 77 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WHEN: Tuesday, September 11, 2012
9 a.m.–12:30 p.m.

WHERE: Office of the Federal Register
Conference Room, Suite 700
800 North Capitol Street, NW.
Washington, DC 20002

RESERVATIONS: (202) 741–6008

Contents

Federal Register

Vol. 77, No. 146

Monday, July 30, 2012

Editorial Note: Administrative Order, Continuation of the National Emergency With Respect to the Actions of Certain Persons To Undermine the Sovereignty of Lebanon or Its Democratic Processes or Institutions at 77 FR 43707 was published in the printed version of the **Federal Register** for Wednesday, July 25, 2012, but was inadvertently omitted from the Table of Contents of the **Federal Register.**

Rules and Regulations

Federal Register
Vol. 77, No. 146
Monday, July 30, 2012

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 205

[Doc. No. AMS–NOP–09–0074; NOP–09–01FR]

RIN 0581–AC96

National Organic Program (NOP); Sunset Review (2012); Correction

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Correcting amendments.

SUMMARY: This document contains a correction to the final regulations published on June 6, 2012 (77 FR 33290). These regulations pertain to the 2012 Sunset Review of substances on the U.S. Department of Agriculture's (USDA) National List of Allowed and Prohibited Substances (National List). A technical error was inadvertently published in the final rule and requires correction. This document corrects the final regulations by revising the listing for ''colors'' at 7 CFR 205.606(d).

DATES: Effective on July 30, 2012.

FOR FURTHER INFORMATION CONTACT: Melissa Bailey, Ph.D., Director, Standards Division, Telephone: (202) 720–3252; Fax: (202) 205–7808.

SUPPLEMENTARY INFORMATION: On June 6, 2012, the Agricultural Marketing Service (AMS) published a final rule (77 FR 33290) to address the 2012 Sunset Review of substances on the U.S. Department of Agriculture's (USDA) National List of Allowed and Prohibited Substances (National List).

This rule amended the restrictive annotation to the listing for colors at 7 CFR 205.606(d). As published, the modification to the introductory text for this listing for colors at § 205.606(d) inadvertently removed paragraphs (d)(1) through (d)(19). These paragraphs are necessary to identify the specific nonorganic colors that can be used as ingredients in processed products labeled as ''organic'' if organic forms are not commercially available. This document corrects the final regulations by reinserting paragraphs (d)(1) through (19).

List of Subjects in 7 CFR Part 205

Administrative practice and procedure, Agriculture, Animals, Archives and records, Imports, Labeling, Organically produced products, Plants, Reporting and recordkeeping requirements, Seals and insignia, Soil conservation.

Accordingly, 7 CFR part 205 is corrected by making the following correcting amendments:

PART 205—NATIONAL ORGANIC PROGRAM

■ 1. The authority citation for 7 CFR part 205 continues to read as follows:

Authority: 7 U.S.C. 6501–6522.

■ 2. In § 205.606, revise paragraph (d) to read as follows:

§ 205.606 Nonorganically produced agricultural products allowed as ingredients in or on processed products labeled as ''organic.''

* * * * *

(d) Colors derived from agricultural products—Must not be produced using synthetic solvents and carrier systems or any artificial preservative.

(1) Annatto extract color (pigment CAS #1393–63–1)—water and oil soluble.

(2) Beet juice extract color (pigment CAS #7659–95–2).

(3) Beta-carotene extract color, derived from carrots (CAS #1393–63–1).

(4) Black currant juice color (pigment CAS #'s: 528–58–5, 528–53–0, 643–84–5, 134–01–0, 1429–30–7, and 134–04–3).

(5) Black/Purple carrot juice color (pigment CAS #'s: 528–58–5, 528–53–0, 643–84–5, 134–01–0, 1429–30–7, and 134–04–3).

(6) Blueberry juice color (pigment CAS #'s: 528–58–5, 528–53–0, 643–84–5, 134–01–0, 1429–30–7, and 134–04–3).

(7) Carrot juice color (pigment CAS #1393–63–1).

(8) Cherry juice color (pigment CAS #'s: 528–58–5, 528–53–0, 643–84–5, 134–01–0, 1429–30–7, and 134–04–3).

(9) Chokeberry—Aronia juice color (pigment CAS #'s: 528–58–5, 528–53–0, 643–84–5, 134–01–0, 1429–30–7, and 134–04–3).

(10) Elderberry juice color (pigment CAS #'s: 528–58–5, 528–53–0, 643–84–5, 134–01–0, 1429–30–7, and 134–04–3).

(11) Grape juice color (pigment CAS #'s: 528–58–5, 528–53–0, 643–84–5, 134–01–0, 1429–30–7, and 134–04–3).

(12) Grape skin extract color (pigment CAS #'s: 528–58–5, 528–53–0, 643–84–5, 134–01–0, 1429–30–7, and 134–04–3).

(13) Paprika color (CAS #68917–78–2)—dried, and oil extracted.

(14) Pumpkin juice color (pigment CAS #127–40–2).

(15) Purple potato juice (pigment CAS #'s: 528–58–5, 528–53–0, 643–84–5, 134–01–0, 1429–30–7, and 134–04–3).

(16) Red cabbage extract color (pigment CAS #'s: 528–58–5, 528–53–0, 643–84–5, 134–01–0, 1429–30–7, and 134–04–3).

(17) Red radish extract color (pigment CAS #'s: 528–58–5, 528–53–0, 643–84–5, 134–01–0, 1429–30–7, and 134–04–3).

(18) Saffron extract color (pigment CAS #1393–63–1).

(19) Turmeric extract color (CAS #458–37–7).

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2012–0765; Directorate Identifier 2012–CE–028–AD; Amendment 39–17130; AD 2012–15–01]

RIN 2120–AA64

Airworthiness Directives; Various Aircraft Equipped With Rotax Aircraft Engines 912 A Series Engine

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for various aircraft equipped with Rotax Aircraft Engines 912 A series engine. This AD results from mandatory continuing airworthiness information (MCAI) issued by the aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as a deviation in the manufacturing process of fuel hoses installed on the pressure side of part number 893114 fuel pumps. The fuel hoses may not be fuel resistant, which could lead to detachment of particles from the fuel hose and cause irregularities in the carburetor function and possibly result in rough engine operation, engine misfire, in-flight engine shutdown, and forced landing. We are issuing this AD to require actions to address the unsafe condition on these products.

DATES: This AD is effective August 14, 2012.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in the AD as of August 14, 2012.

We must receive comments on this AD by September 13, 2012.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this AD, contact BRP–Powertrain GmbH & Co. KG, Welser Strasse 32, A–4623 Gunskirchen, Austria; phone: +43 7246 601 0; fax: +43 7246 601 9130; Internet: *http://www.rotax-aircraft-engines.com.* You may review copies of the referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Sarjapur Nagarajan, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4145; fax: (816) 329–4090; email: *sarjapur.nagarajan@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued AD No. 2012–0097R1, dated June 1, 2012 (referred to after this as ''the MCAI''), to correct an unsafe condition for the specified products. The MCAI states:

> Reports from the field confirmed a non-compliance of pressure side fuel hoses installed on certain P/N 893114 fuel pumps, which may have resulted in a latent defect on a limited number of engines. The affected fuel hoses may not be fuel resistant in accordance with the specification.
>
> This condition, if not corrected, could lead to detachment of particles from the fuel hose and irregularities in the carburettor function, possibly resulting in in-flight engine shutdown and forced landing, damage to the aeroplane and injury to occupants.
>
> To address this potential unsafe condition, EASA issued Emergency AD 2012–0093–E to require the replacement of the pressure side fuel hose on certain fuel pumps, identified by P/N 893114. That AD also prohibited installation of an affected engine on an aeroplane, unless the fuel pump installation of that engine had been corrected as required by the AD.
>
> Since that AD was issued, the relevant BRP–Powertrain Alert Service Bulletin (ASB) ASB–912–061 has been revised (R1) to correct the list of affected P/N 893114 fuel pumps, identified by s/n. As some of these pumps (including potentially defective hoses) have been delivered as spares, they could also be installed on other engines than those specified by s/n in BRP–Powertrain ASB–912–061R1.
>
> For the reasons described above, this AD retains the requirements of EASA Emergency AD 2012–0093–E, which is superseded, expands the Applicability to all Rotax 912 series engines and corrects Table 1—Affected P/N 893114 fuel pumps. In addition, 2 aeroplane types have been removed from the Applicability of this AD: Aeromot AMT 300 Turbo Super Ximango and Stemme S10 VT have a Rotax 914 engine installed, not a Rotax 912.
>
> This AD has been revised to correct Table 1 of the Required Action(s) and Compliance Times(s) section, which did not contain all affected s/n fuel pumps.

This AD requires replacement of the pressure side fuel hose on the part number (P/N) 893114 fuel pump. This AD also prohibits the installation of an affected engine unless the pressure side fuel hose on the P/N 893114 fuel pump has been replaced. You may obtain further information by examining the MCAI in the AD docket.

Relevant Service Information

Rotax Aircraft Engines BRP has issued Alert Service Bulletin ASB–912–061R1, dated May 31, 2012. The actions described in this service information are intended to correct the unsafe condition identified in the MCAI.

FAA's Determination and Requirements of the AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with this State of Design Authority, they have notified us of the unsafe condition described in the MCAI and service information referenced above. We are issuing this AD because we evaluated all information provided by the State of Design Authority and determined the unsafe condition exists and is likely to exist or develop on other products of the same type design.

FAA's Determination of the Effective Date

An unsafe condition exists that requires the immediate adoption of this AD. The FAA has found that the risk to the flying public justifies waiving notice and comment prior to adoption of this rule because detachment of particles from the fuel hose on the pressure side of the fuel pump could cause engine damage and result in in-flight engine shutdown. Therefore, we determined that notice and opportunity for public comment before issuing this AD are impracticable and that good cause exists for making this amendment effective in fewer than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety, and we did not precede it by notice and opportunity for public comment. We invite you to send any written relevant data, views, or arguments about this AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2012–0765; Directorate Identifier 2012–CE–028–AD'' at the beginning of your comments. We specifically invite comments on the

overall regulatory, economic, environmental, and energy aspects of this AD. We will consider all comments received by the closing date and may amend this AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this AD.

Costs of Compliance

We estimate that this AD will affect 50 products of U.S. registry. We also estimate that it will take about 3 work-hours per product to comply with the basic requirements of this AD. The average labor rate is $85 per work-hour. Required parts will cost about $300 per product.

Based on these figures, we estimate the cost of the AD on U.S. operators to be $27,750, or $555 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2012–15–01 Various Aircraft: Amendment 39–17130; Docket No. FAA–2012–0765; Directorate Identifier 2012–CE–028–AD.

(a) Effective Date

This airworthiness directive (AD) becomes effective August 14, 2012.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all serial numbers of the airplanes listed in table 1 to paragraph (c) of this AD, that are:

(1) Equipped with a Rotax Aircraft Engines 912 A series engine, with a part number (P/N) 893114 fuel pump installed; and

(2) certificated in any category.

TABLE 1 TO PARAGRAPH (C)—AFFECTED AIRPLANES

Type certificate holder	Aircraft model	Engine model
Aeromot-Indústria Mecânico-Metalúrgica Ltda	AMT–200	912 A2
Diamond Aircraft Industries	HK 36 R ''SUPER DIMONA''	912 A
DIAMOND AIRCRAFT INDUSTRIES GmbH	HK 36 TS and HK 36 TC	912 A3
Diamond Aircraft Industries Inc.	DA20–A1	912 A3
HOAC-Austria	DV 20 KATANA	912 A3
Iniziative Industriali Italiane S.p.A.	Sky Arrow 650 TC	912 A2
SCHEIBE-Flugzeugbau GmbH	SF 25C	912 A2

(d) Subject

Air Transport Association of America (ATA) Code 73: Engine Fuel and Control.

(e) Reason

This AD was prompted by mandatory continuing airworthiness information (MCAI) issued by the aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as a deviation in the manufacturing process of fuel hoses installed on the pressure side of P/N 893114 fuel pumps. The fuel hoses may not be fuel resistant, which could lead to detachment of particles from the fuel hose and cause irregularities in the carburetor function. We are issuing this AD to prevent failure of the fuel hose on the pressure side of the P/N 893114 fuel pump, which could result in rough engine operation, engine misfire, in-flight engine shutdown, and forced landing.

(f) Actions and Compliance

Unless already done, do the following actions in accordance with Rotax Aircraft Engines BRP Alert Service Bulletin ASB–912–061R1, dated May 31, 2012.

(1) Before further flight after August 14, 2012 (the effective date of this AD), replace the pressure side fuel hose on the P/N 893114 fuel pump.

(2) As of August 14, 2012 (the effective date of this AD), do not install a P/N 893114 fuel pump on any engine, unless the pressure side fuel hose of that fuel pump has been replaced as required in paragraph (f)(1) of this AD.

(3) As of August 14, 2012 (the effective date of this AD), do not install on any airplane a Rotax 912 A series engine, unless the fuel pump installation of that engine has been corrected as required in paragraph (f)(1) of this AD.

(g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) Alternative Methods of Compliance (AMOCs): The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Sarjapur Nagarajan, Aerospace

Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4145; fax: (816) 329–4090; email: *sarjapur.nagarajan@faa.gov*. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) Airworthy Product: For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) Reporting Requirements: For any reporting requirement in this AD, a federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120–0056. Public reporting for this collection of information is estimated to be approximately 5 minutes per response, including the time for reviewing instructions, completing and reviewing the collection of information. All responses to this collection of information are mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at: 800 Independence Ave. SW., Washington, DC 20591, Attn: Information Collection Clearance Officer, AES–200.

(h) Related Information

Refer to MCAI European Aviation Safety Agency (EASA) AD No. 2012–0097R1, dated June 1, 2012; and Rotax Aircraft Engines BRP Alert Service Bulletin ASB–912–061R1, dated May 31, 2012, for related information.

(i) Material Incorporated by Reference

(1) You must use Rotax Aircraft Engines BRP Alert Service Bulletin ASB–912–061R1, dated May 31, 2012, to do the actions required by this AD, unless the AD specifies otherwise. The Director of the Federal Register approved the incorporation by reference (IBR) under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) For service information identified in this AD, contact BRP–Powertrain GmbH & Co. KG, Welser Strasse 32, A–4623 Gunskirchen, Austria; phone: +43 7246 601 0; fax: +43 7246 601 9130; Internet: *http://www.rotax-aircraft-engines.com*.

(3) You may review copies of the referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148.

(4) You may also review copies of the service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at an NARA facility, call 202–741–6030, or go to *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.*

Issued in Kansas City, Missouri, on July 17, 2012.

Earl Lawrence,

Manager, Small Airplane Directorate, Aircraft Certification Service.

Airworthiness Directives; Gulfstream Aerospace LP (Type Certificate Previously Held by Israel Aircraft Industries, Ltd.) Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Gulfstream Aerospace LP (Type Certificate previously held by Israel Aircraft Industries, Ltd.) Model Astra SPX, 1125 Westwind Astra, and Gulfstream 100 airplanes. This AD was prompted by a report indicating that sponge rubber padding was found between wheel well fuel lines and electrical harnesses. This AD requires inspecting for the presence of sponge rubber padding and for proper separation of the fuel lines and electrical harnesses in the wheel well area, and corrective actions if necessary. We are issuing this AD to detect and correct corrosion or chafing of the fuel lines, which could result in fuel leakage and possible fire in the wheel well area.

DATES: This AD becomes effective September 4, 2012.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of September 4, 2012.

ADDRESSES: You may examine the AD docket on the Internet at *http://www.regulations.gov* or in person at the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Tom Groves, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, Washington 98057–3356; telephone (425) 227–1503; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an AD that would apply to the specified products. That NPRM was published in the **Federal Register** on December 8, 2010 (75 FR 76317). That NPRM proposed to correct an unsafe condition for the specified products. The MCAI states:

> Sponge rubber padding used to provide separation between wheel well fuel lines and electrical harnesses was discovered during fleet maintenance. Use of this type of padding for this purpose is not approved as it is liable to cause corrosion of the fuel lines. Unless steps are taken to remove this padding and install approved separation means, fuel lines may be damaged by corrosion and/or chafing resulting in an unsafe condition due to fuel leakage[, which could result in a fire] in the wheel well area.

Corrective actions include installing loop clamps to correct improper separation and removing sponge rubber padding, and repair or replacement of any corroded or chafed fuel lines found after sponge rubber padding removal. You may obtain further information by examining the MCAI in the AD docket.

Comments

We gave the public the opportunity to participate in developing this AD. We have considered the comments received.

Requests To Include Additional Inspection Area

Gulfstream Aerospace Corporation (Gulfstream) requested that the inspection area be expanded to include tube assemblies outside of the wheel well area that have also been found to have sponge rubber padding and corrosion beneath the padding. Gulfstream stated that the padding with corrosion beneath has been found on four tube assemblies outside of the wheel well area specified in the NPRM (75 FR 76317, December 8, 2010) and Gulfstream Service Bulletin 100–28–297, dated January 21, 2010. These four tube assemblies are part of, or an extension of, the tube assemblies identified by part number in that service bulletin, and terminate in the wing root area.

John R. Dunn, a private citizen, stated that, upon further investigation after discovering instances of sponge rubber

in the left wheel well, foam (sponge rubber padding) was found wrapped around tubes in the forward wing root areas of two airplanes along with wire harnesses alongside the affected tubes. Corrosion was also found on those tubes. John R. Dunn stated that neither of the affected wing root areas are mentioned in Gulfstream Service Bulletin 100–28–297, dated January 21, 2010.

We partially agree. We agree to investigate reports of sponge rubber padding use, and any subsequent corrosion, that occurs outside of the wheel well area specified in Gulfstream Service Bulletin 100–28–297, dated January 21, 2010. Depending on the results of the investigation, we will work with the airplane manufacturer to develop appropriate service information and might consider additional rulemaking to address these areas. We do not agree to change this AD to include the additional areas outside of the wheel well areas, since that would expand the scope of this AD and therefore require additional public review. We do not yet have sufficient information to justify delaying this AD to include those tubes. We have not changed the AD in this regard.

Request To Revise Wording in Paragraph (g) of NPRM (75 FR 76317, December 8, 2010)

Gulfstream requested that the NPRM (75 FR 76317, December 8, 2010) be revised to state that ''all'' tubes in the wheel well areas be inspected for the sponge rubber padding and corrosion conditions. Gulfstream stated that it has received reports where tube part numbers other than those called out in the service information have sponge rubber padding.

We disagree to revise the wording in paragraph (g) of this AD to add the word ''all.'' Gulfstream Service Bulletin 100–28–297, dated January 21, 2010, already specifies a detailed inspection in the wheel well area for the presence of sponge rubber padding without specifying part numbers. As noted in paragraph 4.A. of the Accomplishment Instructions of that service bulletin, this inspection is not limited to the fuel line part numbers identified in that service bulletin. The Accomplishment Instructions of that service bulletin note that if fuel lines other than those with part numbers identified in that service bulletin are found to have sponge rubber padding, then the padding must be removed and those affected tubes must also be inspected for corrosion. We have not revised the AD in this regard.

Conclusion

We reviewed the available data, including the comments received, and determined that air safety and the public interest require adopting the AD as proposed, except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (75 FR 76317, December 8, 2010) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (75 FR 76317, December 8, 2010).

Differences Between This AD and the MCAI or Service Information

Where Gulfstream Service Bulletin 100–28–297, dated January 21, 2010, specifies to submit a photo of any sponge rubber padding that is found to the manufacturer, this AD does not require that action.

Gulfstream Service Bulletin 100–28–297, dated January 21, 2010, instructs operators to contact Gulfstream if technical assistance is required. However, any deviation from the instructions provided in that service bulletin and mandated by this AD must be approved as an alternative method of compliance (AMOC) under the provisions of paragraph (h)(1) of this AD.

Costs of Compliance

We estimate that this AD will affect 130 products of U.S. registry. We also estimate that it will take about 25 work-hours per product to comply with the basic requirements of this AD. The average labor rate is $85 per work-hour. Required parts will cost about $100 per product. Where the service information lists required parts costs that are covered under warranty, we have assumed that there will be no charge for these parts. As we do not control warranty coverage for affected parties, some parties may incur costs higher than estimated here. Based on these figures, we estimate the cost of this AD to the U.S. operators to be $289,250, or $2,225 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM (75 FR 76317, December 8, 2010), the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2012–15–06 Gulfstream Aerospace LP (Type Certificate Previously Held by Israel Aircraft Industries, Ltd.): Amendment 39–17135. Docket No. FAA–2010–1164; Directorate Identifier 2010–NM–057–AD.

(a) Effective Date

This airworthiness directive (AD) becomes effective September 4, 2012.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Gulfstream Aerospace LP (Type Certificate previously held by Israel Aircraft Industries, Ltd.) Model Astra SPX, 1125 Westwind Astra, and Gulfstream 100 airplanes, serial numbers 002 through 158 inclusive, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 28: Fuel.

(e) Reason

This AD was prompted by a report indicating that sponge rubber padding was found between wheel well fuel lines and electrical harnesses. We are issuing this AD to detect and correct corrosion or chafing of the fuel lines, which could result in fuel leakage and possible fire in the wheel well area.

(f) Compliance

You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

(g) Actions

Within 24 months after the effective date of this AD, inspect for the presence of sponge rubber padding on the fuel lines in the wheel well area and inspect the fuel lines and electrical harnesses in the wheel well area for proper separation, in accordance with the Accomplishment Instructions of Gulfstream Service Bulletin 100–28–297, dated January 21, 2010.

(1) If any sponge rubber padding is found, before further flight, remove all sponge rubber padding from the fuel lines, inspect the fuel lines that were covered with the rubber padding for any corrosion and repair or replace as applicable any corroded or chafed fuel lines, in accordance with the Accomplishment Instructions of Gulfstream Service Bulletin 100–28–297, dated January 21, 2010.

(2) If any fuel lines and electrical harnesses are found to not have proper separation, before further flight, install loop clamps in accordance with the Accomplishment Instructions of Gulfstream Service Bulletin 100–28–297, dated January 21, 2010.

(3) If proper separation is found, and no sponge rubber padding is found, no further action is required by this paragraph.

(h) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Tom Groves, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, Washington 98057–3356; telephone (425) 227–1503; fax (425) 227–1149. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(i) Related Information

Refer to MCAI Israeli Airworthiness Directive 28–10–02–01, dated February 22, 2010; and Gulfstream Service Bulletin 100–28–297, dated January 21, 2010; for related information.

(j) Material Incorporated by Reference

(1) You must use the following service information to do the actions required by this AD, unless the AD specifies otherwise. The Director of the Federal Register approved the incorporation by reference (IBR) of the following service information under 5 U.S.C. 552(a) and 1 CFR part:

(i) Gulfstream Service Bulletin 100–28–297, dated January 21, 2010.

(ii) Reserved.

(2) For service information identified in this AD, contact Gulfstream Aerospace Corporation, P.O. Box 2206, Mail Station D–25, Savannah, Georgia 31402–2206; telephone 800–810–4853; fax 912–965–3520; email *pubs@gulfstream.com;* Internet *http://www.gulfstream.com/product_support/technical_pubs/pubs/index.htm.*

(3) You may review copies of the service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington. For information on the availability of this material at the FAA, call 425–227–1221.

(4) You may also review copies of the service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at an NARA facility, call 202–741–6030, or go to *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.*

Issued in Renton, Washington, on July 17, 2012.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2010–0488; Directorate Identifier 2008–SW–20–AD; Amendment 39–17126; AD 2012–14–12]

RIN 2120–AA64

Airworthiness Directives; Various Restricted Category Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for Arrow Falcon Exporters, Inc. (previously Utah State University); Firefly Aviation Helicopter Services (previously Erickson Air-Crane Co.); California Department of Forestry; Garlick Helicopters, Inc.; Global Helicopter Technology, Inc.; Hagglund Helicopters, LLC (previously Western International Aviation, Inc.); International Helicopters, Inc.; Precision Helicopters, LLC; Robinson Air Crane, Inc.; San Joaquin Helicopters (previously Hawkins and Powers Aviation, Inc.); S.M.&T. Aircraft (previously US Helicopters, Inc., UNC Helicopter, Inc., Southern Aero Corporation, and Wilco Aviation); Smith Helicopters; Southern Helicopter, Inc.; Southwest Florida Aviation International, Inc. (previously Jamie R. Hill and Southwest Florida Aviation); Tamarack Helicopters, Inc. (previously Ranger Helicopter Services, Inc.); US Helicopter, Inc. (previously UNC Helicopter, Inc.); West Coast Fabrication; and Williams Helicopter Corporation (previously Scott Paper Co.) Model HH–1K, TH–1F, TH–1L, UH–1A, UH–1B, UH–1E, UH–1F, UH–1H, UH–1L, and UH–1P Helicopters; and Southwest Florida Aviation Model UH–1B (SW204 and SW204HP) and UH–1H (SW205) Helicopters. This AD requires

inspecting each affected tail rotor blade (blade) forward tip weight retention block (tip block) and the aft tip closure (tip closure) for adhesive bond voids and removing any blade with an excessive void from service. This AD also requires modifying certain blades by installing shear pins and tip closure rivets. This AD was prompted by reports of missing tip blocks or tip closures, resulting in minor to substantial damage to blades installed on Bell Model 212 and 412 helicopters. The actions are intended to prevent loss of a tip block or tip closure, loss of a blade, and subsequent loss of control of the helicopter.

DATES: This AD is effective September 4, 2012.

The Director of the Federal Register approved the incorporation by reference of certain documents listed in this AD as of September 4, 2012.

ADDRESSES: For service information identified in this AD, contact Bell Helicopter Textron, Inc., P.O. Box 482, Fort Worth, TX 76101; telephone (817) 280–3391; fax (817) 280–6466; or at *http://www.bellcustomer.com/files/*. You may review a copy of the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

Examining the AD Docket: You may examine the AD docket on the Internet at *http://www.regulations.gov* or in person at the Docket Operations Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, any incorporated-by-reference service information, the economic evaluation, any comments received, and other information. The street address for the Docket Operations Office (phone: 800–647–5527) is U.S. Department of Transportation, Docket Operations Office, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Michael Kohner, Aviation Safety Engineer, Rotorcraft Certification Office, Rotorcraft Directorate, FAA, 2601 Meacham Blvd., Fort Worth, Texas 76137; telephone (817) 222–5170; email *7-avs-asw-170@faa.gov*.

SUPPLEMENTARY INFORMATION:

Discussion

On May 13, 2010, at 75 FR 26889, the **Federal Register** published our notice of proposed rulemaking (NPRM), which proposed to amend 14 CFR part 39 to include an AD that would apply to Arrow Falcon Exporters, Inc. (previously Utah State University); Firefly Aviation Helicopter Services (previously Erickson Air-Crane Co.); California Department of Forestry; Garlick Helicopters, Inc.; Global Helicopter Technology, Inc.; Hagglund Helicopters, LLC (previously Western International Aviation, Inc.); International Helicopters, Inc.; Precision Helicopters, LLC; Robinson Air Crane, Inc.; San Joaquin Helicopters (previously Hawkins and Powers Aviation, Inc.); S.M.&T. Aircraft (previously US Helicopters, Inc., UNC Helicopter, Inc., Southern Aero Corporation, and Wilco Aviation); Smith Helicopters; Southern Helicopter, Inc.; Southwest Florida Aviation International, Inc. (previously Jamie R. Hill and Southwest Florida Aviation); Tamarack Helicopters, Inc. (previously Ranger Helicopter Services, Inc.); US Helicopter, Inc. (previously UNC Helicopter, Inc.); West Coast Fabrication; and Williams Helicopter Corporation (previously Scott Paper Co.) Model HH–1K, TH–1F, TH–1L, UH–1A, UH–1B, UH–1E, UH–1F, UH–1H, UH–1L, and UH–1P Helicopters; and Southwest Florida Aviation Model UH–1B (SW204 and SW204HP) and UH–1H (SW205) Helicopters. This NPRM proposed to require inspecting each applicable blade tip block and tip closure for voids and removing any blade with an excessive void from service. The NPRM also proposed to require modifying certain blades by installing shear pins and tip closure rivets. The proposed requirements were intended to prevent loss of a tip block or tip closure, loss of a blade, and subsequent loss of control of the helicopter.

AD 2002–09–04, Amendment 39–12737 (67 FR 22349, May 3, 2002), was issued for the Bell Model 205A, 205A–1, 205B, 212, 412, 412CF, and 412EP helicopters and contained the same requirements as those in this AD. AD 2007–22–02, Amendment 39–15238 (72 FR 60760, October 26, 2007), superseded AD 2002–09–04 to expand the applicability to include other part- and serial-numbered blades. Some of the blades in the applicability of AD 2007–22–02 are eligible for installation on helicopters included in this AD, which may have an FAA-approved modification that increases the helicopter's power rating to the equivalent of the Bell Model 205B or the 212 helicopter. The Bell Model 205B and 212 helicopters are addressed in AD 2007–22–02. Consequently, the inspections and modifications required by AD 2007–22–02 are mandated for the blades installed on helicopters included in this AD.

Comments

We gave the public the opportunity to participate in developing this AD, but we did not receive any comments on the NPRM.

FAA's Determination

We have reviewed the relevant information and determined that an unsafe condition exists and is likely to exist or develop on other products of these same type designs and that air safety and the public interest require adopting the AD requirements as proposed except we have revised the estimated costs of complying with this AD to reflect ten hours for inspection instead of three hours, and minor editorial changes. These minor editorial changes are consistent with the intent of the proposals in the NPRM and will not increase the scope of the AD.

Related Service Information

We have reviewed Bell Helicopter Textron Alert Service Bulletin No. 212–00–111, Revision D, dated March 18, 2005 (ASB), which describes procedures for inspecting and modifying certain tail rotor blades. The ASB was issued as a result of an investigation of an in-flight loss of a blade tip block, part number (P/N) 212–010–750–105. The investigation revealed the countersunk screws retaining the tip block were installed incorrectly, resulting in inadequate tip block retention. Reports have also been submitted about loss of the tip closures from other blades possibly because of inadequate adhesive bonding in this area.

Costs of Compliance

We estimate that this AD will affect 716 helicopters of U.S. registry, and 25 of those helicopters will have the increased power rating. Labor costs will average an estimated $85 per work hour. Based on these assumptions, we expect the following costs:

- About 1 work hour to review the helicopter records for a labor cost of $85 per helicopter, $60,860 for the U.S. fleet.
- About 10 work hours to inspect the affected blades, install the shear pins and tip closure rivets, reidentify, and dynamically balance the blade. Required supplies will cost about $45, for a total cost of $895 per helicopter. We assume that the blade sets are installed on 25 helicopters with the FAA-approved modification that will need to be inspected and repaired.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866;

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

(3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction; and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared an economic evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2012–14–12 Arrow Falcon Exporters, Inc. (previously Utah State University); Firefly Aviation Helicopter Services (previously Erickson Air-Crane Co.); California Department of Forestry; Garlick Helicopters, Inc.; Global Helicopter Technology, Inc.; Hagglund Helicopters, LLC (previously Western International Aviation, Inc.); International Helicopters, Inc.; Precision Helicopters, LLC; Robinson Air Crane, Inc.; San Joaquin Helicopters (previously Hawkins and Powers Aviation, Inc.); S.M.&T. Aircraft (previously US Helicopters, Inc., UNC Helicopter, Inc., Southern Aero Corporation, and Wilco Aviation); Smith Helicopters; Southern Helicopter, Inc.; Southwest Florida Aviation International, Inc. (previously Jamie R. Hill and Southwest Florida Aviation); Tamarack Helicopters, Inc. (previously Ranger Helicopter Services, Inc.); US Helicopter, Inc. (previously UNC Helicopter, Inc.); West Coast Fabrication; and Williams Helicopter Corporation (previously Scott Paper Co.) Model HH–1K, TH–1F, TH–1L, UH–1A, UH–1B, UH–1E, UH–1F, UH–1H, UH–1L, and UH–1P Helicopters; and Southwest Florida Aviation Model UH–1B (SW204 and SW204HP) and UH–1H (SW205) Helicopters: Amendment 39–17126; Docket No. FAA–2010–0488; Directorate Identifier 2008–SW–20–AD.

(a) Applicability

(1) This AD applies to Model HH–1K, TH–1F, TH–1L, UH–1A, UH–1B, UH–1E, UH–1F, UH–1H, UH–1L, and UH–1P helicopters, and Southwest Florida Aviation Model UH–1B series (SW204 series and SW204HP) and UH–1H series (SW205 series) helicopters, with a tail rotor blade (blade), part number (P/N) 212–010–750–009 through –129, all serial numbers except serial numbers with a prefix of ''A'' or ''AFS,'' and the number 11926, 13351, 13367, 13393, 13400, 13402, 13515, 13540, 13568, 13595 through 13602, 13619, and subsequent larger numbers, installed, certificated in any category.

(2) A blade inspected and modified by following either AD 2002–09–04 (67 FR 22349, May 3, 2002) or AD 2007–22–02 (72 FR 60760, October 26, 2007), for the Bell Helicopter Textron (Bell) Model 205A, 205A–1, 205B, 212, 412, 412CF, and 412EP helicopters satisfies the requirements of this AD.

(b) Unsafe Condition

This AD defines the unsafe condition as adhesive bond voids. This condition could result in loss of the forward tip weight retention block (tip block) or aft tip closure (tip closure), loss of the blade, and subsequent loss of control of the helicopter.

(c) Effective Date

This AD becomes effective September 4, 2012.

(d) Compliance

You are responsible for performing each action required by this AD within the specified compliance time unless it has already been accomplished prior to that time.

(e) Required Actions

Within 100 hours time-in-service:

(1) Inspect the tip block and tip closure of each blade for voids. Remove from service any blade with a void in excess of that allowed by the applicable maintenance or Component Repair and Overhaul Manual limitations.

(2) Inspect the tip block attachment countersink screws in the four locations to determine if the head of each countersunk screw is flush with the surface of the abrasion strip. The locations of these four screws are depicted on Figure 1 of Bell Alert Service Bulletin 212–00–111, Revision D, dated March 18, 2005 (ASB). If any of these screws are set below the surface of the abrasion strip or are covered with filler material, install shear pins by following the Accomplishment Instructions, Part A, Shear Pin Installation paragraphs, of the ASB.

(3) Install the tip closure rivets on each blade, re-identify the modified blade by adding an ''FM'' after the P/N, and dynamically balance the tail rotor hub assembly by following the Accomplishment Instructions, Part B, Aft Tip Closure Rivet Installation paragraphs, of the ASB.

(f) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Rotorcraft Certification Office, Rotorcraft Directorate, FAA, may approve AMOCs for this AD. Send your proposal to: Michael Kohner, Aviation Safety Engineer, Rotorcraft Certification Office, Rotorcraft Directorate, FAA, 2601 Meacham Blvd., Fort Worth, Texas 76137; telephone (817) 222–5170; email *7-avs-asw-170@faa.gov*.

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, we suggest that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or certificate holding district office before operating any aircraft complying with this AD through an AMOC.

(g) Subject

Joint Aircraft Service Component (JASC) Code: 6410, Tail Rotor Blades.

(h) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Bell Helicopter Textron Alert Service Bulletin No. 212–00–111, Revision D, dated March 18, 2005.

(ii) Reserved.

(3) For service information identified in this AD, contact Bell Helicopter Textron, Inc., P.O. Box 482, Fort Worth, TX 76101; telephone (817) 280–3391; fax (817) 280–6466; or at *http://www.bellcustomer.com/files/*.

(4) You may review the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

(5) You may also review a copy of the service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202) 741–6030, or go to: *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html*.

Issued in Fort Worth, Texas, on July 10, 2012.

Kim Smith,

Manager, Rotorcraft Directorate, Aircraft Certification Service.

[FR Doc. 2012–17607 Filed 7–27–12; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2011–1251; Directorate Identifier 2011–NM–017–AD; Amendment 39–17132; AD 2012–15–03]

RIN 2120–AA64

Airworthiness Directives; Embraer S.A. Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for all Embraer S.A. Model ERJ 190 airplanes. This AD was prompted by a report of damage on the rod end of the retracting actuator rod of the main landing gear (MLG). This AD requires performing a one-time general visual inspection to determine if a certain part number is installed on the MLG retraction actuator; if necessary, performing a general visual inspection for discrepancies between the actuator rod end and shock strut lug of the MLG retraction actuator; and corrective actions if necessary. We are issuing this AD to detect and correct breakage of the MLG retracting actuator rod, which may result in MLG extension with no hydraulic damping and consequent damage to the locking mechanism and collapse of the MLG.

DATES: This AD becomes effective September 4, 2012.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of September 4, 2012.

ADDRESSES: You may examine the AD docket on the Internet at *http://www.regulations.gov* or in person at the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Cindy Ashforth, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, Washington 98057–3356; telephone (425) 227–2768; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an AD that would apply to the specified products. That NPRM was published in the **Federal Register** on November 28, 2011 (76 FR 72855). That NPRM proposed to correct an unsafe condition for the specified products. The MCAI states:

> It has been found the occurrence of damage on the rod end of the Main Landing Gear (MLG) retraction actuator. The ANAC [Agência Nacional de Aviação Civil] is issuing this AD to prevent breakage of the MLG retracting actuator rod, which may result in MLG extension with no hydraulic damping and consequent damage to the locking mechanism and collapse of the MLG.
>
> * * * * *

Required actions include a one-time general visual inspection to determine if a certain part number is installed on the left-hand and right-hand MLG retraction actuator, and if necessary, a general visual inspection for discrepancies (such as cracks, damage, and movement) between the actuator rod end and shock strut lug of the MLG retraction actuator. The corrective actions include: If any discrepancy is found during any inspection, including any movement between the actuator rod-end and shock strut lug, replace the MLG retraction actuator, and as applicable, replace the anti-rotation pin and the attachment bolt with a new pin and bolt; replace the actuator with a new actuator having a certain part number, and modify the attachment points. You may obtain further information by examining the MCAI in the AD docket.

Comments

We gave the public the opportunity to participate in developing this AD. We considered the comments received.

Request To Use Additional Service Bulletins

EMBRAER requested that we revise the NPRM (76 FR 72855, November 28, 2011) to include EMBRAER Service Bulletin 190LIN–32–0014, dated February 10, 2011 (for Model 190–100 ECJ airplanes); and EMBRAER Service Bulletin 190LIN–32–0015, dated February 10, 2011 (for Model 190–100 ECJ airplanes); as additional service information for the inspection and replacement of the MLG retraction actuator, bolt, and anti-rotation pin.

We agree with EMBRAER's request to add additional service information to this AD. EMBRAER Service Bulletin 190LIN–32–0014, dated February 10, 2011 (for Model 190–100 ECJ airplanes), provides procedures for doing the inspection; and EMBRAER Service Bulletin 190LIN–32–0015, dated February 10, 2011 (for Model 190–100 ECJ airplanes, provides procedures for the replacement. The procedures to do the inspection and replacement are essentially the same as those specified in EMBRAER Service Bulletin 190–32–0036, dated October 4, 2010 (for Model ERJ 190 airplanes); and EMBRAER Service Bulletin 190–32–0037, dated October 6, 2010 (for Model ERJ 190 airplanes). We have revised this AD accordingly.

Request To Allow Flight After Damage Is Found

EMBRAER requested that we revise the NPRM (76 FR 72855, November 28, 2011) to allow further flight within 500 flight cycles after any damage is found on the airplane. EMBRAER stated that EMBRAER Service Bulletin 190LIN–32–0014, dated February 10, 2011 (for Model 190–100 ECJ airplanes); EMBRAER Service Bulletin 190LIN–32–0015, dated February 10, 2011 (for Model 190–100 ECJ airplanes); and Brazilian Airworthiness Directive 2011–02–01, dated February 12, 2011; allows replacement of the MLG retraction actuator, the attachment bolt, and the anti-rotation pin within the next 500 flight cycles if any discrepancy is found. EMBRAER stated that the NPRM requires that any discrepancy found be replaced before further flight.

We disagree with EMBRAER's request to allow further flight within 500 flight cycles after any damage is found on the airplane. Our policy requires repair of known cracks or damage before further flight (though we might make

exceptions to this policy in certain cases of unusual need). This policy is based on the fact that such damaged airplanes do not conform to the FAA-certificated type design and, therefore, are not airworthy until a properly approved repair is made.

We consider the compliance times in this AD adequate, allowing operators to acquire parts to have on hand in the event that any crack or damage is detected during inspection. Therefore, we have determined that, due to the safety implications and consequences associated with such cracking and damage, any subject MLG retraction actuator that is found to be cracked or damaged must be repaired or modified before further flight. We have not changed the final rule regarding this issue.

Change in Product Identification

We have revised the applicability of the existing NPRM (76 FR 72855, November 28, 2011) to identify model designations as published in the most recent type certificate data sheet for the affected models.

Explanation of Redesignated Note

We have redesignated Note 1 of the existing NPRM (76 FR 72855, November 28, 2011) as paragraph (g)(3) of this AD, respectively.

Conclusion

We reviewed the available data, including the comments received, and determined that air safety and the public interest require adopting the AD with the changes described previously—except for minor editorial changes. We have determined that these changes:

- Are consistent with the intent that was proposed in the NPRM (76 FR 72855, November 28, 2011) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (76 FR 72855, November 28, 2011).

Costs of Compliance

We estimate that this AD will affect 73 products of U.S. registry. We also estimate that it will take about 1 work-hour per product to comply with the basic requirements of this AD. The average labor rate is $85 per work-hour. Based on these figures, we estimate the cost of this AD to the U.S. operators to be $6,205, or $85 per product.

In addition, we estimate that any necessary follow-on actions would take about 6 work-hours and require parts costing $0, for a cost of $510 per product. We have no way of determining the number of products that may need these actions.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM (76 FR 72855, November 28, 2011), the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2012–15–03 Embraer S.A.: Amendment 39–17132. Docket No. FAA–2011–1251; Directorate Identifier 2011–NM–017–AD.

(a) Effective Date

This airworthiness directive (AD) becomes effective September 4, 2012.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Embraer S.A. Model ERJ 190–100 STD, –100 LR, –100 ECJ, and –100 IGW airplanes; and Model ERJ 190–200 STD, –200 LR, and –200 IGW airplanes; certificated in any category; all serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 32: Landing Gear.

(e) Reason

This AD was prompted by a report of damage on the rod end of the retracting actuator rod of the main landing gear (MLG). We are issuing this AD to detect and correct breakage of the MLG retracting actuator rod, which may result in MLG extension with no hydraulic damping and consequent damage to the locking mechanism and collapse of the MLG.

(f) Compliance

You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

(g) One-Time General Visual Inspection

Within 30 days after the effective date of this AD, do a one-time general visual inspection to determine if part number (P/N) 190–70980–403 is installed on the left-hand and right-hand MLG retraction actuator. A review of airplane maintenance records is acceptable in lieu of this inspection if the part number of the MLG retraction actuator can be conclusively determined from that review.

(1) No further action is required by paragraph (g) of this AD if no MLG retraction actuator having P/N 190–70980–403 is found.

(2) If any MLG retraction actuator having P/N 190–70980–403 is found, do a GVI of the actuator and bolt (P/N 2821–0028) for discrepancies (such as cracks, damage, and movement between the actuator rod end and shock strut lug of the MLG retraction actuator), in accordance with ''Part I'' of the Accomplishment Instructions of EMBRAER Service Bulletin 190–32–0036, dated October 4, 2010 (for all Model ERJ 190 airplanes); or EMBRAER Service Bulletin 190LIN–32–0014, dated February 10, 2011 (for Model 190–100 ECJ airplanes); within the applicable compliance time specified in paragraphs (g)(2)(i) and (g)(2)(ii) of this AD. Repeat the inspection, thereafter, at intervals not to exceed 3,500 flight cycles, until the actions required by paragraph (j) of this AD are done.

(i) For any MLG retraction actuator that has accumulated fewer than 3,500 total flight cycles as the effective date of this AD, do the GVI of the actuator before the accumulation of 4,500 total flight cycles on the MLG retraction actuator.

(ii) For any MLG retraction actuator that has accumulated 3,500 total flight cycles or more as of the effective date of this AD, do the GVI of the actuator within 1,000 flight cycles after the effective date of this AD.

(3) For the purpose of this AD, a general visual inspection (GVI) is: ''A visual examination of an interior or exterior area, installation or assembly to detect obvious damage, failure or irregularity. This level of inspection is made from within touching distance, unless otherwise specified. A mirror may be necessary to enhance visual access to all exposed surfaces in the inspection area. This level of inspection is made under normally available lighting conditions such as daylight, hangar lighting, flashlight or droplight, and may require removal or opening of access panels or doors. Stands, ladders or platforms may be required to gain proximity to the area being checked.''

(h) Corrective Actions

If any discrepancy is found during any inspection required by paragraph (g)(2) of this AD, including any movement between the actuator rod-end and shock strut lug: Before further flight, replace the MLG retraction actuator, and as applicable the anti-rotation pin and the attachment bolt, in accordance with ''Part II'' and ''Part III,'' as applicable, of the Accomplishment Instructions of EMBRAER Service Bulletin 190–32–0036, dated October 4, 2010 (for all Model ERJ 190 airplanes), or EMBRAER Service Bulletin 190LIN–32–0014, dated February 10, 2011 (for Model 190–100 ECJ airplanes); except where EMBRAER Service Bulletin 190–32–0036, dated October 4, 2010 (for all Model ERJ 190 airplanes), or EMBRAER Service Bulletin 190LIN–32–0014, dated February 10, 2011 (for Model 190–100 ECJ airplanes), specifies to contact the manufacturer, before further flight repair, in accordance with a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, or Agência Nacional de Aviação Civil (or its delegated agent).

(i) Replacement for MLG Retraction Actuator Having P/N 190–70980–403

Before any MLG retraction actuator having P/N 190–70980–403 accumulates 12,000 total flight cycles or within 1,000 flight cycles after the effective date of this AD, whichever occurs later, replace the actuator with new a actuator having P/N 190–70980–405, and modify the attachment points, in accordance with ''Part I'' and ''Part II,'' as applicable, of the Accomplishment Instructions of EMBRAER Service Bulletin 190–32–0037, dated October 6, 2010 (for all Model ERJ 190 airplanes); or EMBRAER Service Bulletin 190LIN–32–0015, dated February 10, 2011 (for Model 190–100 ECJ airplanes).

(j) Replacement for All Actuators

For all actuators: Within 20,000 flight cycles or within 96 months after the effective date of this AD, whichever occurs first, do the replacement and modification, as applicable, in accordance with ''Part III'' of the Accomplishment Instructions of EMBRAER Service Bulletin 190–32–0037, dated October 6, 2010 (for all Model ERJ 190 airplanes); or EMBRAER Service Bulletin 190LIN–32–0015, dated February 10, 2011 (for Model 190–100 ECJ airplanes). Doing the actions in this paragraph terminates the action for the requirements specified in paragraphs (g), (h), and (i) of this AD.

(k) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Cindy Ashforth, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, Washington 98057–3356; telephone (425) 227–2768; fax (425) 227–1149. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(l) Related Information

Refer to MCAI Brazilian Airworthiness Directive 2011–02–01, dated February 12, 2011, and the service information in paragraph (l)(1) through (l)(4) of this AD; for related information.

(1) EMBRAER Service Bulletin 190–32–0036, dated October 4, 2010.

(2) EMBRAER Service Bulletin 190–32–0037, dated October 6, 2010.

(3) EMBRAER Service Bulletin 190LIN–32–0014, dated February 10, 2011.

(4) EMBRAER Service Bulletin 190LIN–32–0015, dated February 10, 2011.

(m) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the following service information under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use the following service information to do the actions required by this AD, unless the AD specifies otherwise.

(i) EMBRAER Service Bulletin 190–32–0036, dated October 4, 2010.

(ii) EMBRAER Service Bulletin 190–32–0037, dated October 6, 2010.

(iii) EMBRAER Service Bulletin 190LIN–32–0014, dated February 10, 2011.

(iv) EMBRAER Service Bulletin 190LIN–32–0015, dated February 10, 2011.

(3) For service information identified in this AD, contact Embraer S.A., Technical Publications Section (PC 060), Av. Brigadeiro Faria Lima, 2170—Putim—12227–901 São Jose dos Campos—SP—BRASIL; telephone +55 12 3927–5852 or +55 12 3309–0732; fax +55 12 3927–7546; email *distrib@embraer.com.br;* Internet *http://www.flyembraer.com.*

(4) You may review copies of the service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington. For information on the availability of this material at the FAA, call 425–227–1221.

(5) You may also review copies of the service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at an NARA facility, call 202–741–6030, or go to *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.*

Issued in Renton, Washington, on July 13, 2012.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

NATIONAL AERONATICS AND SPACE ADMINISTRATION

14 CFR Part 1275

[Docket Number NASA–0031]

RIN 2700–AD84

Research Misconduct

AGENCY: National Aeronautics and Space Administration.

ACTION: Direct final rule.

SUMMARY: The NASA Research Misconduct rule describes procedures to

be used by NASA for the handling of allegations of research misconduct. This direct final rule makes non-substantive changes to the policy governing the handling of allegations of research misconduct and updates to reflect organizational changes that have occurred in the Agency. The revisions to this rule are part of NASA's retrospective plan under EO 13563 completed in August 2011. NASA's full plan can be accessed at: *http://www.nasa.gov/open/.*

DATES: This direct final rule is effective on September 28, 2012, unless adverse comment is received by August 29, 2012. If adverse comment is received, NASA will publish a timely withdrawal of the rule in the **Federal Register**.

ADDRESSES: Comments must be identified with RN 2700–AD84 and may be sent to NASA via the Federal E-Rulemaking Portal: *http://www.regulations.gov.* Follow the online instructions for submitted comments. Please note that NASA will post all comments on the Internet with changes, including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Teresa Fryberger, Office of the Chief Scientist, NASA Headquarters, telephone (202) 358–1982.

SUPPLEMENTARY INFORMATION:

Direct Final Rule and Significant Adverse Comments

NASA has determined this rulemaking meets the criteria for a direct final rule because it involves nonsubstantive changes dealing with NASA's procedures for dealing with research misconduct. NASA expects no opposition to the changes and no significant adverse comments. However, if NASA receives a significant adverse comment, the Agency will withdraw this direct final rule by publishing a notice in the **Federal Register**. A significant adverse comment is one that explains: (1) Why the direct final rule is inappropriate, including challenges to the rule's underlying premise or approach; or (2) why the direct final rule will be ineffective or unacceptable without a change. In determining whether a comment necessitates withdrawal of this direct final rule, NASA will consider whether it warrants a substantive response in a notice and comment process.

Background

The NASA Research Misconduct Rule was created in accordance with the ''Federal Policy on Research Misconduct'' issued by the Office of Science and Technology Policy on December 6, 2000. The proposed rule, published July 25, 2003 (68 FR 43982), was created to establish a new research misconduct policy for NASA and requested public comments on the proposed action. Details of the proposed rule can be found at *http://www.gpo.gov/fdsys/pkg/FR-2003-07-25/pdf/03-18982.pdf.* The proposed rule was changed to address public comments, and the final rule was published on July 14, 2004 (69 FR 42102). Details on how the comments were addressed can be found at *http://www.gpo.gov/fdsys/pkg/FR-2004-07-14/pdf/04-15432.pdf.*

NASA's research mission involves the advancement of research in the fields of aeronautics, space science, Earth science, biomedicine, biology, engineering, and physical science. NASA fulfills this objective through intramural research performed by NASA researchers and through extramural contracts, cooperative agreements, grants, and Space Act agreements with external entities, including the private sector; nonprofit and academic and educational organizations; and with other governmental entities. Because of this multiplicity of research arrangements, allegations of research misconduct could arise in any number of ways. While there is some overlap in the actions that may be pursued by Federal agencies and research institutions, this rule provides procedures and criteria for the interaction of NASA with its research partners in dealing with the various contingencies that could arise in the processing of research misconduct allegations.

Statutory Authority

The National Aeronautics and Space Act (the Space Act), 51 U.S.C. 20113(a), authorizes the Administrator of the National Aeronautics and Space Administration (NASA) to make, promulgate, issue, rescind, and amend rules and regulations governing the manner of its operations and the exercise of the powers vested in it by law.

Regulatory Analysis

Executive Order 12866 and Executive Order 13563

Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. This final rule has been designated a ''significant regulatory action,'' although not economically significant, under section 3(f) of Executive Order 12866. Accordingly, the rule has been reviewed by the Office of Management and Budget.

Regulatory Flexibility Act

It has been certified that this final rule is not subject to the Regulatory Flexibility Act (5 U.S.C. 601) because it would not, if promulgated, have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act Statement

This final rule does not contain an information collection requirement subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

List of Subjects in 14 CFR Part 1275

Administrative practice and procedure, Grant programs, Investigations, Research, Science and technology, Scientists.

Accordingly, 14 CFR part 1275 is amended as follows:

PART 1275—RESEARCH MISCONDUCT

■ 1. The authority citation for part 1275 continues to read as follows:

Authority: Pub. L. 85–568, 72 Stat. 426, 42 U.S.C. 2473.

■ 2. Section 1275.100 is amended by revising paragraphs (d) and (e) to read as follows:

§ 1275.100 Purpose and scope.

* * * * *

(d) A determination that research misconduct has occurred must be accompanied by recommendations on appropriate administrative actions. However, the administrative actions themselves may be imposed only after further procedures described in applicable Federal acquisition and NASA regulations concerning contracts, cooperative agreements, grants, Space Act agreements, or other transactions, depending on the type of agreement used to fund or support the research in question. Administrative actions involving NASA civil service employees may be imposed only in compliance with all relevant Federal laws and policies.

(e) Allegations of research misconduct concerning NASA research may be transmitted to NASA in one of the

following ways: By mail address to the Office of Inspector General (OIG), National Aeronautics and Space Administration, 300 E Street SW., Washington, DC 20546–0001 via the NASA OIG Hotline at 1–800–424–9183, or cyber hotline at *http://oig.nasa.gov/hotline.html.*

■ 3. Section 1275.101 is amended by revising paragraphs (a) and (m) to read as follows:

§ 1275.101 Definitions.

(a) Research misconduct means fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results. Research misconduct does not include honest error or differences of opinion. Research as used in this part includes all basic and applied research as defined in OMB Circular A–11 in all fields of science, engineering, and mathematics, including, but not limited to, research in space and Earth sciences, economics, education, linguistics, medicine, psychology, social sciences, statistics, and biological and physical research (ground based and microgravity), including research involving human subjects or animals.

* * * * *

(m) NASA Adjudication Official is the NASA Associate Administrator of a Mission Directorate, Chief Technologist, or Chief Engineer, depending on the research area involved in the misconduct allegation (as described in the list of NASA research disciplines and their associated directorates contained in the Appendix to this part).

* * * * *

■ 4. The Appendix to Part 1275 is revised to read as follows:

Appendix to Part 1275—Research Misconduct

NASA Research Disciplines and Respective Associated Directorates

1. Aeronautics Research—Aeronautics Research Mission Directorate
2. Space Science Research—Science Mission Directorate
3. Earth Science Research and Applications—Science Mission Directorate
4. Biomedical Research—Human Exploration and Operations Mission Directorate
5. Fundamental Biology—Human Exploration and Operations Mission Directorate
6. Fundamental Physics—Human Exploration and Operations Mission Directorate
7. Research for Exploration Systems not covered by the disciplines above—Human Exploration and Operations Mission Directorate
8. Research for the International Space Station not covered by the disciplines above—Human Exploration and Operations Mission Directorate
9. Other engineering research not covered by disciplines above—NASA Chief Engineer
10. Other technology research not covered by disciplines above—NASA Chief Technologist

Charles F. Bolden, Jr.,

Administrator.

BILLING CODE P

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 50

RIN 3038–AD60

Swap Transaction Compliance and Implementation Schedule: Clearing Requirement Under Section 2(h) of the CEA

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commodity Futures Trading Commission (Commission or CFTC) is adopting regulations to establish a schedule to phase in compliance with the clearing requirement under new section 2(h)(1)(A) of the Commodity Exchange Act (CEA or Act), enacted under Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act). The schedule will provide additional time for compliance with this requirement. This additional time is intended to facilitate the transition to the new regulatory regime established by the Dodd-Frank Act in an orderly manner that does not unduly disrupt markets and transactions.

DATES: The rules will become effective September 28, 2012.

FOR FURTHER INFORMATION CONTACT: Sarah E. Josephson, Deputy Director, 202–418–5684, *sjosephson@cftc.gov;* Brian O'Keefe, Associate Director, 202–418–5658. *bokeefe@cftc.gov;* or Peter Kals, Attorney-Advisor, 202–418–5466, *pkals@cftc.gov*, Division of Clearing and Risk, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

A. Regulatory Flexibility Act
B. Paperwork Reduction Act

I. Background

Section 723(a)(3) of the Dodd-Frank Act amended the CEA to provide, under new section 2(h)(1)(A) of the CEA, that it shall be unlawful for any person to engage in a swap unless that person submits such swap for clearing to a derivatives clearing organization (DCO) that is registered under the CEA or a DCO that is exempt from registration under the CEA if the swap is required to be cleared (the Clearing Requirement).[1] Section 2(h)(2) charges the Commission with the responsibility for determining whether a swap is required to be cleared (a Clearing Requirement determination), through one of two avenues: (1) Pursuant to a Commission-initiated review; or (2) pursuant to a submission from a DCO of each swap, or any group, category, type, or class of swaps that the DCO ''plans to accept for clearing.'' [2] The Commission is proposing its first Clearing Requirement determination concurrently with its adoption of this compliance schedule rule. The finalization of that proposal will trigger the compliance schedule provided for under this adopting release.

On September 20, 2011, the Commission published proposed § 39.5(e) [3] to phase in compliance of the Clearing Requirement upon the Commission's issuance of a Clearing Requirement determination pursuant to § 39.5(b) or (c).[4] That notice of proposed rulemaking (NPRM) also included an implementation schedule for the requirement pursuant to amended section 2(h)(8)(A), which requires a swap subject to the Clearing

[1] Section 2(h)(7) of the CEA provides an exception to the Clearing Requirement when one of the counterparties to a swap (i) is not a financial entity, (ii) is using the swap to hedge or mitigate commercial risk, and (iii) notifies the Commission how it generally meets its financial obligations associated with entering into a non-cleared swap.

[2] Under section 2(h)(2)(B)(ii), the Commission must consider swaps listed for clearing by a DCO as of the date of enactment of the Dodd-Frank Act.

[3] Commission regulations referred to herein are found at 17 CFR Ch. 1.

[4] *See* 76 FR 58186 (Sept. 20, 2011).

Requirement to be executed on a designated contract market (DCM) or swap execution facility (SEF), unless no SEF or DCM makes the swap available to trade (the Trade Execution Requirement). The Commission is hereby adopting proposed § 39.5(e), as newly designated § 50.25, to establish a schedule for compliance only for the Clearing Requirement. A separate rulemaking will promulgate the final implementation schedule for the Trade Execution Requirement.[5]

The compliance schedule for the Clearing Requirement is based on the type of market participants entering into a swap subject to the Clearing Requirement. The compliance schedule balances several goals. First, the Commission believes that some market participants, such as certain managed accounts, referred to under § 50.25 as ''Third-Party Subaccounts,'' may require additional time to bring their swaps into compliance with the Clearing Requirement. Pursuant to § 39.5(e) (finalized as § 50.25), these market participants would be afforded additional time to clear their swaps so that they will be able to document new client clearing arrangements, connect to market infrastructure such as DCOs, and prepare themselves and their customers for the new regulatory requirements.

Another goal of the compliance schedule is to have adequate representation of market participants involved at the outset of implementing a new regime for requiring certain swaps to be cleared. The Commission believes that having a cross-section of market participants involved at the outset of formulating and designing the rules and infrastructure under which the Clearing Requirement is implemented will best meet the needs of all market participants.

The compliance schedule set forth in § 50.25 defines three categories of market participants: Category 1 Entities,[6] Category 2 Entities,[7] and all other market participants. As described in § 50.25(b), a swap between two Category 1 Entities must comply with the Clearing Requirement no later than 90 days after the publication of the Clearing Requirement determination in the **Federal Register**.[8] A swap between a Category 2 Entity and a Category 1 Entity or another Category 2 Entity must comply within 180 days, and all other swaps must be submitted for clearing no later than 270 days after the Clearing Requirement determination is published in the **Federal Register**. To clarify, the swap is subject to the latest compliance date for one of the counterparties. In other words, if a Category 1 Entity enters into a swap with a Category 2 Entity, both parties have 180 days to submit the swap for clearing. However, the counterparty entitled to the later compliance date may elect to clear the swap earlier, and in that event, its counterparty is required to oblige.

II. Comments on the Notices of Proposed Rulemaking

The Commission received 26 comments during the six-week public comment period following publication of the NPRM. The Commission considered each of these comments in formulating the final regulation, § 39.5(e) (finalized as § 50.25).

A. Comment Period

The Commission published the NPRM in the **Federal Register** on September 20, 2011, and the public comment period closed on November 4, 2011.

Financial Services Roundtable (FSR) comments that the public should be able to comment on an implementation schedule for each swap subject to the Clearing Requirement because the characteristics of one particular swap may necessitate a very different schedule from another.

Pursuant to § 39.5(b)(5) in the case of swap submissions and § 39.5(c)(2) in the case of Commission-initiated reviews, the public will have an opportunity to comment on each of the Commission's proposed Clearing Requirement determinations, and to comment on whether the Commission should employ the compliance schedule for that determination. In this manner, the public will have an opportunity to comment on whether use of the compliance schedule is appropriate for a given Clearing Requirement determination covering particular swaps.

B. Harmonization

The NPRM reflects consultation with the staff of the Securities and Exchange Commission (SEC), prudential regulators, and international regulatory authorities. With respect to the latter, the Commission is mindful of the benefits of harmonizing its regulatory framework with that of its counterparts in foreign countries. The Commission therefore has monitored global advisory, legislative, and regulatory proposals, and has consulted with foreign regulators in developing the final regulations.

Vanguard, the Federal Home Loan Banks (FHLBs), and the Investment Company Institute (ICI) each recommend that the Commission coordinate the compliance schedule for the Clearing Requirement, as well as implementation schedules concerning other Dodd-Frank Act requirements, with the SEC, the prudential regulators, and international regulators to avoid market disruption and avoid regulatory arbitrage. The American Council of Life Insurers (ACLI) urges the Commission to coordinate with the SEC and international regulators to achieve reductions in compliance costs. A joint letter by the Futures Industry Association, the International Swaps and Derivatives Association, and the Securities Industry and Financial Markets Association (FIA/ISDA/SIFMA) urges the Commission to coordinate implementation schedules with those introduced by the SEC, the National Futures Association, self-regulatory organizations, and market infrastructure providers.

In addition to the regulators referenced above, the Commission has consulted with other U.S. financial regulators including: (1) The Board of Governors of the Federal Reserve System; (2) the Office of the Comptroller of the Currency; and (3) the Federal Deposit Insurance Corporation. Staff from each of these agencies has had the opportunity to provide oral and/or written comments to this adopting release, as well as to the proposal.

---

[5] The Commission will address the proposed compliance schedules for trading documentation and margining under section 4s of the CEA, 76 FR 58176 (Sept. 20, 2011), at the same time that it finalizes the underlying documentation and margin rules.

[6] A Category 1 Entity is defined under § 50.25(a) to include a swap dealer; security-based swap dealer; major swap participant; major security-based swap participant; or active fund (also defined by § 50.25(a)).

[7] A Category 2 Entity is defined under § 50.25(a) to include a commodity pool; a private fund as defined in section 202(a) of the Investment Advisers Act of 1940 other than an active fund; or a person predominantly engaged in activities that are in the business of banking, or in activities that are financial in nature as defined in section 4(k) of the Bank Holding Company Act of 1956, provided that, in each case, the entity is not a Third-Party Subaccount. As proposed, this category contained employee benefit plans under the Employee Retirement Income and Security Act of 1974, but under the final rule, these plans will not be included in Category 2. *See* below for further discussion.

[8] As proposed, the rule required compliance within 90, 180, or 270 days after the effective date set by the Commission for a Clearing Requirement determination. In order to clarify precisely when the compliance period will commence, the Commission has modified the rule to indicate that the compliance periods begin as of the date of publication of final Clearing Requirement determination rules in the **Federal Register**. From this point, market participants have either 90, 180, or 270 days to come into compliance.

C. Cross-Border and Affiliate Transactions

The NPRM did not differentiate between domestic and foreign swap dealers (SDs), major swap participants (MSPs) or their counterparties, and did not address affiliate transactions.

MarkitSERV and the Alternative Investment Management Association (AIMA) each comment that the NPRM, as well as other proposals setting forth implementation schedules for complying with Dodd-Frank Act requirements, should clarify the status of cross-border transactions. Better Markets states that trading relationships between an SD or MSP and its affiliate or an international counterparty should not be treated any differently than any other trading relationship. FIA/ISDA/SIFMA comments that the Commission should publish guidance concerning the extraterritorial application of Title VII prior to the commencement of any implementation schedule.

The Commission separately has issued guidance on the cross-border application of Title VII, including the Clearing Requirement.[9] With regard to inter-affiliate transactions, the Commission will be considering this issue in an upcoming proposal.

D. Comprehensive Implementation Schedule

This adopting release pertains exclusively to the implementation of the Clearing Requirement.

The Coalition for Derivatives End-Users (CDE), a joint letter by the Edison Electric Institute, the National Rural Electric Cooperative Association, and the Electric Power Supply Association (Joint Associations); ICI; and MarkitSERV each argue that the Commission should create an implementation plan addressing all of its final Dodd-Frank rules and that the Clearing Requirement compliance schedule should be part of that comprehensive schedule. CDE comments further that a comprehensive schedule is important to end-users, particularly in the areas of recordkeeping and reporting. The Joint Associations also comment that a comprehensive schedule should detail compliance dates, both specific and market-wide, for each registered entity and that the Commission should request further comment on this subject as more final rules are published.

Vanguard comments that in implementing Title VII, the Commission should focus first on systemic risk issues and then issues relating to transparency and trade practices. Implementation schedules should be organized by type of participant and asset class. The schedules should also allow for voluntary compliance.

ACLI argues that the Commission has not provided sufficient guidance concerning new rules and effective dates in order for market participants to conduct a prudent review of resource planning. ACLI maintains that complying with only some rules creates a risk that documents will have to be renegotiated when other rules are phased in.

In this adopting release, the Commission is focused on providing additional time to market participants that may require more time to comply with one of the key elements of the Dodd-Frank Act—the Clearing Requirement. The compliance schedule that is the subject of this adopting release was proposed at the same time as three other compliance schedules—schedules for the Trade Execution Requirement and two important requirements under section 4s of the CEA, documentation and margin for uncleared swaps. Each of these proposed compliance schedules responded to particular concerns from market participants, especially those that are not required to register with the Commission. The Commission also has published compliance dates for phasing in implementation in nearly all of its final rules.[10] In addition, the Commission has twice published on its Web site general schedules regarding the sequence and timing for its own consideration of final rules.[11]

In response to ACLI, as discussed further below, the Commission has finalized all the documentation requirements necessary for compliance with the Clearing Requirement.[12] With regard to Vanguard's comment, the Commission intends to implement the Clearing Requirement based on specific classes of swaps, beginning with those asset classes that are currently being cleared. The Commission believes that implementation of the Clearing Requirement will serve to reduce systemic risk by mitigating counterparty credit risk through the use of the marking-to-market, margining, and risk mutualization provided by central counterparties. The adoption of this compliance schedule is an important step toward implementing that requirement. In addition, the compliance schedule expressly allows for voluntary clearing prior to the required compliance date, and market participants currently are free to clear all swaps offered for clearing by DCOs on a voluntary basis.

E. Prerequisite Rules

The preamble to the NPRM stated that prior to requiring compliance with any Clearing Requirement determination, the Commission must publish the following final rules: Definitions of swap, SD, and MSP; End-User Exception to Mandatory Clearing of Swaps; and Protection of Cleared Swaps Customer Collateral.

The FHLBs comment that the rule text of an implementation rule should state that the compliance schedule will not take effect until the Commission has published applicable final rules. The FHLBs believe that it is insufficient for the preamble to make this point.

The Joint Associations state that they cannot comment on the adequacy of either the compliance schedule for the Clearing Requirement or other implementation schedules until various final rules have been published, including the definitions of swap, SD, and MSP. The Joint Associations want to see how many of their comments to these rules have been adopted because this will affect how long it will take their members to comply with Title VII requirements. ICI comments that parties cannot prepare for centralized clearing until the Commission publishes the final rule concerning the definition of swap.

Citadel, FHLBs, and FIA/ISDA/SIFMA each recommend that the Commission publish final rules related to clearing, such as customer clearing documentation, timing of acceptance for clearing, and clearing member risk management, prior to phasing in the Clearing Requirement. FHLBs state that the prior publication of the Customer Clearing Documentation, Timing of Acceptance for Clearing, and Clearing Member Risk Management rules is important so that market participants can fully appreciate risks and not have to renegotiate documentation.

The Committee on Investment of Employee Benefit Assets (CIEBA) recommends that the Commission not impose the Clearing Requirement until full physical segregation is available for margin of cleared swaps. CIEBA also

comments that if the Commission publishes final segregation rules for cleared swaps customer collateral at the same time that it phases in the Clearing Requirement, then market participants' limited resources would be overwhelmed. ICI comments that parties cannot prepare for centralized clearing until the Commission publishes the final rule concerning the Protection of Cleared Swaps Customer Collateral. ICI also argues that the documentation requirements under section 4s(i) of the CEA must be finalized before market participants are required to comply with mandatory clearing.

CME recommends that the Commission finalize the DCO Conflicts of Interest rules prior to requiring compliance with the Clearing Requirement.

The American Bankers Association (ABA) believes that end-user banks not be required to comply with the Clearing Requirement until 180 days after the Commission determines whether end-user banks will be exempt from the Clearing Requirement.

AIMA believes the Commission should publish final rules concerning the Margin Requirement, as well as customer collateral protection rules, prior to phasing in the Clearing Requirement.

The Commission has finalized all four of the rules identified in the NPRM that it needed to be completed prior to requiring compliance with the Clearing Requirement (namely, the End-User Exception to Mandatory Clearing of Swaps; [13] Protection of Cleared Swaps Customer Collateral; [14] the Further Definition of ''Swap Dealer,'' ''Security-Based Swap Dealer,'' ''Major Swap Participant,'' ''Major Security-Based Swap Participant'' and ''Eligible Contract Participant''; [15] and the Further Definition of ''Swap,'' ''Security-Based Swap,'' and ''Security-Based Swap Agreement''; Mixed Swaps; Security-Based Swap Agreement Recordkeeping).[16] In addition, the Commission has finalized rules related to Customer Clearing Documentation, Timing of Acceptance for Clearing, and Clearing Member Risk Management.[17] Finalizing these rules addresses the FHLBs' concerns about having to revise documentation more than once and provides certainty as to swap processing requirements and expectations regarding risk management for clearing members. On the other hand, in response to CME's comment, the Commission does not believe it is necessary for final DCO Conflicts of Interest rules to be in effect before requiring compliance with the Clearing Requirement because these rules do not relate directly to the clearing process, customer connectivity, clearinghouse risk management, or other matters that would affect the implementation of the Clearing Requirement.

In response to the FHLBs' request that the implementation rule text include a provision that the rule is not effective until the definitions of SD, MSP, and swap are finalized, the Commission reiterates that all of the pre-requisite rules for the Clearing Requirement have been adopted. With regard to CIEBA's comment about full physical segregation, the Commission published its final rule concerning Protection of Cleared Swaps Customer Collateral on February 7, 2012.[18] In that rulemaking, the Commission indicated that it may address issues related to collateral held in third-party safekeeping accounts at some point in the future. However, given that a fully operational segregation regime is required to be in place by November 8, 2012, the Commission does not believe that it is necessary for this additional matter to be resolved prior to requiring compliance with the Clearing Requirement.

In response to ICI's comment, the Commission clarifies that finalization of the swap trading relationship documentation requirements for SDs and MSPs under section 4s(i) of the CEA is not required for compliance with the Clearing Requirement because the documentation that is the subject of those rules relates primarily to bilaterally-executed, uncleared swap transactions, and none of the provisions in proposed § 23.504 pertain directly to the Clearing Requirement. Similarly, in response to AIMA's comment, final margin rules for uncleared swaps are not required to be finalized prior to requiring compliance with the Clearing Requirement as these are related, but distinct, provisions under the Dodd-Frank Act.

F. Definitions

Under § 39.5(e)(1), the Commission proposed definitions of the terms ''Category 1 Entity,'' ''Category 2 Entity,'' ''Active Fund,'' and ''Third-Party Subaccount.'' The definitions set forth in proposed § 39.5(e) (now § 50.25) would apply specifically to provisions contained in part 39 (now part 50) and only those other rules that explicitly cross-reference these definitions. The Commission is adopting the definitions as proposed, with the exceptions discussed below.

1. Active Fund

As proposed under § 39.5(e)(1), ''any private fund as defined in section 202(a) of the Investment Advisers Act of 1940, that is not a third-party subaccount and that executes 20 or more swaps per month'' would be defined as an ''Active Fund'' and subject to the shortest implementation schedule for compliance with the Clearing Requirement.

Numerous commenters, such as Better Markets, Chris Barnard, and AIMA, agree with the Commission that using a market participant's average monthly trading volume would be an appropriate proxy for determining an entity's ability to comply with the Clearing Requirement and would be better than a proxy based on notional volume or open interest. AIMA agrees with the NPRM's proposal that Active Funds be subject to the 90-day deadline.

Other commenters express concerns about solely relying on monthly volumes as a proxy, especially without further defining the types of swaps that would be included in the calculation. ACLI states that the frequency of trading is not an appropriate indicator of a market participant's experience or resources. The Association of Institutional Investors (AII) states that the definition should specify the type of swaps that count towards the threshold. CDE recommends a minimum average monthly notional threshold to avoid capturing smaller end-users. CDE also states that hedges and inter-affiliate swaps should be excluded from this monthly average threshold. Managed Funds Association (MFA) similarly requests clarification regarding those swaps that would be included in the monthly swap calculation. Specifically, MFA requests clarification as to whether novations, amendments, or partial tear-ups would be included.

Commenters also focus on the average monthly threshold of 20 swaps per

[18] 77 FR 6336 (Feb. 7, 2012).

month for the preceding 12 months. FIA/ISDA/SIFMA proposes that the threshold be an average of 200 trades per month. Vanguard proposes a similar threshold. Both AII and MFA think the proposed threshold was overly inclusive. MFA also highlights its belief that the proposed definition would be difficult to administer, while unnecessarily creating another tier of market participants for the purposes of the implementation schedules.

In response to these comments, the Commission is increasing the average monthly threshold to 200 swap trades per month for the preceding 12 months. The Commission believes that monthly trading volume is a suitable proxy for determining the appropriate implementation schedule for a swap counterparty. By increasing the threshold to 200, as recommended by FIA/ISDA/SIFMA, as well as Vanguard, the risk of capturing smaller, less experienced swap counterparties should be substantially diminished. The market participants engaging in this level of swap activity should be able to access the resources necessary to meet the 90-day implementation schedule. In light of the number of transactions currently being cleared on a voluntary basis by funds, the Commission does not believe that an increase in the threshold of monthly swap trades will negatively impact the goal of broad market participation in the implementation of the Clearing Requirement. The Commission believes this increase in the average monthly threshold also addresses CDE's concerns about smaller market participants using swaps only to hedge risk.

Further, by maintaining the concept of Active Fund, the Commission believes that it will continue to ensure adequate representation across the spectrum of market participants during the first phase of the implementation of the Clearing Requirement. As a result of this participation, processes and infrastructure will be established to serve all segments of the market, not just SDs and MSPs, which are included in the initial phase of the compliance schedule for the Clearing Requirement.

In response to AII and MFA, the Commission clarifies that the average monthly threshold of swaps applies to new swaps that the entity enters into, and it does not apply to novations, amendments, or partial tear-ups. In addition, the Commission clarifies that the 200 swap threshold includes any swap, as defined under the CEA and § 1.3, and not just those swaps that would be subject to the relevant Clearing Requirement determination and attendant compliance schedule.

2. Third-Party Subaccount

Under § 39.5(e) (finalized herein as § 50.25), Third-Party Subaccounts are excluded from the definitions of Category 1 Entity and Category 2 Entity, with the effect that such subaccounts will have 270 days, the longest period, in which to comply with the Clearing Requirement. The NPRM defined Third-Party Subaccounts as ''a managed account that requires the specific approval by the beneficial owner of the account to execute documentation necessary for executing, confirming, margining, or clearing swaps.'' The purpose of excluding Third-Party Subaccounts from the defined categories was to ensure that investment managers, who may be faced with bringing numerous accounts into compliance, would have adequate time to do so.

Commenters question whether the definition was broad enough to provide sufficient time for Third-Party Subaccounts to comply with the Clearing Requirement. ICI noted that Third-Party Subaccounts, whether subject to the specific execution authority of the beneficiary or not, require managers to work closely with clients when entering into trading agreements on the customer's behalf. As such, ICI feels that no distinction should be made based on specific execution authority or lack thereof. ICI comments that all Third-Party Accounts should be uniformly classified and be given 270 days to comply. AII similarly states that the definition is too narrow given the administrative work required to manage an account, regardless of the execution authority. Further, AII states that execution authority is not an industry standard. The term, as proposed, therefore divides the universe of managed accounts inappropriately. FIA/ISDA/SIFMA recommends that all accounts managed by third parties, regardless of the execution authority, should be given the most time to comply with the Clearing Requirement.

Based on the comments received, the Commission is revising the definition of Third-Party Subaccount to mean ''an account that is managed by an investment manager that (1) is independent of and unaffiliated with the account's beneficial owner or sponsor, and (2) is responsible for the documentation necessary for the account's beneficial owner to clear swaps.'' In modifying this definition, the Commission is taking into account the point made by AII, FIA/ISDA/SIFMA, and ICI that all investment managers will need additional time to comply with a Clearing Requirement regardless of whether they have explicit execution authority. However, the definition retains the nexus between the investment manager and the documentation needed for clearing swaps. In other words, if the investment manager has no responsibility for documenting the clearing arrangements, then that account would be required to clear its swaps subject to required clearing within 180 days. For those accounts under the revised definition, however, the Commission believes that the 270-day deadline is more appropriate. Given the general notice investment managers have had about the Dodd-Frank Act's Clearing Requirement since the enactment of the statute in July, 2010, managers should have been able to consider and plan the infrastructure and resources that are necessary for all of their accounts, including Third-Party Subaccounts, to comply with the Clearing Requirement. Thus, the 180- and 270-day deadlines should provide adequate time to accommodate all managed accounts.

3. Category 1 and Category 2 Entities

The compliance schedule is organized according to the type of market participant. To the extent that the Commission determines that a compliance schedule is warranted in connection with a Clearing Requirement determination (*i.e.* to comply with the Clearing Requirement) a market participant defined as a Category 1 Entity will have 90 days to comply, a Category 2 Entity will have 180 days, and all others will have 270 days. According to the proposed definitions, a Category 1 Entity includes an SD, a security-based swap dealer, an MSP, a major security-based swap participant, or an Active Fund. A Category 2 Entity includes a commodity pool, a private fund, as defined by the Investment Advisers Act of 1940, an ERISA plan, or a person predominantly engaged in banking or other financial activities, as defined by section 4(k) of the Bank Holding Company Act. A Category 2 Entity would not include an Active Fund or a Third-Party Subaccount.

Encana Marketing (USA) Inc. (Encana) and the Joint Associations comment that non-financial end users should be expressly included in the category with the longest timeframe. CDE argues that financial end-users should be treated identically to non-financial end-users because they do not pose systemic risk, and, therefore, should be given the most time to comply with the Clearing Requirement, and not included in Category 2. ICI seeks clarification that a market participant can determine whether it is an MSP for purposes of the compliance schedule for the Clearing

Requirement at the same time that it is required to review its status as an MSP under other Commission and SEC rules.

CIEBA states that in-house ERISA funds should be in the group with the longest compliance time, and not Category 2 Entities. CIEBA notes that such funds do not pose systemic risk, and they typically rely upon third-party managers for some portion of their fund management. Splitting in-house and external accounts (*i.e.* those accounts meeting definition of Third-Party Subaccount and permitted 270 days) of the same ERISA plan will impact risk management given different implementation schedules. CIEBA also states that this distinction will cause pension funds to bear the costs of compliance because they will need to comply prior to their third-party managers, who would be better positioned to provide insight and service in this regard.

The Commission believes that the definitions of Category 1 Entity should be finalized as proposed, but that the definition of Category 2 Entity should be modified by removing the reference to ERISA plans. In response to Encana and the Joint Associations, non-financial end users are adequately addressed in § 39.5(e)(2)(iii) (now § 50.25(b)(3))—unless the swap transactions are eligible to claim the exception from the Clearing Requirement under section 2(h)(7) of the CEA, the parties are given 270 days to comply with the Clearing Requirement. With respect to issues raised by CDE regarding those financial entities included in Category 2, based on numerous meetings with participants in the swap market, the Commission believes that financial entities are capable of complying with the Clearing Requirement 90 days sooner than non-financial entities. Accordingly, the compliance schedule has correctly situated Category 2 Entities based upon their ability to meet the requirements of the underlying regulations. Moreover, the distinction between financial and non-financial entities has a statutory basis in section 2(h)(7) of the CEA.

The Commission recognizes the concerns raised by CIEBA regarding splitting in-house and external accounts (*i.e.,* those accounts meeting the definition of Third-Party Subaccount and permitted 270 days) of the same ERISA plan. In response to these concerns, the Commission is removing the reference to employee benefit plans as defined in paragraphs (3) and (32) of section 3 of the Employee Retirement Income and Security Act of 1974. As a result, these ERISA plans will be afforded the longest compliance period (270 days).

With regard to ICI's comment, a potential MSP can review its obligation to register as an MSP at the same time it is reviewing where it fits under the Clearing Requirement compliance schedule. In many instances, MSPs will have to review their registration obligations ahead of complying with the Clearing Requirement. However, if an entity discovers that it has crossed the threshold established under the MSP rules and is required to register during the 90-day period for Category 1 Entities, the Commission would consider allowing that entity to petition for additional time to come into compliance with the Clearing Requirement.[19]

G. Compliance Schedule for the Clearing Requirement

As mentioned above, § 39.5(e)(2) provides that when the Commission determines that an implementation schedule is appropriate in connection with a given Clearing Requirement determination, market participants within the definition of Category 1 will have 90 days to comply, those within the definition of Category 2 will have 180 days, and all others 270 days to implement the Clearing Requirement.

4. Application to All Swap Types

The Clearing Requirement compliance schedule is based upon the nature of a given swap market participant, considering the participant's risk profile, compliance burden, resources, and expertise. The schedule does not contemplate different implementation timeframes based upon the characteristics of particular swaps.

AIMA states that it does not believe further implementation schedules are necessary based on the nature of the swap itself. Better Markets, Citadel, and MFA comment that the compliance schedule should apply, however, to all swaps within a ''group'' or ''class,'' as defined by the Commission's Clearing Requirement determination.

Commenters such as CDE state that the Commission should publish an implementation schedule specific to the characteristics of a particular type of swap. CDE comments that because it is unlikely that end-users, and other entities relied upon by end-users, will be able to meet the requirements necessary to comply with clearing determinations for all swap products at the same time, the Commission should phase in implementation deadlines by swap type, according to the amount of systemic risk posed by a particular swap.

MarkitSERV asserts that all Dodd-Frank Act requirements should be phased-in by asset class, taking into account that different asset classes have various levels of product standardization, electronification, volumes, and types of counterparties. FIA/ISDA/SIFMA also states that there should be a separate compliance schedule for each asset class. FIA/ISDA/SIFMA also states that the Commission should require credit default swaps and interest rate swaps to be cleared first because those products are already being cleared. Commodity and equity swaps, according to FIA/ISDA/SIFMA, should be required to be cleared later because the marketplace is currently clearing fewer of those products.

AIMA, CDE, ICI, and MarkitSERV state that the compliance schedule should require the Commission to phase in each Clearing Requirement determination as set forth in § 39.5(e). FHLB and ICI comment that the Commission should have the flexibility to extend clearing implementation dates, but not shorten them. Citadel counters that the compliance schedule should only be triggered when a determination is issued for a new category of swaps.

This rule affords the Commission discretion to determine whether to apply the compliance schedule in connection with a particular Clearing Requirement determination. The Commission agrees that while the schedule may be necessary in connection with some Clearing Requirement determinations, especially those covering new classes of swaps, there also may be determinations that are sufficiently similar to prior ones that no compliance schedule is necessary. As such, the Commission will determine whether or not to apply the § 39.5(e) (now § 50.25) compliance schedule as part of its analysis in connection with each Clearing Requirement determination.

Further, it remains the Commission's intention that those swaps currently being cleared will be subject to the first Clearing Requirement determinations. As a result, market participants initially will comply with the Clearing Requirement using established platforms and technology. This should limit a market participant's burden in transitioning to clearing, as the use of existing infrastructure will mean less time and expense necessary to develop independent programs, technology, or platforms to clear such transactions.

[19] Similarly, the Commission would consider allowing entities to petition for additional time to comply to the extent that they discover that they have exceeded the *de minimis* threshold under the swap dealer definition and are required to register during the 90-day period for Category 1.

5. Timing of Implementation Schedules

Citadel and Better Markets comment that they agree with the proposed compliance schedule because market participants have had notice of the movement towards clearing for one to three years, and the clearing infrastructure already exists with regard to interest rate and credit default swap products. Citadel and Tradeweb believe the proposed schedule correctly staggers compliance according to category of market participant. Citadel does not support extending the 270-day timeframe because 270 days would grant sufficient time to market participants without providing so much time as to engender a material, competitive advantage or regulatory arbitrage. AIMA believes the proposed schedule grants sufficient time to each category of market participant so that they will be able to comply with the Clearing Requirement. Similarly, the Joint Associations and The Westpac Group (Westpac) generally agree with phasing in implementation with the Clearing Requirement according to category of participant.

CIEBA states that because SDs, MSPs, and Active Funds will be the first focus for all third party vendors, ERISA plans will be competing for these resources only after the first implementation deadline has passed, leaving only 90 days for a crowded market place to comply. With limited resources, such a tight timeframe may lead to inadequate agreements and/or increased risk exposure. Further, inadequate agreements caused by lack of resources and rushed documentation will create even further cost disparity for clearing between U.S. pension plans and European ones that will not be required to clear swaps. As such, CIEBA recommends that Category 2 Entities have more than 180 days to comply. Likewise, FIA/ISDA/SIFMA note that the compliance schedule should be lengthened and that buy-side entities, which may currently be categorized as Category 1 Entities, should not be required to commence clearing until the second quarter of 2013 at the earliest.

CDE argues that SDs and MSPs should comply before establishing other end-user deadlines. CDE believes that if Category 1 Entities cannot comply, then that will compound problems for Category 2 and 3 Entities. If an implementation schedule must be set, the CDE recommends one year for end-users, in light of their limited internal resources and the competition for external resources.

ACLI comments that complex issues will surface as market participants try to combine the agency framework presently existing in the futures markets (*i.e.,* customer-futures commission merchant) with the principal-to-principal framework that has existed in the over-the-counter swaps market. In addition to executing the necessary agreements, insurers will want to ensure they enter into agreements with parties that serve them best. The combination of these factors means that timeframes are too short and may result in smaller firms accepting unfavorable agreements with fewer counterparties, possibly concentrating risk. ACLI also highlights that insurers face an additional burden in ensuring that compliance with the Clearing Requirement is consistent with their state regulatory obligations.

Vanguard argues that additional time will be required to enter into the new agreements necessitated by the move to a cleared derivatives market. Vanguard highlights the large volume of such agreements and the lack of market standards. ICI also finds the compliance schedule to be too short in light of the needs to build and test new systems, adapt to new regulatory requirements, and educate customers about these changes.

Mastercard Worldwide urges the Commission to give non-bank firms at least 270 days to comply with the Clearing Requirement in respect of their foreign currency hedging activities, even if the firm is covered by section 4(k) of the Bank Holding Company Act. Westpac comments that Category 1 Entities should have at least 180 days to comply with the Clearing Requirement, noting that not all SDs, particularly smaller ones, are currently DCO members. Regional Banks also request that small SDs have at least 180 days to comply with the Clearing Requirement in light of their relative lack of resources and experience, as compared to larger SDs.

ACLI and FSR believe that the compliance schedule for the respective entity categories should run consecutively rather than concurrently. For example, the 180 days given to Category 2 Entities to comply with the Clearing Requirement should begin only after the expiration of the 90 days given to Category 1 Entities.

FSR does not believe there are sufficient resources, either internally, at market participants, or externally, at third party vendors, for the compliance schedule to run concurrently. If the schedule were to run concurrently, then resources would be allocated sequentially to the detriment of entities in the later implementation groups. ACLI, Joint Associations, and the Coalition of Physical Energy Companies (COPE) each express concern that the proposed compliance schedule does not provide sufficient time for the software companies and other vendors, upon which many smaller market participants rely, to develop, test, and debug the software and other technology that will be needed to ensure compliance with the Clearing Requirement. The Joint Associations and COPE each suggests the Commission take affirmative steps to solicit feedback from these software makers, particularly from vendors that provide ''position and trade capture software,'' in order to determine the amount of time market participants will need to implement software necessary to comply with the Clearing Requirement.

The Commission is finalizing the compliance schedule for the Clearing Requirement as proposed, except for the changes described above for ERISA plans and Third-Party Subaccounts. The Commission believes that the 90-, 180-, and 270-day implementation periods will give market participants sufficient time to comply with the Clearing Requirement. The Commission agrees with commenters such as Citadel and Better Markets that the move to required clearing has been proceeding for two years under the Dodd-Frank Act. This period should have allowed parties to contemplate and design implementation plans and to identify the resources needed to execute those plans. With the Commission's decision to focus on those swaps that are currently cleared when considering its initial Clearing Requirement determinations, market participants will be working with clearing offerings that are seasoned and established, justifying the timeframes provided for in the compliance schedule. For these reasons, the Commission also declines to change the concurrent nature of the compliance schedule.

Given the final rules for the definitions of swap dealers, and the threshold used in terms of annual notional volume of swaps for such swap dealers, the Commission does not believe it necessary to further distinguish between larger swap dealers and smaller ones for purposes of the implementation periods related to Clearing Requirements.[20] Similarly, the Commission does not believe it practicable to make distinctions between entities covered by section 4(k) of the Bank Holding Company Act for the purpose of establishing a 180-day

[20] Further Definition of ''Swap Dealer,'' ''Security-Based Swap Dealer,'' ''Major Swap Participant,'' ''Major Security-Based Swap Participant'' and ''Eligible Contract Participant,'' 77 FR 30596 (May 23, 2012).

implementation period as compared to a 270-day period.

In response to CDE, the Commission also notes that certain swaps would not be subject to the Clearing Requirement under section 2(h)(7) of the CEA when one of the counterparties to a swap (i) is not a financial entity, (ii) is using the swap to hedge or mitigate commercial risk, and (iii) notifies the Commission how it generally meets its financial obligations associated with entering into a non-cleared swap. If a market participant can claim an exemption, the Clearing Requirement will not be applicable. In all other cases, the implementation schedule for a Clearing Requirement would provide for up to 180 or 270 days for such market participants.

In response to concerns that state regulatory obligations for insurance companies might create obstacles to compliance with implementation schedules as suggested by ACLI, the Commission observes that those insurers would have a minimum of six months to work with their state regulators to address the matter. If no solution could be found within that time period, an affected insurer would be able to petition the Commission for specific relief.

The Commission also has taken affirmative steps to ensure that external providers of services to derivative market participants, such as derivatives software providers, have been included in the dialogue concerning implementation scheduling. At the May 2011 Implementation Roundtable, these vendors voiced their opinions with respect to how an implementation schedule could provide sufficient time for market participants relying on ''off-the-shelf'' derivatives tracking software to deploy such software such that they could comply with the Clearing Requirement. The Commission will continue to develop its understanding of technology issues and will solicit comment on this issue in forthcoming proposed Clearing Requirement determinations.

III. Cost-Benefit Considerations

A. Pre-Dodd-Frank Context

Prior to the enactment of the Dodd-Frank Act,[21] swaps were not subject to required clearing. However, the limited market data that is available suggests that over-the-counter (OTC) swap markets have been migrating into clearing over the last few years in response to natural market incentives as well as in anticipation of the Dodd-Frank Act's clearing requirement. LCH.Clearnet data, for example, shows that the outstanding volume of interest rate swaps cleared by LCH has grown steadily since at least November 2007, as has the monthly registration of new trade sides. Together, those facts indicate increased demand for LCH clearing services related to interest rate swaps, a portion of which preceded the Dodd-Frank Act.[22] Data available through CME and TriOptima indicate similar patterns of growing demand for interest rate swap clearing services, though their publicly available data does not provide a picture of demand prior to the passage of the Dodd-Frank Act in July 2010.[23] The trend toward increased clearing of swaps is likely to continue as the Commission begins determining that certain swaps are required to be cleared (Clearing Requirement determination). In fact, the Tabb Group estimates that 60–80% of the swaps market measured by notional amount will be cleared within five years of the time that the Dodd-Frank Act is implemented.[24]

B. Dodd-Frank Act Section 723(a)(3)

In the wake of the financial crisis of 2008, Congress determined, among other things, that swaps shall be cleared upon Commission determination. Specifically, section 723(a)(3) of the Dodd-Frank Act amended section 2(h)(1)(A) of the CEA to make it ''unlawful for any person to engage in a swap unless that person submits such swap for clearing to a derivatives clearing organization that is registered under this Act or a derivatives clearing organization that is exempt from registration under this Act if the swap is required to be cleared.'' [25] The statutory swap clearing requirement is designed to standardize and reduce counterparty risk associated with swaps, and, in turn, mitigate the potential systemic impact of such risks and reduce the likelihood for swaps to cause or exacerbate instability in the financial system.[26] It reflects a fundamental premise of the Dodd-Frank Act: The use of properly functioning central clearing can reduce systemic risk.

C. Final Rule

The rule contained in this adopting release addresses one aspect of required swap clearing under section 2(h) of the CEA: Implementation scheduling following a Commission determination that a class of swaps is required to be cleared. In other words, is immediate clearing required or is implementation subject to some delay. On September 20, 2011, the Commission published a NPRM.[27] The Commission proposed a phased-in compliance schedule for swaps subject to Clearing Requirement determinations that distinguishes among Category 1 Entities, Category 2 Entities, and all other entities (referred to for purposes of this section III as ''Category 3 Entities''); those entities, respectively, would have 90 days, 180 days, and 270 days, from the date of the Clearing Requirement determination to comply with the Clearing Requirement.[28] The NPRM also requested comment with respect to the costs and benefits of the proposed schedule, including, specifically, data, assumptions, calculations, or other information to quantify its costs and benefits, as well as alternatives to it. The Commission received 26 comment letters in response, none of which provided quantitative analysis regarding the costs or benefits of the proposed compliance schedule.[29]

These comments touch upon a variety of issues, and include a number that supported the Commission's approach as proposed. Others note certain areas of concern about costs or benefits under

[24] *See* Tabb Group, ''Technology and Financial Reform: Data, Derivatives and Decision Making.''

[25] Section 2(h)(2) of the CEA charges the Commission with responsibility for determining whether a swap is required to be cleared (a Clearing Requirement determination).

[26] When a bilateral swap is moved into clearing, the clearinghouse becomes the counterparty to each of the original participants in the swap. This standardizes counterparty risk for the original swap participants in that they each bear the same risk attributable to facing the clearinghouse as counterparty. In addition, clearing mitigates counterparty risk to the extent that the clearinghouse is a more creditworthy counterparty relative to those that each participant in the trade might have otherwise faced. This is because a clearinghouse benefits from netting with counterparties and may compel counterparties to post additional initial margin as collateral or force them to reduce their outstanding positions when markets move against them. Clearinghouses have demonstrated resilience in the face of past market stress. Most recently, they remained financially sound and effectively settled positions in the midst of turbulent events in 2007–2008 that threatened the financial health and stability of many other types of entities.

[27] *See* 76 FR 58186.

[28] The schedule contained in the NPRM, like the one contained in this adopting release, can be used at the option of the Commission when issuing Clearing Requirement determinations.

[29] ACLI provides an estimate for one member's information technology and legal costs to comply with all Title VII requirements. The estimate does not include any calculations and does not separate out any costs they believe are directly attributable to this rule.

the rule as proposed, and either expressly propose alternatives or raise issues that have caused the Commission to consider alternatives to it. Among other things, commenters responded to the phased approach, the entities included in Category 1, Category 2, and Category 3, the amount of time that the schedule provides for entities in each category, and the optionality of the schedule.

In the absence of this rule, market participants would be required to comply with the Clearing Requirement immediately upon issuance of a Clearing Requirement determination by the Commission. Pursuant to the rule, however, when the Commission deems it appropriate, market participants will be provided additional time as prescribed in the rule's schedule to comply with Clearing Requirement determinations. Category 1 entities, which include, among others, SDs, MSPs, and Active Funds,[30] will have 90 days from the date that a Clearing Requirement determination is published in the **Federal Register** to comply. Category 2 Entities, which include commodity pools; private funds as defined by the Investment Advisers Act of 1940, other than Active Funds; and banks; but not Third-Party Subaccounts, will have 180 days to comply with a new Clearing Requirement determination. Category 3 Entities are those with Third-Party Subaccounts, as well as any other entity not eligible to claim an exception under section 2(h)(7) of the CEA, including ERISA plans, and they will have 270 days to comply with a Clearing Requirement determination once it is published in the **Federal Register**.

The discussion that follows considers the costs and benefits of, and alternatives to, the rule in this adopting release.

D. Statutory Mandate To Consider the Costs and Benefits of the Commission's Action: CEA Section 15(a)

Section 15(a) of the CEA [31] requires the Commission to consider the costs and benefits of its actions before promulgating a regulation under the CEA or issuing certain orders. Section 15(a) further specifies that the costs and benefits shall be evaluated in light of five broad areas of market and public concern: (1) Protection of market participants and the public; (2) efficiency, competitiveness, and financial integrity of futures markets; (3) price discovery; (4) sound risk management practices; and (5) other public interest considerations. The Commission considers the costs and benefits resulting from its discretionary determinations with respect to the section 15(a) factors.

In this rulemaking the Commission is not imposing clearing requirements, but is exercising its discretion to stagger required clearing implementation according to a particular schedule and subject to the conditions specified in these rules. For purposes of this analysis, the Commission considers the costs and benefits attributable to its choices in this rulemaking—*e.g.,* to stagger the implementation of clearing requirements and to do so in the manner prescribed—against those that would arise absent this Commission action—*i.e.,* if implementation of the Dodd-Frank Act's Clearing Requirement for those swaps that the Commission separately determines to be subject to clearing was not staggered according to the rule's schedule.

For reasons discussed in more detail below, the cost and benefits associated with requiring clearing immediately upon the Clearing Requirement determination for a swap class, or after some longer versus shorter period of delay, are not susceptible to meaningful quantification. As described above, these are not the costs and benefits of implementing Clearing Requirement determinations, but rather the costs and benefits of implementing them more slowly than would be required in the absence of this rule. The Commission is not aware of any analog to either an immediate or delayed requirement to establish the capability to clear that would produce data that the Commission could use to estimate the difference in costs and benefits between the two. Moreover, any data that might be gleaned from the experiences of an individual market participant establishing a relationship with a futures commission merchant (FCM) during normal market conditions would not reflect the influence of a number of effects that are likely to result from the simultaneous implementation of many market participants in a series of three waves. This coordinated movement creates both costs and benefits that cannot be quantified using data drawn from current market conditions. Notwithstanding these limitations, the Commission identifies and considers the costs and benefits of this rule in qualitative terms.

E. Costs and Benefits of This Rule

Determining whether to implement required clearing immediately upon Commission determination or after some period of delay necessarily involves cost and benefit tradeoffs. On the one hand, delaying required clearing implementation also delays the benefits of clearing of certain swaps, including reduced counterparty risk and increased stability in the financial system. These benefits are substantial, and any delay in their realization represents a cost to the market and the public. On the other hand, requiring implementation immediately or within a very compressed timeframe creates certain costs for industry participants. Reducing these costs—enumerated below—by extending the implementation schedule represents a benefit.

First, to meet pressing timelines, some firms will need to contract additional staff or hire vendors to handle some necessary tasks or projects. Additional staff hired or vendors contracted in order to meet more pressing timelines represent an additional cost for market participants. Moreover, a tightly compressed timeframe raises the likelihood that more firms will be competing to procure services at the same time; this could put firms that conduct fewer swaps at a competitive disadvantage in obtaining those services, making it more difficult for them to meet required timelines.[32] In addition, it could enable service providers to command a pricing premium when compared to times of ''normal'' or lesser competition for similar services. That premium represents an additional cost when compared to a longer implementation timeline.

Second, if entities are not able to comply with Clearing Requirement determinations by the required date, they may avoid transacting swaps that are required to be cleared until such a time as they are able to comply. In this event, liquidity that otherwise would result from those foregone swaps would be reduced, making the swaps more expensive for market participants taking the other side. Moreover, firms compelled to withdraw from the market pending implementation of required clearing measures will either leave certain positions un-hedged—potentially increasing the firm's own default risk, and therefore the risk to their counterparties and the public. Alternatively, firms compelled to withdraw from the market for a period of time could attempt to approximate

[30] An ''Active Fund'' is any private fund as defined in section 202(a) of the Investment Advisers Act of 1940, that is not a third-party subaccount and that executes 200 or more swaps per month. The Commission does not intend to use the designation for any purpose beyond this rule.

[31] 7 U.S.C. 19(a).

[32] *See* letter from CIEBA.

their foregone swap hedges using other, likely more expensive, instruments. And to the extent the withdrawing entities are market makers, they will forsake the revenue potential that otherwise would exist for the period of their market absence.

Third, firms may have to implement technological solutions, sign contracts, and establish new operational procedures before industry standards have emerged that address new problems effectively. To the extent that this occurs, it is likely to create costs. Firms may have to incur additional costs later to modify their technology platforms and operational procedures further, and to renegotiate contracts—direct costs that a more protracted implementation schedule would have avoided.[33] Moreover, costs created by the adoption of standards that fail to address certain problems, or attributable to undesired competitive dynamics resulting from such standards, may be longstanding.

Given the factors identified above, this rulemaking aims to strike the optimal cost-balance tradeoff amidst the competing concerns. Shorter timelines will tend to push greater numbers of swaps into clearing more quickly, reducing the counterparty and systemic exposures in ways that were intended by the Dodd-Frank Act—a benefit. But, shorter timelines also increase the costs as discussed above. Longer timelines have the opposite effect, decreasing the costs described above, but increasing the amount of time during which counterparty and systemic exposures that would otherwise be mitigated by required clearing persist.

In theory, the optimal tradeoff between the two is the point at which the marginal cost of an additional one-day delay in implementation equals the marginal benefits of the same incremental delay. But it is not possible, at this stage, to determine the marginal costs or benefits of each day of delay. To estimate such values reliably requires data that does not yet exist—*i.e.,* data gleaned in the midst of the transition process. Therefore, neither the Commission nor commenters are able to assert conclusively that any particular schedule is more or less advantageous relative to all others that the Commission might have considered. Thus, in the face of these practical limitations, the Commission has relied on qualitative considerations, informed by commenters, to guide the necessary tradeoff determinations.

The Commission, informed by its consideration of comments and alternatives, discussed in the sections above and below, believes that the approach contained in this adopting release is reasonable and appropriate in light of the tradeoffs described above. The schedule established here gives the Commission the opportunity to provide additional time to entities in ways that generally align with: (1) Their resources and expertise, and therefore their ability to comply more quickly; and (2) their level of activity in the swap markets, and therefore the possible impact of their swap activities on the stability of the financial system. Entities with the most expertise in, and systems capable to transact, swaps also are likely to be those whose swaps represent a significant portion of all transactions in the swap markets. They are more likely to be able to comply quickly, and the benefits of requiring them to do so are greater than would be the case for less active entities. On the other hand, entities with less system capability and in-house swap expertise may need more time to comply with Clearing Requirement determinations, but it is also likely that their activities represent a smaller proportion of the overall market, and therefore are less likely to create or exacerbate shocks to the financial system.[34] The Commission believes that Category 1 encompasses entities likely possessing more advanced systems and expertise, and whose swap activities constitute a significant portion of overall swap market transactions, while Categories 2 and 3 encompass those likely to have relatively less developed infrastructure and whose swap activities constitute a less significant proportion of the market.

The Commission notes that clearing of certain swaps, and in particular interest rate and credit default swaps, has been occurring for some time; by implication, this indicates that the requisite technology, contractual terms, and operational standards among clearinghouses, clearing members, and some clients exist.[35] The Commission also notes that it is likely that the degree to which firms have already implemented such technology, contracts, and operational patterns varies considerably, particularly among potential customers of FCMs, and that the legal, technological, and operational changes that are necessary for less frequent swap market participants may be more substantial. However, given the availability of FCMs (through which market participants may clear swaps) as well as the technology and contractual standards necessary to clear swaps, the Commission believes that a number of firms can reduce the costs associated with meeting compliance timelines by forming necessary FCM relationships and contracts, and implementing the necessary technology, before the Commission begins issuing Clearing Requirement determinations.[36] Nonetheless, the Commission considered these concerns, among other issues, when determining to grant Category 2 and Category 3 Entities an extended 180 and 270 days, respectively, rather than requiring them to comply at the same time as Category 1 Entities.

Moreover, use of the schedule contained in this release is at the Commission's discretion; in situations where the Commission determines that the benefits of delayed implementation do not justify the additional costs of such a delay, the Commission may require immediate compliance with Clearing Requirement determinations. Therefore, in situations where the Commission determines that a swap must be cleared, and further believes that clearing the swap will not necessitate significant changes to market participants' technology, legal arrangements, or operational patterns, the Commission is likely to determine that immediate compliance is

[33] *See* e.g., ACLI letter.

[34] OCC data demonstrates that among insured U.S. commercial banks, ''the five banks with the most derivatives activity hold 96 percent of all derivatives, while the largest 25 banks account for nearly 100% of all contracts.'' The report is limited to insured U.S. commercial banks, and also includes derivatives that are not swaps. However, swap contracts are included among the derivatives in the report, constituting approximately 63 percent of the total notional value of all derivatives. These statistics suggest that a relatively small number of banks hold the majority of swap positions that could create or contribute to distress in the financial system. Data is insufficient, however, to generalize the conclusions to non-banking institutions. *See* ''OCC's Quarterly Report on Bank Trading and Derivatives Activities: Fourth Quarter 2011'' at 11. *http://www.occ.treas.gov/topics/capital-markets/financial-markets/trading/derivatives/dq411.pdf.*

[35] For example, CME and ICE both began clearing credit default swaps (CDS) in 2009. As of March 2012, ICE had cleared more than $11 trillion notional in CDS, and had 26 clearing members in CDS. CME began clearing interest rate swaps in 2010 and currently has open interest of $210 billion notional and 15 clearing members in interest rate swaps. Moreover, by March of 2010, 26 of the largest market makers were clearing interest rate derivatives. At that time, ISDA asserted that ''In excess of 90% of new dealer-to-dealer volume in Eligible Trades of Interest Rate Derivative products, and total dealer-to-dealer volume in Eligible Trades of Credit Derivative products is now cleared through CCPs.'' *See http://www.newyorkfed.org/newsevents/news/markets/2010/100301_letter.pdf.*

[36] The Commission understands approximately 2.5 months is sufficient for some market participants to enter into a clearing arrangement with an FCM for purposes of clearing swaps. *See* External Meeting with Blackrock, 4/2/2012. *http://www.cftc.gov/LawRegulation/DoddFrankAct/ExternalMeetings/dfmeeting_040212_1463.*

warranted. In these cases, the benefits of required clearing will be realized immediately.

The discretionary nature of the schedule contained in the adopting release, however, may create some uncertainty for market participants, and consequently may create some costs as market participants take steps to protect themselves from the impact of such uncertainty. For example, if a market participant believes that the Commission may issue a determination that a particular swap must be cleared, but is not certain whether clearing will be required immediately or according to the schedule contained in this release, that entity may begin developing the capacity to clear such a swap prior to a determination by the Commission in order to reduce the risk that it would be forced to stop trading the swap while it comes into compliance. If that participant's belief that the Commission will require the swap to be cleared is incorrect, the participant will have unnecessarily borne the cost of preparing for such a possibility. The Commission considered this cost, but believes that the notice and comment approach that the Commission will use when issuing Clearing Requirement determinations mitigates it. Each proposed Clearing Requirement determination will be published in the **Federal Register** and will be available for public comment for a period of at least 30 days; the Commission anticipates clarifying in each proposed Clearing Requirement determination whether compliance will be required immediately upon the final determination or according to the schedule contained in this rule. This approach will provide market participants with notice regarding the expected timeline for compliance, which will mitigate costs associated with uncertainty about compliance timelines.

F. Consideration of Comments and the Costs and Benefits of Alternatives

Commenters propose or otherwise highlight points that suggest alternatives with respect to various aspects of the NPRM.[37] These aspects, as categorized for discussion below, are: (1) Phased approach; (2) entity categorization; (3) schedule increments; and (4) schedule discretion.

Phased Approach

A number of commenters express support generally for additional time to comply with Clearing Requirement determinations and for a phased approach that distinguishes between various types of entities.[38] Commenters note that the additional clarity provided by the schedule will encourage industry participants to commit resources to overcoming structural and economic barriers that prevent widespread clearing.[39] Some commenters, however, maintain that the phased approach used to implement clearing requirement determinations should not be applied to exchange trade requirements.[40] The AIMA believes that effective required clearing will enable execution of swaps on SEFs and DCMs and that linking the trading and clearing compliance schedules could delay the transition into central clearing. In response to these comments, the Commission has decided to limit the scope of this rule to Clearing Requirement determinations, to retain the phased approach to required clearing, and to address implementation of trade execution in a separate rule.

Some commenters note that a phased approach could complicate implementation for large investor advisor firms that may have multiple funds in separate categories. Specifically, AII expresses concern that it may be difficult for institutional advisers to execute block trades for multiple clients during the implementation period because they will have to consider whether each client must comply with the Clearing Requirement. Nevertheless, AII recommends retaining the phased approach with at least 18 months for entities to comply. The Commission recognizes that such complexities exist and could introduce certain costs for large investor adviser firms. However, it is not clear that delaying the implementation period would alleviate this concern, although prolonging the implementation period likely would exacerbate the issue by extending the time during which such concerns are relevant. Moreover, the Commission notes that the benefits of required clearing are substantial and that further delays create costs borne by market participants and the public. In these circumstances, the Commission considers the latter consideration most compelling and, accordingly, has determined not to delay implementation beyond what is set forth in the schedule in the adopting release.

Finally, relative to the alternative of immediate implementation following a Commission Clearing Requirement determination—the result in the absence of this rule—the Commission believes that the phased approach reflected in this adopting release is superior. The immediate implementation alternative would not mitigate the costs, enumerated above, to market participants and the public. In contrast, while delaying implementation also entails a different set of costs, also discussed above, the Commission has carefully tailored the rule's phased approach to contain and dampen them.

Entity Categorization

Commenters generally agree that some buy-side representation in Category 1 is valuable in order to ensure that buy-side interests are represented as technological and legal standards begin to form,[41] though commenters express varied views about whether Active Funds should play that role, and what entities should be included in that group. Some commenters state their belief that transaction volume is an appropriate proxy for a firm's level of expertise in conducting swaps and, therefore, is a useful criterion for identifying the buy-side entities that are best equipped to make the transition as part of Category 1.[42] Some express concern, however, that as defined in the NPRM, the term ''Active Fund'' could be over-inclusive and recommend raising the threshold number of swaps or excluding swaps that are hedges or have a notional value below $10 million.[43]

The Commission's intent in selecting Active Funds to participate in Category 1 is to identify those market participants that are larger and have significant experience in the swap markets. To ensure that the rule effectively selects for these entities, and in response to commenters, the Commission has raised the threshold number of swaps from a trailing average of 20 swaps per month over the previous twelve months, to a trailing average of 200 swaps per month over the previous twelve months. The Commission, however, believes that

[37] Other commenters raise issues beyond the scope of this rule—*i.e.,* implementation timing of required clearing—that, consequently, are beyond, and not appropriate for Commission consideration in, this rulemaking. Specifically, some commenters request that the Commission establish a comprehensive schedule for implementation of all rules and requirements pursuant to the Dodd-Frank Act. (*See* Barnard, MFA.) Others request a comprehensive schedule of clearing requirement determinations (*See, e.g.,* CDEU), an issue already addressed by the Dodd-Frank Act and the rule regarding the Process for Review of Swaps for Mandatory Clearing. *See* section 2(h)(2)(B)(ii) of the CEA; 76 FR 44473.

[43] *See* letters from AII and CDEU.

further criteria restricting the swaps that are included against that count would create incremental administrative and operational costs that do not justify the resulting benefit, and therefore has not placed further restrictions on the types of swaps that count against the threshold. However, per commenters' request for clarification, the Commission is clarifying that the average monthly threshold of swaps applies to new swaps that the entity enters into, and it does not apply to novations, amendments, or partial tear-ups.

ACLI maintains that there is diversity among buy-side participants in their use of swaps, and expresses concern that Active Funds may not be able to effectively represent diverse buy-side interests, and those of insurance companies in particular. ACLI, however, does not describe or quantify specific costs that it believes would result from this circumstance.[44] The Commission acknowledges that buy-side market participants are diverse and may have specific needs reflecting concerns or interests unique to individual industries or even individual entities. However, the Commission also notes that the fact of certain differences among firms does not exclude the possibility of remaining similarities. Further, it believes that realizing the benefits provided by some buy-side representation in Category 1 is preferable to a scenario in which these benefits are foregone by removing Active Funds from Category 1 for required clearing implementation. Moreover, in the absence of any input as to how dissimilarities may specifically impact the compliance implementation process, the apparent solution to ACLI's concern would be to include insurance companies in Category 1 to assure representation of their interests earlier in the implementation process. While any Category 2 Entity or any other entity may elect to comply sooner than the schedule requires (and are encouraged by the Commission to do so), the Commission finds no basis to believe that the benefits of requiring all insurance companies to participate in Category 1 warrant the additional costs that such an approach would create for them.

MFA expresses concern that questions related to the term ''Active Fund'' could create an additional burden for fund operations and Commission staff, and proposed that all private funds be placed in Category 2 in order to eliminate this burden.[45] MFA, however, does not specify what these questions are, nor the cost to funds associated with addressing them. In the absence of more specific information about the nature of the potential questions and their associated costs, the Commission has insufficient basis to conclude that costs to clarify Active Fund issues—either for fund operators or itself—are likely to be significant. Accordingly, it believes that the benefits of early-stage, buy-side representation warrant retention of the Category 1 Active-Fund component.

Some commenters express concern about the definition of the term Third-Party Subaccounts. They maintain that the Third-Party Subaccount category should include any managed accounts, regardless of the level of authority granted in the advisory agreement to enter into trading agreements, on grounds that the operational and contractual challenges for moving swaps related to these accounts into clearing will be much the same regardless of whether the accounts' investment management agreements have ''specific approval'' requirements.[46] Similarly, some commenters advocate in favor of including all ERISA plans in Category 3 given their expectations that (1) Category 2 entities will bear more ''start-up'' costs related to required clearing than those in Category 3, and (2) putting some ERISA plans in Category 2 and others in Category 3 will make overlays more difficult and costly.[47] Conversely, AIMA specifically states that making all funds Category 3 Entities is not a suitable approach because it would eliminate buy-side representation during the early stages of implementation, and, consequently, urges the Commission not to adopt this approach.[48]

Furthermore, AIMA and FSR asserted that some Third-Party Subaccounts may be ''private funds'' as defined in the Investment Advisers Act of 1940 that would otherwise qualify as Active Funds; AIMA expresses concern that allowing such funds 270 days to comply with clearing requirements could provide them a competitive advantage relative to other Active Funds that are not Third-Party Subaccounts for the period of time between the compliance dates for Categories 1 and 3. To level this playing field, AIMA proposes placing all Active Funds in Category 1, regardless of whether the funds also meet the criteria for a Third-Party Subaccount. In support of this proposition, AIMA opines that large institutional managers of large numbers of Third-Party Subaccounts are likely to have sufficient resources to make the transition within the 90 days required of Category 1 Entities.

The Commission recognizes that some managed funds that do not require third party sign-off for clearing agreements, nevertheless, may choose to involve their clients in negotiation of relevant documents, and that some costs may result from placing some managed funds and ERISA plans in Category 2 and others in Category 3. After considering the alternatives posed by commenters, the Commission has modified the definition of Third-Party Subaccount to include managed accounts for which the investment manager is responsible for clearing documentation, regardless of whether the investment manager has explicit execution authority. In addition, the Commission has determined not to include ERISA plans in Category 2. The Commission has made these changes despite the fact that commenters do not attempt to quantify the costs associated with these provisions, nor do they recognize that such costs must be considered against the costs of further delaying required clearing implementation by a number of managed funds and ERISA plans. A fundamental premise of the Dodd-Frank Act is that central clearing minimizes risk to counterparties and the financial system as a whole; therefore, further delaying implementation of one or more groups of market participants creates costs associated with prolonged exposure of the financial system to a greater number of un-cleared swaps. Nonetheless, the Commission believes it appropriate to permit certain market participants an additional 90 days to come into compliance with the clearing requirement based on the comments received.

Schedule Increments

Some commenters express the opinion that 90, 180, and 270 days is sufficient for Category 1, 2, and 3 Entities, respectively, to comply with Clearing Requirement determinations.[49] Several other commenters, however, expressed concern that the additional time provided in this rule may not be sufficient for some entities to comply.[50] In that vein, commenters state that the

[44] *See* ACLI letter.

[45] *See* MFA letter.

[46] *See e.g.,* letters from ICI and AII.

[47] *See* CIEBA letter.

[48] *See* AIMA letter.

[49] *See e.g.,* letters from Better Markets and MFA. MFA qualifies its support, stating that certain additional rules should be adopted prior to the schedule becoming effective, and also requests changes to the entities included in each category, but still generally supports the 90-, 180-, and 270-day implementation schedule.

[50] *See e.g.,* letters from AII, CIEBA, ICI, FIA/ISDA/SIFMA, and FSR.

schedules may not be sufficient for contract negotiations to be completed,[51] that pressing timelines could undermine the ability of some entities to negotiate effectively,[52] and that rapid compliance may lead to the creation of industry standards that are not fair or prudent.[53] Some commenters also express concern that entities in Categories 2 and 3 may not be able to find vendors able to provide sufficient support to meet the deadlines effectively.[54]

It is impossible to quantify the costs and benefits of one particular schedule phase-in increment relative to another—*e.g.,* 90 days to comply versus 110—and the permutations of such an exercise would be endless, even if possible. Similarly, as discussed above, whether the schedule included in this adopting release mitigates costs to a greater degree than other increments the Commission might have adopted as an alternative to immediate implementation of required clearing (the result in the absence of this rule) is also a question that cannot be resolved with precision. In light of these limitations, however, the Commission has drawn upon its historical experience monitoring clearing, as well as its consideration of the qualitative feedback offered by market participants, in determining to incorporate the 90-, 180-, and 270-day benchmark features within the schedule adopted in this release. In so doing, the Commission believes that it has selected a reasonable schedule that is appropriate and well-suited to mitigate compliance pressures for market participants, and fairly accommodate the various competing interests involved.

As is stated above, the Commission recognizes that extending the compliance schedule for one or more entities will reduce compliance costs for market participants in a number of different ways, but will also increase the amount of time during which market participants and the public do not benefit from the protections provided by mandatory clearing.

Scheduling Discretion

Some commenters support the Commission's retention of discretion to override the schedule in this release to require immediate clearing when it believes that the benefits do not justify the associated costs.[55] These commenters note that over time market participants will gain experience to enable swifter compliance with later Clearing Requirement determinations, and maintain that, over time, the compliance schedules will not be warranted for Clearing Requirement determinations for new types, groups, or categories of swaps within an asset class that are already subject to a prior Clearing Requirement.[56] Other commenters, however, support application of the schedule to all Clearing Requirement determinations in order to reduce uncertainty and facilitate orderly transitions to compliance.[57]

As discussed below, the Commission believes that the challenges of compliance are likely to vary depending on whether previous Clearing Requirement determinations have been made for other swaps in the same class, how long previous Clearing Requirement determinations for swaps in that class have been in place, the similarities between the swaps addressed by a determination and swaps subject to previous determinations, and a number of other factors. Therefore, the Commission believes that the tradeoff between the costs and benefits of more rapid compliance will vary as well. Where Clearing Requirement determinations pertain to swaps that have important points of similarity with swaps already required to be cleared, it is likely that the costs associated with more rapid compliance will be significantly less, and therefore the balance will shift in favor of a shorter compliance deadline than would be allowed under the schedule contained in this rule. Also, by including the applicable compliance schedule within its public notifications of a proposed Clearing Requirement determination, the Commission will mitigate uncertainty costs that could result.

G. Consideration of Section 15(a) Factors

(1) Protection of Market Participants and the Public

Category 1 includes, among others, SDs as well as MSPs and Active Funds. If SDs were not able to comply immediately with a Clearing Requirement determination, and were not given additional time to comply, they could choose to withdraw from the market as they work toward compliance. Such withdrawal would create lost opportunities for them as they fail to capture business that they would have otherwise conducted during that period. If MSPs or Active Funds choose to withdraw from the market while they work to come into compliance, it could become more costly for them to either effectively create or hedge certain exposures, which could also prompt them to leave certain risks un-hedged that they would otherwise mitigate through the use of swaps. By giving Category 1 Entities an additional 90 days to comply with Clearing Requirement determinations, the schedule contained in this adopting release reduces the likelihood of these entities withdrawing from the swap markets while they work toward compliance; this, in turn, reduces the probability that these Category 1 Entities will bear the potential costs of un-hedged risk exposure.

Moreover, the Commission believes that SDs are an important source of liquidity for swap market participants. If SDs withdraw from the market while they work toward compliance, it could negatively impact swap liquidity, increasing costs for market participants forced to hedge certain risks through less efficient means (or not at all) for a period of time. The costs of not hedging certain risks would be borne not only by the firms that choose such an approach, but by the public in the form of increased counterparty risk throughout the financial system. Again, by providing additional time for SDs to comply with Clearing Requirement determinations, the schedule in the adopting release facilitates an orderly transition and reduces the likelihood that the costs associated with SDs withdrawing from the market for a period of time would materialize. The Commission considered this benefit in light of the cost associated with delayed compliance among Category 1 Entities and believes that an appropriate balance has been struck.

The Commission also anticipates that the staggered compliance schedule contained in this rule will, to some extent, enable Category 2 and 3 Entities to adopt technological, legal, and operational standards developed by Category 1 Entities. To the extent that this occurs, it will reduce the number of entities that are working in parallel to develop solutions to the same problems by allowing Category 2 and 3 Entities some time to wait for Category 1 Entities and vendors to develop viable solutions to technological, legal, and operational challenges. Some of those solutions are likely to be proprietary, while others

[51] *See e.g.,* ACLI letter.

[52] *See* letters from ACLI, AII, and CIEBA.

[53] *See* letters from ACLI and ICI.

[54] *See* letters from ACLI, CDEU, CIEBA, COPE, and EEI. COPE and EEI specifically requested that the Commission determine whether ''off the shelf'' software is available to meet the needs of entities that do not yet have necessary technology. Further conversation clarified that both were concerned about technologies that extend beyond those directly related to Clearing Requirements established by the Act.

[55] *See* letters from Barnard and MFA.

[56] *See* letters from Barnard and MFA.

[57] *See* letters from FHLB and ICI.

will likely relate to non-proprietary standards that must be shared in order to be effective. Both types of advances can reduce costs for Category 2 and 3 Entities. In the case of non-proprietary standards, Category 2 and 3 entities will benefit from the opportunity to adopt them without having to invest in their development. In the case of proprietary solutions, some of them are likely to be owned by vendors marketing them to multiple market participants, thereby spreading the development costs among their clients. Each of these consequences is likely to reduce overall development costs for the industry, and development costs for Category 2 and 3 Entities, in particular.[58]

In weighing the tradeoff between shorter versus longer compliance timelines, the Commission believes Category 2 Entities are likely to be less well-resourced and less active in these markets. Therefore the dynamic between more or less rapid compliance tips in favor of providing additional time for these entities. As stated above, by providing 180 days, it becomes more likely that Category 2 Entities will be able to draw from lessons learned and standards established by Category 1 Entities. It also increases the likelihood that where Category 2 Entities will depend on vendors for help developing and implementing necessary technology, legal agreements, and operational patterns, they will not have to compete as directly with Category 1 Entities for those resources.

The Commission believes that entities with Third-Party Subaccounts have an additional challenge of transitioning hundreds (or in some cases, thousands) of subaccounts into compliance with Clearing Requirement determinations, which may require formalizing new agreements with each of their customers, and educating their customers about how the Clearing Requirement will impact costs and operations. In the Commission's view, this additional challenge justifies additional time for compliance beyond what is allowed for Category 2 Entities.[59]

As described above, the Commission recognizes that delaying implementation creates some additional costs in the form of delayed protections that central clearing of swaps would otherwise provide—standardized and reduced counterparty risk for swaps that are required to be cleared, and associated reductions in the overall level of systemic risk. However, the Commission believes that this approach appropriately balances the tradeoff by requiring firms that are likely to be the most active in these markets to comply first and allowing additional time for those whose positions are less likely to pose significant risk to the financial system as a whole.

(2) Efficiency, Competitiveness, and Financial Integrity of Futures Markets

As suggested above, Category 1 Entities are likely to establish technological, legal, and operational standards that will influence or be adopted by Category 2 and 3 Entities. This will (1) serve to reduce development costs that Category 2 and 3 Entities otherwise would face, (2) focus responsibility for shaping new platforms and standards on those firms that possess greater cleared swap experience, and (3) support the likelihood that new platforms and standards will reflect current best practices. Each of these elements promotes the efficiency and integrity of the markets. Moreover, by reducing the number of entities necessarily working in parallel to develop such standards, and allowing Category 2 and 3 Entities to learn from and build on the solutions developed by Category 1 Entities, the phased schedule contained in this adopting release holds the potential to foster compatibility and interoperability, which reduces the cost and complexity of interconnectedness.

The phased schedule as adopted also will promote an implementation plan in which similar entities (*i.e.,* those that usually compete with one another) generally have the same compliance timelines, thereby protecting competition during the transition period. One commenter states, ''A phased approach to compliance will allow the Commission to balance its goal of obtaining adequate representation at each stage of the regulatory roll-out with the goal of avoiding anti-competitive concerns.'' [60]

That said, however, the Commission also has to balance the goal of maintaining a level playing field with other priorities. In particular, the Commission deems it important to ensure representation of both buy and sell side firms in the earliest stages of compliance. Moreover, the Commission believes that, in certain circumstances, variance in compliance burden among competitors warrants placing them in different implementation categories. Some competitive consequences may result from the need to balance these various priorities. The Commission believes, however, that it has built sufficient flexibility into the phased schedule to mitigate such consequences; specifically, the schedule preserves entities' ability to respond to competitive incentives to move into clearing voluntarily prior to the date required by the compliance schedule. The Commission believes that providing flexibility to allow expression of competitive market incentives is preferable to the alternative of imposing a more compressed compliance schedule for purposes of maintaining a level playing field. As discussed above, a shorter schedule could also increase the likelihood that industry standards established during the implementation period could create and perpetuate undesirable competitive dynamics. In sum, the Commission anticipates that any temporary impacts on competitive dynamics created by the phased implementation approach it is adopting are likely to be less costly than an approach that increases the likelihood of sustained competitive disparities, and therefore has chosen not to shorten the compliance schedule as a remedy to address the risk of competitive advantages that may be conferred on market participants that have later compliance dates.

As discussed above, for the 90-, 180-, and 270-day periods that Clearing Requirements are delayed, the markets are exposed to the risks that the Clearing Requirements would mitigate. However, the Commission has considered this cost for the limited delay durations prescribed in light of the benefits—reduced implementation costs, greater degrees of compatibility and interoperability, and lessened risk of market disturbances from the withdrawal of entities that are not able to comply immediately—and considers the tradeoff reflected in the rules warranted.

(3) Price Discovery

Neither the Commission nor commenters have identified consequences for price discovery that are expected to result from this rule.

(4) Sound Risk Management Practices

An orderly transition for swaps subject to a Clearing Requirement determination promotes sounder risk management practices, particularly during the transition period. As mentioned above, in the absence of the

[58] As indicated in the NPRM, to the extent that Category 1 Entities bear a larger portion of the industry wide ''start-up'' or development costs, the Commission believes this is appropriate since they are likely to be among the most active participants in these markets.

[59] As stated in the NPRM, Category 2 and 3 Entities that want to come into compliance sooner than the 180- and 270-day deadlines are allowed, and encouraged, to do so.

[60] *See* ICI letter.

schedule provided in this rule, some entities might exit swap markets while taking steps to come into compliance. This result could reduce liquidity, particularly if the withdrawing entities are SDs. Reduced liquidity likely would increase the cost of using swaps to manage risk by increasing spreads, and make it more difficult for entities to enter and exit positions in a timely manner. It could also prompt some entities to maintain exposures that they would otherwise use swaps to mitigate, which would elevate the risk profile of those entities and the level of risk that their counterparties bear as a consequence. By providing a timetable for orderly transition, this rule encourages continued participation in the swap markets and use of swaps for risk mitigation purposes during the transition.

Clearing Requirement delay does prolong existing costs associated with not having counterparty credit risk monitored and managed effectively by a DCO. More prompt implementation of Clearing Requirements would have the benefit of preventing losses from accumulating over time through the settlement of variation margin between a DCO's clearing members each day. The settlement of variation margin each day (and in some cases, multiple times per day) reduces the size of exposures a clearinghouse faces should one of its counterparties default, and the mechanisms that a clearinghouse has to ensure its own solvency reduce the probability that it would default on obligations to clearing members. Moreover, more prompt implementation also promotes the use of initial margin as a performance bond against potential future losses such that if a party fails to meet its obligation to pay variation margin, resulting in a default, the DCO may use the defaulting party's initial margin to cover most or all of any loss based on the need to replace the open position. The Commission believes, however, that (1) it has tailored the rule to limit the degree, and thereby these costs attributable to, clearing implementation delay and (2) the benefits afforded by the schedule's operation when the Commission elects to use it warrant the costs of the tailored implementation delay.

(5) Other Public Interest Considerations

The schedule allows market participants to comply with the requirements of the Dodd-Frank Act and provides a sound basis for achieving the overarching Dodd-Frank Act goals of reducing counterparty risk and promoting stability of the financial system.

IV. Related Matters

A. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) requires that agencies consider whether the rules they propose will have a significant economic impact on a substantial number of small entities and, if so, provide a regulatory flexibility analysis respecting the impact.[61] As stated in the NPRM, the subject of this rulemaking provides a compliance schedule for a new statutory requirement, section 2(h)(1)(A) of the CEA, and does not itself impose significant new regulatory requirements.[62] Accordingly, the Chairman, on behalf of the Commission, certified pursuant to 5 U.S.C. 605(b) that the proposed rule would not have a significant economic impact on a substantial number of small entities. The Commission then invited public comment on this determination.

FSR comments that the NPRM failed to evaluate the impact of the proposed compliance schedule for the Clearing Requirement on a substantial number of small entities. FSR argued that small entities may have to bear a more significant burden than larger entities in establishing clearing arrangements with FCMs because larger entities will be able to enter into such arrangements first.

In response, the Commission points out that the compliance schedule for the Clearing Requirement will affect only eligible contract participants (ECPs). Pursuant to section 2(e) of the CEA, only ECPs may enter into swaps, unless the swap is listed on a DCM. The Clearing Requirement will affect only ECPs because all persons that are not ECPs are required to execute their swaps on a DCM, and all contracts executed on a DCM must be cleared by a DCO, as required by statute and regulation; not by operation of any Clearing Requirement.

The Commission has previously determined that ECPs are not small entities for purposes of the RFA.[63] However, in their comment letter, the Joint Associations assert that certain members of the National Rural Electric Cooperative Association (NRECA) may both be ECPs under the CEA and small businesses under the RFA. These members of NRECA, as the Commission understands, have been determined to be small entities by the Small Business Administration (SBA) because they are ''primarily engaged in the generation, transmission, and/or distribution of electric energy for sale and [their] total electric output for the preceding fiscal year did not exceed 4 million megawatt hours.'' [64] Although the Joint Associations do not provide details on whether or how the NRECA members that have been determined to be small entities use the types of swaps that will be subject to the Clearing Requirement, the Joint Associations do state that NRECA members ''engage in swaps to hedge commercial risk.'' [65] Because the NRECA members that have been determined to be small entities would be using swaps to hedge commercial risk, the Commission expects that they would be able to use the end-user exception from the Clearing Requirement and therefore would not be affected to any significant extent by the Clearing Requirement.

Thus, because nearly all of the ECPs that may be subject to the Clearing Requirement are not small entities, and because the few ECPs that have been determined by the SBA to be small entities are unlikely to be subject to the Clearing Requirement, the Chairman, on behalf of the Commission, hereby certifies pursuant to 5 U.S.C. 605(b) that the rule herein creating the compliance schedule for the Clearing Requirement will not have a significant economic impact on a substantial number of small entities.

B. Paperwork Reduction Act

The Paperwork Reduction Act (PRA) [66] imposes certain requirements on federal agencies (including the Commission) in connection with conducting or sponsoring any collection of information as defined by the PRA. As stated in the NPRM, this rulemaking will not require a new collection of information from any persons or entities.[67]

V. List of Subjects

List of Subjects in 17 CFR Part 50

Business and industry, Clearing, Swaps.

In consideration of the foregoing, and pursuant to the authority in the Commodity Exchange Act, as amended, and in particular section 2(h) of the Act, the Commission hereby adopts an amendment to Chapter I of Title 17 of the Code of Federal Regulation by adding a new part 50 as follows:

[61] 5 U.S.C. 601 *et seq.*

[62] 76 FR 58192–58193 (Sept. 20, 2011).

PART 50—CLEARING REQUIREMENT

Authority: 7 U.S.C. 2 as amended by Pub. L. 111–203, 124 Stat. 1376.

§ 50.25 Clearing requirement compliance schedule.

(a) *Definitions.* For the purposes of this paragraph:

Active Fund means any private fund as defined in section 202(a) of the Investment Advisers Act of 1940, that is not a third-party subaccount and that executes 200 or more swaps per month based on a monthly average over the 12 months preceding the Commission issuing a clearing requirement determination under section 2(h)(2) of the Act.

Category 1 Entity means a swap dealer, a security-based swap dealer; a major swap participant; a major security-based swap participant; or an active fund.

Category 2 Entity means a commodity pool; a private fund as defined in section 202(a) of the Investment Advisers Act of 1940 other than an active fund; or a person predominantly engaged in activities that are in the business of banking, or in activities that are financial in nature as defined in section 4(k) of the Bank Holding Company Act of 1956, provided that, in each case, the entity is not a third-party subaccount.

Third-party Subaccount means an account that is managed by an investment manager that is independent of and unaffiliated with the account's beneficial owner or sponsor, and is responsible for the documentation necessary for the account's beneficial owner to clear swaps.

(b) Upon issuing a clearing requirement determination under section 2(h)(2) of the Act, the Commission may determine, based on the group, category, type, or class of swaps subject to such determination, that the following schedule for compliance with the requirements of section 2(h)(1)(A) of the Act shall apply:

(1) A swap between a Category 1 Entity and another Category 1 Entity, or any other entity that desires to clear the transaction, must comply with the requirements of section 2(h)(1)(A) of the Act no later than ninety (90) days from the date of publication of such clearing requirement determination in the **Federal Register**.

(2) A swap between a Category 2 Entity and a Category 1 Entity, another Category 2 Entity, or any other entity that desires to clear the transaction, must comply with the requirements of section 2(h)(1)(A) of the Act no later than one hundred and eighty (180) days from the date of publication of such clearing requirement determination in the **Federal Register**.

(3) All other swaps for which neither of the parties to the swap is eligible to claim the exception from the clearing requirement set forth in section 2(h)(7) of the Act and § 39.6, must comply with the requirements of section 2(h)(1)(A) of the Act no later than two hundred and seventy (270) days from the date of publication of such clearing requirement determination in the **Federal Register**.

(c) Nothing in this rule shall be construed to prohibit any person from voluntarily complying with the requirements of section 2(h)(1)(A) of the Act sooner than the implementation schedule provided under paragraph (b).

Issued in Washington, DC, on July 24, 2012, by the Commission.

Sauntia Warfield,

Assistant Secretary of the Commission.

Appendices to Swap Transaction Compliance and Implementation Schedule: Clearing Requirement under Section 2(h) of the CEA—Commission Voting Summary and Statements of Commissioners

Note: The following appendices will not appear in the Code of Federal Regulations.

Appendix 1—Commission Voting Summary

On this matter, Chairman Gensler and Commissioners Sommers, Chilton, O'Malia and Wetjen voted in the affirmative; no Commissioner voted in the negative.

Appendix 1—Statement of Chairman Gary Gensler

I support the final rule to establish a schedule to phase in compliance with the clearing requirement provisions in the Dodd-Frank Wall Street Reform and Consumer Protection Act.

The rule gives market participants an adequate amount of time to comply and helps facilitate an orderly transition to the new clearing requirements for the swaps market. The rule provides greater clarity to market participants regarding the timeframe for bringing their swaps into compliance with the clearing requirement.

BILLING CODE 6351–01–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1300

[Docket No. DEA–341F]

RIN 1117–AB31

Classification of Two Steroids, *Prostanozol* and *Methasterone,* as Schedule III Anabolic Steroids Under the Controlled Substances Act

AGENCY: Drug Enforcement Administration (DEA), Department of Justice.

ACTION: Final rule.

SUMMARY: With the issuance of this Final Rule, the Administrator of the DEA classifies the following two steroids as ''anabolic steroids'' under the Controlled Substances Act (CSA): prostanozol (17β-hydroxy-5α-androstano[3,2-c]pyrazole) and methasterone (2α,17α-dimethyl-5α-androstan-17β-ol-3-one). These steroids and their salts, esters, and ethers are Schedule III controlled substances subject to the regulatory control provisions of the CSA.

DATES: *Effective Date:* August 29, 2012.

FOR FURTHER INFORMATION CONTACT: Alan G. Santos, Associate Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration; Mailing Address: 8701 Morrissette Drive, Springfield, Virginia 22152; Telephone: (202) 307–7165.

SUPPLEMENTARY INFORMATION:

Legal Authority

The DEA implements and enforces Titles II and III of the Comprehensive Drug Abuse Prevention and Control Act of 1970, often referred to as the Controlled Substances Act and the Controlled Substances Import and Export Act (21 U.S.C. 801–971), as amended (hereinafter, ''CSA''). The implementing regulations for these statutes are found in Title 21 of the Code of Federal Regulations (CFR), parts 1300 to 1321. Under the CSA, controlled substances are classified in one of five schedules based upon their potential for abuse, their currently accepted medical use, and the degree of dependence the substance may cause. 21 U.S.C. 812. The initial schedules of controlled substances by statute are found at 21 U.S.C. 812(c) and the current list of scheduled substances is published at 21 CFR Part 1308.

On November 29, 1990, the President signed into law the Anabolic Steroids Control Act of 1990 (Title XIX of Pub. L. 101–647), which became effective

February 27, 1991. This law established and regulated anabolic steroids as a class of drugs under Schedule III of the CSA. As a result, a new anabolic steroid is not scheduled according to the procedures set out in 21 U.S.C. 811, but is administratively classified as an anabolic steroid through the rulemaking process if it meets the regulatory definition of an anabolic steroid in 21 CFR 1300.01.

On October 22, 2004, the President signed into law the Anabolic Steroid Control Act of 2004 (Pub. L. 108–358), which became effective on January 20, 2005. Section 2(a) of the Anabolic Steroid Control Act of 2004 amended 21 U.S.C. 802(41)(A) by replacing the existing definition of ''anabolic steroid.'' The Anabolic Steroid Control Act of 2004 classifies a drug or hormonal substance as an anabolic steroid if the following four criteria are met: (A) The substance is chemically related to testosterone; (B) the substance is pharmacologically related to testosterone; (C) the substance is not an estrogen, progestin, or a corticosteroid; and (D) the substance is not dehydroepiandrosterone (DHEA). Any substance that meets these criteria is considered an anabolic steroid and must be listed as a Schedule III controlled substance.

Background

In a Notice of Proposed Rulemaking (NPRM) published on November 23, 2011 (76 FR 72355), DEA proposed classification of two steroids as Schedule III anabolic steroids under the CSA: Prostanozol and methasterone. DEA believes that prostanozol (17β-hydroxy-5α-androstano[3,2-c]pyrazole) and methasterone (2α,17α-dimethyl-5α-androstan-17β-ol-3-one) meet this definition of anabolic steroid.

Anabolic steroids are a class of drugs structurally related to the endogenous hormone testosterone that exert androgenic (masculinizing) as well as anabolic (body building) effects. These effects are mediated primarily through binding of the anabolic steroid to the androgen receptor in target tissues (Evans, 2004). Anabolic effects include promotion of protein synthesis in skeletal muscle and bone, while the androgenic effects are characterized by the development of male secondary sexual characteristics such as hair growth, deepening of the voice, glandular activity, thickening of the skin, and central nervous system effects (Kicman, 2008). Anabolic efficacy is characterized by positive nitrogen balance and protein metabolism, resulting in increases in protein synthesis and lean body mass (Evans, 2004). These effects often come at a cost to the healthy individual who experiences clear physical and psychological complications (Trenton and Currier, 2005; Brower, 2002; Hall *et al.,* 2005).

In the United States, only a small number of anabolic steroids are approved for either human or veterinary use. Approved medical uses for anabolic steroids include treatment of androgen deficiency in hypogonadal males, adjunctive therapy to offset protein catabolism associated with prolonged administration of corticosteroids, treatment of delayed puberty in boys, treatment of metastatic breast cancer in women, and treatment of anemia associated with specific diseases (e.g., anemia of chronic renal failure, Fanconi's anemia, and acquired aplastic anemia). However, with the exception of the treatment of male hypogonadism, anabolic steroids are not the first-line treatment due to the availability of other preferred treatment options. DEA is not aware of any legitimate medical use or New Drug Applications (NDA) for the two substances that DEA is proposing to classify by this NPRM as anabolic steroids under the definition set forth under 21 U.S.C. 802(41)(A). Moreover, DEA has been unable to identify any chemical manufacturers currently using these substances as intermediates in their manufacturing processes.

Adverse health effects are associated with abuse of anabolic steroids and depend on several factors (e.g., age, sex, anabolic steroid used, the amount used, and the duration of use) (Hall and Hall, 2005; Quaglio *et al.,* 2009). These include cardiovascular, dermatological, behavioral, hepatic, and gender specific endocrine side effects. Anabolic steroids have direct and indirect impact on the developing adolescent brain and behavior (Sato *et al.,* 2008). Furthermore, adolescent abuse of anabolic steroids may result in stunted growth due to premature closure of the growth plates in long bones.

In adolescent boys, anabolic steroid abuse can cause precocious sexual development. In both girls and women, anabolic steroid abuse induces permanent physical changes such as deepening of the voice, increased facial and body hair growth, menstrual irregularities, and clitoral hypertrophy. In men, anabolic steroid abuse can cause testicular atrophy, decreased sperm count, and sterility. Gynecomastia (i.e., enlargement of the male breast tissue) can develop with the abuse of those anabolic steroids with estrogenic actions. In both men and women, anabolic steroid abuse can damage the liver and may result in high cholesterol levels, which may increase the risk of strokes and cardiovascular heart attacks. Furthermore, anabolic steroid abuse is purported to induce psychological effects such as aggression, increased feelings of hostility, and psychological dependence and addiction (Brower, 2002; Kanayama *et al.,* 2008).

Upon abrupt termination of long-term anabolic steroid abuse, a withdrawal syndrome may appear including severe depression. Additionally, polysubstance abuse is routinely associated with anabolic steroid abuse, where ancillary drugs, including recreational and prescription drugs, are abused in response to unwanted side effects (Hall *et al.,* 2005; Parkinson *et al.,* 2005; Skarberg *et al.,* 2009).

A review of the scientific literature finds adverse health effects including liver toxicity with renal failure reported in conjunction with methasterone abuse (Shah *et al.,* 2008; Jasiurkowski *et al.,* 2006; Singh *et al.,* 2009; Nasr and Ahmad, 2008; and Krishnan *et al.,* 2009). In March 2006, the U.S. Food and Drug Administration (FDA) issued a Warning Letter in response to adverse health effects associated with the product Superdrol (methasterone). In July 2009, FDA issued a warning regarding bodybuilding products containing steroid or steroid-like substances. In this warning, a product containing the THP ether derivative of prostanozol was named in conjunction with other products presenting safety concerns.

Evaluation of Statutory Factors for Classification as an Anabolic Steroid

With the issuance of this Final Rule, DEA classifies prostanozol (17β-hydroxy-5α-androstano[3,2-c]pyrazole) and methasterone (2α,17α-dimethyl-5α-androstan-17β-ol-3-one) as anabolic steroids under the definition set forth under 21 U.S.C. 802(41)(A). As noted previously, a drug or hormonal substance is classified as an anabolic steroid by meeting the following four definitional requirements: (A) The substance is chemically related to testosterone; (B) the substance is pharmacologically related to testosterone; (C) the substance is not an estrogen, progestin, or corticosteroid; and (D) the substance is not DHEA.

(A) Chemically Related to Testosterone

To classify a substance as an anabolic steroid, a substance must be chemically related to testosterone. A structure activity relationship (SAR) evaluation for each substance compared the chemical structure of the steroid to that of testosterone. Substances with a

structure similar to that of testosterone are predicted to possess comparable pharmacological and biological activity.

Prostanozol is also known by the following name: 17β-hydroxy-5α-androstano[3,2-c]pyrazole. DEA determined that the chemical structure of prostanozol is similar to testosterone, differing by only the attachment of a pyrazole ring at carbon 2 (C2) and carbon 3 (C3) positions of the androstane skeleton, replacing the C3-keto group and the lack of a double bond between carbon 4 (C4) and carbon 5 (C5) positions. Similar modifications to testosterone's chemical structure have been documented and, in general, they have been found to be well tolerated, displaying both anabolic and androgenic activity (Fragkaki *et al.,* 2009; Vida, 1969). Clinton and coworkers, in their synthesis of prostanozol, described the modification as a fusion of a pyrazole ring to the androstane steroidal nucleus at C2 and C3 (Clinton *et al.,* 1961). Further analysis finds the chemical structure of prostanozol to be very similar to the anabolic steroid stanozolol. The two structures differ only about a 17α-methyl group (alpha methyl group attached to carbon 17).

Methasterone is known by the following chemical names: 2α,17α-dimethyl-5α-androstan-17β-ol-3-one; 2α,17α-dimethyl-17β-hydroxy-5α-androstan-3-one; 17α-methyl-drostanolone; methasteron; methyldrostanolone; 2α,17α-dimethyldihydrotestosterone; and 2α,17α-dimethyl-etiocholan-17β-ol-3-one. DEA has determined that the chemical structure of methasterone is chemically related to testosterone. The chemical structure of methasterone differs from testosterone by the following three chemical groups: An alpha methyl group at carbon 17 (C17), an alpha methyl group at C2, and the lack of a double bond between spanning C4 and C5. Removal of the C4–C5 double bond (A-ring) and methylation at the C2 and C17 positions has been shown to increase anabolic activity (Zaffroni, 1960; Fragkaki *et al.,* 2009). Furthermore, methyl group substitution at the C2 and C17 has been reported to impair aromatization, thus, prolonging the anabolic effect (Fragkaki *et al.,* 2009).

(B) Pharmacologically Related to Testosterone

A substance must also be pharmacologically related to testosterone (i.e., produce similar biological effects) to be classified as a Schedule III anabolic steroid. The pharmacology of a steroid, as related to testosterone, can be established by performing one or more of the following androgenic and anabolic activity assays: ventral prostate assay, seminal vesicle assay, levator ani assay, and androgen receptor binding and efficacy assays. These assays are described below.

Ventral Prostate Assay, Seminal Vesicle Assay, and Levator Ani Assay: The classic scientific procedure for evaluating androgenic (masculinizing) and anabolic (muscularizing) effects of a steroid is the ventral prostate assay, seminal vesicle assay, and levator ani assay. This testing paradigm allows for the direct comparison to testosterone. Select male accessory tissues (i.e., the ventral prostate, seminal vesicles, and levator ani muscle) are testosterone sensitive, specifically requiring testosterone to grow and remain healthy. Upon the removal of the testes (i.e., castration), the primary endogenous source of testosterone is eliminated causing the atrophy of the ventral prostate, seminal vesicles, and levator ani muscle (Eisenberg *et al.,* 1949; Nelson *et al.,* 1940; Scow, 1952; Wainman and Shipounoff, 1941). Numerous scientific studies have demonstrated the ability of exogenous testosterone or a pharmacologically similar steroid administered to rats following castration to maintain the normal weight and size of all three testosterone sensitive organs (Biskind and Meyer, 1941; Dorfman and Dorfman, 1963; Dorfman and Kincl, 1963; Kincl and Dorfman, 1964; Nelson *et al.,* 1940; Scow, 1952; Wainman and Shipounoff, 1941). Thus, a steroid with testosterone-like activity will also prevent the atrophy of these three testosterone-dependent organs in castrated rats.

Castrated male rats are administered the steroid for a number of days, then the rats are euthanized and the previously described tissues are excised and weighed. Tissue weights from the three animal test groups are compared, castrated animals alone, castrated animals receiving the steroid, and healthy intact animals (control), to assess anabolic and androgenic activity. A reduction in tissue weights relative to the control group suggests a lack of androgenic and/or anabolic activity. An increase in tissue weights relative to the castrated rats receiving no steroid suggests an androgenic and/or anabolic effect.

Androgen Receptor Binding and Efficacy Assay: Anabolic steroids bind with the androgen receptor to exert their biological effect. Affinity for the receptor is evaluated in the receptor binding assay, while the transactivation (functional) assay provides additional information as to both affinity and ability to activate the receptor. Receptor binding and transactivation studies are valuable tools in evaluating pharmacological activity and drawing comparisons to other substances. A steroid displaying affinity for the androgen receptor and properties of being an agonist in transactivation studies is determined to be pharmacologically similar to testosterone.

Studies used to evaluate anabolic steroids are the androgen receptor binding assay and the androgen receptor transactivation assay. Both are well-established and provide significant utility in evaluating steroids for affinity to their biological target and the modulation of activity. The androgen receptor binding assay provides specific detail as to the affinity of a steroid for the androgen receptor (biological target of anabolic steroids). To assess further whether the steroid is capable of activating the androgen receptor, the androgen receptor transactivation assay evaluates the binding of a steroid to the androgen receptor and subsequent interaction with DNA. In this study, transcription of a reporter gene provides information as to a steroid's ability to modulate a biological event. This activity measurement provides information as to the potency of a steroid to bind to a receptor and either initiate or inhibit the transcription of the reporter gene. The androgen receptor binding assay and androgen receptor transactivation assay are highly valuable tools in assessing the potential activity of a steroid and comparing the activity to testosterone.

Results of the Androgenic and Anabolic Activity Assays: DEA reviewed the published scientific literature, and pharmacological studies were undertaken to collect additional information on prostanozol and methasterone in several different androgenic and anabolic activity assays. Findings from these studies indicate that in addition to being structurally similar to testosterone, prostanozol and methasterone have similar pharmacological activity as testosterone.

Prostanozol

The chemical synthesis and anabolic and androgenic effects of prostanozol (17β-hydroxy-5α-androstano[3,2-c]pyrazole) were published in 1961 (Clinton *et al.,* 1961). Clinton and coworkers evaluated the anabolic activity by means of nitrogen balance and androgenic activity based on weight changes of the ventral prostrate of prostanozol upon subcutaneous administration to rats with the reference

standard testosterone propionate. The potency ratio of anabolic activity to androgenic activity for prostanozol was reported to be eight (Clinton *et al.,* 1961). In another study, prostanozol was reported to have approximately the same relative binding affinity for human sex steroid binding protein as testosterone (Cunningham *et al.,* 1981).

To build on these findings, a pharmacological study [1] was conducted to evaluate the anabolic and androgenic effects of prostanozol in castrated male rats. Results were compared to testosterone by a similar protocol. Administration of prostanozol to castrated male rats by subcutaneous injection prevented the atrophy (loss in weight) of the ventral prostate, seminal vesicles, and levator ani muscle.[1] These testosterone sensitive tissues experienced increases in weight comparable to testosterone in castrated male rats. Results from this study support that prostanozol possesses both androgenic and anabolic activity. Additional studies were conducted to further assess prostanozol's anabolic effect. In a competitive binding assay, prostanozol was found to possess affinity for the androgen receptor comparable to testosterone.[1] In the androgen receptor transactivation assay, prostanozol displayed increased activity relative to testosterone.[1] Effects elicited by prostanozol in this transactivation assay were consistent and comparable to those of testosterone. Taken together, data from in vitro and in vivo assays indicate the pharmacology of prostanozol to be similar to testosterone.

Methasterone

The synthesis of methasterone (2α,17α-dimethyl-5α-androstan-17β-ol-3-one) was reported in 1956 and the anabolic activity in 1959 (Ringold and Rosenkranz, 1956; Ringold *et al.,* 1959). Methasterone was described as a potent anabolic agent exhibiting weak androgenic activity in the castrated male rat (Ringold *et al.,* 1959). Zaffaroni and coworkers reported methasterone possessed one-fifth the androgenic activity and four times the anabolic activity of the anabolic steroid methyltestosterone, when administered orally to the experimental animal (Zaffaroni *et al.*, 1960).

Additional pharmacological studies were undertaken to further evaluate the androgenic and anabolic effects of methasterone.[1] Methasterone was administered subcutaneously and orally to castrated male rats. By both routes of administration, methasterone prevented the atrophy (loss in weight) of ventral prostate, seminal vesicles, and levator ani muscle. Tissue weight increases for the castrated methasterone-treated animals were comparable to the castrated rats treated with testosterone and methyltestosterone. These results were consistent with earlier findings that methasterone is anabolic and androgenic (Zaffaroni, 1960; Ringold *et al.,* 1959). Functional assays were also undertaken to further evaluate methasterone.[1] Methasterone displayed affinity for the androgen receptor comparable to testosterone in a competitive binding assay.[1] In the androgen receptor transactivation assay, methasterone displayed increased activity relative to testosterone.[1] Effects elicited by methasterone in the androgen transactivation assay were consistent and comparable to those of testosterone. Collectively, in vivo and in vitro results indicate that the pharmacology of methasterone is similar to testosterone.

(C) Not Estrogens, Progestins, and Corticosteroids

DEA has determined that prostanozol and methasterone are unrelated to estrogens, progestins, and corticosteroids. DEA evaluated the SAR for each of the substances. The chemical structure of each substance was compared to that of estrogens, progestins, and corticosteroids, since chemical structure can be related to its pharmacological and biological activity. DEA found that these two substances lack the necessary chemical structures to impart significant estrogenic activity (e.g., aromatic A ring) (Duax *et al.,* 1988; Jordan *et al.,* 1985; Williams and Stancel, 1996), progestational activity (e.g., 17β-alkyl group) (Williams and Stancel, 1996), or corticosteroidal activity (e.g., 17β-ketone group or 11β-hydroxyl group) (Miller *et al.,* 2002). Furthermore, methasterone was reported to display anti-estrogenic activity in mouse assay to assess estrogen stimulated uterine growth (Dorfman *et al.,* 1961). To assess the estrogenic, progestational, and corticosteroid activity of prostanozol and methasterone, these substances were evaluated in receptor binding and functional transactivation assays. Prostanozol and methasterone showed low binding affinity for the estrogen, progesterone, and glucocorticoid receptors. Furthermore, these steroids displayed low to no transactivation mediated by the estrogen receptors, progesterone receptors, or glucocorticoid receptors. Therefore, based on these data, prostanozol and methasterone are not estrogens, progestins, or corticosteroids and these anabolic steroids are not exempt from control on this basis.

(D) Not Dehydroepiandrosterone

Dehydroepiandrosterone, also known as DHEA, is exempt from control as an anabolic steroid by definition (21 U.S.C. 802(41)(A)). Prostanozol and methasterone are not dehydroepiandrosterone and therefore, are not exempt from control on this basis.

Comments Received

On November 23, 2011, DEA published a NPRM (76 FR 72355) to classify prostanozol and methasterone as Schedule III anabolic steroids. The proposed rule provided an opportunity for all interested persons to submit their comments on or before January 23, 2012. In response to the request, DEA received three comments.

Comment: One commenter disagreed that anabolic steroids, and in particular those encountered in dietary supplements, should be placed in Schedule III of the CSA. He indicated that classifying these substances as Schedule III anabolic steroids would force the public to procure other, non-regulated and unsafe substitutes from illicit sources in the future, and that DEA should employ an alternate method of regulation.

DEA Response: DEA disagrees with this comment. As stated in the NPRM and this Final Rule, these substances were found to be similar in structure and pharmacology to testosterone through substantive scientific evaluation and investigation. Further, the United States Food and Drug Administration has issued multiple warnings regarding dietary supplements, especially concerning contamination through novel synthetic steroids that do not qualify as dietary ingredients.

Regarding the commenter's request for alternative regulation of these substances. DEA regulates the manufacture, importation, export, distribution, and sale of controlled substances for medical, scientific, or other legitimate uses pursuant to the CSA. These substances have not been approved as safe for human consumption and, despite the commenter's unsubstantiated and factually inaccurate claims of their benefits, should neither be consumed nor should other unapproved substances ever be sought from any source, illicit or otherwise.

The additional remarks this commenter made regarding a perceived

[1] The study by Bioqual, Inc., Rockville, MD, may be found at *http://www.regulations.gov* in the electronic docket associated with this rulemaking.

disparity between men and women in access to hormonal products, and other perceived problems with the regulation of substances by the government, are not germane to this rulemaking.

Comment: Two separate commenters agreed placement of these two substances under the CSA was appropriate as provided per the Anabolic Steroid Control Act of 2004.

DEA Response: DEA appreciates the support for this rulemaking. As discussed above, prostanozol and methasterone are similar in structure and pharmacology to testosterone and are not approved for human consumption. DEA believes their placement into Schedule III as anabolic steroids will provide the appropriate safeguards to limit their availability to and prevent their abuse by the public.

Conclusion

After evaluation of the statutory factors above and consideration of the comments to the NPRM, DEA concludes that prostanozol and methasterone meet the CSA definition of ''anabolic steroid'' because each substance is: (A) Chemically related to testosterone; (B) pharmacologically related to testosterone; (C) not an estrogen, progestin, or a corticosteroid; and (D) not DHEA (21 U.S.C. 802(41)). Once a substance is determined to be an anabolic steroid, DEA has no discretion regarding the placement of these substances into Schedule III of the CSA.

Impact of Classification as Anabolic Steroids

With the publication of this Final Rule, DEA classifies prostanozol (17β-hydroxy-5α-androstano[3,2-c]pyrazole) and methasterone (2α,17α-dimethyl-5α-androstan-17β-ol-3-one) as Schedule III anabolic steroids subject to the CSA. Any person who manufactures, distributes, dispenses, imports, or exports prostanozol or methasterone, or who engages in research or conducts instructional activities with respect to these two substances, will be required to obtain a Schedule III registration in accordance with the CSA and its implementing regulations.

As of the effective date of this Final Rule, the manufacture, import, export, distribution, or sale of prostanozol or methasterone, except by DEA registrants, is a violation of the CSA that may result in imprisonment and fines (see, *e.g.,* 21 U.S.C. 841 and 960). Possession of these two steroids, unless legally obtained, is also subject to criminal penalties pursuant to 21 U.S.C. 844.

Manufacturers and importers of these two substances will be required to register with DEA and will be permitted to distribute these substances only to other DEA registrants. Only persons registered as dispensers will be allowed to dispense these substances to end users. The CSA defines a practitioner as ''a physician, dentist, veterinarian, scientific investigator, pharmacy, hospital, or other person licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices or does research, to distribute, dispense, conduct research with respect to, administer, or use in teaching or chemical analysis, a controlled substance in the course of professional practice or research.'' 21 U.S.C. 802(21). At present, there are no approved medical uses for these two substances. Until a manufacturer applies to the FDA and gains approval for products containing these substances, no person may dispense them in response to a prescription.

Additionally, these two substances may only be imported for medical, scientific, or other legitimate uses (21 U.S.C. 952(b)) under an import declaration filed with DEA (21 CFR 1312.18). Importation of these substances will be illegal unless the person importing these substances is registered with DEA as an importer or researcher and files the required declaration for each shipment. Any individual who purchases either of these substances directly from foreign companies and has them shipped to the United States will be considered to be importing even if the steroids are intended for personal use. Illegal importation of these substances will be a violation of the CSA that may result in imprisonment and fines pursuant to 21 U.S.C. 960.

Requirements for Handling Substances Defined as Anabolic Steroids

As of the effective date of this Final Rule, prostanozol and methasterone are subject to CSA regulatory controls and the administrative, civil, and criminal sanctions applicable to the manufacture, distribution, dispensing, importation, and exportation of a Schedule III controlled substance, including the following:

Registration. Any person who manufactures, distributes, dispenses, imports, exports, or engages in research or conducts instructional activities with a substance defined as an anabolic steroid, or who desires to engage in such activities, will be required to be registered to conduct such activities with Schedule III controlled substances in accordance with 21 CFR Part 1301.

Security. Substances defined as anabolic steroids will be subject to Schedule III security requirements and will be required to be manufactured, distributed, and stored in accordance with 21 CFR 1301.71, 1301.72(b), (c), and (d), 1301.73, 1301.74, 1301.75(b) and (c), 1301.76 and 1301.77.

Labeling and Packaging. All labels and labeling for commercial containers of substances defined as anabolic steroids will be required to comply with the requirements of 21 CFR 1302.03–1302.07.

Inventory. Every registrant required to keep records and who possesses any quantity of any substance defined as an anabolic steroid will be required to keep an inventory of all stocks of the substances on hand pursuant to 21 U.S.C. 827 and 21 CFR 1304.03, 1304.04 and 1304.11. Every registrant who desires registration in Schedule III for any substance defined as an anabolic steroid will be required to conduct an inventory of all stocks of the substances on hand at the time of registration.

Records. All registrants will be required to keep records, as generally provided in 21 U.S.C. 827(a) and specifically pursuant to 21 CFR 1304.03, 1304.04, 1304.05, 1304.21, 1304.22, and 1304.23.

Prescriptions. All prescriptions for these Schedule III substances or for products containing these Schedule III substances, if approved in the future by FDA, will be required to be issued pursuant to 21 U.S.C. 829(b) and 21 CFR 1306.03–1306.06 and 1306.21–1306.27. All prescriptions for these Schedule III compounds or for products containing these Schedule III substances, if authorized for refilling, will be limited to five refills within six months of the date of issuance of the prescription. Controlled substance dispensing via the Internet will have to comply with 21 U.S.C. 829(e).

Importation and Exportation. All importation and exportation of any substance defined as an anabolic steroid will be required to be in compliance with 21 U.S.C. 952(b), 953(e), and 21 CFR Part 1312.

Disposal. Persons who possess substances that become classified as anabolic steroids and who wish to dispose of them rather than becoming registered to handle them should contact their local DEA Diversion field office for assistance in disposing of these substances legally pursuant to 21 CFR 1307.21. The DEA Diversion field office will provide the person with instructions regarding the disposal. A list of local DEA Diversion field offices may be found at *http://www.deadiversion.usdoj.gov.*

Criminal Liability. Any activity with any substance defined as an anabolic

steroid not authorized by, or in violation of, the Controlled Substances Act or the Controlled Substances Import and Export Act will be unlawful.

Regulatory Analyses

Regulatory Flexibility Act

The Administrator hereby certifies that this rulemaking has been drafted in accordance with the Regulatory Flexibility Act (5 U.S.C. 601–612). This regulation will not have a significant economic impact on a substantial number of small entities. As of March 2010, DEA had identified approximately 75 dietary supplements that were currently or had been promoted for building muscle and increasing strength that purported to contain prostanozol or methasterone. Thirteen dietary supplements were purported to contain prostanozol and 62 dietary supplements were purported to contain methasterone. These dietary supplements are marketed and sold over the Internet.

The manufacturers and distributors of dietary supplements purported to contain prostanozol and methasterone also sell a variety of other dietary supplements. DEA has identified a substantial number of Internet distributors that sell these dietary supplements. However, these distributors also sell a variety of other nutritional products. Without information on the percentage of revenues derived from these dietary supplements, DEA is not able to determine the economic impact of the removal of these dietary supplements alone on the business of the firms. These steroids have been the focus of warning letters issued by the FDA. However, products continue to be marketed despite these warnings. DEA has not been able to identify any chemical manufacturers that are currently using these substances as intermediates in their manufacturing process(es). As of March 2010, DEA had identified 13 chemical manufacturers and distributors that sell at least one of the two steroids. Most of these companies are located in China and sell a variety of other anabolic steroids. DEA notes that, as the vast majority of entities handling these substances are Internet based, it is virtually impossible to accurately quantify the number of persons handling these substances at any given time. DEA has not identified any company based in the United States that manufactures or distributes these substances. DEA notes, upon placement into Schedule III, these substances may be used for analytical purposes. These companies are registered with DEA and are already in compliance with the CSA and DEA implementing regulations regarding the handling of Schedule III substances.

Executive Orders 12866 and 13563

This rulemaking has been drafted in accordance with the principles of Executive Order 12866, 1(b), as reaffirmed by Executive Order 13563. This rule is not a significant regulatory action but has been reviewed by the Office of Management and Budget. As discussed above, the effect of this rule will be to remove products containing these substances from the over-the-counter marketplace. DEA has no basis for estimating the size of the market for these products. DEA notes, however, that virtually all of the substances are imported. According to U.S. International Trade Commission data, the import value of all anabolic steroids in 2009 was $5.9 million. These two substances would be a subset of those imports. The total market for products containing these substances, therefore, is probably quite small. Moreover, DEA believes that the importation of these two substances is for illegitimate purposes.

The benefit of controlling these substances is to remove from the marketplace substances that have dangerous side effects and no legitimate medical use in treatment in the United States. As discussed in detail above, these substances can produce serious health effects in adolescents and adults. If medical uses for these substances are developed and approved, the drugs would be available as Schedule III controlled substances in response to a prescription issued by a medical professional for a legitimate medical purpose. Until that time, however, this action will bar the importation, exportation, and sale of these two substances except for legitimate research or industrial uses.

Executive Order 12988

This regulation meets the applicable standards set forth in Sections 3(a) and 3(b)(2) of Executive Order 12988 Civil Justice Reform.

Executive Order 13132

This rulemaking does not preempt or modify any provision of State law; nor does it impose enforcement responsibilities on any State; nor does it diminish the power of any State to enforce its own laws. Accordingly, this rulemaking does not have federalism implications warranting the application of Executive Order 13132.

Executive Order 13175

This rule will not have tribal implications and will not impose substantial direct compliance costs on Indian tribal governments.

Paperwork Reduction Act

This rule regulates two anabolic steroids, which are neither approved for medical use in humans nor approved for administration to cattle or other non-humans. Only chemical manufacturers who may use these substances as chemical intermediates for the synthesis of other steroids would be required to register with DEA under the CSA. However, DEA has not been able to identify any chemical manufacturers that are currently using these substances as intermediates in their manufacturing processes. Thus DEA does not expect this rule to impose any additional paperwork burden on the regulated industry.

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by state, local, and tribal governments, in the aggregate, or by the private sector, of $136,000,000 or more (adjusted for inflation) in any one year, and will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1532.

List of Subjects in 21 CFR Part 1300

Chemicals, Drug traffic control.

For the reasons set out above, 21 CFR part 1300 is amended as follows:

PART 1300—DEFINITIONS

■ 1. The authority citation for part 1300 continues to read as follows:

Authority: 21 U.S.C. 802, 821, 829, 871(b), 951, 958(f).

■ 2. In § 1300.01, the definition of *Anabolic steroid* under paragraph (b) is amended by:
■ A. Redesignating paragraphs (32) through (63) as (33) through (64),
■ B. Adding a new paragraph (32),
■ C. Further redesignating newly designated paragraphs (58) through (64) as (59) through (65), and
■ D. Adding new paragraph (58).

The additions read as follows:

§ 1300.01 Definitions relating to controlled substances.

* * * * *

(b) * * *

Anabolic steroid * * *

(32) Methasterone (2α,17α-dimethyl-5α-androstan-17β-ol-3-one)

* * * * *

(58) Prostanozol (17β-hydroxy-5α-androstano[3,2-c]pyrazole)

* * * * *

Dated: July 13, 2012.

Michele M. Leonhart,

Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2012–0478]

Drawbridge Operation Regulations; Gulf Intracoastal Waterway, Sarasota, FL

AGENCY: Coast Guard, DHS.

ACTION: Notice of temporary deviations from regulations.

SUMMARY: The Commander, Seventh Coast Guard District, has issued temporary deviations from the regulations governing the operation of the following four bridges in Sarasota, Florida: The Venice Airport Bridge, mile 54.9, across the Gulf Intracoastal Waterway; the North Manasota Bridge, mile 49.9, across the Gulf Intracoastal Waterway; the Tom Adams Bridge, mile 43.5, across the Gulf Intracoastal Waterway; and the Venice Bridge, mile 56.6, across the Gulf Intracoastal Waterway. The deviations are necessary to allow for participants in the Rev3 Triathlon to traverse the aforementioned bridges without delay. These deviations will result in the bridges remaining in the closed position during the Rev3 Triathlon.

DATES: These deviations are effective from 8 a.m. through 1:30 p.m. on October 28, 2012.

ADDRESSES: Documents mentioned in this preamble as being available in the docket are part of docket USCG–2012–0478 and are available online by going to *http://www.regulations.gov,* inserting USCG–2012–0478 in the ''Keyword'' box and then clicking ''Search''. They are also available for inspection or copying at the Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Michael Lieberum, Seventh District Bridge Branch, Coast Guard; telephone (305) 415–6744, email *Michael.B.Lieberum@uscg.mil.* If you have questions on viewing the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION: The Rev3 Triathlon Director has requested temporary modifications to the operating schedules of the Venice Airport Bridge, the North Manasota Bridge, the Tom Adams Bridge, and the Venice Avenue Bridge in Sarasota, Florida. These deviations will result in the aforementioned bridges remaining in the closed position during the Rev3 Triathlon on October 28, 2012. The Rev3 Triathlon route passes over these four bridges. Any bridge opening during the Rev3 Triathlon would disrupt the race. The temporary deviations will be in effect from 8 a.m. through 1:30 p.m. on October 28, 2012.

The details and regular operating schedule for each bridge are set forth below.

1. *Venice Airport Bridge, mile 54.9.* The vertical clearance of the Venice Airport Bridge, across the Gulf Intracoastal Waterway, is 19 feet, above mean high water. The normal operating schedule for the Venice Airport Bridge is set forth in 33 CFR 117.5. 33 CFR 117.5 requires the bridge to open promptly and fully for the passage of vessels when a request or signal to open is given in accordance with this subpart. As a result of this temporary deviation, the Venice Airport Bridge will remain closed to navigation from 8 a.m. to 9:45 a.m. on October 28, 2012. Tugs and tugs with tows are not exempt from this deviation.

2. *North Manasota Bridge, mile 49.9.* The vertical clearance of the North Manasota Bridge, across the Gulf Intracoastal Waterway, is 26 feet, above mean high water. The normal operating schedule for the North Manasota Bridge is set forth in 33 CFR 117.5. 33 CFR 117.5 requires the bridge to open promptly and fully for the passage of vessels when a request or signal to open is given in accordance with this subpart. As a result of this temporary deviation, the North Manasota Bridge will remain closed to navigation from 8:30 a.m. to 10:50 a.m. on October 28, 2012. Tugs and tugs with tows are not exempt from this deviation.

3. *Tom Adams Bridge, mile 43.5.* The vertical clearance of the Tom Adams Bridge, across the Gulf Intracoastal Waterway, is 26 feet, above mean high water. The normal operating schedule for the Tom Adams Bridge is set forth in 33 CFR 117.5. 33 CFR 117.5 requires the bridge to open promptly and fully for the passage of vessels when a request or signal to open is given in accordance with this subpart. As a result of this temporary deviation, the Tom Adams Bridge will remain closed to navigation from 8:50 a.m. to 10:50 a.m. on October 28, 2012. Tugs and tugs with tows are not exempt from this deviation.

4. *Venice Avenue Bridge, mile 56.6.* The vertical clearance of the Venice Avenue Bridge, across the Gulf Intracoastal Waterway, is 30 feet, above mean high water. The normal operating schedule for the Venice Avenue Bridge is set forth in 33 CFR 117.287 (a–2). 33 CFR 117.287 (a–2) requires the bridge to open on signal, except that from 7 a.m. to 4:30 p.m., Monday through Friday except Federal holidays, the draw need open only at 10 minutes after the hour, 30 minutes after the hour and 50 minutes after the hour and except between 4:35 p.m. and 5:35 p.m. when the draw need not open. As a result of this temporary deviation, the Venice Avenue Bridge will remain closed to navigation from 10:20 a.m. to 1:30 p.m. on October 28, 2012. Tugs and tugs with tows are not exempt from this deviation.

In accordance with 33 CFR 117.35(e), the drawbridges must return to their regular operating schedules immediately at the end of the designated time period. These deviations from the operating regulations are authorized under 33 CFR 117.35.

Dated: July 16, 2012.

B.L. Dragon,

Bridge Program Director, Seventh Coast Guard District.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2012–0432]

RIN 1625–AA00

Safety Zone, Atlantic Intracoastal Waterway; Emerald Isle, NC

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone on the waters of the Atlantic Intracoastal Waterway at Emerald Isle, North Carolina. The safety zone is necessary to provide for the safety of mariners on navigable waters during maintenance of the NC 58 Fixed Bridge crossing the Atlantic Intracoastal Waterway, mile 226, at Emerald Isle, North Carolina. The safety zone will temporarily restrict vessel movement within the designated area.

DATES: This rule is effective from September 12, 2012 until December 12, 2012 and will be enforced from 8 a.m. on September 12, 2012 until 8 p.m. on December 12, 2012.

ADDRESSES: Documents mentioned in this preamble are part of docket [USCG–2012–0432]. To view documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* type the docket number in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rulemaking. You may also visit the Docket Management Facility in Room W12–140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email CWO4 Joseph M. Edge, U.S. Coast Guard Sector North Carolina; telephone 252–247–4525, email *Joseph.M.Edge@uscg.mil.* If you have questions on viewing or submitting material to the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

Table of Acronyms

DHS Department of Homeland Security
FR **Federal Register**
NPRM Notice of Proposed Rulemaking

A. Regulatory History and Information

On June 15, 2012 a Notice of Proposed Rule Making (NRPM) was published in 77 FR 35903. We received no comments on the proposed rule. No public meeting was requested, and none was held.

B. Basis and Purpose

The legal basis for this rule is 33 U.S.C.1231; 46 U.S.C. Chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; Pub. L. 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1. which collectively authorize the Coast Guard to define regulatory safety zones.

North Carolina Department of Transportation has contracted Marine Contracting Corporation of Virginia Beach, Virginia to perform bridge maintenance on the NC 58 Fixed Bridge crossing the Atlantic Intracoastal Waterway, mile 226, at Emerald Isle, North Carolina. The contract provides for replacement of the fender system to commence on September 12, 2012 with a completion date of December 12, 2012. The contractor will utilize a 140 foot deck barge with a 40 foot beam as a work platform and for equipment staging. This safety zone will provide a safety buffer for transiting vessels as bridge repairs present potential hazards to mariners and property due to reduction of horizontal clearance. During this period the Coast Guard will require a one-hour notification to the work supervisor at NC 58 Fixed Bridge, Atlantic Intracoastal Waterway crossing, mile 226, Emerald Isle, North Carolina. The notification requirement will be applicable during the maintenance period for vessels requiring a horizontal clearance of greater than 50 feet.

C. Discussion of Comments, Changes and the Final Rule

We received no comments on the proposed rule. No public meeting was requested, and none was held.

The temporary safety zone will encompass the waters directly under the NC 58 Fixed Bridge crossing the Atlantic Intracoastal Waterway, mile 226, at Emerald Isle, North Carolina (34°40′28″ N, 077°03′56″ W). All vessels transiting this section of the waterway requiring a horizontal clearance of greater than 50 feet will be required to make a one-hour advanced notification to the work supervisor at the NC 58 Fixed Bridge while the safety zone is in effect. This zone will be in effect and enforced from 8 a.m. September 12, 2012 through 8 p.m. December 12, 2012.

D. Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on 13 of these statutes or executive orders.

1. Regulatory Planning and Review

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order 13563, Improving Regulation and Regulatory Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of Executive Order 12866 or under section 1 of Executive Order 13563. The Office of Management and Budget has not reviewed it under those Orders. This rule does restrict traffic from transiting a portion of the Atlantic Intracoastal Waterway; it merely imposes a one-hour notification to ensure the waterway is clear of impediment to allow passage to vessels requiring a horizontal clearance of greater than 50 feet.

2. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The Coast Guard received no comments from the Small Business Administration on this rule. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. This rule would affect the following entities, some of which may be small entities: The owners or operators of commercial tug and barge companies, recreational and commercial fishing vessels intending to transit the specified portion of Atlantic Intracoastal Waterway from 8 a.m. September 12, 2012 through 8 p.m. December 12, 2012.

This safety zone would not have a significant economic impact on a substantial number of small entities for the following reasons. Although the safety zone will apply to this section of the Atlantic Intracoastal Waterway, vessel traffic will be able to request passage by providing a one-hour advanced notification. Before the effective period, the Coast Guard will issue maritime advisories widely available to the users of the waterway.

3. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**, above.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

4. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

5. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct

effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and determined that this rule does not have implications for federalism.

6. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

7. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

8. Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

9. Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

10. Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

11. Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. Energy Effects

This action is not a ''significant energy action'' under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

13. Technical Standards

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA)(42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves the establishment of a temporary safety zone. This rule is categorically excluded from further review under paragraph 34(g) of Figure 2–1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 46 U.S.C. Chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; Public Law 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add temporary § 165.T05–0432 to read as follows:

§ 165.T05–0432 Safety Zone; Atlantic Intracoastal Waterway, Emerald Isle, NC.

(a) *Regulated Area.* The following area is a safety zone: This zone includes the waters directly under and 100 yards either side of the NC 58 Fixed Bridge crossing the Atlantic Intracoastal Waterway, mile 226, at Emerald Isle, North Carolina (latitude 34°40′28″ N, longitude 077°03′56″ W).

(b) *Regulations.* The general safety zone regulations found in 33 CFR 165.23 apply to the safety zone created by this temporary section, § 165.T05–0432. In addition the following regulations apply:

(1) All vessels requiring greater than 50 feet horizontal clearance are prohibited from entering this zone, except as authorized by the Coast Guard Captain of the Port North Carolina. All other vessels are required to transit the zone at no wake speeds.

(2) All vessels requiring greater than 50 feet horizontal clearance to safely transit through the NC 58 Fixed Bridge crossing the Atlantic Intracoastal Waterway, mile 226, at Emerald Isle, North Carolina must contact the work supervisor on VHF–FM marine band radio channels 13 and 16 one hour in advance of intended transit.

(3) All Coast Guard assets enforcing this safety zone can be contacted on VHF–FM marine band radio channels 13 and 16.

(4) The operator of any vessel within or in the immediate vicinity of this safety zone shall:

(i) Stop the vessel immediately upon being directed to do so by any commissioned, warrant or petty officer on board a vessel displaying a Coast Guard Ensign; and

(ii) Proceed as directed by any commissioned, warrant or petty officer on board a vessel displaying a Coast Guard Ensign.

(c) *Definitions.* (1) Captain of the Port North Carolina means the Commander, Coast Guard Sector North Carolina or any Coast Guard commissioned, warrant or petty officer who has been authorized by the Captain of the Port to act on his behalf.

(2) Designated representative means any Coast Guard commissioned, warrant, or petty officer who has been authorized by the Captain of the Port North Carolina to assist in enforcing the safety zone described in paragraph (a) of this section.

(d) *Enforcement.* The U.S. Coast Guard may be assisted by Federal, State and local agencies in the patrol and enforcement of the zone.

(e) *Enforcement period.* This section will be enforced from 8 a.m. September 12, 2012 through 8 p.m. December 12,

2012 unless cancelled earlier by the Captain of the Port.

Dated: July 19, 2012.

A. Popiel,

Captain, U.S. Coast Guard Captain of the Port U.S. Coast Guard Sector North Carolina.

DHS Department of Homeland Security
FR **Federal Register**
NPRM Notice of Proposed Rulemaking

A. Regulatory History and Information

On June 15, 2012 a Notice of Proposed Rule Making (NPRM) was published in 77 FR 35906. We received no comments on the proposed rule. No public meeting was requested, and none was held.

B. Basis and Purpose

The legal basis for this rule is 33 U.S.C. 1231; 46 U.S.C. Chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; PubLIC LAW 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1. which collectively authorize the Coast Guard to define regulatory safety zones.

North Carolina Department of Transportation has awarded a contract to Marine Contracting Corporation of Virginia Beach, Virginia to perform bridge maintenance on the NC 133 Fixed Bridge crossing the Atlantic Intracoastal Waterway, mile 311.8, at Oak Island, North Carolina. The contract provides for replacing the fender system to commence on September 12, 2012 with a completion date of December 12, 2012. The contractor will utilize a 140 foot deck barge with a 40 foot beam as a work platform and for equipment staging. The safety zone will provide a safety buffer to transiting vessels as bridge repairs present potential hazards to mariners and property due to reduction of horizontal clearance. During this period the Coast Guard will require a one hour notification to the work supervisor at the NC 133 Fixed Bridge at the Atlantic Intracoastal Waterway crossing, mile 311.8, Oak Island, North Carolina. The notification requirement will be applicable during the maintenance period for vessels requiring a horizontal clearance of greater than 50 feet.

C. Discussion of Comments, Changes and the Final Rule

We received no comments on the proposed rule. No public meeting was requested, and none was held.

The temporary safety zone will encompass the waters directly under the NC 133 Fixed Bridge crossing the Atlantic Intracoastal Waterway, mile 311.8, at Oak Island, North Carolina (33°55′18″ N/078°04′22″ W). All vessels transiting this section of the waterway requiring a horizontal clearance of greater than 50 feet will be required to make a one hour advanced notification to the work supervisor at the NC 133 Fixed Bridge while the safety zone is in effect. This zone will be in effect and enforced from 8 a.m. September 12, 2012 through 8 p.m. December 12, 2012.

D. Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on 13 of these statutes or executive orders.

1. Regulatory Planning and Review

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order 13563, Improving Regulation and Regulatory Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of Executive Order 12866 or under section 1 of Executive Order 13563. The Office of Management and Budget has not reviewed it under those Orders. This rule does restrict traffic from transiting a portion of the Atlantic Intracoastal Waterway; it imposes a one hour notification to ensure the waterway is clear of impediment to allow passage to vessels requiring a horizontal clearance of greater than 50 feet.

2. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The Coast Guard received no comments from the Small Business Administration on this rule. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. This rule would affect the following entities, some of which may be small entities: The owners or operators of commercial tug and barge companies, recreational and commercial fishing vessels intending to transit the specified portion of Atlantic Intracoastal Waterway from 8 a.m. September 12, 2012 through 8 p.m. December 12, 2012.

This safety zone would not have a significant economic impact on a substantial number of small entities for the following reasons. Although the safety zone will apply to this section of the Atlantic Intracoastal Waterway, vessel traffic will be able to request passage by providing a one hour advanced notification. Before the

effective period, the Coast Guard will issue maritime advisories widely available to the users of the waterway.

3. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**, above.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

4. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

5. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and determined that this rule does not have implications for federalism.

6. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

7. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

8. Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

9. Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

10. Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

11. Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. Energy Effects

This action is not a ''significant energy action'' under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

13. Technical Standards

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves the establishment of a temporary safety zone. This rule is categorically excluded from further review under paragraph 34(g) of Figure 2–1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 46 U.S.C. Chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; Public Law 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add temporary § 165.T05–0431 to read as follows:

§ 165.T05–0431 Safety Zone; Atlantic Intracoastal Waterway, Oak Island, NC.

(a) *Regulated Area.* The following area is a safety zone: This zone includes the waters directly under and 100 yards either side of the NC 133 Fixed Bridge crossing the Atlantic Intracoastal Waterway, mile 311.8, at Oak Island, North Carolina (33°55′18″ N/078°04′22″ W).

(b) *Regulations.* The general safety zone regulations found in 33 CFR 165.23 apply to the safety zone created by this temporary section, § 165.T05–0431. In addition the following regulations apply:

(1) All vessels requiring greater than 50 feet horizontal clearance are prohibited from entering this zone, except as authorized by the Coast Guard Captain of the Port North Carolina. All other vessels are required to transit the zone at no wake speeds.

(2) All vessels requiring greater than 50 feet horizontal clearance to safely

transit through the NC 133 Fixed Bridge crossing the Atlantic Intracoastal Waterway, mile 311.8, at Oak Island, North Carolina must contact the work supervisor on VHF–FM marine band radio channels 13 and 16 one hour in advance of intended transit.

(3) All Coast Guard assets enforcing this safety zone can be contacted on VHF–FM marine band radio channels 13 and 16.

(4) The operator of any vessel within or in the immediate vicinity of this safety zone shall:

(i) Stop the vessel immediately upon being directed to do so by any commissioned, warrant or petty officer on board a vessel displaying a Coast Guard Ensign, and

(ii) Proceed as directed by any commissioned, warrant or petty officer on board a vessel displaying a Coast Guard Ensign.

(c) *Definitions.* (1) *Captain of the Port North Carolina* means the Commander, Coast Guard Sector North Carolina or any Coast Guard commissioned, warrant or petty officer who has been authorized by the Captain of the Port to act on his behalf.

(2) *Designated representative* means any Coast Guard commissioned, warrant, or petty officer who has been authorized by the Captain of the Port North Carolina to assist in enforcing the safety zone described in paragraph (a) of this section.

(d) *Enforcement.* The U.S. Coast Guard may be assisted by Federal, State and local agencies in the patrol and enforcement of the zone.

(e) *Enforcement period.* This section will be enforced from 8 a.m. September 12, 2012 through 8 p.m. December 12, 2012 unless cancelled earlier by the Captain of the Port.

Dated: July 19, 2012.

A. Popiel,

Captain, U.S. Coast Guard, Captain of the Port Sector North Carolina.

33 CFR Part 165

[Docket Number USCG–2012–0624]

RIN 1625–AA00

Safety Zone; Fireworks for NC NENA/APCO Conference, Cape Fear River; Wilmington, NC

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a safety zone on the navigable waters of Cape Fear River; Wilmington, NC in support of the Fireworks display for the NC NENA/APCO Conference. This action is necessary to protect the life and property of the maritime public and spectators from the hazards posed by aerial fireworks displays. Entry into or movement within this safety zone during the enforcement period is prohibited without approval of the Captain of the Port.

DATES: This rule is effective on August 28, 2012 and enforced from 8 p.m. to 11 p.m. on August 28, 2012.

ADDRESSES: Documents mentioned in this preamble are part of docket [USCG–2012–0624]. To view documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* type the docket number in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rulemaking. You may also visit the Docket Management Facility in Room W12–140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email BOSN4 Joseph M. Edge, Coast Guard Sector North Carolina, Coast Guard; telephone 252–247–4525, email *Joseph.M.Edge@uscg.mil.* If you have questions on viewing or submitting material to the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

Table of Acronyms

DHS Department of Homeland Security
FR **Federal Register**
NPRM Notice of Proposed Rulemaking

A. Regulatory History and Information

The Coast Guard is issuing this temporary final rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because the final details for this event were not provided to the Coast Guard until June 25, 2012. As such, it is impracticable to provide a full comment period due to lack of time. Delaying the effective date for comment would be contrary to the public interest, since immediate action is needed to ensure the safety of the event participants, patrol vessels, spectator craft and other vessels transiting the event area. The Coast Guard will provide advance notifications to users of the effected waterways of the safety zone via marine information broadcasts, local notice to mariners, commercial radio stations and area newspapers.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds, for the reasons noted above, that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**.

B. Basis and Purpose

The legal basis for this rule is 33 U.S.C.1231; 46 U.S.C. Chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; Public Law 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1. which collectively authorize the Coast Guard to define regulatory safety zones.

On August 28, 2012, NC NENA/APCO Conference will sponsor a land-based fireworks display on the western shore of the Cape Fear River at Battleship Park. The fireworks debris fallout area will extend over the navigable waters of Cape Fear River. Due to the need to protect mariners and spectators from the hazards associated with the fireworks display, including accidental discharge of fireworks, dangerous projectiles, and falling hot embers or other debris, vessel traffic will be temporarily restricted from transiting within fireworks launch and fallout area.

C. Discussion of the Final Rule

The Coast Guard is establishing a safety zone on the navigable waters of Cape Fear River within an area bound by a line drawn from the following points: Latitude 34°13′54″ N, longitude 077°57′06″ W; thence northeast to latitude 34°13′57″ N, longitude 077°57′05″ W; thence north to latitude 34°14′11″ N, longitude 077°57′07″ W; thence northwest to latitude 34°14′22″ N, longitude 077°57′19″ W; thence west to latitude 34°14′22″ N, longitude 077°57′06″ W; thence southeast to latitude 34°14′07″ N, longitude 077°57′00″ W; thence south to latitude 34°13′54″ N, longitude 077°56′58″ W; thence to the point of origin, located

approximately 500 yards north of Cape Fear Memorial Bridge. This safety zone will be established and enforced in the vicinity of Wilmington, NC from 8 p.m. to 11 p.m. on August 28, 2012. In the interest of public safety, general navigation within the safety zone will be restricted during the specified date and times. Except for participants and vessels authorized by the Coast Guard Captain of the Port or his representative, no person or vessel may enter or remain in the regulated area.

D. Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on 13 of these statutes or executive orders.

1. Regulatory Planning and Review

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order 13563, Improving Regulation and Regulatory Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of Executive Order 12866 or under section 1 of Executive Order 13563. The Office of Management and Budget has not reviewed it under those Orders. Although this regulation restricts access to a small segment of the Cape Fear River, the effect of this rule will not be significant because: (i) The safety zone will be in effect for a limited duration; (ii) the zone is of limited size; and (iii) the Coast Guard will make notifications via maritime advisories so mariners can adjust their plans accordingly.

2. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. This rule will affect the following entities, some of which may be small entities: The owners or operators of vessels intending to transit the specified portion of Cape Fear River from 8 p.m. to 11 p.m. on August 28, 2012. This rule will not have a significant economic impact on a substantial number of small entities for the following reasons: (1) This rule will be enforced for only three hours on August 28, 2012; (2) Vessel traffic will be able to navigate safely around the safety zone without significant impact to their transit plans; and (3) Before the effective period begins, we will issue maritime advisories.

3. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**, above.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

4. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

5. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and determined that this rule does not have implications for federalism.

6. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

7. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

8. Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

9. Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

10. Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

11. Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. Energy Effects

This action is not a ''significant energy action'' under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

13. Technical Standards

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in

complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves establishing a safety zone for a fireworks display launch site and fallout area and is expected to have no impact on the water or environment. This zone is designed to protect mariners and spectators from the hazards associated with aerial fireworks displays. This rule is categorically excluded from further review under paragraph 34 (g) of Figure 2–1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, and Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 46 U.S.C. Chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; Public Law 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add temporary § 165.T05–0624 to read as follows:

§ 165.T05–0624 Safety Zone: Fireworks For NC NENA/APCO Conference, Cape Fear River, Wilmington, NC.

(a) *Definitions.* For the purposes of this section, Captain of the Port means the Commander, Sector North Carolina. *Representative* means any Coast Guard commissioned, warrant, or petty officer who has been authorized to act on the behalf of the Captain of the Port.

(b) *Location.* The following area is a safety zone: specified waters of the Captain of the Port, Sector North Carolina, as defined in 33 CFR 3.25–20, on the navigable waters of Cape Fear River within an area bound by a line drawn from the following points: Latitude 34°13′54″ N, longitude 077°57′06″ W; thence northeast to latitude 34°13′57″ N, longitude 077°57′05″ W; thence north to latitude 34°14′11″ N, longitude 077°57′07″ W; thence northwest to latitude 34°14′22″ N, longitude 077°57′19″ W; thence west to latitude 34°14′22″ N, longitude 077°57′06″ W; thence southeast to latitude 34°14′07″ N, longitude 077°57′00″ W; thence south to latitude 34°13′54″ N, longitude 077°56′58″ W; thence to the point of origin, located approximately 500 yards north of Cape Fear Memorial Bridge.

(c) *Regulations.* (1) The general regulations contained in § 165.23 of this part apply to the area described in paragraph (b) of this section.

(2) Persons or vessels requiring entry into or passage through any portion of the safety zone must first request authorization from the Captain of the Port, or a designated representative, unless the Captain of the Port previously announced via Marine Safety Radio Broadcast on VHF Marine Band Radio channel 22 (157.1 MHz) that this regulation will not be enforced in that portion of the safety zone. The Captain of the Port can be contacted at telephone number (910) 343–3882 or by radio on VHF Marine Band Radio, channels 13 and 16.

(d) *Enforcement.* The U.S. Coast Guard may be assisted in the patrol and enforcement of the zone by Federal, State, and local agencies.

(e) Enforcement period. This section will be enforced on August 28, 2012 from 8 p.m. to 11 p.m. unless cancelled earlier by the Captain of the Port.

Dated: July 19, 2012.

A. Popiel,

Captain, U.S. Coast Guard, Captain of the Port, Sector North Carolina.

Wright, Program Manager, Docket Operations, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

Table of Acronyms

DHS Department of Homeland Security
FR **Federal Register**
NPRM Notice of Proposed Rulemaking

A. Regulatory History and Information

The Coast Guard is establishing this rule because the current regulation associated with the Seafair Blue Angels Air Show performance (33 CFR 165.1319) is not large enough to safeguard participants and spectators from the safety hazards of this air performance.

The Coast Guard is issuing this temporary final rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.''

Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because publishing an NPRM would be impracticable since the event would be over before notice could be given and comments taken. Notice and comment would also be contrary to the public interest because the public expects to be provided a safe area to observe the Seafair Blue Angels air show. Absent this temporary final rule, the zone provided in 33 CFR 165.1319 will be too small to encompass the anticipated safe flight pattern of the demonstrating aircraft, and would expose spectators to hazards associated with low-flying aircraft over water.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**, because to do so would be contrary to the public interest since the event would be over before notice could be given and comments taken, and it is immediately necessary to protect the event's spectators from the hazards associated with the Seafair Blue Angels Air Show Performance.

B. Basis and Purpose

The legal basis for this rule is 33 U.S.C.1231; 46 U.S.C. Chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; Public Law 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1. which collectively authorize the Coast Guard to define regulatory safety zones.

The Coast Guard is establishing this safety zone to ensure the safety of the maritime public during the Seattle Blue Angels Air Show. The safety zone in 33 CFR 165.1319 has been determined to be too small to accommodate the anticipated flight pattern of the Blue Angels. This temporary final rule extends the northern boundary line of the existing regulation northward by 500 yards. The remainder of the safety zone contained at 33 CFR 165.1319 remains unchanged.

C. Discussion of the Final Rule

As described in 69 FR 35249, the Coast Guard established a final rule for the Blue Angels Air Show Performance. This rule was meant to protect the public from dangers including excessive noise and falling objects from any potential accidents caused by these low-flying military aircraft. The regulation contained in 33 CFR 165.1319 encompasses ''[a]ll waters of Lake Washington, Washington State, enclosed by the following points: Near the termination of Roanoke Way 47°35′44″ N, 122°14′47″ W; thence to 47°35′48″ N, 122°15′45″ W; thence to 47°36′02.1″ N, 122°15′50.2″ W; thence to 47°35′56.6″ N, 122°16′29.2″ W; thence to 47°35′42″ N, 122°16′24″ W; thence to the east side of the entrance to the west highrise of the Interstate 90 bridge; thence westerly along the south side of the bridge to the shoreline on the western terminus of the bridge; thence southerly along the shoreline to Andrews Bay at 47°33′06″ N, 122°15′32″ W; thence northeast along the shoreline of Bailey Peninsula to its northeast point at 47°33′44″ N, 122°15′04″ W; thence easterly along the east-west line drawn tangent to Bailey Peninsula; thence northerly along the shore of Mercer Island to the point of origin. [Datum: NAD 1983]''

However, the aircraft in question have a flight pattern that will extend past the northern boundary of the regulation in 33 CFR 165.1319. As such, an extension is necessary in order to protect the spectating public.

This rule encompasses the northern portion of the Seafair Blue Angels Air Show Performance Safety Zone, starting at point 47°36′17.28″ N, 122°16′58.56″ W, thence east to point 47°36′17.28″ N, 122°14′49.44″ W, thence south to point 47°35′45.3″ N, 122°14′49.44″ W, thence south west along the shore line to the I–90 bridge at point, 47°35′23.16″ N, 122°15′17.1″ W, thence west along the I–90 bridge to point, 47°35′25.44″ N, 122°17′9.48″ W, and north along the shoreline back to the point of origin. This rule is effective from 9:00 a.m. on August 2, 2012 through 4:00 p.m. on August 5, 2012.

During the periods the safety zone is in effect no person or vessel may enter into, transit, or remain in the safety zone without the permission of the Captain of the Port or his Designated Representative.

D. Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on these statutes and executive orders.

1. Regulatory Planning and Review

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order 13563, Improving Regulation and Regulatory Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of Executive Order 12866 or under section 1 of Executive Order 13563. The Office of Management and Budget has not reviewed it under those Orders. This expectation is based on the fact that the regulated area established by the regulation is not frequented by commercial navigation, and it is small in size, and short in duration.

2. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. This rule will affect the following entities, some of which may be small entities: the owners or operators of vessels intending to transit this portion of Lake Washington during the time this regulation is in effect. The zone will not have a significant economic impact because it is limited in size and short in duration. The only vessels likely to be impacted will be recreational boaters and small passenger vessel operators.

3. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**, above.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

4. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

5. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and determined that this rule does not have implications for federalism.

6. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

7. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

8. Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

9. Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

10. Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

11. Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. Energy Effects

This action is not a ''significant energy action'' under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

13. Technical Standards

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA)(42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves the establishment of a safety zone. This rule is categorically excluded from further review under paragraph 34(g) of Figure 2–1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 46 U.S.C. Chapters 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Pub. L. 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T13–226 to read as follows:

§ 165.T13–226 Safety Zone; Seafair Blue Angels Air Show Performance, Seattle, WA.

(a) *Location.* The following area is designated as a safety zone: Lake Washington, Seattle, WA. All waters of Lake Washington encompassed by the following points: 47°36′17.28″ N, 122°16′58.56″ W, thence east to point 47°36′17.28″ N, 122°14′49.44″ W, thence south to point 47°35′45.3″ N, 122°14′49.44″ W, thence south west along the shore line to the I–90 bridge at point, 47°35′23.16″ N, 122°15′17.1″ W, thence west along the I–90 bridge to point, 47°35′25.44″ N, 122°17′9.48″ W, and north along the shoreline back to the point of origin.

(b) *Regulations.* In accordance with the general regulations in 33 CFR part 165, subpart C, no person or vessel may enter or remain in the safety zone created by this section without the permission of the Captain of the Port (COTP) or his Designated Representative. Designated Representatives are Coast Guard Personnel authorized by the Captain of the Port to grant persons or vessels permission to enter or remain in the safety zone created by this section. See 33 CFR part 165, subpart C, for additional information and requirements. The COTP may be assisted by other federal, state or local agencies with the enforcement of this safety zone.

(c) *Effective Period.* This rule is effective from 9:00 a.m. on August 2, 2012 through 4:00 p.m. on August 5, 2012.

Dated: July 19, 2012.

S.J. Ferguson,

Captain, U.S. Coast Guard, Captain of the Port, Puget Sound.

[FR Doc. 2012–18450 Filed 7–27–12; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2012–0641]

RIN 1625–AA00

Safety Zone; Port Valdez, Alaska Maritime Highway System Ferry Terminal

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone encompassing the navigable waters within a 200-yard radius of the Alaska Marine Highway System (AMHS) Terminal in Port Valdez when an AMHS Ferry is arriving or departing when there is an ongoing fishing opener that includes the navigable waters within a 200-yard radius of the AMHS Ferry Terminal. This safety zone is necessary to provide for the safety of passenger vessels and fishing vessels in the area during periods of increased vessel traffic. The purpose of the safety zone is to restrict non-ferry vessel traffic from entering a 200-yard radius of the AMHS Ferry Terminal while the ferry is within 200-yards of the pier. Persons desiring to transit within these safety zones must contact the Captain of the Port, Prince William Sound, Alaska or the designated on scene representative on VHF channel 13 (156.650 MHz) to receive permission.

DATES: This temporary final rule will remain in effect from July 8, 2012, until August 1, 2012.

ADDRESSES: Documents indicated in this preamble as being available in the docket are part of docket (COTP Prince William Sound USCG–2012–0641) and are available for inspection or copying at USCG Marine Safety Unit Valdez Office, Valdez, AK between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: LCDR Danielle Wiley, Chief, Waterways Management, USCG Marine Safety Unit Valdez, at (907) 835–7223, email *danielle.f.wiley@uscg.mil.* If you have questions on viewing the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

Regulatory Information

The Coast Guard is issuing this temporary final rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because fishing openers in Prince William Sound, which includes the Port of Valdez, are announced the evening before the opener by the Alaska Department of Fish and Game, which does not afford time for public feedback on a safety zone that will be in effect only when that opener includes the area of Port Valdez that includes the AMHS Terminal.

In the past, during the month of July, the Alaska Department of Fish and Game has announced fishing openers in the Port of Valdez with less than less than 24 hours advance notice. Furthermore, there have been instances when ferries arriving/departing the AMHS Ferry Terminal have encountered fishing vessels holding station and setting nets in positions that created safety hazards for the passenger vessels that were trying to safely maneuver to and from the pier. Any delay encountered in this regulation's effective date by publishing a NPRM would be contrary to public interest, since immediate action is needed to provide for the safety of life and property on navigable waters during these fishing openers.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds, for the reasons noted above, that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**.

Basis and Purpose

The legal basis for this rule is 33 U.S.C. 1231; 46 U.S.C. chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; Public Law 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1. which collectively authorize the Coast Guard to define regulatory safety zones.

The safety zone is necessary to protect all vessels operating in the vicinity of the AMHS Ferry Terminal. The safety zone will terminate whenever a departing ferry vessel is more than 200 yards from the AMHS Ferry Terminal. The safety zone will also terminate whenever an arriving ferry vessel moors to the pier. The impact of this rule on commercial and recreational traffic is expected to be minimal because of the limited area and duration of the safety zone.

Discussion of Rule

The Coast Guard is establishing a temporary 200-yard safety zone around the AMHS Ferry Terminal at position 61°07′26″ N and 146°21′50″ W in the navigable waters of Port Valdez. The zone will only be in effect when a ferry vessel is within 200 yards of the AMHS Ferry Terminal, between July 3, 2012, and August 1, 2012, and when there is an Alaska Department of Fish and Game fish opener that includes the 200-yard radius surrounding the AMHS pier. The limited size and duration of the zone is designed to minimize the impact on other vessels transiting the waters of Port Valdez.

Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on 13 of these statutes or executive orders.

Regulatory Planning and Review

This rule is not a ''significant regulatory action'' under section 3(f) of Executive Order 12886, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not ''significant'' under the regulatory policies and procedures of the Department of Homeland Security (DHS). This finding is based on the limited size and duration of the safety zone which will have minimal, if any, impact on vessels transiting the waters of Prince William Sound and Port Valdez.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

The ruling will affect the following entities, some of which may be small entities: Recreational, ferry, and fishing vessels for very short periods of time and improve the safe operations for all parties involved by reducing risk to life and property. This rule will only be enforced during an AMHS ferry's arrival or departure from the AMHS Ferry Terminal from July 3, 2012, until August 1, 2012, and from the time a fish opener begins until it expires. Vessel traffic can pass safely around the zone. Before the effective period, we will issue maritime advisories widely available to users of Port Valdez via VHF CH 13. Broadcast Notice to

Mariners will also be made on CH 16. All indications are that there will be minimal impact to small entities.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we offer to assist small entities in understanding the rule so that they can better evaluate its effects on them and participate in the rulemaking process.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a ''significant energy action'' under that order because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule is categorically excluded, under figure 2–1, paragraph (34)(g) of the Instruction. Under figure 2–1, paragraph (34)(g), of the Instruction, an ''Environmental Analysis Check List'' and a ''Categorical Exclusion Determination'' have been completed and are available in the docket where indicated under Addresses.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 46 U.S.C. Chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; Pub. L. 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T17–0641 to read as follows:

§ 165.T17–0641 Safety Zone; Port Valdez, Alaska Marine Highway System Ferry Terminal.

(a) *Location.* The following area is a safety zone: The navigable waters within a 200-yard radius of the Alaska Marine Highway System Ferry Terminal in the Port of Valdez.

(b) *Effective period.* The safety zone in this section will be enforced from July 8, 2012, through August 1, 2012, when there is an Alaska Marine Highway System Ferry within the safety zone and there is a fishing opener that includes the navigable waters within the safety zone during these dates.

(c) *Regulations.* For the purpose of this section, the general regulations contained in 33 CFR 165.23 apply to all but the following vessels in the areas described in paragraph (a), (b), or (c):

(1) Alaska Marine Highway System Ferries.

(2) Vessels that obtain permission through the Duty Officer at Marine Safety Unit Valdez, who can be contacted at (907) 831–0236.

(3) Vessels that obtain permission from the Captain of the Port, who may authorize and designate any Coast Guard commissioned, warrant, or petty officer to act on his behalf in enforcing the safety zone.

Dated: July 8, 2012.

B.J. Hawkins,

Commander, U.S. Coast Guard, Captain of the Port, Prince William Sound.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2011–1126]

RIN 1625–AA87

Security Zones; Seattle's Seafair Fleet Week Moving Vessels, Puget Sound, WA

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce Seattle's Seafair Fleet Week Moving Vessels Security Zones from 12:00 p.m. on July 31, 2012 through 5:00 p.m. on August 6, 2012. These security zones are necessary to help ensure the security of the vessels from sabotage or other subversive acts during Seafair Fleet Week Parade of Ships. The Designated participating vessels are: the HMCS NANAIMO (NCSM 702), the HMCS EDMONTON (NCSM 703), the HMCS ORIOLE, and the USCGC STRATTON (WMSL 752). During the enforcement period, no person or vessel may enter or remain in the security zones without the permission of the COTP or a Designated Representative. The COTP has granted general permission for vessels to enter the outer 400 yards of the security zones as long as those vessels within the outer 400 yards of the security zones operate at the minimum speed necessary to maintain course unless required to maintain speed by the navigation rules.

DATES: This rule will be enforced from 12:00 p.m. on July 31, 2012 thru 5:00 p.m. on August 6, 2012 unless canceled sooner by the Captain of the Port.

ADDRESSES: Documents indicated in this preamble as being available in the docket are part of docket USCG–2011–1126 and are available online by going to *http://www.regulations.gov,* inserting USCG–2011–1126 in the ''Keyword'' box, and then clicking ''Search.'' They are also available for inspection or copying at the Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary rule, call or email Lieutenant Junior Grade Anthony P. LaBoy, Sector Puget Sound, Waterways Management Division, U.S. Coast Guard; telephone 206–217–6323, email *SectorPugetSoundWWM@uscg.mil.* If you have questions on viewing the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the security zones for Seattle's Seafair Fleet Week Moving Vessels within the Captain of the Port, Puget Sound Area of Responsibility in 33 CFR 165.1333 from 12:00 p.m. on July 31, 2012 through 5:00 p.m. on August 6, 2012.

Under the provisions of 33 CFR 165.1333, the following areas are security zones: All navigable waters within 500 yards of the HMCS NANAIMO (NCSM 702), HMCS EDMONTON (NCSM 703), HMCS ORIOLE, and the USCGC STRATTON (WMSL 752) while each vessel is in the Sector Puget Sound COTP Zone. No person or vessel may enter or remain in the security zones described in paragraph (a) of this section without the permission of the COTP or his Designated Representative.

The COTP has granted general permission for vessels to enter the outer 400 yards of the security zones as long as those vessels within the outer 400 yards of the security zones operate at the minimum speed necessary to maintain course unless required to maintain speed by the navigation rules. The COTP may be assisted by other federal, state or local agencies with the enforcement of the security zones.

All vessel operators who desire to enter the inner 100 yards of the security zones or transit the outer 400 yards at greater than minimum speed necessary to maintain course must obtain permission from the COTP or his Designated Representative by contacting the on-scene Coast Guard patrol craft on VHF 13 or Channel 16. Requests must include the reason why movement within this area is necessary. Vessel operators granted permission to enter the security zones will be escorted by the on-scene Coast Guard patrol craft until they are outside of the security zones.

This notice is issued under authority of 33 CFR 165.1333 and 5 U.S.C. 552(a). In addition to this notice, the Coast Guard will provide the maritime community with extensive advanced notification of the security zones via the Local Notice to Mariners and marine information broadcasts on the day of the event.

Dated: July 17, 2012.

S.J. Ferguson,

Captain, U.S. Coast Guard, Captain of the Port, Puget Sound.

DEPARTMENT OF EDUCATION

34 CFR Chapter II

[CFDA Number: 84.282P]

Final Definitions, Requirements, and Selection Criteria; Charter Schools Program (CSP)—Charter School Exemplary Collaboration Awards

AGENCY: Office of Innovation and Improvement, Department of Education.

ACTION: Final definitions, requirements, and selection criteria.

SUMMARY: The Assistant Deputy Secretary for Innovation and Improvement announces final definitions, requirements, and selection criteria under the Charter Schools Program—Charter School Exemplary Collaboration Awards (Collaboration Awards). The Assistant Deputy Secretary may use one or more of these definitions, requirements, and selection criteria for competitions in fiscal year (FY) 2012 and later years. We take this action to create incentives for high-quality charter schools to collaborate with non-chartered public schools and non-chartered local educational agencies (LEAs) to share and transfer best educational and operational practices at the elementary and secondary school levels; and disseminate information about these collaborations nationwide.

DATES: *Effective Date:* These final definitions, requirements, and selection criteria are effective August 29, 2012.

FOR FURTHER INFORMATION CONTACT: Nancy Paulu, U.S. Department of Education, 400 Maryland Avenue SW., Room 4W246, Washington, DC 20202–5970; or Erin Pfeltz, U.S. Department of Education, 400 Maryland Avenue SW., Room 4W255, Washington, DC 20202–5970. Emails and telephone numbers: *nancy.paulu@ed.gov* or (202) 205–5392; *erin.pfeltz@ed.gov* or (202) 205–3525.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Purpose of Program

The purpose of the Charter Schools Program (CSP) is to increase national understanding of the charter schools model by—

(1) Providing financial assistance for the planning, program design, and initial implementation of charter schools;

(2) Evaluating the effects of charter schools, including the effects on students, student academic achievement, staff, and parents;

(3) Expanding the number of high-quality charter schools available to students across the Nation; and

(4) Encouraging the States to provide support to charter schools for facilities financing in an amount that is more commensurate with the amount the States have typically provided for traditional public schools.

The purpose of the Collaboration Awards competition (CFDA 84.282P) is to encourage high-quality charter schools (as defined in this notice) to partner with non-chartered public schools (as defined in this notice) and non-chartered LEAs (as defined in this notice) to share and transfer best educational and operational practices, and to disseminate information about such practices. By promoting strong partnerships and supporting the dissemination of information about the activities carried out through the partnerships, these Collaboration Awards should facilitate the exchange of best practices between public charter schools, non-chartered public schools, and non-chartered LEAs; and help the United States Department of Education (Department) identify and publicize successful collaborations. The Collaboration Awards competition is designed to encourage public charter schools, non-chartered public schools, and non-chartered LEAs to share resources and responsibilities; build trust and teamwork; boost academic excellence; and provide students and their parents with a range of effective educational options. The Department, through the Collaboration Awards competition, aims to increase national understanding of the charter schools model.

Program Authority

The CSP is authorized under 20 U.S.C. 7221–7221i; CSP national activities are authorized under 20 U.S.C. 7221d.

The Department published a notice of proposed definitions, requirements, and selection criteria (NPP) for the Collaboration Awards in the **Federal Register** on April 25, 2012 (77 FR 24690). The NPP contained background information and our reasons for proposing the particular definitions, requirements, and selection criteria.

There are differences between the definitions, requirements, and selection criteria proposed in the NPP and these final definitions, requirements, and selection criteria, as discussed in the *Analysis of Comments and Changes* section elsewhere in this notice. The most significant changes are as follows: (1) Clarifying that only high-quality charter schools are eligible to apply for Collaboration Awards; (2) adding a definition for ''high-quality charter school''; (3) creating an additional selection criterion, ''Quality of the lead applicant,'' which allows consideration of the extent to which an applicant is a high-quality charter school; (4) changing the title of the first selection criterion from ''Record of and potential for success'' to ''Record of and potential for success of collaboration''; (5) altering the title of the Collaboration Awards competition from ''Exemplary Charter School Collaboration Awards'' to ''Charter School Exemplary Collaboration Awards'' in order to emphasize that the collaboration itself must be exemplary; and (6) adding ''school climate'' and access to charter schools for students with disabilities to the list of potential areas suitable for a collaboration.

Public Comment: In response to our invitation in the NPP, eight parties submitted comments on the proposed definitions, requirements, and selection criteria.

Generally, we do not address technical and other minor changes. In addition, we do not address general comments that raise concerns not directly related to the definitions, requirements, or selection criteria.

Analysis of Comments and Changes: An analysis of the comments and any changes in the definitions, requirements, and selection criteria since publication of the NPP follows.

Priorities

Comment: One commenter suggested that we create a new priority, not included in the NPP, to encourage collaboration between public charter schools and non-chartered public schools that aims to improve access to charter schools for students with disabilities. The commenter stated that disseminating information about successful collaborations related to improving access to charter schools for students with disabilities would also make a positive contribution to the field of special education.

Discussion: We agree that improving access to charter schools for students with disabilities is important, and an area in which charter schools frequently look for best practices and models. Because this is the first year of the competition, however, we believe that it is best to encourage applications from a broad range of charter schools and to avoid requirements or priorities that might discourage potential applicants from applying. This does not preclude the possibility of a priority related to improving access to charter schools for students with disabilities being included in future years.

Change: We decline to create a priority to encourage collaboration between public charter schools and non-chartered public schools that aims to improve access to charter schools for students with disabilities. The Final Application Requirements section of this notice, however, lists examples of areas that might be appropriate for collaboration. This list includes access to charter schools by students with disabilities as an area suitable for collaboration. We have removed ''students with other special needs'' from the list in the Final Application Requirements section of areas that might be appropriate for collaboration because it duplicates other areas listed: ''Special education services and access to charter schools by students with disabilities'' and ''English learners.''

Definitions

Comment: One commenter suggested that the proposed definition of ''collaboration'' align more closely with the intent of the Collaboration Awards as described in the NPP's Summary and Purpose of Program sections. The commenter recommended an expanded and more detailed definition of ''collaboration'' that incorporates much of the language used in the Summary and Purpose of Program sections.

Discussion: We decline to revise the definition of ''collaboration'' because a more detailed definition could be unnecessarily restrictive and could limit how applicants think about collaboration. The final definition reads, ''Collaboration refers to the activities of a partnership in which two or more organizations or entities work together to accomplish a common goal, which may involve sharing or transferring of best practices or strategies.'' We consider this definition appropriate because it provides applicants the flexibility to be creative in continuing, modifying, or expanding their collaborations.

Change: None.

Comment: Two commenters recommended that we define ''exemplary'' in order to clarify the expectations and standards for applicants and to help them determine whether their schools are qualified to apply for an award.

Discussion: The Collaboration Awards competition is designed to identify exemplary partnerships between high-quality public charter schools and non-chartered public schools and non-chartered LEAs, as well as to support the dissemination of information about the activities carried out through the partnerships. To clarify the requirements for both the applicant and the collaboration, we are making several revisions to the final requirements, definitions, and selection criteria.

Changes: (1) We have changed the competition's title from ''Exemplary Charter School Collaboration Awards'' to ''Charter School Exemplary Collaboration Awards'' to emphasize that the collaboration itself must be exemplary. (2) We have revised paragraph (a)(1) of the Final Program Requirements section of this notice to clarify that eligible applicants must be high-quality charter schools. (3) We have included a definition of ''high-quality charter school'' in this notice. Our definition is similar to the definition of ''high-quality charter school'' provided in the notice of final priorities for the replication and expansion of high-quality charter schools (CFDA No.84.282M), published in the **Federal Register** on July 12, 2011 (76 FR 40901). (4) We have changed the title of the first selection criterion from ''Record of and potential for success'' to ''Record of and potential for success of collaboration.'' (5) We have added a selection criterion, ''Quality of the lead applicant.'' This criterion will allow reviewers to provide points to applicants based on the extent to which the lead applicant is a high-quality charter school.

Eligibility Requirements

Comment: Three commenters recommended that high-performing magnet schools be allowed to apply for Collaboration Awards. They cited what they believe is a wealth of outstanding and innovative programs in magnet schools that are worth sharing with others. All three commenters noted that some of the Nation's highest-quality schools today are magnet schools that began as low-performing schools with students from low-income families admitted by lottery.

Discussion: We agree that there are numerous high-performing magnet schools that are worthy of participating in a collaborative initiative. Because the Collaboration Awards are authorized under the CSP, however, only charter schools are the lead applicants. In order to qualify for a Collaboration Award, a charter school must enter into a partnership with a non-chartered public school (as defined in this notice) or a non-chartered LEA (as defined in this notice). Magnet schools are non-chartered public schools and, as such, would be eligible to participate in this competition as partners with high-quality charter schools.

Change: None.

Comment: None.

Discussion: The NPP stated in the Proposed Eligibility Requirements section that ''an applicant may submit more than one application if each application proposes to carry out substantially different authorized activities.'' We are removing this language from the Final Eligibility Requirements because applicants do not need specific authorization to submit more than one application for a Collaboration Award. Applicants should be aware, however, that it is highly unlikely that more than one application from the same applicant will be approved for funding because the Department anticipates making only a limited amount of funding available for Collaboration Awards and it is within the Secretary's discretion to fund applications out of rank order in order to achieve geographic diversity.

Change: We have removed the statement in the Eligibility section that ''An applicant may submit more than one application if each application proposes to carry out substantially different authorized activities.''

Application Requirements

Comment: One commenter suggested that we revise the Application Requirements section to include ''school climate'' on the list of areas that may be suitable for a collaboration. The commenter cited the recent movie ''Bully,'' which documented the effects of bullying, and stated that communities and schools want to learn from others about providing all students with a safe learning environment. The commenter also cited parts of the ESEA that support the importance of a safe and positive school climate for all students. Finally, the commenter cited research that links a positive school climate to many indicators of a school's success.

Discussion: We agree that a healthy school climate is an important factor in achieving positive educational outcomes. Bullying is one of many issues (drugs and gangs are examples of others) that can have a negative effect on the school environment.

Change: We have revised paragraph (a)(3) of the Final Application Requirements section of this notice to include school climate on the list of potential areas suitable for a collaboration.

Selection Criteria

Comment: One commenter recommended that we incorporate the following three indicators of operational quality into the first proposed selection criterion, ''Record of and potential for success of the collaboration'': (1) Financial performance and sustainability; (2) performance and stewardship; and (3) parent and community engagement. The commenter noted that these three indicators were developed and published by a well-respected consortium of charter school organizations as a tool to help the charter school community determine operational quality.

Discussion: We agree that indicators similar to those recommended by the commenter will help applicants demonstrate operational quality and improve the overall quality of applications received. Applicants can use these indicators to show more clearly the extent to which their proposed collaboration and dissemination plans will improve operational practices and productivity among all partners in the collaboration.

Change: We have incorporated three indicators similar to those suggested by the commenter in the first selection criterion, ''Record of and potential for success of the collaboration.'' The element in the NPP stated: ''Improved operational practices and productivity among all partners.'' The revised element (B)(i) of the first selection criterion now reads: ''Improved operational practices and productivity among all partners in such areas as financial performance and

sustainability, governing board performance and stewardship, and parent and community engagement.''

Comment: One commenter suggested that we expand the first proposed selection criterion, ''Record of and potential for success of the collaboration,'' to include four indicators of academic quality: (1) Student achievement level; (2) student progress over time; (3) postsecondary readiness and success; and (4) student engagement.

Discussion: Three of the four indicators that the commenter lists were included in the first selection criterion proposed in the NPP and are also included in the Final Selection Criteria. The first selection criterion contains an element, ''Improved student achievement,'' which peer reviewers will use to judge how the collaboration has improved student achievement in the past, as well as how it will improve student achievement in the future. The first selection criterion also addresses postsecondary readiness and success with elements such as improved high school graduation rates, improved rates of college matriculation and college graduation, and improved rates of attendance and graduation from other postsecondary (i.e., non-college) institutions or programs. However, the first selection criterion, as proposed, did not address student engagement. We agree with the commenter that it should do so and have expanded it accordingly.

Change: We have revised element (B)(iii) in the first selection criterion, ''Record of and potential for success of the collaboration,'' by adding two factors related to student engagement—attendance and retention. The revised element now reads, ''Improved student attendance and retention, and improved high school graduation rates.''

Comment: One commenter noted that the NPP states that the proposed selection criteria for this competition were designed to expand the number of high-quality charter schools, among other things. The commenter stated, however, that the competition's proposed selection criteria would not encourage applicants to address issues or undertake activities designed primarily to increase the number of high-quality charter schools. The commenter recommended adding a selection criterion aimed at encouraging applicants to develop a collaboration project that might increase the number of high-quality charter schools nationwide and improve services to students attending these schools. Specifically, the commenter recommended a new selection criterion that would reward collaborators for jointly: (1) Developing a process to ensure equitable funding for public charter schools and non-chartered public schools; (2) sharing data and information among schools; and (3) developing and implementing activities in schools, such as teacher professional development, building maintenance, and nutrition programs.

Discussion: The commenter is correct in that one purpose of these Collaboration Awards is to increase national understanding of the charter school model by expanding the number of high-quality charter schools available to students nationwide. We also agree that the commenter's proposed selection criterion (and its three elements) would promote this purpose. We believe, however, that the definitions, requirements, and selection criteria set forth in this notice will be more effective not only in increasing the number of high-quality charter schools available to students across the Nation, but also, in promoting the other purposes of the Collaboration Awards.

Change: Although we decline to add the new selection criterion proposed by the commenter, we have revised section (a)(1) of the Eligibility Requirements of this notice to allow public charter schools that do not qualify as high-quality charter schools (as defined in this notice) to be included as partners in the collaboration so long as (1) the lead applicant is a high-quality charter school; (2) the lead applicant is separate and distinct from other charter schools included as partners in the collaboration; and (3) at least one non-chartered public school (as defined in this notice) or non-chartered LEA (as defined in this notice) also is a part of the collaboration. We also have added a sentence to section (a)(2) of the Eligibility Requirements section of this notice to clarify that public charter schools that are not high-quality charter schools are ineligible to serve as the lead applicant or fiscal agent; and revised section (b)(4) of this notice (Funding Restrictions) to allow collaborations to expand by adding public charter schools that are not high-quality charter schools, as described in the grant application. We think these changes further support the goal of increasing the number of high-quality charter schools.

Final Program Requirements

The Assistant Deputy Secretary for Innovation and Improvement establishes the following program requirements for the Collaboration Awards. We may apply one or more of these requirements in any year in which this program is in effect.

(a) *Eligibility:*

(1) Eligible applicants must be high-quality charter schools (as defined in this notice) that apply in partnership with at least one non-chartered public school (as defined in this notice) or non-chartered LEA (as defined in this notice) and have the support of the partner(s) to participate in the Collaboration Awards competition in accordance with requirements in the Final Application Requirements section of this notice. Other public charter schools that do not qualify as high-quality charter schools may be included in the collaboration so long as (1) the lead applicant is a high-quality charter school; (2) the lead applicant is separate and distinct from any other charter schools included as partners in the collaboration; and (3) at least one non-chartered public school (as defined in this notice) or non-chartered LEA (as defined in this notice) also is a part of the collaboration.

(2) The partnership must comply with the requirements for group applications set forth in 34 CFR 75.127–75.129.

Note: Only an eligible entity (a high-quality charter school) may apply for a grant or be the fiscal agent for a grant. Thus, neither a non-chartered public school (as defined in this notice) nor a non-chartered LEA (as defined in this notice) is eligible to serve as the lead applicant or fiscal agent for a Collaboration Award. Nor is a public charter school that is not a high-quality charter school eligible to serve as the lead applicant or fiscal agent.

(3) Eligible applicants may not have any significant compliance issues (as defined in this notice), including in the areas of student safety, financial management, and statutory or regulatory compliance.

(b) *Funding Restrictions:* A Collaboration Award recipient must use the grant funds for one or more of the following: (1) Continuing the collaboration for which it received the award, as described in its grant application; (2) modifying the collaboration for which it received the award, as described in the grant application; (3) expanding the collaboration for which it received the award by adding additional areas of collaboration, as described in the grant application; (4) expanding the collaboration for which it received the award by adding additional partners (non-chartered public schools (as defined in this notice), non-chartered LEAs (as defined in this notice), or public charter schools that are not high-quality charter schools), as described in the grant application. Collaboration Award recipients also must use a portion of the grant funds to disseminate information about the

collaboration activities to other public schools, including public charter schools, non-chartered public schools (as defined in this notice), and non-chartered LEAs (as defined in this notice). All activities carried out under the Collaboration Awards must fall within the scope of authorized activities set forth in section 5205(a) of the ESEA.

Final Application Requirements

The Assistant Deputy Secretary for Innovation and Improvement establishes the following application requirements for the CSP Collaboration Awards competition. We may apply one or more of these requirements in any year in which this program is in effect.

An applicant for a Collaboration Award must—

(a) Provide a detailed narrative describing (1) the applicant's past or existing collaboration (which may involve more than one partner); (2) the applicant's proposal to continue, modify, or expand (by adding new areas of collaboration or new partners) the collaboration; and (3) the applicant's plan to disseminate information about the collaboration (which may include information about best practices) to other public schools, including public charter schools, non-chartered public schools, and non-chartered LEAs.

The proposed collaboration may focus on a wide range of areas within the scope of activities authorized under section 5205(a) of the ESEA. The list of potential areas includes, but is not limited to, curriculum and instruction, data management and sharing, organization and management, personnel, facilities, finances, Federal programs, standards, assessments, special education services and access to charter schools by students with disabilities, English learners, student transportation, professional development and training, and school climate.

(b) Provide written assurances from authorized officials of the entities involved in the partnership that all participants—

- Agree to submit an application for an award under the competition and have read, understand, and agree with the application for the competition; and
- Authorize the executive summary or narrative of the application, with proprietary information redacted, to be published on the U.S. Department of Education's Web site (ed.gov), *data.ed.gov,* the National Charter School Resource Center Web site (*charterschoolcenter.org*), or any other Web site or publication deemed appropriate by the Secretary;

(c) Submit a partnership agreement that meets the requirements of 34 CFR 75.128(b);

(d) Provide a clear description of the goals and desired outcomes of the proposed collaboration and current or proposed measures that would be used to gauge success in meeting those goals and desired outcomes;

(e) Describe any past, existing, or anticipated obstacles to implementing the collaboration or to disseminating information about the collaboration, and the strategies that were or will be used to overcome those obstacles;

(f) Specify how the award money will be used to implement the collaboration and to disseminate information about the collaboration in accordance with section 5205(a) of the ESEA; and

(g) Specify how the award money will be allocated between the lead applicant and the partner(s) named in the application, including the specific activities that will be carried out by the lead applicant and its partner(s).

Definitions

In addition to the definitions in section 5210 of the ESEA, which include the definition of ''charter school,'' we are establishing the following definitions for the Collaboration Awards competition. We may apply one or more of these definitions in any year in which we make awards under a Collaboration Awards competition.

Collaboration means the activities of a partnership in which two or more organizations or entities work together to accomplish a common goal, which may involve sharing or transferring best practices or strategies.

High-quality charter school means a charter school (as defined in section 5210(1) of the ESEA) that has no significant compliance issue (as defined in this notice) and shows evidence of strong academic results for the past three years (or over the life of the school if the school has been open for fewer than three years), based on the following factors:

(1) Increased student achievement (as defined in this notice) and attainment for all students, including, as applicable, educationally disadvantaged students served by the charter school.

(2) Either—

(i) Demonstrated success in closing historic achievement gaps for the subgroups of students described in section 1111(b)(2)(C)(v)(II) of the ESEA at the charter school; or

(ii) No significant achievement gaps between any of the subgroups of students described in section 1111(b)(2)(C)(v)(II) of the ESEA at the charter school and significant gains in student achievement (as defined in this notice) with all populations of students served by the charter school.

(3) Results (including, where applicable and available, performance on statewide tests, attendance and retention rates, high school graduation rates, college attendance rates, and college persistence rates) for low-income and other educationally disadvantaged students served by the charter school that are above the average achievement results for such students in the State.

Non-chartered local educational agency (LEA) means an LEA that does not qualify as a charter school as defined in section 5210(1) of the ESEA or under State law.

Non-chartered public school means a public school that does not qualify as a charter school under section 5210(1) of the ESEA or under State law.

Significant compliance issue means a violation that did, will, or could lead to the revocation of a school's charter.

Student achievement means—

(a) For tested grades and subjects: (1) A student's score on the State's assessments under the ESEA; and (2) as appropriate, other measures of student learning, such as those described in paragraph (b) of this definition, provided they are rigorous and comparable across schools.

(b) For non-tested grades and subjects: alternative measures of student learning and performance, such as student scores on pre-tests and end-of-course tests; student performance on English language proficiency assessments; and other measures of student achievement that are rigorous and comparable across schools.

Final Selection Criteria

The Secretary establishes the following selection criteria for Collaboration Awards competitions and may apply one or more of these criteria alone or in combination with one or more selection criteria (1) based on the CSP authorizing statute or (2) in 34 CFR 75.210, in any year in which this program is in effect. In the notice inviting applications or the application package, or both, we will announce the maximum possible points assigned to each criterion.

The Secretary may make awards to the top-rated applications proposing to carry out activities in specific areas of focus (e.g., curriculum and instruction, data management and sharing, organization and management) within the scope of authorized activities under section 5205(a) of the ESEA. In a particular year, the Secretary may

restrict applications to one or more areas of focus. Additionally, in making awards, the Secretary may fund applications out of rank order in order to ensure that the Collaboration Awards are distributed throughout each area of the Nation or a State.

(1) *Record of and potential for success of collaboration.* (A) The extent to which the applicant's past or existing collaboration has improved educational outcomes and operational practices; and (B) The extent to which the applicant's proposed collaboration and dissemination plan will achieve one or more of the following demonstrable results:

(i) Improved operational practices and productivity among all partners in such areas as financial performance and sustainability, governing board performance and stewardship, and parent and community engagement.

(ii) Improved student achievement (as defined in this notice).

(iii) Improved student attendance and retention, and improved high school graduation rates.

(iv) Improved rates of college matriculation and college graduation.

(v) Improved rates of attendance and graduation from other postsecondary (i.e., non-college) institutions or programs.

(2) *Quality of the lead applicant.* (A) The degree, including the consistency over the past three years, to which the applicant has demonstrated success in significantly increasing student achievement (as defined in this notice) and attainment for all students, including, as applicable, educationally disadvantaged students served by the charter school.

(B) Either—

(i) The degree, including the consistency over the past three years, to which the applicant has demonstrated success in closing historic achievement gaps for the subgroups of students described in section 1111(b)(2)(C)(v)(II) of the ESEA at the charter school; or

(ii) The degree, including the consistency over the past three years, to which there have not been significant achievement gaps between any of the subgroups of students described in section 1111(b)(2)(C)(v)(II) of the ESEA at the charter school and to which significant gains in student achievement (as defined in this notice) have been made with all populations of students served by the charter school.

(C) The degree, including the consistency over the past three years, to which the applicant has achieved results (including, where applicable and available, performance on statewide tests, student attendance and retention rates, high school graduation rates, college attendance rates, and college persistence rates) for students from low-income families and other educationally disadvantaged students served by the charter school that are above the average academic achievement results for such students attending other public schools in the State.

(3) *Quality of the project design.* The extent to which the applicant proposes a high-quality plan to use its Collaboration Award funds to improve educational outcomes and operational practices in public schools, including public charter schools.

(4) *Potential for scalability.* The extent to which the applicant's proposed collaboration can be replicated or adapted beyond the participating partners by other public schools or LEAs, including public charter schools and charter school LEAs, and sustained over the long-term.

(5) *Innovation.* The extent to which the applicant demonstrates that its proposed collaboration, as well as its dissemination plan, are either (a) substantially different from other efforts in its area of focus; or (b) substantially more effective than similar efforts in its area of focus.

Final Definitions, Requirements, and Selection Criteria

Note: This notice does not preclude us from proposing additional priorities, requirements, definitions, or selection criteria, subject to meeting applicable rulemaking requirements.

Note: This notice does *not* solicit applications. In any year in which we choose to use one or more of these definitions, requirements, and selection criteria we invite applications through a notice in the **Federal Register**.

Executive Orders 12866 and 13563

Regulatory Impact Analysis

Under Executive Order 12866, the Secretary must determine whether this regulatory action is ''significant'' and, therefore, subject to the requirements of the Executive order and subject to review by the Office of Management and Budget (OMB). Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of $100 million or more, or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities in a material way (also referred to as an ''economically significant'' rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles stated in the Executive order.

This final regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866.

We have also reviewed this final regulatory action under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency ''to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.'' The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include ''identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.''

We are issuing these final definitions, requirements, and selection criteria only on a reasoned determination that their benefits justify their costs. In choosing

among alternative regulatory approaches, we selected those approaches that maximize net benefits. The Department believes that this regulatory action is consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action does not unduly interfere with State, local, and Tribal governments in the exercise of their governmental functions.

In accordance with both Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs are those resulting from statutory requirements and those we have determined as necessary for administering the Department's programs and activities.

Paperwork Reduction Act of 1995: The Paperwork Reduction Act of 1995 does not require you to respond to a collection of information unless it displays a valid OMB control number. The collection of information is approved under OMB control number 1855–0026.

Intergovernmental Review: This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. One of the objectives of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism. The Executive Order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

This document provides early notification of our specific plans and actions for this program.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (e.g., braille, large print, audiotape, or compact disc) on request to either of the program contact persons listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Dated: July 25, 2012.

James H. Shelton, III,

Assistant Deputy Secretary for Innovation and Improvement.

[FR Doc. 2012–18573 Filed 7–27–12; 8:45 am]

BILLING CODE 4000–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2012–0080; FRL–9704–7]

Approval and Promulgation of Implementation Plans; Tennessee: Prevention of Significant Deterioration and Nonattainment New Source Review; Fine Particulate Matter ($PM_{2.5}$)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to approve changes to the Tennessee State Implementation Plan (SIP), submitted by the Tennessee Department of Environment and Conservation (TDEC) through the Division of Air Pollution Control to EPA on July 29, 2011. The July 29, 2011, SIP revision modifies Tennessee's New Source Review (NSR) Prevention of Significant Deterioration (PSD) and Nonattainment New Source Review (NNSR) programs. Tennessee's July 29, 2011, SIP revision proposes to incorporate, into the Tennessee SIP, NSR provisions for $PM_{2.5}$ as amended in EPA's 2008 NSR $PM_{2.5}$ Implementation Rule. Also, Tennessee's July 29, 2011, SIP revision makes a corrective and clarifying administrative change to rule 1200–03–09–.01. EPA is approving Tennessee's July 29, 2011, SIP revision because it is consistent with the Clean Air Act (CAA or Act) and EPA regulations regarding NSR permitting.

DATES: *Effective Date:* This rule will be effective August 29, 2012.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2012–0080. All documents in the docket are listed on the *www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, i.e., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding federal holidays.

FOR FURTHER INFORMATION CONTACT: For information regarding the Tennessee SIP, contact Ms. Twunjala Bradley, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. Ms. Bradley's telephone number is (404) 562–9352; email address: *bradley.twunjala@epa.gov.* For information regarding NSR, contact Ms. Yolanda Adams, Air Permits Section, at the same address above. Ms. Adams' telephone number is (404) 562–9214; email address: *adams.yolanda@epa.gov.* For information regarding the $PM_{2.5}$ NAAQS, contact Mr. Joel Huey, Regulatory Development Section, at the same address above. Mr. Huey's telephone number is (404) 562–9104; email address: *huey.joel@epa.gov.*

I. Background
II. This Action
III. Final Action
IV. Statutory and Executive Order Reviews

I. Background

EPA is taking final action on Tennessee's July 29, 2011, SIP revision to adopt rules equivalent to federal requirements for NSR permitting.[1] Tennessee's July 29, 2011, SIP revision includes changes to Tennessee's Air Quality Regulations, Chapter 1200–03–09—Construction and Operating Permits, Rule Number .01—Construction Permits, to adopt federal PSD and NNSR promulgated in the rule entitled ''Implementation of the New Source Review (NSR) Program for Particulate Matter Less than 2.5 Micrometers ($PM_{2.5}$), '' Final Rule, 73 FR

[1] Tennessee's July 29, 2011, SIP revision also contains changes to Tennessee Chapter 1200–03–26—Administrative Fees Schedule provisions. EPA is not proposing action on this part of the submittal as these provisions are not part of the federally-approved Tennessee SIP.

28321 (May 16, 2008), hereafter referred to as the ''NSR $PM_{2.5}$ Rule.'' Also, Tennessee's July 29, 2011, SIP revision includes clarifying changes to rule 1200–03–09–.01.

On June 11, 2012, EPA published a proposed rulemaking to approve the aforementioned changes to Tennessee's NSR PSD program. *See* 77 FR 34302. Comments on the proposed rulemaking were due on or before July 11, 2012. No comments, adverse or otherwise, were received on EPA's June 11, 2012 proposed rulemaking. Pursuant to section 110 of the CAA, EPA is now taking final action to approve the changes to Tennessee's NSR PSD program as provided in EPA's June 11, 2012, proposed rulemaking. A summary of the background for today's final action is provided below. For more detail, please refer to EPA's proposed rulemaking at 77 FR 34302.

A. NSR $PM_{2.5}$ Rule

EPA finalized a rule on May 16, 2008, that revised the NSR program requirements to establish the framework for implementing preconstruction permit review for the $PM_{2.5}$ NAAQS in both attainment and nonattainment areas. Specifically, the NSR $PM_{2.5}$ Rule established the following NSR requirements to implement the $PM_{2.5}$ NAAQS: (1) Require NSR permits to address directly emitted $PM_{2.5}$ and precursor pollutants; (2) establish significant emission rates for direct $PM_{2.5}$ and precursor pollutants (including sulfur dioxide (SO_2) and nitrogen oxides (NO_X)); (3) establish $PM_{2.5}$ emission offsets; (4) provide exceptions to inhalable particles smaller than or equal to 10 micrometers in diameter) (PM_{10}) grandfather policy; and (5) require states to account for gases that condense to form particles (condensables) in $PM_{2.5}$ and PM_{10} emission limits in PSD or nonattainment NSR permits. Additionally, the NSR $PM_{2.5}$ Rule authorized states to adopt provisions in their nonattainment NSR rules that would allow interpollutant offset trading. *See* 73 FR 28321. States were required to provide SIP submissions to address the requirements for the NSR $PM_{2.5}$ Rule by May 16, 2011. Tennessee's July 29, 2011, SIP revision addresses the PSD and NNSR requirements related to EPA's May 16, 2008, NSR $PM_{2.5}$ Rule.

1. PM_{10} Surrogate and Grandfathering Policy

In the NSR $PM_{2.5}$ Rule, EPA required that major stationary sources seeking permits must begin directly satisfying the $PM_{2.5}$ requirements, as of the effective date of the rule, rather than relying on PM_{10} as a surrogate, with two exceptions.[2] The first exception is a ''grandfathering'' provision in the federal PSD program at 40 CFR 52.21(i)(1)(xi). This grandfathering provision applied to sources that had applied for, but had not yet received, a final and effective PSD permit before the July 15, 2008, effective date of the May 2008 final rule. The second exception was that states with SIP-approved PSD programs could continue to implement the Seitz Memo's PM_{10} Surrogate Policy for up to three years (until May 2011) or until the individual revised state PSD programs for $PM_{2.5}$ are approved by EPA, whichever comes first. On May 18, 2011 (76 FR 28646), EPA took final action to repeal the $PM_{2.5}$ grandfathering provision at 40 CFR 52.21(i)(1)(xi). This final action ended the use of the 1997 PM_{10} Surrogate Policy for PSD permits under the federal PSD program at 40 CFR 52.21. In effect, any PSD permit applicant previously covered by the grandfathering provision (for sources that completed and submitted a permit application before July 15, 2008)[3] that did not have a final and effective PSD permit before the effective date of the repeal will not be able to rely on the 1997 PM_{10} Surrogate Policy to satisfy the PSD requirements for $PM_{2.5}$ unless the application includes a valid surrogacy demonstration. *See* 76 FR 28646. In its July 29, 2011, SIP revision, Tennessee elected not to adopt the grandfathering provision at 40 CFR 52.21(i)(1)(xi), into its PSD regulations. Therefore, Tennessee's July 29, 2011, SIP revision is consistent with federal regulations since it does not contain the repealed grandfathering provision.

2. ''Condensable'' Provision

In the NSR $PM_{2.5}$ Rule, EPA revised the definition of ''regulated NSR pollutant'' for PSD to add a paragraph providing that ''particulate matter (PM) emissions, $PM_{2.5}$ emissions and PM_{10} emissions'' shall include gaseous emissions from a source or activity which condense to form particulate matter at ambient temperatures and that on or after January 1, 2011, such condensable particulate matter shall be accounted for in applicability determinations and in establishing emissions limitations for PM, $PM_{2.5}$ and PM_{10} in permits issued. *See* 40 CFR 51.166(b)(49)(vi), 52.21(b)(50)(vi) and ''Emissions Offset Interpretative Ruling'' (40 CFR Part 51, Appendix S). On March 16, 2012,[4] EPA proposed a rulemaking to amend the definition of ''regulated NSR pollutant'' promulgated in the NSR $PM_{2.5}$ Rule regarding the PM condensable provision at 40 CFR 51.166(b)(49)(vi), 52.21(b)(50)(i) and EPA's Emissions Offset Interpretative Ruling. *See* 77 FR 15656. The rulemaking proposes to remove the inadvertent requirement in the NSR $PM_{2.5}$ Rule that the measurement of condensable ''particulate matter emissions'' be included as part of the measurement and regulation of ''particulate matter emissions.''[5] Tennessee's July 29, 2011, SIP revision adopts EPA's definition for regulated NSR pollutant for condensables (at 40 CFR 51.166(b)(49)(vi)), including the term ''particulate matter emissions,'' as promulgated in the NSR $PM_{2.5}$ Rule.

On May 1, 2012, the State of Tennessee provided a letter to EPA with clarification of the State's intent in light of EPA's March 12, 2012, proposed rulemaking. Specifically, in that letter, the State of Tennessee requested that EPA not approve the term ''particulate matter emissions'' (at rule 1200–03–09–.01(4)(b)47(vi)) as part of the definition for ''regulated NSR pollutant'' regarding the inclusion of condensable emissions in applicability determinations and in establishing emissions limitations for PM.

3. Interpollutant Trading

The NSR $PM_{2.5}$ final Rule authorized states to adopt provisions in their NNSR rules that would allow major stationary sources and major modifications located in areas designated nonattainment for $PM_{2.5}$ to offset emissions increases of direct $PM_{2.5}$ emissions or $PM_{2.5}$ precursors with reductions of either direct $PM_{2.5}$ emissions or $PM_{2.5}$ precursors in accordance with offset

[2] After EPA promulgated the NAAQS for $PM_{2.5}$ in 1997, the Agency issued guidance documents related to using PM_{10} as a surrogate for $PM_{2.5}$ entitled ''Interim Implementation of New Source Review Requirements for $PM_{2.5}$.'' John S. Seitz, EPA, October 23, 1997 (the ''Seitz memo'') and ''Implementation of New Source Review Requirements in PM–2.5 Nonattainment Areas'' (the ''2005 $PM_{2.5}$ Nonattainment NSR Guidance'').

[3] Sources that applied for a PSD permit under the federal PSD program on or after July 15, 2008, are already excluded from using the 1997 PM_{10} Surrogate Policy as a means of satisfying the PSD requirements for $PM_{2.5}$. *See* 76 FR 28321.

[4] In EPA's June 11, 2012, proposed rulemaking, EPA cited March 12, 2012, as the publication date for the particulate matter emissions correction notice. The correct publication date is March 16, 2012.

[5] The term ''particulate matter emissions'' includes particles that are larger than $PM_{2.5}$ and PM_{10} and is an indicator measured under various New Source Performance Standards (NSPS) (40 CFR part 60). In addition to the NSPS for PM, it is noted that states have regulated ''particulate matter emissions'' for many years in their SIPs for PM, and the same indicator has been used as a surrogate for determining compliance with certain standards contained in 40 CFR part 63, regarding National Emission Standards for Hazardous Air Pollutants.

ratios contained in the approved SIP for the applicable nonattainment area. The inclusion, in whole or in part, of the interpollutant trading offset provisions for $PM_{2.5}$ is discretionary on the part of the states. In the preamble to the NSR $PM_{2.5}$ Rule, EPA included preferred or presumptive offset ratios, applicable to specific $PM_{2.5}$ precursors, that states may adopt in conjunction with the new interpollutant trading offset provisions for $PM_{2.5}$, and for which the state could rely on the EPA's technical work to demonstrate the adequacy of the ratios for use in any $PM_{2.5}$ nonattainment area.[6]

The preferred ratios were subsequently the subject of a petition for reconsideration which the EPA Administrator granted in 2009. As a result of the reconsideration, on July 21, 2011, EPA issued a memorandum entitled ''Revised Policy to Address Reconsideration of Interpollutant Trading Provisions for Fine Particles ($PM_{2.5}$)'' (hereafter referred to as the ''Interpollutant Trading Memorandum''). The Interpollutant Trading Memorandum indicated that the existing preferred offset ratios are no longer considered presumptively approvable and that any precursor offset ratio submitted as part of the NSR SIP for a $PM_{2.5}$ nonattainment area must be accompanied by a technical demonstration showing the net air quality benefits of such ratio for the $PM_{2.5}$ nonattainment area in which it will be applied. Tennessee's July 29, 2011, SIP revision adopts the interpollutant policy but not the preferred trading ratios established in the NSR $PM_{2.5}$ Rule.

II. This Action

Tennessee's July 29, 2011, SIP revision adopts NSR $PM_{2.5}$ Rule provisions into the Tennessee SIP at Chapter 12000–03–09 including: (1) Requirement for NSR permits to address directly emitted $PM_{2.5}$ and precursor pollutants; (2) significant emission rates for direct $PM_{2.5}$ and precursor pollutants (SO_2 and NO_X); (3) PSD and NNSR requirements of states to address condensable PM in establishing enforceable emission limits for PM_{10} or $PM_{2.5}$; (4) $PM_{2.5}$ emission offsets; and (5) optional interpollutant trading provision set forth at 40 CFR 51.165(a)(11). These amendments to the Tennessee rules became state-effective June 27, 2011. Specifically, the SIP revision establishes that the State's existing NSR permitting program requirements for PSD and NNSR apply to the $PM_{2.5}$ NAAQS and its precursors; revise the definitions of ''*significant''* at 1200–03–09–.01(4)(b)24(i) and (5)(b)1(x)(I) to establish significant emission rates for direct $PM_{2.5}$ and $PM_{2.5}$ precursors for major modifications at existing sources (as amended at 40 CFR 51.165(a)(1)(x)(A) and 51.166(b)(23)(i)); revise the term ''*regulated NSR pollutant''* at 1200–03–09–.01(4)(b)47 and (5)(b)1(xlix) to include $PM_{2.5}$, recognize $PM_{2.5}$ precursors and include the requirement that condensable emissions be accounted for in applicability determinations and in establishing emissions limitations for PM (as amended at 40 CFR 51.165(a)(1)(xxxvii)(C) and 51.166(b)(49)); and adopt NNSR emission offsets (a ratio of 1:1) for direct $PM_{2.5}$ at 1200–03–09–.01(5)2(v) (as amended at 40 CFR 51.165(a)(9)).

Additionally, Tennessee's July 29, 2011, SIP revision does not include the grandfathering provision at 40 CFR 52.21(i)(1)(ix) promulgated in the NSR $PM_{2.5}$ Rule. Therefore, Tennessee's July 29, 2011, SIP revision is consistent with federal regulations. The July 29, 2011, SIP revision adopts the elective interpollutant trading provision policy at 1200–03–09(5)(b)2.(v)(XV) set forth at 40 CFR 51.165(a)(11) for the purpose of offsets under the $PM_{2.5}$ NNSR program. Pursuant to EPA's July 21, 2011, Interpollutant Trading Memorandum, the preferred precursor offset ratios included in the preamble to the NSR $PM_{2.5}$ Rule are no longer considered presumptively approvable. Therefore, any precursor offset ratio submitted to EPA for approval as part of the NSR SIP for a $PM_{2.5}$ nonattainment area must be accompanied by a technical demonstration showing the suitability of the ratios for that particular nonattainment area. Tennessee's adoption of the interpollutant trading policy and not the trading ratios does not in any way allow a major stationary source or major modification in the State to obtain offsets through interpollutant trading, nor does it affect the approvability of Tennessee's July 29, 2011, SIP revision.[7]

Regarding the condensable provision, in light of Tennessee request in its May 1, 2012, letter and EPA's intention to amend the definition of ''regulated NSR pollutant'' as discussed in the correction rulemaking,[8] EPA is not taking action to approve the terminology ''particulate matter emissions'' into the Tennessee SIP (at 1200–03–09–.01(4)(b)47(vi)) for the condensable provision in the definition of ''regulated NSR pollutant.'' EPA is, however, taking final action to approve into the Tennessee SIP at 1200–03–09–.01(4)(b)47(vi) the remaining condensable requirement at 40 CFR 51.166(b)(49)(vi), which requires that condensable emissions be accounted for in applicability determinations and in establishing emissions limitations for $PM_{2.5}$ and PM_{10}.

TDEC's July 29, 2011, SIP revision also makes an administrative change to Chapter 1200–03–09 for PSD and NNSR including removing the sentence ''For example, if a project involves both an existing emissions unit and a Clean Unit, the projected increase is determined by summing the values determined using the method specified in paragraph (a)(7)(iv)(c) of this section for the existing unit and determined using the method specified in paragraph (a)(7)(iv)(e) of this section for the Clean Unit.'' from the State's hybrid test applicability provision at 1200–03–09–.01(4)(c)4(vi) and 1200–03–09–.01(5)(b)2(xvii). Tennessee proposed this change to be consistent with federal language amended in the June 13, 2007, final rulemaking regarding the vacated portions of the 2002 NSR Reform Rule.[9] *See* 72 FR 32526. This final action approves the aforementioned SIP amendments into Tennessee's SIP to provide for the implementation of $PM_{2.5}$ NAAQS in the State's NSR permitting program.

[6] Alternatively, the preamble indicated that states may adopt their own ratios, subject to EPA's approval, that would have to be substantiated by modeling or other technical demonstrations of the net air quality benefit for ambient $PM_{2.5}$ concentrations.

[7] If a major stationary source or source with a major modification in Tennessee requests to obtain offsets through interpollutant trading, the State of Tennessee would first be required, consistent with the requirements of section 51.165(a)(11), to revise its SIP to adopt appropriate trading ratios. Tennessee would need to submit to EPA a technical demonstration showing how either the preferred ratios established in the NSR $PM_{2.5}$ Rule or the State's own ratios are appropriate for the State's particular $PM_{2.5}$ nonattainment as well as a revision to the NSR program adopting the ratios into the SIP. EPA would then have to approve the demonstration and ratios into the Tennessee SIP prior to any major stationary source or major modification obtaining offsets through the interpollutant trading policy.

[8] On March 16, 2012, EPA proposed to correct the inadvertent inclusion of ''particulate matter emissions'' in the definition of ''regulated NSR pollutant'' as an indicator for which condensable emissions must be addressed. *See* 77 FR 75656. The comment period for this proposed rulemaking ended May 15, 2012.

[9] On June 13, 2007, EPA took final action to revise the 2002 NSR Reform Rules to remove from federal law all provisions pertaining to clean units and the pollution control projects exemption that were vacated by the United States Court of Appeals for the District of Columbia Rule. *New York* v. *United States, 413 F.3d 3 (D.C. Cir. 2005*). *See* 72 FR 32526. EPA's efforts to remove the vacated provisions included removing the language from the hybrid test applicability provision at 40 CFR 51.166(a)(7)(iv)(f), 51.165(f)(6) and 52.21(a)(2)(iv)(f).

III. Final Action

Pursuant to section 110 of the CAA, EPA is taking final action to approve Tennessee's July 29, 2011, SIP revisions adopting federal regulations amended in the NSR $PM_{2.5}$ Rule to implement the $PM_{2.5}$ NAAQS for the NSR program. EPA is also taking final action to approve corrective and clarifying administrative changes to Tennessee's regulations because they are consistent with section 110 of the CAA and its implementing regulations.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 28, 2012. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Particulate matter, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: July 16, 2012.

A. Stanley Meiburg,

Acting Regional Administrator, Region 4.

Therefore, 40 CFR part 52 is amended as follows:

PART 52—[AMENDED]

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42.U.S.C. 7401 *et seq.*

■ 2. Section 52.2220(c) is amended under Chapter 1200–3–9 by revising the entry for ''Section 1200–3–9–.01'' to read as follows:

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2011–0809; FRL–9705–2]

Approval and Promulgation of Implementation Plans; Florida; Sections 128 and 110(a)(1) and (2) Infrastructure Requirements for the 1997 8-Hour Ozone National Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to approve in part, and disapprove in part, the State Implementation Plan (SIP) submissions, submitted by the State of Florida, through the Florida Department of Environmental Protection (FDEP) on December 13, 2007, and supplemented on April 18, 2008 and May 24, 2012, to demonstrate that the State meets the requirements of sections 110(a)(1) and (2) of the Clean Air Act (CAA or Act) for the 1997 8-hour ozone national ambient air quality standards (NAAQS). Section 110(a) of the CAA requires that each state adopt and submit a SIP for the implementation, maintenance, and enforcement of each NAAQS promulgated by EPA, which is commonly referred to as an ''infrastructure'' SIP. FDEP certified that the Florida SIP contains provisions that ensure the 1997 8-hour ozone NAAQS are implemented, enforced, and maintained in Florida (hereafter referred to as ''infrastructure submission''). EPA is now taking three related actions on FDEP's infrastructure submissions for Florida. First, EPA is taking final action to disapprove in part portions of sections 110(a)(2)(C) and 110(a)(2)(J) of the December 13, 2007, submittal as it relates to the regulation of greenhouse gas (GHG) emissions. Second, EPA is taking final action to approve FDEP's May 24, 2012, submission, which addresses the substantive requirements of section 128 relating to State board requirements as applicable to the infrastructure SIP pursuant to section 110(a)(2)(E)(ii), and the substantive requirements of section 110(a)(2)(G), which relates to the authority to implement emergency powers under section 303 of the CAA. Third, and with the exception of the aforementioned portions of sections 110(a)(2)(C) and (J), EPA is finalizing its determination that Florida's infrastructure submission, provided to EPA on December 13, 2007, supplemented on April 18, 2008, addresses all other required infrastructure elements for the 1997 8-hour ozone NAAQS.

DATES: *Effective Date:* This rule will be effective August 29, 2012.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2011–0809. All documents in the docket are listed on the *www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, i.e., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 to 4:30 excluding federal holidays.

FOR FURTHER INFORMATION CONTACT: Nacosta C. Ward, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. The telephone number is (404) 562–9140. Ms. Ward can be reached via electronic mail at *ward.nacosta@epa.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Background
II. This Action
III. Final Action
IV. Statutory and Executive Order Reviews

I. Background

Upon promulgation of a new or revised NAAQS, sections 110(a)(1) and (2) of the CAA require states to address basic SIP requirements, including emissions inventories, monitoring, and modeling to assure attainment and maintenance for that new NAAQS.

Section 110(a) of the CAA requires states to submit SIPs to provide for the implementation, maintenance, and enforcement of a new or revised NAAQS within three years following the promulgation of such NAAQS, or within such shorter period as EPA may prescribe. Section 110(a) imposes the obligation upon states to make a SIP submission to EPA for a new or revised NAAQS, but the contents of that submission may vary depending upon the facts and circumstances. In particular, the data and analytical tools available at the time the state develops and submits the SIP for a new or revised NAAQS affects the content of the submission. The contents of such SIP submissions may also vary depending upon what provisions the state's existing SIP already contains. In the case of the 1997 8-hour ozone NAAQS, states typically have met the basic program elements required in section 110(a)(2) through earlier SIP submissions in connection with previous ozone NAAQS.

More specifically, section 110(a)(1) provides the procedural and timing requirements for SIPs. Section 110(a)(2) lists specific elements that states must meet for ''infrastructure'' SIP requirements related to a newly established or revised NAAQS. As already mentioned, these requirements include SIP infrastructure elements such as modeling, monitoring, and emissions inventories that are designed to assure attainment and maintenance of the NAAQS. The requirements that are the subject of this final rulemaking are listed below [1] and in EPA's October 2,

[1] Two elements identified in section 110(a)(2) are not governed by the three year submission deadline

Continued

2007, memorandum entitled ''Guidance on SIP Elements Required Under Section 110(a)(1) and (2) for the 1997 8-Hour Ozone and $PM_{2.5}$ National Ambient Air Quality Standards.''

- 110(a)(2)(A): Emission limits and other control measures.
- 110(a)(2)(B): Ambient air quality monitoring/data system.
- 110(a)(2)(C): Program for enforcement of control measures.[2]
- 110(a)(2)(D): Interstate transport.[3]
- 110(a)(2)(E): Adequate resources.
- 110(a)(2)(F): Stationary source monitoring system.
- 110(a)(2)(G): Emergency power.
- 110(a)(2)(H): Future SIP revisions.
- 110(a)(2)(I): Areas designated nonattainment and meet the applicable requirements of part D.[4]
- 110(a)(2)(J): Consultation with government officials; public notification; and Prevention of Significant Deterioration (PSD) and visibility protection.
- 110(a)(2)(K): Air quality modeling/data.
- 110(a)(2)(L): Permitting fees.
- 110(a)(2)(M): Consultation/participation by affected local entities.

On July 18, 1997, EPA promulgated a new NAAQS for ozone based on 8-hour average concentrations, thus states were required to provide submissions to address sections 110(a)(1) and (2) of the CAA for this new NAAQS. Florida provided its infrastructure submission for the 1997 8-hour ozone NAAQS on December 13, 2007. On March 27, 2008, Florida was among other states that received a finding of failure to submit because its infrastructure submission was deemed incomplete for element 110(a)(2)(G) for the 1997 8-hour ozone NAAQS by March 1, 2008. *See* 73 FR 16205. Section 110(a)(2)(G) relates to the requirement for states to provide ''emergency power'' authority comparable to that in section 303 of the CAA and adequate contingency plans to implement such authority.

In FDEP's December 13, 2007, submission, and in a letter dated April 18, 2008, FDEP cited State statutes as evidence that Florida has the authority to implement emergency powers for the 1997 8-hour ozone NAAQS as required by section 110(a)(2)(G). EPA, however, proposed a Federal Implementation Plan (FIP) with respect to this element of the infrastructure SIP because the statutes cited by FDEP had not been approved into the Florida SIP. *See* 77 FR 23181 (April 18, 2012).[5] On April 19, 2012, FDEP submitted, for parallel processing, draft changes to address the deficiencies of the Florida SIP regarding the substantive requirements of section 110(a)(2)(G). EPA published a supplemental proposed rulemaking action on this draft revision on May 18, 2012, to (1) incorporate provisions to address Florida's authority for emergency powers and adequate contingency plans to implement such authority; and (2) propose approval for element 110(a)(2)(G) of Florida's infrastructure SIP. *See* 77 FR 29581. On May 24, 2012, FDEP submitted a final submission to EPA to satisfy to CAA section 110(a)(2)(G). Therefore, in today's rulemaking, EPA will not finalize the FIP for section 110(a)(2)(G) as it is no longer necessary and is instead finalizing full approval of this substantive SIP revision to address the section 110(a)(2)(G) requirements. As a result of this substantive revision to the SIP, EPA is also finalizing its approval of section 110(a)(2)(G) of Florida's infrastructure SIP among the other infrastructure elements approved today.

With respect to section 110(a)(2)(E)(ii), EPA's April 18, 2012, proposed rulemaking described EPA's intention to conditionally approve FDEP's December 13, 2007, infrastructure submission regarding this sub-element. EPA proposed conditional approval of this sub-element because the State's implementation plan did not contain provisions to address the requirements of CAA section 128. However, on March 13, 2012, FDEP submitted a letter to EPA that included a commitment to submit a SIP revision to address the CAA section 128 requirements. *See* 77 FR 23181. The letter Florida submitted to EPA can be accessed at *www.regulations.gov* using Docket ID No. EPA–R04–OAR–2011–0809. On April 19, 2012, FDEP submitted, for parallel processing, a draft SIP revision to fully address the deficiencies within the Florida SIP to address CAA section 128 requirements. EPA proposed action on this draft revision on May 18, 2012, which included both a proposed substantive revision to the Florida SIP to incorporate rules satisfying section 128 of the CAA, and a proposed approval for sub-element 110(a)(2)(E)(ii) of Florida's infrastructure SIP. *See* 77 FR 29581. On May 24, 2012, FDEP submitted a final submission to EPA to satisfy the requirements of CAA section 128.

With respect to sections 110(a)(2)(C) and (J), EPA has issued two regulatory revisions—the 1997 8-Hour Ozone NAAQS Implementation Rule New Source Review (NSR) Update—Phase 2 final rule (hereafter referred to as the ''Ozone Implementation NSR Update'' or ''Phase 2 Rule'') (70 FR 71612 (November 29, 2005)); and the Greenhouse Gas Tailoring Rule (hereafter referred to as the ''GHG Tailoring Rule'') (75 FR 31514 (EPA's June 3, 2010))—that necessitated updates to Florida's SIP in order for EPA to approve these infrastructure elements for purposes of the 1997 8-hour Ozone NAAQS.[6]

Regarding the Phase 2 Rule, on October 19, 2007, and July 1, 2011, FDEP submitted revisions to EPA, for approval into the Florida SIP, to adopt federal requirements for NSR permitting

---

of section 110(a)(1) because SIPs incorporating necessary local nonattainment area controls are not due within three years after promulgation of a new or revised NAAQS, but rather are due at the time the nonattainment area plan requirements are due pursuant to section 172. These requirements are: (1) Submissions required by section 110(a)(2)(C) to the extent that subsection refers to a permit program as required in part D Title I of the CAA, and (2) submissions required by section 110(a)(2)(I) which pertain to the nonattainment planning requirements of part D, Title I of the CAA. Today's final rulemaking does not address infrastructure elements related to section 110(a)(2)(I) or (C). In a March 14, 2012, final rulemaking, EPA addressed the section 110(a)(2)(C) requirements for Tennessee. *See* 77 FR 14976.

[2] This rulemaking only addresses requirements for this element as they relate to attainment areas.

[3] Today's final rule does not address element 110(a)(2)(D)(i) (Interstate Transport) for the 1997 8-hour ozone NAAQS. Interstate transport requirements were formerly addressed by Florida consistent with the Clean Air Interstate Rule (CAIR). On December 23, 2008, CAIR was remanded by the D.C. Circuit Court of Appeals, without vacatur, back to EPA. *See North Carolina* v. *EPA,* 531 F.3d 896 (D.C. Cir. 2008). Prior to this remand, EPA took final action to approve Florida's SIP revision, which was submitted to comply with CAIR. *See* 72 FR 58016 (October 12, 2007). In so doing, Florida's CAIR SIP revision addressed the interstate transport provisions in section 110(a)(2)(D)(i) for the 1997 8-hour ozone NAAQS. In response to the remand of CAIR, EPA has recently finalized a new rule to address the interstate transport of nitrogen oxides (NOx) and sulfur oxides (SOx) in the eastern United States. *See* 76 FR 48208 (August 8, 2011) Transport Rule). EPA's action on element 110(a)(2)(D)(i) will be addressed in a separate action.

[4] This requirement was inadvertently omitted from EPA's October 2, 2007, memorandum entitled ''Guidance on SIP Elements Required Under Section 110(a)(1) and (2) for the 1997 8-Hour Ozone and $PM_{2.5}$ National Ambient Air Quality Standards,'' but as mentioned above is not relevant to today's rulemaking.

[5] On March 23, 2012, FDEP sent a letter to EPA requesting conditional approval of section 110(a)(2)(G). In this letter, Florida committed to submit a SIP revision to address the substantive requirements of section 110(a)(2)(G) by June 2012. The letter Florida submitted to EPA can be accessed at *www.regulations.gov* using Docket ID No. EPA–R04–OAR–2011–0809. EPA notes that a conditional approval cannot satisfy an obligation for the Agency to implement a FIP.

[6] Florida's authority to regulate new and modified sources of the ozone precursors, volatile organic compounds (VOCs) and nitrogen oxides (NO_X), to assist in the protection of air quality in nonattainment, attainment or unclassifiable areas is established in Chapters 62–210, *Stationary Sources—General Requirements, Section 200—Definitions,* and 62–212, *Stationary Sources—Preconstruction Review, Section 400—Prevention of Significant Deterioration* of the Florida SIP.

promulgated in the Phase 2 Rule. These revisions also modified provisions of Florida's SIP at Chapter 62–210 and 62–212 to recognize NO_X as an ozone precursor. EPA finalized approval of these revisions into the SIP on June 15, 2012. *See* 77 FR 35862.

Regarding the GHG Tailoring Rule, EPA has identified errors in Florida's federally-approved SIP that result in the State's failure to address, or provide adequate legal authority for, the implementation of a GHG PSD program in Florida. Approval of a revision to address GHGs is required to meet sections 110(a)(2)(C) and 110(a)(2)(J). On December 30, 2010, EPA promulgated a FIP [7] because Florida failed to submit, by its December 22, 2010, deadline, the corrective SIP revision to apply its PSD program to sources of GHGs consistent with the thresholds described in the GHG Tailoring rule. Since Florida currently does not have adequate legal authority to address the new GHG PSD permitting requirements at or above the levels of emissions set in the GHG Tailoring Rule, or at other appropriate levels, its SIP does not satisfy portions of section 110(a)(2)(C) and section 110(a)(2)(J) of the infrastructure SIP requirements. As a result, on April 18, 2012, EPA proposed to disapprove FDEP's submission for sections 110(a)(2)(C) and 110(a)(2)(J) as they relate to GHG PSD permitting requirements. *See* 77 FR 23181.

II. This Action

EPA is taking final action to approve in part, and disapprove in part, Florida's infrastructure submissions as demonstrating that the State meets the applicable requirements of sections 110(a)(1) and (2) of the CAA for the 1997 8-hour ozone NAAQS. Section 110(a) of the CAA requires that each state adopt and submit a SIP for the implementation, maintenance, and enforcement of each NAAQS promulgated by the EPA, which is commonly referred to as an ''infrastructure'' SIP. Florida, through FDEP, certified that the Florida SIP contains provisions that ensure the 1997 8-hour ozone NAAQS is implemented, enforced, and maintained in Florida. EPA received no adverse comments on its April 18, 2012, and May 18, 2012, proposed rulemakings of Florida's December 13, 2007, infrastructure submission and April 19, 2012, draft SIP revision regarding the substantive requirements of CAA sections 128 and 110(a)(2)(G).

Today's disapprovals of Florida's infrastructure submissions are limited to the portions of section 110(a)(2)(C) and section110(a)(2)(J) related to GHG PSD permitting as proposed on April 18, 2012. *See* 77 FR 23181. EPA's disapproval of this portion of these elements does not result in any further obligation on the part of Florida because EPA has already promulgated a FIP for the Florida PSD program to address permitting GHGs at or above the GHG Tailoring Rule thresholds (76 FR 25178). Thus, today's final action to disapprove FDEP's submission for elements related to the GHG PSD permitting portion of sections 110(a)(2)(C) and 110(a)(2)(J) will not require any further action by either FDEP or EPA. The FIP that is currently in place to address GHG requirements in Florida will remain unless and until Florida submits a final submission to EPA for federal approval and EPA takes final action on that submission.

In addition to the above-described infrastructure submission final actions, EPA is also today finalizing two substantive SIP actions related to infrastructure elements 110(a)(2)(E)(ii) and (G) proposed in EPA's May 18, 2012, supplemental proposed rule. *See* 77 FR 29581. EPA is also announcing that it does not intend to finalize the proposed FIP for section 110(a)(2)(G) as it is no longer necessary due to the substantive SIP revisions for this element finalized today. The substantive revisions were submitted by Florida to EPA on May 24, 2012. *See* 77 FR 29581.

Based upon the aforementioned, EPA has determined that Florida's infrastructure submission, provided to EPA on December 13, 2007, and supplemented on April 18, 2008, addresses all the required infrastructure elements for the 1997 8-hour ozone NAAQS, with the exception of CAA section 110(a)(2)(E)(ii), pertaining to CAA section 128 requirements and section 110(a)(2)(G). Florida's May 24, 2012, submission addresses the substantive requirements of CAA sections 128, 110(a)(2)(E)(ii), and 110(a)(2)(G). EPA has determined that the remaining infrastructure elements addressed in Florida's December 13, 2007, submission, supplemented on April 18, 2008, and May 24, 2012, with the exception of the portions of sections 110(a)(2)(C) and (J) related to GHG PSD permitting, are consistent with section 110 of the CAA.

III. Final Action

EPA is taking final action to approve in part, and disapprove in part, the December 13, 2007, submission, supplemented on April 18, 2008, and the May 24, 2012, submission, for the 1997 8-hour ozone NAAQS because these submissions are consistent with section 110 of the CAA. FDEP has addressed the elements of the CAA 110(a)(1) and (2) SIP requirements pursuant to EPA's October 2, 2007, guidance to ensure that the 1997 8-hour ozone NAAQS are implemented, enforced, and maintained in Florida. EPA is also taking final action to approve a substantive SIP revision submitted by Florida on May 24, 2012, to address requirements related to sections 128, 110(a)(2)(E)(ii) and (G) of the CAA because these revisions are consistent with the Act.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement

[7] Action to Ensure Authority to Issue Permits under the Prevention of Significant Deterioration Program to Sources of Greenhouse Gas Emissions: Federal Implementation Plan—Final Rule, 75 FR 82246 (December 30, 2010).

Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and

• Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 28, 2012. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: July 16, 2012.

A. Stanley Meiburg,

Acting Regional Administrator, Region 4.

Therefore, 40 CFR part 52 is amended as follows:

PART 52—[AMENDED]

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

■ 2. Section 52.520 in paragraph (e) is amended by adding three new entries for ''110(a)(1) and (2) Infrastructure Requirements for the 1997 8-Hour Ozone National Ambient Air Quality Standards,'' ''Section 128 Requirements,'' and ''Sections 110(a)(2)(E)(ii) and (G) Infrastructure Requirements for the 1997 8-Hour Ozone National Ambient Air Quality Standards'' at the end of the table to read as follows:

§ 52.520 Identification of plan.

* * * * *

(e) * * *

EPA-APPROVED FLORIDA NON-REGULATORY PROVISIONS

Provision	State effective date	EPA approval date	**Federal Register** notice	Explanation
* * *	*	* *		*
110(a)(1) and (2) Infrastructure Requirements for the 1997 8-Hour Ozone National Ambient Air Quality Standards.	12/13/2007	7/30/2012	[Insert citation of publication].	
Section 128 Requirements	5/24/2012	7/30/2012	[Insert citation of publication].	
Sections 110(a)(2)(E)(ii) and (G) Infrastructure Requirements for the 1997 8-Hour Ozone National Ambient Air Quality Standards.	5/24/2012	7/30/2012	[Insert citation of publication].	

■ 3. Section 52.523 is added to read as follows:

§ 52.523 Control strategy: Ozone

(a) Disapproval. EPA is disapproving portions of Florida's infrastructure SIP for the 1997 8-hour ozone NAAQS regarding the State's ability to provide adequate legal authority for the implementation of a Greenhouse Gas Prevention of Significant Deterioration program, specifically with respect to sections 110(a)(2)(C) and 110(a)(2)(J). A FIP is currently in place and approved for Florida at 40 CFR 52.37 for these requirements.

Method 16C for the Determination of Total Reduced Sulfur Emissions From Stationary Sources

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This action promulgates Method 16C for measuring total reduced sulfur (TRS) emissions from stationary sources. Method 16C offers the advantages of real-time data collection and uses procedures that are already in use for measuring other pollutants. Method 16C will be a testing option that is used at the discretion of the tester.

DATES: This final rule is effective on July 30, 2012.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–HQ–OAR–2010–0115. All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, e.g., confidential business information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are

available either electronically at *www.regulations.gov* or in hard copy at the Air Docket, EPA/DC, EPA West, Room 3334, 1301 Constitution Avenue NW., Washington, DC. The Docket Facility and the Public Reading Room are open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the Air Docket is (202) 566–1742.

FOR FURTHER INFORMATION CONTACT: Mr. Foston Curtis, Office of Air Quality Planning and Standards, Air Quality Assessment Division, Measurement Technology Group (E143–02), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–1063; fax number: (919) 541–0516; email address: *curtis.foston@epa.gov.*

I. General Information

A. Does this action apply to me?

Method 16C applies to TRS measurement from kraft pulp mills subject to Subpart BB of the New Source Performance Standards (NSPS). The methods required under Subpart BB for TRS are sometimes used under the petroleum refineries NSPS (Subpart J). Method 16C may also be applicable to sources regulated by state and local regulations that adopt the Subpart BB testing requirements.

Regulated Entities. Categories and entities potentially affected include the following:

Category	NAICS [a]	Examples of regulated entities
Industry	322110	Kraft Pulp Mills.
Industry	324110	Petroleum Refineries.

[a] North American Industry Classification System.

This table is not intended to be exhaustive, but rather to provide a guide for readers regarding entities likely to be affected by this action. This table lists examples of the types of entities the EPA is now aware could potentially be affected by this final action. Other types of entities not listed could also be affected. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

B. Where can I obtain a copy of this action?

In addition to being available in the docket, an electronic copy of this rule will also be available on the Worldwide Web (www) through the Technology Transfer Network (TTN). Following the Administrator's signature, a copy of the final rule will be placed on the TTN's policy and guidance page for newly proposed or promulgated rules at *http://www.epa.gov/ttn/oarpg.* The TTN provides information and technology exchange in various areas of air pollution control.

C. Judicial Review

Under section 307(b)(1) of the Clean Air Act (CAA), judicial review of this final rule is available by filing a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit by September 28, 2012. Under section 307(d)(7)(B) of the CAA, only an objection to this final rule that was raised with reasonable specificity during the period for public comment can be raised during judicial review. Moreover, under section 307(b)(2) of the CAA, the requirements established by this action may not be challenged separately in any civil or criminal proceedings brought by EPA to enforce these requirements.

II. Background

Method 16C was proposed in the **Federal Register** on September 2, 2010, with a public comment period that ended November 1, 2010. Two comment letters were received from the public.

III. Summary of Method 16C

Method 16C uses the sampling procedures of Method 16A and the analytical procedures of Method 6C to measure TRS. Total reduced sulfur is defined as hydrogen sulfide, methyl mercaptan, dimethyl sulfide, and dimethyl disulfide. As in Method 16A, the sample is collected from the source through a heated probe and immediately conditioned in a citrate buffer scrubber. The conditioned sample is oxidized in a tube furnace to convert TRS to sulfur dioxide (SO_2). The oxidized sample is then analyzed for SO_2 using a real-time SO_2 analyzer as in Method 6C.

This method may be used as an alternative to Methods 16, 16A, and 16B for determining TRS. Its use has been allowed on a case-by-case basis and, based on our experience, it is a good alternative. Method 16C offers advantages over currently required methods by supplying real-time data in the field using analyzers and procedures that are currently used for other pollutants. Performance checks contained in the method ensure that bias and calibration precision are periodically checked and maintained.

This rule will not require the use of Method 16C but will allow it as an alternative method at the discretion of the user. This method does not impact testing stringency; data are collected under the same conditions and time intervals as the current methods.

IV. Public Comments on Proposed Method 16C

Two public comment letters were received on the proposed rule. The comments pointed out contradictions in different sections of the method for the analyzer calibration error test and the system bias check. In one instance, the analyzer calibration acceptance criterion was listed as 5 percent and in another place it was listed as 2 percent. The rule was corrected to state that 5 percent is the correct criterion for this test. For the system bias check, unclear language was amended to specifically state that the pre-test bias check is mandatory, not optional. An additional comment led to the dropping of the sample correction for moisture since it is not needed for most analyzers. The public comments are addressed in the Summary of Comments and Responses Document that has been added to the docket.

V. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a ''significant regulatory action'' under the terms of Executive Order 12866 (58 FR 51735, October 4, 1993) and is, therefore, not subject to review under Executive Orders 12866 and 13563 (76 FR 3821, January 21, 2011).

B. Paperwork Reduction Act

This action does not impose an information collection burden under the provisions of the *Paperwork Reduction Act,* 44 U.S.C. 3501 *et seq.* Burden is defined at 5 CFR 1320.3(b). This final rule does not add information collection requirements beyond those currently required under the applicable regulations. This final rule adds an alternative test method that may be used at the discretion of the source.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

For purposes of assessing the impacts of this rule on small entities, small entity is defined as: (1) A small business as defined by the Small Business Administration's (SBA) regulations at 13 CFR 121.201; (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of this final rule on small entities, I certify that this action will not have a significant economic impact on a substantial number of small entities. This final rule will not impose any requirements on small entities because Method 16C is not a required test method but may be used at the discretion of the source. Any small entity choosing to use Method 16C would likely do so because it is less burdensome or more advantageous than the other methods allowed.

D. Unfunded Mandates Reform Act

This action contains no federal mandates under the provisions of Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1531–1538 for State, local, or tribal governments or the private sector. This action imposes no enforceable duty on any State, local or tribal governments or the private sector. Therefore, this action is not subject to the requirements of sections 202 or 205 of the UMRA. This action is also not subject to the requirements of section 203 of UMRA because it contains no regulatory requirements that might significantly or uniquely affect small governments. Any small entity choosing to use Method 16C would likely do so because it is less burdensome or more advantageous than the other methods allowed.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. This final rule adds Method 16C for use as a new alternative method. Thus, Executive Order 13132 does not apply to this action.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175 (65 FR 67249, November 9, 2000). This final rule provides an additional testing option for measuring pollutants to what is currently mandated. It does not add any new requirements and does not affect pollutant emissions or air quality. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets EO 13045 (62 FR 19885, April 23, 1997) as applying only to those regulatory actions that concern health or safety risks, such that the analysis required under section 5–501 of the EO has the potential to influence the regulation. This action is not subject to EO 13045 because it does not establish an environmental standard intended to mitigate health or safety risks.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This rule is not subject to Executive Order 13211 (66 FR 28355 (May 22, 2001)), because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (''NTTAA''), Public Law 104–113, 12(d)(15 U.S.C. 272 note) directs the EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs the EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This action does not involve technical standards. Therefore, the EPA did not consider the use of any voluntary consensus standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order (EO) 12898 (59 FR 7629 (Feb. 16, 1994)) establishes federal executive policy on environmental justice. Its main provision directs federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

The EPA has determined that this final rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it does not affect the level of protection provided to human health or the environment. This final rule does not relax the control measures on sources regulated by the rule and, therefore, will not cause emissions increases from these sources.

K. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2). This rule will be effective on July 30, 2012.

List of Subjects in 40 CFR Part 60

Administrative practice and procedures, Air pollution control, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: July 23, 2012.

Lisa P. Jackson,

Administrator.

For the reasons set out in the preamble, Title 40, Chapter I of the Code of Federal Regulations is amended as follows:

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

■ 1. The authority citation for part 60 continues to read as follows:

Authority: 42 U.S.C. 7401–7601.

■ 2. Amend Appendix A–6 to Part 60 by adding ''Method 16C'' in alphanumeric order to read as follows:

Appendix A–6 to Part 60—Test Methods 16 Through 18

* * * * *

Method 16C—Determination of Total Reduced Sulfur Emissions From Stationary Sources

1.0 Scope and Application

What is Method 16C?

Method 16C is a procedure for measuring total reduced sulfur (TRS) in stationary source emissions using a continuous instrumental analyzer. Quality assurance and quality control requirements are included to assure that you, the tester, collect data of known quality. You must document your adherence to these specific requirements for equipment, supplies, sample collection and analysis, calculations, and data analysis. This method does not completely describe all equipment, supplies, and sampling and analytical procedures you will need but refers to other methods for some of the details. Therefore, to obtain reliable results, you should also have a thorough knowledge of these additional test methods which are found in appendix A to this part:

(a) Method 6C—Determination of Sulfur Dioxide Emissions from Stationary Sources (Instrumental Analyzer Procedure)

(b) Method 7E—Determination of Nitrogen Oxides Emissions from Stationary Sources (Instrumental Analyzer Procedure)

(c) Method 16A—Determination of Total Reduced Sulfur Emissions from Stationary Sources (Impinger Technique)

1.1 Analytes. What does Method 16C determine?

Analyte	CAS No.
Total reduced sulfur including:	N/A
Dimethyl disulfide (DMDS), [$(CH_3)_2S_2$]	62–49–20
Dimethyl sulfide (DMS), [$(CH_3)_2S$]	75–18–3
Hydrogen sulfide (H_2S)	7783–06–4
Methyl mercaptan (MeSH), (CH_4S)	74–93–1
Reported as: Sulfur dioxide (SO_2)	7449–09–5

1.2 Applicability. This method is applicable for determining TRS emissions from recovery furnaces (boilers), lime kilns, and smelt dissolving tanks at kraft pulp mills, and from other sources when specified in an applicable subpart of the regulations.

1.3 Data Quality Objectives. Adherence to the requirements described in Method 16C will enhance the quality of the data obtained.

2.0 Summary of Method

2.1 An integrated gas sample is extracted from the stack. The SO_2 is removed selectively from the sample using a citrate buffer solution. The TRS compounds are then thermally oxidized to SO_2 and determined as SO_2 by an instrumental analyzer. This method is a combination of the sampling procedures of Method 16A and the analytical procedures of Method 6C (referenced in Method 7E), with minor modifications to facilitate their use together.

3.0 Definitions

Analyzer calibration error, Calibration curve, Calibration gas, Low-level gas, Mid-level gas, High-level gas, Calibration drift, Calibration span, Data recorder, Direct calibration mode, Gas analyzer, Interference check, Measurement system, Response time, Run, System calibration mode, System performance check, and *Test* are the same as used in Methods 16A and 6C.

4.0 Interferences

4.1 Reduced sulfur compounds other than those defined as TRS, if present, may be measured by this method. Compounds like carbonyl sulfide, which is partially oxidized to SO_2 and may be present in a lime kiln exit stack, would be a positive interferent. Interferences may vary among instruments, and instrument-specific interferences must be evaluated through the interference check.

4.2 Particulate matter from the lime kiln stack gas (primarily calcium carbonate) can cause a negative bias if it is allowed to enter the citrate scrubber; the particulate matter will cause the pH to rise and H_2S to be absorbed before oxidation. Proper use of the particulate filter, described in Section 6.1.3 of Method 16A, will eliminate this interference.

5.0 Safety

5.1 Disclaimer. This method may involve hazardous materials, operations, and equipment. This test method may not address all of the safety problems associated with its use. It is the responsibility of the user to establish appropriate safety and health practices before performing this test method.

5.2 Hydrogen Sulfide. Hydrogen sulfide is a flammable, poisonous gas with the odor of rotten eggs. Hydrogen sulfide is extremely hazardous and can cause collapse, coma, and death within a few seconds of one or two inhalations at sufficient concentrations. Low concentrations irritate the mucous membranes and may cause nausea, dizziness, and headache after exposure. It is the responsibility of the user of this test method to establish appropriate safety and health practices.

6.0 Equipment and Supplies

What do I need for the measurement system?

The measurement system is similar to those applicable components in Methods 16A and 6C. Modifications to the apparatus are accepted provided the performance criteria in Section 13.0 are met.

6.1 Probe. Teflon tubing, 6.4-mm (¼ in.) diameter, sequentially wrapped with heat-resistant fiber strips, a rubberized heat tape (plug at one end), and heat-resistant adhesive tape. A flexible thermocouple or other suitable temperature measuring device must be placed between the Teflon tubing and the fiber strips so that the temperature can be monitored to prevent softening of the probe. The probe must be sheathed in stainless steel to provide in-stack rigidity. A series of bored-out stainless steel fittings placed at the front of the sheath will prevent moisture and particulate from entering between the probe and sheath. A 6.4-mm (¼ in.) Teflon elbow (bored out) must be attached to the inlet of the probe, and a 2.54 cm (1 in.) piece of Teflon tubing must be attached at the open end of the elbow to permit the opening of the probe to be turned away from the particulate stream; this will reduce the amount of particulate drawn into the sampling train. The probe is depicted in Figure 16A–2 of Method 16A.

6.2 Probe Brush. Nylon bristle brush with handle inserted into a 3.2-mm (⅛ in.) Teflon tubing. The Teflon tubing should be long enough to pass the brush through the length of the probe.

6.3 Particulate Filter. 50-mm Teflon filter holder and a 1- to 2-μm porosity, Teflon filter (may be available through Savillex Corporation, 5325 Highway 101, Minnetonka, Minnesota 55343, or other suppliers of filters). The filter holder must be maintained in a hot box at a temperature sufficient to prevent moisture condensation. A temperature of 121 °C (250 °F) was found to

be sufficient when testing a lime kiln under sub-freezing ambient conditions.

6.4 SO_2 Scrubber. Three 300-ml Teflon segmented impingers connected in series with flexible, thick-walled, Teflon tubing. (Impinger parts and tubing may be available through Savillex or other suppliers.) The first two impingers contain 100 ml of citrate buffer, and the third impinger is initially dry. The tip of the tube inserted into the solution should be constricted to less than 3 mm (⅛ in.) ID and should be immersed to a depth of at least 5 cm (2 in.).

6.5 Combustion Tube. Quartz glass tubing with an expanded combustion chamber 2.54 cm (1 in.) in diameter and at least 30.5 cm (12 in.) long. The tube ends should have an outside diameter of 0.6 cm (¼ in.) and be at least 15.3 cm (6 in.) long. This length is necessary to maintain the quartz-glass connector near ambient temperature and thereby avoid leaks. Alternative combustion tubes are acceptable provided they are shown to combust TRS at concentrations encountered during tests.

6.6 Furnace. A furnace of sufficient size to enclose the combustion chamber of the combustion tube with a temperature regulator capable of maintaining the temperature at 800 ± 100 °C (1472 ± 180 °F). The furnace operating temperature should be checked with a thermocouple to ensure accuracy.

6.7 Sampling Pump. A leak-free pump is required to pull the sample gas through the system at a flow rate sufficient to minimize the response time of the measurement system and must be constructed of material that is non-reactive to the gas it contacts. For dilution-type measurement systems, an eductor pump may be used to create a vacuum that draws the sample through a critical orifice at a constant rate.

6.8 Calibration Gas Manifold. The calibration gas manifold must allow the introduction of calibration gases either directly to the gas analyzer in direct calibration mode or into the measurement system, at the probe, in system calibration mode, or both, depending upon the type of system used. In system calibration mode, the system must be able to flood the sampling probe and vent excess gas. Alternatively, calibration gases may be introduced at the calibration valve following the probe. Maintain a constant pressure in the gas manifold. For in-stack dilution-type systems, a gas dilution subsystem is required to transport large volumes of purified air to the sample probe, and a probe controller is needed to maintain the proper dilution ratio.

6.9 Sample Gas Manifold. The sample gas manifold diverts a portion of the sample to the analyzer, delivering the remainder to the by-pass discharge vent. The manifold should also be able to introduce calibration gases directly to the analyzer. The manifold must be made of material that is non-reactive to SO_2 and be configured to safely discharge the bypass gas.

6.10 SO_2 Analyzer. You must use an instrument that uses an ultraviolet, non-dispersive infrared, fluorescence, or other detection principle to continuously measure SO_2 in the gas stream provided it meets the performance specifications in Section 13.0.

6.11 Data Recording. A strip chart recorder, computerized data acquisition system, digital recorder, or data logger for recording measurement data must be used.

7.0 Reagents and Standards

Note: Unless otherwise indicated, all reagents must conform to the specifications established by the Committee on Analytical Reagents of the American Chemical Society. When such specifications are not available, the best available grade must be used.

7.1 Water. Deionized distilled water must conform to ASTM Specification D 1193–77 or 91 Type 3 (incorporated by reference—see § 60.17). The $KMnO_4$ test for oxidizable organic matter may be omitted when high concentrations of organic matter are not expected to be present.

7.2 Citrate Buffer. Dissolve 300 g of potassium citrate (or 284 g of sodium citrate) and 41 g of anhydrous citric acid in 1 liter of water (200 ml is needed per test). Adjust the pH to between 5.4 and 5.6 with potassium citrate or citric acid, as required.

7.3 Calibration Gas. Refer to Section 7.1 of Method 7E (as applicable) for the calibration gas requirements. Example calibration gas mixtures are listed below.

(a) SO_2 in nitrogen (N_2).
(b) SO_2 in air.
(c) SO_2 and carbon dioxide (CO_2) in N_2.
(d) SO_2 and oxygen (O_2) in N_2.
(e) $SO_2/CO_2/O_2$ gas mixture in N_2.
(f) CO_2/NO_X gas mixture in N_2.
(g) $CO_2/SO_2/NO_X$ gas mixture in N_2.

For fluorescence-based analyzers, the O_2 and CO_2 concentrations of the calibration gases as introduced to the analyzer must be within 1.0 percent (absolute) O_2 and 1.0 percent (absolute) CO_2 of the O_2 and CO_2 concentrations of the effluent samples as introduced to the analyzer. Alternatively, for fluorescence-based analyzers, use calibration blends of SO_2 in air and the nomographs provided by the vendor to determine the quenching correction factor (the effluent O_2 and CO_2 concentrations must be known). This requirement does not apply to ambient-level fluorescence analyzers that are used in conjunction with sample dilution systems. Alternatively, H_2S in O_2 or air may be used to calibrate the analyzer through the tube furnace.

7.4 System Performance Check Gas. You must use H_2S (100 ppmv or less) stored in aluminum cylinders with the concentration certified by the manufacturer. Hydrogen sulfide in nitrogen is more stable than H_2S in air, but air may be used as the balance gas. **Note:** Alternatively, H_2S recovery gas generated from a permeation device gravimetrically calibrated and certified at some convenient operating temperature may be used. The permeation rate of the device must be such that at the appropriate dilution gas flow rate, an H_2S concentration can be generated in the range of the stack gas or within 20 percent of the emission standard.

7.5 Interference Check. Examples of test gases for the interference check are listed in Table 7E–3 of Method 7E.

8.0 Sample Collection, Preservation, Storage, and Transport

8.1 Pre-sampling Tests. Before measuring emissions, perform the following procedures:

(a) Calibration gas verification,
(b) Calibration error test,
(c) System performance check,
(d) Verification that the interference check has been satisfied.

8.1.1 Calibration Gas Verification. Obtain a certificate from the gas manufacturer documenting the quality of the gas. Confirm that the manufacturer certification is complete and current. Ensure that your calibration gas certifications have not expired. This documentation should be available on-site for inspection. To the extent practicable, select a high-level gas concentration that will result in the measured emissions being between 20 and 100 percent of the calibration span.

8.1.2 Analyzer Calibration Error Test. After you have assembled, prepared, and calibrated your sampling system and analyzer, you must conduct a 3-point analyzer calibration error test before the first run and again after any failed system performance check or failed drift test to ensure the calibration is acceptable. Introduce the low-, mid-, and high-level calibration gases sequentially to the analyzer in direct calibration mode. For each calibration gas, calculate the analyzer calibration error using Equation 16C–1 in Section 12.2. The calibration error for the low-, mid-, and high-level gases must not exceed 5.0 percent or 0.5 ppmv. If the calibration error specification is not met, take corrective action and repeat the test until an acceptable 3-point calibration is achieved.

8.1.3 System Performance Check. A system performance check is done (1) to validate the sampling train components and procedure (prior to testing), and (2) to validate a test run (after a run). You must conduct a performance check in the field prior to testing, and after each 3-hour run or after three 1-hour runs. A performance check consists of sampling and analyzing a known concentration of H_2S (system performance check gas) and comparing the analyzed concentration to the known concentration. To conduct the system performance check, mix the system performance check gas (Section 7.4) and ambient air, that has been conditioned to remove moisture and sulfur-containing gases, in a dilution system such as that shown in Figure 16A–3 of Method 16A. Alternatively, ultra-high purity (UHP) grade air may be used. Adjust the gas flow rates to generate an H_2S concentration in the range of the stack gas or within 20 percent of the applicable standard and an oxygen concentration greater than 1 percent at a total flow rate of at least 2.5 liters/min (5.3 ft3/hr). Use Equation 16A–3 from Method 16A to calculate the concentration of system performance check gas generated. Calibrate the flow rate from both gas sources with a soap bubble flow meter so that the diluted concentration of H_2S can be accurately calculated. Alternatively, mass flow controllers with documented calibrations may be used if UHP grade air is being used. Sample duration should be sufficiently long to ensure a stable response from the analyzer.

Analyze in the same manner as the emission samples. Collect the sample through the probe of the sampling train using a manifold or other suitable device that will ensure extraction of a representative sample. The TRS sample concentration measured between system performance checks is corrected by the average of the pre- and post-system performance checks.

8.1.4 Interference Check. Same as in Method 7E, Section 8.2.7.

8.2 Measurement System Preparation.

8.2.1 For the SO_2 scrubber, measure 100 ml of citrate buffer into the first and second impingers; leave the third impinger empty. Immerse the impingers in an ice bath, and locate them as close as possible to the filter heat box. The connecting tubing should be free of loops. Maintain the probe and filter temperatures sufficiently high to prevent moisture condensation, and monitor with a suitable temperature sensor. Prepare the oxidation furnace and maintain at 800 ± 100°C (1472 ± 180°F).

8.2.2 Citrate Scrubber Conditioning Procedure. Condition the citrate buffer scrubbing solution by pulling stack gas through the Teflon impingers as described in Section 8.4.1.

8.3 Pretest Procedures. After the complete measurement system has been set up at the site and deemed to be operational, the following procedures must be completed before sampling is initiated.

8.3.1 Leak-Check. Appropriate leak-check procedures must be employed to verify the integrity of all components, sample lines, and connections. For components upstream of the sample pump, attach the probe end of the sample line to a manometer or vacuum gauge, start the pump and pull a vacuum greater than 50 mm (2 in.) Hg, close off the pump outlet, and then stop the pump and ascertain that there is no leak for 1 minute. For components after the pump, apply a slight positive pressure and check for leaks by applying a liquid (detergent in water, for example) at each joint. Bubbling indicates the presence of a leak.

8.3.2 Initial System Performance Check. A system performance check using the test gas (Section 7.4) is performed prior to testing to validate the sampling train components and procedure.

8.4 Sample Collection and Analysis.

8.4.1 After performing the required pretest procedures described in Section 8.1, insert the sampling probe into the test port ensuring that no dilution air enters the stack through the port. Condition the sampling system and citrate buffer solution for a minimum of 15 minutes before beginning analysis. Begin sampling and analysis. A source test consists of three test runs. A test run shall consist of a single sample collected over a 3-hour period or three separate 1-hour samples collected over a period not to exceed six hours.

8.5 Post-Run Evaluations.

8.5.1 System Performance Check. Perform a post-run system performance check before replacing the citrate buffer solution and particulate filter and before the probe is cleaned. The check results must not exceed the 100 ± 20 percent limit set forth in Section 13.2. If this limit is exceeded, the intervening run is considered invalid. However, if the recovery efficiency is not in the 100 ± 20 percent range, but the results do not affect the compliance or noncompliance status of the affected facility, the Administrator may decide to accept the results of the compliance test.

8.5.2 Calibration Drift. After a run or series of runs, not to exceed a 24-hour period after initial calibration, perform a calibration drift test using a calibration gas (preferably the level that best approximates the sample concentration) in direct calibration mode. This drift must not differ from the initial calibration error percent by more than 3.0 percent or 0.5 ppm. If the drift exceeds this limit, the intervening run or runs are considered valid, but a new analyzer calibration error test must be performed and passed before continuing sampling.

9.0 Quality Control

Section	Quality control measure	Effect
8.1.2	Analyzer calibration error test	Establishes initial calibration accuracy within 5.0%.
8.1.3, 8.5.1	System performance check	Ensures accuracy of sampling/analytical procedure to 100 ± 20%.
8.5.2	Calibration drift test	Ensures calibration drift is within 3.0%.
8.1.4	Interference check	Checks for analytical interferences.
8.3	Sampling equipment leak-check	Ensures accurate measurement of sample gas flow rate, sample volume.

10.0 Calibration

10.1 Calibrate the system using the gases described in Section 7.3. Perform the initial 3-point calibration error test as described in Section 8.1.2 before you start the test. The specification in Section 13 must be met. Conduct an initial system performance test described in Section 8.1.3 as well before the test to validate the sampling components and procedures before sampling. After the test commences, a system performance check is required after each run. You must include a copy of the manufacturer's certification of the calibration gases used in the testing as part of the test report. This certification must include the 13 documentation requirements in the EPA Traceability Protocol for Assay and Certification of Gaseous Calibration Standards, September 1997, as amended August 25, 1999.

11.0 Analytical Procedure

Because sample collection and analysis are performed together (see Section 8.0), additional discussion of the analytical procedure is not necessary.

12.0 Calculations and Data Analysis

12.1 Nomenclature.

ACE = Analyzer calibration error, percent of calibration span.
CD = Calibration drift, percent.
C_{Dir} = Measured concentration of a calibration gas (low, mid, or high) when introduced in direct calibration mode, ppmv.
C_{H2S} = Concentration of the system performance check gas, ppmv H_2S.
C_M = Average of initial and final system calibration bias check responses for the upscale calibration gas, ppmv.
C_{MA} = Actual concentration of the upscale calibration gas, ppmv.
C_O = Average of the initial and final system calibration bias check responses from the low-level (or zero) calibration gas, ppmv.
C_{OA} = Actual concentration of the low-level calibration gas, ppmv.
C_S = Measured concentration of the system performance gas when introduced in system calibration mode, ppmv H_2S.
C_V = Manufacturer certified concentration of a calibration gas (low, mid, or high), ppmv SO_2.
C_{SO2} = Unadjusted sample SO_2 concentration, ppmv.
C_{TRS} = Total reduced sulfur concentration corrected for system performance, ppmv.
DF = Dilution system (if used) dilution factor, dimensionless.
SP = System performance, percent.

12.2 Analyzer Calibration Error. Use Equation 16C–1 to calculate the analyzer calibration error for the low-, mid-, and high-level calibration gases.

$$ACE = \frac{C_{Dir} - C_v}{C_v} x\,100 \qquad \text{Eq. 16C-1}$$

12.3 System Performance Check. Use Equation 16C–2 to calculate the system performance.

$$SP = \frac{C_S - C_{H2S}}{C_{H2S}} x\,100 \qquad \text{Eq. 16C-2}$$

12.4 Calibration Drift. Use Equation 16C–3 to calculate the calibration drift at a single concentration level after a run or series of runs (not to exceed a 24-hr period) from initial calibration. Compare the single-level calibration gas error (ACE_n) to the original error obtained for that gas in the initial analyzer calibration error test (ACE_i).

$$CD = \left|ACE_i - ACE_n\right| \qquad \text{Eq. 16C-3}$$

12.5 TRS Concentration as SO_2. For each sample or test run, calculate the arithmetic average of SO_2 concentration values (e.g., 1-minute averages). Then calculate the sample TRS concentration by adjusting the average value of C_{SO2} for system performance using Equation 16C–4a if you use a non-zero gas as your low-level calibration gas, or Equation 16C–4b if you use a zero gas as your low-level calibration gas.

$$C_{TRS} = (C_{SO2\ Avg} - C_M)\frac{C_{MA} - C_{OA}}{C_M - C_O} + C_{MA} \qquad \text{Eq. 16C-4a}$$

$$C_{TRS} = \frac{(C_{SO2\ Avg} - C_O)C_{MA}}{C_M - C_O} \qquad \text{Eq. 16C-4b}$$

13.0 Method Performance

13.1 Analyzer Calibration Error. At each calibration gas level (low, mid, and high), the calibration error must either not exceed 5.0 percent of the calibration gas concentration or $|C_{Dir} - C_v|$ must be ≤0.5 ppmv.

13.2 System Performance. Each system performance check must not deviate from the system performance gas concentration by more than 20 percent. Alternatively, the results are acceptable if $|C_s - C_{H2S}|$ is ≤0.5 ppmv.

13.3 Calibration Drift. The calibration drift at the end of any run or series of runs within a 24-hour period must not differ by more than 3.0 percent from the original ACE at the test concentration level or $|ACEi - ACE_n|$ must not exceed 0.5 ppmv.

13.4 Interference Check. For the analyzer, the total interference response (i.e., the sum of the interference responses of all tested gaseous components) must not be greater than 2.5 percent of the calibration span. Any interference is also acceptable if the sum of the responses does not exceed 0.5 ppmv for a calibration span of 5 to 10 ppmv, or 0.2 ppmv for a calibration span <5 ppmv.

14.0 Pollution Prevention [Reserved]

15.0 Waste Management [Reserved]

40 CFR Part 122

[EPA–HQ–OW–2012–0142; FRL–9705–6]

RIN 2040–AF40

National Pollutant Discharge Elimination System Permit Regulation for Concentrated Animal Feeding Operations: Removal of Vacated Elements in Response to 2011 Court Decision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The EPA is amending its regulations to eliminate the requirement that an owner or operator of a Concentrated Animal Feeding Operation (CAFO) that ''proposes to discharge'' must apply for a National Pollutant Discharge Elimination System (NPDES) Permit. This rulemaking also removes the voluntary certification option for unpermitted CAFOs because removal of the ''propose to discharge'' requirement renders the certification option unnecessary. Its purpose had been to allow CAFO owners and operators to certify that they were not violating the requirement that owners or operators of CAFOs that propose to discharge must seek permit coverage. Both of these

provisions were included in the EPA's rulemaking entitled ''Revised National Pollutant Discharge Elimination System Permit Regulation and Effluent Limitations Guidelines for Concentrated Animal Feeding Operations in Response to the Waterkeeper Decision,'' (the 2008 CAFO Rule).

DATES: This final rule is effective on July 30, 2012.

ADDRESSES: The record for this rulemaking is available for inspection and copying at the Water Docket, located at the EPA Docket Center (EPA/DC), EPA West 1301 Constitution Ave. NW., Washington, DC 20004. The record is also available via the EPA Dockets at *http://www.regulations.gov* under docket number EPA–HQ–OW–2012–0142. The rule and key supporting documents are also available electronically on the Internet at *http://www.epa.gov/npdes/caforule.*

FOR FURTHER INFORMATION CONTACT: For further information contact Louis Eby, Water Permits Division, Office of Wastewater Management (4203M), Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460, telephone number: (202) 564–6599, email address: *eby.louis@epa.gov.*

K. Congressional Review Act
V. Statutory Authority

I. General Information

A. Does this action apply to me?

This action applies to CAFOs as specified in section 502(14) of the Clean Water Act (CWA), 33 U.S.C. 1362(14) and defined in the NPDES regulations at 40 CFR 122.23. Table 1.1 provides a list of standard industrial codes for operations potentially regulated under this revised rule. The rule also applies to States and Tribes with authorized NPDES Programs.

TABLE 1.1—OPERATIONS POTENTIALLY REGULATED BY THIS RULE

Category	Examples of regulated entities	North American Industry Classification System (NAICS)	Standard Industrial Classification (SIC)
Industry	Operators of animal production operations that meet the definition of a CAFO:		
	Beef cattle feedlots (including veal calves)	112112	0211
	Beef cattle ranching and farming	112111	0212
	Hogs	11221	0213
	Sheep and Goats	11241, 11242	0214
	General livestock except dairy and poultry	11299	0219
	Dairy farms	11212	0241
	Broilers, fryers, and roaster chickens	11232	0251
	Chicken eggs	11231	0252
	Turkey and turkey eggs	11233	0253
	Poultry hatcheries	11234	0254
	Poultry and eggs	11239	0259
	Ducks	11239	0259
	Horses and other equines	11292	0272

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. To determine whether your facility would be affected by this action, you should carefully examine the definitions and other provisions of 40 CFR 122.23.

II. Background and Rationale for Action

On November 20, 2008, the EPA published a final rule (73 FR 70418) that revised the NPDES permitting requirements and Effluent Limitations Guidelines and Standards for CAFOs in response to the order issued by the U.S. Court of Appeals for the Second Circuit in *Waterkeeper Alliance et al.* v. *EPA,* 399 F.3d 486 (2d Cir. 2005). The 2008 CAFO Rule included a number of changes, including a requirement that CAFO owners or operators that discharge or propose to discharge must apply for an NPDES permit. The 2008 CAFO Rule also created a voluntary option for unpermitted CAFO owners and operators to certify to the permitting authority that the CAFO does not discharge or propose to discharge.

On March 15, 2011, the United States Court of Appeals for the Fifth Circuit (the Court) issued an opinion that, among other things, vacated those portions of the 2008 CAFO Rule requiring CAFOs that propose to discharge to apply for an NPDES permit. *National Pork Producers Council* v. *EPA,* 635 F.3d 738, 756 (5th Cir. 2011). This action removes from the Code of Federal Regulations (CFR) the specific ''propose to discharge'' requirement in 40 CFR 122.23(d).

Today's action also deletes the timing requirements in 40 CFR 122.23(f) related to when CAFO owners and operators must seek coverage under an NPDES permit. These provisions extended the time by which facilities newly required to obtain NPDES permits must apply for a permit. The date-specific deadlines in those sections have passed. The revision clarifies that all CAFOs must have a permit at the time that they discharge.

The rule also removes 40 CFR 122.23(g) to make conforming changes to EPA's requirements for renewing permit coverage.

Also, this action removes from the CFR the option in 40 CFR 122.23(i) and (j) for owners and operators to

voluntarily certify that a CAFO does not discharge or propose to discharge. The option provides that properly certified CAFOs would ''not be in violation of the requirement that CAFOs that propose to discharge seek permit coverage. * * *'' Removing the requirement that CAFOs apply for permits if they ''propose to discharge'' renders the option to certify unnecessary and therefore the EPA is eliminating it.

The EPA is not providing an opportunity for comment on this final rule. The Administrative Procedure Act of 1946 (APA) makes provision for the procedural path we are following in this action. In general, the APA requires that general notice of proposed rulemaking shall be published in the **Federal Register**. Such notice must provide an opportunity for public participation in the rulemaking process. The APA does provide an avenue for an agency to directly issue a final rulemaking in certain specific instances. This may occur, in particular, when an agency for good cause finds (and incorporates the finding and a brief statement of reasons therefore in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest. See 5 U.S.C. 553(b)(3)(B).

The EPA finds that a notice-and-comment rulemaking is unnecessary and not in the public interest because this action is ministerial in nature. The EPA has no discretion given the specific circumstances presented in the Court's opinion. The EPA is bound by the decisions of the court and must act in accordance with that decision. The EPA accepts the decision of the Court that vacated the requirement that CAFOs that propose to discharge apply for NPDES permits and the EPA lacks discretion to reach a different conclusion. Providing an opportunity for notice and comment is therefore unnecessary and would not serve any public interest.

III. Implementation

For the reasons cited above, the EPA is making this action effective upon publication. See 5 U.S.C. 553(d)(3). This action removes content from the CFR that has been found to be contrary to the CWA by a United States Court of Appeals. This is a ministerial but necessary action on the part of the EPA. Given the EPA's lack of discretion in this matter, the EPA has good cause to act in the public interest to implement the court's remedy by amending the CFR without delay.

The deadline has passed by which states were required to make any changes to their approved state NPDES program legal authorities necessary to conform to the 2008 CAFO Rule. States that have not yet done so must make the necessary changes to conform to the 2008 CAFO Rule, less the vacated provisions.

IV. Statutory and Executive Order Reviews

A. Executive Order 12866 (Regulatory Planning and Executive Order 13563: Improving Regulation and Regulatory Review)

This rule withdraws Federal requirements applicable to CAFOs that propose to discharge as well as the option to certify that a CAFO does not discharge or propose to discharge. It imposes no regulatory requirements on any person or entity, does not interfere with the action or planned action of another agency, and does not have any budgetary impacts or raise novel legal or policy issues. The rule imposes no additional cost on the regulated community. The rule imposes no additional effort on the State regulators. Thus, this rule is not a ''significant regulatory action'' under the terms of Executive Order 12866 (58 FR 51735, October 4, 1993) and Executive Order 13563 (76 FR 3821, January 21, 2011) and is therefore not subject to review under the Executive Orders.

B. Paperwork Reduction Act

This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), because it is administratively withdrawing Federal requirements.

C. Regulatory Flexibility Act

Today's final rule is not subject to the Regulatory Flexibility Act (RFA), which generally requires an agency to prepare a regulatory flexibility analysis for any rule that will have a significant economic impact on a substantial number of small entities. The RFA applies only to rules subject to notice and comment rulemaking requirements under the Administrative Procedure Act (APA) or any other statute. Although the rule is subject to the APA, the Agency has invoked the ''good cause'' exemption under 5 USC 553(b), therefore it is not subject to the notice and comment requirement.

D. Unfunded Mandates Reform Act

This action contains no Federal mandates under the provisions of Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1531–1538 for State, local, or tribal governments or the private sector. The action imposes no enforceable duty on any State, local or tribal governments or the private sector. Therefore, this action is not subject to the requirements of sections 202 or 205 of the UMRA. Similarly, the EPA has determined that this rule contains no regulatory requirements that might significantly or uniquely affect small governments and is therefore not subject to UMRA section 203.

E. Executive Order 13132 (Federalism)

Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999), requires the EPA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' ''Policies that have federalism implications'' is defined in the Executive Order to include regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.''

This rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. This rule imposes no regulatory requirements on any State, Tribal, or local government. Thus, Executive Order 13132 does not apply to this rule.

F. Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments)

Executive Order 13175, entitled ''Consultation and Coordination with Indian Tribal Governments'' (59 FR 22951, November 9, 2000), requires the EPA to develop an accountable process to ensure ''meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications.'' This rule does not have tribal implications, as specified in Executive Order 13175. It imposes no regulatory requirements or costs on any Tribal government. It does not have substantial direct effects on Tribal governments, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes. Thus, Executive Order 13175 does not apply to this rule.

G. Executive Order 13045 (Protection of Children From Environmental Health and Safety Risks)

This rule is not subject to Executive Order 13045, entitled ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997), because it is not economically significant as defined in Executive Order 12866, and the EPA has no reason to believe the environmental health or safety risks addressed by this rule present a disproportionate risk to children.

H. Executive Order 13211 (Actions That Significantly Affect Energy Supply, Distribution, or Use)

This rule is not subject to Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001), because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (''NTTAA''), Public Law 104–113, 12(d) (15 U.S.C. 272 note) directs the EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. NTTAA directs the EPA to provide Congress, through the Office of Management and Budget, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This rule does not involve technical standards. Therefore, the EPA did not consider the use of any voluntary consensus standards.

J. Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations)

Executive Order 12898 (59 FR 7629, February 16, 1994) establishes Federal executive policy on environmental justice. Its main provision directs Federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

The EPA has determined that this rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it merely removes regulations that were vacated by the U.S. Court of Appeals and, therefore, does not affect the level of protection provided to human health or the environment.

K. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. Section 808 allows the issuing agency to make a rule effective sooner than otherwise provided by the CRA if the agency makes a good cause finding that notice and public procedure is impracticable, unnecessary or contrary to the public interest. This determination must be supported by a brief statement. 5 U.S.C. 808(2). As stated previously, EPA has made such a good cause finding, including the reasons therefor, and established an effective date of July 30, 2012. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

V. Statutory Authority

This rule is issued under the authority of sections 101, 301, 304, 306, 308, 402, and 501 of the CWA. 33 U.S.C. 1251, 1311, 1314, 1316, 1317, 1318, 1342, and 1361.

List of Subjects in 40 CFR Part 122

Environmental protection, Administrative practice and procedure, Confidential business information, Hazardous substances, Reporting and recordkeeping requirements, Water pollution control.

Dated: July 19, 2012.

Lisa P. Jackson,

Administrator.

For the reasons set out in the preamble, 40 CFR part 122 is amended as follows:

PART 122—EPA ADMINISTERED PERMIT PROGRAMS: THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

■ 1. The authority citation for part 122 continues to read as follows:

Authority: The Clean Water Act, 33 U.S.C. 1251 et seq.

■ 2. Section 122.23 is amended as follows:
■ a. By revising the heading of paragraph (d).
■ b. By revising paragraph (d)(1).
■ c. By revising paragraph (f).
■ d. By removing and reserving paragraph (g).
■ e. By removing paragraphs (i) and (j).

§ 122.23 Concentrated animal feeding operations (applicable to State NPDES programs, see § 123.25).

* * * * *

(d) *NPDES permit authorization.*—(1) *Permit Requirement.* A CAFO must not discharge unless the discharge is authorized by an NPDES permit. In order to obtain authorization under an NPDES permit, the CAFO owner or operator must either apply for an individual NPDES permit or submit a notice of intent for coverage under an NPDES general permit.

* * * * *

(f) *By when must the owner or operator of a CAFO have an NPDES permit if it discharges?* A CAFO must be covered by a permit at the time that it discharges.

BILLING CODE 6560–50–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 65

[Docket ID FEMA–2012–0003; Internal Agency Docket No. FEMA–B–1260]

Changes in Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Interim rule.

SUMMARY: This interim rule lists communities where modification of the Base (1% annual-chance) Flood Elevations (BFEs) is appropriate because of new scientific or technical data. New flood insurance premium rates will be calculated from the modified BFEs for new buildings and their contents.

DATES: These modified BFEs are currently in effect on the dates listed in the table below and revise the Flood Insurance Rate Maps (FIRMs) in effect prior to this determination for the listed communities.

From the date of the second publication of these changes in a newspaper of local circulation, any person has ninety (90) days in which to request through the community that the Deputy Associate Administrator for Mitigation reconsider the changes. The modified BFEs may be changed during the 90-day period.

ADDRESSES: The modified BFEs for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

FOR FURTHER INFORMATION CONTACT: Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–4064, or (email) *Luis.Rodriguez3@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The modified BFEs are not listed for each community in this interim rule. However, the address of the Chief Executive Officer of the community where the modified BFE determinations are available for inspection is provided.

Any request for reconsideration must be based on knowledge of changed conditions or new scientific or technical data.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.,* and with 44 CFR part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The modified BFEs are the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. The changes in BFEs are in accordance with 44 CFR 65.4.

National Environmental Policy Act. This interim rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

Regulatory Flexibility Act. As flood elevation determinations are not within the scope of the Regulatory Flexibility Act, 5 U.S.C. 601–612, a regulatory flexibility analysis is not required.

Regulatory Classification. This interim rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 13132, Federalism. This interim rule involves no policies that have federalism implications under Executive Order 13132, Federalism.

Executive Order 12988, Civil Justice Reform. This interim rule meets the applicable standards of Executive Order 12988.

List of Subjects in 44 CFR Part 65

Flood insurance, Floodplains, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 65 is amended to read as follows:

PART 65—[AMENDED]

■ 1. The authority citation for part 65 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.;* Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 65.4 [Amended]

■ 2. The tables published under the authority of § 65.4 are amended as follows:

State and county	Location and case No.	Date and name of newspaper where notice was published	Chief executive officer of community	Effective date of modification	Community No.
Florida: Sumter	Unincorporated areas of Sumter County (11–04–4816P).	Sept. 22, 2011, Sept. 29, 2011, *The Sumter County Times.*	The Honorable Don Burgess, Chairman, Sumter County Board of Commissioners, 7375 Powell Road, Wildwood, FL 34785.	Jan. 27, 2012	120296
North Carolina: Orange.	Town of Chapel Hill (10–04–6903P).	Nov. 23, 2011, Nov. 30, 2011, *The Chapel Hill Herald.*	The Honorable Mark Kleinschmidt, Mayor, Town of Chapel Hill, 405 Martin Luther King, Jr. Boulevard, Chapel Hill, NC 27514.	Mar. 29, 2012	370180
Texas: Bexar	City of San Antonio (11–06–2247P).	Nov. 28, 2011, Dec. 5, 2011, *The San Antonio Express-News.*	The Honorable Julian Castro, Mayor, City of San Antonio, 100 Military Plaza, San Antonio, TX 78205.	Dec. 21, 2011	480045

(Catalog of Federal Domestic Assistance No. 97.022, ''Flood Insurance.'')

Dated: July 12, 2012.

Sandra K. Knight,

Deputy Associate Administrator for Mitigation, Department of Homeland Security, Federal Emergency Management Agency.

[FR Doc. 2012–18493 Filed 7–27–12; 8:45 am]

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 65

[Docket ID FEMA–2012–0003]

Changes in Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final rule.

SUMMARY: Modified Base (1% annual-chance) Flood Elevations (BFEs) are finalized for the communities listed below. These modified BFEs will be used to calculate flood insurance premium rates for new buildings and their contents.

DATES: The effective dates for these modified BFEs are indicated on the following table and revise the Flood Insurance Rate Maps (FIRMs) in effect

for the listed communities prior to this date.

ADDRESSES: The modified BFEs for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

FOR FURTHER INFORMATION CONTACT: Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–4064, or (email) *Luis.Rodriguez3@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below of the modified BFEs for each community listed. These modified BFEs have been published in newspapers of local circulation and ninety (90) days have elapsed since that publication. The Deputy Associate Administrator for Mitigation has resolved any appeals resulting from this notification.

The modified BFEs are not listed for each community in this notice. However, this final rule includes the address of the Chief Executive Officer of the community where the modified BFE determinations are available for inspection.

The modified BFEs are made pursuant to section 206 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.,* and with 44 CFR part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The modified BFEs are the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities.

These modified BFEs are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in those buildings. The changes in BFEs are in accordance with 44 CFR 65.4.

National Environmental Policy Act. This final rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

Regulatory Flexibility Act. As flood elevation determinations are not within the scope of the Regulatory Flexibility Act, 5 U.S.C. 601–612, a regulatory flexibility analysis is not required.

Regulatory Classification. This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 13132, Federalism. This final rule involves no policies that have federalism implications under Executive Order 13132, Federalism.

Executive Order 12988, Civil Justice Reform. This final rule meets the applicable standards of Executive Order 12988.

List of Subjects in 44 CFR Part 65

Flood insurance, Floodplains, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 65 is amended to read as follows:

PART 65—[AMENDED]

■ 1. The authority citation for part 65 continues to read as follows:

50 CFR Part 679

[Docket No. 111213751–2102–02]

RIN 0648–XC129

Fisheries of the Exclusive Economic Zone Off Alaska; Arrowtooth Flounder in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; apportionment of reserves; request for comments.

SUMMARY: NMFS apportions amounts of the non-specified reserve to the initial total allowable catch of arrowtooth flounder in the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to allow the fisheries to continue operating. It is intended to promote the goals and objectives of the fishery management plan for the Bering Sea and Aleutian Islands management area.

DATES: Effective July 25, 2012 through 2400 hrs, Alaska local time, December 31, 2012. Comments must be received at the following address no later than 4:30 p.m., Alaska local time, August 9, 2012.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS 2012–0150, by any of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal *www.regulations.gov*. To submit comments via the e-Rulemaking Portal, first click the ''submit a comment'' icon, then enter NOAA–NMFS 2012–0150 in the keyword search. Locate the document you wish to comment on from the resulting list and click on the ''Submit a Comment'' icon on that line.
- *Mail:* Address written comments to Glenn Merrill, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS, Attn: Ellen Sebastian. Mail comments to P.O. Box 21668, Juneau, AK 99802–1668.
- *Fax:* Address written comments to Glenn Merrill, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS, Attn: Ellen Sebastian. Fax comments to 907–586–7557.
- *Hand delivery to the Federal Building:* Address written comments to Glenn Merrill, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS, Attn: Ellen Sebastian. Deliver comments to 709 West 9th Street, Room 420A, Juneau, AK.

Instructions: Comments must be submitted by one of the above methods to ensure that the comments are received, documented, and considered by NMFS. Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (e.g., name, address) submitted voluntarily by the sender will be publicly accessible.

Do not submit confidential business information, or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word or Excel, WordPerfect, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT: Steve Whitney, 907–586–7269.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the (BSAI) exclusive economic zone according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2012 initial total allowable catch (ITAC) of arrowtooth flounder in the BSAI was established as 21,250 metric tons (mt) by the final 2012 and 2013 harvest specifications for groundfish of the BSAI (77 FR 10669, February 23, 2012). In accordance with § 679.20(a)(3) the Regional Administrator, Alaska Region, NMFS, has reviewed the most current available data and finds that the ITAC for arrowtooth flounder in the BSAI needs to be supplemented from the non-specified reserve in order to promote efficiency in the utilization of fishery resources in the BSAI and allow fishing operations to continue.

Therefore, in accordance with § 679.20(b)(3), NMFS apportions from the non-specified reserve of groundfish 1,075 mt to the arrowtooth flounder ITAC in the BSAI. This apportionment is consistent with § 679.20(b)(1)(i) and does not result in overfishing of a target species because the revised ITAC is equal to or less than the specifications of the acceptable biological catch in the final 2012 and 2013 harvest specifications for groundfish in the BSAI (77 FR 10669, February 23, 2012).

The harvest specification for the 2012 arrowtooth flounder ITAC included in the harvest specifications for groundfish in the BSAI is revised as follows: 22,325 mt for arrowtooth flounder in the BSAI.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA, (AA) finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) and § 679.20(b)(3)(iii)(A) as such a requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the apportionment of the non-specified reserves of groundfish to the arrowtooth flounder fishery in the BSAI. Immediate notification is necessary to allow for the orderly conduct and efficient operation of this fishery, to allow the industry to plan for the fishing season, and to avoid potential disruption to the fishing fleet and processors. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of July 24, 2012.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Under § 679.20(b)(3)(iii), interested persons are invited to submit written comments on this action (see **ADDRESSES**) until August 9, 2012.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: July 25, 2012.

James P. Burgess,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 77, No. 146
Monday, July 30, 2012

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 741

RIN 3133–AD96

Maintaining Access to Emergency Liquidity

AGENCY: National Credit Union Administration (NCUA).

ACTION: Notice of proposed rulemaking with request for comment (NPRM).

SUMMARY: The NCUA Board (Board) is requesting public comment on a proposed regulation requiring federally insured credit unions (FICUs) with assets of $10 million or more to have a contingency funding plan that clearly sets out strategies for addressing liquidity shortfalls in emergency situations. The NPRM also requires FICUs with assets of $100 million or more to have access to a backup federal liquidity source for emergency situations. Finally, the NPRM requires FICUs with less than $10 million in assets to maintain a basic written policy that provides a board-approved framework for managing liquidity and a list of contingent liquidity sources that can be employed under adverse circumstances. The NPRM follows an earlier Advance Notice of Proposed Rulemaking (ANPR) requesting public comment on the scope and requirements of a regulation regarding backup liquidity requirements.

DATES: We must receive your comments on or before September 28, 2012.

ADDRESSES: You may submit comments by any one of the following methods (Please send comments by one method only):

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email:* Address to *regcomments@ncua.gov.* Include ''[Your name]—Comments on Notice of Proposed Rulemaking for Part 741, Maintaining Access to Emergency Liquidity'' in the email subject line.
- *Fax:* (703) 518–6319. Use the subject line described above for email.
- *Mail:* Address to Mary Rupp, Secretary of the Board, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314–3428.
- *Hand Delivery/Courier:* Same as mail address.

Public Inspection: You can view all public comments on NCUA's Web site at *http://www.ncua.gov/Legal/Regs/Pages/PropRegs.aspx* as submitted, except for those we cannot post for technical reasons. NCUA will not edit or remove any identifying or contact information from the public comments submitted. You may inspect paper copies of comments in NCUA's law library at 1775 Duke Street, Alexandria, Virginia 22314, by appointment weekdays between 9 a.m. and 3 p.m. To make an appointment, call (703) 518–6546 or send an email to *OGCMail@ncua.gov.*

FOR FURTHER INFORMATION CONTACT: Lisa Henderson, Staff Attorney, Office of General Counsel, at the address above or telephone (703) 518–6540; or J. Owen Cole, Jr., Director, Division of Credit and Capital Markets, Office of Examination and Insurance, at the address above or telephone (703) 518–6620.

SUPPLEMENTARY INFORMATION:

I. Background
II. Proposed Rule
III. Regulatory Procedures

I. Background

A. Why did NCUA initiate this rulemaking?

The recent financial crisis demonstrated the importance of access to reliable emergency liquidity. Currently, 6,019 [1] FICUs have access to the Central Liquidity Facility (CLF or facility) by belonging to a corporate credit union that is in turn part of the agent group headed by U.S. Central Bridge Corporate Federal Credit Union (U.S. Central Bridge).[2] U.S. Central Bridge temporarily holds CLF stock on behalf of the whole agent group, but it is expected to close in October 2012. When U.S. Central Bridge redeems the CLF stock upon its closure,[3] these FICUs will no longer have the CLF as a source of backup liquidity, unless they choose to join the CLF directly. In light of these changes, the Board issued an ANPR on the issue of maintaining credit union system liquidity. 76 FR 79553 (Dec. 22, 2011).

B. What is the CLF and how does it operate?

Before discussing the specifics of the ANPR's request, the Board believes it may be helpful to repeat some of the background material the ANPR provided regarding the recent financial crisis and the structure and operations of the CLF.

Depository institutions need to have access to sources of emergency liquidity from both their own balance sheets and through credit facilities. When a depository institution exhibits liquidity problems and its credit providers have uncertainty about its true financial condition, that institution's ability to obtain credit can rapidly diminish or cease altogether. The inability of a depository institution to fund its business-as-usual operations by borrowing can, in turn, cause its ultimate insolvency and failure if, for example, it were forced to sell assets at distressed prices to raise necessary funds. In the financial crisis, even institutions that were healthy used emergency liquidity facilities when risk aversion reduced the availability of even short-term liquidity and funding costs became prohibitively high. Without access to governmental liquidity facilities, the scope of the crisis and damage to the economy would have been much more severe.

Governmental liquidity facilities were created by Congress to provide a stability mechanism to preempt illiquidity situations before they lead to unnecessary insolvencies or cause systemic disruptions to the depository industry. This is because depository institutions are a key element of financial services and the overall economy. Federal entities that exist to provide liquidity assistance are unique in their capacity to obtain funding in times of crisis, and this is based on their backing by the full faith and credit of the U.S. government. These liquidity

[1] This number is based on the 2012 agent member annual stock adjustment. It excludes credit unions that are not regular members of the CLF and not members of a corporate credit union.

[2] NCUA established U.S. Central Bridge to provide an orderly transition in resolving the failure of U.S. Central Corporate Federal Credit Union, which historically held the CLF capital stock on behalf of the majority of credit unions.

[3] *See* 12 U.S.C. 1795d(c); 12 CFR 725.6(d)(1).

facilities are viewed as the ultimate backstop for institutions seeking emergency liquidity in time of need and have proven to be a critical component of the U.S. government's contingency management during times of widespread instability.

By way of example, CLF figured prominently in NCUA's contingency plans during the financial crisis. Through various contingency programs, such as the Credit Union System Investment Program, the Credit Union Homeowners Affordability Relief Program, and loans to the National Credit Union Share Insurance Fund (NCUSIF), CLF facilitated access to billions of dollars of external liquidity. These programs totaled approximately $18.4 billion and were orchestrated during the period between December 2008 and March 2009. Total CLF activity during the height of the crisis reached as much as $20.5 billion, including approximately $2.1 billion in liquidity-need loans outstanding. By having ready access to contingent liquidity through CLF, NCUA was in a position to inject a critical amount of emergency liquidity into the credit union system. These liquidity injections helped stabilize confidence and gave NCUA time to work through the financial difficulties arising from the failure of the system's largest corporate credit unions. They, combined with other actions taken by the Board, were instrumental in maintaining the continuity of vital credit union services and helped avert higher potential losses to the system.

Essentially, CLF provides a form of liquidity insurance to its member credit unions through its ability to make liquidity advances to members funded with matched borrowings from the Federal Financing Bank.[4] A credit union primarily serving natural persons may become a ''regular'' member of the facility by subscribing to the capital stock of the facility. 12 U.S.C. 1795c(a); 12 CFR § 725.3. A credit union or group of credit unions primarily serving other credit unions may become an agent member of the facility by obtaining approval from the Board and subscribing to the capital stock of the facility on behalf of credit unions in its membership that are not regular members. 12 U.S.C. 1795c(b); 12 CFR 725.4. Currently, there is one agent group representative, with 19 agent members within that group.

Historically, most natural person credit unions have not elected to become regular members. Instead, they have qualified for membership in CLF by joining a corporate that was in turn a CLF agent and part of the agent group headed by U.S. Central Bridge. As the agent group representative, U.S. Central Bridge subscribed to, and absorbed the costs of, capital stock on behalf of all underlying natural person credit unions represented by the respective corporate credit unions in U.S. Central Bridge's agent group. U.S. Central Bridge is expected to close in October 2012, and its role as CLF agent group representative will cease at that time. When that occurs, the natural person credit unions that have relied on the existing agent group arrangement for liquidity insurance will no longer have that protection.

C. What did the ANPR do?

The ANPR requested public comment on the scope and requirements of a regulation to require FICUs to have access to backup federal liquidity sources for use in times of financial emergency and distressed economic circumstances. The ANPR stated that the Board was contemplating requiring FICUs to demonstrate this access in one of four ways: (1) Becoming a member in good standing of the CLF directly; (2) becoming a member in good standing of the CLF through a corporate credit union; (3) obtaining and maintaining demonstrated access to the Federal Reserve Discount Window (Discount Window), through which the Federal Reserve System lends reserve funds to depository institutions; or (4) maintaining a certain percentage of assets in highly liquid Treasury securities.

D. What did the commenters say about the ANPR?

NCUA received a total of 60 comments on the ANPR. Approximately two-thirds of the commenters were either in favor of issuing a regulation to require FICUs to have access to emergency liquidity or were silent on the issue but offered suggestions if a regulation was developed. The remaining one-third opposed a liquidity requirement.

The commenters who supported a regulation argued that an emergency liquidity requirement would strengthen the credit union movement, help protect the NCUSIF, and improve the safety and soundness of the industry. The commenters who opposed the regulation primarily argued that a liquidity backstop requirement would be counterproductive and that NCUA should address liquidity concerns about individual credit unions through the exam process. They argued that existing tools, such as the Interagency Policy Statement on Funding and Liquidity Risk Management (Liquidity Policy Statement),[5] were adequate.

The Board has carefully considered all of the comments and continues to believe that it is essential for every FICU, regardless of size and complexity, to have a management process for identifying, measuring, monitoring, and controlling liquidity risk that is commensurate with its respective needs. As the Liquidity Policy Statement advises, all financial institutions should have a formal contingency funding plan (CFP) that clearly sets out the strategies for addressing liquidity shortfalls in emergency situations.

At this time, however, for FICUs under $10 million in assets, the Board proposes to require only the maintenance of a basic written policy that provides a board-approved framework for managing liquidity and a list of contingent liquidity sources that can be employed under adverse circumstances. The Board determined that the very smallest credit unions present relatively limited safety and soundness liquidity concerns. This determination was made in light of the fact that these institutions tend to have lower loan-to-share ratios, shorter duration assets, and higher amounts of balance sheet liquidity than larger credit unions.

NCUA's primary concern with liquidity adequacy in credit unions is their ability to handle a rapid loss of liquidity, including a rapid loss of shares or loss of access to sources of borrowing. When a credit union's cash and liquid assets are depleted, it naturally will turn to external funding sources and may even need to tap an emergency liquidity lender like CLF or the Discount Window to maintain stability of operations. The level of a credit union's on-balance sheet liquidity provides a measure of its capacity to respond to such events and, in turn, its vulnerability to a liquidity loss scenario. NCUA views the capacity to handle runoff as a major indicator for liquidity risk and a useful way to evaluate a credit union's liquidity risk management.

NCUA has analyzed credit unions' contingent liquidity needs using a

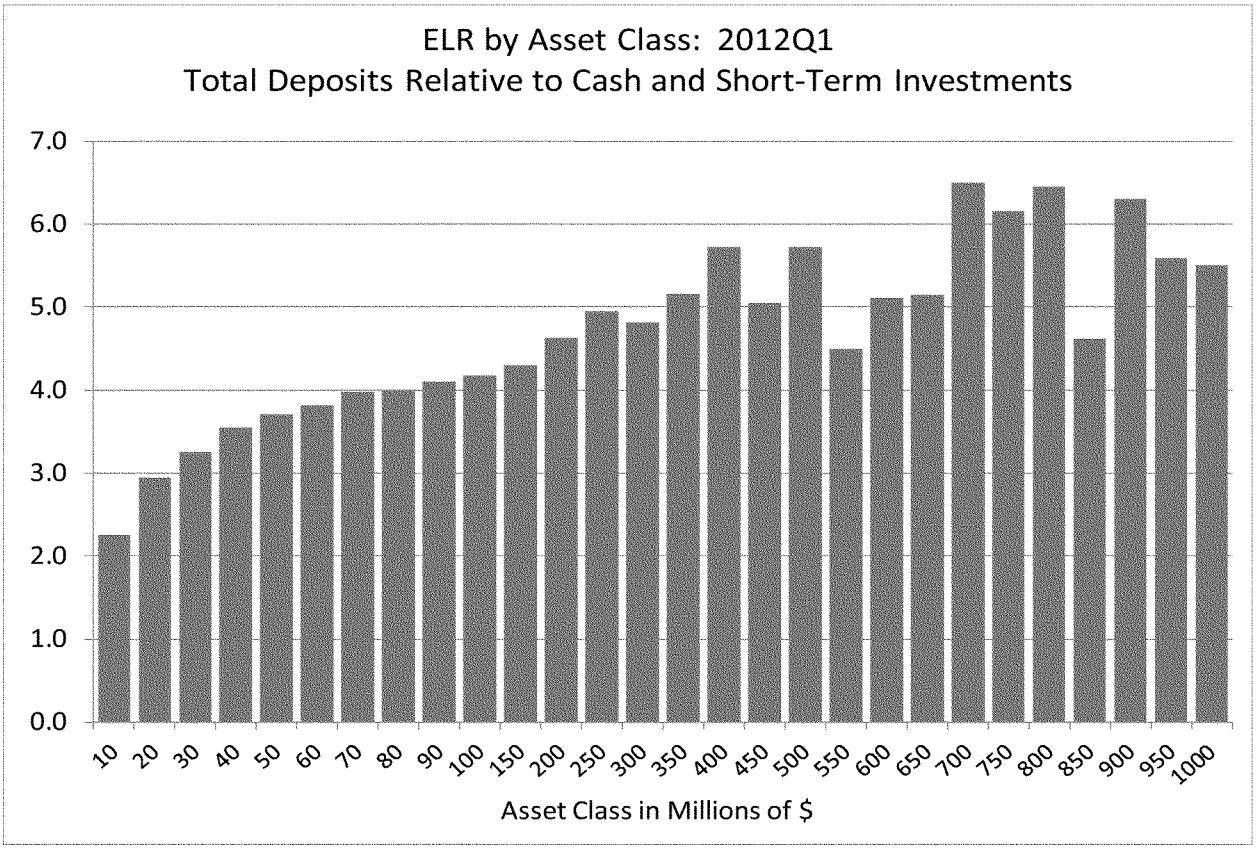
[4] The Federal Financing Bank (FFB) is a government corporation created by Congress in 1973 under the general supervision of the Secretary of the Treasury. The FFB was established to centralize and reduce the cost of federal borrowing, as well as federally-assisted borrowing from the public. 87 STAT. 937, 12 U.S.C. 2281.

[5] *See* 75 FR 13656 (Mar. 22, 2010); *see also* NCUA Letter to Credit Unions No. 10–CU–14, available at *http://www.ncua.gov/Resources/Pages/LCU2010-14.aspx.*

measure of interest rate-sensitive liabilities held by each credit union as a proportion of its cash and short-term investments and a measure of all deposits as a proportion of its cash and short-term investments. These measures are highly correlated. The second, broader, measure is called the ''emergency liquidity ratio'' or ''ELR.'' The ELR can be calculated for every FICU from existing call report information [6] and has been used to inform determination of asset thresholds in the proposed rule. It provides a comparison among FICUs of the relative amount of short-term assets available to fund an unexpected and immediate outflow of deposits.

NCUA computed the ELR for all FICUs using March 2012 call report data. The data reveal that generally the ratio of shares to cash and short-term assets gets larger in larger total asset cohorts. In other words, small credit unions tend to have a lower ELR and larger credit unions tend to have a higher ELR. The ELR is a risk ratio: The higher the measure, the greater the implied susceptibility to a liquidity event. In light of the general rise in ELR with increasing asset size, the proposed rule requires FICUs with assets of at least $10 million to have formal CFPs, as defined in the rule.

The following chart illustrates first quarter 2012 median ELR by asset class for FICUs.



In general, over the $100 million asset threshold, the ELR generally rises to a level that, combined with institution size, suggests the need for demonstrated access to a source of emergency liquidity. Furthermore, larger credit unions have a greater degree of interconnectedness with other market entities and are more likely to adversely affect the credit union system, public perception, and the NCUSIF when experiencing unexpected or severe liquidity circumstances. The recent financial crisis serves as a stark reminder of how large-scale liquidity events imperil even the strongest and most well-capitalized institutions if they do not have ready access to a reliable source of emergency funds. Consistent with the Liquidity Policy Statement, the Board seeks to strengthen the credit union system's ability to withstand the potential impact of stressful liquidity events and circumstances, and believes this comes in part from strengthening capacity at the institutional level. The proposed rule requires these larger FICUs to have a pre-established contingency capability to respond to unexpected and/or severe liquidity events.

The Board is proposing different asset thresholds in this rule to minimize regulatory burden on smaller FICUs, while simultaneously ensuring adequate regulatory coverage of total FICU assets. It specifically requests comment, however, on whether such asset thresholds are appropriate for this rule. It also seeks comment on whether NCUA should use a specific liquidity risk measure—such as the ELR—to further distinguish among FICUs with the most significant liquidity risk and should, in turn, use those levels to determine the scope of the rule's application.

[6] A credit union's ELR is computed by dividing total deposits by the sum of cash plus investments less than one year. Deposits include all deposits and shares. Cash and investments less than one year include cash on hand, total cash on deposit, cash equivalents, and total investments less than one year.

While it is beyond the scope of this proposed rule, the Board is exploring whether certain Basel III [7] liquidity measures and monitoring tools should be incorporated into NCUA's supervisory expectations for the very largest credit unions, those over $500 million.[8] Basel III's proposed standards include, for example, the potential use of such measures as a liquidity coverage ratio and a net stable funding ratio. The standards also include liquidity monitoring tools to track maturity mismatches on the balance sheet, funding concentrations, and the amount of unencumbered assets available for secured borrowing. These measures and monitoring tools are designed to enhance the liquidity risk management framework and improve the banking sector's ability to absorb shocks arising from financial and economic stress. NCUA must similarly consider the impact that its very largest FICUs could have on the liquidity of the credit union system and the NCUSIF by virtue of their size, complexity, and potential interconnectedness. The Board requests comment on the costs and benefits of applying Basel III liquidity measures and monitoring tools to FICUs with assets over $500 million.

E. What did the commenters say in response to specific questions in the ANPR?

The ANPR asked commenters to address a number of specific questions. The questions and comments received are discussed below.

(1) What are the standards and provisions, along with associated considerations, that should accompany a requirement for federally insured credit unions to maintain access to backup federal liquidity sources for use in times of financial emergency and distressed economic circumstances? Should an NCUA requirement to maintain access to backup federal liquidity sources contain an exemption for credit unions under a certain asset threshold, and if so, what should that threshold be?

In response to this question, most commenters suggested that membership in a Federal Home Loan Bank (FHLB) should be an acceptable backup liquidity option. This is discussed further in the responses to Question (2) below.

Nine commenters stated that any liquidity requirement should contain an exemption for small credit unions. The Board agrees that regulatory burden needs to appropriately match the safety and soundness risks. As a result, the proposed rule imposes minimal new requirements on FICUs with less than $10 million in assets. For FICUs with between $10 million and $100 million in assets, the proposed rule only requires the development and maintenance of a CFP to address emergency liquidity shortfalls.

(2) Are there other sources of credit beyond the CLF and Discount Window the Board should consider as acceptable to satisfy the need for a backup federal liquidity source? For example, would a credit union's maintenance of a certain percentage of its assets in highly liquid (maturity of 90 days or less) Treasury securities satisfy the need? If so, what is the appropriate percentage? Also, how should NCUA ensure that these securities are available to be pledged or sold?

Forty-seven commenters stated that any emergency liquidity regulation should include the option of membership in a FHLB. However, two commenters explicitly stated that FHLB membership should *not* be included as an emergency liquidity option, arguing that the FHLBs do not serve as emergency liquidity providers.

The Board believes it is important to draw a distinction between ordinary funding and emergency liquidity. Well-diversified sources of external funding are central to sound liquidity risk management. FHLB membership is certainly one way a credit union can diversify to guarantee a smooth flow of funding for ordinary operations. Another key element of liquidity risk management, however, is reliable emergency funding. Institution-specific issues and market conditions can combine to quickly deplete a credit union's on-balance sheet liquidity reserve. In such situations, the Discount Window and the CLF stand ready to lend on pre-specified terms as long as a credit union meets minimal borrowing standards and possesses eligible collateral. The FHLBs can and do offer short-term loans, in addition to longer-term advances. The Board recognizes, however, that the FHLBs are private institutions which are not obligated, and may not be able, to meet emergency liquidity demands in the same way the Discount Window and CLF are statutorily designed to do. Accordingly, the Board has not included FHLB membership as an emergency liquidity option in the proposed rule. The Board notes, however, that FHLBs can provide valuable services to credit unions of all sizes and encourages credit unions to consider the merits of FHLB membership.

Several commenters stated that, rather than holding Treasury securities, FICUs should be able to demonstrate liquidity by holding cash, short-term marketable securities, certificates of deposit, saleable loans, and other similar assets. However, the commenters did not specify the percentage of a FICU's assets that should be maintained in liquid assets, saying that the amount would be different for each credit union and would depend on the makeup of the credit union's balance sheet. The Board generally disagrees that there are other assets apart from cash and short-term Treasury securities that, during a liquidity crisis, truly can be converted into cash quickly with minimal price impact. During the recent financial crisis, even seemingly highly liquid money market mutual funds temporarily could not easily be exchanged for cash and had to be stabilized with federal government guarantee programs.

The Board still believes that maintaining a portfolio of short-term Treasury securities remains an important source of funds to meet emergency liquidity demands. It encourages all FICUs to ensure that Treasury securities are readily available and not pledged or otherwise encumbered for some other purpose. However, the Board does not wish to impose a one-size-fits-all requirement on a FICU's portfolio of liquid assets. Instead, it encourages each FICU to determine its own appropriate level of liquid assets as part of its normal asset-liability and interest rate risk management programs. NCUA will evaluate all FICUs' liquidity in the normal course of examination and supervision reviews, including their contingency options for meeting unexpected or emergency needs. The Board believes that it is prudent for FICUs to have both a cushion of highly liquid assets on its balance sheet and access to contingent sources of liquidity, but it does not believe it is sound practice for larger credit unions to meet their emergency liquidity needs solely by holding highly liquid assets. A credit union may need to use its portfolio of highly liquid assets as collateral to secure an advance from contingency funding and/or emergency liquidity providers. The Board does not wish to limit the liquidity insurance of credit unions to their existing holdings of highly liquid assets, as these alone may be insufficient in a crisis. Accordingly,

[7] See Basel Committee on Banking Supervision, ''Basel III: International Framework for Liquidity Risk Measurement, Standards and Monitoring,'' Dec. 2010, available at *http://www.bis.org/publ/bcbs188.htm.*

[8] NCUA has previously imposed additional requirements on credit unions with assets of $500 million or greater. *See* 12 CFR 715.5, 715.6, 741.202; *see also* 77 FR 5155 (Feb. 2, 2012) (adding Appendix B to 12 CFR part 741, effective Sept. 30, 2012).

the proposed rule does not include Treasury securities as an option for demonstrating access to a backup liquidity source.

(3) How can CLF best play a role in the immediate term upon U.S. Central Bridge's wind down and over the long term in satisfying a credit union's need for a contingency liquidity source? How should that role be executed? Are changes to the CLF statute to modernize the way the CLF functions over the long term warranted, and if so what changes should be pursued? For example, should the CLF function more like the Discount Window?

Some commenters questioned the value of the CLF, while others argued for its ongoing utility. The Board believes the CLF will continue to serve as an important emergency funding source for FICUs and is including it as an optional liquidity backstop in the proposed rule.

(4) What is the best way for credit unions to access CLF (e.g., either directly or through an agent)? Should corporate credit unions continue to play a role and, if so, to what extent should they be encouraged to purchase CLF stock as agents for natural person credit unions?

Six commenters were in favor of corporates continuing to act as CLF agents for natural person credit unions, and six were opposed. Of those who were opposed, several stated that the corporates cannot afford to recapitalize the CLF.

The Board understands that many corporates cannot afford to purchase stock for all member credit unions, as required by the FCU Act and NCUA regulations. *See* 12 U.S.C. 1757c(b)(2); 12 CFR 725.4(a)(2). However, as discussed more fully below, the Board believes that corporates, independent of agent membership, can still facilitate natural person credit union membership in the CLF by acting as advisors and financial intermediaries for credit unions that wish to join the facility directly.

II. Proposed Rule

A. How would the proposed rule affect FICUs with less than $10 million in assets?

The Board is proposing to add new § 741.12 to part 741, to be titled ''Access to Emergency Liquidity.'' The requirement for FICUs under $10 million, set forth in paragraph (a), is to maintain a basic written policy that provides a credit union board-approved framework for managing liquidity and a list of contingent liquidity sources that can be employed under adverse circumstances. However, the Board encourages such FICUs to follow all of the liquidity risk management guidance in the Liquidity Policy Statement, including having a fully developed CFP to address emergency liquidity shortfalls. A basic liquidity policy involves merely specifying an overall approach to managing an institution's liquidity risk. Such a policy establishes liquidity measures and associated benchmarks, a reporting requirement to keep the board apprised of the institution's liquidity position, and a contingent source, or sources, of funding, such as a corporate credit union or correspondent bank. In contrast, a fully developed CFP also provides for evaluation of liquidity stress scenarios, outlines specific actions to be taken and specific sources of liquidity in emergency liquidity events, and provides for periodic testing of contingent liquidity sources. Specific features of a sound CFP appear in paragraph (d) of new § 741.12. As the Liquidity Policy Statement notes, failure to maintain an adequate liquidity risk management process raises safety and soundness concerns. *See* 75 FR 13656, 13660 (Mar. 22, 2010).

B. How would the proposed rule affect FICUs with $10 million to $100 million in assets?

Paragraph (b) of new § 741.12 requires any FICU with assets of at least $10 million to have a fully developed, written CFP that clearly sets out strategies for addressing liquidity shortfalls in emergency situations. Paragraph (d) of the new section details the requirements of a CFP.

C. How would the proposed rule affect FICUs with $100 million or more in assets?

In addition to the requirement to have a written CFP, paragraph (c) of new § 741.12 would require any FICU with assets of $100 million or more to ensure it has immediate, established access to a federal backup liquidity source. The proposed rule provides that a FICU could demonstrate access by any one of the following three ways:

(1) *Becoming a regular member of the CLF.* The FCU Act and NCUA regulations establish the requirements for regular CLF membership. *See* 12 U.S.C. 1795c(a); 12 CFR 725.3. The primary requirement is subscribing to CLF capital stock in an amount not less than one half of one percent of the credit union's unimpaired capital and surplus. The Board believes that there are instances in which natural person credit unions are willing and financially able to become regular members, but may be discouraged by the administrative requirements of regular membership and the provisions of the CLF Repayment, Security, and Credit Reporting Agreement governing extensions of credit. The Board notes that, pursuant to the authority of corporate credit unions to provide liquidity-related services to their members,[9] and in accordance with procedures established by the Board, corporates may facilitate natural person credit unions becoming regular CLF members. For example, a corporate may perform services such as assisting with applications of credit, serving as a collateral custodian and administrator, and assisting with credit reporting requirements. The Board recognizes that some credit unions that rely on their corporate for correspondent activities would benefit if such activities included an arrangement designed to simplify understanding and compliance with facility requirements and assist with advances of credit before and after a liquidity-need application is approved by CLF.[10]

(2) *Becoming a member of the CLF through an Agent.* As noted above, for a corporate to serve as a CLF agent, it must subscribe to CLF stock for all of its members that are not regular CLF members.

(3) *Establishing borrowing access through the Discount Window.* The Discount Window serves all depository institutions that meet eligibility requirements established by Federal Reserve regulations.[11] To gain access to the Discount Window, the Federal Reserve requires specific agreements to be executed. Information regarding these agreements, as set forth in Operating Circular No. 10, and Discount Window operation can be found at *www.frbdiscountwindow.org.*

D. How would the proposed rule work?

Credit unions' assets can grow and shrink rapidly, and a particular FICU's assets may cross the $10 million or $100 million threshold repeatedly over a short period of time. In light of this fluctuation, paragraph (e) of the

[9] *See* 12 CFR 704.12(a)(5).

[10] A corporate acting as a CLF correspondent would *not* be an agent member of the CLF within the meaning of 12 U.S.C. 1795c(b) or 12 CFR 725.4, as it would not subscribe to CLF stock for its members. For a natural person credit union to be a regular member of the CLF, it must subscribe to CLF stock.

[11] Any depository institution holding liabilities potentially subject to reserve requirements under Federal Reserve regulations can establish access to the Discount Window. Such ''reserveable liabilities'' include transaction accounts and nonpersonal time deposits. For most credit unions, share draft accounts would be the principal reserveable liability.

proposed rule provides that a FICU is subject to the requirements of a higher asset category when two consecutive Call Reports show its assets to be in that higher category. A FICU will then have 120 days from the effective date of that second Call Report to meet the triggered requirements.

III. Regulatory Procedures

a. Regulatory Flexibility Act

The Regulatory Flexibility Act requires NCUA to prepare an analysis to describe any significant economic impact any proposed regulation may have on a substantial number of small entities (those under $10 million in assets). The proposed rule requires small FICUs to establish a basic liquidity policy, a best practice for every depository institution. Since the policy should require only modest effort, it will not have a significant economic impact on a substantial number of small credit unions.

b. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (PRA) applies to rulemakings in which an agency by rule creates a new paperwork burden on regulated entities or modifies an existing burden. 44 U.S.C. 3507(d); 5 CFR part 1320. For purposes of the PRA, a paperwork burden may take the form of a reporting, recordkeeping, or disclosure requirement, each referred to as an information collection.

NCUA has determined the proposed requirement that credit unions under $10 million in assets maintain a basic written liquidity policy will require some institutions to formalize liquidity risk management procedures. NCUA conservatively estimates that all 2,475 credit unions under $10 million in total assets may have to formalize their liquidity risk policies and that this task should take approximately 8 hours per credit union. The expected burden of the requirement is: 2,475 FICUs x 8 hours = 19,800 hours.

NCUA has further determined the proposed requirement to establish and document a CFP constitutes an information collection requirement but that, because of the Liquidity Policy Statement, approximately 610 out of 3,110 (or 20%) of FICUs with assets of at least $10 million will already have established such a plan. NCUA estimates that 2,500 FICUs will have to develop a written CFP and that the task should take a FICU approximately 24 hours. The expected burden of the requirement is: 2,500 FICUs × 24 hours = 60,000 hours.

NCUA has also determined the proposed requirement to either become a member of the CLF or establish borrowing access through the Federal Reserve's Discount Window creates a new information collection requirement. There are 1,434 FICUs with assets of at least $100 million, 1,048 of which are not currently regular members of CLF and/or do not report having established Discount Window access. NCUA estimates that it should take a FICU approximately 4 hours to complete the necessary paperwork to establish either CLF or Discount Window access. The expected burden of the requirement is: 1,048 FICUs × 4 hours = 4,192 hours.

While the proposed regulation provides the option of establishing CLF membership through an agent, NCUA estimates that no corporates will opt to be agent members at this time and, therefore, no FICUs will establish membership in this manner.

Summary of Collection Burden

Written Liquidity Policy: 2,475 FICUs × 8 hours = 19,800 hours.

CFP: 2,500 FICUs × 24 hours = 60,000 hours.

Regular CLF membership or Discount Window borrowing access: 1,048 FICUs × 4 hours = 4,192 hours.

Total Burden Hours: 83,992 hours.

As required by the PRA, NCUA is submitting a copy of this proposal to OMB for its review and approval. Persons interested in submitting comments with respect to the information collection aspects of the proposed rule should submit them to OMB at the address noted below.

The NCUA considers comments by the public on this proposed collection of information in:

- Evaluating whether the proposed collection of information is necessary for the proper performance of the functions of the NCUA, including whether the information will have a practical use;
- Evaluating the accuracy of the NCUA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhancing the quality, usefulness, and clarity of the information to be collected; and
- Minimizing the burden of collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology; *e.g.,* permitting electronic submission of responses.

The Paperwork Reduction Act requires OMB to make a decision concerning the collection of information contained in the proposed regulation between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication. This does not affect the deadline for the public to comment to the NCUA on the substantive aspects of the proposed regulation.

Comments on the proposed information collection requirements should be sent to: Office of Information and Regulatory Affairs, OMB, New Executive Office Building, Washington, DC 20503; Attention: NCUA Desk Officer, with a copy to Mary Rupp, Secretary of the Board, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314–3428.

c. Executive Order 13132

Executive Order 13132 encourages independent regulatory agencies to consider the impact of their actions on state and local interests. NCUA, an independent regulatory agency as defined in 44 U.S.C. 3502(5), voluntarily complies with the executive order to adhere to fundamental federalism principles. The proposed rule would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. NCUA has determined that this proposal does not constitute a policy that has federalism implications for purposes of the executive order.

d. Assessment of Federal Regulations and Policies on Families

The NCUA has determined that this proposed rule will not affect family well-being within the meaning of § 654 of the Treasury and General Government Appropriations Act, 1999, Public Law 105–277, 112 Stat. 2681 (1998).

List of Subjects in 12 CFR Part 741

Credit, Credit unions, Reporting and recordkeeping requirements.

By the National Credit Union Administration Board on July 24, 2012.

Mary F. Rupp,

Secretary of the Board.

For the reasons stated above, the National Credit Union Administration proposes to amend 12 CFR part 741 as follows:

PART 741—REQUIREMENTS FOR INSURANCE

1. The authority citation for part 741 continues to read as follows:

Authority: 12 U.S.C. 1757, 1766(a), 1781–1790, and 1790d; 31 U.S.C. 3717.

2. Amend part 741 by adding a new § 741.12 to read as follows:

* * * * *

§ 741.12 Access to Emergency Liquidity.

(a) Any credit union insured pursuant to Title II of the Act which has assets of less than $10 million must maintain a basic written policy that provides a credit union board-approved framework for managing liquidity and a list of contingent liquidity sources that can be employed under adverse circumstances.

(b) Any credit union which is insured pursuant to Title II of the Act which has assets of $10 million or more must establish and document a contingency funding plan (CFP) that meets the requirements of paragraph (d).

(c) In addition to the requirement specified in paragraph (b) to establish and maintain a CFP, any credit union which is insured pursuant to Title II of the Act and which has assets of $100 million or more must establish and document access to at least one contingent federal liquidity source for use in times of financial emergency and distressed economic circumstances. Credit unions must conduct advance planning and periodic testing to ensure that contingent funding sources are readily available when needed. A credit union may demonstrate access to a contingent federal liquidity source by:

(1) Maintaining Regular membership in the Central Liquidity Facility (Facility), as described in part 725 of this chapter;

(2) Maintaining membership in the Facility through an Agent, as described in part 725 of this chapter; or

(3) Establishing borrowing access at the Federal Reserve Discount Window.

(d) CFP. A credit union must have a written CFP commensurate with its complexity, risk profile, and scope of operations that sets out strategies for addressing liquidity shortfalls in emergency situations. The CFP may be a separate policy or may be incorporated into an existing policy such as an asset/liability policy, a funds management policy, or a business continuity policy. The CFP must address, at a minimum, the following:

(1) The sufficiency of the institution's liquidity sources to meet normal operating requirements as well as contingent events;

(2) The identification of contingent liquidity sources;

(3) Policies to manage a range of stress environments, identification of some possible stress events, and identification of likely liquidity responses to such events;

(4) Lines of responsibility within the institution to respond to liquidity events;

(5) Management processes that include clear implementation and escalation procedures for liquidity events; and

(6) The frequency that the institution will test and update the plan.

(e) A FICU is subject to the requirements of paragraphs (b) or (c) of this section when two consecutive Call Reports show its assets to be at least $10 million or $100 million, respectively. A FICU then has 120 days from the effective date of that second Call Report to meet the new requirements.

14 CFR Part 39

[Docket No. FAA–2012–0795; Directorate Identifier 2008–SW–53–AD]

RIN 2120–AA64

Airworthiness Directives; Eurocopter France Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for Eurocopter France (Eurocopter) Model AS332C, L, and L1 helicopters to require a one-time inspection of the main rotor head (MRH) swash-plate upper bearing (bearing) for a non-smooth point (friction point). This proposed AD is prompted by a report of the premature deterioration of the MRH bearing of the rotating star installed on a Model AS332L1 helicopter. The proposed actions are intended to detect deterioration of the MRH bearing and to prevent overloading the scissor links which drive the main rotor system, failure of the scissors links, and subsequent loss of control of the helicopter.

DATES: We must receive comments on this proposed AD by September 28, 2012.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Docket:* Go to *http://www.regulations.gov.* Follow the online instructions for sending your comments electronically.
- *Fax:* 202–493–2251.
- *Mail:* Send comments to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590–0001.
- *Hand Delivery:* Deliver to the ''Mail'' address between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket: You may examine the AD docket on the Internet at *http://www.regulations.gov* or in person at the Docket Operations Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the economic evaluation, any comments received, and other information. The street address for the Docket Operations Office (telephone 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

For service information identified in this proposed AD, contact American Eurocopter Corporation, 2701 Forum Drive, Grand Prairie, Texas 75053–4005; telephone (800) 232–0323; or at *http://www.eurocopter.com.* You may review the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

FOR FURTHER INFORMATION CONTACT: Gary Roach, Aviation Safety Engineer, Regulations and Policy Group, Rotorcraft Directorate, FAA, 2601 Meacham Blvd., Fort Worth, Texas 76137; telephone (817) 222–5110; email *gary.b.roach@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to participate in this rulemaking by submitting written comments, data, or views. We also invite comments relating to the economic, environmental, energy, or federalism impacts that might result from adopting the proposals in this document. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should send only one copy of written comments, or if comments are filed electronically, commenters should submit only one time.

We will file in the docket all comments that we receive, as well as a

report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, we will consider all comments we receive on or before the closing date for comments. We will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. We may change this proposal in light of the comments we receive.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Emergency AD No. 2008–0172–E, dated September 9, 2008 (EAD No. 2008–0172–E), for the Eurocopter Model AS 332 C, C1, L, and L1 helicopters, with an MRH, part number (P/N) 332A31–0001–05 or P/N 332A31–0001–06, having a serial number (S/N) of M172, M216, M261, M308, M547, M677, M811, or M936, and having ''logged less than 275 flight hours since the last overhaul or repair.'' EASA states that Eurocopter received a report of deterioration of an MRH bearing on an MRH that was installed on an AS 332 L1 helicopter. The AS 332 L1 helicopter had logged 72 flight hours since the last overhaul. The EASA states that there was an onset of vibrations in flight and these vibrations were due to premature deterioration of the upper bearing of the MRH swash-plate. They state that this condition, if not corrected, ''could lead to failure of the scissors links and consequently to the control loss of the helicopter.''

FAA's Determination

These helicopters have been approved by the aviation authority of the France and are approved for operation in the United States. Pursuant to our bilateral agreement with France, EASA, its technical representative, has notified us of the unsafe condition described in the EASA AD. We are proposing this AD because we evaluated all information provided by EASA and determined that an unsafe condition exists and is likely to exist or develop on other products of these same type designs.

Related Service Information

Eurocopter has issued one Emergency Alert Service Bulletin (EASB) with two different numbers, both Revision 0, and both dated September 8, 2008: EASB No. 62.00.73 for Model AS332C, L, and L1 helicopters and non-FAA type certificated Model C1 helicopters; and EASB No. 62.00.30 for non-FAA type certificated Model 532 UC, AC, UL, AL, SC, and UE military helicopters. EASB No. 62.00.73 specifies checking for the absence of a friction point in the MRH bearing. If there is no friction point, EASB No. 62.00.73 specifies checking the condition of the grease in the swash-plate assembly by lubricating the swash-plate, rotating it by hand, and determining if the expelled grease contains traces of metal particles. If the expelled grease does not contain traces of metal particles, EASB No. 62.00.73 specifies checking the swash-plate ''rotation torque'' using a spring scale. If the rotation torque is less than 5.5 kg, EASB No. 62.00.73 specifies checking the bearing for vertical play. If there is a friction point, the expelled grease contains traces of metal particles, the rotation torque is equal to or greater than 5.5 kg, or there is vertical play in the bearing, EASB No. 62.00.73 specifies removing the MRH and sending it to an approved repair station. EASA classified this EASB as mandatory and issued EAD No. 2008–0172–E to ensure the continued airworthiness of these helicopters.

Proposed AD Requirements

This proposed AD would require, within 5 hours time-in-service (TIS), for the specified model helicopters having less than 275 hours TIS since the last MRH overhaul, the following:

- Inspect the MRH bearing for a non-smooth point (friction point) by rotating the MRH swash-plate and:
  - If there is a friction point in the bearing, before further flight, replace the MRH with an airworthy MRH.
  - If there is not a friction point in the bearing, lubricate the MRH swash-plate and rotate it until grease is expelled; inspect the expelled grease for metal particles.
- If there is a metal particle in the grease, before further flight, replace the MRH with an airworthy MRH.
- If there is not a metal particle in the grease, measure the force required to rotate the MRH swash-plate using a spring scale attached to the pitch change rod attachment yokes.
  - If the force to rotate the MRH swash-plate is equal to or greater than 5.5 kg, before further flight, replace the MRH with an airworthy MRH.
  - If the force to rotate the MRH swash-plate is less than 5.5 kg, inspect the MRH swash-plate assembly for vertical play in the bearing. If there is vertical play in the bearing, before further flight, replace the MRH with an airworthy MRH.
- Before installing an MRH, P/N 332A31–0001–05 or P/N 332A31–001–06, with S/N M172, M216, M261, M308, M547, M561, M677, M811, M859, M935, M936, M938, or M942 on any helicopter, inspect the MRH in accordance with the requirements of this AD.

Differences Between This Proposed AD and the EASA AD

The EASA Emergency AD includes Model AS332C1 helicopters. This proposed AD does not include this model helicopter since it is not type certificated in the U.S. The EASA AD does not include S/Ns M561, M859, M935, M938, and M942, whereas this proposed AD does include those S/Ns. The EASA Emergency AD requires operators to comply with the requirements no later than the ''next last flight of the day.'' Our proposed AD would require the actions to be accomplished within 5 hours TIS. Also, the EASA Emergency AD is applicable to the specified helicopters having logged less than 275 flight hours since the last overhaul or repair, whereas our proposed AD would only be applicable to the specified helicopters having less than 275 hours TIS since the last overhaul of the MRH.

Costs of Compliance

We estimate that this proposed AD would affect 6 helicopters of U.S. registry. We estimate that operators may incur the following costs in order to comply with this AD. It would take approximately 1 work-hour per helicopter to accomplish the inspection of the MRH bearing for a friction point, inspection of the swash-plate grease for any metal particles, measurement of the swash-plate force to rotate, and inspection of the bearing for vertical play. It would take approximately 60 work-hours to replace the MRH. These proposed actions would be accomplished at an average labor rate of $85 per work-hour. We estimate the parts cost of replacing an MRH would be approximately $20,000. Based on these figures, we estimate the total cost of the proposed AD on U.S. operators to be $25,610, assuming that all affected helicopters are inspected and that one MRH in the fleet would need to be replaced.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that

section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared an economic evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by Reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Eurocopter France (Eurocopter): Docket No. FAA–2012–0795; Directorate Identifier 2008–SW–53–AD.

(a) Applicability

This AD applies to Eurocopter Model AS332C, L, and L1 helicopters with a main rotor head (MRH), part number (P/N) 332A31–0001–05 or P/N 332A31–0001–06, with a serial number (S/N) M172, M216, M261, M308, M547, M561, M677, M811, M859, M935, M936, M938, or M942 installed; having less than 275 hours time-in-service (TIS) since the last overhaul of the MRH; certificated in any category.

(b) Unsafe Condition

This AD defines the unsafe condition as deterioration of the MRH swash-plate upper bearing (bearing), which could result in overloading the scissor links which drive the main rotor system, failure of the scissors links, and subsequent loss of control of the helicopter.

(c) Compliance

You are responsible for performing each action required by this AD within the specified compliance time unless it has already been accomplished prior to that time.

(d) Required Actions

Within 5 hours TIS:

(1) Inspect the MRH bearing for a non-smooth point (friction point) by rotating the MRH swash-plate and:

(i) If there is a friction point in the bearing, before further flight, replace the MRH with an airworthy MRH.

(ii) If there is not a friction point in the bearing, lubricate the MRH swash-plate and rotate it until grease is expelled; inspect the expelled grease for metal particles.

(A) If there is a metal particle in the grease, before further flight, replace the MRH with an airworthy MRH.

(B) If there is not a metal particle in the grease, measure the force required to rotate the MRH swash-plate using a spring scale attached to the pitch change rod attachment yokes.

(*1*) If the force to rotate the MRH swash-plate is equal to or greater than 5.5 kg, before further flight, replace the MRH with an airworthy MRH.

(*2*) If the force to rotate the MRH swash-plate is less than 5.5 kg, inspect the MRH swash-plate assembly for vertical play in the bearing. If there is vertical play in the bearing, before further flight, replace the MRH with an airworthy MRH.

(2) Before installing an MRH, P/N 332A31–0001–05 or P/N 332A31–001–06, with S/N M172, M216, M261, M308, M547, M561, M677, M811, M859, M935, M936, M938, or M942 on any helicopter, inspect the MRH in accordance with paragraph (d)(1) of this AD.

(e) Alternative Methods of Compliance (AMOC)

(1) The Manager, Safety Management Group, FAA, may approve AMOCs for this AD. Send your proposal to: Gary Roach, Aviation Safety Engineer, Regulations and Policy Group, Rotorcraft Directorate, FAA, 2601 Meacham Blvd., Fort Worth, Texas 76137; telephone (817) 222–5110; email *gary.b.roach@faa.gov.*

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, we suggest that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or certificate holding district office before operating any aircraft complying with this AD through an AMOC.

(f) Additional Information

(1) Eurocopter Emergency Alert Service Bulletin, No. 62.00.73, Revision 0, dated September 8, 2008, which is not incorporated by reference, contains additional information about the subject of this AD. For this service information, contact American Eurocopter Corporation, 2701 Forum Drive, Grand Prairie, Texas 75053–4005; telephone (800) 232–0323; or at *http://www.eurocopter.com.* You may review this service information at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

(2) The subject of this AD is addressed in the European Aviation Safety Agency (France) Emergency AD No. 2008–0172–E, dated September 9, 2008.

(g) Subject

Joint Aircraft Service Component (JASC) Code: 6400,Tail Rotor System.

Issued in Fort Worth, Texas, on July 20, 2012.

Kim Smith,

Manager, Rotorcraft Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2012–0798; Directorate Identifier 2012–CE–023–AD]

RIN 2120–AA64

Airworthiness Directives; Alpha Aviation Concept Limited Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for Alpha Aviation Concept Limited Model R2160 Airplanes. This proposed AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as possible installation of non-conforming air filter elements that are not fitted with metallic mesh and could internally collapse resulting in

disruption of the powerplant operation. We are issuing this proposed AD to require actions to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by September 13, 2012.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Alpha Aviation, 59 Hautapu Road, RD 1, Cambridge 3493, New Zealand; telephone: +64 7 827 0528; fax: +64 7 929 2878; Internet: *www.alphaaviation.co.nz.* You may review copies of the referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Karl Schletzbaum, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4146; fax: (816) 329–4090; email: *karl.schletzbaum@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2012–0798; Directorate Identifier 2012–CE–023–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

The Civil Aviation Authority (CAA), which is the aviation authority for New Zealand, has issued DCA/R2000/41, dated June 8, 2012 (referred to after this as ''the MCAI''), to correct an unsafe condition for the specified products. The MCAI states:

> This emergency AD with the effective date 11 June 2012 is prompted by a report from EASA of finding a non conforming air filter fitted to an overseas aircraft during maintenance. Investigation revealed that air filters with P/N 57.34.00.010 supplied by CEAPR between June 2009 and April 2012 may not have the metallic mesh inside the filter. This AD mandates an inspection of air filters with P/N 57.34.00.010 to determine if a metallic mesh is fitted.

Relevant Service Information

Alpha Aviation has issued Service Bulletin AA–SB–71–006, dated May 2012. The actions described in this service information are intended to correct the unsafe condition identified in the MCAI.

FAA's Determination and Requirements of the Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with this State of Design Authority, they have notified us of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all information and determined the unsafe condition exists and is likely to exist or develop on other products of the same type design.

Costs of Compliance

We estimate that this proposed AD will affect 10 products of U.S. registry. We also estimate that it would take about .5 work-hour per product to comply with the basic requirements of this proposed AD. The average labor rate is $85 per work-hour.

Based on these figures, we estimate the cost of the proposed AD on U.S. operators to be $425, or 42.50 per product.

In addition, we estimate that any necessary follow-on actions would take about .5 work-hour and require parts costing $100 for a cost of $142.50 per product. We have no way of determining the number of products that may need these actions.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new AD:

Alpha Aviation Concept Limited: Docket No. FAA–2012–0798; Directorate Identifier 2012–CE–023–AD.

(a) Comments Due Date

We must receive comments by September 13, 2012.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Alpha Aviation Concept Limited Model R2160 airplanes, all serial numbers, certificated in any category.

(d) Subject

Air Transport Association of America (ATA) Code 71, Power Plant.

(e) Reason

This AD was prompted by reports of possible installation of non-conforming air filter elements that are not fitted with metallic mesh and could internally collapse resulting in disruption of the powerplant operation. We are issuing this proposed AD to inspect the air filter element and replace if applicable.

(f) Actions and Compliance

Unless already done, do the following actions following Alpha Aviation Service Bulletin AA–SB–71–006, dated May 2012:

(1) Within the next 30 days time-in-service (TIS) after the effective date of this AD, inspect the air filter part number (P/N) 57.34.00.010 to determine if it has been fitted with a perforated metal liner.

(2) If, after the inspection required in paragraph (f)(1) of this AD, the air filter part number (P/N) 57.34.00.010 is found to include the perforated metal liner, no further action is required.

(3) If, after the inspection required in paragraph (f)(1) of this AD, the air filter is found to not contain the perforated metal liner, before further flight, replace the air filter with a new air filter P/N 57.34.00.010 that does contain the perforated metal liner.

(4) After the effective date of this AD, do not install any air filter P/N 57.34.00.010 that does not have the perforated metal liner depicted in Alpha Aviation Service Bulletin AA–SB–71–006, dated May 2012.

(g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Karl Schletzbaum, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4146; fax: (816) 329–4090; email: *karl.schletzbaum@faa.gov.* Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements:* For any reporting requirement in this AD, a federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120–0056. Public reporting for this collection of information is estimated to be approximately 5 minutes per response, including the time for reviewing instructions, completing and reviewing the collection of information. All responses to this collection of information are mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at: 800 Independence Ave. SW., Washington, DC 20591, Attn: Information Collection Clearance Officer, AES–200.

(h) Related Information

Refer to MCAI DCA/R2000/41 issued by the Civil Aviation Authority (CAA), which is the aviation authority for New Zealand, dated June 8, 2012; and Alpha Aviation Service Bulletin AA–SB–71–006, dated May 2012, for related information. For service information related to this AD, contact Alpha Aviation, 59 Hautapu Road, RD 1, Cambridge 3493, New Zealand; telephone: +64 7 827 0528; fax: +64 7 929 2878; Internet: *www.alphaaviation.co.nz.* You may review copies of the referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148.

Issued in Kansas City, Missouri, on July 24, 2012.

James Jackson,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Eurocopter France Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for Eurocopter France (Eurocopter) Model AS350B3 and EC130B4 helicopters. This proposed AD would require revising the Limitations section of the Rotorcraft flight Manual (RFM) to reduce the starter generator operating current to 180 amperes (amps) and installing a placard in the instrument panel indicating the revised limitation. This proposed AD is prompted by the determination that the manufacturer-installed Aircraft Parts Corporation (APC) starter generator has exceeded the shaft horse power extractions allowed for Turbomeca engines. The proposed actions are intended to prevent the engine surge margin being reduced, which can result in engine failure.

DATES: We must receive comments on this proposed AD by September 28, 2012.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Docket:* Go to *http://www.regulations.gov*. Follow the online instructions for sending your comments electronically.
- *Fax:* 202–493–2251.
- *Mail:* Send comments to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to the ''Mail'' address between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket: You may examine the AD docket on the Internet

at *http://www.regulations.gov* or in person at the Docket Operations Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the economic evaluation, any comments received, and other information. The street address for the Docket Operations Office (telephone 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

For service information identified in this proposed AD, contact American Eurocopter Corporation, 2701 Forum Drive, Grand Prairie, TX 75053–4005, telephone (800) 232–0323, fax (972) 641–3710, or at *http://www.eurocopter.com.* You may review copies of the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

FOR FURTHER INFORMATION CONTACT: Chinh Vuong, Aviation Safety Engineer, FAA, Rotorcraft Directorate, Safety Management Group, 2601 Meacham Blvd., Fort Worth, Texas 76137, telephone (817) 222–5110, fax (817) 222–5961, email *chinh.vuong@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to participate in this rulemaking by submitting written comments, data, or views. We also invite comments relating to the economic, environmental, energy, or federalism impacts that might result from adopting the proposals in this document. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should send only one copy of written comments, or if comments are filed electronically, commenters should submit only one time.

We will file in the docket all comments that we receive, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, we will consider all comments we receive on or before the closing date for comments. We will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. We may change this proposal in light of the comments we receive.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued AD No. 2006–0337, dated November 7, 2006, to correct an unsafe condition for the Eurocopter Model AS350B3 and EC130B4 helicopters. EASA advises that the power drawn by an APC 200 amps starter generator from the engine is above the consumption capacity for the specified Eurocopter model helicopters. Excessive power consumption of the starter generator reduces the engine surge margin, which can result in engine failure.

FAA's Determination

These helicopters have been approved by the aviation authority of France and are approved for operation in the United States. Pursuant to our bilateral agreement with France, EASA, its technical representative, has notified us of the unsafe condition described in its AD. We are proposing this AD because we evaluated all known relevant information and determined that an unsafe condition is likely to exist or develop on other products of these same type designs.

Related Service Information

Eurocopter has issued Alert Service Bulletins (ASBs) No. 01.00.57 for the Model AS350B3 helicopters and No. 04A002 for the Model EC130B4 helicopters. Both ASBs are Revision 1 and both are dated September 14, 2006. The ASBs specify defining the limitation for the APC 200-amp starter generator. EASA classified these ASBs as mandatory and issued AD No. 2006–0337, dated November 7, 2006, to ensure the continued airworthiness of these helicopters.

Proposed AD Requirements

This proposed AD would require, within the next 100 hours time-in-service (TIS), revising the Limitations section of the RFM to reduce the starter generator rating to 180 amps and installing a placard on the instrument panel below the vehicle engine multifunction display indicating the starter generator reduced limitation: ''MAXIMUM CONTINUOUS GENERATOR LOAD 180A.''

Differences Between This Proposed AD and the EASA AD

We would require that this proposed AD be accomplished within 100 hours TIS, rather than 110 flight hours or 12 months as stated in the EASA AD.

Costs of Compliance

We estimate that this proposed AD would affect 363 helicopters of U.S. registry. We estimate that operators may incur the following costs in order to comply with this AD: It would cost $21.25, assuming it takes 15 minutes to revise the RFM and install a placard on the instrument panel of each helicopter at an average labor rate of $85 per work hour, or $7,714 for the fleet.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared an economic evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new Airworthiness Directive (AD):

Eurocopter France: Docket No. FAA–2012–0794; Directorate Identifier 2006–SW–04–AD.

(a) Applicability

This AD applies to Model AS350B3 and EC130B4 helicopters with an Aircraft Parts Corporation (APC) 200-ampere (amp) starter generator, part number (P/N) 200SGL130Q, installed, certificated in any category.

(b) Unsafe Condition

This AD defines the unsafe condition as excessive power consumption of the starter generator, which reduces the engine surge margin. This condition could result in engine failure and subsequent loss of control of the helicopter.

(c) Compliance

You are responsible for performing each action required by this AD within the specified compliance time unless it has already been accomplished prior to that time.

(d) Required Actions

Within the next 100 hours time-in-service:

(1) Revise Paragraph 2, Limitations, of the Rotorcraft Flight Manual (RFM) Supplement 29 to reduce the maximum current of the starter generator to 180 amps Max. continuous.

(2) Install a placard, 125 millimeters long by 10 millimeters wide, on the instrument panel below the vehicle engine multifunction display indicating the starter generator reduced limitation: ''MAXIMUM CONTINUOUS GENERATOR LOAD = 180A.''

(e) Alternative Methods of Compliance (AMOC)

(1) The Manager, Safety Management Group, Rotorcraft Directorate, FAA, may approve AMOCs for this AD. Send your proposal to: Chinh Vuong, Aviation Safety Engineer, FAA, Rotorcraft Directorate, Safety Management Group, 2601 Meacham Blvd., Fort Worth, Texas 76137, telephone (817) 222–5110, fax (817) 222–5961, email *chinh.vuong@faa.gov*.

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, we suggest that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or certificate holding district office before operating any aircraft complying with this AD through an AMOC.

(f) Additional Information

(1) Eurocopter Alert Service Bulletins No. 01.00.57 and No. 04A002, both Revision 1, and both dated September 14, 2006, which are not incorporated by reference, contain additional information about the subject of this AD. For service information identified in this AD, contact American Eurocopter Corporation, 2701 Forum Drive, Grand Prairie, TX 75053–4005, telephone (800) 232–0323, fax (972) 641–3710, or at *http://www.eurocopter.com*. You may review copies of the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

(2) The subject of this AD is addressed in European Aviation Safety Agency AD No. 2006–0337, dated November 7, 2006.

(g) Subject

Joint Aircraft Service Component (JASC) Code: Starter-Generator 2435.

Issued in Fort Worth, Texas, on July 20, 2012.

Kim Smith,

Manager, Rotorcraft Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Chapter I

[Docket No. FAA–2012–0754]

Airport Improvement Program (AIP): Policy Regarding Access to Airports From Residential Property

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Proposed policy; implementation of Section 136; opportunity to comment.

SUMMARY: This action proposes a policy, based on Federal law, concerning through-the-fence access to a federally obligated airport from an adjacent or nearby property, when that property is used as a residence. This proposed policy limits application of the FAA's previously published interim policy (76 FR 15028; March 18, 2011) to commercial service airports that certified existing residential through-the-fence access agreements. In addition, this notice proposes to rescind applicability of the interim policy with regard to certain general aviation airports consistent with section 136 of Public Law 112–95 and describes how the FAA will interpret provisions of this law pertaining to residential through-the-fence access.

When the FAA adopted its interim policy on access to airports from residential property, the FAA announced its intent to initiate another policy review in 2014. This supplemental policy review will no longer be necessary.

DATES: Send your comments on or before August 29, 2012. The FAA will consider comments on the proposed policy and its proposed implementation of Section 136 of Public Law 112–95. Any necessary or appropriate revisions resulting from the comments received will be adopted as of the date of a subsequent publication in the **Federal Register**.

ADDRESSES: You may send comments [identified by Docket Number FAA–2012–XXX] using any of the following methods:

- *Government-wide rulemaking Web site:* Go to *http://www.regulations.gov* and follow the instructions for sending your comments electronically.
- *Mail:* Docket Operations, U.S. Department of Transportation, West Building, Ground Floor, Room W12–140, Routing Symbol M–30, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Fax:* 1–202–493–2251.
- *Hand Delivery:* To Docket Operations, Room W12–140 on the ground floor of the West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For more information on the notice and comment process, see the **SUPPLEMENTARY INFORMATION** section of this document.

Privacy: We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. For more information, see the Privacy Act discussion in the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: To read background documents or comments received, go to *http://www.regulations.gov* at any time or to Room W12–140 on the ground floor of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Randall S. Fiertz, Director, Office of Airport Compliance and Management Analysis, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591, telephone (202) 267–3085; facsimile: (202) 267–5257.

SUPPLEMENTARY INFORMATION:

Privacy: We will post all comments we receive, without change, to *http://www.regulations.gov*, including any personal information you provide. Using the search function of our docket Web site, anyone can find and read the comments received into any of our dockets, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78).

Availability of Documents

You can get an electronic copy of this proposed policy and all other documents in this docket using the Internet by:

(1) Searching the Federal eRulemaking portal (*http://www.regulations.gov/search*);

(2) Visiting the FAA's Regulations and Policies Web page at *http://www.faa.gov/regulations_policies*; or

(3) Accessing the Government Printing Office's Web page at *http://www.gpoaccess.gov/index.html.*

You can also get a copy by sending a request to the Federal Aviation Administration, Office of Airport Compliance and Management Analysis, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267–3085. Make sure to identify the docket number, notice number, or amendment number of this proceeding.

Authority for the Policy

This notice is published under the authority described in Subtitle VII, part B, chapter 471, section 47122 of title 49 United States Code.

Background

On September 30, 2009, the FAA issued FAA Order 5190.6B, the Airport Compliance Manual. This order contains policy guidance for agency employees monitoring airport sponsor compliance with the grant assurances. Agency guidance that preceded Order 5190.6B discouraged through-the-fence access at airports with grant obligations, and Order 5190.6B contained specific objections to residential through-the-fence access based on more recent agency experiences. Order 5190.6B did not prescribe any specific actions to be taken by airport sponsors with residential through-the-fence access agreements and created ambiguity with regard to the future of these arrangements. The FAA accepted public comments on FAA Order 5190.6B after it was published. Comments received from interested airport sponsors, homeowners, and other parties urged the agency to reconsider its views on residential through-the-fence agreements.

In 2010, the FAA's Office of Airport Compliance initiated a policy review which included the review of written comments, meetings with state aviation officials, visits to airports with residential through-the-fence access, listening sessions with homeowners and homeowners' associations, and discussions with aviation membership associations. The FAA published a proposed revision in agency policy on residential through-the-fence access for public comment in September 2010 (75 FR 54946; September 9, 2010).

In March 2011, the FAA announced the adoption of an interim policy *Airport Improvement Program (AIP): Interim Policy Regarding Access to Airports From Residential Property* (76 FR 15028; March 18, 2011). The interim policy modified sponsor Grant Assurance 5, *Preserving Rights and Powers,* to prohibit new residential through-the-fence access to a federally-obligated airport. The interim policy also required airport sponsors to certify their status with regard to the policy, depict existing access points on the airport layout plan, and develop access plans outlining how the airport sponsor meets certain standards related to the sponsor assurances. When the interim policy was adopted, the FAA announced its intent to initiate another policy review of residential through-the-fence access to federally-obligated airports in 2014.

Since adopting the interim policy, 125 federally-obligated airport sponsors have certified their status as having existing residential through-the-fence access agreements. The 125 locations include four commercial service airports, seven privately-owned reliever airports, and 114 general aviation airports.

On February 14, 2012, the FAA Modernization and Reform Act of 2012 (FMRA) was signed into law (Pub. L. 112–95). Section 136 of this law permits general aviation airports, as defined by the statute, to enter into residential through-the-fence agreements with property owners or associations representing property owners. This must be a written agreement that requires the property owner to:

- Pay access charges that the sponsor determines to be comparable to those fees charged to tenants and operators on-airport making similar use of the airport;
- Bear the cost of building and maintaining the infrastructure the sponsor determines is necessary to provide access to the airfield from property located adjacent to or near the airport;
- Maintain the property for residential, noncommercial use for the duration of the agreement;
- Prohibit access to the airport from other properties through the property of the property owner; and
- Prohibit any aircraft refueling from occurring on the property.

In order to implement this law, the FAA amended the sponsor assurances (77 FR 22376; April 13, 2012). Among the modifications, sponsor assurance 5(g) was redrafted to clarify that sponsors of commercial service airports are not permitted to enter into residential through-the-fence arrangements. However, sponsors of general aviation airports may enter into such an arrangement if the airport sponsor complies with the requirements of section 136 of Public Law 112–95 and the sponsor assurances. In addition, sponsor assurance 29, *Airport Layout Plan,* was amended to require all proposed and existing access points used to taxi aircraft across the airport property boundary be depicted on the airport layout plan (ALP).

A complete list of the current grant assurances can be viewed at: *http://www.faa.gov/airports/aip/grant_assurances/*

The FAA is proposing its interpretation of the FMRA's section 136 and seeks public comment on this interpretation. In light of the public comment period, the FAA's implementing guidance remains in draft form. The agency will refrain from finalizing its implementing guidance until after a final policy is published in a subsequent public notice. As a result, the FAA will not approve any ALPs depicting new residential through-the-fence access points until final guidance has been issued. The FAA will proceed in a timely manner to address public comments and will not unduly delay final agency action with regard to section 136 of the FMRA.

FAA's Interpretation of the FMRA's Section 136

Enforcement

Section 136 permits sponsors of general aviation airports, as defined by the statute at 49 U.S.C. 47102(8), to enter into agreements granting through-the-fence access to residential users, but includes specific terms and conditions. The FAA interprets the inclusion of specific terms and conditions as Congress' intent for the FAA to enforce the provision accordingly. Therefore,

the FAA will request sponsors with existing residential through-the-fence agreements to demonstrate their compliance with the law. Additionally, the FAA will also request sponsors of general aviation airports proposing to establish new residential through-the-fence agreements to demonstrate that their agreements will comply with the law. Airport sponsors are encouraged to review the FAA's Compliance Guidance Letter on FAA Review of Existing and Proposed Residential Through-Fence-Access Agreements, which will be issued in draft form concurrently with this notice.

Although the law became effective on February 14, 2012, the FAA will afford airport sponsors a grace period for compliance. Airport sponsors with existing residential through-the-fence agreements must provide evidence of compliance not later than September 30, 2013. In most cases, the FAA will define evidence of compliance as the airport sponsor's submission of required documentation. This may include copies of access agreements, deeds, covenants, conditions, and restrictions, etc.

Airport sponsors of general aviation airports proposing to establish new or add new residential through-the-fence agreements must provide evidence of compliance prior to executing an agreement with a residential user and/or association representing residential users. The establishment of a new residential through-the-fence agreement which does not comply with the law or results in a violation of the sponsor's commitments with the Federal Government may result in enforcement proceedings under 14 Code of Federal Regulations (CFR) part 16.

The FAA acknowledges that its approach to sponsors with existing residential through-the-fence access agreements will be different than the posture to be taken with sponsors of general aviation airports proposing to establish new or add new residential through-the-fence agreements. This is because airport sponsors with existing agreements may have ceded important rights and powers through the execution of these existing agreements, and their ability to comply with the terms and conditions of the law may be severely hampered. The FAA intends to address such situations on a case-by-case basis, assist these airport sponsors in the development of appropriate mitigations when possible, and report these issues to interested Congressional Committees. Going forward, the FAA expects sponsors of general aviation airports proposing to establish new or add new residential through-the-fence agreements to comply with the terms and conditions of the law. The FAA will not waive these terms and conditions for new agreements.

Applicability

Section 136 applies to sponsors of general aviation airports. The FMRA adopted a definition of ''general aviation airport'' which is now codified at 49 U.S.C. 47102(8). A general aviation airport is defined as a public airport that is located in a State that, as determined by the Secretary, does not have commercial service or has scheduled service with less than 2,500 passenger boardings each year. This definition excludes privately-owned reliever airports. In implementing section 136, the FAA will grandfather the seven privately-owned reliever airports with existing residential through-the-fence access. The owners of these airports will be asked to comply with the law and be treated in a manner similar to general aviation airports as defined in the statute. However going forward, the FAA will apply the statutory prohibition on privately-owned reliever airports and disallow these airports from entering into such agreements. Publically-owned reliever airports are included in the statutory definition of a general aviation airport; sponsors of publically-owned reliever airports will be permitted to enter into residential through-the-fence agreements that comply with the terms and provisions contained in section 136.

The FAA proposes the policy included in this notice to address commercial service airports with existing residential through-the-fence agreements. Commercial service airports which do not currently have residential through-the-fence agreements continue to be prohibited from entering into such agreements by statute.

Terms and Conditions—Commercial Activities

Section 136 states that residential property owners must maintain their property for residential, noncommercial use for the duration of the agreement. The FAA interprets this as a prohibition on commercial aeronautical services offered by residential through-the-fence users that might compete with on-airport aeronautical service providers, whether existing or not, or chill the airport sponsor's ability to attract new commercial service providers on the airport. Therefore, in its review of agreements proposing to establish new residential through-the-fence access, the FAA will interpret this condition as a prohibition on commercial *aeronautical* activities only. Agreements which limit the scope of this prohibition to only commercial aeronautical activities will be acceptable. However, the FAA will not concern itself with unrelated commercial activities which may be permitted by local regulation.

The FAA recognizes that some existing residential through-the-fence agreements permit the co-location of homes and aeronautical businesses. In these cases, the FAA will require airport sponsors to execute two separate agreements with the homeowner. One agreement must address the duration, rights, and limitations of the homeowner's residential through-the-fence access, and the second agreement must address the conduct of the commercial aeronautical activity. The second agreement must be consistent with the FAA's current policies on commercial through-the-fence activities and ensure the off-airport business does not result in unjust economic discrimination for on-airport aeronautical service providers. The FAA encourages airport sponsors with these types of mixed-use arrangements to adopt long-term plans to relocate the off-airport commercial aeronautical activity onto the airport when feasible and practicable to do so. Going forward, airport sponsors proposing to establish a residential through-the-fence agreement must meet the statutory terms and conditions, including the prohibition on using the residential property for commercial aeronautical use. Therefore, agreements which propose the co-location or mixed-use of residential and commercial aeronautical activities will be not be consistent with the law.

Terms and Conditions—Authorized Access

Section 136 states that residential property owners must prohibit access to the airport from other properties through the property of the property owner with access. The FAA interprets this as a prohibition on unauthorized access to the airport; this condition does not necessarily prescribe a scenario in which all residential through-the-fence users must have their own dedicated access point to enter the airport. The FAA encourages sponsors of general aviation airports proposing to establish new residential through-the-fence agreements to limit the number of access points in a manner that is consistent with airport planning practices. Compliance with this condition will require access agreements stipulate that residential through-the-fence access agreement holders are prohibited from permitting unauthorized users (any individual not

party to an access agreement with the airport sponsor) to pass through or ''piggy back'' on their access in order to enter the airport. The FAA expects airport sponsors to establish their own policies, restrictions, and/or requirements to be imposed on fly-in guests who taxi from the airport property to visit off-airport residents.

Terms and Conditions—Fueling

Section 136 states that residential property owners must prohibit any aircraft refueling from occurring on the property with access. The FAA interprets this as a prohibition on the sale of fuel from residential property. The FAA will not concern itself with self-fueling activities which may be permitted by local regulation.

Proposed Final Policy on Existing Through-the-Fence Access to Commercial Service Airports From a Residential Property

Discussion of Revisions to the Interim Policy

In light of section 136 of Public Law 112–95, the FAA proposes the following revisions to the interim policy published on March 18, 2011 (76 FR 54946; September 9, 2010).

Proposed Policy

The law permits sponsors of general aviation airports to enter into residential through-the-fence agreements with property owners or associations representing property owners; however, the law is silent with regard to commercial service airports. The FAA interprets the absence of statutory relief as authority to finalize the interim policy for commercial service airports.

Changes: All references to the policy now clarify that it will be a final measure.

Applicability

The law permits publicly-owned general aviation airports, as defined by the statute, to enter into residential through-the-fence agreements that comply with specific terms and conditions. The FAA's proposed policy regarding access to airports from residential property will apply only to those commercial service airports with existing residential through-the-fence access.

Changes: The proposed policy now refers only to commercial service airports with existing residential through-the-fence access.

Incorporation of the Law

The proposed policy has been revised to incorporate the terms and conditions contained in section 136 of Public Law 112–95, as implemented by the FAA. As a result, the FAA will consider the airport sponsor's ability to establish parity in fees between on- and off-airport users as opposed to an airport sponsor's ability to generate revenue to recover airport costs. This reflects Congress' intent that residential through-the-fence users pay airport access charges that are comparable to those tenants and operators on-airport making similar use of the airport.

Changes: Section I, Section II, Section III, and Section IV now state that airport sponsors will be required to satisfy the law. Section II specifies the terms and conditions contained in the law which must also be satisfied by the airport sponsor. References to ''ability to generate revenue to recover airport costs'' have been replaced with ''parity of access fees''.

FAA's Standards for Compliance—Recovery of Costs of Operating the Airport

The law prescribes a single methodology for evaluating fees charged to residential through-the-fence users. Therefore, the FAA will not propose or consider alternative methodologies. The discussion of these methodologies has been replaced with language from the law.

Changes: References to ''recovery of costs of operating the airport'' have been replaced with ''parity of access fees'' in Section II. The interim policy's explanation of FAA's standard for compliance, which was the requirement for through-the-fence users to bear a fair proportion of airport costs, has been deleted.

Standards for Compliance at Commercial Service Airports Proposing To Extend Through-the-Fence Access

Section 136 of Public Law 112–95 prescribes specific terms and conditions to be contained in agreements establishing residential through-the-fence access. The FAA will require commercial service airports proposing to extend or renew their existing agreements to fully comply with these terms and conditions as a supplemental standard applied by the FAA to review these proposals. In addition, because the law requires residential through-the-fence users to pay access charges comparable to on-airport tenants and users making similar use of the airport, the FAA may no longer entertain alternative financial methodologies.

Changes: A bullet stating ''the new access agreement fully complies with the terms and conditions contained in section 136 of Public Law 112–95'' has been added as a supplemental standard discussed in Section III. The bullet discussing access fees which recover airport costs has been deleted.

Revision of Description of FAA Compliance Guidance Letter

The FAA anticipates issuing a draft Compliance Guidance Letter on FAA Review of Existing and Proposed Through-the-Fence Access Agreements. This title is slightly different than the title of the Compliance Guidance Letter previously issued on March 21, 2011.

Changes: The title ''FAA Implementation and Review of Residential Through-the-Fence Access Arrangements'' has been replaced with ''FAA Review of Existing and Proposed Through-the-Fence Access Agreements'' in Section IV. All references to this Compliance Guidance Letter describe this document as a draft.

Additional Time To Establish Evidence of Compliance and Clarification of Due Date

The FAA believes all airport sponsors with existing residential through-the-fence access should be afforded additional time to comply with the law. Therefore, the FAA is extending the timeframe for commercial service airports to establish evidence of compliance. All access plans will now be due beginning in Fiscal Year 2014.

Changes: All references to ''2013'' have been replaced with ''2014'' in Section IV and Section V. The explanation of the rolling due date contained in the interim policy has been deleted.

Incorporation of Amended Sponsor Assurance 29

On April 13, 2012, the FAA amended sponsor assurance 29 to require all proposed and existing access points used to taxi aircraft across the airport property boundary be depicted on the ALP (77 FR 22376; April 13, 2012). The FAA is incorporating the amended assurance by clarifying that failure to depict all residential through-the-fence access points is a violation of the sponsor's grant assurances.

Changes: The phrase ''may be considered an apparent violation of the sponsor's grant assurances'' has been replaced with ''is a violation of the sponsor's grant assurances'' in Section IV.

Actions Requiring Airport Sponsors To Update the Access Plan

The FAA believes its description of actions triggering airport sponsors to update its access plan can be better refined. In addition, the FAA believes that the identification of a safety

concern should be listed as a new triggering event.

Changes: The FAA proposes to define the actions requiring a commercial service airport sponsor to update its access plan to include development of a master plan or an update to an existing master plan, revisions to an ALP, requests for Federal participation in land acquisition, identification of a safety concern, or substantial changes to the access agreement in Section IV.

Airports Currently in Noncompliance

The interim policy included language discussing the treatment of airport sponsors currently in noncompliance due to grant assurance violations associated with their residential through-the-fence access agreements. No sponsors of commercial service airports are currently in noncompliance due to grant assurance violations associated with their residential through-the-fence access agreements. Therefore, the FAA proposes to eliminate this paragraph from Section IV and renumber the subsequent paragraphs.

Changes: The paragraph titled ''Airports in noncompliance'' and designated as paragraph A.5. in Section IV has been deleted. The paragraphs which follow have been renumbered accordingly.

Airports That Do Not Meet the Compliance Standards

In its interim policy, the FAA proposed to analyze the role played by airports unable to meet the standard of compliance prior to determining the course of action to take. This included determining the role played by the airport in the National Plan of Integrated Airport Systems (NPIAS). Given the more limited applicability of the proposed policy to commercial service airports with existing residential through-the fence access, this analysis is no longer required. The role played by commercial service airports is defined in statute. Instead, the FAA proposes to consider a commercial service airport sponsor's inability to comply with the law and/or the standards of compliance as a militating factor in the FAA's review of any requests for discretionary AIP funding.

Changes: Subparagraphs (a) and (b) of renumbered Section IV.A.5. have been deleted. The last sentence of paragraph (5) proposes that the FAA may consider a commercial service airport's inability to comply with the law and/or the minimum compliance standards as a militating factor in its review of requests for discretionary funding.

Proposed Final Policy on Existing Through-the-Fence Access From a Residential Property

In consideration of the foregoing, the Federal Aviation Administration proposes the following Policy on existing through-the-fence access to federally-obligated commercial service airports from residential property:

Proposed Final Policy on Existing Through-the-Fence Access to Commercial Service Airports From a Residential Property

Applicability

This proposed final Policy applies to commercial service airports with existing residential through-the-fence access.

For the purposes of this proposed final Policy:

In this sense ''access'' means:

1. An access point for taxiing aircraft across the airport boundary; *or*

2. The right of the owner of a particular off-airport residential property to use an airport access point to taxi an aircraft between the airport and that property.

''Existing access'' through the fence is defined as any through-the-fence access that meets one or more of the following conditions:

1. There was a legal right of access from the property to the airport (e.g., by easement or contract) in existence as of September 9, 2010; *or*

2. There was development of the property prior to September 9, 2010, in reliance on the airport sponsor's permission for through-the-fence aircraft access to the airport; or

3. The through-the-fence access is shown on an FAA-approved airport layout plan (ALP) or has otherwise been approved by the FAA in writing, and the owner of the property has used that access prior to September 9, 2010.

''Extend an access'' is defined as an airport sponsor's consent to renew or extend an existing right to access the airport from residential property or property zoned for residential use, for a specific duration of time, not to exceed 20 years.

''Development'' is defined as excavation or grading of land needed to construct a residential property; or construction of a residence.

''Residential property'' is defined as a piece of real property used for single- or multi-family dwellings; duplexes; apartments; primary or secondary residences even when co-located with a hangar, aeronautical facility, or business; hangars that incorporate living quarters for permanent or long-term use; and time-share hangars with living quarters for variable occupancy of any term.

''Transfer of access'' through the fence is defined as one of the following transactions:

1. Sale or transfer of a residential property or property zoned for residential use with existing through-the-fence access; or

2. Subdivision, development, or sale as individual lots of a residential property or property zoned for residential use with existing through-the-fence access.

I. Existing Through-the-Fence Access From Residential Property at Federally-Obligated Commercial Service Airports

The agency understands that it may not be practical or even possible to terminate through-the-fence access at many of those commercial service airports where that access already exists. Where access could be terminated, property owners have claimed that termination could have substantial adverse effects on their property value and investment, and sponsors seeking to terminate this access could be exposed to costly lawsuits. Accordingly, the FAA will not consider the existence of existing residential through-the-fence access by itself to place a sponsor in noncompliance with its grant assurances at these commercial service airports.

In some cases, the FAA has found that through-the-fence access rights can interfere with the sponsor's ability to meet its obligations as sponsor of a federally assisted public use airport. This is discussed in detail at 75 FR 54946, 54948 (Sept. 9, 2010). As a result, the FAA believes that sponsors of commercial service airports with existing through-the-fence access agreements must adopt measures to substantially mitigate the potential problems with residential through-the-fence access where it exists to avoid future grant compliance issues. Therefore, the FAA, as a condition of continuing grants to commercial service airports with residential through-the-fence access, will require these sponsors adopt measures to substantially mitigate the potential problems with residential through-the-fence access to avoid future grant compliance issues.

Accordingly, the sponsor of a commercial service airport where residential through-the-fence access or access rights already exist will be considered in compliance with its grant assurances if the airport depicts the access on its airport layout plan (ALP), satisfies the terms and conditions contained in section 136 of Public Law

112–95, and meets certain standards for safety, efficiency, parity of fees, and mitigation of potential noncompatible land uses. Those standards are listed in section II, *Standards for compliance at commercial service airports with existing through-the-fence access.* The FAA's review of those standards will be detailed in a Compliance Guidance Letter which will be issued, in draft form, concurrently and published on the FAA's Web site at *www.faa.gov/airports.* An airport sponsor covered by this proposed final Policy would be required to seek FAA approval before entering into any agreement that would extend (including renewal of access) through-the-fence access. Sponsors are reminded that nearby homeowners possess no right to taxi aircraft across the airport's property boundary, and no off-airport property owner will have standing to file a formal complaint under 14 CFR part 16 with the FAA to challenge the sponsor's decision not to permit such access.

II. Standards for Compliance at Commercial Service Airports With Existing Through-the-Fence Access

The FAA understands that municipally-owned airports have varying degrees of zoning authority. For example, one sponsor may have strong zoning powers, while another may have none. Also, the nature of existing through-the-fence rights can greatly affect the sponsor's ability to implement measures to control access. Accordingly, the FAA does not expect every sponsor of an airport with existing residential through-the-fence access to adopt a uniform set of rules and measures to mitigate that access. However, the FAA does expect each such sponsor to adopt reasonable rules and implement measures that accomplish the following standards for compliance and satisfy the law, to the fullest extent feasible for that sponsor. In general, the greater the number of residential through-the-fence access points and users of the airport and the higher the number of aircraft operations, the more important it is to have formal measures in effect to ensure the sponsor retains its proprietary powers and mitigates adverse effects on the airport.

In order to satisfy the law, the sponsor and the property owner or an association representing property owners must have a written agreement that requires the property owner to:

- Pay access charges that the sponsor determines to be comparable to those fees charged to tenants and operators on-airport making similar use of the airport;
- Bear the cost of building and maintaining the infrastructure the sponsor determines is necessary to provide access to the airfield from property located adjacent to or near the airport;
- Maintain the property for residential, noncommercial use (the FAA interprets this limitation as a prohibition on commercial aeronautical services only) for the duration of the agreement;
- Prohibit access to the airport from other properties through the property of the property owner (the FAA interprets this limitation as a prohibition on access to the airport not authorized by the airport sponsor); and
- Prohibit any aircraft refueling from occurring on the property (the FAA interprets this as a prohibition on the sale of fuel from residential property).

The FAA's standards for compliance for any sponsor of a commercial service airport with existing residential through-the-fence access are as follows:

1. *General authority for control of airport land and access.* The sponsor has sufficient control of access points and operations across airport boundaries to maintain safe operations, and to make changes in airport land use to meet future needs.

2. *Safety of airport operations.* By rule, or by agreement with the sponsor, through-the-fence users are obligated to comply with the airport's rules and standards.

3. *Parity of access fees.* The sponsor can and does collect fees from through-the-fence users comparable to those charged to airport tenants.

4. *Protection of airport airspace.* Operations at the airport will not be affected by hangars and residences on the airport boundary, at present or in the future.

5. *Compatible land uses around the airport.* The potential for noncompatible land use adjacent to the airport boundary is minimized consistent with Grant Assurance 21, Compatible Land Use.

These standards will be applied, on a case-by-case basis, in the FAA's evaluation of whether each commercial service airport with existing residential through-the-fence access meets the above requirements to the fullest extent feasible for that airport. In situations when access can be legally transferred from one owner to another without the sponsor's review, the FAA will treat the access as existing. Because the ability of some sponsors to control access has been compromised as a result of legal rights previously granted to through-the-fence users, existing access locations may be evaluated under the alternative criteria for some standards as indicated below, if applicable to that airport.

In some cases, a sponsor may seek to relocate an existing access point. If the sponsor can demonstrate that this action will improve the airport's overall safety or better address issues associated with the sponsor's long-term planning needs, the FAA will not consider the access rights associated with the replacement access point to extend an access. In order to transfer the terms of the existing access point to a new access point without a change in compliance status, the former existing access point must be removed. Such requests should be coordinated with the FAA Airports District Office (ADO) or Regional Airports Division and clearly depicted on the sponsor's ALP.

III. Standards for Compliance at Commercial Service Airports Proposing To Extend Through-the-Fence Access

Once allowed, residential through-the-fence access is very difficult to change or eliminate in the future. This is because residential owners, more so than commercial interests, typically expect that their residential property will remain suitable for residential use and protected from adverse effects for a long time. Residential buyers and their mortgage lenders may ensure that the property is purchased with rights that guarantee no change in the access to the airport for decades, or indefinitely. Because each additional residential through-the-fence access location introduces the potential for problems for the airport in the future, and because this access is effectively permanent and resistant to change once permitted, the FAA will review extensions of existing residential through-the-fence access at public use airports carefully.

The following supplemental standards will be applied to the FAA's case-by-case review of sponsors' proposals to extend residential through-the-fence access. In situations when the transfer of access from one owner to another requires the sponsor's concurrence, the FAA will treat the access as an extension. The FAA will not approve requests to extend access that are inconsistent with the sponsor's grant assurances (excluding Grant Assurance 5, Preserving Rights and Powers, paragraph ''g'' as amended). Furthermore, the sponsor will be required to demonstrate the following standards for compliance:

- The new access agreement fully complies with the terms and conditions contained in section 136 of Public Law 112–95.
- The term of the access does not exceed 20 years.

• The sponsor provides a current (developed or revised within the last five years) airport master plan identifying adequate areas for growth that are not affected by the existence of through-the-fence access rights, or the sponsor has a process for amending or terminating existing through-the-fence access in order to acquire land that may be necessary for expansion of the airport in the future.

• The sponsor will impose and enforce safety and operating rules on through-the-fence residents utilizing this access while on the airport identical to those imposed on airport tenants and transient users.

• Through-the-fence residents utilizing this access will grant the sponsor a perpetual avigation easement for overflight, including unobstructed flight through the airspace necessary for takeoff and landing at the airport.

• Through-the-fence residents utilizing this access, by avigation easement; deed covenants, conditions or restrictions; or other agreement, have acknowledged that the property will be affected by aircraft noise and emissions and that aircraft noise and emissions may change over time.

• Through-the-fence residents utilizing this access have waived any right to bring an action against the sponsor for existing and future operations and activities at the airport associated with aircraft noise and emissions.

• The sponsor has a mechanism for ensuring through-the-fence residents utilizing this access will file FAA Form 7460–1, Notice of Proposed Construction or Alteration, if necessary and complying with the FAA's determination related to the review of Form 7460–1.

• The sponsor has a mechanism for ensuring through-the-fence residents do not create or permit conditions or engage in practices that could result in airport hazards, including wildlife attractants.

• Where available, the sponsor or other local government has in effect measures to limit future use and ownership of the through-the-fence properties to aviation-related uses (in this case, hangar homes), such as through zoning or mandatory deed restrictions. The FAA recognizes this measure may not be available to the sponsor in all states and jurisdictions.

• If the residential community has adopted restrictions on owners for the benefit of the airport (such as a commitment not to complain about aircraft noise), those restrictions are enforceable by the sponsor as a third-party beneficiary, and may not be cancelled without cause by the community association.

• The access agreement is subordinate to the sponsor's current and all future grant assurances.

• The sponsor has developed a process for educating through-the-fence residents about their rights and responsibilities.

IV. Proposed Process and Documentation

A. Existing Residential Through-the-Fence Access

1. *General.* The sponsor of a commercial service airport with existing residential through-the-fence access will be considered in compliance with its grant assurances, and eligible for future grants, if the FAA determines that the sponsor complies with the law and meets the applicable standards listed above under *Standards for compliance at commercial service airports with existing residential through-the-fence access.* The sponsor may demonstrate that it meets these standards by providing the ADO or regional division staff with a written description of the sponsor's authority and the controls in effect at the airport (''residential through-the-fence access plan'' or ''access plan''). Sponsors are encouraged to review the FAA's draft Compliance Guidance Letter on FAA Review of Existing and Proposed Residential-Through-Fence Access Agreements, which will be issued concurrently with this notice, prior to submitting their access plan. This draft guidance letter may be found on the FAA's Web site at *www.faa.gov/airports.* The ADO or regional division will review each access plan, on a case-by-case basis, to confirm that it addresses how the sponsor complies with the law and meets each of these standards at its airport. The ADO or regional division will forward recommendations regarding each access plan to the Manager of Airport Compliance. Only the Manager of Airport Compliance may accept a commercial service airport sponsor's residential through-the-fence access plan. In reviewing the access plan, the Manager of Airport Compliance may consult with the Transportation Security Administration (TSA). The FAA will take into account the powers of local government in each state, and other particular circumstances at each airport. In every case, however, the access plan must address the law and each of the basic requirements listed under section II of this proposed final Policy.

2. *Residential through-the-fence access plan.* The FAA will require evidence of compliance before issuing an AIP grant, beginning in Fiscal Year 2014. FY 2014 and later grants will include a special grant condition requiring the ongoing implementation of these access plans. Generally, the FAA will not award discretionary grants to the sponsor until the FAA accepts the sponsor's access plan as meeting the law and the standards to the extent feasible for that airport.

3. *Airport Layout Plan.* The FAA will require all residential through-the-fence access points to be identified on the airport's layout plan. A temporary designation may be added through a sponsor's pen and ink change to immediately identify the locations on the airport property that serve as points of access for off-airport residents. A formal ALP revision that fully depicts the scope of the existing residential through-the-fence agreements should be completed the next time the sponsor initiates an airport master plan study or update.

A sponsor's failure to depict all residential through-the-fence access points is a violation of the sponsor's grant assurances, and the agency may consider grant enforcement under 14 CFR part 16.

4. *FAA review.* The FAA's acceptance of the access plan represents an Agency determination that the commercial service airport has met the law and compliance standards for existing residential through-the-fence access for a period not to exceed 20 years. The following actions will trigger a commercial service airport sponsor to update its access plan prior to its 20-year expiration: Development of a new master plan or an update to an existing master plan, significant revisions to an ALP, requests for Federal financial participation in land acquisition, identification of a safety concern, or substantial changes to the access agreement. A commercial service airport sponsor's failure to implement its access plan could result in a violation of the special grant condition and potentially lead to a finding of noncompliance.

5. *Commercial Service Airports with existing residential through-the-fence access that do not meet the compliance standards.* The FAA recognizes that some commercial service airport sponsors may not be able to fully comply with the law and the standards listed above, due to limits on the powers of the sponsor and/or other local governments, or on other legal limits on the sponsor's discretion to adopt certain measures. Other sponsors have the capability to adopt measures to satisfy the compliance standards but have not done so. The FAA may consider a

commercial service airport sponsor's inability to comply with the law and/or the minimum compliance standards as a militating factor in its review of requests for discretionary funding.

6. *Commercial service airports that fail to submit an access plan.* The FAA expects commercial service airport sponsors with existing residential through-the-fence access to develop an access plan which addresses the law, preserves their proprietary rights and powers, and mitigates the inherent challenges posed by this practice. Beginning in Fiscal Year 2014, a sponsor's failure to comply with the Policy may jeopardize its ability to compete for AIP grant funding.

B. Requests To Extend Residential Through-the-Fence Access at Airports Covered by This Proposed Final Policy

As of the date of the enactment of Public Law 112–95 (February 14, 2012), a sponsor of a commercial service airport proposing to extend an access agreement must submit a current airport master plan and a revised residential through-the-fence access plan as detailed below. The ADO or regional division will forward its recommendations regarding each request to extend access to the Manager of Airport Compliance. Only the Manager of Airport Compliance may approve a sponsor's request to extend access. In reviewing the proposal, the Manager of Airport Compliance may consult with the TSA.

1. *Master Plan.* A sponsor of a commercial service airport wishing to extend an existing residential through-the-fence access agreement must submit a recent airport master plan to the ADO or regional division. The FAA considers a master plan to be recent if it was developed or updated within the past five years. The master plan should explain how the sponsor plans to address future growth, development, and use of the airport property over the next 20 years; sponsors should work with ADO or regional division staff to develop an appropriate scope of work for these master plans.

2. *Residential through-the-fence access plan.* The sponsor is responsible for revising its access plan, as discussed under section IV.A.2 of this proposed final Policy, to reflect how it will meet the standards for compliance for the extended access. Once the FAA has accepted the revised access plan, the FAA will condition future AIP grants upon its ongoing implementation.

3. *Continuing obligations.* Once the revised access plan is accepted by the FAA, and if required, the revised ALP, is approved by the FAA, the sponsor must continue to comply with obligations described in section IV.A of this proposed final Policy.

V. Eligibility for AIP Grants

A. *General.* Beginning in Fiscal Year 2014, a sponsor of a commercial service airport with existing residential through-the-fence access will be required to submit their residential through-the-fence access plan prior to notifying the FAA of its intent to apply for an AIP grant. The sponsor will not lose eligibility for entitlement grants on the basis of the through-the-fence access, but the FAA will consider the potential constraints on the utility of the airport to be a significant factor in future AIP funding decisions.

B. *Public infrastructure and facilities with substantial benefit to private through-the-fence users.* The FAA may be unable to justify the federal investment in a proposed project when private residential developments with through-the-fence access will receive substantial value from that federally assisted airport infrastructure and/or facility.

C. *Exclusive or primary private benefit.* On-airport infrastructure and facilities used exclusively or primarily for accommodation of through-the-fence users are considered private-use and are ineligible for AIP grants.

Issued in Washington, DC, on July 18, 2012.

Randall S. Fiertz,

Director, Airport Compliance and Management Analysis.

BILLING CODE 4910–13–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket No. USCG–2012–0559]

RIN 1625–AA08

Special Local Regulations; 2012 Ironman 70.3 Miami, Biscayne Bay; Miami, FL

AGENCY: Coast Guard, DHS.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Coast Guard proposes to establish a special local regulation on the waters of Biscayne Bay, east of Bayfront Park, in Miami, Florida during the 2012 Ironman 70.3 Miami, a triathlon. The Ironman 70.3 Miami is scheduled to take place on Sunday, October 28, 2012. Approximately 2500 participants are anticipated to participate in the swim. No spectators are expected to be present during the event. The special local regulation is necessary to provide for the safety of the participants, participant vessels, and general public on the navigable waters of the United States during the event. The special local regulation would establish an area that will encompass the event area. Persons and vessels will be prohibited from entering, transiting through, anchoring in, or remaining within the regulated area unless authorized by the Captain of the Port Miami or a designated representative.

DATES: Comments and related material must be received by the Coast Guard on or before August 29, 2012. Requests for public meetings must be received by the Coast Guard on or before August 20, 2012.

ADDRESSES: You may submit comments identified by docket number USCG–2012–0559 using any one of the following methods:

(1) *Federal eRulemaking Portal: http://www.regulations.gov.*

(2) *Fax:* 202–493–2251.

(3) *Mail or Delivery:* Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590–0001. Deliveries accepted between 9 a.m. and 5 p.m., Monday through Friday, except federal holidays. The telephone number is 202–366–9329.

See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section below for further instructions on submitting comments. To avoid duplication, please use only one of these three methods.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Lieutenant Junior Grade Mike H. Wu, Sector Miami Prevention Department, Coast Guard; telephone (305) 535–4317, email *Mike.H.Wu@uscg.mil*. If you have questions on viewing or submitting material to the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

Table of Acronyms

NPRM Notice of Proposed Rulemaking

A. Public Participation and Request for Comments

We encourage you to participate in this rulemaking by submitting

comments and related materials. All comments received will be posted without change to *http://www.regulations.gov* and will include any personal information you have provided.

1. Submitting Comments

If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online at *http://www.regulations.gov*, or by fax, mail, or hand delivery, but please use only one of these means. If you submit a comment online, it will be considered received by the Coast Guard when you successfully transmit the comment. If you fax, hand deliver, or mail your comment, it will be considered as having been received by the Coast Guard when it is received at the Docket Management Facility. We recommend that you include your name and a mailing address, an email address, or a telephone number in the body of your document so that we can contact you if we have questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov*, type the docket number USCG–2012–0559 in the ''SEARCH'' box and click ''SEARCH.'' Click on ''Submit a Comment'' on the line associated with this rulemaking.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½; by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the Facility, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period and may change the rule based on your comments.

2. Viewing Comments and Documents

To view comments, as well as documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov*, type the docket number USCG–2012–0559 in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rulemaking. You may also visit the Docket Management Facility in Room W12–140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

3. Privacy Act

Anyone can search the electronic form of comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review a Privacy Act notice regarding our public dockets in the January 17, 2008, issue of the **Federal Register** (73 FR 3316).

4. Public Meeting

We do not now plan to hold a public meeting. But you may submit a request for one on or before June 25, 2012 using one of the methods specified under **ADDRESSES**. Please explain why you believe a public meeting would be beneficial. If we determine that one would aid this rulemaking, we will hold one at a time and place announced by a later notice in the **Federal Register**.

B. Basis and Purpose

The legal basis for the rule is the Coast Guard's authority to establish special local regulations: 33 U.S.C. 1233. The purpose of the rule is to provide for the safety of life on navigable waters of the United States during the Ironman 70.3 Miami.

C. Discussion of Proposed Rule

On October 28, 2012, Miami Tri Events is sponsoring the Ironman 70.3, a triathlon. The swim portion of the event will be held on the waters of Biscayne Bay, Miami, Florida. Approximately 2500 participants are anticipated to participate in the event. No spectator vessels are expected during the event.

The proposed rule would establish a special local regulation that will encompass certain waters of the Intracoastal Waterway and Biscayne Bay, Miami, Florida. The special local regulation will be enforced 6:45 a.m. until 9:45 a.m. on October 28, 2012. The special local regulation will establish an area around the event where all persons and vessels, except those persons and vessels participating in the event, are prohibited from entering, transiting though, anchoring in, or remaining within. Persons and vessels may request authorization to enter, transit through, anchor in, or remain within the regulated area by contacting the Captain of the Port Miami via telephone at 305–535–4472, or a designated representative via VHF radio on channel 16. If authorization to enter, transit through, anchor in, or remain within the event area is granted by the Captain of the Port Miami or a designated representative, all persons and vessels receiving such authorization must comply with the instructions of the Captain of the Port Miami or a designated representative. The Coast Guard will provide notice of the special local regulations by Local Notice to Mariners, Broadcast Notice to Mariners, and on-scene designated representatives.

D. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes or executive orders.

1. Regulatory Planning and Review

This proposed rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order 13563, Improving Regulation and Regulatory Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of Executive Order 12866 or under section 1 of Executive Order 13563. The Office of Management and Budget has not reviewed it under those Orders.

The economic impact of this proposed rule is not significant for the following reasons: (1) The special local regulation will be enforced for only three hours; (2) although persons and vessels will not be able to enter, transit through, anchor in, or remain within the event area without authorization from the Captain of the Port Miami or a designated representative, they may operate in the surrounding area during the enforcement period; (3) persons and vessels may still enter, transit through, anchor in, or remain within the event area during the enforcement period if authorized by the Captain of the Port Miami or a designated representative; and (4) the Coast Guard will provide advance notification of the special local regulations to the local maritime community by Local Notice to Mariners and Broadcast Notice to Mariners.

2. Impact on Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered the impact of this proposed rule on small entities. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule will not have a significant economic impact on a substantial number of small entities.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a

substantial number of small entities. This rule may affect the following entities, some of which may be small entities: the owners or operators of vessels intending to enter, transit through, anchor in, or remain within that portion of Intracoastal Waterway and Biscayne Bay encompassed within the special local regulations from 6:45 a.m. until 9:45 a.m. on October 28, 2012. For the reasons discussed in the Regulatory Planning and Review section above, this rule will not have a significant economic impact on a substantial number of small entities.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

3. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**, above. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

4. Collection of Information

This proposed rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520.).

5. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and determined that this rule does not have implications for federalism.

6. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

7. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

8. Taking of Private Property

This proposed rule would not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

9. Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

10. Protection of Children From Environmental Health Risks

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

11. Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. Energy Effects

This proposed rule is not a ''significant energy action'' under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

13. Technical Standards

This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves a special local regulation issued in conjunction with a regatta or marine parade. This rule is categorically excluded from further review under paragraph 34(h) of Figure 2–1 of the Commandant Instruction. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233.

2. Add a temporary § 100.35T07–0559 to read as follows:

§ 100.35T07–0559 Special Local Regulation; Ironman 70.3 Miami, Biscayne Bay; Miami, FL.

(a) *Regulated Area.* The following regulated area is a special local regulation. All waters of Biscayne Bay located east of Bayfront Park and encompassed within an imaginary line connecting the following points: starting

at Point 1 in position 25°46′44″ N, 080°10′59″ W; thence southeast to Point 2 in position 25°46′24″ N, 080°10′44″ W; thence southwest to Point 3 in position 25°46′18″ N, 080°11′05″ W; thence north to Point 4 in position 25°46′33″ N, 080°11′05″ W; thence northeast back to origin. All coordinates are North American Datum 1983.

(b) *Definition.* The term ''designated representative'' means Coast Guard Patrol Commanders, including Coast Guard coxswains, petty officers, and other officers operating Coast Guard vessels, and Federal, state, and local officers designated by or assisting the Captain of the Port Miami in the enforcement of the regulated area.

(c) *Regulations.*

(1) Persons and vessels may request authorization to enter, transit through, anchor in, or remain within the regulated area by contacting the Captain of the Port Miami by telephone at 305–535–4472, or a designated representative via VHF radio on channel 16. If authorization is granted by the Captain of the Port Miami or a designated representative, all persons and vessels receiving such authorization must comply with the instructions of the Captain of the Port Miami or a designated representative.

(2) The Coast Guard will provide notice of the regulated areas by Local Notice to Mariners, Broadcast Notice to Mariners, and on-scene designated representatives.

(d) *Enforcement Date.* This rule will be enforced from 6:45 a.m. until 9:45 a.m. on October 28, 2012.

Dated: June 20, 2012.

C.P. Scraba,

Captain, U.S. Coast Guard, Captain of the Port Miami.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2012–0470]

RIN 1625–AA09

Drawbridge Operation Regulation; Apalachicola River, FL

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to modify the operating schedules for two bridges that cross the Apalachicola River in Florida. First, the CSX Railroad requested to modify the operating schedule of their swing bridge at mile 105.9, at River Junction to require eight hours advanced notice at all times. Second, the Apalachicola and Northern Railroad (ANRR) requested to maintain the swing bridge at mile 4.5 (GIWW mile 347.0 East of Harvey Lock (EHL)), at Apalachicola, untended and in the open-to-navigation position at all times.

DATES: Comments and related material must reach the Coast Guard on or before September 28, 2012.

ADDRESSES: You may submit comments identified by docket number USCG–2012–0470 using any one of the following methods:

(1) *Federal eRulemaking Portal: http://www.regulations.gov.*

(2) *Fax:* 202–493–2251.

(3) *Mail:* Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590–0001.

(4) *Hand delivery:* Same as mail address above, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202–366–9329.

To avoid duplication, please use only one of these four methods. See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section below for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions on this proposed rule, call or email David Frank, Bridge Administration Branch; telephone 504–671–2128, email *David.M.Frank@uscg.mil.* If you have questions on viewing or submitting material to the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

NPRM Notice of Proposed Rulemaking

A. Public Participation and Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related materials. All comments received will be posted, without change to *http://www.regulations.gov* and will include any personal information you have provided.

1. Submitting Comments

If you submit a comment, please include the docket number for this rulemaking (USCG–2012–0470), indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online (*http://www.regulations.gov*), or by fax, mail or hand delivery, but please use only one of these means. If you submit a comment online via *http://www.regulations.gov,* it will be considered received by the Coast Guard when you successfully transmit the comment. If you fax, hand deliver, or mail your comment, it will be considered as having been received by the Coast Guard when it is received at the Docket Management Facility. We recommend that you include your name and a mailing address, an email address, or a phone number in the body of your document so that we can contact you if we have questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov,* click on the ''submit a comment'' box, which will then become highlighted in blue. In the ''Document Type'' drop down menu select ''Proposed Rules'' and insert ''USCG–2012–0470'' in the ''Keyword'' box. Click ''Search'' then click on the balloon shape in the ''Actions'' column. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit them by mail and would like to know that they reached the Facility, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period and may change the rule based on your comments.

2. Viewing Comments and Documents

To view comments, as well as documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* click on the ''read comments'' box, which will then become highlighted in blue. In the ''Keyword'' box insert ''USCG–2012–0470'' and click ''Search.'' Click the ''Open Docket Folder'' in the ''Actions'' column. You may also visit the Docket Management Facility in Room W12–140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. We have an agreement with the Department of Transportation to use the Docket Management Facility.

3. Privacy Act

Anyone can search the electronic form of comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review a Privacy Act notice regarding our public dockets in the January 17, 2008, issue of the **Federal Register** (73 FR 3316).

4. Public Meeting

We do not now plan to hold a public meeting. But you may submit a request for one using one of the four methods specified under **ADDRESSES**. Please explain why a public meeting would be beneficial. If we determine that one would aid this rulemaking, we will hold one at a time and place announced by a later notice in the **Federal Register**.

B. Regulatory History and Information

The Code of Federal Regulations (CFR) under 33 CFR 117.5 requires that except as otherwise authorized by this part, drawbridges must open promptly and fully for the passage of vessels when a request or signal to open is given in accordance with this subpart. Presently, one bridge over the Apalachicola River is listed as having a special operating schedule under 33 CFR 117 Subpart B—Specific Requirements. Under 33 CFR 117.258, the draw of the CSX Railroad bridge at River Junction, mile 105.9 on the Apalachicola River, shall open on signal Monday through Friday from 8 a.m. until 4 p.m. At all other times the bridge will open on signal if at least four hours notice is given. This rule proposes to change the notice required for opening from four hours to eight hours for the CSX Railroad bridge.

A second bridge, the ANRR bridge at mile 4.5 on the Apalachicola River, (GIWW mile 347.0 EHL) in Apalachicola does not have a specific operating schedule, opening as required under 33 CFR 117.5. The Port of St. Joe, FL, owner of the bridge, has taken the rail line out of service and has an embargo to cease train operations for Port St. Joe and north of the Apalachicola River due to the absence of shipments coming in/out of Port St. Joe. While the embargo remains in effect, the operator of the bridge, ANRR, requests to maintain the swing bridge in the open-to-navigation position in accordance with 33 CFR 117.41. This rule proposes to add an operating schedule specific to the ANRR bridge under 33 CFR 117.258, stating that the bridge will be maintained in the open-to-navigation position.

Prior to the requests to change the operating schedules for these two bridges, no previous requests for changes have been received. These requests were initiated without consultation of waterway users but the USCG Bridge Administration Office in New Orleans was consulted for guidance on how to comply with the requirements of 33 CFR 117.41.

C. Basis and Purpose

The CSX swing bridge across the Apalachicola River, mile 105.9, presently opens on signal for the passage of vessels Monday through Friday from 8 a.m. until 4 p.m. At all other times, the bridge opens on signal if at least four hours advanced notice is given. The bridge owner has requested to change the operation regulations to reflect usage of the bridge by mariners. The request was made based upon a documented decrease in the number of requests for openings in the last three years. In 2010, the bridge opened 12 times for the passage of vessels. Eight of those openings were for either a United States Coast Guard (USCG) vessel or for a United States Army Corps of Engineers (USACE) vessel. In 2011, the bridge opened four times for the passage of vessels. Three of those openings were for either a USCG vessel or for a USACE vessel. Thus far in 2012, the bridge has only opened one time for a USACE vessel. It should be noted that all of the openings in the past three years have occurred between 8 a.m. and 4 p.m.; therefore, the bridge opened on signal for their passages. Information gathered regarding the decrease in vessel movements indicates that the lack of commercial facilities and the lack of maintenance on the waterway have contributed to the decline in traffic. While water elevations may return to their pre-drought levels, there is presently no evidence that the number of requests for bridge openings will increase in the future due to limited industrial development along the waterway. Accordingly, the bridge owner requested to change the operation regulations so that the bridge is allowed to open on signal at all times if at least eight hours advanced notification is given. USACE and USCG units using the waterway indicated that the proposed change to the operation of the bridge will not affect their ability to maintain the waterway and they have no objections to the proposed change.

The ANRR swing span bridge crosses the Apalachicola River at mile 4.5 (GIWW mile 347.0 EHL) and is required to open on signal for the passage of vessels. Since the bridge owner applied for and received an embargo for the suspension of train traffic on the line, the operation of the bridge is unnecessary and the operator of the bridge requested permission to leave the bridge in the open-to-navigation position and have the bridge untended. The bridge provides unlimited vertical clearance and 119 feet of horizontal clearance in the open-to-navigation position. Transit times for mariners should not be impeded with the bridge left in the open-to-navigation position. The bridge owner/operator will be required to maintain all bridge navigation lights in proper working order and will be required to periodically check the lights to see that they are working.

D. Discussion of Proposed Rule

The proposed rule for the CSX Railroad Bridge will require all vessels wishing to transit through the bridge site and needing the bridge to be opened for their passage to provide eight hours advanced notification. The proposed rule will require mariners to provide an additional four hours of advanced notification of arrival to transit through the bridge. For vessels wishing to transit through the bridge site between the hours of 8 a.m. and 4 p.m. Monday through Friday, these vessel operators will now be required to contact the bridge owner at least eight hours prior to transiting the bridge. As all openings in the past three years have been during the day, this requirement will be new to any vessels wishing to transit through the bridge site during these time frames. Several government vessels transit the waterway past the bridge site to conduct maintenance on the waterway. USACE and USCG units transiting the waterway indicated that the proposed change to the operation of the bridge will not affect their ability to maintain the waterway and they have no objections to the proposed change.

The proposed rule for the ANRR bridge should not cause any undue burden on any vessels as the bridge will remain in the open-to-navigation position and allow all vessels presently using the waterway at the bridge site to transit the bridge site without delay.

E. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on 14 of these statutes or executive orders.

1. Regulatory Planning and Review

This proposed rule is not a ''significant regulatory action'' under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order

13563, Improving Regulation and Regulatory Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of Order 12866 or under section 1 of Executive Order 13563. The Office of Management and Budget has not reviewed it under those Orders.

We consider the changes proposed in this rule to be minimal that a full Regulatory Evaluation is unnecessary. Very few vessels will be impacted by the proposed changes and those few vessels should be able to provide adequate advanced notification of their arrivals as is already done for the CSX Railroad bridge and vessels may transit through the ANRR bridge without delay as it will be maintained in the open-to-navigation position.

2. Impact on Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered the impact of this proposed rule on small entities. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

This proposed rule would affect the following entities, some of which might be small entities: The owners or operators of vessels needing to transit the Apalachicola River above mile 105.9. This action will not have a significant economic impact on a substantial number of small entities because these few vessels should be able to provide adequate advanced notification of their arrivals as is already done on this waterway for three other movable bridges located upstream and downstream of this bridge.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

3. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule so that they can better evaluate its effects on them and participate in the rulemaking. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**, above. The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

4. Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

5. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it does not have implications for federalism.

6. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the ''For Further Information Contact'' section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

7. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

8. Taking of Private Property

This proposed rule would not affect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

9. Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

10. Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

11. Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. Energy Effects

This proposed rule is not a ''significant energy action under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

13. Technical Standards

This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01, and Commandant Instruction M16475.lD which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA)(42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is not likely to have a significant effect on the human environment. This proposed rule involves the regulation of drawbridge operations. This rule is categorically excluded from further review under paragraph 32(e) of Figure 2–1 of the Commandant Instruction. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 33 CFR 1.05–1; Department of Homeland Security Delegation No. 0170.1.

2. In § 117.258, a new paragraph (a) is added and the current regulation is revised and redesignated as paragraph (b) to read as follows:

§ 117.258 Apalachicola River.

(a) The draw of the Apalachicola and Northern Railroad Bridge, mile 4.5 (GIWW mile 347.0 EHL), at Apalachicola, is maintained in the fully open-to-navigation position and untended. The bridge will not be returned to service until proper notification is published in **Federal Register**.

(b) The draw of the CSX Railroad Bridge, mile 105.9, at River Junction shall open on signal if at least eight hours notice is given.

Dated: July 13, 2012.

Peter Troedsson,

Captain, U.S. Coast Guard, Commander, Eighth Coast Guard District, Acting.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 151

[Docket No. USCG–2004–19621]

RIN 1625–AA89

Dry Cargo Residue Discharges in the Great Lakes

AGENCY: Coast Guard, DHS.

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes replacing its existing interim rule with a new rule to regulate the operation of U.S. and foreign vessels carrying bulk dry cargo such as limestone, iron ore, and coal on the U.S. waters of the Great Lakes, and the operation of U.S. bulk dry cargo vessels anywhere on the Great Lakes. Specifically, the Coast Guard proposes new requirements for the discharge of bulk dry cargo residue (DCR) on the U.S. waters of the Great Lakes. The Coast Guard also announces the availability of the tiered Draft Environmental Impact Statement (DEIS) prepared in support of this proposal. The proposed rule would continue to allow non-hazardous and non-toxic discharges of bulk DCR in limited areas of the Great Lakes. However, vessel owners and operators would need to minimize DCR discharges using methods they would be required to document in DCR management plans. The proposed rule would prohibit limestone and clean stone DCR discharges in some waters where they are now permitted. The proposed rule promotes the Coast Guard's strategic goals of maritime mobility and safety and protection of natural resources.

DATES: Comments and related material must either be submitted to our online docket via *http://www.regulations.gov* on or before October 29, 2012 or reach the Docket Management Facility by that date. Comments sent to the Office of Management and Budget (OMB) on collection of information must reach OMB on or before October 29, 2012.

ADDRESSES: You may submit comments identified by docket number USCG-2004–19621 using any one of the following methods:

(1) *Federal eRulemaking Portal: http://www.regulations.gov.*

(2) *Fax:* 202–493–2251.

(3) *Mail:* Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590–0001.

(4) *Hand delivery:* Same as mail address above, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202–366–9329.

To avoid duplication, please use only one of these four methods. See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section below for instructions on submitting comments.

Collection of Information Comments: If you have comments on the collection of information discussed in section VII.D. of this document, you must also send comments to the Office of Information and Regulatory Affairs (OIRA), Office of Management and Budget. To ensure that your comments to OIRA are received on time, the preferred methods are by email to *oira_submission@omb.eop.gov* (include the docket number and ''Attention: Desk Officer for Coast Guard, DHS'' in the subject line of the email) or fax at 202–395–6566. An alternate, though slower, method is by U.S. mail to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, ATTN: Desk Officer, U.S. Coast Guard.

FOR FURTHER INFORMATION CONTACT: If you have questions on this proposed rule, call or email John C. Morris, Office of Operating and Environmental Standards (CG–OES–3), U.S. Coast Guard; telephone 202–372–1433, email *John.C.Morris@uscg.mil.* If you have questions on viewing or submitting material to the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

III. Basis and Purpose

This supplemental notice of proposed rulemaking (SNPRM) proposes a rule to replace the interim rule (73 FR 56492, Sep. 29, 2008) now in effect. It also announces the availability of the tiered Draft Environmental Impact Statement (DEIS), which we previously announced we would prepare in support of this proposed rule (scoping notice, 73 FR 79496; Dec. 29, 2008). The legal basis for this rulemaking is section 623(b) of the Coast Guard and Maritime Transportation Act of 2004 (''the Act,'' Pub. L. 108–293). Section 623(b) of the Act gives the Coast Guard the authority, ''notwithstanding any other law * * * to promulgate regulations governing the discharge of dry bulk cargo residue on the Great Lakes.''

The purpose of this rulemaking, as a whole, is to exercise the authority conferred on the Coast Guard by the Act in a way that appropriately balances the needs of maritime commerce and environmental protection, by determining how, if at all, the discharge of dry cargo residue (DCR) can continue in the Great Lakes within a regulatory framework that imposes environmentally appropriate conditions on DCR discharges. The purpose of this SNPRM phase of the rulemaking is to propose a rule that would allow some DCR discharges to continue, under a regulatory framework that imposes additional conditions on the vessels from which those discharges take place.

IV. Background

Prior to opening this rulemaking, we published a notice of inquiry requesting information about the then-current status of dry cargo operations in the Great Lakes (69 FR 77147, Dec. 27, 2004; correction, 70 FR 1400, Jan. 5, 2005). The regulatory history for this rulemaking began with an announcement of our intent to prepare an Environmental Impact Statement (EIS) in support of the rulemaking and a request for public comments on the scope of the EIS (''scoping notice,'' 71 FR 12209, March 9, 2006). On June 8, 2006, we published a notice for a public meeting on the scope of the EIS, and again requested public comments (71 FR 33312). The scoping meeting was held in Cleveland, OH, on July 6, 2006. Our notice of proposed rulemaking (NPRM) and notice of the availability of the accompanying draft environmental impact statement appeared on May 23, 2008 (73 FR 30014). Public meetings on the NPRM and DEIS were announced on June 6, 2008 (73 FR 32273) and held in Duluth, MN, and Cleveland, OH, on July 15 and 17, 2008, respectively. Availability of the final environmental impact statement (FEIS) was announced on August 22, 2008, by the Environmental Protection Agency (73 FR 49667) and by the Coast Guard (73 FR 49694), and the Record of Decision (ROD) adopting the findings of the FEIS was signed September 23, 2008. An interim rule was published September 29, 2008 (73 FR 56492). On December 29, 2008 (73 FR 79496), we published a second scoping notice announcing our intent to prepare a new ''tiered'' (updated) EIS in support of a final rule, requested public comments, and announced a public scoping meeting, which was held in Chicago, IL, on January 28, 2009.

There are several factors that must be taken into account when addressing DCR discharges in the waters of the U.S. side of the Great Lakes. The Lakes support a significant volume of bulk dry cargo shipping that remains within the Great Lakes system. The Lakes are, in places, very deep and wide and either adjoin Canadian waters or are land-locked. Therefore, vessels that remain within the Great Lake system—unlike their East, West, or Gulf Coast counterparts—are continually subject to the navigable waters laws of both the United States and Canada.

The legislative conference report prepared in support of section 623(b) of the Act expressed Congress's expectation that in regulating Great Lakes DCR discharges, given these special characteristics, the U.S. Coast

Guard would adopt an approach ''that appropriately balances the needs of maritime commerce and environmental protection.'' House Report 108–617.

Our interim rule amended 33 CFR 151.66, a Coast Guard regulation that implements the Act to Prevent Pollution from Ships (APPS) 33 U.S.C. 1901 *et seq.* That regulation generally prohibits the discharge of DCR—an ''operational waste'' and, hence, ''garbage'' as both terms are defined in 33 CFR 151.05—in all U.S. navigable waters. The interim rule amended that prohibition with respect to the U.S. waters of the Great Lakes. It allows non-hazardous and non-toxic DCR discharges in limited areas of the Great Lakes, provided that carriers observe recordkeeping and reporting requirements, and it encourages carriers to adopt voluntary control measures for minimizing discharges. The interim rule applies to the owners and operators of U.S., Canadian, and other foreign vessels carrying bulk dry cargo on the U.S. waters of the Great Lakes, and also to the owners and operators of U.S. vessels carrying bulk dry cargo when they are on the Canadian waters of the Great Lakes. Non-self-propelled barges are excluded unless they are part of an integrated tug-and-barge unit.

Our Record of Decision in support of the interim rule concluded that the interim rule's only adverse environmental impacts would be minor and indirect, and that an outright ban of DCR discharges could cause an adverse economic impact for carriers and related industries in the Great Lakes region. Therefore, we found that allowing DCR discharges in the Great Lakes, under the conditions imposed by the interim rule, struck ''the best balance between economic and environmental concerns that can be achieved, given currently available information.'' ROD, p. 4. The conditions the interim rule imposed on DCR discharges were intended to limit even minor and indirect impacts of DCR discharges, and to give us the regulatory tools we needed to monitor discharges in the future.

We stated in the interim rule that, before taking action in this rulemaking, we would ''determine if, in the long term, the optimal balancing of commercial and environmental interests requires the mandatory use of DCR control measures, the adjustment of the geographical boundaries within which those discharges are currently allowed, or other regulatory changes.'' (73 FR at 56495.) We have now made a tentative determination of that issue and, in this SNPRM, we propose a rule based on that tentative determination. We request your comments on that determination and on the proposed rule.

V. Discussion of Comments on Interim Rule

In response to our September 2008 interim rule and December 2008 scoping notice, we received comments from 19 sources, including 5 State agencies (representing 4 States, with 1 State providing comments from 2 separate agencies, and 1 agency submitting multiple comments), 4 industry groups, 2 non-industry groups, 1 Indian Tribal group, and 7 individuals.

Three commenters expressed support for the interim rule or said DCR discharges should be permitted because of their low environmental impact and the high cost of eliminating discharges. Eight commenters expressed opposition to the interim rule or favored prohibiting all DCR discharges in the Great Lakes; one of the eight said our rule should move toward eliminating those discharges. These comments were unsupported by argument or evidence and therefore we can only acknowledge them.

Three State agency commenters said the interim rule is inconsistent with their State laws and with their coastal zone management plans. The interim rule states that it does not expressly preempt State laws and that it expressly cautions carriers that they must comply with all applicable Federal and State laws regulating DCR discharges. It also states that the Coast Guard will work with States and carriers to make sure carriers are informed of any State laws that could impose more restrictions on DCR discharges than the Coast Guard allows. 73 FR at 56497 col. 2.

Two State agency commenters said that DCR discharges are harmful because they provide favorable substrate conditions for invasive or exotic species. We acknowledge this as a legitimate concern, but point out that our tiered DEIS continues to support our 2008 ROD's finding that, with the mitigating measures the interim rule provides, any such adverse environmental impact is only minor and indirect. Furthermore, except for the Western Basin of Lake Erie, our proposed rule prohibits the discharge of any type of DCR within 3 miles of any shoreline in the Great Lakes. (The existing exception for the Western Basin recognizes that some vessels carrying limestone or clean stone never leave that area, so a complete prohibition on DCR discharges on those vessels could pose an extreme hardship on them.) This change to the interim rule would eliminate the introduction of any additional DCR substrate to shallower near-shore waters, the preferred habitat of several invasive species found in freshwater.

Two State agency commenters disagreed with our characterization of DCR as non-toxic and non-hazardous. Our tiered DEIS continues to support the interim rule's characterization of any DCR discharge it allows as non-toxic and non-hazardous.

Two State agency commenters pointed out that Lake Superior is the subject of a ''Demonstration Lake'' agreement between several States and the Province of Ontario, Canada, pursuant to which the parties commit themselves to the elimination of pollutants in Lake Superior. The International Joint Commission's 1990 designation of Lake Superior as a ''demonstration area'' led to a Binational Program to Restore and Protect the Lake Superior Basin, under which a zero-discharge standard applies, but only to particularly toxic heavy metals and organochlorine compounds. The Binational Program does not apply a zero discharge standard to other materials, such as DCR, so long as discharges of those other materials do not threaten identified key near-shore and wetland habitats. Our environmental analysis identified such habitats, based on all the data supplied to us by commenters or otherwise available to us. Both the interim rule and the proposed rule prohibit discharges in those habitats and other special protection areas.

Two State agency commenters said the interim rule is at odds with the EPA's Vessel General Permit (VGP) for discharges incidental to the normal operation of vessels. EPA requires VGP permittees to engage in specific behaviors or best management practices in order to minimize those discharges; the approach this SNPRM proposes for our rule. However, there is no conflict between the VGP and the interim rule, because the VGP specifically excludes from its coverage ''discharges of bulk dry cargo residues as defined at 33 CFR 151.66(b),'' citing the interim rule-amended version of 33 CFR 151.66. See VGP (Feb. 5, 2009), sec. 1.2.3.4; docket number EPA–HQ–OW–2008–0055–0717 (available at *http://www.regulations.gov*). One State agency commenter asked us to require specific technological and procedural measures for controlling DCR, pointing out for example that decks can be swept while cargo loading is in progress, and that shoreside facilities can stop their conveyor belts while a vessel repositions itself during loading operations. Another commenter offered information about specific control measures, recommended requiring the

use of best management practices to minimize DCR discharges, and recommended that we regulate shoreside facilities because vessels have no control over those facilities. Our proposed rule's ''broom clean'' requirement does not specify how to comply with that requirement, but one way would be to sweep the deck while loading takes place. We assume that the other control measures cited by these commenters would be among the voluntary options vessel owners and operators would consider in preparing the DCR management plans that we propose to require. With respect to shoreside facilities, we understand that vessels do not control those facilities, but they can voluntarily arrange with a facility to identify measures that the facility is willing to take to help the vessel comply with 33 CFR 151.66's requirements. As we subsequently discuss, we think that our regulatory focus needs to be on vessels rather than on shoreside facilities.

One State agency commenter said that we should voluntarily extend the interim rule's comment period and the period for consulting with States within the framework of the Coastal Zone Management Act (CZMA). The Coast Guard routinely grants State requests for additional time to evaluate Coast Guard CZMA consistency determinations, and both States and the general public will have that additional time to consider the Coast Guard's proposal for regulating DCR during the public comment period for this SNPRM, and therefore we do not see the need for additional extensions of time as requested by this commenter at this time.

One commenter, representing many States with coastal zone management plans, said that we should rely on States to provide us with information about developing port-based DCR control measures. As we subsequently discuss, we think that our regulatory focus needs to be on vessels, rather than on shoreside facilities. However, in proposing that vessels develop DCR management plans, we assume that a vessel's owner or operator will want to consult with shoreside facilities to assess what each facility can do to help the vessel comply with discharge minimization requirements.

Two commenters asked us to remove the quarterly reporting requirement as unnecessary, while two commenters recommended modifications to the Coast Guard recordkeeping form. We lack sufficient information to remove the reporting requirement at this time, and we specifically seek further public comment on the costs and benefits of indefinitely requiring the reporting to continue. Because the recommended modifications came from only two of the commenters and would require the costly revision of a commonly used standard form that provides the information we need, we also decline to modify the form at this time.

Another commenter, representing several associations, said that our reliance on the Act to regulate DCR discharges in the Great Lakes ''notwithstanding any other law'' was misplaced in the absence of a stronger showing of congressional intent to override international treaties like the International Convention for the Prevention of Pollution from Ships (MARPOL 73/78), or a stronger showing of the irreconcilability of MARPOL 73/78 and Great Lakes DCR regulations. MARPOL 73/78 is not irreconcilable with our interim rule or our proposed rule. Our interim rule already shares MARPOL Annex V's requirements for recordkeeping and for avoiding near-shore discharges, and our proposed rule would add an Annex V-like requirement for maintaining and following a DCR management plan. However, MARPOL 73/78 is inapplicable to the U.S. waters of the Great Lakes. APPS and the Act provide the statutory authority for 33 CFR 151.66. In the preamble to our interim rule, 73 FR at 56493, we extensively discussed the reasons why the zero-discharge approach to operational waste discharges (including DCR discharges) generally taken by APPS and Coast Guard regulations is not necessary for protecting the environment and could be disruptive for Great Lakes commerce. We also stated our interpretation that House Report 108–617, which accompanied passage of the Act, clearly expresses Congress's expectation that the Coast Guard will exercise its authority ''notwithstanding any other law'' to ''appropriately balance[e] the needs of maritime commerce and environmental protection.'' We believe the approach we took in the interim rule, and that we now propose strengthening in this rule, meets that expectation by adapting the pollution-preventing spirit of APPS to the special characteristics of the Great Lakes cited in our interim rule preamble's discussion.

The commenter representing several associations also called on the Coast Guard to review DCR control measures every three years. While we acknowledge that industry practices and technology may evolve over time, the Coast Guard declines to set a requirement for a three-year review. However, the Coast Guard will monitor that evolution and expects industry participants to do the same. In evaluating a vessel's compliance with the proposed DCR management plan requirement, the proposed rule would allow Coast Guard inspectors to take into account the extent to which the procedures described in the DCR management plan reflect current industry standard practices for vessels with comparable characteristics, cargoes, and operations. Furthermore, the Coast Guard is subject to statutes, executive orders, and agency policies that require the periodic reevaluation of existing regulations, including 33 CFR 151.66, to make sure that regulations continue to be appropriate despite changes in conditions.

Finally, the commenter representing several associations said that the Environmental Impact Statement (EIS) for the final rule should reevaluate DCR controls that affect special protected areas, and that we should add studies of discharge prohibitions under section 312 of the Clean Water Act, mandate complete discharge bans for new commercial operations and phased-in eliminations for existing operations, require mandatory discharge controls, and undertake additional studies of DCR toxicity. The interim rule already prohibits DCR discharges in special protected areas, and we have reevaluated that prohibition in the environmental analysis for this SNPRM. *www.regulations.gov.* Section 312 of the Clean Water Act seeks to address the dumping of untreated or inadequately treated sewage from vessels into U.S. navigable waters; DCR is not considered sewage waste and therefore this aspect of the comment is beyond the scope of our rulemaking. Our ongoing environmental analysis affirms our earlier assessment that ''any toxic components of DCR deposits in the Great Lakes do not exist in concentrations known to be toxic to organisms.'' 73 FR at 56494 col. 2; *www.regulations.gov.* We do not agree with the commenter's suggestion that mandatory discharge controls be imposed on all operations, but we do propose requiring each vessel to have a DCR management plan describing specifically how it will minimize discharges. This approach would require a vessel's owner or operator to determine and to implement those measures that best achieve discharge minimization, given the vessel's characteristics, cargoes, and operations. We also disagree with the commenter's suggestion that DCR discharge prohibitions be imposed on new operations and phased in for existing operations. We believe our proposal for discharge minimization, in accordance

with a vessel's DCR management plan, best achieves the balance of commercial and environmental considerations that Congress had in mind when it passed the Act.

One commenter said that the EIS for the final rule should study specific best management practices and technology. We agree, and our tiered DEIS reflects our evaluation of specific best management practices and technology.

One commenter, a Canadian association, said that we should harmonize our regulatory treatment of DCR with Canada's. We believe that our interim rule and our proposed rule are in harmony with Canadian DCR regulations for the Great Lakes, which may be found in Division 5, Subdivisions 1–4 of the Statutory Orders and Regulations of Canada (SOR)/2007–86, ''Regulations for the Prevention of Pollution from Ships and for Dangerous Chemicals.'' In promulgating these 2007 regulations, Transport Canada stated that its intent was to make Canadian regulations compatible with the then-current U.S. DCR enforcement policy. Like that policy, and like the interim rule and our proposed rule, the Canadian regulations prohibit the discharge of DCR in near-shore or special protected areas and require DCR discharge recordkeeping. In addition, Canadian regulations require that vessels carry and operate in accordance with a garbage management plan that covers its DCR procedures, and we are proposing a similar requirement with this rule.

The Canadian association also suggested some voluntary industry programs that could provide information about DCR control measures. We agree that owners and operators might find that such programs offer good advice on minimizing DCR discharges.

One commenter, representing Indian tribal interests, asked for consultation with the Coast Guard and asked that the EIS for the final rule add fish spawning grounds as a separate area of focus. Although we determined in the interim rule that Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, is not applicable to this rulemaking because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, 73 FR at 56496 col. 3, we have nevertheless engaged in consultation with this commenter. Documentation of that consultation appears in the docket as item USCG–2004–19621–0182. Fish spawning grounds have already been incorporated in our environmental analysis and DCR discharges in these areas are prohibited.

VI. Discussion of Proposed Rule

The context in which we developed this proposal. We stated in the interim rule that, before taking action in this rulemaking, we would ''determine if, in the long term, the optimal balancing of commercial and environmental interests requires the mandatory use of DCR control measures, the adjustment of the geographical boundaries within which those discharges are currently allowed, or other regulatory changes.'' 73 FR at 56495.

To help us achieve that long term balance, we analyzed the DCR discharge records reported to us in accordance with the interim rule. This helped us describe and quantify DCR discharges, and to determine what control measures were common and effective in controlling DCR discharges. This information is available in the appendices to the tiered DEIS. We also observed Great Lakes dry cargo operations firsthand. During the 2009 and 2010 shipping seasons, we visited vessels and facilities in the region, and observed cargo loading and unloading, and DCR discharge operations. This enabled us to gather DCR data using a known consistent set of metrics and a process that was completely independent of any used by vessel owners or operators to complete and submit their DCR discharge reports.

From this analysis and observation, we drew the following conclusions:

There is significant variation in the amount of DCR that vessels discharge; a finding that is supported by results reported by the regulated industry. However, most vessels appear to be minimizing the volume of DCR they discharge. They treat their cargo as a commodity to be conserved and not wasted. They deal with shoreside facilities that take the same practical view. These vessels and facilities use best practices to prevent cargo spillage in the first place, and to clean it up when it occurs. Most best practices are simple, intuitive, and cost little: For example, lining conveyor belts with fabric skirts, communicating with the shoreside facility to shut down loading chutes while moving from one hold to the next, and using brooms and shovels to clean up DCR and return it to the hold before the hold is sealed.

Deck spillage is a relatively minor source of DCR, and easily addressed through simple measures. By far the greater source of DCR is from cargo hold spillage into vessel tunnels. Tunnel spillage predominantly occurs during cargo unloading.

Within tunnels, large pieces of DCR that remain after unloading should be easy to recover while the vessel is underway, and to place on the conveyor belt with the rest of the cargo during the vessel's next unloading. Dust and small particles, however, inevitably make their way into the vessel's sump water. The sump must be pumped periodically, to preserve the vessel's trim and stability. Sump pumping can take several hours. If performed shoreside, this operation may delay the vessel, increasing its operating costs. It would be economically more rational to perform sump pumping only while the vessel is underway, though this would likely result in sump discharges being the main contributor to DCR discharges in the Great Lakes.

In this SNPRM, we propose a rule that would make three general changes to the current interim rule. (We also propose the non-substantive addition or amendment of two definitions, ''commercial vessel'' and ''mile,'' for stylistic purposes.) Our tiered DEIS supports all of these changes. The proposed rule would, like the interim rule, continue to apply to the owners and operators of U.S., Canadian, and other foreign vessels carrying bulk dry cargo on the U.S. waters of the Great Lakes, and also to the owners and operators of U.S. vessels carrying bulk dry cargo when they are on the Canadian waters of the Great Lakes. It would continue the interim rule's exclusion of non-self-propelled barges, unless they are part of an integrated tug and barge unit. The three proposed changes are as follows:

First, we would require the volume of DCR discharges to be minimized. Except for a new, objectively verifiable, ''broom clean'' standard applying to decks, discharge minimization would be achieved through methods of the vessel owner or operator's choice. ''Broom clean'' would be defined in 33 CFR 151.66(b)(2) as a condition in which deck residues ''consist only of dust, powder, or isolated and random pieces none of which exceeds 1 inch in diameter.'' ''Minimization'' would also be defined, as the ''reduction, to the greatest extent practicable, of any bulk dry cargo residue discharge from the vessel.'' Reinforcing the concept of minimization, we would also redefine bulk DCR to emphasize that DCR can exist ''regardless of particle size.''

Second, we would require discharge minimization methods to be documented in a vessel-specific DCR management plan, which we would

define as a written plan, subject to Coast Guard inspection, meeting at least the minimum criteria we would describe in 33 CFR 151.66(b)(5)

Third, limestone and clean stone DCR discharges would no longer be permitted within 3 miles of shore, except within a limited area of the Western Basin of Lake Erie.

Minimization and the DCR management plan. The proposed rule would require U.S. and foreign carriers conducting bulk dry cargo operations on the Great Lakes to minimize the amount of cargo residue discharged into the Great Lakes. Except for the new broom clean standard, our focus would be on discharge minimization, not on minimizing DCR. Nor would we require vessels to eliminate DCR discharges, because we continue to believe, as we did when we issued the interim rule, that a ''zero discharge'' requirement would be more costly than necessary to protect the environment against adverse impacts, and because the adverse impacts that can be associated with DCR discharges are only minor and indirect. Nevertheless, the elimination of DCR discharges remains the ideal, and we expect vessels to come as close to that ideal as practicable, given current industry standard practices for vessels of ''comparable characteristics, cargoes, and operations''—a term we would define in 33 CFR 151.66(b)(2) as meaning ''similar vessel design, size, age, crew complement, cargoes, operational routes, deck and hold configuration, and fixed cargo transfer equipment configuration.''

Discharge minimization would include keeping the vessel's deck in broom clean condition. All vessels should be able to achieve the broom clean standard on deck, by sweeping spilled cargo back into holds before they are sealed, if not by some other method. However, as noted, deck DCR only accounts for a relatively small proportion of overall DCR discharges. For the more significant tunnel sump discharges, it is not possible for us to define a similar standard that could be applied to all vessels. We believe that the degree of minimization that will be practicable for those discharges will depend on the variables of a vessel's characteristics, cargoes, and operations, and on the technology or procedures used to compensate for those variables.

Rather than mandating the use of specific procedures or technologies that may be ineffective or impracticable for some vessels, each vessel's owner or operator would select the method or methods best suited for minimizing that vessel's DCR discharges. We believe that the great majority of vessels affected by the proposed rule are already effectively minimizing those discharges. However, by making minimization a regulatory requirement, we would level the playing field to ensure that all affected vessels engage in responsible discharge minimization practices.

The proposed requirement for each vessel to carry its own vessel-specific DCR management plan on board, and to have that plan available for inspection, is central to the enforceability of a discharge minimization requirement.

Coast Guard inspectors would enforce discharge minimization by making sure that the vessel has a DCR management plan onboard, that the plan is complete and addresses all required items, and that the master or person in charge (PIC) ensures that the vessel and its crew operate according to the plan. The Coast Guard could infer the vessel's failure to minimize discharges from evidence such as:

- A missing plan;
- A plan that fails to address obvious DCR situations on the vessel that raise the probability of an eventual DCR discharge, such as obvious DCR buildup in the vessel's tunnels;
- Discharge minimization equipment that is called for in the plan but not maintained or operating properly; or
- A crewmember's inability to perform a discharge-minimization task for which the plan makes the crewmember responsible.

To ensure that the vessel's owner and operator exercise due diligence in writing the management plan, we would require the plan to describe:

- The equipment and procedures the vessel uses to minimize cargo spillage during loading and unloading;
- The equipment and procedures the vessel uses to recover spilled cargo and place it in holds or on unloading conveyances;
- How the owner or operator ensures crew familiarity with management plan procedures;
- Who has onboard responsibility for the vessel's discharge minimization procedures;
- What arrangements, if any, the vessel has with specific ports or cargo terminals for unloading and disposing of the vessel's DCR ashore; and
- How unavoidable DCR discharges will be conducted.

Our regulatory focus has been, and will remain, the vessels that carry bulk dry cargo—even though shoreside cargo loading and unloading facilities undoubtedly play a role in creating, or limiting the creation of, the shipboard DCR that is eventually discharged into the Great Lakes. Focusing on vessels makes sense because the Coast Guard's inspection infrastructure is more geared toward vessels than to shoreside facilities. We would expect each vessel's DCR management plan to describe how the vessel works with shoreside facilities to facilitate the vessel's compliance with the requirements of 33 CFR 151.66.

Another important aspect of the proposed management plan requirement is that the plan would need to be revised whenever there was a substantive change to the procedures or the equipment used to manage dry cargo residues on the vessel covered by the plan. Although regular or periodic revisions of the management plan are not required under this proposed rule, vessel owners would be required to maintain the plan in a manner that assures it accurately reflects the current procedures, practices, and technology employed in managing dry cargo residues on the vessel.

We expect that industry standard practices for the management of dry cargo residue will evolve as existing dry cargo conveyance technologies are supplanted by those that are more efficient, effective, and reliable. ''Industry standard practices'' would be specifically defined in 33 CFR 151.66(b)(2) and would include practices for installation, maintenance, operation, training, and supervision relating to bulk dry cargo transfer and DCR control measures. A primary premise of this proposed rule is that a vessel owner or operator will employ dry cargo residue management practices that are on par with the current industry standard for vessels of comparable characteristics, cargoes, and operations. ''Comparable characteristics, cargoes, and operations'' would be defined in 33 CFR 151.66 (b)(2) as meaning ''similar vessel design, size, age, crew complement, cargoes, operational routes, deck and hold configurations, and fixed cargo transfer equipment configurations''. A vessel's compliance with this requirement of the proposed rule would be determined in part by how well the vessel's DCR management practices, as outlined in its management plan, compare with the current industry standard practices employed by the majority of vessels with comparable characteristics, cargoes, and operations. If, for example, a vessel's plan continues to rely on technology or procedures that have been supplanted by more recent, affordable, and easily implemented industry standard practices, a Coast Guard inspector could consider this as evidence of failure to maintain the plan or failure to minimize DCR discharges.

Limestone and clean stone. While we propose to retain the interim rule's

approach toward the discharge of DCR in general, we propose a change with respect to limestone and clean stone DCR discharges. For most substances, DCR discharges have been and would remain subject to several geographic limitations, including a flat prohibition on discharges within a certain distance from shore and in special protected areas. For limestone and clean stone, however, the interim rule continued the prior policy, which allowed DCR from limestone and clean stone to be discharged close to shore, except where the nearest shore is in a special protected area or where the discharge would have an ''apparent impact'' on wetlands, fish spawning areas, or potable water intakes. We think this standard is too subjective and that it could be difficult for vessel crews to determine whether or not a stone DCR discharge would have an apparent impact on the local environment. Therefore, we propose making limestone and clean stone DCR discharges subject to the same 3 mile restriction we impose on other DCR discharges. Our 2009 and 2010 field research and the EIS indicated that limestone and clean stone vessels already avoid DCR discharges within 3 miles of shore because of near-shore operational hazards. Thus, those vessels should not incur any additional cost from the proposed extension of the exclusion zone. (We would preserve the existing exception for a limited portion of Lake Erie's Western Basin because some vessels carrying limestone or clean stone never leave that area, and if such a vessel wanted to discharge DCR it could be unusually and adversely affected by a complete prohibition on DCR discharges in the area.) Our proposed change would ensure that near-shore wetlands, fish spawning areas, and potable water intakes within the entire Great Lakes ecosystem are protected from DCR discharges, while simultaneously simplifying understanding and compliance with the rule for the regulated industry. It should also mitigate an environmental impact identified in the Final EIS for the interim rule; that is, possible changes in the physical structure of the lake bottom sediment, which may cause a less than 10% increase in zebra and quagga mussel attachment rates.

VII. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on 13 of these statutes or executive orders.

A. Regulatory Planning and Review

Executive Orders 12866 (''Regulatory Planning and Review'') and 13563 (''Improving Regulation and Regulatory Review'') direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This SNPRM has not been designated a ''significant regulatory action'' under section 3(f) of Executive Order 12866. Accordingly, the SNPRM has not been reviewed by the Office of Management and Budget. A draft Regulatory Assessment follows:

The Coast Guard proposes a rule that would require vessels to minimize their DCR discharges, to document their DCR minimization methods, and to observe new restrictions on limestone and clean stone DCR discharges.

Table 1 compares components of the interim rule (baseline used for this rulemaking) and this SNPRM. It summarizes any changes in the component that we propose in the SNPRM.

TABLE 1—NO-ACTION (IR) AND PREFERRED ALTERNATIVE COMPARISON SUMMARY

Provision description	IR Provision	IR Provision synopsis	SNPRM Provision	SNPRM Provision synopsis	Change from IR to SNPRM
Record-keeping.	33 CFR 151.66(c)(1)(iv).	Vessels must record all DCR loading, unloading and sweeping on form CG–33.	NA		Recordkeeping requirement would remain in place. The industry would not incur any change in cost.
Reporting/ Certification.	33 CFR 151.66(c)(1)(iv).	The data collected are used to determine vessel practices in handling DCR, and the amount of DCR that is being managed by the vessels.	NA		Vessels will continue to certify and submit reports on a quarterly basis. The industry will not incur any change in cost.
Limestone & clean stone.	33 CFR 151.66(b)	Limestone and clean stone are exempt from the 3-mile near-shore sweeping boundary. Under the IR, these commodities can be discharged anywhere along the shoreline, provided there is no apparent impact on environmentally sensitive areas.	33 CFR 151.66(b)(2).	Limestone and clean stone DCR discharges, under the proposed rule, would not be allowed within 3 miles of shore.	There would be a no-cost change; our research indicates that vessels already avoid DCR discharges within 3 miles of shore because of near-shore operational hazards.
Voluntary minimization.	33 CFR 151.66(b)	Vessels are encouraged to minimize the amount of DCR going into the water and the use of control measures to reduce the amount of DCR falling on the decks and tunnels of vessels.	NA	The portion of 33 CFR 151.66(b) in the IR dealing with voluntary minimization would be removed in the SNPRM.	There is no cost associated with the removal of this IR requirement. (See the management plan below for details on mandatory minimization.)

TABLE 1—NO-ACTION (IR) AND PREFERRED ALTERNATIVE COMPARISON SUMMARY—Continued

Provision description	IR Provision	IR Provision synopsis	SNPRM Provision	SNPRM Provision synopsis	Change from IR to SNPRM
Broom clean standard.	NA		33 CFR 151.66(b)(3).	This requirement stipulates that vessels must show that decks have been swept to a standard that is in keeping with the mandatory minimization requirement of this proposed rule.	Vessels would realize a new cost for this requirement. We anticipate that vessels would see an annual cost increase ranging from $14,203 to $53,263 (non-discounted). Foreign vessels would incur an average annual cost of $28,847 (non-discounted). The benefit of this requirement is a reduction in the amount of discharge going into the waters of the Great Lakes.
Management plan.	NA		33 CFR 151.66(b)(4).	The plan must describe the specific measures the vessel employs to ensure the minimization of bulk dry cargo residue discharge.	The new requirement would have an initial year cost of $24,777 (non-discounted) to prepare a management plan. After the initial year, existing U.S. vessels would not incur additional cost (within the 10-year period of analysis) from this new requirement. Foreign vessels would incur a first year cost of $17,340 and an annual cost of $1,530 (all non-discounted) from this new requirement. This requirement would ensure that vessels are minimizing the amount of DCR going into the waters of the Great Lakes, and provide USCG with the means of policing DCR discharge.

Costs

The proposed rule has costs associated with having vessel owners and operators develop and maintain a management plan that describes the specific measures the vessel employs to ensure the minimization of bulk DCR discharges in the waters of the Great Lakes. The proposed rule would not impose any additional capital expenditures on the U.S. bulk dry cargo fleet operating exclusively on the Great Lakes, since we believe that vessels would use equipment already available onboard their vessels to comply with this proposed rule (for further information on specific measures currently being used, see DEIS).

We estimated the annualized costs of the SNPRM for the US fleet to range from $17,500 to $56,298 (with a per vessel average cost of $671), and the annualized costs of the SNPRM for the foreign fleet to range from $13,922 to $48,697 (with a per vessel average cost of $368), all costs are estimated using a 7 percent discount rate. The following table summarizes the affected population of vessels, costs and benefits of the proposed rule.

TABLE 2—SUMMARY OF AFFECTED POPULATION, COSTS AND BENEFITS OF THE SNPRM

Affected Population	
US	55 Vessels (14 owners).
Foreign	85 Vessels.
Total	140 Vessels.
Costs*	
US	Annualized = $17,500—$56,298. 10 year = $122,916—$395,413.
Foreign	Annualized = $13,922—$48,697. 10 year = $97,786—$342,029.
Total	Annualized = $31,423—$104,995. 10 year = $220,701—$737,444.
Benefits	
Minimizing the amount of DCR discharged into the waters of the Great Lakes would improve the aquatic environment. Promotion of environmental stewardship among owners and operators.	

* Costs are presented as ranges and estimated using a 7 percent discount rate.

The proposed rule would require all vessels loading or unloading bulk dry cargo at ports within the U.S. waters of the Great Lakes, and each U.S. bulk dry cargo vessel anywhere on the Great Lakes, to have a management plan

onboard and available for Coast Guard inspection that describes the specific measures the vessel employs to minimize DCR discharges. Foreign vessels greater than 400 GT can meet the management plan requirement under this proposed rule because they are required to meet the similar waste management plan requirement in Annex V of MARPOL 73/78. However, since Annex V of MARPOL 73/78 does not cover all of the requirements in 33 CFR 151.66(b)(4), foreign vessels would be required to address any additional management plan requirements under this proposed rule.

We estimate that the proposed rule would affect 14 entities that currently manage the 55 U.S. dry bulk carrier vessels, and 85 foreign dry bulk carrier vessels (70 Canadian and 15 non-Canadian) operating within U.S. jurisdictional waters of the Great Lakes in any given year. We anticipate that the controlling entities of U.S. vessels would write the management plans. We assume that a management plan for a foreign vessel operating in the U.S. waters of the Great Lakes would be written by the vessel master.

We estimate the affected population of foreign dry bulk carriers to be 85 vessels based on the data obtained from reporting requirements established by the 2009 interim rule. We originally estimated the foreign vessel population to be 219 vessels for 2008 NPRM and the 2009 interim rule. Our revised estimate of the foreign vessel population is based on recent data on foreign vessel dry cargo operations that was not available for the NPRM or the interim rule publications.

To maintain consistency with the cost methodology used in the interim rule, we continue to use Coast Guard reimbursable standard rates found in COMMANDANT INSTRUCTION 7310.1M (''COMDTINST'') to analyze the changes in wages for this rulemaking.[1] We have verified that the wages found in the COMDTINST are comparable to the loaded wages found in the Bureau of Labor Statistics. Therefore, that comparison between the interim rule and the SNPRM is straightforward.

Table 3 below shows estimated costs for developing the management plan required by proposed 33 CFR 151.66(b)(4) and for having onboard a hard copy of the plan available for inspection by the Coast Guard.

TABLE 3—COST OF COMPANY DEVELOPMENT OF A MANAGEMENT PLAN

[Non-discounted]

33 CFR 151.66 (b)(4)	Developer rating	Labor rate (loaded)	Time in hours	Cost per plan	Number of plans	Total initial cost	Recurring cost
US							
Company management plan ...	GS–12	$69	25	$1,725	14	$24,150	.....
Cost of copies	GS–3	28	.05	[a] 11.40	55	627	.....
Foreign							
Canadian Vessel	O–6	136	[b] 1.5	204	70	14,280	.....
Non-Canadian Foreign	O–6	136	[b] 1.5	204	15	3,060	[c] 1,530
Total	.....	.....	.....	.....	.....	42,117	1,530

Note: Values may not total due to rounding.

(a): Assumes that companies would spend $10 on supplies for each copy of the management plan. The $10 is added to the labor and time estimated to be $1.40 ($28 * 0.05 hrs), therefore the total cost of copies per plan is $11.40.

(b): We assume that foreign vessels greater than 400 GT would develop a modified management plan, since foreign vessels greater than 400 GT are required to have a waste management plan in accordance with Annex V of MARPOL 73/78. Therefore, the time required by foreign vessels greater than 400 GT to develop a management plan would be less than the time estimated for the U.S. fleet. Time required for foreign vessels developing a management plan was provided by the USCG Environmental Standards Division.

(c): The recurring cost of the management plan is only for half of the non-Canadian foreign vessels entering the Great Lakes in any given year. We anticipate that half the number of these vessels would return the following year, while the other half would be new visitors to the Great Lakes.

In addition to the management plan, the proposed rule would require that the deck be maintained in a broom clean condition whenever a vessel is in transit (33 CFR 151.66(b)(4)). We assume for the purpose of this regulatory analysis that an Able Body Seaman (AB) would be tasked with maintaining the broom clean standard as required under this proposed rule during loading and unloading operations, to the best of the AB's abilities under current vessel conditions. The requirement is intended to ensure that vessels are active in reducing the amount of DCR going into the waters of the Great Lakes. We do not expect that vessels would need to purchase additional brooms, shovels, etc., since these items are standard equipment on those vessels.

In order to determine the cost of maintaining decks in broom clean condition, we established that the surface area requiring broom cleaning would be those areas around the cargo hatches. During a site visit to the Great Lakes to observe vessel loading and unloading operations, we recorded the number of hatches for each vessel visited. We extrapolated the observed data to obtain an estimated number of total hatches for the Great Lakes bulk dry cargo fleet. We estimated the total number of hatches for the 55 U.S. vessels to be 1,169, while the total number of hatches for the 70 Canadian and 15 non-Canadian foreign vessels was estimated at 1,672. We estimate that 15 to 56 percent of the hatches would be affected by the broom clean standard after every loading and unloading event, and that it would take an AB three minutes per hatch (at a wage rate of $27 per hour) to meet the broom clean standard. Table 4 shows the annual estimated cost to the U.S. fleet for maintaining the broom clean standard. The cost range for this requirement is $14,203 to $53,001 (non-discounted). Costs are based on all vessels making an average of 60 trips per year.[2]

[1] COMMANDANT INSTRUCTION 7310.1M, ''COAST GUARD REIMBURSABLE STANDARD RATES'', FEB 28 2011, *http://www.uscg.mil/directives/ci/7000-7999/CI_7310_1M.PDF* (begins on page 3).

[2] Annual vessel trip information comes from the DEIS.

TABLE 4—U.S. FLEET COST FOR MEETING THE BROOM CLEAN STANDARD

33 CFR 151.66 (b)(3)	Crew member	Labor rate	Time req'd (%/Hr)	Total number of fleet hatches	% of Hatches swept	% Vessels broom clean	Avg number of trips/yr.	Number of crew	Total hrs/ yr.	Total cost
Broom Clean (Low)	Deckhand (AB)	$27	0.05	1,169	15	100	60	1	526	$14,203
Broom Clean (High)	Deckhand (AB)	27	0.05	1,169	56	100	60	1	1,963	53,001

Note: Values may not total due to rounding.

The cost to Canadian and non-Canadian foreign vessels is shown in Tables 5(a) and (b). The combined cost of the broom clean standard for foreign vessels is estimated to range from $69 to $45, 247 (non-discounted). Costs are based on Canadian vessels making an average of 45 trips per year and non-Canadian foreign vessels averaging only one trip per year.

TABLE 5(A)—CANADIAN FLEET COST FOR MEETING THE BROOM CLEAN STANDARD

33 CFR 151.66 (b)(3)	Crew member	Labor rate	Time req'd (%/Hr)	Total number of fleet hatches	% of Hatches swept	% Vessels broom clean	Avg number of trips/yr.	Number of crew	Total hrs/ yr.	Total cost
Broom Clean (Low)	Deckhand (AB)	$27	0.05	1,330	15	100	45	1	449	$12,120
Broom Clean (High)	Deckhand (AB)	27	0.05	1,330	56	100	45	1	1676	45,247

Note: Values may not total due to rounding.

TABLE 5(B) NON-CANADIAN FOREIGN FLEET COST FOR MEETING THE BROOM CLEAN STANDARD

33 CFR 151.66 (b)(3)	Crew member	Labor rate	Time req'd (%/Hr)	Total number of fleet hatches	% of Hatches swept	% Vessels broom clean	Avg number of trips/yr.	Number of crew	Total hrs/ yr.	Total cost
Broom Clean (Low)	Deckhand (AB)	$27	0.05	342	15	100	1	1	3	$69
Broom Clean (High)	Deckhand (AB)	27	0.05	342	56	100	1	1	10	259

Note: Values may not total due to rounding.

The cost of complying with the management plan and broom clean requirements for the U.S. fleet is estimated to have a first-year cost range of $38,982 to $77,778 (non-discounted) and recurring annual costs ranging from $14,203 to $53,001 (non-discounted). Table 6 shows the U.S. fleet cost estimate for the 10-year period of analysis.

TABLE 6—U.S. VESSELS HIGH AND LOW COST ESTIMATES

Year	High Cost Estimate			Low Cost Estimate		
	Undiscounted	3%	7%	Undiscounted	3%	7%
1	$77,778	$75,513	$72,690	$38,982	$37,846	$36,432
2	53,001	49,959	46,293	14,203	13,388	12,406
3	53,001	48,503	43,265	14,203	12,998	11,594
4	53,001	47,091	40,434	14,203	12,619	10,836
5	53,001	45,719	37,789	14,203	12,252	10,127
6	53,001	44,388	35,317	14,203	11,895	9,464
7	53,001	43,095	33,006	14,203	11,549	8,845
8	53,001	41,839	30,847	14,203	11,212	8,266
9	53,001	40,621	28,829	14,203	10,886	7,726
10	53,001	39,438	26,943	14,203	10,569	7,220
Total Cost	554,787	476,165	395,413	166,812	145,214	122,916
Annualized Cost	.....	55,821	56,298	.....	17,024	17,500

Note: Values may not total due to rounding.

In addition, we estimate that foreign vessels would incur a first-year cost that ranges from $15,249 to $59,527 (non-discounted). All foreign vessels would incur an annual cost due to the broom clean standard; however, half of the 15 non-Canadian foreign vessels entering the U.S. waters of the Great Lakes would be anticipated to incur an additional cost for developing a management plan since the same non-Canadian foreign vessel is not expected to make the same trip every year. We estimate recurring cost of all foreign vessels to range from $13,719 to $47,035 (non-discounted). Table 7 shows the U.S. fleet cost estimate for the 10-year period of analysis.

TABLE 7—FOREIGN VESSELS HIGH AND LOW COST ESTIMATES

Year	High Cost Estimate			Low Cost Estimate		
	Undiscounted	3%	7%	Undiscounted	3%	7%
1	$59,527	$57,793	$55,632	$15,249	$14,805	$14,251
2	47,035	44,335	41,082	13,719	12,391	11,983
3	47,035	43,044	38,395	13,719	12,555	11,199
4	47,035	41,790	35,883	13,719	12,189	10,466
5	47,035	40,573	33,535	13,719	11,834	9,781
6	47,035	39,391	31,342	13,719	11,489	9,141
7	47,035	38,244	29,291	13,719	11,155	8,543
8	47,035	37,130	27,375	13,719	10,830	7,985
9	47,035	36,049	25,584	13,719	10,514	7,462
10	47,035	34,999	23,910	13,719	10,208	6,974
Total Cost	482,843	413,347	342,029	138,719	118,510	97,786
Annualized Cost	.....	48,457	48,697	.....	13,893	13,922

Note: Values may not total due to rounding.

The proposed rule would also prohibit all near-shore limestone and clean stone DCR discharges, except in the Western Basin of Lake Erie. Our research found that vessels carrying limestone and clean stone already avoid DCR discharges within 3 miles of shore because of near-shore operational hazards. Therefore, the proposed prohibition of these discharges would not incur any additional cost to the fleet.

We estimate the total annualized cost to industry (US and foreign) of the SNPRM to be $31,423 to $104,995 and the total discounted 10-year costs to industry to be $220,701 to $737,444 (values discounted at 7 percent). We do not expect there would be additional government costs required to implement the changes from this SNPRM.

Benefits

We examined the benefits of the proposed rule and concluded that the benefits are qualitative. The requirement of the management plan causes all vessel owners and operators to become more active in preserving the Great Lakes' aquatic environment. The proposed rule sets a performance standard that allows the industry to determine its most efficient methods to minimize DCR discharges.

We anticipate that the proposed rule would change the current industry behavior of discharging DCR into the waters of the Great Lakes. The proposed requirement for vessels to have and follow DCR management plans should increase overall compliance levels with today's industry best practices for preventing or minimizing DCR discharges. In enforcing the DCR management plan requirement, the Coast Guard would be able to consider how well a vessel's plan reflects then-current industry standard practices. This would ensure that if, over time, there is an improvement in most vessels' ability to manage DCR, all vessels will be measured against the improved standard. Although our environmental analysis has shown only minor and indirect adverse environmental impacts from DCR discharges, we assume that any reduction in those impacts would provide at least a qualitative benefit. In addition, the vessel owners and operators themselves could realize efficiency gains from maintaining and gradually improving their DCR management practices. The proposed rule would not impose a rigid prescriptive standard, but would give the industry the flexibility to develop vessel-specific performance standards that achieve the regulatory objectives in the most cost-effective way.

Alternatives

Alternative 1: no action. This alternative would simply keep the current DCR interim rule in place. We have re-evaluated the interim rule and concluded that our proposed rule would do more to minimize the volume of DCR discharge going into the waters of the Great Lakes and would reduce the interim rule's regulatory costs. Therefore we reject this alternative.

Alternative 2: modified regulations with DCR management plan requirement. This is the preferred alternative described in this SNPRM and evaluated here.

Alternative 3: baseline control measures. This alternative would enforce the existing DCR management baseline. Each vessel would be required to maintain its current practices or equipment for managing DCR. We closely evaluated this alternative but reject it because over time a vessel's baseline operational equipment will wear out and need replacement, and it would be difficult for inspectors to gauge how well the replacement equipment replicates the operational state attained by the original equipment. Moreover, this alternative provides inferior environmental protection, by locking vessels into today's baseline. By contrast, the preferred alternative assumes that DCR management practices and technology will improve over time, and we want the regulatory compliance of vessels in the future to be measured against the best practices and technology then available, and not against today's baseline, which we assume will represent a lower level of DCR management capability.

B. Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard analysis did not find any non-profit or governmental small entities. However, we did find 9 small entities affected by this rule classified under one of the following North American Industry Classification System (NAICS) 6-digit codes for water transportation: 238910—Site Preparation Constructor; 483113—Coastal and Great Lakes Freight Transportation; 484110—General Freight Trucking Local; 487210—Scenic & Sightseeing Transportation Water;

483212—Inland Water Passenger Transportation; and 483211—Inland Water Freight. According to the Small Business Administration's size standards, a U.S. company classified under these NAICS codes with annual revenues of less than $7 million is considered a small business. We estimate the cost of this rule to be less than 1 percent of revenue for 100 percent of the small entities for both initial and recurring costs. The estimated annualized costs per small entity complying with the proposed rule would range from a high estimate of $7,327 to a low estimate of $2,267 with both discounted at 7 percent respectively.

Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. Comments submitted in response to this finding will be evaluated under the criteria in the ''Regulatory Information'' section of this preamble.

We are interested in the potential impacts from this proposed rule on small businesses and we request public comment on these potential impacts. If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this proposed rule would have a significant economic impact on it, please submit a comment to the docket where indicated under the ''Public Participation and Request for Comments'' section of this SNPRM, or see *www.regulations.gov,* docket number USCG–2004–19621, for additional instruction.

C. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this proposed rule so that they can better evaluate its effects on them and participate in the rulemaking. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult John C. Morris of the Office of Operating and Environmental Standards (CG–OES–3) at the telephone number or email address indicated under the **FOR FURTHER INFORMATION CONTACT** section of this notice. The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

D. Collection of Information

The proposed rule would call for a revision to an existing collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). As defined in 5 CFR 1310.3(c), ''collection of information'' comprises reporting, recordkeeping, monitoring, posting, labeling, and other, similar actions. The title and description of those who must collect the information, and an estimate of the total annual burden can be found under, ''The estimate covers the time for reviewing instructions, searching existing sources of data, gathering and maintaining the data needed, and completing and reviewing the collection.''

Title: Waste Management Plans, Refuse Discharge Logs, and Letters of Instruction for Certain Persons in Charge (PIC).

Summary of the Collection of Information

The Information Collection Request (ICR) is a collection of recordkeeping requirements that documents management of waste onboard vessels. It also requires that persons on non-inspected vessels must carry a letter verifying the credential of the PIC, and that they have had instruction on the management of waste. Currently, the ICR covers Waste Management Plans and Refuse Discharge Logs for The International Convention for the Prevention of Pollution from Ships letters of instruction for certain PIC and the DCR recordkeeping.

This proposed rule deals with section D of the current ICR, which addresses all dry bulk carrier vessels (foreign and domestic) operating on the Great Lakes. Under the interim rule, this population is required to report DCR quantities and the location of discharges into U.S. waters of the Great Lakes, in accordance with 33 CFR 151.66(c). We used the information collected from these reports to analyze and determine how best to regulate vessels in handling/managing DCR. The proposed rule would require U.S. and foreign vessels to develop and maintain a management plan that describes the specific measures the vessel employs to ensure the minimization of bulk DCR discharges.

Need for Information: Since there is no uniformity as to the types of equipment used throughout the fleet, the management plan would provide a description of how the individual vessel ensures the minimization of DCR discharges.

Proposed Use of Information: The information in the management plan would provide the Coast Guard with the means to monitor how individual operators are effectively managing and minimizing their DCR discharges. In addition, the management plan would be used by Coast Guard inspectors to enforce the minimization requirement.

Description of the Respondents: We estimate that all U.S. bulk dry cargo vessels operating anywhere in the Great Lakes, and foreign commercial bulk dry cargo vessels operating on the U.S. waters of the Great Lakes, would be affected by the management plan requirement.

Number of Respondents: The management plan would have a total number of 140 [3] (55 U.S. vessels + 70 Canadian vessels + 15 non–Canadian foreign vessels) respondents, which account for the total number of bulk dry cargo vessels operating on the waters of the Great Lakes in any given year.

Frequency of the Response: All vessels carrying bulk dry cargo on the Great Lakes are required to develop a management plan. The frequency in the development of the management plan would be subject to vessels modifying their vessels and/or equipment. We do not anticipate vessels modifying or adding major equipment during the 10-year period of this analysis. We therefore assume that the development of the management plan would occur once for U.S. and Canadian vessels. However, a percentage (50%) of non-Canadian foreign vessels would be required to develop a management plan each year, since we estimate that this percentage would be entering the Great Lakes for the first time. Therefore, we estimate that in the first year there would be 140 (55 U.S. vessels + 70 Canadian vessels + 15 non-Canadian foreign vessels) total management plans developed by all bulk dry cargo vessels operating in U.S. waters, and 8 (rounded) reoccurring responses by non-Canadian foreign vessels.

Burden of Response: We estimate that there would be 55 management plans developed for the entire U.S. dry cargo vessel fleet operating on the Great

[3] The number of foreign vessels affected has been updated (from the interim rule) due to information being provided by Form CG–33.

Lakes, and that it would only affect the burden of response in the first year that the proposed rule is in effect. The total estimated burden hours for the U.S. fleet is 352.75 (350 hours company section + 2.75 hours copies), at a cost to the fleet of $24,150 (non-discounted). The total foreign vessel fleet would have a burden of response in the first year of 128 hours (1.5 hours for management plan × 85 vessels), at a cost of $17,340 (non-discounted).

Estimate of Total Annual Burden: The proposed rule would not have an annual cost burden after the first year of this rule being implemented for U.S. and Canadian vessels (see ''BURDEN OF RESPONSE,'' above). After the first year, non-Canadian foreign vessels would incur an annual burden. We anticipate non–Canadian vessels would incur an annual burden of 11 hours for management plan development at a cost of $1,530 (non-discounted).

As required by the Paperwork Reduction Act of 1995, we have submitted a copy of this proposed rule to OMB for its review of the collection of information.

We ask for public comment on the proposed collection of information to help us determine how useful the information is; whether it can help us perform our functions better; whether it is readily available elsewhere; how accurate our estimate of the burden of collection is; how valid our methods for determining the burden are; how we can improve the quality, usefulness, and clarity of the information, and how we can minimize the burden of collection.

If you submit comments on the collection of information, submit them both to OMB and to the Docket Management Facility where indicated under **ADDRESSES**, by the date under **DATES**.

You need not respond to a collection of information unless it displays a currently valid control number from OMB. Before the Coast Guard could enforce the collection of information requirements in this proposed rule, OMB would need to approve the Coast Guard's request to collect this information.

E. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it does not have implications for federalism. As we discussed at length in part V of this preamble, we received comments from several States in response to our interim rule and are aware that some agencies in some States bordering the Great Lakes disagree with the Coast Guard's approach to the discharge of DCR in those waters. We encourage all such States, and any of their agencies with a stake in the outcome of this rulemaking, to continue sharing their input with us. We believe neither the interim rule, nor the rule proposed by this document, necessarily preempts or conflicts with State laws that may prohibit DCR discharges or impose conditions on those discharges that differ from those imposed by the Coast Guard. We do not take the position that such State laws facially frustrate an overriding Federal purpose. Until such time as a cognizant court rules to the contrary, we caution carriers that they must comply with all applicable Federal and State laws regulating DCR discharges. We encourage States to make us aware of laws they think are applicable. As we are so informed, we will share that information with the public by placing it in the docket for this rulemaking.

F. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble

G. Taking of Private Property

This proposed rule would not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

H. Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

I. Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

J. Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. However, a group representing tribal interests requested consultation, and the Coast Guard agreed to brief that group on the rulemaking. The briefing is described in the docket (see docket item USCG–2004–19621–0182).

K. Energy Effects

We have analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a ''significant energy action'' under that order because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

L. Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies. This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

M. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National

Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f). A draft ''Environmental Impact Statement'' (EIS) is available in the docket where indicated under the ''Public Participation and Request for Comments'' section of this preamble. We encourage the public to submit comments on the draft EIS.

List of Subjects in 33 CFR Part 151

Administrative practice and procedure, Oil pollution, Penalties, Reporting and recordkeeping requirements, Water pollution control.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 151 as follows:

PART 151—VESSELS CARRYING OIL, NOXIOUS LIQUID SUBSTANCES, GARBAGE, MUNICIPAL OR COMMERCIAL WASTE, AND BALLAST WATER

1. The authority citation for part 151 continues to read as follows:

Authority: 33 U.S.C. 1321, 1902, 1903, 1908; 46 U.S.C. 6101; Pub. L. 104–227 (110 Stat. 3034); Pub. L. 108–293 (118 Stat. 1063), § 623; E.O. 12777, 3 CFR, 1991 Comp. p. 351; DHS Delegation No. 0170.1, sec. 2(77).

2. Amend § 151.66 by revising paragraph (b) to read as follows:

§ 151.66 Operating requirements: Discharge of garbage in the Great Lakes and other navigable waters.

* * * * *

(b)(1) On the U.S. waters of the Great Lakes, commercial vessels may discharge bulk dry cargo residues in accordance with and subject to the conditions imposed by this paragraph

(2) As used in this paragraph—

Apostle Islands National Lakeshore means the site on or near Lake Superior administered by the National Park Service, less Madeline Island, and including the Wisconsin shoreline of Bayfield Peninsula from the point of land at 46°57′19.7″ N, 090°52′51.0″ W southwest along the shoreline to a point of land at 46°52′56.4″ N, 091°3′3.1″ W.

Broom clean means a condition in which the vessel's deck shows that care has been taken to prevent or eliminate any visible concentration of bulk dry cargo residues, so that any remaining bulk dry cargo residues consist only of dust, powder, or isolated and random pieces, none of which exceeds 1 inch in diameter.

Bulk dry cargo residues means non-hazardous and non-toxic residues, regardless of particle size, of dry cargo carried in bulk, including limestone and other clean stone, iron ore, coal, salt, and cement. It does not include residues of any substance known to be toxic or hazardous, such as nickel, copper, zinc, lead, or materials classified as hazardous in provisions of law or treaty.

Caribou Island and Southwest Bank Protection Area means the area enclosed by rhumb lines connecting the following coordinates, beginning on the northernmost point and proceeding clockwise:

47°30.0′ N, 085°50.0′ W
47°24.2′ N, 085°38.5′ W
47°04.0′ N, 085°49.0′ W
47°05.7′ N, 085°59.0′ W
47°18.1′ N, 086°05.0′ W

Commercial vessel means a commercial vessel loading, unloading, or discharging bulk dry cargo in the U.S. waters of the Great Lakes, or a U.S. commercial vessel transporting bulk dry cargo and operating anywhere on the Great Lakes; but the term does not include a non-self-propelled barge unless it is part of an integrated tug and barge unit.

Comparable characteristics, cargoes, and operations means similar vessel design, size, age, crew complement, cargoes, operational routes, deck and hold configuration, and fixed cargo transfer equipment configuration.

Detroit River International Wildlife Refuge means the U.S. waters of the Detroit River bound by the area extending from the Michigan shore at the southern outlet of the Rouge River to 41°54.0′ N 083°06.0′ W along the U.S.-Canada boundary southward and clockwise connecting points:

42°02.0′ N, 083°08.0′ W
41°54.0′ N, 083°06.0′ W
41°50.0′ N, 083°10.0′ W
41°44.52′ N, 083°22.0 ′ W
41°44.19′ N, 083°27.0′ W

Dry cargo residue (or DCR) management plan means the plan required by paragraph (b)(5) of this section.

Grand Portage National Monument means the site on or near Lake Superior, administered by the National Park Service, from the southwest corner of the monument point of land at 47°57.521′ N, 089°41.245′ W to the northeast corner of the monument point of land, 47°57.888′ N, 089°40.725′ W.

Indiana Dunes National Lakeshore means the site on or near Lake Michigan, administered by the National Park Service, from a point of land near Gary, Indiana at 41°42′59.4″ N, 086°54′59.9″ W eastward along the shoreline to 41°37′08.8″ N, 087°17′18.8″ W near Michigan City, Indiana.

Industry standard practices means practices that ensure the proper installation, maintenance, and operation of shipboard cargo transfer and DCR removal equipment, proper crew training in DCR minimization procedures and cargo transfer operations, and proper supervision of cargo transfer operations to minimize DCR accumulation on or in a commercial vessel.

Integrated tug and barge unit means any tug-barge combination which, through the use of special design features or a specially designed connection system, has increased sea-keeping capabilities relative to a tug and barge in the conventional pushing mode.

Isle Royale National Park means the site on or near Lake Superior, administered by the National Park Service, where the boundary includes any submerged lands within the territorial jurisdiction of the United States within 4½ miles of the shoreline of Isle Royale and the surrounding islands, including Passage Island and Gull Island.

Mile means a statute mile.

Milwaukee Mid-Lake Special Protection Area means the area enclosed by rhumb lines connecting the following coordinates, beginning on the northernmost point and proceeding clockwise:

43°27.0′ N, 087°14.0′ W
43°21.2′ N, 087°02.3′ W
43°03.3′ N, 087°04.8′ W
42°57.5′ N, 087°21.0′ W
43°16.0′ N, 087°39.8′ W

Minimization means the reduction, to the greatest extent practicable, of any bulk dry cargo residue discharge from the vessel.

Northern Refuge means the area enclosed by rhumb lines connecting the coordinates, beginning on the northernmost point and proceeding clockwise:

45°45.0′ N, 086°00.0′ W

western shore of High Island, southern shore of Beaver Island:

45°30.0′ N, 085°30.0′ W
45°30.0′ N, 085°15.0′ W
45°25.0′ N, 085°15.0′ W
45°25.0′ N, 085°20.0′ W
45°20.0′ N, 085°20.0′ W
45°20.0′ N, 085°40.0′ W
45°15.0′ N, 085°40.0′ W
45°15.0′ N, 085°50.0′ W
45°10.0′ N, 085°50.0′ W
45°10.0′ N, 086°00.0′ W

Pictured Rocks National Lakeshore means the site on or near Lake Superior, administered by the National Park Service, from a point of land at

46°26′21.3″ N, 086°36′43.2″ W eastward along the Michigan shoreline to 46°40′22.2″ N, 085°59′58.1″ W.

Six Fathom Scarp Mid-Lake Special Protection Area means the area enclosed by rhumb lines connecting the following coordinates, beginning on the northernmost point and proceeding clockwise:

44°55.0′ N, 082°33.0′ W
44°47.0′ N, 082°18.0′ W
44°39.0′ N, 082°13.0′ W
44°27.0′ N, 082°13.0′ W
44°27.0′ N, 082°20.0′ W
44°17.0′ N, 082°25.0′ W
44°17.0′ N, 082°30.0′ W
44°28.0′ N, 082°40.0′ W
44°51.0′ N, 082°44.0′ W
44°53.0′ N, 082°44.0′ W
44°54.0′ N, 082°40.0′ W

Sleeping Bear Dunes National Lakeshore means the site on or near Lake Michigan, administered by the National Park Service, that includes North Manitou Island, South Manitou Island and the Michigan shoreline from a point of land at 44°42′45.1″ N, 086°12′18.1″ W north and eastward along the shoreline to 44°57′12.0″ N, 085°48′12.8″ W.

Stannard Rock Protection Area means the area within a 6-mile radius from Stannard Rock Light, at 47°10′57″ N, 087°13′34″ W.

Superior Shoal Protection Area means the area within a 6-mile radius from the center of Superior Shoal, at 48°03.2′ N, 087°06.3′ W.

Thunder Bay National Marine Sanctuary means the site on or near Lake Huron designated by the National Oceanic and Atmospheric Administration as the boundary that forms an approximately rectangular area by extending along the ordinary high water mark between the northern and southern boundaries of Alpena County, cutting across the mouths of rivers and streams, and lakeward from those points along latitude lines to longitude 83 degrees west. The coordinates of the boundary are:

45°12′25.5″ N, 083°23′18.6″ W
45°12′25.5″ N, 083°00′00″ W
44°51′30.5″ N, 083°00′00″ W
44°51′30.5″ N, 083°19′17.3″ W

Waukegan Special Protection Area means the area enclosed by rhumb lines connecting the following coordinates, beginning on the northernmost point and proceeding clockwise:

42°24.3′ N, 087°29.3′ W
42°13.0′ N, 087°25.1′ W
42°12.2′ N, 087°29.1′ W
42°18.1′ N, 087°33.1′ W
42°24.1′ N, 087°32.0′ W

Western Basin means that portion of Lake Erie west of a line due south from Point Pelee.

(3) Discharges of bulk dry cargo residue under paragraph (b) of this section are allowed, subject to the conditions listed in Table 151.66(b)(3) of this section.

TABLE 151.66(B)(3)—BULK DRY CARGO RESIDUE DISCHARGES ALLOWED ON THE GREAT LAKES

Location	Cargo	Discharge allowed except as noted
Tributaries, their connecting rivers, and the St. Lawrence River.	Limestone and other clean stone.	Prohibited within 3 miles from shore.
	All other cargoes	Prohibited.
Lake Ontario	Limestone and other clean stone.	Prohibited within 3 miles from shore.
	Iron ore	Prohibited within 6 miles from shore.
	All other cargoes	Prohibited within 13.8 miles from shore.
Lake Erie	Limestone and other clean stone.	Prohibited within 3 miles from shore; prohibited in the Detroit River International Wildlife Refuge; prohibited in Western Basin, except that a vessel operating exclusively within Western Basin may discharge limestone or clean stone cargo residues over the dredged navigation channels between Toledo Harbor Light and Detroit River Light.
	Iron ore	Prohibited within 6 miles from shore; prohibited in the Detroit River International Wildlife Refuge; prohibited in Western Basin, except that a vessel may discharge residue over the dredged navigation channels between Toledo Harbor Light and Detroit River Light if it unloads in Toledo or Detroit and immediately thereafter loads new cargo in Toledo, Detroit, or Windsor.
	Coal, salt	Prohibited within 13.8 miles from shore; prohibited in the Detroit River International Wildlife Refuge; prohibited in Western Basin, except that a vessel may discharge residue over the dredged navigation channels between Toledo Harbor Light and Detroit River Light if it unloads in Toledo or Detroit and immediately thereafter loads new cargo in Toledo, Detroit, or Windsor.
	All other cargoes	Prohibited within 13.8 miles from shore; prohibited in the Detroit River International Wildlife Refuge; prohibited in Western Basin.
Lake St. Clair	Limestone and other clean stone.	Prohibited within 3 miles from shore.
	All other cargoes	Prohibited.
Lake Huron, except Six Fathom Scarp Mid-Lake Special Protection Area.	Limestone and other clean stone.	Prohibited within 3 miles from shore; prohibited in the Thunder Bay National Marine Sanctuary.
	Iron ore	Prohibited within 6 miles from shore and in Saginaw Bay; prohibited in the Thunder Bay National Marine Sanctuary; prohibited for vessels upbound along the Michigan thumb as follows: (i) Between 5.8 miles northeast of entrance buoys 11 and 12 to the track line turn abeam of Harbor Beach, prohibited within 3 miles from shore. (ii) For vessels bound for Saginaw Bay only, between the track line turn abeam of Harbor Beach and 4 nautical miles northeast of Point Aux Barques Light, prohibited within 4 miles from shore and not less than 10 fathoms of depth.

TABLE 151.66(B)(3)—BULK DRY CARGO RESIDUE DISCHARGES ALLOWED ON THE GREAT LAKES—Continued

Location	Cargo	Discharge allowed except as noted
	Coal, salt	Prohibited within 13.8 miles from shore and in Saginaw Bay; prohibited in the Thunder Bay National Marine Sanctuary; prohibited for vessels upbound from Alpena into ports along the Michigan shore south of Forty Mile Point within 4 miles from shore and not less than 10 fathoms of depth.
	All other cargoes	Prohibited within 13.8 miles from shore and in Saginaw Bay; prohibited in the Thunder Bay National Marine Sanctuary.
Lake Michigan	Limestone and other clean stone.	Prohibited within 3 miles from shore; prohibited within the Milwaukee Mid-Lake and Waukegan Special Protection Areas; prohibited within the Northern Refuge; prohibited within 3 miles of the shore of the Indiana Dunes and Sleeping Bear National Lakeshores; prohibited within Green Bay.
	Iron ore	Prohibited in the Northern Refuge; north of 45°N, prohibited within 12 miles from shore and in Green Bay; south of 45°N, prohibited within 6 miles from shore, and prohibited within the Milwaukee Mid-Lake and Waukegan Special Protection Areas, in Green Bay, and within 3 miles of the shore of Indiana Dunes and Sleeping Bear National Lakeshores; except that discharges are allowed at: (a) 4.75 miles off Big Sable Point Betsie, along established Lake Carriers Association (LCA) track lines; and (b) Along 056.25° LCA track line between due east of Poverty Island to a point due south of Port Inland Light.
	Coal	Prohibited in the Northern Refuge; prohibited within 13.8 miles from shore and prohibited within the Milwaukee Mid-Lake and Waukegan Special Protection Areas, in Green Bay, and within 3 miles of the shore of Indiana Dunes and Sleeping Bear National Lakeshores; except that discharges are allowed— (i) Along 013.5° LCA track line between 45°N and Boulder Reef, and along 022.5° LCA track running 23.25 miles between Boulder Reef and the charted position of Red Buoy #2; (ii) Along 037° LCA track line between 45°20′N and 45°42′N; (iii) Along 056.25° LCA track line between points due east of Poverty Island to a point due south of Port Inland Light; and (iv) At 3 miles from shore for coal carried between Manistee and Ludington along customary routes.
	Salt	Prohibited in the Northern Refuge; prohibited within 13.8 miles from shore and prohibited within the Milwaukee Mid-Lake and Waukegan Special Protection Areas, in Green Bay, and within 3 miles of the shore of Indiana Dunes and Sleeping Bear National Lakeshores, and in Green Bay.
	All other cargoes	Prohibited in the Northern Refuge; prohibited within 13.8 miles from shore and prohibited within the Milwaukee Mid-Lake and Waukegan Special Protection Areas, in Green Bay, and within 3 miles of the shore of Indiana Dunes and Sleeping Bear National Lakeshores.
Lake Superior	Limestone and other clean stone.	Prohibited within 3 miles from shore; and prohibited within Isle Royale National Park and the Caribou Island and Southwest Bank, Stannard Rock, and Superior Shoal Protection Areas, and within 3 miles of the shore of the Apostle Islands and Pictured Rocks National Lakeshores or the Grand Portage National Monument.
	Iron ore	Prohibited within 6 miles from shore (within 3 miles off northwestern shore between Duluth and Grand Marais); and prohibited within Isle Royale National Park and the Caribou Island and Southwest Bank, Stannard Rock, and Superior Shoal Protection Areas, and within 3 miles of the shore of the Apostle Islands and Pictured Rocks National Lakeshores or the Grand Portage National Monument.
	Coal, salt	Prohibited within 13.8 miles from shore (within 3 miles off northwestern shore between Duluth and Grand Marais); and prohibited within Isle Royale National Park and the Caribou Island and Southwest Bank, Stannard Rock, and Superior Shoal Protection Areas, and within 3 miles of the shore of the Apostle Islands and Pictured Rocks National Lakeshores or the Grand Portage National Monument.
	Cement	Prohibited within 13.8 miles from shore (within 3 miles offshore west of a line due north from Bark Point); and prohibited within Isle Royale National Park and the Caribou Island and Southwest Bank, Stannard Rock, and Superior Shoal Protection Areas, and within 3 miles of the shore of the Apostle Islands and Pictured Rocks National Lakeshores or the Grand Portage National Monument.
	All other cargoes	Prohibited within 13.8 miles from shore; and prohibited within Isle Royale National Park and the Caribou Island and Southwest Bank, Stannard Rock, and Superior Shoal Protection Areas, and within 3 miles of the shore of the Apostle Islands and Pictured Rocks National Lakeshores or the Grand Portage National Monument.

(4) The master, owner, operator, or person in charge of any commercial vessel must ensure that the vessel's deck is kept broom clean whenever the vessel is in transit.

(5) The master, owner, operator, or person in charge of any commercial vessel must ensure that a dry cargo residue management plan is onboard the vessel, kept available for Coast Guard inspection, and that all operations are

conducted in accordance with the plan. A waste management plan meeting the requirements of 33 CFR 151.57 satisfies this requirement, so long as it provides all the information required by this paragraph (b)(5). If the plan is maintained electronically, at least one paper copy of the plan must be onboard for use during inspections. The plan must describe the specific measures the vessel employs to ensure the minimization of bulk dry cargo residue discharges, and, at a minimum, must list or describe—

(i) Equipment onboard the vessel that is designed to minimize bulk dry cargo spillage during loading and unloading;

(ii) Equipment onboard the vessel that is available to recover spilled cargo from the decks and transfer tunnels and return it to the holds or to unloading conveyances;

(iii) Operational procedures employed by the vessel's crew during the loading or unloading of bulk dry cargoes to minimize cargo spillage onto the decks and into the transfer tunnels and to achieve and maintain the broom clean deck condition required by paragraph (b)(4) of this section;

(iv) Operational procedures employed by the vessel's crew during or after loading or unloading operations to return spilled bulk dry cargo residue to the vessel's holds or to shore via an unloading conveyance;

(v) How the vessel's owner or operator ensures that the vessel's crew is familiar with any operational procedures described by the plan;

(vi) The position title of the person onboard who is in charge of ensuring compliance with procedures described in the plan;

(vii) Any arrangements between the vessel and specific ports or terminals for the unloading and disposal of the vessel's bulk dry cargo residues ashore; and

(viii) The procedures used and the vessel's operating conditions to be maintained during any unavoidable discharge of bulk dry cargo residue into the Great Lakes.

(6) In determining whether a commercial vessel or person is in compliance with this paragraph (b), Coast Guard personnel may consider—

(i) The extent to which the procedures described in the vessel's DCR management plan reflect current industry standard practices for vessels of comparable characteristics, cargoes, and operations;

(ii) The crew's demonstrated ability to perform tasks for which the DCR management plan holds them responsible;

(iii) Whether equipment described in the DCR management plan is maintained in proper operating condition; and

(iv) The extent to which the crew adheres to the vessel's DCR management plan during actual dry cargo loading and unloading operations and DCR discharge operations.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2012–0427]

RIN 1625–AA00

Safety Zone; Gilmerton Bridge Center Span Float-In, Elizabeth River; Norfolk, Portsmouth, and Chesapeake, VA

AGENCY: Coast Guard, DHS.

ACTION: Proposed rule; withdrawal.

SUMMARY: The Coast Guard is withdrawing its proposed rule concerning the Gilmerton Bridge Center Span Float-in and bridge construction of span placement. The original proposal had a start date of July 31, 2012, and must be rescheduled to start on September 5, 2012, due to unforeseen circumstances with span lift construction.

DATES: The proposed rule is withdrawn on July 6, 2012.

ADDRESSES: The docket for this withdrawn rulemaking is available for inspection or copying at the Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. You may also find this docket on the Internet by going to *http://www.regulations.gov,* inserting USCG–2012–0427 in the ''Keyword'' box, and then clicking ''Search.''

FOR FURTHER INFORMATION CONTACT: If you have questions about this notice, call or email Hector Cintron, Waterways Management Division Chief, Sector Hampton Roads, Coast Guard; telephone 757–668–5581, email *Hector.L.Cintron@uscg.mil.* If you have questions on viewing material in the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION:

Background

On July 25, 2012, we published a notice of proposed rulemaking entitled ''Safety Zone; Gilmerton Bridge Center Span Float-in, Elizabeth River; Norfolk, Portsmouth, and Chesapeake, Virginia'' in the **Federal Register** (77 FR 43557). The rulemaking concerned establishing a safety zone on the navigable waters of the Elizabeth River in Norfolk, Portsmouth, and Chesapeake, VA, in order to provide for the safety of life on navigable waters during the Gilmerton Bridge Center Span Float-in and bridge construction of span placement.

Withdrawal

The proposed rule is being withdrawn due to unforeseen circumstances in the construction timeline of the Center Span, which has caused a 5 week delay in the project.

Authority: We issue this notice of withdrawal under the authority of 5 U.S.C. 552(a), 44 U.S.C. 1505(a)(3), and 33 CFR 1.05–1.

Dated: July 17, 2012.

John K. Little,

Captain, U.S. Coast Guard, Captain of the Port Hampton Roads.

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R08–OAR–2012–0446; FRL–9703–9]

Approval and Promulgation of Air Quality Implementation Plans; Utah; Determination of Clean Data for the 1987 PM_{10} Standard for the Ogden Area

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to determine that the Ogden City nonattainment area in Utah is currently attaining the National Ambient Air Quality Standard (NAAQS) for particulate matter with an aerodynamic diameter of less than or equal to a nominal ten micrometers (PM_{10}) based on certified, quality-assured ambient air monitoring data for the years 2009 through 2011. The State of Utah submitted a letter dated March 30, 2000, requesting EPA to make a clean data

determination for the nonattainment area of Ogden City. Based on our proposed determination that the Ogden City nonattainment area is currently attaining the PM_{10} NAAQS, EPA is also proposing to determine that Utah's obligation to make submissions to meet certain Clean Air Act (CAA) requirements related to attainment of the NAAQS is not applicable for as long as the Ogden City nonattainment area continues to attain the NAAQS. This action is being taken under the CAA.

DATES: Comments must be received on or before August 29, 2012.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R08–OAR–2012–0446, by one of the following methods:

- *http://www.regulations.gov.* Follow the on-line instructions for submitting comments.
- *Email: freeman.crystal@epa.gov.*
- *Fax:* (303) 312–6064 (please alert the individual listed in the **FOR FURTHER INFORMATION CONTACT** if you are faxing comments).
- *Mail:* Carl Daly, Director, Air Program, U.S. Environmental Protection Agency (EPA), Region 8, Mailcode 8P–AR, 1595 Wynkoop Street, Denver, Colorado 80202–1129.
- *Hand Delivery:* Carl, Daly, Director, Air Program, U.S. Environmental Protection Agency (EPA), Region 8, Mailcode 8P–AR, 1595 Wynkoop Street, Denver, Colorado 80202–1129. Such deliveries are only accepted Monday through Friday, 8:00 a.m. to 4:30 p.m., excluding Federal holidays. Special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA–R08–OAR–2012–0446. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *www.regulations.gov* or email. The *www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA, without going through *www.regulations.gov* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.* For additional instructions on submitting comments, go to Section I. General Information of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: All documents in the docket are listed in the *www.regulations.gov* index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *www.regulations.gov* or in hard copy at the Air Program, U.S. Environmental Protection Agency (EPA), Region 8, 1595 Wynkoop Street, Denver, Colorado 80202–1129. EPA requests that if at all possible, you contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section to view the hard copy of the docket. You may view the hard copy of the docket Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Crystal Freeman, U.S. Environmental Protection Agency (EPA), Region 8, Mailcode 8P–AR, 1595 Wynkoop Street, Denver, Colorado 80202–1129, (303) 312–6602, *freeman.crystal@epa.gov.*

Definitions

For the purpose of this document, we are giving meaning to certain words or initials as follows:

(i) The words or initials *Act* or *CAA* mean or refer to the Clean Air Act, unless the context indicates otherwise.

(ii) The initials *AQS* mean or refer to EPA's Air Quality System database.

(iii) The words *EPA, we, us* or *our* mean or refer to the United States Environmental Protection Agency.

(iv) The initials *NAAQS* mean or refer to National Ambient Air Quality Standard.

(v) The initials *NSR* mean or refer to new source review.

(vi) The initials $PM_{2.5}$ mean or refer to particulate matter with an aerodynamic diameter equal to or less than 2.5 micrometers (fine particulate matter).

(vii) The initials PM_{10} mean or refer to particulate matter with an aerodynamic diameter equal to or less than 10 micrometers (coarse particulate matter).

(viii) The initials *RACM* mean or refer to reasonably available control measures.

(ix) The initials *RFP* mean or refer to reasonable further progress.

(x) The initials *SIP* mean or refer to State Implementation Plan.

(xi) The initials *SLAMS* mean or refer to state and local air monitoring stations.

(xii) The words *State* or *Utah* mean the State of Utah, unless the context indicates otherwise.

(xiii) The initials *UDEQ* mean or refer to Utah Department of Environmental Quality.

I. General Information

A. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through *www.regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the

public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for Preparing Your Comments.* When submitting comments, remember to:

a. Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).

b. Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

c. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

d. Describe any assumptions and provide any technical information and/or data that you used.

e. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

f. Provide specific examples to illustrate your concerns, and suggest alternatives.

g. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

h. Make sure to submit your comments by the comment period deadline identified.

II. Background

A. PM_{10} NAAQS

EPA sets the NAAQS for certain ambient air pollutants at levels required to protect public health and welfare. Particulate matter with an aerodynamic diameter less than or equal to a nominal ten micrometers, or PM_{10}, is one of these ambient air pollutants for which EPA has established health-based standards. On July 1, 1987, EPA promulgated two primary standards for PM:$_{10}$ a 24-hour standard of 150 micrograms per cubic meter (μg/m^3); and, an annual PM_{10} standard of 50 μg/m^3. EPA also promulgated secondary PM_{10} standards that were identical to the primary standards. See 52 FR 24634 (July 1, 1987).

Effective December 18, 2006, EPA revoked the annual PM_{10} standard but retained the 24-hour PM_{10} standard. See 71 FR 61144 (October 17, 2006). An area attains the 24-hour PM_{10} standard when the expected number of days per calendar year with a 24-hour concentration in excess of the standard (referred to herein as an ''exceedance''), as determined in accordance with 40 CFR part 50, appendix K, is equal to or less than one.[1] See 40 CFR 50.6 and 40 CFR part 50, appendix K.

B. Designation and Classification of Ogden City PM_{10} Nonattainment Area

The Ogden City nonattainment area was designated nonattainment for PM_{10} and classified as moderate under section 107(d)(3) of the CAA, on July 28, 1995. See 60 FR 38726 (July 28, 1995) and 40 CFR Part 81.345 (Ogden Area Weber County (part) City of Ogden). The Ogden City designation became effective on September 26, 1995.

C. How does EPA make attainment determinations?

Generally, EPA determines whether an area's air quality is meeting the PM_{10} NAAQS based on complete,[2] quality-assured, and certified data gathered at established state and local air monitoring stations (SLAMS) in the nonattainment area, and entered into the EPA Air Quality System (AQS) database. Data from air monitors operated by State, local, or Tribal agencies in compliance with EPA monitoring requirements must be submitted to AQS. These monitoring agencies certify annually that these data are accurate to the best of their knowledge. Accordingly, EPA relies primarily on data in AQS when determining the attainment status of an area. See 40 CFR 50.6; 40 CFR part 50, appendix J and K; 40 CFR part 53; and, 40 CFR part 58, appendices A, C, D, and E. EPA will also consider air quality data from other air monitoring stations in the nonattainment area provided those stations meet the Federal monitoring requirements for SLAMS, including the quality assurance and quality control criteria in 40 CFR part 58, appendix A. See 40 CFR 58.14 (2006) and 58.20 (2007);[3] 71 FR 61236, 61242 (October 17, 2006). All valid data are reviewed to determine the area's air quality status in accordance with 40 CFR part 50, appendix K.

Attainment of the 24-hour PM_{10} standard is determined by calculating the expected number of exceedances of the standard in a year. The 24-hour PM_{10} standard is attained when the expected number of exceedances averaged over a three-year period is less than or equal to one at each monitoring site within the nonattainment area. Generally, three consecutive years of complete air quality data are required to show attainment of the 24-hour PM_{10} standard. See 40 CFR part 50 and appendix K.[4]

To demonstrate attainment of the 24-hour PM_{10} standard at a monitoring site, the monitor must provide sufficient data to perform the required calculations in 40 CFR part 50, appendix K. The amount of data required varies with the sampling frequency, data capture rate, and the number of years of record. In all cases, three years of representative monitoring data that meet the 75 percent criterion discussed earlier should be utilized, if available. More than three years may be considered, if all additional representative years of data meeting the 75 percent criterion are utilized. Data not meeting these criteria may also suffice to show attainment; however, such exceptions must be approved by the appropriate Regional Administrator in accordance with EPA guidance. See 40 CFR part 50, appendix K, section 2.3.

III. EPA's Analysis

A. What is the Ogden City nonattainment area monitoring network?

The Utah Department of Environmental Quality (UDEQ) has operated PM_{10} monitors in Ogden City since 1987. The first monitor in Ogden City was operated by the Ogden Health Department at 2570 Grant Avenue until February 15, 2000. The monitor was replaced by the Ogden Number 2 monitoring site at 228 32nd Street, which began operation on July 2, 2001. Both sites were selected to read maximum concentration values near the center of the Ogden City urbanized area.

B. Does the Ogden City nonattainment area monitor meet minimum federal ambient air quality monitoring requirements?

Annually, UDEQ submits monitoring network plan reports to EPA on compliance with the applicable reporting requirements in 40 CFR 58.10. These reports discuss the status of the

[1] An exceedance is defined as a daily value that is above the level of the 24-hour standard, 150 μg/m^3, after rounding to the nearest 10 μg/m^3 (i.e., values ending in five or greater are to be rounded up). Thus, a recorded value of 154 μg/m^3 would not be an exceedance since it would be rounded to 150 μg/m^3; whereas, a recorded value of 155 μg/m^3 would be an exceedance since it would be rounded to 160 μg/m^3. See 40 CFR part 50, appendix K, section 1.0.

[2] For PM_{10}, a ''complete'' set of data includes a minimum of 75 percent of the scheduled PM_{10} samples per quarter. See 40 CFR part 50, appendix K, section 2.3(a).

[3] EPA promulgated amendments to the ambient air monitoring regulations in 40 CFR parts 53 and 58 on October 17, 2006. (See 71 FR 61236.) The requirements for Special Purpose Monitors were revised and moved from 40 CFR 58.14 to 40 CFR 58.20.

[4] Because the annual PM_{10} standard was revoked effective December 18, 2006, this document discusses only attainment of the 24-hour PM_{10} standard. See 71 FR 61144 (October 17, 2006).

air monitoring network, as required under 40 CFR part 58. With respect to PM_{10}, UDEQ's annual network plans meet the applicable requirements under 40 CFR part 58. The Ogden Number 2 monitor samples on a daily schedule, which meets the requirements of 40 CFR 58.12(e) for monitoring frequency. Also, UDEQ annually certifies that the data it submits to AQS are quality-assured.

C. What does the air quality data show for the Ogden City nonattainment area?

Since 1995, when Ogden City was designated as a nonattainment area, the data from AQS indicate that six exceedances of the PM_{10} standard have been measured in the Ogden City nonattainment area at the Ogden Number 2 monitor. From the six total exceedances, one was observed in 2002, two were in 2003, one was in 2009, and two were in 2010. All these exceedances have been flagged by UDEQ as exceptional events involving either July 4th fireworks, high winds, or wildfires. These exceedances resulted in expected numbers of exceedances of 1.0 for the period 2001 through 2003, 2002 through 2004, 2008 through 2010, and 2009 through 2011, showing that the Ogden City nonattainment area has attained the PM_{10} NAAQS in all years containing complete monitoring data from 1995 to present. The available data shows attainment of the PM_{10} standard continuously since 2002, even if EPA takes no action to exclude data flagged as exceptional events.

Between 1995 and 2011, an interruption of monitoring occurred between February 16, 2000 until July 2, 2001. This prevented EPA from determining that Ogden had attained the NAAQS via a clean data determination until 3 years of complete monitoring data had been collected after 2001. Beginning in 2002, complete data showing attainment of the PM_{10} standard has been collected in AQS for the Ogden City PM_{10} nonattainment area.

For the purposes of this proposed action, we have reviewed the data for the most recent three-year period (2009 through 2011). Table 1 summarizes the PM_{10} concentration data collected at the Ogden Number 2 monitor over the past three years. As shown in Table 1, three exceedances, but no violations, were recorded within the Ogden City nonattainment area over the 2009 through 2011 period.

TABLE 1—SUMMARY OF 2009–2011 PM_{10} MONITORING DATA FOR OGDEN CITY NONATTAINMENT AREA [A]

Monitoring site	Highest 24-hour PM_{10} concentration ($\mu g/m^3$)			Expected exceedances per year
	2009	2010	2011	2009–2011
Ogden No. 2	181	216	79	1.0

PM_{10} NAAQS = 150 $\mu g/m^3$

[a] Source: AQS AMP350 report dated June 8, 2012.

Table 2 expands on Table 1's expected exceedance per year for Ogden City's PM_{10} monitor for years 2009 through 2011. For the years 2009 and 2010, there were three exceedances that were flagged as exceptional events. However, even though there were exceedances within these two years, the Ogden City monitor did not violate the PM_{10} NAAQS.

TABLE 2—SUMMARY OF OGDEN CITY'S PM_{10} MONITOR DATA (49–057–0002), 2009–2011 EXPECTED EXCEEDANCES PER YEAR

Year	Monitor 49–057–0002
2009	1.0 (Wildfire Exceptional Event Flag).
2010	2.0 (High Wind Exceptional Event Flag).
2011	0.0.
2009–2011 Three Year Average.	1.0.

During the 2009 through 2011 time period, the data collected by UDEQ meets the completeness criterion for all quarters at the Ogden Number 2 monitor. As noted above, to be considered ''complete,'' valid measurements must be made for 75 percent of all the scheduled sampling dates in each quarter of the year, and generally, three years of representative monitoring data that meets the 75 percent criterion should be utilized, where available.

Based on our review of the certified, quality-assured data for 2009 through 2011, we find that the expected number of exceedances per year for the Ogden City nonattainment area for the most recent three-year period (i.e., 2009 to 2011) was 1.0 day per year. With an annual expected exceedance rate for the 24-hour PM_{10} NAAQS of 1.0, these data show attainment of the PM_{10} standard. The EPA proposes to determine that the Ogden City nonattainment area is attaining the PM_{10} NAAQS. Prior to taking final action on this proposal, we will review any preliminary data for 2012 submitted by UDEQ to AQS for the Ogden City nonattainment area to ensure that such preliminary data show continued attainment of the standard.

IV. EPA's Clean Data Policy and the Applicability of the Clean Air Act Planning Requirements to the Ogden City Nonattainment Area

The air quality planning requirements for moderate PM_{10} nonattainment areas, such as the Ogden City nonattainment area, are set out in part D, subparts 1 and 4, of title I of the Act. EPA has issued guidance in a General Preamble describing how we will review state implementation plans (SIPs) and SIP revisions submitted under title I of the Act, including those containing moderate PM_{10} nonattainment area SIP provisions.[5]

The subpart 1 requirements include, among other things, provisions for reasonably available control measures or ''RACM'', reasonable further progress or ''RFP'', emissions inventories, a permit program for construction and operation of new or modified major stationary sources in the nonattainment area or ''NSR'', contingency measures, conformity, and additional SIP revisions providing for attainment where EPA determines that the area has failed to attain the standard by the applicable attainment date.

Subpart 4 requirements in CAA section 189 apply specifically to PM_{10} nonattainment areas. The requirements for moderate PM_{10} nonattainment areas include: (1) An attainment demonstration; (2) provisions for

[5] ''General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990,'' (57 FR 13498 (April 16, 1992), and supplemented at 57 FR 18070 (April 28, 1992)); hereafter referred to as the General Preamble.

RACM; (3) quantitative milestones demonstrating RFP toward attainment by the applicable attainment date; and, (4) provisions ensuring that the control requirements applicable to an area's major stationary sources of PM_{10} also apply to major stationary sources of PM_{10} precursors, except where the Administrator has determined that such sources do not contribute significantly to PM_{10} levels exceeding the NAAQS.

For nonattainment areas where EPA determines that monitored data show that the NAAQS have already been achieved, EPA's interpretation, upheld by the Courts, is that the obligation to submit certain requirements of part D, subparts 1, 2, and 4 of the Act are suspended for so long as the area continues to attain. These include requirements for attainment demonstrations, RFP, RACM, and contingency measures, because these provisions have the purpose of helping achieve attainment of the NAAQS. Certain other obligations for PM_{10} nonattainment areas, however, are not suspended, such as the NSR requirements.

This interpretation of the CAA is known as the Clean Data Policy. It is the subject of several EPA memoranda and regulations, and numerous rulemakings that have been published in the **Federal Register** over more than fifteen years. EPA finalized the statutory interpretation set forth in the Clean Data Policy as part of its ''Final Rule to Implement the 8-hour Ozone National Ambient Air Quality Standard—Phase 2'' (Phase 2 Final Rule); see 40 CFR 51.918 and discussion in the preamble to the rule at 70 FR 71612, 71645–71646 (November 29, 2005). The DC Circuit Court upheld this Clean Data regulation as a valid interpretation of the CAA; see *NRDC* v. *EPA,* 571 F. 3d 1245 (D.C. Cir. 2009). EPA also finalized its interpretation in an implementation rule for the NAAQS for particulate matter of 2.5 microns or less ($PM_{2.5}$); see 40 CFR 51.1004(c). Thus, EPA has codified the Clean Data Policy when it established final rules governing implementation of new or revised NAAQS. See 70 FR 71612, 71644–46 (November 29, 2005); 72 FR 20586, 20665 (April 25, 2007) ($PM_{2.5}$ Implementation Rule). Otherwise, EPA applies the Clean Data Policy in individual rulemakings related to specific nonattainment areas. See, e.g., 75 FR 27944 (May 19, 2010), the determination of attainment of the PM_{10} standard in Coso Junction, California, and 75 FR 6571 (February 10, 2010), the determination of attainment of the 1-hour ozone standard in Baton Rouge, Louisiana.

In its many applications of the Clean Data Policy interpretation to PM_{10}, EPA has explained that the legal bases set forth in detail in our Phase 2 Final Rule; our May 10, 1995 memorandum from John S. Seitz, entitled ''Reasonable Further Progress, Attainment Demonstration, and Related Requirements for Ozone Nonattainment Areas Meeting the Ozone National Ambient Air Quality Standard;'' our $PM_{2.5}$ Implementation Rule; and our December 14, 2004 memorandum from Stephen D. Page entitled ''Clean Data Policy for the Fine Particle National Ambient Air Quality Standards,'' are equally pertinent to the interpretation of provisions of subparts 1 and 4 applicable to PM_{10}. See, e.g., 71 FR 6352 (February 8, 2006) (Ajo, Arizona area); 71 FR 13021 (March 14, 2006) (Yuma, Arizona area); 71 FR 40023 (July 14, 2006) (Weirton, West Virginia area); 71 FR 44920 (August 8, 2006) (Rillito, Arizona area); 71 FR 63642 (October 30, 2006) (San Joaquin Valley, California area); 72 FR 14422 (March 28, 2007) (Miami, Arizona area); 75 FR 27944 (May 19, 2010) (Coso Junction, California area); and 76 FR 21807 (April 19, 2011) (Truckee Meadows, Nevada area). EPA's interpretation that the obligation to submit an attainment demonstration, RACM, RFP, contingency measures, and other measures related to attainment under part D of title I of the CAA is suspended while the area is attaining the NAAQS, applies whether the standard is PM_{10}, ozone, or $PM_{2.5}$.

In EPA's proposed and final rulemakings determining that the San Joaquin Valley nonattainment area attained the PM_{10} standard, EPA set forth at length its rationale for applying the Clean Data Policy to PM_{10}. The Ninth Circuit Court subsequently upheld this rulemaking, and specifically EPA's Clean Data Policy, in the context of the PM_{10} standard. See *Latino Issues Forum* v. *EPA,* Nos. 06–75831 and 08–71238 (9th Cir.), Memorandum Opinion, March 2, 2009. In rejecting petitioner's challenge to the Clean Data Policy for $PM_{10,}$ the Court stated:

> As the EPA rationally explained, if an area is in compliance with PM_{10} standards, then further progress for the purpose of ensuring attainment is not necessary.

EPA noted in its prior PM_{10} rulemakings that the reasons for relieving an area that has attained the relevant standard of certain obligations under part D, subparts 1 and 2, apply equally to part D, subpart 4, which contains specific attainment demonstration and RFP provisions for PM_{10} nonattainment areas. In EPA's Phase 2 Final Rule and ozone (Seitz) and $PM_{2.5}$ Clean Data (Page) memoranda, EPA established that it is reasonable to interpret provisions regarding RFP and attainment demonstrations, along with related requirements, so as not to require SIP submissions if an area subject to those requirements is already attaining the NAAQS (i.e., attainment of the NAAQS is demonstrated with three consecutive years of complete, quality-assured, and certified air quality monitoring data). Every U.S. Circuit Court of Appeals that has considered the Clean Data Policy has upheld EPA rulemakings applying its interpretation, for both ozone and PM_{10}. See *Sierra Club* v. *EPA,* 99 F.3d 1551 (10th Cir. 1996); *Sierra Club* v. *EPA,* 375 F.3d 537 (7th Cir. 2004); *Our Children's Earth Foundation* v. *EPA,* No. 04–73032 (9th Cir. June 28, 2005) (memorandum opinion), *Latino Issues Forum,* supra.

It has been EPA's longstanding interpretation that the general provisions of part D, subpart 1 of the Act (sections 171 and 172) do not require the submission of SIP revisions concerning RFP for areas already attaining the ozone NAAQS. In the General Preamble, we stated:

> [R]equirements for RFP will not apply in evaluating a request for redesignation to attainment since, at a minimum, the air quality data for the area must show that the area has already attained. Showing that the State will make RFP towards attainment will, therefore, have no meaning at that point.

See 57 FR 13564 (April 16, 1992). EPA's prior determinations of attainment for PM_{10}, *e.g.,* for the San Joaquin Valley and Coso Junction areas in California, make clear that the same reasoning applies to the PM_{10} provisions of part D, subpart 4. See 71 FR 40952 and 71 FR 63642 (proposed and final determination of attainment for San Joaquin Valley) and 75 FR 13710 and 75 FR 27944 (proposed and final determination of attainment for Coso Junction).

With respect to RFP, section 171(1) states that, for purposes of part D of title I, RFP ''means such annual incremental reductions in emissions of the relevant air pollutant as are required by this part or may reasonably be required by the Administrator for the purpose of ensuring attainment of the applicable NAAQS by the applicable date.'' Thus, whether dealing with the general RFP requirement of section 172(c)(2), the ozone-specific RFP requirements of sections 182(b) and (c), or the specific RFP requirements for PM_{10} areas of part D, subpart 4, section 189(c)(1), the stated purpose of RFP is to ensure

attainment by the applicable attainment date. Section 189(c)(1) states that:

> Plan revisions demonstrating attainment submitted to the Administrator for approval under this subpart shall contain quantitative milestones which are to be achieved every 3 years until the area is redesignated attainment and which demonstrate reasonable further progress, as defined in section 7501(1) of this title, toward attainment by the applicable date.

Although this section states that revisions shall contain milestones which are to be achieved until the area is redesignated to attainment, such milestones are designed to show reasonable further progress ''toward attainment by the applicable attainment date,'' as defined by section 171. Thus, it is clear that once the area has attained the standard, no further milestones are necessary or meaningful. This interpretation is supported by language in section 189(c)(3), which mandates that a State that fails to achieve a milestone must submit a plan that assures that the State will achieve the next milestone or attain the NAAQS if there is no next milestone. Section 189(c)(3) assumes that the requirement to submit and achieve milestones does not continue after attainment of the NAAQS.

In the General Preamble, we noted with respect to section 189(c) that the purpose of the milestone requirement ''is 'to provide for emission reductions adequate to achieve the standards by the applicable attainment date' (H.R. Rep. No. 490, 101st Cong., 2d Sess. 267 (1990)).'' See 57 FR 13539 (April 16, 1992). If an area has in fact attained the standard, the stated purpose of the RFP requirement will have already been fulfilled.[6] EPA took this position with respect to the general RFP requirement of section 172(c)(2) in the General Preamble and also in the Seitz memorandum with respect to the requirements of sections 182(b) and (c). In our prior applications of the Clean Data Policy to PM_{10}, we have extended that interpretation to the specific provisions of part D, subpart 4. See, e.g., 71 FR 40952 and 71 FR 63642, the proposed and final determination of attainment for San Joaquin Valley, and 75 FR 13710 and 75 FR 27944, the proposed and final determination of attainment for Coso Junction.

In the General Preamble, we stated, in the context of a discussion of the requirements applicable to the evaluation of requests to redesignate nonattainment areas to attainment, that the ''requirements for RFP will not apply in evaluating a request for redesignation to attainment since, at a minimum, the air quality data for the area must show that the area has already attained. Showing that the State will make RFP towards attainment will, therefore, have no meaning at that point.'' See 57 FR 13564 (April 16, 1992). See also our September 4, 1992 memorandum from John Calcagni, entitled ''Procedures for Processing Requests to Redesignate Areas to Attainment'' (Calcagni memorandum), at page 6.

Similarly, the requirements of section 189(c)(2) with respect to milestones no longer apply so long as an area has attained the standard. Section 189(c)(2) provides in relevant part that:

> Not later than 90 days after the date on which a milestone applicable to the area occurs, each State in which all or part of such area is located shall submit to the Administrator a demonstration * * * that the milestone has been met.

Where the area has attained the standard and there are no further milestones, there is no further requirement to make a submission showing that such milestones have been met. As noted above, this is consistent with the position that EPA took with respect to the general RFP requirement of section 172(c)(2) in the General Preamble and also in the Seitz memorandum with respect to the requirements of section 182(b) and (c). In the Seitz memorandum, EPA also noted that section 182(g), the milestone requirement of subpart 2, which is analogous to provisions in section 189(c), is suspended upon a determination that an area has attained. The Seitz memorandum, also citing additional provisions related to attainment demonstration and RFP requirements, stated:

> Inasmuch as each of these requirements is linked with the attainment demonstration or RFP requirements of section 182(b)(1) or 182(c)(2), if an area is not subject to the requirement to submit the underlying attainment demonstration or RFP plan, it need not submit the related SIP submission either.

See Seitz memorandum at page 5.

With respect to the attainment demonstration requirements of section 189(a)(1)(B), an analogous rationale leads to the same result. Section 189(a)(1)(B) requires that the plan provide for ''a demonstration (including air quality modeling) that the [SIP] will provide for attainment by the applicable attainment date * * *.'' As with the RFP requirements, if an area is already monitoring attainment of the standard, EPA believes there is no need for an area to make a further submission containing additional measures to achieve attainment. This is also consistent with the interpretation of the section 172(c) requirements provided by EPA in the General Preamble, the Page memorandum, and the section 182(b) and (c) requirements set forth in the Seitz memorandum. As EPA stated in the General Preamble, no other measures to provide for attainment would be needed by areas seeking redesignation to attainment since ''attainment will have been reached.'' See 57 FR at 13564 (April 16, 1992).

Other SIP submission requirements are linked with these attainment demonstration and RFP requirements, and similar reasoning applies to them. These requirements include the contingency measure requirements of sections 172(c)(9) and 182(c)(9). We have interpreted the contingency measure requirements of sections 172(c)(9) and 182(c)(9) as no longer applying when an area has attained the standard because those ''contingency measures are directed at ensuring RFP and attainment by the applicable date.'' See 57 FR 13564 (April 16, 1992) and Seitz memorandum, pages 5–6.

Both sections 172(c)(1) and 189(a)(1)(C) require ''provisions to assure that reasonably available control measures'' (i.e., RACM) are implemented in a nonattainment area. The General Preamble states that EPA interprets section 172(c)(1) so that RACM requirements are a ''component'' of an area's attainment demonstration. See 57 FR 13560 (April 16, 1992). Thus, for the same reason the attainment demonstration no longer applies by its own terms, the requirement for RACM no longer applies. EPA has consistently interpreted this provision to require only implementation of potential RACM measures that could contribute to reasonable further progress or to attainment. See the General Preamble at 57 FR 13498 (April 16, 1992). Thus, where an area is already attaining the

[6] Thus, we believe that it is a distinction without a difference that section 189(c)(1) speaks of the RFP requirement as one to be achieved until an area is ''redesignated attainment,'' as opposed to section 172(c)(2), which is silent on the period to which the requirement pertains, or the ozone nonattainment area RFP requirements in sections 182(b)(1) or 182(c)(2), which refer to the RFP requirements as applying until the ''attainment date,'' since section 189(c)(1) defines RFP by reference to section 171(1) of the Act. Reference to section 171(1) clarifies that, as with the general RFP requirements in section 172(c)(2) and the ozone-specific requirements of section 182(b)(1) and 182(c)(2), the PM-specific requirements may only be required ''for the purpose of ensuring attainment of the applicable national ambient air quality standard by the applicable date.'' 42 U.S.C. section 7501(1). As discussed in the text of this rulemaking, EPA interprets the RFP requirements, in light of the definition of RFP in section 171(1), and incorporated in section 189(c)(1), to be a requirement that no longer applies once the standard has been attained.

standard, no additional RACM measures are required.[7] EPA is interpreting section 189(a)(1)(C) consistent with its interpretation of section 172(c)(1).

We emphasize that the suspension of the obligation to submit SIP revisions concerning these RFP, attainment demonstration, RACM, and other related requirements exists only for as long as the Ogden City nonattainment area continues to monitor attainment of the PM_{10} standard. If EPA determines, after notice-and-comment rulemaking, that the area has monitored a violation of the PM_{10} NAAQS, the basis for suspending the requirements would no longer exist. As a result, the Ogden City nonattainment area would again be subject to a requirement to submit the pertinent SIP revision or revisions and would need to address those requirements. Thus, a final determination that the area need not submit one of the pertinent SIP submittals amounts to no more than a suspension of the requirements for so long as the area continues to attain the standard. Only after EPA redesignates the area to attainment would the area be relieved of these attainment-related submission obligations. Attainment determinations under the Clean Data Policy do not suspend an area's obligations unrelated to attainment in the area, such as provisions to address pollution transport.

Based on our proposed determination that the Ogden City nonattainment area is currently attaining the PM_{10} NAAQS (*see* section III.C above) and as set forth above, we propose to find that Utah's obligations to submit planning provisions to meet the requirements for an attainment demonstration, reasonable further progress plans, reasonably available control measures, and contingency measures, no longer apply for so long as the Ogden City nonattainment area continues to monitor attainment of the PM_{10} NAAQS. In the future, after notice-and-comment rulemaking, if EPA determines that the area again violates the PM_{10} NAAQS, then the basis for suspending the attainment demonstration, RFP, RACM, and contingency measure requirements would no longer exist. In that event, we would notify Utah that we have determined that the Ogden City nonattainment area is no longer attaining the PM_{10} standard and provide notice to the public in the **Federal Register**.

[7] The EPA's interpretation that the statute only requires implementation of RACM measures that would advance attainment was upheld by the United States Court of Appeals for the Fifth Circuit (*Sierra Club* v. *EPA, 314 F.3d 735, 743–745 (5th Cir. 2002)*), and by the United States Court of Appeals for the D.C. Circuit (*Sierra Club* v. *EPA, 294 F.3d 155, 162–163 (D.C. Cir. 2002)*).

V. EPA's Proposed Action

Based on the most recent three-year period of certified, quality-assured data meeting the requirements of 40 CFR part 50, appendix K, and for the reasons discussed above, we propose to find that the Ogden City nonattainment area is currently attaining the 24-hour PM_{10} NAAQS.

In conjunction with and based upon our proposed determination that the Ogden City nonattainment area is currently attaining the standard, EPA proposes to determine that Utah's obligation to submit the following CAA requirements is not applicable for so long as the Ogden City nonattainment area continues to attain the PM_{10} standard: An attainment demonstration under CAA section 189(a)(1)(B); RACM provisions under CAA section 189(a)(1)(C); RFP provisions under CAA section 189(c); and, the attainment demonstration, RACM, RFP and contingency measure provisions under CAA section 172 of the Act.

Any final action resulting from this proposal would not constitute a redesignation to attainment under CAA section 107(d)(3) because we have neither received nor approved a maintenance plan for the Ogden City nonattainment area as meeting the requirements of section 175A of the CAA, nor have we determined that the area has met the other CAA requirements for redesignation. The classification and designation status in 40 CFR part 81 would remain moderate nonattainment for the Ogden City nonattainment area until such time as EPA determines that Utah has met the CAA requirements for redesignating the Ogden City nonattainment area to attainment.

VI. Statutory and Executive Order Reviews

With this action, we propose to make a determination regarding attainment of the PM_{10} NAAQS based on air quality data and, if finalized, this proposed action would result in suspension of certain Federal requirements, and would not impose additional requirements beyond those imposed by State law or by the CAA. For that reason, this proposed action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address disproportionate human health or environmental effects with practical, appropriate, and legally permissible methods under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed action does not have Tribal implications as specified by Executive Order 13175 (65 FR 67249; November 9, 2000), because the SIP obligations discussed herein do not apply to Indian Tribes and thus will not impose substantial direct costs on Tribal governments or preempt Tribal law.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2012–0398; FRL–9707–4]

Approval of Air Quality Implementation Plans; Arizona; Interstate Transport of Fine Particulate Matter

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a State Implementation Plan (SIP) revision submitted by the State of Arizona on October 14, 2009 and to determine that the existing SIP is adequate to address the requirements of section 110(a)(2)(D)(i)(I) of the Clean Air Act (CAA) for the 2006 National Ambient Air Quality Standard (NAAQS or standard) for fine particulate matter ($PM_{2.5}$). Section 110(a)(2)(D)(i)(I) of the CAA requires that each SIP contain adequate provisions to prohibit air emissions from adversely affecting air quality in other states through interstate transport. EPA is proposing to approve the SIP revision submitted by Arizona and to conclude that additional control measures in Arizona are not necessary under CAA section 110(a)(2)(D)(i)(I) because emissions from Arizona sources do not contribute significantly to nonattainment or interfere with maintenance of the 2006 24-hour $PM_{2.5}$ NAAQS in any other state. We are taking comments on this proposal and plan to follow with a final action.

DATES: Written comments must be received on or before August 29, 2012.

ADDRESSES: Submit your comments, identified by Docket ID Number EPA–R09–OAR–2012–0398, by one of the following methods:

1. *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.
2. *Email: vagenas.ginger@epa.gov.*
3. *Fax:* 415–942–3964.
4. *Mail or deliver:* Ginger Vagenas (AIR–2), U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901. Deliveries are only accepted during the Regional Office's normal hours of operation.

Instructions: All comments will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through *http://www.regulations.gov* or email. *http://www.regulations.gov* is an anonymous access system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send email directly to EPA, your email address will be automatically captured and included as part of the public comment. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Docket: Generally, documents in the docket for this action are available electronically at *www.regulations.gov* and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents in the docket are listed at *www.regulations.gov,* some information may be publicly available only at the hard copy location (e.g., copyrighted material, large maps), and some may not be publicly available in either location (e.g., CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Ginger Vagenas, Air Planning Office (AIR–2), U.S. Environmental Protection Agency, Region IX, (415) 972–3964 *vagenas.ginger@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, the terms ''we,'' ''us,'' and ''our'' refer to EPA.

V. Statutory and Executive Order Reviews

I. Background

A. 2006 24-Hour $PM_{2.5}$ NAAQS Infrastructure Requirements

On September 21, 2006, EPA promulgated a final rule revising the 1997 24-hour primary and secondary NAAQS for $PM_{2.5}$ from 65 micrograms per cubic meter ($\mu g/m^3$) to 35 $\mu g/m^3$. 71 FR 61144 (October 17, 2006).

Section 110(a)(1) of the CAA requires each state to submit to EPA, within 3 years (or such shorter period as the Administrator may prescribe) after the promulgation of a primary or secondary NAAQS or any revision thereof, a SIP that provides for the ''implementation, maintenance, and enforcement'' of such NAAQS. EPA refers to these specific submissions as ''infrastructure'' SIPs because they are intended to address basic structural SIP requirements for new or revised NAAQS. For the 2006 24-hour $PM_{2.5}$ NAAQS, these infrastructure SIPs were due on September 21, 2009.[1] Section 110(a)(2) includes a list of specific elements that each such plan submission must meet, including section 110(a)(2)(D)(i), which pertains to interstate transport of certain emissions.

The transport SIP provisions in section 110(a)(2)(D)(i) (also called ''good neighbor'' provisions) require each state to submit a SIP that prohibits emissions that adversely affect another state in the ways contemplated in the statute. Section 110(a)(2)(D)(i) identifies four distinct elements related to the evaluation of impacts of interstate transport of air pollutants. In this action, EPA is addressing the first two elements of this section (*i.e.,* the requirements in section 110(a)(2)(D)(i)(I) to prohibit emissions activity within a state that will significantly contribute to nonattainment or interfere with maintenance of the NAAQS in any other state) for the 2006 24-hour $PM_{2.5}$ NAAQS.[2]

The first element of section 110(a)(2)(D)(i) requires that each SIP for a new or revised NAAQS contain adequate measures to prohibit any source or other type of emissions activity within the state from emitting air pollutants that will ''contribute significantly to nonattainment'' of the NAAQS in another state. The second element of CAA section 110(a)(2)(D)(i) requires that each SIP prohibit any source or other type of emissions activity in the state from emitting pollutants that will ''interfere with maintenance'' of the applicable NAAQS in any other state.

[1] The rule establishing the revised $PM_{2.5}$ NAAQS was signed by the Administrator and publically disseminated on September 21, 2006. Because EPA did not prescribe a shorter period for section 110(a) ''infrastructure'' SIP submittals for these NAAQS, these submittals were due on September 21, 2009, three years from the September 21, 2006 signature date pursuant to section 110(a)(1) of the CAA. *See* 42 U.S.C. 7410(a)(1).

[2] This proposed action does not address the remaining two elements of the transport SIP provision (in CAA section 110(a)(2)(D)(i)(II)) regarding interference with measures required to prevent significant deterioration of air quality or to protect visibility in another state. We intend to evaluate and act upon Arizona's SIP submissions addressing these additional requirements of CAA section 110(a)(2)(D)(i) in separate rulemakings. We proposed action on Arizona's provisions regarding interference with other states' measures to prevent significant deterioration of air quality on June 27, 2012. *See* 77 FR 38239.

B. NO_X SIP Call, Clean Air Interstate Rule (CAIR) and the Transport Rule

EPA has previously addressed the requirements of section 110(a)(2)(D)(i)(I) in past regulatory actions such as the 1998 NO_X SIP call,[3] the 2005 Clean Air Interstate Rule (''CAIR''),[4] and the 2011 Transport Rule (also known as the ''Cross-State Air Pollution Rule'' or ''CSAPR'').[5] In the NO_X SIP call, EPA took action to remediate emissions of nitrogen oxides (NO_X) that significantly contributed to nonattainment of, or interfered with maintenance of, the then applicable ozone NAAQS through interstate transport of NO_X and the resulting ozone.[6] Through this rule, EPA evaluated whether or not the ozone-season NO_X emissions in certain states had prohibited interstate impacts, and if they had such impacts, required the states to adopt substantive SIP revisions to eliminate the NO_X emissions, whether through participation in a regional cap and trade program or by other means.[7]

After promulgation of the 1997 8-hour ozone NAAQS and the 1997 $PM_{2.5}$ NAAQS, EPA again recognized that regional transport was a serious concern throughout the eastern United States and therefore developed CAIR to address emissions of sulfur dioxide (SO_2) and NO_X that exacerbate ambient ozone and $PM_{2.5}$ levels in many downwind areas through interstate transport.[8] Within CAIR, EPA interpreted the term ''interfere with maintenance'' as part of the evaluation of whether or not the emissions of sources in certain states had such impacts on areas that EPA projected would be in violation of the NAAQS unless actions were taken by upwind states to reduce SO_2 and NO_X emissions. Through CAIR, EPA again required states that had such interstate impacts to adopt substantive SIP revisions to eliminate the SO_2 and NO_X emissions, whether through participation in a regional cap and trade program or by other means.

In 2008, the U.S. Court of Appeals for the D.C. Circuit found that CAIR and the related CAIR federal implementation plans were unlawful. *North Carolina* v. *EPA,* 531 F.3d 896 (D.C. Cir. 2008), modified on rehearing, *North Carolina* v. *EPA,* 550 F.3d 1176, 1178 (D.C. Cir. 2008). Among other issues, the court held that EPA had not correctly addressed the second element of section 110(a)(2)(D)(i)(I) in CAIR and noted that ''EPA gave no independent significance to the 'interfere with maintenance' prong of section 110(a)(2)(D)(i)(I) to separately identify upwind sources interfering with downwind maintenance.'' 531 F.3d at 909. EPA's approach, the court reasoned, would leave areas that are ''barely meeting attainment'' with ''no recourse'' to address upwind emissions sources. *Id.* The court therefore concluded that a plain language reading of the statute requires EPA to give independent meaning to the interfere with maintenance requirement of section 110(a)(2)(D)(i) and that the approach used by EPA in CAIR failed to do so.

To address the judicial remand of CAIR and to replace it, on August 8, 2011, EPA published the final Transport Rule. 76 FR 48208. The Transport Rule addresses interstate transport pursuant to CAA section 110(a)(2)(D)(i)(I) in the eastern United States with respect to the 1997 8-hour ozone NAAQS, the 1997 $PM_{2.5}$ NAAQS, and the 2006 24-hour $PM_{2.5}$ NAAQS.[9] As part of this rulemaking, EPA specifically reexamined the section 110(a)(2)(D)(i)(I) requirements to prohibit emissions from sources in a state that ''contribute significantly to nonattainment'' or ''interfere with maintenance'' of the NAAQS in other states and developed an approach to identify (1) areas that it predicts to be violating the NAAQS, and (2) areas that it predicts to be close to the level of these NAAQS and therefore at risk to become nonattainment unless emissions from sources in other states are appropriately controlled. This approach starts by identifying those specific geographic areas for which further evaluation is appropriate and differentiates between areas where the concern is significant contribution to nonattainment as opposed to interference with maintenance. EPA then conducts state-specific analyses of multiple factors related to pollution levels at the identified ''receptors'' (monitoring sites) of concern to evaluate significant contribution to nonattainment and interference with maintenance of the NAAQS in other states.

On December 30, 2011, the U.S. Court of Appeals for the D.C. Circuit issued an order addressing the status of the Transport Rule and CAIR in response to motions filed by numerous parties seeking a stay of the Transport Rule pending judicial review.[10] In that order, the court stayed the Transport Rule pending resolution of these petitions for review of the rule. The court also stated that EPA is expected to continue to administer CAIR in the interim until the court rules on these petitions for review of the Transport Rule.

C. EPA Guidance

On September 25, 2009, after the court remanded CAIR and while EPA was working on its replacement, EPA issued a guidance memorandum that provides recommendations to states for making submissions to meet the requirements of CAA section 110(a)(2)(D)(i) for the 2006 $PM_{2.5}$ standards (''2006 $PM_{2.5}$ NAAQS Infrastructure Guidance'' or ''Guidance'').[11] With respect to the requirement in section 110(a)(2)(D)(i)(I) to prohibit emissions that would contribute significantly to nonattainment of the NAAQS in any other state, the 2006 $PM_{2.5}$ NAAQS Infrastructure Guidance essentially reiterated the recommendations for western states made by EPA in previous guidance addressing the 110(a)(2)(D)(i) requirements for the 1997 8-hour Ozone and 1997 $PM_{2.5}$ NAAQS.[12] The 2006 $PM_{2.5}$ NAAQS Infrastructure Guidance advised states outside of the CAIR region to include in their section 110(a)(2)(D)(i)(I) SIPs adequate technical analyses to support their conclusions regarding interstate pollution transport, *e.g.,* information concerning emissions in the state, meteorological conditions in the state and in potentially impacted states, monitored ambient pollutant concentrations in the state and in potentially impacted states, distances to

[3] *See* ''Finding of Significant Contribution and Rulemaking for Certain States in the Ozone Transport Assessment Group Region for Purposes of Reducing Regional Transport of Ozone,'' 63 FR 57356 (October 27, 1998) (''NO_X SIP Call'').

[4] *See* ''Rule to Reduce Interstate Transport of Fine Particulate Matter and Ozone (Clean Air Interstate Rule); Revisions to Acid Rain Program; Revisions to the NO_X SIP Call,'' 70 FR 25162 (May 12, 2005) (''CAIR'').

[8] *See* 70 FR 25162 at 25263–69 (May 12, 2005).

[9] CAIR did not address the 2006 24-hour $PM_{2.5}$ NAAQS.

[10] *See* Order dated December 30, 2011, *EME Homer City Generation, L.P.* v. *EPA* (No. 11–1302 and consolidated cases) (D.C. Circuit).

[11] *See* Memorandum from William T. Harnett entitled ''Guidance on SIP Elements Required Under Sections 110(a)(1) and (2) for the 2006 24-Hour Fine Particle ($PM_{2.5}$) National Ambient Air Quality Standards (NAAQS),'' September 25, 2009.

[12] *See* Memorandum from William T. Harnett entitled ''Guidance for State Implementation Plan (SIP) Submission to Meet Current Outstanding Obligations Under Section 110(a)(2)(D)(i) for the 8-hour ozone and $PM_{2.5}$ National Ambient Air Quality Standards,'' August 15, 2006.

the nearest areas not attaining the NAAQS in other states, and air quality modeling. *See* 2006 $PM_{2.5}$ NAAQS Infrastructure Guidance at 3.[13] With respect to the requirement in section 110(a)(2)(D)(i)(I) to prohibit emissions that would interfere with maintenance of the NAAQS by any other state, the Guidance stated that SIP submissions must address this independent requirement of the statute and provide technical information appropriate to support the state's conclusions, such as information concerning emissions in the state, meteorological conditions in the state and in potentially impacted states, monitored ambient concentrations in the state and in potentially impacted states, and air quality modeling. *See* 2006 $PM_{2.5}$ NAAQS Infrastructure Guidance at 3, 4.

In this action, EPA is maintaining the conceptual approach to evaluating interstate pollution transport under CAA section 110(a)(2)(D)(i)(I) that the Agency provided in the 2006 $PM_{2.5}$ NAAQS Infrastructure Guidance and the Transport Rule.

As described more fully in our Technical Support Document (TSD), EPA evaluated data from existing monitors over three overlapping 3-year periods (i.e., 2006–2008, 2007–2009, and 2008–2010) to determine which areas are expected to be violating the 2006 24-hour $PM_{2.5}$ NAAQS and which areas are predicted to potentially have difficulty maintaining attainment. In essence, if a monitoring site shows a violation of the 2006 24-hour $PM_{2.5}$ NAAQS during the most recent 3-year period (2008–2010), then this monitor location is appropriate for evaluation for purposes of the significant contribution to nonattainment element of section 110(a)(2)(D)(i)(I). If, on the other hand, a monitoring site shows attainment of the 2006 24-hour $PM_{2.5}$ NAAQS during the most recent 3-year period (2008–2010) but a violation in at least one of the previous two 3-year periods (2006–2008 or 2007–2009), then this monitor location is appropriate for evaluation for purposes of the interfere with maintenance element of the statute.

By this method, EPA has identified those areas with monitors that are appropriate ''nonattainment receptors'' or ''maintenance receptors'' for evaluating whether the emissions from sources in another state could significantly contribute to nonattainment in, or interfere with maintenance in, that particular area. EPA believes that this approach for identifying areas that are predicted to be nonattainment and significantly impacted by other states, or have difficulty maintaining the NAAQS, is appropriate to evaluate a state's submission in relation to the elements of CAA section 110(a)(2)(D)(i)(I) pertaining to significant contribution to nonattainment and interference with maintenance.

EPA continues to believe that the more widespread and serious transport problems in the eastern United States are analytically distinct.[14] For the 2006 $PM_{2.5}$ NAAQS, EPA believes that nonattainment and maintenance problems in the western United States are relatively local in nature with only limited impacts from interstate transport. In the Transport Rule, EPA did not calculate the portion of any downwind state's predicted $PM_{2.5}$ concentrations that would result from emissions from individual western states, such as Arizona. Accordingly, EPA believes that section 110(a)(2)(D)(i)(I) SIP submissions for states outside the geographic area analyzed to develop the Transport Rule may be evaluated using a ''weight of the evidence'' approach that takes into account available relevant information, such as that recommended by EPA in the 2006 $PM_{2.5}$ NAAQS Infrastructure Guidance. Such information may include, but is not limited to, the amount of emissions in the state relevant to the NAAQS in question, the meteorological conditions in the area, the distance from the state to the nearest monitors in other states that are appropriate receptors, or such other information as may be probative to consider whether sources in the state may contribute significantly to nonattainment or interfere with maintenance of the 2006 24-hour $PM_{2.5}$ NAAQS in other states. These submissions can rely on modeling when acceptable modeling technical analyses are available, but EPA does not believe that modeling is necessarily required if other available information is sufficient to evaluate the presence or degree of interstate transport in a given situation.

II. The State's Submittal

CAA sections 110(a) and 110(l) require that revisions to a SIP be adopted by the State after reasonable notice and public hearing. EPA has promulgated specific procedural requirements for SIP revisions in 40 CFR part 51, subpart F. These requirements include publication of notices, by prominent advertisement in the relevant geographic area, of a public hearing on the proposed revisions, a public comment period of at least 30 days, and an opportunity for a public hearing.

On October 14, 2009, the Arizona Department of Environmental Quality (ADEQ) submitted the ''Arizona State Implementation Plan Revision under Clean Air Act Section 110(a)(1) and (2); 2006 $PM_{2.5}$ NAAQS, 1997 $PM_{2.5}$ NAAQS and 1997 8-hour Ozone NAAQS,'' to address the requirements of CAA section 110(a)(2)(D)(i)(I) for the 2006 $PM_{2.5}$ NAAQS, among other requirements (''2009 Infrastructure Analysis'').[15] Within that submittal, Appendix B, ''Clean Air Act Section 110(a)(2)(D)(i)—Interstate Transport Analysis for the 2006 $PM_{2.5}$ National Ambient Air Quality Standards'' (referred to herein as ''$PM_{2.5}$ Transport Analysis'') addresses the CAA section 110(a)(2)(D)(i)(I) interstate transport requirements that are the subject of this proposed rule.

ADEQ's October 14, 2009 submittal includes public process documentation for the 2009 Infrastructure Analysis, including the $PM_{2.5}$ Transport Analysis. In addition, the SIP revision includes documentation of a duly noticed public hearing held on September 16, 2009, on the proposed 2009 Infrastructure Analysis.

We find that the process followed by ADEQ in adopting the $PM_{2.5}$ Transport Analysis complies with the procedural requirements for SIP revisions under CAA section 110 and EPA's implementing regulations.

III. EPA's Evaluation

To determine whether the CAA section 110(a)(2)(D)(i)(I) requirement is satisfied, EPA must determine whether a state's emissions contribute significantly to nonattainment or

[13] The 2006 $PM_{2.5}$ NAAQS Infrastructure Guidance stated that EPA was working on a new rule to replace CAIR that would address issues raised by the court in the *North Carolina* case and that would provide guidance to states in addressing the requirements related to interstate transport in CAA section 110(a)(2)(D)(i)(I) for the 2006 $PM_{2.5}$ NAAQS. It also noted that states could not rely on the CAIR rule for section 110(a)(2)(D)(i)(I) submissions for the 2006 24-hour $PM_{2.5}$ NAAQS because the CAIR rule did not address this NAAQS. *See* 2006 $PM_{2.5}$ NAAQS Infrastructure Guidance at 3.

[14] *See* Transport Rule Proposal, 75 FR 45210 at 45227 (August 2, 2010).

[15] ADEQ intended for this SIP submittal to also address all other requirements of CAA section 110(a), excepting section 110(a)(2)(G), for the 1997 8-hour ozone and $PM_{2.5}$ NAAQS and the 2006 $PM_{2.5}$ NAAQS. *See* letter dated October 14, 2009, from Eric C. Massey, Air Quality Director, ADEQ, to Laura Yoshii, Acting Regional Administrator, EPA Region 9, with enclosures. EPA has proposed to act on this submittal for purposes of addressing the other ''infrastructure'' requirements of CAA section 110(a) in a separate proposed rule published on June 27, 2012 (77 FR 38239).

interfere with maintenance in downwind areas. If this factual finding is in the negative, then section 110(a)(2)(D)(i)(I) does not require any changes to a state's SIP. If, however, the evaluation reveals that emissions from sources within the state do contribute significantly to nonattainment or interfere with maintenance in other states, then the state must adopt substantive provisions to eliminate those emissions. The state could achieve any required reductions through traditional command and control programs, or at its own election, through participation in a cap and trade program. Consistent with EPA's approach in the 1998 NO_X SIP call, the 2005 CAIR, and the 2011 Transport Rule,[16] EPA is evaluating these impacts with respect to specific monitors identified as having nonattainment and/or maintenance problems, which we refer to as ''receptors.'' EPA notes that no single piece of information is by itself dispositive of the issue. Instead, the total weight of all the evidence taken together is used to evaluate significant contributions to nonattainment or interference with maintenance of the 2006 24-hour $PM_{2.5}$ NAAQS in another state.

This proposed approval addresses the requirements of CAA section 110(a)(2)(D)(i)(I) for the 2006 24-hour $PM_{2.5}$ NAAQS in several ways. It takes into account Arizona's $PM_{2.5}$ Transport Analysis, which explains that meteorological and other characteristics in Arizona and in the surrounding areas reduce the likelihood that Arizona's emissions contribute significantly to nonattainment or interfere with maintenance of the 2006 24-hour $PM_{2.5}$ NAAQS in any downwind state. In addition, EPA has supplemented its evaluation of Arizona's submittal with a review of the monitors in other states that are appropriate ''nonattainment receptors'' or ''maintenance receptors,'' consistent with EPA's approach in the Transport Rule, and additional technical information to consider whether sources in Arizona contribute significantly to nonattainment or interfere with maintenance of the 2006 24-hour $PM_{2.5}$ NAAQS in other states.

Our Technical Support Document (TSD) contains a more detailed evaluation and is available in the public docket for this rulemaking, which may be accessed online at *http://www.regulations.gov,* docket number EPA–R09–OAR–2012–0398. We provide below a summary of our analysis.

A. Evaluation of Significant Contribution to Nonattainment

EPA reviewed the State of Arizona's $PM_{2.5}$ Transport Analysis and additional technical information to evaluate the potential for Arizona emissions to contribute significantly to nonattainment of the 2006 $PM_{2.5}$ NAAQS at specified monitoring sites in the western United States.[17] EPA first identified as ''nonattainment receptors'' all monitoring sites in the western states that had recorded $PM_{2.5}$ design values above the level of the 2006 24-hour $PM_{2.5}$ NAAQS (35 $\mu g/m^3$) during the years 2008–2010.[18] See Section III of the TSD for more a more detailed description of EPA's methodology for selection of nonattainment receptors. Because geographic distance is a relevant factor in the assessment of potential pollution transport, EPA focused its review on information related to potential transport of $PM_{2.5}$ pollution from Arizona to nonattainment receptors in the states bordering Arizona: Utah, Nevada, and California.[19] With respect to Utah and Nevada, as detailed in the TSD, EPA believes that the following factors support a finding that emissions from Arizona do not significantly contribute to nonattainment of the 2006 24-hour $PM_{2.5}$ NAAQS in either of these states: (1) Technical information indicating that elevated $PM_{2.5}$ levels at nonattainment receptors are predominantly caused by local emission sources, (2) air quality data indicating that regional background levels of $PM_{2.5}$ are generally low during the time periods of elevated $PM_{2.5}$ at these receptors, and (3) the presence of significant terrain, which creates a physical impediment to pollution transport. Similarly and again as detailed in the TSD, with respect to California, technical information indicating that elevated $PM_{2.5}$ levels at the nonattainment receptors are predominantly caused by local emission sources and that the dominant air flows across California are from the west to the east support a finding that emissions from the state of Arizona do not significantly contribute to nonattainment of the 2006 24-hour $PM_{2.5}$ standards in California.

EPA also evaluated potential $PM_{2.5}$ transport to nonattainment receptors in the more distant western states of Oregon, Washington, Idaho, and Montana.[20] EPA believes that the following factors support a finding that emissions from Arizona do not significantly contribute to nonattainment of the 2006 24-hour $PM_{2.5}$ NAAQS in any of these states: (1) The significant distance from the State of Arizona to the nonattainment receptors in these states, (2) technical information indicating that elevated $PM_{2.5}$ levels at nonattainment receptors in these states are predominantly caused by local emission sources, (3) air quality data indicating that regional background levels of $PM_{2.5}$ are generally low during the time periods of elevated $PM_{2.5}$ at these receptors, and (4) the presence of significant terrain, which creates a physical impediment to pollution transport.

Based on this evaluation of Arizona's $PM_{2.5}$ Transport Analysis and additional technical information, EPA proposes to conclude that emissions of direct $PM_{2.5}$ and $PM_{2.5}$ precursors from sources in the State of Arizona do not significantly contribute to nonattainment of the 2006 24-hour $PM_{2.5}$ standards in any other state and that CAA section 110(a)(2)(D)(i)(I) therefore does not require Arizona to adopt additional controls for purposes of implementing the 2006 24-hour $PM_{2.5}$ standards.

B. Evaluation of Interference With Maintenance

EPA reviewed the State of Arizona's $PM_{2.5}$ Transport Analysis and additional technical information to evaluate the potential for Arizona emissions to interfere with maintenance of the 2006 24-hour $PM_{2.5}$ standards at specified monitoring sites in the western U.S. EPA first identified as ''maintenance

[16] *See* NO_X SIP Call, 63 FR 57371 (October 27, 1998); CAIR, 70 FR 25172 (May 12, 2005); and Transport Rule or Cross-State Air Pollution Rule, 76 FR 48208 (August 8, 2011).

[17] EPA has also considered potential $PM_{2.5}$ transport from Arizona to the nearest nonattainment and maintenance receptors located in the eastern, midwestern and southern states covered by the Transport Rule and believes it is reasonable to conclude that, given the significant distance from Arizona to the nearest such receptor (in Illinois) and the relatively insignificant amount of emissions from Arizona that could potentially be transported such a distance, emissions from Arizona sources do not significantly contribute to nonattainment or interfere with maintenance of the 2006 24-hour $PM_{2.5}$ NAAQS at this location. These same factors also support a finding that emissions from Arizona sources neither contribute significantly to nonattainment nor interfere with maintenance of the 2006 24-hour $PM_{2.5}$ NAAQS at any location further east. *See* TSD at Section I.B.3.

[18] Because CAIR did not cover states in the western United States, these data are not significantly impacted by the remanded CAIR and thus could be considered in this analysis. In contrast, recent air quality data in the eastern, midwestern and southern states are significantly impacted by reductions associated with CAIR and because the Transport Rule was developed to replace CAIR, EPA could not consider reductions associated with the CAIR in the base case transport analysis for those states. *See* 76 FR at 48223–24.

[19] EPA did not identify any nonattainment receptors in New Mexico or Colorado.

[20] EPA did not identify any nonattainment receptors in Wyoming.

receptors'' all monitoring sites in the western states that had recorded $PM_{2.5}$ design values above the level of the 2006 24-hour $PM_{2.5}$ NAAQS (35 μg/m^3) during the 2006–2008 and/or 2007–2009 periods but below this standard during the 2008–2010 period. See section IV of the TSD for more information regarding EPA's methodology for selection of maintenance receptors. All of the maintenance receptors in the western states are located in California, Utah, and Arizona. EPA therefore evaluated the potential for transport of Arizona emissions to the maintenance receptors located in California and Utah.[21] As detailed in the TSD, EPA believes that the following factors support a finding that emissions from Arizona do not interfere with maintenance of the 2006 24-hour $PM_{2.5}$ NAAQS in either state: (1) Technical information indicating that elevated $PM_{2.5}$ levels at these maintenance receptors are predominantly caused by local emission sources, and (2) technical information indicating that the dominant air flows across California are from the west to the east.

Based on this evaluation of Arizona's $PM_{2.5}$ Transport Analysis and additional technical information, EPA proposes to conclude that emissions of direct $PM_{2.5}$ and $PM_{2.5}$ precursors from sources in the State of Arizona do not interfere with maintenance of the 2006 24-hour $PM_{2.5}$ standards in any other state and that CAA section 110(a)(2)(D)(i)(I) therefore does not require Arizona to adopt additional controls for purposes of implementing the 2006 24-hour $PM_{2.5}$ standards.

C. Section 110(l) of the Act

Section 110(l) of the Act prohibits EPA from approving any SIP revision that would interfere with any applicable requirement concerning attainment and reasonable further progress (RFP) or any other applicable requirement of the Act. The $PM_{2.5}$ Transport Analysis contains no regulatory provisions and does not affect any requirement in Arizona's applicable implementation plan. We propose to determine that our approval of the $PM_{2.5}$ Transport Analysis would comply with CAA section 110(l) because the proposed SIP revision would not interfere with the on-going process for ensuring that requirements for RFP and attainment of the NAAQS are met. The SIP revision does not alter any provisions in the SIP as EPA has concluded, based on its supplemental analysis, that the existing SIP is sufficient to meet the requirements of 110(a)(2)(D)(i)(I). Our TSD contains a more detailed discussion of our evaluation.

[21] As this analysis focused on *interstate* transport, EPA did not evaluate the impact of Arizona emissions on maintenance receptors within Arizona. (EPA has not identified any nonattainment receptors in Arizona.)

IV. Proposed Action

Under section 110(k) of the Clean Air Act, EPA is proposing to approve a SIP revision submitted by the State of Arizona on October 14, 2009 and to determine, based on that submission and additional EPA analysis, that emissions from Arizona sources do not contribute significantly to nonattainment of the 2006 24-hour $PM_{2.5}$ NAAQS in any other state or interfere with maintenance of the 2006 24-hour $PM_{2.5}$ NAAQS by any other state. Accordingly, we propose to conclude that the existing SIP is adequate to address the requirements of section 110(a)(2)(D)(i)(I) of the Clean Air Act (CAA) for the 2006 National Ambient Air Quality Standard (NAAQS or standard) for fine particulate matter ($PM_{2.5}$) and that additional control measures in Arizona are not necessary for this purpose.

EPA is soliciting public comments on this proposal and will accept comments until the date noted in the **DATES** section above.

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely proposes to approve state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

Partial Approval and Disapproval of Air Quality Implementation Plans; Arizona; State Board Requirements for Ozone and Fine Particulate Matter

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to partially approve and partially disapprove a State

Implementation Plan (SIP) revision submitted by the State of Arizona to address the requirements of section 110(a)(2)(E)(ii) of the Clean Air Act (CAA) for the 1997 8-hour ozone national ambient air quality standards (NAAQS) and the 1997 and 2006 NAAQS for fine particulate matter ($PM_{2.5}$). EPA is proposing to approve the state's provisions regarding disclosure of potential conflicts of interest under 128(a)(2), but is proposing to disapprove, on narrow grounds, their 128(a)(1) provisions regarding board composition because these provisions do not apply to enforcement orders. We encourage the State to submit a revised SIP to address this very narrow deficiency, and we stand ready to work with the State to develop a revised plan. We are taking comments on this proposal and plan to follow with a final action.

DATES: Written comments must be received on or before August 29, 2012.

ADDRESSES: Submit your comments, identified by Docket ID Number EPA–R09–OAR–2012–0398, by one of the following methods:

1. *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.
2. *E-mail: r9_airplanning@epa.gov.*
3. *Fax:* 415–947–3579.
4. *Mail or deliver:* Rory Mays (AIR–2), U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901. Deliveries are only accepted during the Regional Office's normal hours of operation.

Instructions: All comments will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through *http://www.regulations.gov* or email. *http://www.regulations.gov* is an anonymous access system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send email directly to EPA, your email address will be automatically captured and included as part of the public comment. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Docket: Generally, documents in the docket for this action are available electronically at *www.regulations.gov* and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents in the docket are listed at *www.regulations.gov,* some information may be publicly available only at the hard copy location (e.g., copyrighted material, large maps), and some may not be publicly available in either location (e.g., CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Rory Mays, Air Planning Office (AIR–2), U.S. Environmental Protection Agency, Region IX, (415) 972–3227, *mays.rory@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, the terms ''we,'' ''us,'' and ''our'' refer to EPA.

V. Statutory and Executive Order Reviews

I. Background

A. Regulatory History

On July 18, 1997, EPA issued a revised NAAQS for ozone[1] and a new NAAQS for fine particulate matter ($PM_{2.5}$).[2] EPA subsequently revised the 24-hour $PM_{2.5}$ NAAQS on September 21, 2006.[3] Each of these actions triggered a requirement for states to submit an infrastructure SIP to address the applicable requirements of section 110(a)(2) within three years of issuance of the new or revised NAAQS. Section 110(a)(2) includes a list of specific elements that each such plan submission must meet, including section 110(a)(2)(E)(ii), which requires compliance with the requirements of section 128 of the CAA.

On March 10, 2005, EPA entered into a Consent Decree with EarthJustice that obligated EPA to make official findings in accordance with section 110(k)(1) of the CAA as to whether states had made required complete SIP submissions, pursuant to sections 110(a)(1) and (2), by December 15, 2007 for the 1997 8-hour ozone NAAQS and by October 5, 2008 for the 1997 $PM_{2.5}$ NAAQS. EPA made such findings for the 1997 8-hour ozone NAAQS on March 27, 2008 (73 FR 16205) and for the 1997 $PM_{2.5}$ NAAQS on October 22, 2008 (73 FR 62902). In each case, EPA found that Arizona had failed to make a complete submittal to satisfy the requirements of section 110(a)(2)(E)(ii).

The State board SIP provisions in section 128 require each state to submit a SIP that contains requirements that (1) any board or body which approves permits or enforcement orders under the CAA shall have at least a majority of members who represent the public interest and do not derive any significant portion of their income from persons subject to permits or enforcement orders under the CAA; and (2) any potential conflicts of interest by members of such board or body or the head of an executive agency with similar powers be adequately disclosed. 42 U.S.C. 7428.

B. EPA Guidance

In 1978, EPA issued a guidance memorandum recommending ways States could meet the requirements of section 128 (''1978 Guidance''), including suggested interpretations of certain terms in section 128.[4] EPA has not issued further guidance or regulations of general applicability on the subject since that time. However, as part of our proposals on other recent infrastructure actions, EPA has proposed certain interpretations of section 128 and invited comment on these interpretations. See, e.g., EPA's proposed rule on infrastructure SIP requirements for Hawaii (77 FR 21913, April 12, 2012). We are now proposing these same interpretations in relation to the Arizona infrastructure SIP.[5]

II. The State's Submittals

On October 14, 2009, ADEQ submitted the ''Arizona State Implementation Plan Revision under Clean Air Act Section 110(a)(2) and (2); 2006 $PM_{2.5}$ NAAQS, 1997 $PM_{2.5}$ NAAQS

[1] The 8-hour averaging period replaced the previous 1-hour averaging period, and the level of the NAAQS was changed from 0.12 parts per million (ppm) to 0.08 ppm (62 FR 38856).

[2] The annual $PM_{2.5}$ standard was set at 15 micrograms per cubic meter ($\mu g/m^3$), based on the 3-year average of annual arithmetic mean $PM_{2.5}$ concentrations from single or multiple community-oriented monitors and the 24-hour $PM_{2.5}$ standard was set at 65 $\mu g/m^3$, based on the 3-year average of the 98th percentile of 24-hour $PM_{2.5}$ concentrations at each population-oriented monitor within an area (62 FR 38652).

[3] The final rule revising the 24-hour NAAQS for $PM_{2.5}$ from 65 $\mu g/m^3$ to 35 $\mu g/m^3$ was published in the **Federal Register** on October 17, 2006 (71 FR 61144).

[4] *See* Memorandum from David O. Bickart to Regional Air Directors, ''Guidance to States for Meeting Conflict of Interest Requirements of Section 128,'' Suggested Definitions, March 2, 1978.

[5] If EPA finalizes this action, the proposed interpretations will supersede (to the extent that they are inconsistent with) interpretations suggested in the 1978 guidance, at least for Arizona's SIP.

and 1997 8-hour Ozone NAAQS,'' to address all of the CAA section 110(a)(2) requirements except for section 110(a)(2)(G) [6] for these three NAAQS (''2009 Infrastructure Submittal'').[7] The 2009 Infrastructure Submittal includes public process documentation (including public comments) and evidence of adoption.

On June 1, 2012, ADEQ submitted the ''Proposed Supplement to the Arizona State Implementation Plan under Clean Air Act Section 110(a)(1) and (2): Implementation of [1997 $PM_{2.5}$ and 8-hour ozone NAAQS and 2006 $PM_{2.5}$ NAAQS], Parallel Processing Version'' (''2012 Supplement''). The 2012 Supplement includes a number of statutes and regulations that are currently effective under State law but that have not been adopted specifically for submittal to EPA as a SIP revision under CAA section 110. By letter dated June 1, 2012, ADEQ submitted unofficial copies of these statutes and regulations to EPA with a request for ''parallel processing'' [8] and stated its intention to submit these statutes and regulations as a formal SIP submittal, following reasonable notice and public hearings, by late August 2012.[9] ADEQ amended this request by letter dated June 14, 2012, to remove several statutes and regulations from the 2012 Supplement.[10]

We are proposing to act on the 2009 Infrastructure Submittal, as supplemented and amended by the 2012 Supplement. We refer to the 2009 Infrastructure Submittal and 2012 Supplement collectively as the ''2009 Infrastructure SIP.''

III. EPA's Evaluation

To determine whether the CAA section 110(a)(2)(E)(ii) requirements are satisfied, EPA must determine whether the State SIP has adequate board composition and disclosure requirements under section 128 of the CAA. In their 2009 Infrastructure Submittal and 2012 Supplement, Arizona submitted unofficial copies of Title 38, Chapter 3, Article 8 Conflict of Interest of Officers and Employees provisions to address the section 128 requirements. The June 2012 Supplement also included Arizona Revised Statute § 49–478, which addresses compositional requirements for county hearing boards. We are proposing to approve these statutory provisions into the SIP as non-regulatory materials.[11]

A. Evaluation of 128(a)(1) Board Composition Requirements

As explained further in our Technical Support Document (TSD),[12] Arizona has four heads of executive agencies that approve permits and enforcement orders under the Clean Air Act: the Director of Arizona Department of Environmental Quality (ADEQ), and the Control Officer of each of the following three agencies: Maricopa County Air Quality Department (AQD), Pima County Department of Environmental Quality (DEQ), and Pinal County Air Quality Control District (AQCD). Permit and enforcement order appeals at the state level are heard by an administrative law judge in Arizona's Office of Administrative Hearings, while those at the county level are heard by an Air Quality Hearing Board in each respective county (Maricopa, Pima, and Pinal). The only boards in Arizona that approve permits and enforcement orders are the Air Quality Hearing Boards in Maricopa, Pima, and Pinal counties, which may hear permit and enforcement order appeals and take actions to sustain, modify, or reverse (for permits) or affirm or modify (for enforcement orders) the actions of each county's respective Control Officer. These boards are subject to the board membership requirements of section 128(a)(1).

ARS 49–478(B) establishes the compositional requirements of the county Air Quality Hearing Boards, namely that they consist of five members and that ''[a]t least three members shall not have a substantial interest, as defined in section 38–502, in any person required to obtain a permit pursuant to [Title 49, Chapter 3 (''Air Quality''), Article 3 (''County Air Pollution Control'')].'' It is important to note that while this statute explicitly addresses interests in persons required to obtain permits, it does not address ''substantial interest'' with respect to interests in persons subject to enforcement orders.

Pima County Code 17.04.190 (''Composition'') generally mirrors the language or ARS 49–478 but also includes the following requirement in subsection B: ''At least a majority of the hearing board members shall not individually have a substantial interest in an emission source subject to permits or enforcement orders issued pursuant to this title. Substantial interest means any interest other than a remote interest as defined in A.R.S. 38–502, paragraph 10.'' Thus, this local regulation extends the majority membership requirement of ARS 49–478 to interests in persons subject to enforcement orders. However, this regulation has not been submitted for incorporation into the Arizona SIP.

Maricopa County Air Pollution Control Regulation, Rule 100, Section 108 also mirrors the language of ARS 49–478 but its majority membership requirement is limited to substantial interests ''in any person required to obtain an air pollution permit'' (i.e., it does not address persons subject to enforcement orders). Arizona's 2009 Infrastructure Submittal and 2012 Supplement did not cite any such provisions for Pinal County.

ARS 49–478 in conjunction with the definitions of ''substantial interest'' and ''remote interest'' in ARS 38–502, which we propose to approve into the Arizona SIP, satisfy the ''public interest'' and ''significant income'' requirements of CAA section 128(a)(1) for the county boards, but only with respect to interests in persons subject to permits. ARS 49–478 does not specifically reference interests in persons subject to enforcement orders. We view this as a very narrow deficiency in the State SIP but one that nonetheless compels disapproval of the State's 128(a)(1) board composition provisions.

EPA takes very seriously a proposal to disapprove a state plan, as we believe that it is preferable, and preferred in the provisions of the Clean Air Act, that

[6] In a separate rulemaking, EPA proposed to fully approve Arizona's SIP to address the requirements regarding air pollution emergency episodes in CAA section 110(a)(2)(G) for the 1997 8-hour ozone NAAQS. 77 FR 21911 (April 12, 2012).

[7] *See* letter dated October 14, 2009, from Eric C. Massey, Air Quality Director, ADEQ, to Laura Yoshii, Acting Regional Administrator, EPA Region 9.

[8] Under EPA's ''parallel processing'' procedure, EPA proposes rulemaking action concurrently with the State's proposed rulemaking. If the State's proposed plan is changed, EPA will evaluate that subsequent change and may publish another notice of proposed rulemaking. If no significant change is made, EPA will publish a final rulemaking on the plan after responding to any submitted comments. Final rulemaking action by EPA will occur only after the plan has been fully adopted by Arizona and submitted formally to EPA for approval into the SIP. See 40 CFR part 51, appendix V, section 2.3. We note that because ADEQ's rulemaking process here is solely for purposes of adopting the 2012 Supplement as a SIP revision under CAA section 110 and not for purposes of revising any of the statutes or regulations contained therein, we do not expect any significant changes between the proposed and final plans.

[9] *See* letter dated June 1, 2012, from Eric C. Massey, Air Quality Director, ADEQ, to Jared Blumenfeld, Regional Administrator, EPA Region 9.

[10] *See* letter dated June 14, 2012, from Eric C. Massey, Air Quality Director, ADEQ, to Jared Blumenfeld, Regional Administrator, EPA Region 9.

[11] Copies of these Arizona statutes are included in the 2012 Supplement, which is available in the docket for this action and online at *http://www.regulations.gov,* docket number EPA–R09–OAR–2012–0398.

[12] Our Technical Support Document (TSD) describes our evaluation in more detail and is available in the public docket for this rulemaking, which may be accessed online at *http://www.regulations.gov,* docket number EPA–R09–OAR–2012–0398.

these requirements be implemented through state plans. A state plan need not contain exactly the same provisions that EPA might require, but EPA must be able to find that the state plan is consistent with the requirements of the Act. Further, EPA's oversight role requires that it assure consistent implementation of Clean Air Act requirements by states across the country, even while acknowledging that individual decisions from source to source or state to state may not have identical outcomes. In this instance, we believe that the 2009 Infrastructure SIP mostly meets the requirements of 128(a)(1) with respect to significant income and representing the public interest, except that the submitted provisions do not specifically address ''substantial interest'' with respect to interests in persons subject to enforcement orders. As a result, EPA believes this proposed disapproval is the only path that is consistent with the Act at this time. Based on the content of Pima County Code 17.04.190, we believe that this narrow deficiency can be cured by Maricopa and Pinal counties amending their regulations to mirror Pima County Code 17.04.190, and by ADEQ submitting such amended regulations for Pima, Maricopa, and Pinal counties as a SIP revision.

B. Evaluation of 128(a)(2) Disclosure Requirements

Arizona's statutes governing disclosure of interests are found in ARS Title 38, Chapter 3, Article 8, which ADEQ submitted as a revision to the Arizona SIP. As further explained in our TSD, the conflict of interest requirements under Article 8 apply to all those individuals that approve permits and enforcement orders in the first instance or on appeal, including the Director of ADEQ, the administrative law judges of the state Office of Administrative Hearings, the Air Pollution Control Officers of the three relevant counties (Maricopa, Pima, and Pinal), and the members of the Air Quality Hearing Boards in each of the three counties.

ARS 38–503 is the heart of the disclosure provisions in Article 8. In particular, ARS 38–503(B) reads as follows: ''Any public officer or employee who has, or whose relative has, a substantial interest in any decision of a public agency shall make known such interest in the official records of such public agency and shall refrain from participating in any manner as an officer or employee in such decision.'' We interpret ''any decision of a public agency'' to include both permit and enforcement order approvals. ARS 38–502(3) defines ''make known'' as filing a paper or a copy of relevant meeting minutes that fully discloses a substantial interest and such filings must be maintained in a special file open to public inspection pursuant to ARS 38–509.

The disclosure of ''a substantial interest in any decision of a public agency'' covers a wide array of potential conflicts, because ''remote interest'' is narrowly defined, and Article 8 applies to all individuals that approve permits and enforcement orders under the CAA. Thus, upon Article 8 being approved into the Arizona SIP, the State and counties of Arizona will meet the CAA section 128(a)(2) requirement that ''any potential conflicts of interest * * * be adequately disclosed.''

IV. Proposed Action

EPA has evaluated the 2009 Infrastructure SIP and the existing provisions of the Arizona SIP for compliance with the CAA section 110(a)(2)(E)(ii) requirements for the 1997 8-hour ozone and $PM_{2.5}$ NAAQS and the 2006 $PM_{2.5}$ NAAQS. Our TSD contains more detailed evaluations and is available in the public docket for this rulemaking, which may be accessed online at *http://www.regulations.gov,* docket number EPA–R09–OAR–2012–0398.

Based upon this analysis, EPA proposes to approve Arizona's 2009 Infrastructure SIP with respect to the following infrastructure SIP requirements:

- Section 110(a)(2)(E)(ii) (in part): 128(a)(2) relating to potential conflicts of interest by members of any state board or body.

In addition, we are proposing to approve into the SIP certain statutory provisions included in the 2009 Infrastructure SIP, as discussed in the TSD: [13]

- ARS Title 38, Chapter 3, Article 8 (''Conflict of Interest of Officers and Employees'')
- ARS 49–435 (''Hearings on orders of abatement'')
- ARS 49–461 (''Violations; order of abatement'')
- ARS 49–478 (''Hearing board'')
- ARS 49–482 (''Appeals to hearing board'')
- ARS 49–490 (''Hearings on orders of abatement'')

Simultaneously, we are proposing to disapprove Arizona's 2009 Infrastructure SIP with respect to the following infrastructure SIP requirements:

- Section 110(a)(2)(E)(ii) (in part): 128(a)(1) relating to ''significant income'' and representing the ''public interest'' board composition requirements for Pima, Maricopa, and Pinal counties.

As explained more fully in the TSD, we are proposing to disapprove the 2009 Infrastructure SIP with respect to this requirement of CAA section 110(a)(2)(E)(ii) because the Arizona SIP does not fully satisfy the statutory requirements for board composition under section 128(a)(1) of the Act.

Section 110(l) of the Act prohibits EPA from approving any SIP revision that would interfere with any applicable requirement concerning attainment and reasonable further progress (RFP) or any other applicable requirement of the Act. The portion of 110(a)(2)(E)(ii) of the 2009 Infrastructure SIP that we are proposing to approve, as explained in the TSD, would improve the SIP by replacing obsolete statutes or regulations and by updating the state and local agencies' SIP implementation and enforcement authorities. We propose to determine that our approval of this element of the 2009 Infrastructure SIP would comply with CAA section 110(l) because the proposed SIP revision would not interfere with the on-going process for ensuring that requirements for RFP and attainment of the NAAQS are met, and the submitted SIP revision clarifies and updates the SIP. Our TSD contains a more detailed discussion of our evaluation.

Under section 179(a) of the CAA, final disapproval of a submittal that addresses a requirement of part D, title I of the CAA (CAA sections 171–193) or is required in response to a finding of substantial inadequacy as described in CAA section 110(k)(5) (SIP Call) starts a sanctions clock. The 2009 Infrastructure SIP was not submitted to meet either of these requirements. Therefore, any action we take to finalize the described partial disapprovals will not trigger mandatory sanctions under CAA section 179.

In addition, CAA section 110(c)(1) provides that EPA must promulgate a Federal Implementation Plan (FIP) within two years after finding that a State has failed to make a required submission or disapproving a State implementation plan submission in whole or in part, unless EPA approves a SIP revision correcting the deficiencies within that two-year period.

[13] Copies of these Arizona statutes and regulations are included in the 2012 Supplement, which is available in the docket for this action and online at *http://www.regulations.gov,* docket number EPA–R09–OAR–2012–0398.

V. Statutory and Executive Order Reviews

A. Executive Order 12866, Regulatory Planning and Review

This action is not a ''significant regulatory action'' under the terms of Executive Order (EO) 12866 (58 FR 51735, October 4, 1993) and is therefore not subject to review under the EO.

B. Paperwork Reduction Act

This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 et seq, because this proposed partial approval and partial disapproval of SIP revisions under CAA section 110 will not in-and-of itself create any new information collection burdens but simply proposes to approve certain State requirements, and to disapprove certain other State requirements, for inclusion into the SIP. Burden is defined at 5 CFR 1320.3(b).

C. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and small governmental jurisdictions. For purposes of assessing the impacts of today's rule on small entities, small entity is defined as: (1) A small business as defined by the Small Business Administration's (SBA) regulations at 13 CFR 121.201; (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of today's proposed rule on small entities, I certify that this proposed action will not have a significant impact on a substantial number of small entities. This proposed rule does not impose any requirements or create impacts on small entities. This proposed partial SIP approval and partial SIP disapproval under CAA section 110 will not in-and-of itself create any new requirements but simply proposes to approve certain State requirements, and to disapprove certain other State requirements, for inclusion into the SIP. Accordingly, it affords no opportunity for EPA to fashion for small entities less burdensome compliance or reporting requirements or timetables or exemptions from all or part of the rule. Therefore, this action will not have a significant economic impact on a substantial number of small entities.

We continue to be interested in the potential impacts of this proposed rule on small entities and welcome comments on issues related to such impacts.

D. Unfunded Mandates Reform Act

This action contains no Federal mandates under the provisions of Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1531–1538 for State, local, or tribal governments or the private sector.'' EPA has determined that the proposed partial approval and partial disapproval action does not include a Federal mandate that may result in estimated costs of $100 million or more to either State, local, or tribal governments in the aggregate, or to the private sector. This action proposes to approve certain pre-existing requirements, and to disapprove certain other pre-existing requirements, under State or local law, and imposes no new requirements. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this proposed action.

E. Executive Order 13132, Federalism

Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' ''Policies that have federalism implications'' is defined in the Executive Order to include regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.''

This action does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, because it merely proposes to approve certain State requirements, and to disapprove certain other State requirements, for inclusion into the SIP and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. Thus, Executive Order 13132 does not apply to this action.

F. Executive Order 13175, Coordination With Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP on which EPA is proposing action would not apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law. Thus, Executive Order 13175 does not apply to this proposed action.

G. Executive Order 13045, Protection of Children From Environmental Health Risks and Safety Risks

EPA interprets EO 13045 (62 FR 19885, April 23, 1997) as applying only to those regulatory actions that concern health or safety risks, such that the analysis required under section 5–501 of the EO has the potential to influence the regulation. This proposed action is not subject to EO 13045 because it is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997). This proposed partial approval and partial disapproval under CAA section 110 will not in-and-of itself create any new regulations but simply proposes to approve certain State requirements, and to disapprove certain other State requirements, for inclusion into the SIP.

H. Executive Order 13211, Actions That Significantly Affect Energy Supply, Distribution, or Use

This proposed rule is not subject to Executive Order 13211 (66 FR 28355, May 22, 2001) because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (''NTTAA''), Public Law 104–113, 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use

available and applicable voluntary consensus standards.

The EPA believes that this proposed action is not subject to requirements of Section 12(d) of NTTAA because application of those requirements would be inconsistent with the Clean Air Act.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Population

Executive Order (EO) 12898 (59 FR 7629 (Feb. 16, 1994)) establishes federal executive policy on environmental justice. Its main provision directs federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA lacks the discretionary authority to address environmental justice in this proposed rulemaking.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2012–0556; FRL–9706–7]

Revisions to the Nevada State Implementation Plan, Washoe County Air Quality District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve revisions to the Washoe County District Board of Health (WCDBOH) portion of the Nevada State Implementation Plan (SIP) that EPA expects to be submitted by the Nevada Division of Environmental Protection (NVDEP). These revisions concern regulations regarding compliance with permit conditions, recordkeeping, source sampling and testing, and statements of compliance with 40 CFR part 70 permits. These regulations generally regulate emissions of criteria pollutants such as volatile organic compounds (VOC), oxides of nitrogen (NO_X), and particulate matter (PM). This proposed approval is based upon proposed regulations submitted by NVDEP and an accompanying request that EPA proceed with SIP review while the State and local agencies complete their public review and agency adoption processes. EPA will not take final action on these regulations until NVDEP submits the final adopted versions to EPA as a revision to the Nevada SIP. Final EPA approval of the regulations and incorporation of them into the Nevada SIP would make them federally enforceable under the Clean Air Act (CAA). We are taking comments on this proposal and plan to follow with a final action.

DATES: Any comments must arrive by August 29, 2012.

ADDRESSES: Submit comments, identified by docket number EPA–R09–OAR–2012–0556, by one of the following methods:

1. *Federal eRulemaking Portal: www.regulations.gov.* Follow the on-line instructions.

2. *Email: steckel.andrew@epa.gov.*

3. *Mail or deliver:* Andrew Steckel (Air–4), U.S. Environmental Protection Agency Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901.

Instructions: All comments will be included in the public docket without change and may be made available online at *www.regulations.gov,* including any personal information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through *www.regulations.gov* or email. *www.regulations.gov* is an ''anonymous access'' system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send email directly to EPA, your email address will be automatically captured and included as part of the public comment. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Docket: Generally, documents in the docket for this action are available electronically at *www.regulations.gov* and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents in the docket are listed at *www.regulations.gov,* some information may be publicly available only at the hard copy location (e.g., copyrighted material, large maps), and some may not be publicly available in either location (e.g., CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Cynthia Allen, EPA Region IX, (415) 947–4120, *allen.cynthia@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us'' and ''our'' refer to EPA.

Table of Contents

I. The State's Submittal
A. What rules did the State submit?
B. Are there other versions of these rules?
C. What is the purpose of the submitted rules?
II. EPA's Evaluation and Proposed Action
A. How is EPA evaluating the rules?
B. Do the rules meet the evaluation criteria?
C. Public Comment and Proposed Action
III. Statutory and Executive Order Reviews

I. The State's Submittal

A. What rules did the State submit?

By letter dated July 5, 2012, NVDEP submitted to EPA on behalf of WCDBOH, unofficial copies of several rules, with a request for approval of these provisions into the SIP by parallel processing.[1] See July 5, 2012 letter to Jared Blumenfeld, Regional Administrator, EPA Region 9, from Colleen Cripps, Administrator, NVDEP. Table 1 lists the four rules addressed by this proposal.

[1] Under EPA's ''parallel processing'' procedure, EPA proposes rulemaking action concurrently with the State's proposed rulemaking. If the State's proposed rule is changed, EPA will evaluate that subsequent change and may publish another notice of proposed rulemaking. If no significant change is made, EPA will publish a final rulemaking on the rule after responding to any submitted comments. Final rulemaking action by EPA will occur only after the rule has been fully adopted by Nevada and submitted formally to EPA for incorporation into the SIP. See 40 CFR part 51, appendix V.

TABLE 1—RULES SUBMITTED BY NEVADA FOR PARALLEL PROCESSING

Local agency	Rule No.	Rule title
WCDBOH	030.218	Demonstration of Compliance.
WCDBOH	030.230	Record Keeping.
WCDBOH	030.235	Requirements for Source Sampling and Testing.
WCDBOH	030.970A	Part 70 Permit Monitoring and Compliance.

The above rules have been adopted locally but have not been adopted specifically for purposes of approval into the federally enforceable SIP under CAA section 110. NVDEP has requested that WCDBOH adopt these regulations following public process for purposes of SIP approval and thereafter submit the rules to NDEP for transmittal to EPA as SIP revisions. Concurrent with these county processes, NVDEP anticipates that it will schedule a public hearing in August on its proposal to submit these rules to EPA for incorporation into the SIP, and intends to submit the final SIP revision to EPA by late August. We note that because the state and county rulemaking processes here are solely for purposes of adopting these regulations as SIP revisions under CAA section 110 and not for purposes of revising any of the regulations, we do not expect any substantive changes between the proposed and final submittals. Final approval of these rules, however, is contingent upon EPA's receipt of fully adopted rules that satisfy state and local procedural requirements for SIP submittals.

B. Are there other versions of these rules?

There are no SIP-approved versions of WCDBOH Rules 030.218, 030.230, 030.235, and 030.970.

C. What is the purpose of the submitted rules?

The submitted rules govern demonstrating compliance with permit conditions, recordkeeping, source sampling and testing, and statements of compliance with 40 CFR Part 70 permits. These regulations generally regulate, among other things, emissions of criteria pollutants such as VOCs, NO_X and PM. VOCs help produce ground-level ozone and smog, which harm human health and the environment. NO_X helps produce ground-level ozone, smog and particulate matter, which harm human health and the environment. PM contributes to effects that are harmful to human health and the environment, including premature mortality, aggravation of respiratory and cardiovascular disease, decreased lung function, visibility impairment, and damage to vegetation and ecosystems. Section 110(a) of the CAA requires States to submit regulations that control VOC, NO_X, and PM emissions.

- Section 030.218, Demonstration of Compliance, states that the Control Officer may require the operator of a source to provide any applicable data to demonstrate compliance with the conditions of the Permit to Operate.
- Section 030.230, Record Keeping, states that the Control Officer may require any holder of a Permit to Operate to keep adequate records concerning contaminant emissions for any equipment or process for which the permit was issued.
- Section 030.235, Requirement for Source Sampling and Testing, requires the APCO to determine the exact quantity and effect of emissions produced by stationary sources. The APCO may require source stack testing, or other types of source testing including, but not limited to, mass balance types of analysis, be made by the operator.
- Section 030.970A, Part 70 Permit Monitoring and Compliance, requires sources subject to 40 CFR Part 70 permitting requirements to submit an annual statement of compliance covering certain specified items.

EPA's technical support document (TSD) has more information about these rules.

II. EPA's Evaluation and Proposed Action

A. How is EPA evaluating the rules?

Generally, SIP rules must be enforceable (see section 110(a) of the Act) and must not relax existing requirements (see sections 110(l) and 193). Guidance and policy documents that we use to evaluate enforceability requirements consistently include the following:

1. ''Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations,'' EPA, May 25, 1988 (the Bluebook).
2. ''Guidance Document for Correcting Common VOC & Other Rule Deficiencies,'' EPA Region 9, August 21, 2001 (the Little Bluebook).
3. State Implementation Plans; General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990 (57 FR 13498, April 16, 1992) (''General Preamble'').

B. Do the rules meet the evaluation criteria?

We believe these rules are consistent with the applicable requirements and guidance regarding enforceability and SIP relaxations. The TSD has more information on our evaluation.

C. Public Comment and Proposed Action

Because EPA believes the submitted rules fulfill all applicable CAA requirements, we are proposing to fully approve them under section 110(k)(3) of the Act. We will accept comments from the public on this proposal for the next 30 days. Unless we receive convincing new information during the comment period or NVDEP does not submit the adopted SIP revisions as expected, we intend to publish a final approval action that will incorporate these rules into the federally enforceable SIP.

III. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve State choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely proposes to approve State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this proposed action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);

• Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

• Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

• Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

• Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

• Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and

• Does not provide EPA with the discretionary authority to address disproportionate human health or environmental effects with practical, appropriate, and legally permissible methods under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed action does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the State, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Volatile organic compounds.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 141 and 142

[FRL–9708–1]

Public Meeting: Potential Regulatory Implications of the Reduction of Lead in Drinking Water Act of 2011

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is hosting a public meeting on August 16, 2012, to discuss and solicit input from States, manufacturers, drinking water systems, other interested groups and consumers on the implementation of the Reduction of Lead in Drinking Water Act of 2011 (''the Act''). The Act was signed on January 4, 2011, and will be effective on January 4, 2014. The Act amended Section 1417 of the Safe Drinking Water Act (SDWA), which prohibits the use of certain plumbing products that are not ''lead free'' (as defined by SDWA), and makes it unlawful to introduce into commerce products that are not ''lead free.''

DATES: The public meeting will be held at the Environmental Protection Agency Conference Center (lobby level-room 1204). One Potomac Yard (South Building) 2777 S. Crystal Drive, Arlington, VA 22202 on Thursday, August 16, 2012, from 1:00 p.m. to 4:30 p.m., Eastern Daylight Time (EDT). All attendees must go through a metal detector, sign in with the security desk, and show government issued photo identification to enter the building. Teleconference and webcast attendance will be available. Instructions for registration for the meeting are located in the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: For general information about this meeting, contact Lameka Smith, Standards and Risk Management Division, Office of Ground Water and Drinking Water; by phone (202) 564–1629 or by email *smith.lameka@epa.govmailto:*. For the full text of the Reduction of Lead in Drinking Water Act of 2011, please visit: *www.gpo.gov/fdsys/pkg/PLAW.../pdf/PLAW-111publ380.pdf*. For additional information about the Lead and Copper Rule, please visit: *http://water.epa.gov/lawsregs/rulesregs/sdwa/lcr/index.cfm*.

SUPPLEMENTARY INFORMATION:

Registration: Individuals planning to attend in person, by teleconference, or via webcast must register for the meeting by contacting Junie Percy of IntelliTech at (937) 427–4148 ext. 210, or by email *junie.percy@itsysteminc.com* no later than August 15, 2012. There is no charge for attending this public meeting, but seats and phone lines are limited, so please register as soon as possible.

Reduction of Lead in Drinking Water Act: The Act made several key changes to Section 1417: First, the Act changed the definition of ''lead-free'' under SDWA by reducing the lead content to a weighted average of not more than 0.25% in the wetted surface material. Second, the Act also amended the definition of ''lead free'' by adding a specific formula for calculating lead content. Third, the Act created two separate exemptions to the prohibitions on the use and introduction into commerce of products that are not ''lead-free.'' Some of the changes the Act makes to SDWA Section 1417 raise implementation challenges and issues that may warrant regulatory changes beyond codification of the statutory changes into the Code of Federal Regulations. EPA would make any needed regulatory changes as part of the Lead and Copper Rule long-term revisions (LCR–LTR). However, because the final LCR–LTR will be published after the effective date of the Act, EPA intends to provide information to assist plumbing manufacturers, States, water systems, plumbing retailers and other affected parties in implementing the provisions of the Act starting in 2014. Information from this stakeholder meeting will help inform regulatory revisions that will be included in the LCR–LTR.

Special Accommodations: For information on access or to request special accommodations for individuals with disabilities, please contact Lameka Smith, Standards and Risk Management Division, Office of Ground Water and Drinking Water, U.S. Environmental Protection Agency; by telephone (202) 564–1629 or email *smith.lameka@epa.govmailto:*. Please allow at least five business days prior to the meeting to provide EPA with time to process your request.

Dated: July 24, 2012.

Pamela S. Barr,

Acting Director, Office of Ground Water and Drinking Water.

[Docket ID FEMA–2010–0035]

RIN 1660–AA68

Housing Assistance Due to Structural Damage

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: Under the authority of section 408 of the Robert T. Stafford Disaster

Relief and Emergency Assistance Act (Stafford Act), the Federal Emergency Management Agency (FEMA) provides grants to individuals and households to repair or replace their homes after a Presidentially-declared major disaster or emergency. FEMA proposes to revise its repair, replacement, and housing construction assistance regulations to clarify the eligibility criteria for assistance and implement changes to section 408 of the Stafford Act that were made by the Post-Katrina Emergency Management Reform Act of 2006 (PKEMRA).

DATES: Comments must be received on or before September 28, 2012.

ADDRESSES: You may submit comments, identified by docket ID FEMA–2010–0035, by one of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Mail/Hand Delivery/Courier: Regulatory Affairs Division, Office of Chief Counsel, 500 C Street SW., Room 840, Washington, DC 20472–3100.

Instructions: All submissions received must include the agency name and docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal e-Rulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy Act notice that is available via the Privacy Notice link on the homepage of *www.regulations.gov.*

Docket: For access to the docket to read background documents or comments received, go to the Federal eRulemaking Portal at *http://www.regulations.gov,* click on ''Advanced Search,'' then enter ''FEMA–2010–0035'' in the ''By Docket ID'' box, then select ''FEMA'' under ''By Agency,'' and then click ''Search.'' Submitted comments may also be inspected at the Office of Chief Counsel, Federal Emergency Management Agency, 500 C Street SW., Room 835, Washington, DC 20472–3100.

FOR FURTHER INFORMATION CONTACT: Lumumba T. Yancey, FEMA, Individual Assistance Division, 500 C Street SW., Washington, DC 20472–3100, (phone) 202–212–1000, (facsimile) (202) 212–1005, or (email) *FEMA-IA-Regulations@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Section 408 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act) provides the Federal Emergency Management Agency (FEMA) with the authority to administer the Individuals and Households grant program (IHP). *See* 42 U.S.C. 5174. Through the IHP, FEMA provides grants and/or direct assistance to help survivors recover from Presidentially-declared emergencies and major disasters. This help may be in the form of housing assistance as well as assistance to meet ''other needs'' such as medical, dental, funeral, fuel, or clothing costs.

Specifically, FEMA provides the following types of housing assistance:

Temporary Housing: Money is available to rent a different place to live for a limited period of time. When rental properties are not available, FEMA may provide direct assistance in the form of a temporary housing unit.

Housing Repair: Money is available to homeowners to repair disaster damage to their primary residence. Assistance is only available to repair damage that is not covered by insurance. The goal is to make the damaged home safe, sanitary, and functional.

Housing Replacement: Money is available to homeowners to replace their home if it was destroyed in the disaster. Assistance is only available for damage that is not covered by insurance.

Permanent and Semi-Permanent Housing Construction: In exceptional circumstances, FEMA is authorized to provide permanent and semi-permanent housing construction. If FEMA exercises its discretion to offer this form of disaster assistance, FEMA may provide money for the construction of a home, or may construct the new permanent or semi-permanent housing unit for an individual or household. This type of assistance is currently provided only in remote and insular areas or locations specified by FEMA where no other type of housing assistance is available, feasible, or cost-effective. Assistance is provided only for damage that is not covered by insurance.

The regulations establishing the types of IHP assistance available, the eligibility requirements for assistance, and the procedures for obtaining assistance are in 44 CFR part 206, subparts D and F.

On September 30, 2002, FEMA published an interim rule in the **Federal Register**, identified by Regulation Identifier Number (RIN) 1660–AA18, which revised its regulations implementing the IHP. *See* 67 FR 61446. FEMA published a correction to the interim rule on October 9, 2002. *See* 67 FR 62896. Among other things, the interim rule established the housing repair, replacement, and construction eligibility regulations in 44 CFR 206.117. These regulations are currently in effect.

This proposed rule addresses the public comments received on the interim rule related to housing repair and replacement, and proposes revisions that are intended to clarify and improve FEMA's eligibility requirements for housing repair assistance. These proposed changes are intended to restate the existing requirements more clearly and in greater detail. They are not intended to create new eligibility requirements or add an additional burden on applicants.

In addition, the proposed rule implements and codifies legislative changes made after the interim rule was published. On October 4, 2006, the Post-Katrina Emergency Management Reform Act of 2006 (PKEMRA) amended section 408 of the Stafford Act which affected housing repair, replacement, and construction assistance. First, it amended subsection 408(c)(2) of the Stafford Act by removing the subcaps that had limited the amount of IHP funds that could be used for housing repair and replacement. *See* 42 U.S.C. 5174(c) and section 686 of Public Law 109–295. This was a self-implementing statutory change, which went into effect immediately. FEMA no longer applies the housing repair and replacement subcaps. Individuals and households may use up to the full amount of IHP funds ($31,400 for fiscal year 2012) for repair and replacement assistance. *See* 76 FR 63940 (Oct. 14, 2011). This figure is adjusted annually to reflect changes in the Consumer Price Index (CPI).

Second, PKEMRA amended subsection 408(c)(4) of the Stafford Act by removing the word ''remote'' and adding the word ''semi-permanent.'' While FEMA already had authority to provide ''permanent housing construction'' assistance, this statutory change provides FEMA with authority to provide assistance for the construction of ''semi-permanent'' housing. Prior to this statutory change, FEMA only had the authority to provide construction assistance to locations that were insular (outside the continental United States) or in remote areas where the other types of housing assistance were unavailable, infeasible, or not cost effective. The removal of the statutory requirement that a location be ''remote'' allows FEMA greater flexibility to provide construction assistance in other locations, when FEMA determines that the stringent statutory requirements are satisfied. *See* 42 U.S.C. 5174(c)(4) and section 685 of Public Law 109–295. Although this change would likely provide more flexibility for FEMA to meet the housing needs of disaster

survivors, FEMA expects to exercise this authority only rarely. Typically, within the continental United States, alternative housing resources and/or other types of temporary housing are available and feasible (e.g., rental housing or FEMA-provided temporary housing units).

II. Discussion of the Proposed Rule

This rule proposes to do four things. First, it proposes to address the public comments received on the 2002 interim rule related to housing repair and replacement and proposes revisions to the interim rule as a result of those comments. Second, it proposes changes which are intended to restate the existing requirements more clearly and in greater detail, without substantively changing the underlying requirements. The changes should clarify IHP housing repair assistance requirements for potential applicants and make it easier for the public to understand why damage to their residence is (or is not) eligible for IHP assistance. These proposed changes are not intended to create new eligibility requirements or add an additional burden on applicants. Third, this rule proposes to revise the regulations to align with PKEMRA's removal of the housing repair and replacement subcaps. This is a non-discretionary conforming amendment that aligns the regulation with changes in the Stafford Act and FEMA's current operations. Finally, it proposes to add the term ''semi-permanent'' and to remove the term ''remote'' with respect to the eligibility requirements for housing construction, as authorized by PKEMRA.

When appropriate, FEMA will provide financial assistance to individuals and households to repair eligible real property components that are a part of their primary residence and were damaged by the event. To be eligible for repair assistance, the damage to the component must have been caused by the declared event and the component must have been functional before the event. Also, repair or replacement of the component must be necessary to ensure the safety or health of the occupant or to make the residence functional. These eligibility requirements are currently in effect. *See* 44 CFR 206.117(b)(2), (c)(1). This rule proposes language that would revise the repair assistance regulations to restate the eligibility requirements more clearly.

If an individual or household's primary residence is damaged, and repair is not feasible, the individual or household may apply for housing replacement assistance. If FEMA awards replacement assistance, FEMA provides the individual or household financial assistance for the reasonable costs to replace their home, up to the maximum assistance set by law. The Disaster Mitigation Act of 2000 set a cap of $5,000 for repair assistance, and $10,000 for replacement assistance that an individual could use out of their maximum assistance award. *See* section 206 of Public Law 106–390. An individual was previously not allowed to use any additional funds from their maximum assistance award for the reasonable costs to repair or replace their home.

Under the current regulations, FEMA will provide replacement assistance if there is at least $10,000 of disaster-related damage (as adjusted annually to reflect changes in the CPI). *See* 44 CFR 206.117(b)(3). If awarded replacement assistance, under the current regulations, the applicant can either (1) replace the dwelling in its entirety for $10,000 (as adjusted annually to reflect changes in the CPI) or (2) use the assistance towards the cost of acquiring a new permanent residence that costs more than $10,000. *See* 44 CFR 206.117(b)(3). This $10,000 eligibility structure is no longer appropriate since PKEMRA removed the repair and replacement subcaps from the Stafford Act. FEMA proposes to remove the $10,000 subcap and eligibility threshold from the regulations, but maintain the underlying concept that replacement assistance is only available when the applicant must replace the damaged dwelling in its entirety. To accomplish this, FEMA proposes that to be eligible for housing replacement assistance, all parts of the dwelling's structure must have been compromised and deemed not repairable.

FEMA also proposes to remove the $5,000 subcap for repair assistance from the regulations, to reflect current law and FEMA policy. With the $5,000 subcap for repair assistance removed, individuals and households continue to be granted up to the full amount of IHP funds ($30,200 for fiscal year 2011) for repairs, when repairs are feasible and replacement assistance is not warranted. This change does not reduce available repair assistance funds.

In exceptional circumstances, FEMA is authorized to provide permanent or semi-permanent housing construction assistance. If FEMA exercises its discretion to offer this form of housing assistance in a specific disaster, FEMA may fund the construction of a permanent or semi-permanent dwelling for an individual or household. This type of assistance is only provided in those situations where the other types of FEMA housing assistance are unavailable, infeasible, or not cost effective. This limitation exists in FEMA's current regulations and is not changed by this proposed rule. *See* 44 CFR 206.117(b)(4). FEMA proposes to revise the regulatory language to conform to changes to the Stafford Act. The Stafford Act now provides that housing construction may be permanent or semi-permanent and the requirement that FEMA provides assistance only in remote areas has been removed. FEMA proposes to define ''semi-permanent housing'' as housing with a life expectancy of more than 5 years, but less than 25 years. Housing with a life expectancy of less than 5 years would be deemed temporary housing and that over 25 years would be deemed permanent housing. FEMA has the authority to provide this type of assistance in insular areas outside the continental United States, as well as in other locations where no alternative housing resources are available or where other types of FEMA housing assistance are unavailable, infeasible, or not cost-effective. *See* 42 U.S.C. 5174(c) and section 685 of Public Law 109–295.

The basic eligibility requirements for housing assistance are not changed by this proposed rule. To be eligible for housing assistance, the damage must not be covered by insurance, the damage must be to a dwelling owned and occupied by the applicant, and it must have served as the applicant's pre-disaster primary residence. Just as fundamentally, section 408 requires that all assistance be for ''necessary expenses and serious needs'' that arose as a ''direct result'' of the disaster; thus, repair and replacement assistance are provided only to applicants whose residences were ''damaged by'' the disaster. *See* 42 U.S.C. 5174(a)(1), (b), (c); 42 U.S.C. 5155; 44 CFR 206.113, 206.117(b). To provide greater clarity to the requirement that the damage is a direct result of the disaster, FEMA proposes to make changes to 44 CFR 206.117(a), (b)(2), (b)(3), (b)(4), and remove paragraph (c). The following discussion will address the proposed revisions to 44 CFR 206.117, paragraph by paragraph.

44 CFR 206.117—Paragraph (a) Definitions

As with all of FEMA's IHP housing assistance regulations in 44 CFR part 206 subpart D, the definitions in 44 CFR 206.111 apply to 44 CFR 206.117. However, FEMA finds that to provide clarity to the housing assistance regulations additional definitions may be necessary. FEMA proposes to revise 44 CFR 206.117(a) to define particularly

important terms applicable to the housing repair, replacement and construction requirements. These proposed definitions would be applicable to 44 CFR 206.117 only. In paragraph (a), FEMA proposes to add new definitions for ''Caused by the disaster''; ''Real property component'' and ''component''; and ''Semi-permanent housing.'' Each of these terms is particularly important in the interpretation of FEMA's housing repair assistance regulations.

44 CFR 206.117—Paragraph (b)(2) Repair Assistance

Paragraph (b) addresses repair assistance. In paragraph (b)(2)(i), FEMA proposes to clearly notify applicants that the eligibility criteria for individuals and households who apply for IHP assistance set forth in 44 CFR 206.113 also apply to 206.117(b)(2). Not only must the component be eligible, but the applicant must be eligible. FEMA proposes to add the cross reference to ensure that those requirements are not overlooked. This is not a substantive change.

Second, FEMA proposes to reorganize the general eligibility requirements in proposed paragraph (b)(2)(i) into a checklist format. Although the presentation has changed, the proposed text contains no new substantive requirements. These requirements are all contained in current 44 CFR 206.117(b)(2)(i) and (b)(2)(ii).

Third, although they are not new, FEMA proposes to clarify these existing requirements. Most notably, the current requirement that the damage must be ''disaster-related'' has been broken into two parts. As proposed, the component must have been functional immediately before the event, and the component must have been damaged and made not functional by the event. FEMA has historically used these two criteria to determine if damages are ''disaster-related.'' These two criteria break down the existing requirement, and make it easier to understand what FEMA means by the term ''disaster-related damages.'' FEMA cannot determine that a component that did not work before the event is not functional as a result of the event.

Further, the disaster must have actually caused damage to the component. If the damage was caused by an unrelated event, it is not eligible. FEMA has proposed language in paragraphs (b)(2)(iii) through (v) further clarifying the extent of available assistance. Those paragraphs are discussed later in this preamble.

The language in proposed paragraph (b)(2)(ii) restates the existing language in 44 CFR 206.117(c)(1). The substance of proposed paragraphs (b)(2)(ii)(A), (B), and (C) is unchanged. In new paragraph (D), FEMA proposes to remove the word ''plumbing'' because it is covered by the terms ''water'' and ''sewage,'' which remain. In paragraph (E), FEMA proposes to remove the word ''doors'' because they are included in proposed paragraph (B). Proposed paragraphs (F), (G), and (H) remain substantively unchanged except that FEMA merged the language in current paragraph (b)(2)(iii), setting out the type of hazard mitigation measures that are eligible, into proposed paragraph (H). FEMA intends no substantive change in application of the regulation as a result of these changes.

In proposed paragraph (b)(2)(iii), FEMA would clarify that not only the type of repair, but also the eligibility of the component itself, will vary depending on the nature of the disaster. This aligns with the existing eligibility requirement that the component must have been damaged by the event. The nature of an event will indicate whether the component would likely have been damaged by it. As an example, drywall on the second floor is unlikely to have been damaged from a three-foot flood.

Also in proposed paragraph (b)(2)(iii), FEMA would add new language noting that repair will be provided only to the extent that it makes the component functional. FEMA does not provide repairs or replacement to further improve a component beyond making it functional. IHP is not a loss indemnification program and does not ensure that applicants are returned to their pre-disaster living conditions. As an example, if only the condenser is damaged on a heating and air conditioning system, FEMA would provide assistance to repair the condenser, not replace the entire system, even if the system is near the end of its service life. Finally, in proposed paragraph (b)(2)(iii) FEMA restates the limitations in current paragraph (b)(2)(ii) that replacement assistance will only be provided when repair is not feasible, and current paragraph (c)(1) that repairs are limited to restoring the residence to a safe and sanitary living or functioning condition.

Proposed paragraph (b)(2)(iv) is new. It is intended to clarify the requirement in proposed paragraph (b)(2)(i)(B) that the component was functional immediately before the event. Components need not be fully functional before the event, nor is it disqualifying if the component posed a risk before the event. The key is that it must have had some functionality before the event, and incurred a change in functionality (must become unfunctional) as a result of the event.

Proposed paragraph (b)(2)(v) revises the content of current paragraph (b)(2)(iv) to remove the housing repair subcap. This change would conform the regulation to statutory changes in section 408(c)(2) of the Stafford Act. *See* 42 U.S.C. 5174(c) and section 686 of Public Law 109–295. FEMA stopped applying the subcaps when the Stafford Act was amended, therefore, the removal of this cap from the regulatory text will not have a substantive impact on the public. In the proposed rule, FEMA clearly states that individuals and households may use the entire amount of assistance available under the IHP for repair, or if FEMA determines that repair is infeasible, for replacement.

Proposed paragraph (b)(2)(vi) remains unchanged from the text of the current paragraph (b)(2)(v).

The language of proposed (b)(2)(vii) is new, but the substance is not. Applicants for housing repair assistance currently have the opportunity to appeal FEMA's eligibility determinations pursuant to 44 CFR 206.115. FEMA proposes to add an explicit cross reference to ensure that they are aware of the opportunity.

Further, FEMA's initial determination is based on an on-scene inspection performed by a FEMA inspector. If the applicant disagrees with the inspection and has information that would contradict the inspector's report, on appeal it is the applicant's responsibility to provide the documentation so that FEMA may appropriately evaluate eligibility. Depending on the reason for the denial or the substance of the applicant's dispute, an applicant may need to provide proof of occupancy, ownership, income, loss, and/or information concerning their housing situation prior to the disaster. In case it is later needed to support the claim, the applicant should keep, for 3 years, all receipts and records for any housing expenses incurred as a result of the disaster. See ''*Help After a Disaster: Applicant's Guide to the Individuals & Households Program''* at *http://www.fema.gov/assistance/process/guide.shtm.* This includes receipts for repair supplies and labor. To ensure that applicants are aware of their burden of proof on appeal, FEMA proposes to specifically highlight the documentation needed for an appeal. These are not new requirements, because generally, for applicants to successfully challenge a FEMA determination, they must show proof as to why they believe the determination was incorrect.

44 CFR 206.117—Paragraph (b)(3) Housing Replacement

In this paragraph, FEMA proposes five changes. First, we propose to remove the housing replacement subcap to conform with statutory changes to section 408(c)(2) of the Stafford Act. *See* 42 U.S.C. 5174(c) and section 686 of Public Law 109–295. FEMA is no longer required to cap the amount of available IHP assistance applied to housing replacement. In the proposed rule, FEMA clearly states that individuals and households may use the entire amount of assistance available under the IHP for this purpose.

Second, we propose to remove the eligibility requirement that the disaster-related damage meet or exceed $10,000 (as adjusted annually to reflect changes in the CPI). FEMA proposes to remove the $10,000 subcap, but maintain the underlying intent that replacement assistance only be provided where repair assistance is insufficient. To do so, FEMA proposes to revise paragraph (b)(3) to allow for replacement assistance if repair to an owner-occupied primary residence damaged by the declared event is not feasible, will not ensure the safety or health of the occupant, or will not make the residence functional.

Third, in response to a comment on the interim rule, FEMA proposes to reassign the authority to approve replacement assistance awards. FEMA proposes to change this authority from the FEMA ''Associate Administrator'' to the FEMA ''Regional Administrator or his or her designee.'' This change is intended to speed the processing of housing replacement assistance.

Fourth, just as with repair assistance, applicants must meet the eligibility requirements of 44 CFR 206.113 to be considered for replacement assistance. The residence must also have been functional immediately before the declared event, must have been damaged by the event, and the damage must not have been covered by insurance. These are the current requirements for replacement assistance; however, as with repair assistance, the requirements are not currently set out in checklist form in the regulations. Further, FEMA finds that it may be confusing to applicants that the basis for the amount of replacement assistance is in current paragraph (c), while the other eligibility requirements are contained in paragraph (b)(3). To address this, FEMA proposes to list the eligibility requirements in checklist form, mirroring those elements for repair assistance. FEMA also proposes to move the current text in paragraph (c)(2) to new paragraph (b)(3)(iii) without substantive change.

Finally, FEMA proposes to add a new paragraph (b)(3)(iv). As with repair assistance, FEMA finds it may be beneficial to provide a cross reference to the appeal regulations at 44 CFR 206.115, as well as, clarify that the applicant must also provide proof that the residence is eligible for replacement assistance. These are not new requirements, but merely list the necessary elements of an appeal.

44 CFR 206.117—Paragraph (b)(4) Permanent and Semi-Permanent Housing Construction

As with current paragraph (b)(3), FEMA proposes to consolidate the requirements for housing construction assistance by stating the eligibility requirements in checklist format and re-designating the current text of paragraph (b)(4) as paragraph (b)(4)(i), and moving the current text in paragraph (c)(3) to new paragraph (b)(4)(ii) without substantive change.

Also, section 685 of PKEMRA amended section 408(c)(4) of the Stafford Act by inserting ''or semi-permanent'' after ''permanent'' and by striking the word ''remote.'' These changes allow FEMA to provide not only permanent housing construction assistance, but also to construct semi-permanent housing. Further, this type of assistance is no longer limited to remote locations, but can be provided in those exceptional cases where alternative housing resources are not available and the other types of housing assistance provided by FEMA are unavailable, infeasible, or not cost effective. FEMA proposes to revise its housing construction regulations in new paragraph (b)(4)(i) to conform with these statutory changes. FEMA expects to provide this type of assistance in very rare circumstances. Alternative housing resources and the other types of housing assistance should sufficiently address a community's housing needs in most circumstances.

Finally, FEMA proposes to add a new paragraph (b)(4)(iii). As with repair and replacement assistance, FEMA finds it may be beneficial to provide a cross reference to the appeal regulations at 44 CFR 206.115, as well as clarify that the applicant must also provide proof that the residence is eligible for construction assistance. These are not new requirements, but merely list the necessary elements of an appeal.

44 CFR 206.117—Paragraph (c) Eligible Costs

As noted above, FEMA proposes to distribute the substance of current paragraph (c) throughout proposed paragraph (b). Therefore, FEMA proposes to remove paragraph (c).

III. Response to Comments From the Interim Rule Related to Housing Repair Assistance

In response to the interim rule, FEMA received written comments from five States. This section addresses the portion of those comments regarding housing repair assistance.

Caps on Repair and Replacement Assistance

One State recommended modification of the $5,000 cap, expressing concern that the repair cap may not bring homes into compliance with local minimum standards. The commenter stated that where there are no local standards, the low cap may force individuals and households to return to unsafe conditions. FEMA agreed with the commenters regarding the caps, and sought a modification to the statute. *See* 67 FR 61447. Another commenter raised similar concerns regarding the $10,000 cap on replacement assistance.

On October 4, 2006, PKEMRA amended section 408(c)(2) of the Stafford Act, by removing the repair and replacement caps. *See* 42 U.S.C. 5174(c). This was a self-implementing change which went into effect immediately, and FEMA no longer applies the caps. FEMA proposes to revise current 44 CFR 206.117(b)(2)(iv) and (b)(3) to remove the repair and replacement caps.

Approval Authority for Replacement Assistance (44 CFR 206.117(b)(3))

One State noted that approval at the Associate Administrator level was a deterrent to timely and compassionate assistance. The commenter recommended that the Regional Administrator be given approval authority for replacement assistance.

In response to this comment, FEMA proposes to revise 44 CFR 206.117(b)(3) by replacing ''Associate Director'' with ''Regional Administrator or his or her designee.'' FEMA proposes this change because the Regional Administrator will have greater familiarity with the damage in his or her region, and with greater decentralization housing replacement applications may be processed faster.

IV. Individuals and Households Program Implementation Review Report

During the comment period on the interim rule, FEMA met with the staff of five States in which the IHP was first implemented. The State and FEMA recovery program staff that first implemented IHP worked six disasters:

DR–1439–TX which resulted from severe storms, tornados, and flooding in Texas; DR–1440–AK which resulted from an earthquake in Alaska; DR–1441–TN which resulted from severe storms, tornados, and flooding in Tennessee; DR–1442–AL which resulted from severe storms and tornados in Alabama; DR–1443–MS which resulted from severe storms and tornados in Mississippi; and DR–1444–OH which resulted from severe storms and tornados in Ohio. The participants in the meeting were asked to identify best practices and problems or issues that needed corrective action. The meeting resulted in the Individuals and Households Program Implementation Review Report (Report), a copy of which is available in the docket for this rulemaking on *www.regulations.gov.* The recommendations focused primarily on procedural or other aspects of IHP that were not affected by this rule. Two issues in that report affect this rulemaking. Those issues and their resolution are:

Issue: Revise the $5,000 and $10,000 statutory limits.

Status or Resolution: As discussed elsewhere in this preamble, PKEMRA amended section 408(c)(2) of the Stafford Act, 42 U.S.C. 5174(c), by removing the repair and replacement caps. As a result, FEMA proposes to revise the regulations to remove both the $5,000 repair cap and the $10,000 replacement cap.

Issue: Replacement—establish uniform policy and flexible procedures.

Status or Resolution: In this proposed rule, FEMA attempts to improve its housing replacement assistance program. FEMA's procedures allow for flexibility, yet protect against abuse. In this proposed rule, FEMA delegates the decision regarding replacement eligibility to the Regional Administrators, provides clarity and cross references to appeal rights, clarifies eligibility criteria, and expands the amount of assistance by removing the repair and replacement subcaps. By clarifying the requirements, and making the regulations easier to read, FEMA intends to create uniformity in application.

V. Records Management

The Regulation Identifier Number (RIN) listed in the September 30, 2002 interim rule and the correction to the interim rule was 3067–AD25. When FEMA became a component of the Department of Homeland Security (DHS) in 2003, FEMA's RINs were renumbered, and 3067–AD25 became 1660–AA18.

The Docket ID for 1660–AA18 is FEMA–2008–0005. All of 1660–AA18's public submissions, supporting and related documents, and rules are posted to Docket ID FEMA–2008–0005. The public comments that addressed housing repair assistance, the subject of this rulemaking, have also been posted to Docket ID FEMA–2010–0035.

VI. Regulatory Analysis

A. Executive Order 12866, Regulatory Planning and Review and Executive Order 13563, Improving Regulation and Regulatory Review

FEMA has prepared and reviewed this rule consistent with Executive Order 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993) as supplemented by Executive Order 13563, *Improving Regulation and Regulatory Review (76 FR 3821, Jan. 18, 2011).* This proposed rule is not a significant regulatory action, and therefore has not been reviewed by the Office of Management and Budget (OMB).

This proposed rule is intended to provide clarification with respect to the eligibility for housing repair assistance, without adding new requirements, as well as implement changes to section 408 of the Stafford Act made by PKEMRA. *See* 42 U.S.C. 5174. This rule will not impose any additional burden on the public or change the total amount of assistance available to individuals and households since this rule merely codifies FEMA practice since 2006.

The proposed changes resulting from PKEMRA (a) revise the regulations to align with PKEMRA's removal of the housing repair and replacement subcaps; (b) remove the limitation that housing construction assistance be provided only in a ''remote'' area, if the location is not otherwise insular (outside the continental United States); and (c) incorporate FEMA's new authority to provide assistance for the construction of ''semi-permanent'' housing.

When the current regulations were written, FEMA was prohibited from providing more than $5,000 (adjusted annually to reflect changes in the CPI) for repair assistance, and more than $10,000 (adjusted annually to reflect changes in the CPI) for replacement assistance under the Disaster Mitigation Act of 2000. These subcaps prevented applicants from spending all of their available IHP assistance (in fiscal year 2012, this amount is $31,400 per declared event (76 FR 63940, Oct. 14, 2011)) on housing repair or replacement, leaving nothing for their other needs such as clothing, funeral, or medical costs. The change in PKEMRA was self implementing and immediately went into effect. FEMA is no longer required to apply subcaps and has not applied them since PKEMRA became law in 2006. This rule change is intended to revise the regulations to conform to the statutory change and FEMA's current practice. It would not change the eligibility criteria and would not reduce the total amount of assistance available to individuals and households. This proposed change would not have an economic impact because it merely codifies FEMA current practice.

This rule also proposes to remove the term ''remote'' from 44 CFR 206.117(b)(3) to implement new authority to provide housing construction assistance in areas within the continental United States where alternative housing resources are not available, infeasible, or not cost effective. Currently, FEMA's regulations limit this type of assistance to only locations that are insular or remote. This proposed rule change would implement PKEMRA by providing housing construction assistance to disaster survivors in areas where alternative housing resources are not feasible. This rule change provides more flexibility for FEMA to meet the housing needs for disaster survivors, although it is expected that FEMA will only rarely exercise this authority. This is because alternative housing resources, such as rental units, manufactured housing, recreational vehicles, other readily fabricated dwellings, or FEMA-provided temporary housing units, typically are available within the continental United States. FEMA has not yet provided any direct assistance for housing construction in areas other than those that are remote and insular. This proposed change is not expected to have a significant economic impact or to negatively affect the eligibility criteria for assistance. Any economic impact from this proposed rule change would be an increase in Federal grant funds provided to individuals and households to provide housing in those extremely rare cases where alternative housing resources are not available, infeasible, or not cost effective. There would be no increased burden imposed on the public from this proposed change. There is no economic impact to this proposed change because this proposed rule merely codifies FEMA current practice since 2006.

This rule also proposes to add ''semi-permanent'' to the types of housing that could be constructed. This type of housing would be that with a life expectancy of more than 5 years, but

less than 25 years. While FEMA already provides temporary and permanent housing, by implementing this new authority, FEMA would have greater flexibility to meet the needs of a particular community, where the construction of a type of housing other than a long-term permanent structure may be more appropriate. Although this rule change is likely to provide more flexibility for FEMA to meet the housing needs for disaster survivors, it is not expected that FEMA will regularly exercise this authority. This proposed rule change would implement PKEMRA by giving FEMA more options in providing housing assistance to disaster survivors. It would not reduce the number of individuals or households eligible for housing assistance and would not affect eligibility requirements. There is no economic impact to this proposed change because this proposed rule merely codifies FEMA current practice.

B. Paperwork Reduction Act of 1995

FEMA determined that this proposed rule will not create a new collection of information or create a revision to an existing collection of information under the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501–3520. All information submitted by applicants seeking IHP housing assistance, including information submitted on appeal, is included in Office of Management and Budget (OMB) approved collections.

The following collections related to IHP have been approved by OMB under the following titles and control numbers: ''Disaster Assistance Registration'', OMB control number 1660–0002, expiration date August 31, 2013 and ''Federal Assistance to Individuals and Households Program (IHP)'', OMB control number 1660–0061, expiration date October 31, 2014. There would be no additional paperwork burden as a result of the changes proposed in this rule.

C. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (RFA), 5 U.S.C. 601 *et seq.,* as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FEMA must consider the impact of this proposed regulation on small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. This proposed rule clarifies the eligibility criteria for housing repair, replacement, and construction assistance to individuals and households. It will not have an economic impact on small entities because it merely codifies FEMA current practice since PKEMRA became law in 2006. FEMA certifies that this rulemaking will not have a significant economic impact on a substantial number of small entities.

D. Privacy Act

The Privacy Act of 1974, 5 U.S.C. 552a, establishes a code of fair information practices that governs the collection, maintenance, use, and dissemination of personally identifiable information about individuals that is maintained in systems of records by Federal agencies. A system of records is a group of records under the control of an agency from which information is retrieved by the name of the individual or by some identifier assigned to the individual. FEMA, in partnership with other Federal agencies, hosts a single application and resource center at *http://www.disasterassistance.gov* that allows the public to apply for disaster assistance, benefits, and other services within FEMA and other Federal agencies. This application and resource center contains personally identifiable information about IHP applicants seeking housing repair, replacement, or construction assistance. The application resource center is contained in a Privacy Act System of Records entitled ''Disaster Recovery Assistance Files'' number ''DHS/FEMA–008'' which published on September 24, 2009 in the **Federal Register** at 74 FR 48763. This proposed rule would not change the application materials received or result in a new collection of personally identifiable information about individuals.

E. National Environmental Policy Act

Under the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.,* an agency must prepare an environmental assessment and environmental impact statement for any rulemaking that significantly affects the quality of the human environment. FEMA has determined that this rulemaking does not significantly affect the quality of the human environment and consequently has not prepared an environmental assessment or environmental impact statement. Most activities under section 408 and prior section 411 of the Stafford Act pertaining to temporary housing and financial assistance are categorically excluded from NEPA review under 44 CFR 10.8(d)(2)(xix)(D) and (F). Before undertaking other activities that are not categorically excluded (*e.g.,* placement of manufactured temporary housing units on FEMA-constructed group sites; permanent or semi-permanent housing construction), FEMA follows the procedures set forth in 44 CFR part 10 to assure NEPA compliance.

F. Executive Order 13132, Federalism

Executive Order 13132, Federalism, sets forth principles and criteria that agencies must adhere to in formulating and implementing policies that have federalism implications, that is, regulations that have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. *See* Executive Order 13132, 64 FR 43255, Aug. 10, 1999. Federal agencies must closely examine the statutory authority supporting any action that would limit the policymaking discretion of the States, and to the extent practicable, must consult with State and local officials before implementing any such action. The disaster assistance addressed by this proposed rule is provided to individuals and families, and would not have federalism implications.

G. Executive Orders 11988 and 11990, Floodplain Management and Protection of Wetlands

Under Executive Order 11988, Floodplain Management, as amended, Federal agencies are required to ''provide leadership to reduce the risk of flood loss, to minimize the impact of floods on human safety, health and welfare, and to restore and preserve the natural and beneficial values served by floodplains.'' *See* Executive Order 11988, as amended, 42 FR 26951, May 25, 1977, 44 FR 43239, July 20, 1979. Under Executive Order 11990, Protection of Wetlands, Federal agencies are required to ''provide leadership and * * * take action to minimize the destruction, loss or degradation of wetlands, and to preserve and enhance the natural and beneficial values of wetlands in carrying out the agency's responsibilities.'' *See* Executive Order 11990, as amended, 42 FR 26961, May 25, 1977, 52 FR 34617, Sept. 14, 1987. The requirements of these Executive Orders apply in the context of the provision of Federal financial assistance relating to, among other things, construction and property improvement activities, as well as conducting Federal programs affecting land use. The changes proposed in this rule would not have an effect on land use, floodplain management or wetlands. When FEMA undertakes specific actions that may

have such effects (*e.g.,* placement of manufactured temporary housing units on FEMA-constructed group sites; permanent or semi-permanent housing construction), FEMA follows the procedures set forth in 44 CFR part 9 to assure compliance with these Executive Orders.

H. Executive Order 13045, Protection of Children From Environmental Health Risk and Safety Risks

FEMA has analyzed this proposed rule under Executive Order 13045, Protection of Children From Environmental Health Risks and Safety Risks, 62 FR 19883, Apr. 23, 1997. This rule is not an economically significant rule and would not create an environmental risk to health or safety that might disproportionately affect children.

I. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1501 *et seq.,* pertains to any proposed rulemaking which implements any rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any one year. The Act also applies to any regulatory requirements that might significantly or uniquely affect small governments. FEMA has determined that this proposed rule would not result in the expenditure by State, local and Tribal governments, in the aggregate, nor by the private sector, of $100,000,000 or more in any one year as a result of a Federal mandate, nor would it significantly or uniquely affect small governments.

J. Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

Under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, FEMA may not issue a regulation that is not required by statute, that significantly or uniquely affects the communities of Indian Tribal governments, and that imposes substantial direct compliance costs on those communities, unless the Federal Government provides the funds necessary to pay the direct compliance costs incurred by the Tribal government, or FEMA consults with those governments. *See* Executive Order 13175, 65 FR 67249, Nov. 9, 2000. This proposed rule would not significantly or uniquely affect the communities of Indian Tribal governments, nor would this proposed rulemaking impose substantial direct compliance costs on those communities.

K. Executive Order 12898, Environmental Justice

Under Executive Order 12898, Environmental Justice, each Federal agency must conduct its programs, policies, and activities that substantially affect human health or the environment in a manner that ensures that those programs, policies, and activities do not have the effect of excluding persons from participation in, denying persons the benefit of, or subjecting persons to discrimination because of their race, color, or national origin. *See* Executive Order 12898, 59 FR 7629, Feb. 16, 1994. FEMA has incorporated environmental justice into its policies and programs.

The proposed housing repair, replacement and construction assistance regulations intentionally contain provisions that ensure they would not have a disproportionately high and adverse human health effect on any segment of the population. This rulemaking clarifies the eligibility requirements for assistance, and in doing so, maintains focus on the functionality of the component being repaired or replaced, and does not consider income or home value. Section 408 of the Stafford Act requires that such assistance be granted only for damage caused by a disaster event. Non-disaster related damage is not eligible for assistance under the Stafford Act. To ensure that this limitation will not be improperly exclusive, this proposed rule would clarify that components being repaired or residences being replaced need not be in full working order before the event to qualify for assistance. Components or residences that were fully or partially functional immediately before the declared event, despite their need for maintenance, may be eligible for repair assistance if they ceased to function as a result of the disaster.

One commenter stated that the proposed rule did not overtly discriminate against disaster survivors based on race, color, or national origin, but that it did discriminate covertly against those who are financially challenged, and, to the extent that the financially challenged consist disproportionately of minority groups, one might conclude that an element of the IHP program lacks environmental justice. The commenter stated that the housing repair cap of $5,000 has a gross negative impact on low-income disaster survivors, and results in more low-income disaster survivors returning to unsafe, unsanitary, and/or non-functional homes. The commenter stressed that low-income individuals were less likely to qualify for SBA loans, and Other Needs Assistance does not assist with structural repairs. Consequently, low-income individuals might have no choice but to move back into an unsuitable environment. The commenter recommended the liberal use of replacement assistance to provide additional help for the financially challenged.

As discussed elsewhere in this preamble, the $5,000 subcap is no longer in effect, and individuals and households may use up to the full amount of IHP funds ($31,400 for fiscal year 2012) for repair and replacement assistance. *See* 76 FR 63940 (Oct. 14, 2011). This figure is adjusted annually to reflect changes in the Consumer Price Index (CPI).

No action that FEMA can anticipate under this proposed rule would have a disproportionately high and adverse human health effect on any segment of the population. In addition, the rulemaking would not impose substantial direct compliance costs on those communities.

L. Executive Order 12988, Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden. *See* Executive Order 12988, 61 FR 4729, Feb. 7, 1996.

M. Executive Order 12630, Governmental Actions and Interference With Constitutionally Protected Property Rights

FEMA has reviewed this rule under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights, as supplemented by Executive Order 13406, Protecting the Property Rights of the American People. *See* Executive Order 12630, 53 FR 8859, Mar. 18, 1988 and Executive Order 13406, 71 FR 36973, June 28, 2006. This rule will not affect a taking of private property or otherwise have taking implications under Executive Order 12630.

List of Subjects in 44 CFR Part 206

Administrative practice and procedure, Coastal zone, Community facilities, Disaster assistance, Fire prevention, Grant programs—housing and community development, Housing, Insurance, Intergovernmental relations, Loan programs—housing and community development, Natural

resources, Penalties, and Reporting and recordkeeping requirements.

For the reasons stated in the preamble, the Federal Emergency Management Agency proposes to amend 44 CFR part 206 as follows:

PART 206—FEDERAL DISASTER ASSISTANCE

1. The authority citation for part 206 continues to read as follows:

Authority: Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 through 5207; Reorganization Plan No. 3 of 1978, 43 FR 41943, 3 CFR, 1978 Comp., p. 329; Homeland Security Act of 2002, 6 U.S.C. 101; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376; E.O. 12148, 44 FR 43239, 3 CFR, 1979 Comp., p. 412; and E.O. 13286, 68 FR 10619, 3 CFR, 2003 Comp., p. 166.

2. Amend § 206.117 to remove paragraph (c) and to revise paragraphs (a), (b)(2), (b)(3), and (b)(4) to read as follows:

§ 206.117 Housing assistance.

(a) *Definitions.* The definitions in this paragraph apply to this section only.

Caused by the disaster means as a direct result of a peril identified in the **Federal Register** Notice of a Presidentially-declared major disaster or emergency, the component is no longer functional.

Real Property Component or *Component* means each individual part of a dwelling that makes it habitable, as enumerated in paragraph (b)(2)(ii) of this section.

Semi-Permanent Housing means housing designed and constructed with finishes, material, and systems selected for moderate (or better) energy efficiency, maintenance, and life cycle cost, and with a life expectancy of more than 5 years but less than 25 years.

(b) * * *

(2) *Repairs.* (i) FEMA may provide financial assistance for the repair of real property components in an owner's primary residence if:

(A) The eligibility criteria in § 206.113 are met;

(B) The component was functional immediately before the declared event;

(C) The component was damaged, and the damage was caused by the disaster;

(D) The damage to the component is not covered by insurance; and

(E) Repair of the component is necessary to ensure the safety or health of the occupant or to make the residence functional.

(ii) FEMA may provide financial assistance for the repair of:

(A) Structural components of the residence. This includes real property components, such as the foundation, exterior walls, and roof.

(B) Windows and doors.

(C) The Heating, Ventilation and Air Conditioning system.

(D) Utility systems. This includes electrical, gas, water and sewage systems.

(E) Interior components. This includes, but is not limited to, the structure's floors, walls, ceilings, and cabinetry.

(F) The structure's access and egress, including privately owned access roads and privately owned bridges.

(G) Blocking, leveling, and anchoring of a mobile home, and reconnecting or resetting mobile home sewer, water, electrical and fuel lines and tanks.

(H) Items or services determined to be eligible hazard mitigation measures that reduce the likelihood of future damage to the residence, utilities, or infrastructure.

(iii) The components that may be deemed eligible for repair assistance, and the type of repairs authorized, will vary depending upon the nature of the disaster. Repairs are limited to restoration of the dwelling to a safe and sanitary living or functioning condition. Repair assistance will only be provided to the extent that the work makes the component functional. FEMA may provide for the replacement of components if repair is not feasible. The repairs of components must be of average quality, size, and capacity, taking into consideration the needs of the occupant.

(iv) Components that were functional immediately before the declared event may be eligible for repair assistance if the damage to the component was caused by the disaster and the component is no longer functional.

(v) Eligible individuals or households may receive up to the maximum amount of assistance (*See* § 206.110(b)) to repair damages to their primary residence irrespective of other financial resources, except insurance proceeds.

(vi) The individual or household is responsible for obtaining all local permits or inspections that applicable State or local building codes may require.

(vii) If the applicant disputes a determination made by FEMA regarding eligibility for repair assistance, the applicant may appeal that determination pursuant to the procedures in § 206.115. In addition to the requirements in § 206.115, the applicant must provide proof that the component meets the requirements of paragraph (b)(2)(i) of this section, including that the component was functional before the declared event and proof that the declared event caused the component to stop functioning. If the applicant disputes the amount of repair assistance awarded, the applicant must also provide justification for the amount sought.

(3) *Housing Replacement.* (i) FEMA may provide financial assistance for the replacement of an owner's primary residence if:

(A) The eligibility criteria in § 206.113 are met;

(B) The residence was functional immediately before the disaster;

(C) The residence was destroyed, and the damage was caused by, the disaster;

(D) The damage to the residence is not covered by insurance;

(E) Repair is not feasible, will not ensure the safety or health of the occupant, or will not make the residence functional; and

(F) Replacement is necessary to ensure the safety or health of the occupant.

(ii) All replacement assistance awards must be approved by the Regional Administrator or his/her designee. If replacement assistance is granted, the applicant may either use the maximum amount of assistance (*See* § 206.110(b)) to replace the dwelling in its entirety, or may use the assistance toward the cost of acquiring a new permanent residence.

(iii) Housing replacement assistance will be based on the verified disaster-related level of damage to the dwelling, or the statutory maximum (*See* § 206.110(b)), whichever is less.

(iv) If the applicant disputes a determination made by FEMA regarding eligibility for replacement assistance, the applicant may appeal that determination pursuant to the procedures in § 206.115. In addition to the requirements in § 206.115, the applicant must provide proof that repair is not feasible, or will not ensure the safety or health of the occupant or make the residence functional. If the applicant disputes the amount of replacement assistance awarded, the applicant must also provide justification for the amount sought.

(4) *Permanent and semi-permanent housing construction.* (i) FEMA may provide financial or direct assistance to applicants for the purpose of constructing permanent and semi-permanent housing if:

(A) The eligibility criteria in § 206.113 are met;

(B) The residence was functional immediately before the declared event;

(C) The residence was damaged by the event;

(D) The damage to the residence is not covered by insurance;

(E) The residence was an owner-occupied primary residence; and

(F) The residence is located in an insular area outside the continental United States or in another location where alternative housing resources are not available and the types of financial or direct temporary housing assistance described in paragraphs (b)(1), (2), and (3) of this section are unavailable, infeasible, or not cost-effective.

(ii) Permanent and semi-permanent housing construction, in general, must be consistent with current minimal local building codes and standards where they exist, or minimal acceptable construction industry standards in the area, including reasonable hazard mitigation measures, and Federal environmental laws and regulations. Dwellings will be of average quality, size and capacity, taking into consideration the needs of the occupant.

(iii) If the applicant disputes a determination made by FEMA regarding eligibility for construction assistance, the applicant may appeal that determination pursuant to the procedures in § 206.115. In addition to the requirements in § 206.115, the applicant must provide proof that the property is either located in an insular area outside the continental United States, or in a location where alternative housing resources are not available. The applicant must also provide proof that the types of financial or direct temporary housing assistance described in paragraph (b)(1) of this section are unavailable, infeasible, or not cost effective. If the applicant disputes the amount of construction assistance awarded, the applicant must also provide justification for the amount sought.

W. Craig Fugate,

Administrator, Federal Emergency Management Agency.

BILLING CODE 9111–23–P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

49 CFR Part 1141

[Docket No. EP 715]

Rate Regulation Reforms

AGENCY: Surface Transportation Board, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Surface Transportation Board (Board) proposes to change some of its existing regulations and procedures concerning rate complaint proceedings. The Board previously created two simplified procedures to reduce the time, complexity, and expense of rate cases. The Board now proposes to modify its rules to remove the limitation on relief for one simplified approach, and to double the relief available under the other simplified approach. The Board also proposes technical changes to the full and simplified rate procedures, and to raise the interest rate that railroads must pay on reparations if they are found to have charged unreasonable rates. The overarching goal is to ensure that the Board's simplified and expedited processes for resolving rate disputes are more accessible.

DATES: Comments addressing the proposals discussed herein are due by October 23, 2012. Replies are due by December 7, 2012. Rebuttal submissions are due by January 7, 2013.

ADDRESSES: Comments on this proposal may be submitted either via the Board's e-filing format or in the traditional paper format. Any person using e-filing should attach a document and otherwise comply with the instructions at the E–FILING link on the Board's Web site, at *http://www.stb.dot.gov*. Any person submitting a filing in the traditional paper format should send an original and 10 copies to: Surface Transportation Board, Attn: Docket No. EP 715, 395 E Street SW., Washington, DC 20423–0001.

Copies of written comments will be available for viewing and self-copying at the Board's Public Docket Room, Room 131, and will be posted to the Board's Web site.

FOR FURTHER INFORMATION CONTACT: The Board's Office of Public Assistance, Governmental Affairs, and Compliance at (202) 245–0238. Assistance for the hearing impaired is available through the Federal Information Relay Service (FIRS) at (800) 877–8339.

SUPPLEMENTARY INFORMATION: The Board proposes to modify some of its existing regulations and procedures regarding rate complaint proceedings. The Board's proposal is in four parts. Part I proposes refinements to the Simplified Stand-Alone Cost test by removing the limit on relief and increasing the precision of the calculation of Road Property Investment. Part II proposes to raise the limit on relief for a case brought under the Three-Benchmark test from $1 million to $2 million. Part III proposes to limit the use of cross-over traffic in a Full Stand-Alone Cost rate complaint proceeding and to modify the revenue allocation methodology. Part IV proposes to change the interest rate carriers must pay shippers when the rate charged has been found unlawfully high, from the current T-bill rate to the U.S. Prime Rate, as published in *The Wall Street Journal*.

Additional information is contained in the Board's decision served on July 25, 2012. To obtain a copy of this decision, visit the Board's Web site at *http://www.stb.dot.gov*. Copies of the decision may also be purchased by contacting the Board's Office of Public Assistance, Governmental Affairs, and Compliance at (202) 245–0238.

The Regulatory Flexibility Act of 1980, 5 U.S.C. §§ 601–612, generally requires a description and analysis of new rules that would have a significant economic impact on a substantial number of small entities. In drafting a rule, an agency is required to: (1) Assess the effect that its regulation will have on small entities; (2) analyze effective alternatives that may minimize a regulation's impact; and (3) make the analysis available for public comment. 5 U.S.C. §§ 601–604. In its notice of proposed rulemaking, the agency must either include an initial regulatory flexibility analysis, 5 U.S.C. § 603(a), or certify that the proposed rule would not have a ''significant economic impact on a substantial number of small entities,'' 5 U.S.C. § 605(b). The impact must be a direct impact on small entities ''whose conduct is circumscribed or mandated'' by the proposed rule. *White Eagle Coop. Ass'n* v. *Conner,* 553 F.3d 467, 480 (7th Cir. 2009). An agency has no obligation to conduct a small entity impact analysis of effects on entities that it does not regulate. *United Dist. Cos.* v. *FERC,* 88 F.3d 1105, 1170 (D.C. Cir. 1996).

This proposal would not have a significant economic impact upon a substantial number of small entities, within the meaning of the Regulatory Flexibility Act. The proposal imposes no additional record keeping by small railroads or any reporting of additional information. Nor do these proposed rules circumscribe or mandate any conduct by small railroads that is not already required by statute: the establishment of reasonable transportation rates. Small railroads have always been subject to rate reasonableness complaints and their associated litigation costs. Small railroads have been subject to the simplified rate procedures since 1996, when those procedures were first created. Finally, as the Board has previously concluded, the majority of railroads involved in these rate proceedings are not small entities within the meaning of the Regulatory Flexibility Act. *See Simplified Standards,* slip op. at 33–34. In the 32 years since the passage of the Staggers

Act—when Congress limited the Board's rate reasonableness jurisdiction where a carrier has market dominance over the transportation at issue—virtually all rate challenges have involved large Class I carriers. Therefore, the Board certifies under 5 U.S.C. 605(b) that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

List of Subjects in 49 CFR Part 1141

Administrative practice and procedure.

Decided: July 25, 2012.

By the Board, Chairman Elliott, Vice Chairman Mulvey, and Commissioner Begeman.

Raina S. White,

Clearance Clerk.

For the reasons set forth in the preamble, the Surface Transportation Board proposes to amend part 1141 of title 49, chapter X, of the Code of Federal Regulations as follows:

1. Revise part 1141 to read as follows:

PART 1141—PROCEDURES TO CALCULATE INTEREST RATES

Authority: 49 U.S.C. 721.

§ 1141.1 Procedures to calculate interest rates.

(a) For purposes of complying with a Board decision in an investigation or complaint proceeding, interest rates to be computed shall be the most recent U.S. Prime Rate as Published by The Wall Street Journal. The rate levels will be determined as follows:

(1) For investigation proceedings, the interest rate shall be the U.S. Prime Rate as published by The Wall Street Journal in effect on the date the statement is filed accounting for all amounts received under the new rates.

(2) For complaint proceedings, the interest rate shall be the U.S. Prime Rate as published by The Wall Street Journal in effect on the day when the unlawful charge is paid. The interest rate in complaint proceedings shall be updated whenever The Wall Street Journal publishes a change to its reported U.S. Prime Rate. Updating will continue until the required reparation payments are made.

(b) For investigation proceedings, the reparations period shall begin on the date the investigation is started. For complaint proceedings, the reparations period shall begin on the date the unlawful charge is paid.

(c) For both investigation and complaint proceedings, the annual percentage rate shall be the same as the annual nominal (or stated) rate. Thus, the nominal rate must be factored exponentially to the power representing the portion of the year covered by the interest rate. A simple multiplication of the nominal rate by the portion of the year covered by the interest rate would not be appropriate because it would result in an effective rate in excess of the nominal rate. Under this ''exponential'' approach, the total cumulative reparations payment (including interest) is calculated by multiplying the interest factor for each period by the principal amount for that period plus any accumulated interest from previous periods. The ''interest factor'' for each period is 1.0 plus the interest rate for that period to the power representing the portion of the year covered by the interest rate.

BILLING CODE 4915–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 600

[Docket No. 120409402–2402–01]

RIN 0648–BB06

Second Fishing Capacity Reduction Program for the Longline Catcher Processor Subsector of the Bering Sea and Aleutian Islands Non-Pollock Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes regulations to implement a second fishing capacity reduction program (also commonly known as ''buyback'') and an industry fee system to repay a $2.7 million loan for a single latent permit within the Longline Catcher Processor Subsector of the Bering Sea and Aleutian Islands (BSAI) non-pollock groundfish fishery (Reduction Fishery). The purpose of this action is to permanently reduce the greatest amount of fishing capacity at the least cost. This should result in increased harvesting productivity for the permit holders remaining in the fishery. The loan for this program will be added to the previous program loan of $35,700,000 authorized by the FY 2005 Appropriations Act (the Appropriations Act). For purposes of this regulation, the terms license and permit are used interchangeably.

DATES: Comments must be submitted in writing on or before August 29, 2012.

ADDRESSES: You may submit comments, identified by [NOAA–NMFS–2012–0050] by any of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal eRulemaking Portal *http://www.regulations.gov;* to submit comments via the e-Rulemaking Portal, first click the ''submit a comment'' icon, then enter [NOAA–NMFS–2012–0050] in the keyword search. Locate the document you wish to comment on from the resulting list and click on the ''submit a comment'' icon on the right of that line.
- *Mail:* Submit written comments to Paul Marx, Chief, Financial Services Division, NMFS, Attn: BSAI Non-Pollock Groundfish Buyback Rulemaking, 1315 East-West Highway, Silver Spring, MD 20910.
- *Fax:* 301–713–1306; Submit comment Attn: Paul Marx.

Instructions: Comments must be submitted by one of the above methods to ensure that they are duly received and considered by NMFS. Comments sent by any other method, to any other address or individual, or received after the end of the comment period, will not be considered. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (e.g., name, address, etc.) submitted voluntarily by the sender will be publicly accessible. Do not submit confidential business information, or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word or Excel; WordPerfect, or Adobe PDF file formats only.

Copies of the Environmental Assessment/Regulatory Impact Review/Initial Regulatory Flexibility Analysis (EA/RIR/IRFA) prepared for this action may be obtained from the mailing address above or by calling Michael A. Sturtevant (see **FOR FURTHER INFORMATION CONTACT**).

Send comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this proposed rule to Michael A. Sturtevant at the address

specified above and also to the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Washington, DC 20503 (Attention: NOAA Desk Officer) or email to *OIRA_Submission@omb.eop.gov,* or fax to (202) 395–7825.

FOR FURTHER INFORMATION CONTACT: Michael A. Sturtevant at (301) 427–8799, fax (301) 713–1306, or *michael.a.sturtevant@noaa.gov*.

SUPPLEMENTARY INFORMATION:

Statutory and Regulatory Background

In 1996, in response to the finding that many U.S. fisheries have excess fishing capacity, Congress provided for fishing capacity reduction programs. The intent of a program is to decrease the number of harvesters in the fishery, increase the economic efficiency of harvesting, and facilitate the conservation and management of fishery resources in each fishery in which NMFS conducts a reduction program. Typically, permit holders are paid to voluntarily surrender their fishing permits including relevant fishing histories for that fishery, or surrender all their fishing permits and cancel their fishing vessels' fishing endorsements by permanently withdrawing the vessels from all fisheries. The cost of the program is paid either by the remaining harvesters through a loan or taxpayers through a direct appropriation from Congress. Section 312(b)–(e) (16 U.S.C. 1861a(b)–(e)) was added to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) to authorize such programs. Congress also amended Title XI of the Merchant Marine Act, 1936 (Title XI), adding new sections 1111 and 1112 to finance capacity reduction costs. The Title XI provisions involving fishing capacity reduction loans have been codified at 46 U.S.C. 53735.

To implement capacity reduction programs, NMFS promulgated regulations published as subpart L to 50 CFR part 600 (50 CFR 600.1000 *et seq.*), which contain a framework rule for buyback programs generally. For each individual program, NMFS promulgates regulations at subpart M to 50 CFR part 600 to implement the specific terms of that particular buyback. To undertake this second round of capacity reduction for the BSAI Longline Catcher Processor Subsector, NMFS must publish these regulations.

Initial Reduction Program

The measures contained in this proposed rule to establish the capacity reduction program are authorized the by Appropriations Act. The Appropriations Act authorizes the establishment of fishing capacity reduction programs for catcher processor subsectors within the Alaska groundfish fisheries (i.e., the longline catcher processor subsector, the American Fisheries Act (AFA) trawl catcher processor subsector, the non-AFA trawl catcher processor subsector, and the pot catcher processor subsector) based on capacity reduction plans and contracts developed by industry and approved by NMFS. Additionally, Public Law 108–199 provided the initial $500,000 subsidy cost to fund a $50 million loan, and Public Law 108–447 provided an additional $250,000 subsidy cost to fund $25 million more (in addition to providing for the buyback program itself). Under the Authorization Act, each subsector was allocated a specific amount of the total loan authority.

In 2007, NMFS approved and implemented a $35.7 million fishing capacity reduction loan program for the Longline Catcher Processor Subsector, which represented the full amount authorized for that subsector. The initial program removed three fishing vessels and 12 fishing licenses and permits for a loan amount of $35 million. All long-line catcher processors harvesting non-pollock groundfish were required to pay and forward a fee to NMFS to repay the loan. The original fee assessment was $0.02 per pound caught with payment and collection beginning on October 24, 2007, which has since been reduced to $0.015.

None of the other subsectors have expressed an interest in implementing a capacity reduction program for their subsector. A provision in the Appropriations Act permits the Secretary of Commerce to make available any of the unused loan amounts, originally allocated for each subsector, for capacity reduction programs in any of the subsectors after January 1, 2009.

Program Summary

Members of the BSAI Longline Catcher Processor Subsector informed NMFS that they wished to access the remaining loan amounts to undertake a second buyback. To implement this next buyback, the Freezer Longline Conservation Cooperative (FLCC) on behalf of the Reduction Fishery was required by the Appropriations Act to draft and submit to NMFS a Reduction Plan. On August 27, 2010, the FLCC submitted a Reduction Plan to access $2.7 million of the remaining funds. A Reduction Agreement, Reduction Contract, and application of the statutes and regulations referred to above are the basis for the Reduction Plan. The FLCC's Reduction Plan involves just one permit.

The Reduction Agreement and the Reduction Contract are the two key components of the Reduction Plan and this proposed rule. Substantive provisions of the Reduction Agreement and the Reduction Contract would be codified at 50 CFR 600.1108.

Reduction Program—Overview

All permit holders in the Longline Subsector who wished to relinquish their fishing permits were welcome to participate in the Reduction Program. The Program was divided into four phases: (1) Enrollment; (2) offer selection; (3) plan submission; and (4) implementation, after approval by referendum. The first three phases have been completed. Thus, this rule concerns itself only with the implementation phase of the program.

Reduction Program: The Capacity Reduction Agreement

Reduction Agreement Terms and Definitions

Capitalized terms used in the Reduction Agreement are defined in Schedule A to the Reduction Agreement; other terms are defined within the text of the Reduction Agreement. Reduction Agreement terms that are essential to understanding the regulatory provisions are set forth in the proposed § 600.1108(b).

Reduction Agreement: Major Sections

There are three major sections of the Reduction Agreement: Qualification and Enrollment of Subsector Members; Selection of Offers to Remove Fishing Capacity by the Reduction Plan; and Submission of the Reduction Plan, including the repayment requirements. Identical provisions previously codified in 50 CFR 600.1105 will be incorporated into this section by reference. The proposed rule will also include a fee collection system similar to the one codified at § 600.1106.

Qualification and Enrollment

The FLCC received four offers from the Subsector Members. Each of the four offerors executed a Reduction Agreement and submitted specified supporting documents evidencing an applicant's status as a Subsector Member. The FLCC Auditor reviewed all documents for strict compliance with the regulatory provisions in § 600.1105.

Selection of Offers To Remove Fishing Capacity by the Reduction Plan

The selection process was consistent with the buyback previously codified at § 600.1105(d) except that the funding source for the loan comes from the residual funds outlined above. In accordance with the previously developed procedures, the FLCC completed the selection process to rank the offers. Following completion of the selection process, the FLCC accepted only one latent permit to be bought out for $2,700,000.

Plan Submission

After the Selection Process was completed, the FLCC developed the Reduction Plan. The Reduction Plan was submitted to NMFS for its approval on behalf of the Secretary of Commerce. As required by the Appropriations Act, the FLCC has notified the North Pacific Fishery Management Council. Only one License Limitation Program (LLP) license and its fishing history are being submitted for removal from the Reduction Fishery. This latent LLP license is not associated with a vessel. Therefore, no vessel is being removed from the fishery under this Reduction Program. Fees to repay the loan will be collected as set forth in the proposed § 600.1108.

Approval of the Reduction Plan

The criteria for NMFS, on behalf of the Secretary, to approve any Reduction Plan are specified in § 600.1108(k). Among other things, the Assistant Administrator of NMFS must find that the Reduction Plan is consistent with the Appropriations and the Magnuson-Stevens Acts, and that it will result in the maximum sustained reduction in fishing capacity at the least cost and in the minimum amount of time.

The Reduction Plan includes the LLP license selected through the offer process as the asset to be purchased in the Reduction Program. The Reduction Plan also includes the FLCC's supporting documents and rationale for establishing that the current offer represents the expenditure of the least money for the greatest capacity reduction. Acceptance of the offer is at the sole discretion of NMFS.

The FLCC may be required to revise and resubmit the Reduction Plan to conform to the provisions of the final rule after the final rule (resulting from this proposed rule) is published.

The Referendum

NMFS will conduct a referendum to determine the industry's willingness to repay a fishing capacity reduction loan to purchase the license and fishing rights identified in the Reduction Plan. A successful referendum by a majority of all members of the Reduction Fishery would bind all parties and complete the reduction process.

The current Fishing Capacity Reduction Framework regulatory provisions at § 600.1010 stipulate the procedural and other requirements by which NMFS shall conduct referenda on fishing capacity reduction programs. The proposed § 600.1108(l) makes those framework referendum requirements applicable to this Reduction Program. Only after approval of the Reduction Program via a referendum will the Reduction Program be implemented.

Loan Repayment

Upon completion of a successful referendum to approve a fishing capacity reduction loan, the repayment plan, amortized over a 30-year term, will be implemented. Once the Reduction Program is implemented, repayment of the loan by monthly collection of fees from the remaining Subsector Members operating in the Reduction Fishery will be initiated.

In accordance with § 600.1013, the fees for each individual program should not exceed 5 percent of the average ex-vessel production value of the Reduction Fishery. Thus, the total possible fee from two programs (this proposed rule and the rule codified under § 600.1105) will not exceed 10 percent of the average ex-vessel pacific cod revenues for one year. In the event that the total principal and interest due for this program exceeds this level, an additional fee for the season will be assessed. This temporary fee assessment will be $0.01 per pound round weight for pollock, arrowtooth flounder, Greenland turbot, skate, yellowfin sole and rock sole.

The fee will be calculated on an annual basis as: the principal and interest payment amount necessary to amortize the loan over a 30-year term, divided by the Reduction Fishery portion of the BSAI Pacific cod initial total allowable catch (ITAC) allocation in metric tons (converted to pounds). NMFS estimates that the actual fees for this program will be $0.001 per pound, based upon the estimated fishery revenue from 2010 amortized over a 30-year loan. This program, coupled with the previously codified program in § 600.1105, will bring total fish catch fees to approximately $0.016 per pound.

For more specific information on submission of the Reduction Plan, including fees to repay the Reduction Loan, see § 600.1108(e) of this proposed rule. For specific information on the fee payment and collection system, see provision (m) of this proposed rule.

The Reduction Program: Other Matters Relating to the Reduction Agreement and Reduction Plan Review/Disputes

The Reduction Agreement provided for an expedited process to review any decision by the Auditor and for settlement of disputes utilizing an expedited review process by pre-selected legal counsel and, if necessary, binding arbitration. However, this provision was not activated as no disputes occurred during the selection process of this proposed buyback.

Other Provisions of the Reduction Agreement

Proposed regulatory provisions mirroring the Reduction Agreement's provisions for Specific Performance, Miscellaneous, Amendment, and Warranties are specified at § 600.1108(g), (h), (i), and (j), respectively.

The Fee Payment and Collection System

The payment and collection system will remain the same for the loan the subsector previously approved in 2007. Under this proposed rule, provision § 600.1108(m) outlines the requirements for repayment of this loan. This provision mirrors the fee system codified in § 600.1106 for the 2007 loan, except in total amount. The amount of the loan in this proposed rule is $2,700,000.

The Contract

An appendix to the proposed § 600.1108 sets forth the Contract component of the Reduction Program for the Longline Subsector. The appendix, or Contract, was previously codified as an appendix to the regulatory text of § 600.1105. This proposed rule will reference the appendix without reprinting it.

In addition to public comment about the proposed rule's substance, NMFS also seeks public comment on any ambiguity or unnecessary complexity arising from the language used in this proposed rule.

Classification

The Assistant Administrator for Fisheries, NMFS, determined that this proposed rule is consistent with the Appropriations and the Magnuson-Stevens Acts, and other applicable law, subject to further consideration after public comment.

In compliance with the National Environmental Policy Act, NMFS prepared an environmental assessment for this proposed rule. The assessment

discusses the impact of this proposed rule on the natural and human environment and integrates a Regulatory Impact Review (RIR) and an Initial Regulatory Flexibility Analysis (IRFA). NMFS will send the assessment, the review, and the analysis to anyone who requests a copy (see **ADDRESSES**).

NMFS prepared an IRFA, as required by section 603 of the Regulatory Flexibility Act (RFA), to describe the economic impacts that this proposed rule, if adopted, would have on small entities. NMFS intends the analysis to aid us in considering regulatory alternatives that could minimize the economic impact on affected small entities. The proposed rule does not duplicate or conflict with other Federal regulations.

Summary of IRFA

The Small Business Administration (SBA) has defined small entities as all fish harvesting businesses that are independently owned and operated, are not dominant in their field of operation, and have annual receipts of $4 million or less. In addition, processors with 500 or fewer employees for related industries involved in canned or cured fish and seafood, or preparing fresh fish and seafood, are also considered small entities. Small entities within the scope of this proposed rule include individual U.S. vessel owners and fish dealers. There are no disproportionate impacts between large and small entities.

Description of the Number of Small Entities

The IRFA uses the most recent year of data available to conduct the analysis (2009–2010). The vessel owners that might be considered large entities were either affiliated with owners of multiple vessels or were catcher processors. In the Reduction Fishery, 17 of the 36 vessel owners meet the threshold for small entities based on gross revenue. However, these vessels are not considered small entities for purposes of the RFA because of their affiliations with the larger fishing entities through the FLCC. All vessels in the Longline Subsector would benefit from a permit buyback because there will be less potential competition for the harvest. Because the proposed action would not result in changes to allocation percentages and participation is voluntary, net effects are expected to be minimal relative to the status quo.

Implementation of the buyback program will not change the overall reporting structure and recordkeeping requirements of the vessels in the BSAI Pacific cod fisheries. However, this program will impose collection of information requirements totaling 16 hours 10 minutes.

The proposed rule's impact would be positive for both the selected Offeror and for the post-reduction catcher processors whose landing fees repay the reduction loan because the Offeror and a majority of the remaining catcher processors will have voluntarily assumed the impact:

1. The Offeror voluntarily made an offer of $2,700,000. Presumably, no Offeror would volunteer to make an offer with an amount that is inconsistent with the Offeror's interest; and

2. Reduction loan repayment landing fees would be instituted, and NMFS will complete the Reduction Program, only if a majority of all Subsector Members vote in favor of the Reduction Plan in a referendum. Presumably, Subsector Members will not vote in favor of the Reduction Plan unless they conclude that the Reduction Program's prospective capacity reduction will be sufficient to enable them to increase their revenues enough to justify the fee.

Those participants who remain in the fishery after the buyback will incur additional fees of up to 5 percent of the ex-vessel production value of post-reduction landings. However, the additional costs would likely be mitigated by increased harvest opportunities for those remaining in the fishery.

NMFS believes that this proposed rule would not affect authorized BSAI Pacific cod ITAC or other non-pollock groundfish harvest levels nor harvesting practices.

NMFS rejected the no action alternative considered in the EA because NMFS would not be in compliance with the mandate of section 219 of the Appropriations Act to establish a buyback program. In addition, the Longline Catcher Processor Subsector of the non-pollock groundfish fishery would remain overcapitalized. Although too many vessels compete to catch the current subsector's total allowable catch (TAC) allocation, fishermen remain in the fishery because they have no other means to recover their significant capital investment. Overcapitalization reduces the potential net value that could be derived from the non-pollock groundfish resource by dissipating rents, driving variable operating costs up, and imposing economic externalities. At the same time, excess capacity and effort diminish the effectiveness of current management measures (e.g. landing limits and seasons, bycatch reduction measures). Overcapitalization has diminished the economic viability of members of the fleet and increased the economic and social burden on fishery-dependent communities.

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

This proposed rule contains information collection requirements subject to the Paperwork Reduction Act (PRA). The Office of Management and Budget (OMB) previously approved this information collection under OMB Control Number 0648–0376 with requirements for 878 respondents with a total response time of 38,653 hours.

NMFS estimates that Sector Members would require an average of four hours to vote in a referendum. Persons affected by this proposed rule would also be subject to other collection-of-information requirements referred to in the proposed rule and also approved under OMB Control Number 0648–0376. These requirements and their associated response times are: completing and filing a fish ticket (10 minutes), submitting monthly fish buyer reports (2 hours), submitting annual fish buyer reports (4 hours), and tendering fish buyer/fish seller reports when a person fails either to pay or to collect the loan repayment fee (2 hours).

These response estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the information collection. Public comment is sought regarding: whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the burden estimate; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information, including through the use of automated collection techniques or other forms of information technology. Interested persons may send comments regarding this burden estimate or any other aspect of this data collection requirement, including suggestions for reducing the burden, to both NMFS and OMB (see **ADDRESSES**).

This action would not result in any adverse effects on endangered species or marine mammals.

List of Subjects in 50 CFR Part 600

Fisheries, Fishing capacity reduction, Fishing permits, Fishing vessels, Intergovernmental relations, Loan programs—business, reporting and recordkeeping requirements.

Dated: July 24, 2012.

Alan D. Risenhoover,

Director, Office of Sustainable Fisheries, performing the functions and duties of the Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS proposes to amend 50 CFR part 600 to read as follows:

PART 600—MAGNUSON-STEVENS ACT PROVISIONS

Subpart M—Specific Fishery or Program Fishing Capacity Reduction Regulations

1. The authority citation for 50 CFR part 600, subpart M, is revised to read as follows:

Authority: 5 U.S.C. 561, 16 U.S.C. 1801 *et seq.,* 16 U.S.C. 1861a(b) through (e), 46 App. U.S.C. 53735, section 144(d) of Division B of Pub. L. 106–554, section 2201 of Pub. L. 107–20, and section 205 of Pub. L. 107–117, Pub. L. 107–206, Pub. L. 108–7, Pub. L. 108–199, and Pub. L. 108–447.

2. Section 600.1108 is added to subpart M to read as follows:

§ 600.1108 Longline catcher processor subsector of the Bering Sea and Aleutian Islands (BSAI) non-pollock groundfish fishery program.

(a) *Purpose.* This section implements the capacity reduction program that Title II, section 219(e) of Public Law 108–447 established for the longline catcher processor subsector of the Bering Sea and Aleutian Islands (BSAI) non-pollock groundfish fishery.

(b) *Definitions.* Unless otherwise defined in this section, the terms defined in § 600.1000 of subpart L and § 600.1105 of subpart M expressly apply to this section. The following terms have the following meanings for the purpose of this section:

Reduction fishery means the Hook & Line, Catcher Processor (Longline Subsector); sometimes referred to as the AH&LCP Subsector) portion of the BSAI Pacific cod ITAC (in metric tons) set by the North Pacific Fishery Management Council (NPFMC) in December of each year multiplied by 2,205 (i.e., the rounded number of pounds in a metric ton)or the Longline Subsector of the BSAI non-pollock groundfish fishery that § 679.2 of this chapter defined as groundfish area/species endorsement.

(c) *Capacity Reduction Program.* As a result of the completion of the Selection Process, written notification from the FLCC to NMFS identifying the selected offeror, and submission of the reduction plan, the capacity reduction program is implemented as follows:

(1) *Loan repayment*—(i) *Term.* As authorized by section 219(B)(2) of the Appropriations Act, the capacity reduction loan (the Reduction Loan) shall be amortized over a thirty (30) year term. The Reduction Loan's original principal amount may not exceed the amount approved by the subsector. The subsector has currently approved a loan of two million seven hundred thousand dollars ($2,700,000). Subsector Members acknowledge that in the event payments made under the Reduction Plan are insufficient to repay the actual loan, the term of repayment shall be extended by NMFS until the loan is paid in full. Repayment calculations and records will be kept separately for each program.

(ii) *Interest.* The Reduction Loan's interest rate will be the U.S. Treasury's cost of borrowing equivalent maturity funds plus 2 percent. NMFS will determine the Reduction Loan's initial interest rate when NMFS borrows from the U.S. Treasury the funds with which to disburse reduction payments. The initial interest rate will change to a final interest rate at the end of the Federal fiscal year in which NMFS borrows the funds from the U.S. Treasury. The final interest rate will be 2 percent plus a weighted average, throughout that fiscal year, of the U.S. Treasury's cost of borrowing equivalent maturity funds. The final interest rate will be fixed, and will not vary over the remainder of the reduction loan's 30-year term. The Reduction loan will be subject to a level debt amortization. There is no prepayment penalty.

(iii) *Fees.* The Reduction Loan shall be repaid by fees collected from the Longline Subsector. The fee amount will be based upon: The principal and interest due over the next twelve months divided by the product of the Longline Subsector. In the event that the Longline Subsector portion for the ensuing year is not available, the Longline Subsector portion forecast from the preceding year will be used to calculate the fee.

(A) The fee will be expressed in cents per pound rounded up to the next one-tenth of a cent. For example: If the principal and interest due equal $2,900,000 and the Longline Subsector portion equals 100,000 metric tons, then the fee per round weight pound of Pacific cod will equal 1.4 cents per pound. [2,900,000/(100,000 × 2,205) = .01315]. The fee will be assessed and collected on Pacific cod to the extent possible and if not, will be assessed and collected as provided for in paragraph (c)(3)(iii)(B) of this section.

(B) Fees must be assessed and collected on Pacific cod used for bait or discarded. Although the fee could be up to 5 percent of the ex-vessel production value of all post-reduction Longline Subsector landings, the fee will be less than 5 percent if NMFS projects that a lesser rate can amortize the fishery's reduction loan over the reduction loan's 30-year term. In the event that the total principal and interest due exceeds 5 percent of the ex-vessel Pacific cod revenues, a standardized additional fee will be assessed. The additional fee shall be one cent per pound round weight, which is calculated based on the latest available revenue records and NMFS conversion factors for pollock, arrowtooth flounder, Greenland turbot, skate, yellowfin sole and rock sole.

(C) To verify that the fees collected do not exceed 5 percent of the fishery revenues, the annual total of principal and interest due will be compared to the latest available annual Longline Subsector revenues. In the event that any of the components necessary to calculate the next year's fee are not available, or for any other reason NMFS believes the calculation must be postponed, the fee will remain at the previous year's amount until such a time that new calculations are made and communicated to the post-reduction fishery participants.

(D) It is possible that the fishery may not open during some years and no Longline Subsector portion of the ITAC is granted. Consequently, the fishery will not produce fee revenue with which to service the reduction loan during those years. However, interest will continue to accrue on the principal balance. When this happens, if the fee rate is not already at the maximum 5 percent, NMFS will increase the fishery's fee rate to the maximum 5 percent of the revenues for Pacific cod and the species mentioned in paragraph (d)(2)(iii)(B) of this section, apply all subsequent fee revenue first to the payment of accrued interest, and continue the maximum fee rates until all principal and interest payments become current. Once all principal and interest payments are current, NMFS will make a determination about adjusting the fee rate.

(iv) *Reduction loan.* NMFS has promulgated framework regulations generally applicable to all fishing capacity reduction programs in subpart L of this part. The reduction loan shall be subject to the provisions of § 600.1012, except that: the subsector members' obligation to repay the reduction loan shall be discharged by the owner of the Longline Subsector license regardless of which vessel catches fish under this license and regardless of who processes the fish in

the reduction fishery in accordance with § 600.1013. Longline Subsector license owners in the reduction fishery shall be obligated to collect the fee in accordance with § 600.1013.

(v) *Collection.* The LLP License holders of vessels harvesting in the post-capacity reduction plan Longline Subsector shall be responsible for self-collecting the repayment fees owed by the LLP License holder. Fees shall be submitted to NMFS monthly and shall be due no later than fifteen (15) calendar days following the end of each calendar month.

(vi) *Recordkeeping and reporting.* The holder of the LLP Licenses on which vessels harvesting in the post-capacity reduction plan Longline Subsector is designated shall be responsible for compliance with the applicable recordkeeping and reporting requirements.

(2) *Agreement with Secretary.* The Selected Offeror shall complete and deliver to the FLCC for inclusion in the Reduction Plan submitted to NMFS, designee for the Secretary, a completed and fully executed Reduction Contract. The LLP License set forth on the Selected Offer shall be included as Reduction Fishing Interests in such Reduction Contract.

(d) *Decisions of the Auditor and the FLCC.* Time was of the essence in developing and implementing a Reduction Plan and, accordingly, the Offeror is limited to, and bound by, the decisions of the Auditor and the FLCC.

(1) The Auditor's examination of submitted applications, Offers, Prequalification Offers and Rankings was solely ministerial in nature. That is, the Auditor verified whether the documents submitted by Subsector Members were, on their face, consistent with each other and the Database, in compliance with the requirements set forth in the Reduction Agreement, and signed by an Authorized Party. The Auditor presumed the validity of all signatures on documents submitted. The Auditor made no substantive decisions as to compliance (e.g., whether an interim LLP License satisfies the requirements of the Act, or whether a discrepancy in the name appearing on LLP Licenses and other documents was material).

(2) [Reserved]

(e) *Specific Performance.* The parties to the Reduction Agreement have agreed that the opportunity to develop and submit a capacity reduction program for the Longline Subsector under the terms of the Appropriations Act is both unique and finite and that failure of the Selected Offeror to perform the obligations provided by the Reduction Agreement will result in irreparable damage to the FLCC and the Subsector Members. Accordingly, the parties to the Reduction Agreement expressly acknowledge that money damages are an inadequate means of redress and agree that upon the failure of the Selected Offeror to fulfill their obligations under the Reduction Agreement that specific performance of those obligations may be obtained by suit in equity brought by the FLCC in any court of competent jurisdiction without obligation to arbitrate such action.

(f) *Miscellaneous*—(1) *Termination.* The Reduction Agreement may be terminated at any time prior to approval of the Reduction Plan by NMFS, on behalf of the Secretary, by written notice from 50 percent of Subsector Members.

(2) *Choice of law/venue.* The Reduction Agreement shall be construed and enforced in accordance with the laws of the State of Washington without regard to its choice of law provisions. The parties submit to the exclusive personal jurisdiction of the United States District Court located in Seattle, Washington, with respect to any litigation arising out of or relating to the Reduction Agreement or out of the performance of services hereunder.

(3) *Incorporation.* All executed counterparts of the Reduction Agreement, Application Forms and Offers constitute the agreement between the parties with respect to the subject matter of the Reduction Agreement and are incorporated into the Reduction Agreement as if fully written.

(4) *Counterparts.* The Reduction Agreement may be executed in multiple counterparts and will be effective as to signatories on the Effective Date. The Reduction Agreement may be executed in duplicate originals, each of which shall be deemed to be an original instrument. All such counterparts and duplicate originals together shall constitute the same agreement, whether or not all parties execute each counterpart.

(i) The facsimile signature of any party to the Reduction Agreement shall constitute the duly authorized, irrevocable execution and delivery of the Reduction Agreement as fully as if the Reduction Agreement contained the original ink signatures of the party or parties supplying a facsimile signature.

(ii) [Reserved]

(g) *Amendment.* All Subsector Members acknowledge that the Reduction Agreement, the Reduction Contract, and the Reduction Plan may be subject to amendment to conform to the requirements for approval of the Reduction Plan by NMFS on behalf of the Secretary. The Auditor shall distribute to each Subsector Member in electronic format the amended form of the Reduction Agreement, the Reduction Contract, and the Reduction Plan, which amended documents in the form distributed by the Auditor and identified by the Auditor by date and version, the version of each such document then in effect at the time of any dispute arising or action taken shall be deemed binding upon the parties with respect to such dispute and/or action.

(h) *Warranties.* The Offeror must expressly warrant and represent in the Reduction Agreement that:

(1) The Offeror has had an opportunity to consult with an attorney or other advisors with respect to the Reduction Agreement, the Reduction Contract, and the Act and the ramifications of the ratification of the Reduction Plan contemplated therein;

(2) The Offeror has full understanding and appreciation of the ramifications of executing and delivering the Reduction Agreement and, free from coercion of any kind by the FLCC or any of its members, officers, agents and/or employees, executes and delivers the Reduction Agreement as the free and voluntary act of the Offeror;

(3) The execution and delivery of the Reduction Agreement, does not and will not conflict with any provisions of the governing documents of the Offeror;

(4) The person executing the Reduction Agreement has been duly authorized by the Offeror to execute and deliver the Reduction Agreement and to undertake and perform the actions contemplated herein; and

(5) The Offeror has taken all actions necessary for the Reduction Agreement to constitute a valid and binding obligation, enforceable in accordance with its terms.

(i) *Approval of the Reduction Plan.* Acceptance of the Offer is at the sole discretion of NMFS on behalf of the Secretary of Commerce. To be approved by NMFS, on behalf of the Secretary, any Reduction Plan developed and submitted in accordance with this section and Subpart M to this part must be found by the Assistant Administrator of NMFS, to:

(1) Be consistent with the requirements of section 219(e) of the FY 2005 Appropriations Act (Pub. L. 108–447);

(2) Be consistent with the requirements of section 312(b) of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1861(a)) except for the requirement that a Council or Governor of a State request such a program (as set

out in section 312(b)(1)) and for the requirements of section 312(b)(4);

(3) Contain provisions for a fee system that provides for full and timely repayment of the capacity reduction loan by the Longline Subsector and that it provide for the assessment of such fees;

(4) Not require a bidding or auction process;

(5) Result in the maximum sustained reduction in fishing capacity at the least cost and in the minimum amount of time; and

(6) Permit vessels in the Longline Subsector to be upgraded to achieve efficiencies in fishing operations provided that such upgrades do not result in the vessel exceeding the applicable length, tonnage, or horsepower limitations set out in Federal law or regulation.

(j) *Referendum.* The following provisions apply to the Reduction Plan of this section to the extent that they do not conflict with subpart L including §§ 600.1009, 600.1010, 600.1013, and 600.1014 or 16 U.S.C. 1861a; except where the referendum is successful if a majority of all permit holders within the fishery vote in favor of the Reduction Program is accordance with 18 U.S.C. 1861a(d)(1)(B).

(k) *Fee payment and collection system.* Upon successful completion of the Referendum discussed above as authorized by Public Law 108–447 and in accordance with 16 U.S.C. 1861a and § 600.1012 this fee collection system establishes:

(1) The subsector members' obligation to repay the reduction loan, and

(2) The loan's principal amount, interest rate, and repayment term; and

(3) In accordance with §§ 600.1013 through 600.1016, implements an industry fee system for the reduction fishery.

(l) *Reduction loan amount.* The reduction loan's original principal amount is $2,700,000.

(m) *Interest accrual from inception.* Interest begins accruing on the reduction loan from the date which NMFS disburses such loan.

(n) *Interest rate.* The reduction loan's interest rate shall be the applicable rate which the U.S. Treasury determines at the end of fiscal year in which loan is disbursed plus 2 percent.

(o) *Repayment terms.* For the purpose of determining fee rates, the reduction loan's repayment term is 30 years from the date NMFS disburses the loan. However, fee collections shall continue indefinitely until the loan is fully repaid.

(p) *Reduction loan repayment.* The subsector members shall repay the reduction loan in accordance with § 600.1012. Both fish buyers and fish sellers are considered subsector members for purposes of fee collection, deposit, disbursement, and accounting in accordance with § 600.1013.

(1) Subsector members in the reduction fishery shall collect and pay the fee amount in accordance with § 600.1105;

(2) Subsector members in the reduction fishery shall deposit and disburse, as well as keep records for and submit reports about, the applicable fees in accordance with § 600.1014, except the requirements under paragraphs (c) and (e) of this section. All collected fee revenue a fish buyer collects to repay the loan identified in paragraph (c) of this section shall be made to NMFS no later than fifteen (15) calendar days following the end of each calendar month. The annual reports identified in paragraph (e) of this section shall be submitted to NMFS by February 1 of each calendar year.

(3) The reduction loan is, in all other respects, subject to the provisions of §§ 600.1012 through 600.1017.

(q) *Enforcement for failure to pay fees.* The provisions and requirements of § 600.1016 (Enforcement) shall also apply to fish sellers and fish buyers subject to this fishery.

Federal Register
Vol. 77, No. 146
Monday, July 30, 2012

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Notice of Idaho Panhandle Resource Advisory Committee Meeting

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: Pursuant to the authorities in the Federal Advisory Committee Act (Pub. L. 112–141) and under the Secure Rural Schools and Community Self-Determination Act of 2000 (Pub. L. 110–343) the Idaho Panhandle Resource Advisory Committee will meet Friday, August 24, 2012, at 9:00 a.m. in Coeur d'Alene, Idaho for a business meeting. The business meeting is open to the public.

DATES: August 24, 2012.

ADDRESSES: The meeting location is the Idaho Panhandle National Forests' Supervisor's Office, located at 3815 Schreiber Way, Coeur d'Alene, Idaho 83815.

FOR FURTHER INFORMATION CONTACT: Mary Farnsworth, Forest Supervisor and Designated Federal Official, at (208) 765–7369.

SUPPLEMENTARY INFORMATION: The meeting agenda will focus on reviewing proposals for forest projects and recommending funding during the monitoring meeting. The public forum begins at 9:00 a.m.

Dated: July 24, 2012.

Christine Dawe,

Deputy Forest Supervisor.

BILLING CODE 3410–11–P

DEPARTMENT OF AGRICULTURE

Forest Service

Siskiyou County Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Sisikiyou County Resource Advisory Commitee will meet in Yreka, California. The committee is authorized under the Secure Rural Schools and Community Self-Determination Act (Pub. L. 110–343) (the Act) and operates in compliance with the Federal Advisory Committee Act. The purpose of the committee is to improve collaborative relationships and to provide advice and recommendations to the Forest Service concerning projects and funding consistent with the title II of the Act. The meeting is open to the public. The purpose of the meeting is for the committee to hear project status, review project proposals and to vote and make recommendations. The meeting is open to the public. Opportunity for public comment will be provided.

DATES: The meeting will be held Monday, August 20, 2012 4:00 p.m.

ADDRESSES: The meeting will be held at The Klamath National Forest Supervisor's Office, main conference room, at 1711 South Main Street in Yreka, CA.

Written comments may be submitted as described under Supplementary Information. All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received at the Klamath National Forest Supervisor's Office. Please call ahead to (530) 841–4484 to facilitate entry into the building to view comments.

FOR FURTHER INFORMATION CONTACT: Kerry Greene, Community Development and Outreach Specialist, phone: (530) 841–4484 or email: *kggreene@fs.fed.us.*

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday. Please make requests in advance for sign language interpreting, assistive listening devices or other reasonable accomodation for access to the facility or procedings by contacting the person listed For Further Information.

SUPPLEMENTARY INFORMATION: The following business will be conducted: project updates and financial status, and review of project proposals currently under consideration by the RAC. New project proposals are now being accepted. A meeting agenda and copies of submitted proposals can be accessesd at: *https://fsplaces.fs.fed.us/fsfiles/unit/wo/secure_rural_schools.nsf/RAC/Siskiyou+County-CA.*

Anyone who would like to bring related matters to the attention of the committee may file written statements with the committee staff before or after the meeting. The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should request in advance to be scheduled on the agenda. Written comments and requests for time for oral comments must be sent to Klamath National Forest 1711 S. Main Street Yreka, CA 96097, or by email to *kggreene@fs.fed.us,* or via facsimile to (530) 841–4571.

A summary of the meeting will be posted at: *https://fsplaces.fs.fed.us/fsfiles/unit/wo/secure_rural_schools.nsf/RAC/Siskiyou+County-CA* within 21 days of the meeting.

Dated: *July 24, 2012.*

Dan Blessing.

Acting Forest Supervisor.

BILLING CODE 3410–11–P

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Tennessee Advisory Committee

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act (FACA) that the Tennessee Advisory Committee (Committee) to the Commission will hold two meetings on Thursday, August 16, 2012, at the Nashville Public Library, 615 Church Street Nashville, Tennessee 37219. The first meeting is scheduled to begin at 2:00 p.m. and adjourn at approximately 2:45 p.m.; the purpose of the meeting is for Committee members to receive a briefing on voting rights in Tennessee for ex-felons. The second meeting is scheduled to begin at approximately 2:45 p.m. and adjourn at approximately 3:30 p.m.; the purpose of the meeting is for the Committee to plan its project on voting rights for ex-felons.

Members of the public are entitled to submit written comments. The comments must be received in the Southern Regional Office of the Commission by September 15, 2012. The address is Southern Regional Office, U.S. Commission on Civil Rights, 61 Forsyth Street Suite 16T126, Atlanta, GA 30303. Persons wishing to email their comments or who desire additional information should contact Peter Minarik, Regional Director, Southern Regional Office, at (404) 562–7000, (or for hearing impaired TDD 800–877–8339), or by email *erodriguez@usccr.gov.* Hearing-impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Office at least ten (10) working days before the scheduled date of the meeting.

Records generated from this meeting may be inspected and reproduced at the Southern Regional Office, as they become available, both before and after the meeting. Persons interested in the work of this advisory committee are advised to go to the Commission's Web site, *www.usccr.gov,* or to contact the Southern Regional Office at the above email or street address. The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission and FACA.

Dated in Washington, DC, July 24, 2012.

Peter Minarik,

Acting Chief,Regional Programs Coordination Unit.

BILLING CODE 6335–01–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: October School Enrollment Supplement to the Current Population Survey.

OMB Control Number: 0607–0464.

Form Number(s): None.

Type of Request: Extension of a currently approved collection.

Burden Hours: 2,950.

Number of Respondents: 59,000.

Average Hours per Response: 3 minutes.

Needs and Uses: The purpose of this request for review is to obtain continued clearance for the supplemental inquiry concerning school enrollment to be conducted in conjunction with the October Current Population Survey (CPS). The School Enrollment Supplement is jointly sponsored by the U.S. Census Bureau, the Bureau of Labor Statistics (BLS), and the National Center for Education Statistics (NCES). A number of questions in this supplement may appear in the American Community Survey (ACS) and in other demographic surveys. However, this supplement's comprehensive set of questions does not duplicate any other single information collection, and ensures the historical continuity of a data series that spans over 5 decades.

This data series provides basic information on enrollment status of various segments of the population necessary as background for policy formulation and implementation. The CPS October supplement is the only annual source of data on public/private elementary and secondary school enrollment and characteristics of private school students and their families, which are used for tracking historical trends and for policy planning and support. The basic school enrollment questions have been collected annually in the CPS for 50 years. Consequently, this supplement is the only source of historical data—at the national level—on the age distribution and family characteristics of college students, and on the demographic characteristics of preprimary school enrollment. As part of the federal government's efforts to collect data and provide timely information to local governments for policymaking decisions, this supplement provides national trends in enrollment and progress in school. Discontinuance of these data would mean not complying with the federal government's obligation to provide data to decision makers on current educational issues and would disrupt a data series that has been in existence for 50 years.

Affected Public: Individuals or households.

Frequency: Annually.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C., Section 182, and Title 29 U.S.C., Sections 1–9.

OMB Desk Officer: Brian Harris-Kojetin, (202) 395–7314.

Copies of the above information collection proposal can be obtained by calling or writing Jennifer Jessup, Departmental Paperwork Clearance Officer, (202) 482–0336, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *jjessup@doc.gov*).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Brian Harris-Kojetin, OMB Desk Officer either by fax (202–395–7245) or email (*bharrisk@omb.eop.gov*).

Dated: July 25, 2012.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

[FR Doc. 2012–18451 Filed 7–27–12; 8:45 am]

BILLING CODE 3510–07–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: Generic Clearance for 2020 Census Field Tests to Research the Use of Automation in Field Data Collection Activities.

OMB Control Number: None.

Form Number(s): Unknown at this time.

Type of Request: New collection.

Burden Hours: 2,167.

Number of Respondents: 13,000.

Average Hours per Response: 10 minutes.

Needs and Uses: The U.S. Census Bureau is committed to conducting a 2020 Census that costs less while maintaining high quality results. Field data collection activities are a significant cost driver in the decennial census. Field data collection activities include creating and updating address lists, updating maps, enumerating households and persons, collecting data on vacant housing units, and conducting quality control operations. In previous censuses, these activities required the use of a large temporary field staff with limited training using manual or paper forms and systems.

Advances in technology may create new opportunities to perform field data collection tasks in an automated environment. The Census Bureau plans to research and learn the use of new technologies to test their capabilities in performing data collection activities. As part of the learning process, the Census Bureau plans to conduct operations using new technologies. This research

and learning are integral to the Strategic Plan for the 2020 Census.

Designing and testing innovations are part of the planning of every recent decennial census. To carry out these tests, the Census Bureau plans to conduct field activities by programming and using mobile computing devices, such as smart phones and tablets, and using multiple software operating systems. The tests will inform census planners and stakeholders on their ability to program applications on different devices. In addition, the tests will measure the accuracy, productivity, and user experience with different combinations of mobile device and applications. Tests may also provide data on the feasibility to program applications on privately owned devices. In previous censuses, the Census Bureau has purchased equipment that it issues to the temporary field staff. After the census, this equipment was disposed as excess property.

The Census Bureau plans to conduct these tests in small geographic areas involving a small number of housing units and persons over the next three years. The specific areas have not yet been determined. We will follow the protocol of past generic clearances: 14 to 30 days before the scheduled start date of each field test, we will provide OMB with a detailed background on the activity, estimates of respondent burden, and samples of pertinent forms and/or questions. We will provide OMB annually a report documenting the activities performed under this clearance at the end of each year.

The following sections describe the categories of activities to be included under the clearance. The Census Bureau has conducted these activities (or similar ones) previously and the individual respondent burden remains relatively unchanged from one time to another.

Address Listing and Mapping Tasks

The Census Bureau maintains a Master Address File (MAF) of housing units and other living quarters. Census links each MAF location to the Census Bureau mapping system called the Topologically Integrated Geographic Encoding and Referencing (TIGER) database. The MAF needs updating to account for new housing units and other living quarters. The TIGER database needs updating to account for feature changes such as new streets and street names.

The Census Bureau will update map features and address lists on mobile computing devices. During the test, it may be necessary to ask residents or other knowledgeable persons in a test area for street name and address numbers. The Census Bureau will record responses into extracts of the mapping and MAF databases that have been loaded onto the mobile computing device. The primary purpose of this activity during the test is to evaluate the performance of these tasks on a mobile computing device in a field environment. The data collected may be stored on the mobile computing device and/or other data storage system. Address data are protected information under U.S. Code Title 13, and the test will comply with the Census Bureau privacy and security requirements for collecting, transmitting, storing, and using information obtained during the test.

Enumeration Functions

During personal interviews, the decennial census asks a series of questions of a household respondent and records the answers. The enumeration functions research will focus on using various applications and mobile computing devices to enumerate households and persons. The research and evaluation may include: Developing an automated enumeration questionnaire; usability issues; conducting interviews; scheduling return visits; recording contact outcomes; recording the status of a housing unit (such as occupied or vacant); adding addresses; making work assignments; measuring production; having the ability to toggle to a Spanish instrument; enumerator routing; and transmitting data. To test enumeration functions, the Census Bureau may conduct the enumeration directly with a household member or knowledgeable respondent. The Census Bureau will provide the actual questions asked to Office of Management and Budget following established protocol.

During these tests, the Census Bureau could develop other applications on the mobile computing devices to collect information. These applications could include: allowing respondents to enter their information directly into the device; perform voice recognition commands and recordings; and to input data during a phone call.

Quality Control Functions

The quality control (QC) functions research is intended to test quality control functions and applications on different mobile computing devices for both listing and enumeration. The purposes of testing these functions are to develop requirements for the QC portion of the listing and enumeration applications in 2020. The scope of the tests may include revisiting areas and households to verify information collected in previous operations; correcting and adding map features, addresses, and households; and applying pass/fail requirements. The tests may include collecting GPS coordinates of addresses to identify and reduce incorrect geographic identifiers of addresses.

All activities described directly support the Census Bureau's efforts to maintain or improve quality while controlling costs in the 2020 Census. The information collected from households during these tests is to research new technologies to plan the 2020 Census. Information from respondents will not be used in any data products produced by the Census Bureau such as statistical measures or indicators. Responses may be used in future research studies that build upon the results of these early tests. The Census Bureau may use address and mapping information collected during these tests to update its MAF and mapping databases.

Affected Public: Individuals or households.

Frequency: One time.

Respondent's Obligation: Mandatory.

Legal Authority: U.S. Code Title 13, Sections 141 and 193.

OMB Desk Officer: Brian Harris-Kojetin, (202) 395–7314.

Copies of the above information collection proposal can be obtained by calling or writing Jennifer Jessup, Departmental Paperwork Clearance Officer, (202) 482–0336, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *jjessup@doc.gov*).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Brian Harris-Kojetin, OMB Desk Officer either by fax (202–395–7245) or email (*bharrisk@omb.eop.gov*).

Dated: July 25, 2012.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

BILLING CODE 3510–07–P

DEPARTMENT OF COMMERCE

Applications To Serve as Accountability Agents in the Asia Pacific Economic Cooperation (APEC) Cross Border Privacy Rules (CBPR) System

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice of Opportunity for Organizations to Submit Applications to Serve as Accountability Agents in the Asia Pacific Economic Cooperation (APEC) Cross Border Privacy Rules (CBPR) System.

SUMMARY: The International Trade Administration's Office of Technology and Electronic Commerce (OTEC) invites interested organizations to submit applications for recognition by APEC to act as an Accountability Agent for U.S.-based companies that are subject to Federal Trade Commission jurisdiction as part of APEC's Cross Border Privacy Rules system.

DATES: Applications may be submitted beginning in July 2012. There is no closing date for submitting applications.

ADDRESSES: All questions concerning this notice should be sent to the attention of Joshua Harris at one of the following addresses. See **SUPPLEMENTARY INFORMATION** for additional instructions on submitting applications.Joshua Harris: 1401 Constitution Ave. NW., Room 4324, Washington, DC 20230.*joshua.harris@trade.gov*.

FOR FURTHER INFORMATION CONTACT: Joshua Harris, Office of Technology and Electronic Commerce, International Trade Administration, U.S. Department of Commerce, by telephone at (202) 482–0142 (this is not a toll-free number) or by email at *joshua.harris@trade.gov*.

SUPPLEMENTARY INFORMATION: In 2004, Leaders of the 21 APEC economies endorsed the ''APEC Privacy Framework'' (Framework). The goal of the Framework is to facilitate the flow of information between the 21 economies in APEC by promoting a common set of privacy principles that will enhance electronic commerce, facilitate trade and economic growth, and strengthen consumer privacy protections. In order to implement this Framework, member economies developed a voluntary system of Cross Border Privacy Rules (CBPR), which was completed in September 2011 and endorsed by APEC Leaders in November 2011 (the Leaders' Declaration is available at *http://www.apec.org/Meeting-Papers/Leaders-Declarations/2011/2011_aelm.aspx)*. The Leaders' Declaration instructs APEC member economies to implement the APEC Cross Border Privacy Rules System to reduce barriers to information flows, enhance consumer privacy, and promote interoperability across regional data privacy regimes. In July 2012, the United States formally commenced participation in the CBPR system.

The 21 APEC economies include Australia, Brunei Darussalam, Canada, Chile, the People's Republic of China, Hong Kong, Indonesia, Japan, the Republic of Korea, Malaysia, Mexico, New Zealand, Papua New Guinea, Peru, Philippines, Russia, Singapore, Chinese Taipei, Thailand, the United States, and Vietnam.

The CBPR system requires organizations to develop their own internal business rules on cross-border privacy procedures, which must be assessed as compliant with the minimum requirements of the APEC system by an independent public or private sector body, called an Accountability Agent. Under the CBPR system, an ''Accountability Agent'' is a third-party organization that provides verification services related to the data privacy policies and practices for those businesses seeking CBPR certification. Only APEC-recognized Accountability Agents may perform CBPR certifications. A recognized Accountability Agent would only be able to certify as CBPR compliant those organizations that are subject to the enforcement authority of the Cross-border Privacy Enforcement Arrangement (CPEA)—participating privacy enforcement authorities within the economies in which it has been approved to operate. The CPEA creates a framework for regional cooperation in the enforcement of privacy laws. In the case of the United States, organizations interested in serving as an Accountability Agent for U.S.-based companies must be subject to the enforcement authority of the Federal Trade Commission, the U.S. privacy enforcement authority for the CBPR system. APEC recognition is granted by a consensus determination by APEC member economies that an applicant Accountability Agent meets the established recognition criteria.

APEC's ''Accountability Agent APEC Recognition Application'', a 61 page document which details the application process as well as the recognition criteria, is available at: *www.export.gov/infotech*.

Interested organizations must notify the Department of Commerce of their intent to seek APEC recognition and submit a completed application for initial review to the Office of Technology and Electronic Commerce by email at *joshua.harris@trade.gov*. Only complete application packages will be forwarded on to APEC for consideration of recognition.

Dated: July 25, 2012.

Robin Layton,

Director, Office of Technology and Electronic Commerce, U.S. Department of Commerce.

BILLING CODE 3510–DR–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 1843]

Reorganization of Foreign-Trade Zone 183 Under Alternative Site Framework; Austin, TX

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Board adopted the alternative site framework (ASF) (74 FR 1170–1173, January 12, 2009; correction 74 FR 3987, January 22, 2009; 75 FR 71069–71070, November 22, 2010) as an option for the establishment or reorganization of general-purpose zones;

Whereas, the Foreign-Trade Zone of Central Texas, Inc., grantee of Foreign-Trade Zone 183, submitted an application to the Board (FTZ Docket 8–2012, filed February 09, 2012) for authority to reorganize under the ASF with a service area of Bastrop, Caldwell, Hays, Travis and Williamson Counties, Texas, within and adjacent to the Austin Customs and Border Protection port of entry, and FTZ 183's existing Sites 1 through 24 would be categorized as magnet sites;

Whereas, notice inviting public comment was given in the **Federal Register** (77 FR 8806, February 15, 2012) and the application has been processed pursuant to the FTZ Act and the Board's regulations; and,

Whereas, the Board adopts the findings and recommendations of the examiner's report, and finds that the requirements of the FTZ Act and the Board's regulations are satisfied, and that the proposal is in the public interest;

Now, therefore, the Board hereby orders:

The application to reorganize FTZ 183 under the alternative site framework is approved, subject to the FTZ Act and the Board's regulations, including Section 400.13, to the Board's standard

2,000-acre activation limit for the overall general-purpose zone project, and to a five-year ASF sunset provision for magnet sites that would terminate authority for Sites 1 through 24 if not activated by July 31, 2017.

Signed at Washington, DC, this 23rd day of July 2012.

Paul Piquado,

Assistant Secretary of Commerce for Import Administration, Alternate Chairman, Foreign-Trade Zones Board.

Attest:

Andrew McGilvray,

Executive Secretary.

National Oceanic and Atmospheric Administration

RIN 0648–XC107

Takes of Marine Mammals Incidental to Specified Activities; Piling and Fill Removal in Woodard Bay Natural Resources Conservation Area, Washington

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; proposed incidental harassment authorization; request for comments.

SUMMARY: NMFS has received an application from the Washington State Department of Natural Resources (DNR) for an incidental harassment authorization (IHA) to take marine mammals, by harassment, incidental to restoration activities within the Woodard Bay Natural Resources Conservation Area (NRCA). Pursuant to the Marine Mammal Protection Act (MMPA), NMFS is requesting comments on its proposal to issue an IHA to the DNR to incidentally take harbor seals, by Level B harassment only, during the specified activity.

DATES: Comments and information must be received no later than August 29, 2012.

ADDRESSES: Comments on the application should be addressed to Michael Payne, Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910. The mailbox address for providing email comments is *ITP.Laws@noaa.gov.* NMFS is not responsible for email comments sent to addresses other than the one provided here. Comments sent via email, including all attachments, must not exceed a 10-megabyte file size.

Instructions: All comments received are a part of the public record and will generally be posted to *http://www.nmfs.noaa.gov/pr/permits/incidental.htm* without change. All Personal Identifying Information (e.g., name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information.

An electronic copy of the application, a list of the references used in this document, and other supplemental documents may be obtained by writing to the address specified above, telephoning the contact listed below (see **FOR FURTHER INFORMATION CONTACT**), or visiting the Internet at: *http://www.nmfs.noaa.gov/pr/permits/incidental.htm.* Documents cited in this notice may also be viewed, by appointment, during regular business hours, at the aforementioned address.

FOR FURTHER INFORMATION CONTACT: Ben Laws, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is published in the **Federal Register** to provide public notice and initiate a 30-day comment period.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth. NMFS has defined 'negligible impact' in 50 CFR 216.103 as ''* * * an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.''

Section 101(a)(5)(D) of the MMPA established an expedited process by which citizens of the United States can apply for an authorization to incidentally take small numbers of marine mammals by Level B harassment as defined below. Section 101(a)(5)(D) establishes a 45-day time limit for NMFS review of an application followed by a 30-day public notice and comment period on any proposed authorizations for the incidental harassment of marine mammals. Within 45 days of the close of the comment period, NMFS must either issue or deny the authorization. If authorized, the IHA would be effective for one year from date of issuance.

Except with respect to certain activities not pertinent here, the MMPA defines 'harassment' as: ''any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild [Level A harassment]; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [Level B harassment].''

Summary of Request

On May 18, 2012, we received an application from the DNR for an IHA for the taking, by Level B harassment only, of small numbers of harbor seals (*Phoca vitulina*) incidental to activities conducted in association with an ongoing habitat restoration project within the Woodard Bay NRCA, Washington. DNR was first issued an IHA that was valid from November 1, 2010, through February 28, 2011 (75 FR 67951), and was subsequently issued a second IHA that was valid from November 1, 2011, through February 28, 2012 (76 FR 67419). Restoration activity planned for 2012–13, depending upon final funding, includes removal of fill and associated materials in Woodard Bay and Chapman Bay and removal of creosote pilings and structure in Chapman Bay. Pilings would be removed by vibratory hammer extraction methods or by direct pull with cables. The superstructure materials would be removed by excavator and/or cables suspended from a barge-mounted crane. The proposed activities would occur only between November 1 through March 15 (2012–13), and could require a maximum total of approximately 70 days.

Description of the Specified Activity

The Woodard Bay NRCA, located within Henderson Inlet in southern Puget Sound, was designated by the Washington State Legislature in 1987 to

protect a large, intact complex of nearshore habitats and related biological communities, and to provide opportunities for low-impact public use and environmental education for the people of Washington. The site includes the former Weyerhaeuser South Bay Log Dump, which operated from the 1920s until the 1980s. The remnant structures from the log dump, including several hundred creosoted timber pilings and a trestle and pier and associated fill, continue to negatively impact nearshore ecosystems protected by the conservation area. Therefore, the DNR has begun restoration activities in the NRCA to remove these dilapidated structures in order to enhance ecological structure and function as well as low-impact public use.

However, certain remnant log booms are not planned for removal—and, in fact, have been maintained—due to their function as habitat for harbor seals. These few remnant log boom structures have been utilized as haul-out habitat for resting, pupping and molting for more than 30 years, and play an important role in supporting a healthy population of harbor seals. Seals concentrate and primarily haul out at only two locations within the NRCA (see figures in DNR's application and Monitoring Report).

These two different haul-out sites within NRCA are referred to as the north and south sites. The north site, located adjacent to the northern tip of the Chapman Bay Pier, is composed of several rows of log booms fastened to creosoted pilings. The south site, located east of the Chapman Bay Pier in the main operational area of the log dump, is composed of six log boom rows and one floating platform attached to creosoted pilings. The booms are utilized year-round by harbor seals of all ages and are ideal for harbor seal pupping due to easy access to water escape routes and the low platform for pups to get in and out of the water (Calambokidis *et al.,* 1991; Lambourn *et al.,* 2007). In recent years, the log boom haul-out area has decreased significantly because logs have decayed, sunk, or floated away (Lambourn *et al.,* 2007), and attempts have been made to re-establish some of the lost haul-out area. These booms are situated in the vicinity of the piles and structure planned for removal. The DNR anticipates harbor seals may flush into the water upon crew arrival and onset of fill removal and pile and structure removal activities; hence, harbor seals may be behaviorally harassed during these activities. The DNR is thus requesting an IHA to take harbor seals, by Level B harassment only, incidental to the specified restoration activities. The proposed activities may result in behavioral disturbance of seals due to noise or visual stimuli from the vibratory hammer, work vessels, heavy equipment onshore, or work crews.

Proposed restoration activities requested under the IHA are funding dependent. They include all or part of the following:

1. Fill Removal

- Remove 13,000 yd^3 of fill from Woodard Bay
- Remove 325 yd^3 of fill from Chapman Bay
- Remove associated creosoted timber, pilings, metal scraps and concrete abutment

2. Piling and Structure Removal

- Remove 10,000 ft^2 of pier superstructure and 470 pilings from Chapman Bay Pier
- Remove 30 anchor piles from Chapman Bay

Fill removal from Woodard and Chapman Bays would be accomplished from the uplands by heavy equipment and haul trucks. The creosoted pilings in the fill would be removed from the uplands by a crane-mounted vibratory hammer. This portion of the project is estimated to take approximately 12–14 weeks to complete. The majority of fill removal work is located in Woodard Bay, which is separated from the harbor seal haul-out areas (located in Chapman Bay) by land. This work would likely result in less disturbance of harbor seals than would the work located in Chapman Bay. In addition, the material to be removed would be hauled offsite by the contractor via Whitham Road, which is the main road into the NRCA and which leads away from the haul-out area (see Figure 4 of DNR's application). Fill removal would largely occur above the Ordinary High Water Mark. Fill removal activities may occur between November 1 and March 15. Chapman Bay fill removal is roughly 250 m from the south haul-out and 975 m from the north haul-out.

Piling and structure removal work would be accomplished by barge and skiffs. The pilings would be removed by vibratory hammer or by direct pull with cables; both methods are suspended from a barge-mounted crane. The vibratory hammer is a large steel device lowered on top of the pile, which then grips and vibrates the pile until it is loosened from the sediment. The pile is then pulled up by the hammer and placed on a barge. For direct pull, a cable is set around the piling to grip and lift the pile from the sediment. The superstructure materials would be removed by excavator and/or cables suspended from a barge-mounted crane.

Approximately 500 12- to 24-in diameter pilings, along with associated pier superstructure, would be removed near but not directly adjacent to haul-outs. After vibration, a choker is used to lift the pile out of the water where it is placed on the barge for transport to an approved disposal site. Pilings that cannot be removed by hammer or cable, or that break during extraction, would be recorded via GPS for divers to relocate at the final phase of project activities. The divers would then cut the pilings at or below the mudline using underwater chainsaws. Operations would begin on the pilings and structures that are furthest from the seal haul-out so that there is an opportunity for the seals to adjust to the presence of the contractors and their equipment. Vibratory extraction operations may occur between November 1 and January 15 and are expected to occur for approximately 20 days over the course of this work window. Other work days would be spent removing pier superstructure, which does not involve vibratory extraction, but has the potential to result in behavioral harassment due to the proximity to working crew. The portion of the Chapman Bay Pier that would be removed is approximately 100 m from the south haul-out area and 250 m from the north haul out.

Description of Marine Mammals in the Area of the Specified Activity

Harbor seals are the only marine mammal regularly found within the action area. Two Steller sea lions (*Eumetopias jubatus*) were observed, at a distance, swimming in Henderson Inlet during site restoration activities in 2010. There have been very few sightings of Steller sea lions in Henderson Inlet, and none were observed during subsequent restoration activities in 2011. They do not breed in Puget Sound, do not regularly use the action area, and, as such, are not likely to be affected by restoration activities. Steller sea lions are not considered further in this document.

Species Description—Harbor seals, which are members of the Phocid family (true seals), inhabit coastal and estuarine waters and shoreline areas from Baja California, Mexico to western Alaska. For management purposes, differences in mean pupping date (i.e., birthing) (Temte, 1986), movement patterns (Jeffries, 1985; Brown, 1988), pollutant loads (Calambokidis *et al.,* 1985) and fishery interactions have led to the recognition of three separate harbor seal stocks along the west coast

of the continental U.S. (Boveng, 1988). The three distinct stocks are: (1) inland waters of Washington (including Hood Canal, Puget Sound, and the Strait of Juan de Fuca out to Cape Flattery), (2) outer coast of Oregon and Washington, and (3) California (Carretta *et al.,* 2007). The inland waters of Washington stock is the only stock that may occur within the project area.

The average weight for adult seals is about 180 lb (82 kg) and males are slightly larger than females. Male harbor seals weigh up to 245 lb (111 kg) and measure approximately 5 ft (1.5 m) in length. The basic color of harbor seals' coat is gray and mottled but highly variable, from dark with light color rings or spots to light with dark markings (NMFS, 2008).

Population Abundance—Estimated population numbers for the inland waters of Washington, including the Hood Canal, Puget Sound, and the Strait of Juan de Fuca out to Cape Flattery, have been most recently estimated at 14,612 individuals (Carretta *et al.,* 2007). However, because the most recent abundance estimate is greater than 8 years old, there is no current estimate of abundance. Between 1983 and 1996, the annual rate of increase for this stock was 6 percent (Jeffries *et al.,* 1997). Based on this information and trends of other harbor seal stocks, the current abundance estimate is likely an underestimate. Based on the analyses of Jeffries *et al.* (2003) and Brown *et al.* (2005), both the Washington and Oregon coastal harbor seal stock have reached carrying capacity and are no longer increasing. Harbor seals are not listed as depleted nor considered strategic under the MMPA or as endangered or threatened under the Endangered Species Act (ESA). The stock is within its Optimum Sustainable Population level (Jeffries *et al.,* 2003). Harbor seals are considered the most abundant resident pinniped species in Puget Sound (Lance and Jeffries, 2009).

The harbor seal population within the NRCA is considered one of the healthier ones in southern Puget Sound. Seal numbers have been monitored at the site since 1977, when there were less than 50 seals. In 1996, the highest count year, there were 600 seals. The average maximum annual count between 1977 and 2008 was 315 seals (Buettner *et al.,* 2008). Annual seal counts end by October and numbers of individuals decline throughout the winter. From 2006 to 2009, October counts averaged 171 and ranged between 79 and 275 (Lambourn, 2010).

Distribution—Harbor seals are coastal species, rarely found more than 12 mi (20 km) from shore, and frequently occupy bays, estuaries, and inlets (Baird, 2001). Individual seals have been observed several miles upstream in coastal rivers. Ideal harbor seal habitat includes haul-out sites, shelter during the breeding periods, and sufficient food (Bjørge, 2002). Haul-out areas can include intertidal and subtidal rock outcrops, sandbars, sandy beaches, peat banks in salt marshes, and man-made structures such as log booms, docks, and recreational floats (Wilson, 1978; Prescott 1982; Schneider and Payne, 1983; Gilber and Guldager, 1998; Jeffries *et al.,* 2000). Human disturbance can affect haul-out choice (Harris *et al.,* 2003).

Behavior and Ecology—Harbor seals are typically seen in small groups resting on tidal reefs, boulders, mudflats, man-made structures, and sandbars. Harbor seals are opportunistic feeders that adjust their patterns to take advantage of locally and seasonally abundant prey (Payne and Selzer, 1989; Baird, 2001; Bjørge, 2002). The harbor seal diet consists of fish and invertebrates (Bigg, 1981; Roffe and Mate, 1984; Orr *et al.,* 2004). Although harbor seals in the Pacific Northwest are common in inshore and estuarine waters, they primarily feed at sea (Orr *et al.,* 2004) during high tide. Researchers have found that they complete both shallow and deep dives during hunting depending on the availability of prey (Tollit *et al.,* 1997). Their diet in Puget Sound consists of common prey resources such as hake, herring and adult and out-migrating juvenile salmonids.

Harbor seals mate at sea and females give birth during the spring and summer, although the pupping season varies by latitude. In coastal and inland regions of Washington, pups are born from April through January. Pups are generally born earlier in the coastal areas and later in inland waters (Calambokidis and Jeffries, 1991; Jeffries *et al.,* 2000). Suckling harbor seal pups spend as much as forty percent of their time in the water (Bowen *et al.,* 1999).

The remnant log booms at the Woodard Bay NRCA support a year-round population of harbor seals, which use the boom structures for haul-out habitat to rest, pup, and molt in two primary locations; to the east and to the north of the Chapman Bay Pier (see Figure 4 in DNR's application). Haul-out behavior is shown to be affected by time of day and tide cycle, as well as factors related to seasonal weather patterns such as air temperature, wind speed, cloud cover, and sea conditions (Buettner *et al.,* 2008). Annually, use of the log booms peaks from July, when females haul out to give birth to their pups, through October, during the late pupping season and molt (WA DNR, 2002).

Acoustics—In air, harbor seal males produce a variety of low-frequency (less than 4 kHz) vocalizations, including snorts, grunts, and growls. Male harbor seals produce communication sounds in the frequency range of 100–1,000 Hz (Richardson *et al.,* 1995). Pups make individually unique calls for mother recognition that contain multiple harmonics with main energy below 0.35 kHz (Bigg, 1981; Thomson and Richardson, 1995). Harbor seals hear nearly as well in air as underwater and had lower thresholds than California sea lions (*Zalophus californianus*) (Kastak and Schusterman, 1998). Kastak and Schusterman (1998) reported airborne low frequency (100 Hz) sound detection thresholds at 65.4 dB re: 20 μPa for harbor seals. In air, they hear frequencies from 0.25–30 kHz and are most sensitive from 6–16 kHz (Richardson, 1995; Terhune and Turnbull, 1995; Wolski *et al.,* 2003).

Adult males also produce underwater sounds during the breeding season that typically range from 0.25–4 kHz (duration range: 0.1 s to multiple seconds; Hanggi and Schusterman, 1994). Hanggi and Schusterman (1994) found that there is individual variation in the dominant frequency range of sounds between different males, and Van Parijs *et al.* (2003) reported oceanic, regional, population, and site-specific variation that could be vocal dialects. In water, they hear frequencies from 1–75 kHz (Southall *et al.,* 2007) and can detect sound levels as weak as 60–85 dB re: 1 μPa within that band. They are most sensitive at frequencies below 50 kHz; above 60 kHz sensitivity rapidly decreases.

Potential Effects on Marine Mammals

Potential effects of DNR's proposed activities are likely to be limited to behavioral disturbance resulting from visual stimuli of seals at the two described log boom haul-outs. Other potential disturbance could result from the introduction of sound into the environment as a result of pile removal activities; however, this is unlikely to cause an appreciably greater amount of harassment in either numbers or degree, in part because it is anticipated that most seals would be disturbed initially by physical presence of crews, vessels, or heavy equipment or by sound from vessels.

There is a general paucity of data on sound levels produced by vibratory extraction of timber piles; however, it is reasonable to assume that extraction would not result in higher sound

pressure levels (SPLs) than vibratory installation of piles. As such, we assume that source levels from the proposed activity would not be as high as average source levels for vibratory installation of 12- to 24-in steel piles (155–165 dB; Caltrans, 2009). Our general in-water harassment thresholds for pinnipeds exposed to continuous noise, such as that produced by vibratory pile extraction, are 190 dB root mean square (rms) re: 1 µPa as the potential onset of Level A (injurious) harassment and 120 dB RMS re: 1 µPa as the potential onset of Level B (behavioral) harassment. These levels are considered precautionary and we are currently revising these thresholds to better reflect the most recent scientific data.

Vibratory extraction would not result in sound levels near 190 dB; therefore, injury would not occur. However, underwater noise from vibratory extraction would likely exceed 120 dB in the vicinity of the haul-outs and may induce responses in-water such as avoidance or other alteration of behavior at time of exposure. However, seals flushing from haul-outs in response to small vessel activity and the presence of work crews would already be considered as 'harassed'. We only consider a single incidence of harassment per individual in any given 24-hour period; therefore, additional incidents that may occur to the same individual from different stimuli are not considered additional takes.

The airborne sound disturbance criteria for Level A harassment is 90 dB RMS re: 20 µPa for harbor seals. Based on information on airborne source levels measured for pile driving with vibratory hammer, removal of wood piles is unlikely to exceed 90 dB (WA DNR, 2011); further, the vibratory hammer would be outfitted with a muffling device ensuring that airborne SPLs are no higher than 80 dB. Potential effects of the action on harbor seals are detailed in the following text.

Behavioral Disturbance

Disturbance can result in a variety of effects, such as subtle or dramatic changes in behavior or displacement. Behavioral reactions of marine mammals are difficult to predict because they are dependent on numerous factors, including species, maturity, experience, activity, reproductive state, time of day, and weather. If a marine mammal does react to a stimulus by changing its behavior or moving a small distance, the impacts of that change may not be important to the individual, the stock, or the species as a whole. However, if marine mammals are displaced from an important feeding or breeding area for a prolonged period, impacts on the animals could be important. In general, pinnipeds seem more tolerant of, or at least habituate more quickly to, potentially disturbing stimuli than do cetaceans, and generally seem to be less responsive to exposure to industrial sound than most cetaceans.

Because the few available studies show wide variation in response to stimuli, pinniped responses are difficult to quantify. The literature shows that a range of effects are possible, including no obvious visible response, or behavioral responses that may include annoyance and increased alertness, visual orientation towards the stimulus, investigation of the stimulus, change in movement pattern or direction, habituation, alteration of feeding and social interaction, or temporary or permanent avoidance of the affected area. Minor behavioral responses do not necessarily cause long-term effects to the individuals involved. Severe responses include panic, immediate movement away from the stimulus, and stampeding, which could potentially lead to injury or mortality (Southall *et al.,* 2007).

In their comprehensive review of available literature, Southall *et al.* (2007) reported that the limited data suggest exposures between approximately 90 and 140 dB generally do not appear to induce strong behavioral responses in pinnipeds, while higher levels of pulsed sound, ranging between 150 and 180 dB, will prompt avoidance of an area. For airborne sound Southall *et al.* (2007) note there is extremely limited data suggesting very minor, if any, observable behavioral responses by pinnipeds exposed to airborne pulses of 60 to 80 dB.

Southall *et al.* (2007) noted that quantitative studies on behavioral reactions of pinnipeds to sound are rare, but described the following:

- Harris *et al.* (2001) observed the response of ringed (*Pusa hispida*), bearded (*Erignathus barbatus*), and spotted seals (*Phoca largha*) to underwater operation of a single air gun and an eleven-gun array. Received exposure levels were 160 to 200 dB. In some instances, seals exhibited no response to sound.
- Blackwell *et al.* (2004) observed ringed seals during impact installation of steel pipe pile. Received underwater SPLs were measured at 151 dB at 63 m. The seals exhibited either no response or only brief orientation response (defined as ''investigation or visual orientation'').
- In addition, Blackwell *et al.* (2004) studied the response of ringed seals within 500 m of impact driving of steel pipe pile to airborne sound. Received levels of airborne sound were measured at 93 dB at a distance of 63 m. Seals had either no response or limited response to pile driving. Reactions were described as ''indifferent'' or ''curious.''
- Miller *et al.* (2005) observed responses of ringed and bearded seals to a seismic air gun array. Received underwater sound levels were estimated at 160 to 200 dB. There were fewer seals present close to the sound source during air gun operations in the first year, but in the second year the seals showed no avoidance. In some instances, seals were present in very close range of the sound. The authors concluded that there was ''no observable behavioral response'' to seismic air gun operations.

Jacobs and Terhune (2002) observed harbor seal reactions to acoustic harassment devices (AHDs) with source level of 172 dB deployed around aquaculture sites. Seals were generally unresponsive to sounds from the AHDs. During two specific events, individuals came within 141 and 144 ft (43 and 44 m) of active AHDs and failed to demonstrate any measurable behavioral response; estimated received levels based on the measures given were approximately 120 to 130 dB.

Kastelein *et al.* (2006) exposed nine captive harbor seals in an approximately 82 × 98 ft (25 × 30 m) enclosure to non-pulse sounds used in underwater data communication systems (similar to acoustic modems). Test signals were frequency modulated tones, sweeps, and bands of sound with fundamental frequencies between 8 and 16 kHz; 128 to 130 ±3 dB source levels; 1- to 2-s duration (60–80 percent duty cycle); or 100 percent duty cycle. They recorded seal positions and the mean number of individual surfacing behaviors during control periods (no exposure), before exposure, and in 15-min experimental sessions (n = 7 exposures for each sound type). Seals generally swam away from each source at received levels of approximately 107 dB, avoiding it by approximately 16 ft (5 m), although they did not haul out of the water or change surfacing behavior. Seal reactions did not appear to wane over repeated exposure (i.e., there was no obvious habituation), and the colony of seals generally returned to baseline conditions following exposure. The seals were not reinforced with food for remaining in the sound field.

Reactions of harbor seals to the simulated sound of a 2-megawatt wind power generator were measured by Koschinski *et al.* (2003). Harbor seals

surfaced significantly further away from the sound source when it was active and did not approach the sound source as closely. The device used in that study produced sounds in the frequency range of 30 to 800 Hz, with peak source levels of 128 dB at 1 m at the 80- and 160–Hz frequencies.

Vessel sounds do not seem to have strong effects on seals in the water, but the data are limited. When in the water, seals appear to be much less apprehensive about approaching vessels. Some would approach a vessel out of apparent curiosity, including noisy vessels such as those operating seismic airgun arrays (Moulton and Lawson, 2002). Gray seals (*Halichoerus grypus*) have been known to approach and follow fishing vessels in an effort to steal catch or the bait from traps. In contrast, seals hauled out on land often are quite responsive to nearby vessels. Terhune (1985) reported that northwest Atlantic harbor seals were extremely vigilant when hauled out and were wary of approaching (but less so passing) boats. Suryan and Harvey (1999) reported that Pacific harbor seals commonly left the shore when powerboat operators approached to observe the seals. Those seals detected a powerboat at a mean distance of 866 ft (264 m), and seals left the haul-out site when boats approached to within 472 ft (144 m).

Hearing Impairment and Other Physiological Effects

Temporary or permanent hearing impairment is a possibility when marine mammals are exposed to very strong sounds. Hearing impairment is measured in two forms: Temporary threshold shift (TTS) and permanent threshold shift (PTS). PTS is considered injurious whereas TTS is not, as it is temporary and hearing is fully recoverable. Non-auditory physiological effects might also occur in marine mammals exposed to strong underwater sound. Possible types of non-auditory physiological effects or injuries that may occur in mammals close to a strong sound source include stress, neurological effects, bubble formation, and other types of organ or tissue damage. It is possible that some marine mammal species (i.e., beaked whales) may be especially susceptible to injury and/or stranding when exposed to strong pulsed sounds, particularly at higher frequencies. Neither auditory nor non-auditory physiological effects are anticipated to occur as a result of DNR activities.

PTS is presumed to be likely if the hearing threshold is reduced by more than 40 dB (i.e., 40 dB of TTS). Due to the low source levels produced by vibratory extraction, NMFS does not expect that marine mammals will be exposed to levels that could elicit PTS; therefore, it will not be discussed further. The following subsection discusses in somewhat more detail the possibilities of TTS.

TTS—TTS, reversible hearing loss caused by fatigue of hair cells and supporting structures in the inner ear, is the mildest form of hearing impairment that can occur during exposure to a strong sound (Kryter, 1985). While experiencing TTS, the hearing threshold rises and a sound must be stronger in order to be heard. TTS can last from minutes or hours to (in cases of strong TTS) days. For sound exposures at or somewhat above the TTS threshold, hearing sensitivity in both terrestrial and marine mammals recovers rapidly after exposure to the sound ends.

We consider TTS to be a form of Level B harassment rather than injury, as it consists of fatigue to auditory structures rather than damage to them. Pinnipeds have demonstrated complete recovery from TTS after multiple exposures to intense sound, as described in the studies below (Kastak *et al.,* 1999, 2005). The 190-dB injury criterion is not considered to be the level above which TTS might occur. Rather, it is the received level above which, in the view of a panel of bioacoustics specialists convened before TTS measurements for marine mammals became available, one could not be certain that there would be no injurious effects, auditory or otherwise, to pinnipeds. Few data on sound levels and durations necessary to elicit mild TTS have been obtained for marine mammals, and none of the published data concern TTS elicited by exposure to multiple pulses of sound.

Human non-impulsive sound exposure guidelines are based on exposures of equal energy (the same sound exposure level [SEL]; SEL is reported here in dB re: 1 $\mu Pa^2 - s$/re: 20 $\mu Pa^2 - s$ for in-water and in-air sound, respectively) producing equal amounts of hearing impairment regardless of how the sound energy is distributed in time (NIOSH, 1998). Until recently, previous marine mammal TTS studies have also generally supported this equal energy relationship (Southall *et al.,* 2007). Three newer studies, two by Mooney *et al.* (2009a,b) on a single bottlenose dolphin (*Tursiops truncatus*) exposed to either playbacks of U.S. Navy mid-frequency active sonar or octave-band sound (4–8 kHz) and one by Kastak *et al.* (2007) on a single California sea lion exposed to airborne octave-band sound (centered at 2.5 kHz), concluded that for all sound exposure situations, the equal energy relationship may not be the best indicator to predict TTS onset levels. Generally, with sound exposures of equal energy, quieter sounds (lower SPL) of longer duration were found to induce TTS onset more than louder sounds (higher SPL) of shorter duration. Given the available data, the received level of a single seismic pulse (with no frequency weighting) might need to be approximately 186 dB SEL in order to produce brief, mild TTS.

There are few known studies conducted on pinniped TTS responses to non-pulsed underwater or airborne sound. The first three studies described in the following text were performed in the same lab and on the same test subjects, and, therefore, the results may not be applicable to all pinnipeds or in field settings.

- Kastak and Schusterman (1996) studied the response of harbor seals to non-pulsed construction sound, reporting TTS of about 8 dB.
- Kastak *et al.* (1999) reported TTS of approximately 4–5 dB in three species of pinnipeds (harbor seal, California sea lion, and northern elephant seal [*Mirounga angustirostris*]) after underwater exposure for approximately 20 minutes to sound with frequencies ranging from 100–2,000 Hz at received levels 60–75 dB above hearing threshold. This approach allowed similar effective exposure conditions to each of the subjects, but resulted in variable absolute exposure values depending on subject and test frequency. Recovery to near baseline levels was reported within 24 hours of sound exposure.
- Kastak *et al.* (2005) followed up on their previous work, exposing the same test subjects to higher levels of sound for longer durations. The animals were exposed to octave-band sound for up to 50 minutes of net exposure. The study reported that the harbor seal experienced TTS of 6 dB after a 25-minute exposure to 2.5 kHz of octave-band sound at 152 dB (183 dB SEL).
- Bowles *et al.* (unpubl. data) exposed pinnipeds to simulated sonic booms (airborne sound). Harbor seals demonstrated TTS at 143 dB peak and 129 dB SEL.
- Kastak *et al.* (2004) used the same test subjects as in Kastak *et al.* (2005), exposing the animals to non-pulsed airborne sound (2.5 kHz octave-band sound) for 25 minutes. The harbor seal demonstrated 6 dB of TTS after exposure to 99 dB (131 dB SEL).

The sound level necessary to cause TTS in pinnipeds depends on exposure duration; with longer exposure, the level necessary to elicit TTS is reduced (Schusterman *et al.,* 2000; Kastak *et al.,*

2005, 2007). The literature has not drawn conclusions on levels of underwater non-pulsed sound (e.g., vibratory pile removal) likely to cause TTS. Although underwater sound levels produced by the DNR project may be approximately equal to the lower end of sound levels produced in studies that have induced TTS in pinnipeds, there is a general lack of controlled, quantifiable field studies related to this phenomenon, existing studies have had varied results, and there are no universally accepted standards for the amount of exposure time likely to induce TTS (Southall *et al.,* 2007).

While it may be inferred that TTS could theoretically result from the DNR project, it is highly unlikely, due to the source levels and duration of exposure possible. In summary, it is expected that elevated sound will have only a negligible probability of causing TTS in individual seals. Further, seals are likely to be disturbed via the approach of work crews and vessels long before the beginning of any pile removal operations and would be apprised of the advent of increased underwater sound via the soft start of the vibratory hammer. It is not expected that airborne sound levels would induce any form of behavioral harassment, much less TTS in individual pinnipeds.

The DNR and other organizations, such as the Cascadia Research Collective, have been monitoring the behavior of harbor seals present within the NRCA since 1977. Past disturbance observations at Woodard Bay NRCA have shown that seal harassment results from the presence of non-motorized vessels (e.g., recreational kayaks and canoes), motorized vessels (e.g., fishing boats), and people (Calambokidis and Leathery, 1991; Buettner *et al.,* 2008). Calambokidis and Leathery (1991) found that the mean distance that seals entered the water in response to any type of vessel was 56 m. Most commonly seals were disturbed when vessels were 26 to 50 m from the haul-out; however, only at distances greater than 125 m was there a sharp decrease in the proportion of groups disturbed. Seals entered the water in response to people on foot at up to 256 m although, on many occasions, people were able to pass less than 100 m from seals without noticeable disturbance while intentionally maintaining a low profile (Calambokidis and Leathery, 1991). Furthermore, the distances at which seals were disturbed varied significantly by vessel type; seals entered the water at a greater distance in response to non-motorized vessels as compared to motorized vessels. It is hypothesized that because the latter are more readily detectable than the former, seals are more readily aware of their presence at greater distances and do not react to the same extent upon close approach (Buettner *et al.,* 2008).

Buettner *et al.* (2008) also noted the difference in vigilance of seals based on float location during pupping season. For example, seals on floats located on the outer edges of the log boom area, which are thus subjected to greater amounts of vessel traffic, were indifferent to vessels unless the vessels came right up to the log booms. Contrarily, seals on the floats located in the central area of the log booms, and hence not exposed to as much traffic, were more vigilant and more sensitive to disturbances. These observations suggest that, while seals are susceptible to anthropogenic disturbance, a certain amount of habituation may occur at these haul-outs.

During emergency maintenance operations on the haul-out in 2008, seals present on the log booms flushed when the vessel first entered the haul-out area, but appeared to become habituated quickly thereafter. Maintenance operations included installation of new log booms to restore habitat. Seals initially flushed in response to onset of work but quickly acclimated to crew presence and would haul out on booms directly adjacent to the small barge used during maintenance. Furthermore, Suryan and Harvey (1991) found that harbor seals hauled-out at Puffin Island, WA, were more tolerant to subsequent harassments than they were to the initial harassment. However, sudden presence of a disturbance source (e.g., kayaker) can induce strong behavioral reactions.

In summary, based on the preceding discussion and on observations of harbor seals during past management activities in Woodard Bay, NMFS has preliminarily determined that impacts to harbor seals during restoration activities would be limited to behavioral harassment of limited duration and limited intensity (i.e., temporary flushing at most) resulting from physical disturbance. It is anticipated that seals would be initially disturbed by the presence of crew and vessels associated with the habitat restoration project. Seals entering the water following such disturbance could also be exposed to underwater SPLs greater than 120 dB (i.e., constituting harassment); however, given the short duration and low energy of vibratory extraction of 12–24 in timber piles, PTS would not occur and TTS is not likely. Abandonment of any portion of the haul-out is not expected either, as harbor seals have been documented as quickly becoming accustomed to the presence of work crews. During similar activities carried out under the previous IHAs, seals showed no signs of abandonment or of using the haul-outs to a lesser degree.

Anticipated Effects on Habitat

Marine mammal habitat would be temporarily ensonified by low sound levels resulting from habitat restoration effort. The piles designated to be removed have been treated with creosote, a wood preservative that is also toxic to the environment. Removing these piles will have beneficial impacts to the NRCA, including marine mammal habitat, by preventing the leaching of creosote chemicals, including polycyclic aromatic hydrocarbons, into the marine environment. No log booms would be removed; therefore, no impacts to the physical availability of haul-out habitat would occur. Any disturbance to substrate in the NRCA would be localized and of a temporary nature, resulting from the extraction of piles. As such, temporary impacts at most may be expected to the habitat of harbor seal prey species. No prey species are known to utilize the pilings themselves.

Summary of Previous Monitoring

DNR complied with the mitigation and monitoring required under the previous authorizations. In accordance with the 2010–11 IHAs, DNR submitted final monitoring reports, which described the monitoring effort and observations made. DNR has not exceeded authorized levels of take by Level B harassment under the IHAs.

Past IHAs have stipulated that monitoring be conducted on at least 15 days of work, to include times when we considered disturbance to be most likely, such as:

- Initial construction days of the project;
- When the contractors were mobilizing to a new location; and
- When activities were occurring closest to the haul-out areas.

At least one observer was stationed at each of two observation sites, to monitor both haul-out areas, on all monitoring days. Monitoring began 30 minutes prior to the contractor's start time (7 a.m.) and ended 30 minutes after the contractor left the site. Counts were conducted every half hour unless there was a disturbance, in which case another count was conducted. Each of the two haul-outs was counted separately and added together for the total number of seals hauled out. In the event of harassment, observers recorded the nature of the activity, proximity to haul-outs, and the number of seals that

flushed into the water (i.e., were harassed). The take number was calculated by subtracting the number of seals hauled out after the disturbance from the most recent count prior to the disturbance.

Harbor seal disturbances were recorded and broken down into disturbance types based on cause of disturbance. Each disturbance was given a code and proximity in meters from haul-outs was recorded (Table 1). Proximity in relation to haul-outs was calculated using satellite imagery. Under the 2010–11 IHA, 356 takes by harassment were observed during the 14 days of observation (Table 1) resulting in a mean of 25 seals disturbed per monitored day. Extrapolating that average out for all 35 days of restoration activity that occurred provides a total estimated take of 875, less than the authorized take (by Level B harassment) of 1,539. Under the 2011–12 IHA, 172 takes by harassment were observed during the 15 days of observation (Table 1) resulting in a mean of 11 seals disturbed per monitored day. Extrapolating that average out for all 21 days of restoration activity that occurred provides a total estimated take of 231, less than the authorized take (by Level B harassment) of 2,080. These extrapolated estimates may be biased high since monitored days were chosen in part to sample days with activities most likely to disturb seals.

TABLE 1—AGGREGATE HARBOR SEAL COUNTS AND DISTURBANCES FROM TWO HAUL-OUT SITES

Date	Year	Start time	Finish time	Conditions	Pre-activity count	Peak daily count	Disturbance code	Proximity to haul-out (m)	Total daily takes
Nov 1	2010	0930	1630	Overcast, rain	8	18	MS, PP	<10	5

Activity codes: MS: motorized skiff; BC: Barge/Crane; VH: Vibratory hammer; PR: Pile removal; PP: Pile painting; MB: Mobilize barge; DB: Dive boat.

Harbor seals were generally hauled out prior to the work day with the majority of seals at the south haul-out. The construction crew stayed at a distance of over 150 m from the haul-outs when maneuvering back and forth from shore to their barge anchored greater than 150 m offshore from the haul-outs. The seals appeared to be relatively unaffected by the movement of the crane barge at distances greater than 150 m. The majority of incidental harassment takes were caused by the work skiff maneuvering back and forth, despite the distance from the haul-outs. Once the seals entered the water, the majority typically did not return to the haul-out during same-day monitoring effort, although there were never large groups of seals observed in the water after a disturbance. Seals that remained on the haul-out after a disturbance showed no signs of adverse behavior. Given that there have been no dedicated observations at the NRCA during this time of year (i.e., November-February) it is difficult to say whether the decreased number of harbor seals hauled out (as compared with average October counts) was caused by construction activity or seasonal distribution. It is likely, however, that the latter is the case, as November represents the post-breeding and molting period, when harbor seals are less reliant on the haul-outs.

Proposed Mitigation

In order to issue an IHA under Section 101(a)(5)(D) of the MMPA, NMFS must set forth the permissible methods of taking pursuant to such activity, and other means of effecting the least practicable adverse impact on such species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stock for taking for certain subsistence uses.

The DNR has proposed to continue mitigation measures, as stipulated in the previous IHAs, designed to minimize disturbance to harbor seals within the action area in consideration of timing,

location, and equipment use. Foremost, pile, structure, and fill removal would only occur between November and March, outside of harbor seal pupping and molting seasons. Therefore, no impacts to pups from the specified activity during these sensitive time periods would occur. In addition, the following measures would be implemented:

- The DNR would approach the action area slowly to alert seals to their presence from a distance and would begin pulling piles at the farthest location from the log booms used as harbor seal haul-out areas;
- No piles within 30 yd (27 m) of the two main haul-out locations identified in the IHA application would be removed;
- The contractor or observer would survey the operational area for seals before initiating activities and wait until the seals are at a sufficient distance (i.e., 50 ft [15 m]) from the activity so as to minimize the risk of direct injury from the equipment or from a piling or structure breaking free;
- The DNR would require the contractor to initiate a vibratory hammer soft start at the beginning of each work day; and
- The vibratory hammer power pack would be outfitted with a muffler to reduce in-air noise levels to a maximum of 80 dB.

The soft start method involves a reduced energy vibration from the hammer for the first 15 seconds and then a 30-second waiting period. This method would be repeated twice before commencing with operations at full power.

We considered but rejected one additional mitigation measure, the requirement to conduct a sound source verification study. We have in the past required some applicants to conduct such a study to ensure that the production of increased levels of sound is no greater than the level analyzed in estimating incidental take. However, as described previously in this document, source levels produced by the vibratory hammer would be no greater than 80 dB in-air and are conservatively estimated at approximately 155–165 dB underwater. The underwater source levels would likely be lower, as those are measured levels from installation of steel piles. Underwater source levels from this project would likely be less both because the action is extraction, not installation, and because of the pile material (timber rather than steel). Further, seals exposed to sound greater than 120 dB would likely be previously disturbed by the presence of crews and vessels and by vessel noise. We acknowledge that sound source verification would be preferred; however, the applicant is funding-limited, and the significant expenditure required by such a study would result in a correspondingly lesser amount of restoration work able to be completed. The requirement of a sound source verification study would have limited utility for the harbor seals, would be impracticable for the applicant, and would result in less restoration accomplished. Thus, the end result would likely be a long-term net negative for the harbor seals considered in this document.

We have carefully evaluated the applicant's mitigation measures as proposed and considered their effectiveness in past implementation to preliminarily determine whether they are likely to effect the least practicable adverse impact on the affected marine mammal species and stocks and their habitat. Our evaluation of potential measures includes consideration of the following factors in relation to one another: (1) The manner in which, and the degree to which, the successful implementation of the measure is expected to minimize adverse impacts to marine mammals, (2) the proven or likely efficacy of the specific measure to minimize adverse impacts as planned; (3) the practicability of the measure for applicant implementation, including consideration of personnel safety, and practicality of implementation.

Injury, serious injury, or mortality to pinnipeds could likely only result from startling animals inhabiting the haul-out into a stampede reaction. Even in the event that such a reaction occurred, it is unlikely that it would result in injury, serious injury, or mortality, as the activities would occur outside of the pupping season, and access to the water from the haul-outs is relatively easy and unimpeded. However, DNR has proposed to approach haul-outs gradually from a distance, and would begin daily work at the farthest distance from the haul-out in order to eliminate the possibility of such events. During the previous years of work under our authorization, implementation of similar mitigation measures has resulted in no known injury, serious injury, or mortality (other than one event considered atypical and outside the scope of the mitigation measures considered in relation to disturbing seals from the haul-outs). Based upon the DNR's record of management in the NRCA, as well as information from monitoring DNR's implementation of the improved mitigation measures as prescribed under the previous IHAs, we have preliminarily determined that the proposed mitigation measures provide the means of effecting the least practicable adverse impacts on marine mammal species or stocks and their habitat.

Proposed Monitoring and Reporting

In order to issue an ITA for an activity, Section 101(a)(5)(D) of the MMPA states that we must set forth ''requirements pertaining to the monitoring and reporting of such taking''. The MMPA implementing regulations at 50 CFR 216.104 (a)(13) indicate that requests for IHAs must include the suggested means of accomplishing the necessary monitoring and reporting that will result in increased knowledge of the species and of the level of taking or impacts on populations of marine mammals that are expected to be present.

DNR's proposed monitoring plan adheres to protocols already established for Woodard Bay to the maximum extent practical for the specified activity. Monitoring of both the north and south haul-outs would occur for a total of 15 work days, during the first 5 days of project activities, when the contractors are mobilizing and starting use of the vibratory hammer; during 5 days when activities are occurring closest to the haul-out areas; and during 5 additional days, to include days when fill removal is occurring in Woodard Bay. It is not expected that Woodard Bay fill removal would result in seal disturbance; however, the stipulation that monitoring be conducted while this activity occurs is intended to ensure that such is the case. Monitoring of both haul-outs would be performed by at least one observer. The observer would (1) be on-site prior to crew and vessel arrival to determine the number of seals present pre-disturbance; (2) maintain a low profile during this time to minimize disturbance from monitoring; and (3) conduct monitoring beginning 30 minutes prior to crew arrival, during pile removal activities, and for 30 minutes after crew leave the site.

The observer would record incidental takes (i.e., numbers of seals flushed from the haul-out). This information would be determined by recording the number of seals using the haul-out on each monitoring day prior to the start of restoration activities and recording the number of seals that flush from the haul-out or, for animals already in the water, display adverse behavioral reactions to vibratory extraction. A description of the disturbance source, the proximity in meters of the disturbance source to the disturbed animals, and observable behavioral reactions to specific disturbances would

also be noted. In addition, the observer would record:

- The number of seals using the haul-out on each monitoring day prior to the start of restoration activities for that day;
- Seal behavior before, during and after pile and structure removal;
- Monitoring dates, times and conditions;
- Dates of all pile and structure removal activities; and
- After correcting for observation effort, the number of seals taken over the duration of the habitat restoration project.

Within 30 days of the completion of the project, DNR would submit a monitoring report that would include a summary of findings and copies of field data sheets and relevant daily logs from the contractor.

We considered but rejected an expanded monitoring plan that would require DNR to conduct monitoring as described but for every day of construction. We do not believe that monitoring need be conducted at all times during this low-level activity as there is no potential for serious injury or mortality and the probability of an animal being physically injured from the equipment is extremely low if not discountable. In addition, no other marine mammal species are likely to be present within the action area, and are therefore not likely to be affected by DNR's activities. Similar to scientific research studies, when correcting for effort, the DNR should be able to adequately determine the number of animals taken and impacts of the project on marine mammals based on the proposed monitoring plan. Should extreme reactions of seals occur (e.g., apparent abandonment of the haul-out) at any time during the project, DNR will stop removal activities and consult with us. However, as described in this notice, based on previous scientific disturbance studies at NRCA, extreme reactions are not anticipated. Finally, as described previously, funding is limited for DNR's important restoration work, requiring a balance between the level of monitoring that is necessary to adequately characterize disturbance of harbor seals and the significant funding required to implement monitoring. We feel that the proposed monitoring plan strikes the proper balance.

Estimated Take by Incidental Harassment

As described previously in this document, annual seal counts in Woodard Bay end by October. Seals utilize haul-out habitat from spring or summer until approximately October for breeding, pupping, and molting. After October, numbers of individuals at the haul-outs are expected to decline throughout the winter. From 2006 to 2009, October counts averaged 171 and ranged between 79 and 275 (Lambourn, 2010).

Under the previous IHAs, seals were monitored for 29 days during November and December of 2010 and 2011. In 2010, total peak counts ranged from 0 to 127 and averaged 52, while total peak counts in 2011 ranged from 0 to 77 and averaged 31 (Oliver and Calambokidis, 2011, 2012), confirming that seal numbers decline after October. It is unlikely that the fill removal operations taking place in Woodard Bay would result in seal disturbance, as they would be shielded by land from the harbor seal haul-outs and would have no associated vessel activity. DNR proposes that the estimated 20 days of pile and structure removal activity, as well as all fill removal activity occurring in Chapman Bay, may potentially result in incidental harassment of harbor seals. Using the average count from November-December 2010–11 (42) and the estimated number of total days of activity as described here (40) the result is an estimated incidental take of 1,680 harbor seals (40 days x 42 seals per day). We consider this to be a highly conservative estimate in comparison with the estimated actual take of 875 seals from 2010 and 231 seals from 2011, which is nonetheless based upon the best available information.

Negligible Impact and Small Numbers Analysis and Determination

We have defined 'negligible impact' in 50 CFR 216.103 as ''* * * an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.'' In determining whether or not authorized incidental take will have a negligible impact on affected species stocks, we consider a number of criteria regarding the impact of the proposed action, including the number, nature, intensity, and duration of Level B harassment take that may occur. Although DNR's restoration activities may harass pinnipeds hauled out in Woodard Bay, impacts are occurring to a small, localized group of animals. No mortality or injury is anticipated or proposed for authorization, nor will the proposed action result in long-term impacts such as permanent abandonment of the haul-out. Seals will likely become alert or, at most, flush into the water in reaction to the presence of crews and equipment. However, seals have been observed as becoming habituated to physical presence of work crews, and quickly re-inhabit haul-outs upon cessation of stimulus. In addition, the proposed restoration actions may provide improved habitat function for seals, both indirectly through a healthier prey base and directly through restoration and maintenance of man-made haul-out habitat. No impacts would be expected at the population or stock level.

No pinniped stocks known from the action area are listed as threatened or endangered under the ESA or determined to be strategic or depleted under the MMPA. Recent data suggests that harbor seal populations have reached carrying capacity.

Although the estimated take of 1,680 is 11 percent of the estimated population of 14,612 for the Washington Inland Waters stock of harbor seals, the number of individual seals harassed will be lower, with individual seals likely harassed multiple times. In addition, although the estimated take is based upon the best scientific information available, we consider the estimate to be highly conservative. For similar restoration activities in 2010–11, estimated actual take was much lower (875 seals over 35 work days in 2010 and 231 seals over 21 work days in 2011).

Mitigation measures would minimize onset of sudden and potentially dangerous reactions and overall disturbance. In addition, restoration work is not likely to affect seals at both haul-outs simultaneously, based on location of the crew and barge. Further, although seals may initially flush into the water, based on previous disturbance studies and maintenance activity at the haul-outs, the DNR expects seals will quickly habituate to piling and structure removal operations. For these reasons no long term or permanent abandonment of the haul-out is anticipated. Much of the work proposed for 2012–13 consists of fill removal, which does not require in-water work or vessel support, and is largely located in Woodard Bay, which is shielded from the haul-out locations by land. The proposed action is not anticipated to result in injury, serious injury, or mortality to any harbor seal. The DNR would not conduct habitat restoration operations during the pupping and molting season; therefore, no pups would be affected by the proposed action and no impacts to any seals would occur as a result of the specified activity during these sensitive time periods.

Based on the foregoing analysis, behavioral disturbance to pinnipeds in Woodard Bay would be of low intensity

and limited duration. To ensure minimal disturbance, DNR would implement the mitigation measures described previously, which we have preliminarily determined will serve as the means for effecting the least practicable adverse effect on marine mammal stocks or populations and their habitat. We preliminarily find that DNR's restoration activities would result in the incidental take of small numbers of marine mammals, and that the requested number of takes will have no more than a negligible impact on the affected species and stocks.

Impact on Availability of Affected Species for Taking for Subsistence Uses

There are no relevant subsistence uses of marine mammals implicated by this action.

Endangered Species Act (ESA)

There are no ESA-listed marine mammals found in the action area; therefore, no consultation under the ESA is required.

National Environmental Policy Act (NEPA)

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), as implemented by the regulations published by the Council on Environmental Quality (40 CFR parts 1500–1508), and NOAA Administrative Order 216–6, NMFS prepared an Environmental Assessment (EA) to consider the direct, indirect and cumulative effects to the human environment resulting from issuance of an IHA to DNR. NMFS signed a Finding of No Significant Impact on October 27, 2010. NMFS has reviewed the proposed application and preliminarily determined that there are no substantial changes to the proposed action or new environmental impacts or concerns. Therefore, NMFS has determined that a new or supplemental EA or Environmental Impact Statement is likely unnecessary. Before making a final determination in this regard, NMFS will review public comments and information submitted by the public and others in response to this notice. The EA referenced above is available for review at *http://www.nmfs.noaa.gov/pr/permits/incidental.htm.*

Proposed Authorization

As a result of these preliminary determinations, NMFS proposes to authorize the take of marine mammals incidental to DNR's restoration activities, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.

Dated: July 25, 2012.

Helen M. Golde,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–BA75

Atlantic Highly Migratory Species; Electronic Dealer Reporting System Workshop

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public workshops.

SUMMARY: On June 28, 2011, NMFS published a proposed rule that considered requiring, among other things, Federal Atlantic swordfish, shark, and tunas dealers (except for dealers reporting Atlantic bluefin tuna) to report commercially-harvested Atlantic sharks, swordfish, and bigeye, albacore, yellowfin, and skipjack (BAYS) tunas through one centralized electronic reporting system. This electronic reporting system will allow dealers to submit Atlantic sharks, swordfish, and BAYS tuna data on a more real-time basis and more efficiently, which will reduce duplicative data submissions from different regions. We proposed to delay the effective date of the electronic reporting requirements until 2013 in order to give sufficient time for dealers to adjust to implementation of the new system and the additional requirements. On June 29, 2012, we announced the date and location for nine upcoming workshops in the Caribbean, Gulf of Mexico, and Atlantic area to introduce the new reporting system to Highly Migratory Species (HMS) dealers. In this notice, we announce the date and location for an additional training workshop in the Caribbean.

DATES: The additional training workshop for the new HMS electronic dealer system will be held on August 29, 2012, from 1:30 to 4:30 p.m. See **SUPPLEMENTARY INFORMATION** for additional details.

ADDRESSES: The training workshop will be held in St. Thomas, United States Virgin Islands (U.S.V.I.) at the following address: Department of Planning and Natural Resources, Office of the Commissioner, 8100 Lindberg Bay, Suite #61, Cyril E. King Airport, Terminal Bldg., Second Floor, St. Thomas, U.S.V.I., 00802. See **SUPPLEMENTARY INFORMATION** for additional details.

FOR FURTHER INFORMATION CONTACT: Delisse Ortiz or Karyl Brewster-Geisz at (301) 427–8503 (phone); or Jackie Wilson at (240) 338–3936, or (301) 713–1917 (fax); or *http://www.nmfs.noaa.gov/sfa/hms/index.htm*.

SUPPLEMENTARY INFORMATION: Atlantic HMS are managed under the dual authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1801 *et seq.,* and the Atlantic Tunas Convention Act, 16 U.S.C. 971 *et seq.* Under the Magnuson-Stevens Act, NMFS must ensure consistency with the National Standards and manage fisheries to maintain optimum yield, rebuild overfished fisheries, and prevent overfishing. Atlantic Tunas Convention Act authorizes the Secretary of Commerce to promulgate regulations, as may be necessary and appropriate, to implement the recommendations adopted by the International Commission for the Conservation of Atlantic Tunas. The authority to issue regulations under Magnuson-Stevens Act and Atlantic Tunas Convention Act has been delegated from the Secretary to the Assistant Administrator for Fisheries, NOAA. The implementing regulations for Atlantic HMS are at 50 CFR part 635.

Background

The current regulations and infrastructure of the Atlantic HMS quota-monitoring systems result in a delay of several weeks or more before NMFS receives dealer data. This can affect management and monitoring of small Atlantic HMS quotas and short fishing seasons. As such, on June 28, 2011 (76 FR 37750), we published a proposed rule in the **Federal Register** that considered requiring, among other things, Federal Atlantic swordfish, shark, and tunas dealers (except for dealers reporting Atlantic bluefin tuna) to report commercially-harvested Atlantic sharks, swordfish, and BAYS tunas through one centralized electronic reporting system. Under this new system, dealers would submit HMS data electronically (instead of in a paper format) and include additional information that is necessary for management of HMS (e.g., vessel and logbook information). The electronic submission of data will eliminate the delay associated with mailing in hardcopy reports. In this manner, HMS landings data will be submitted on a more real-time basis, allowing for timely

and efficient data collection for management of Atlantic HMS.

In order to give sufficient time for dealers to adjust to implementation of the new system and the additional requirements, we proposed delaying implementation of the new HMS electronic reporting system for all federally-permitted HMS dealers until 2013. Additionally, we decided to conduct outreach to HMS dealers to train them how to use the new system and help ease the transition from the current paper format to the new HMS electronic reporting system. On December 14, 2011, we conducted an initial training workshop for HMS dealers in St. Thomas, U.S.V.I. On June 29, 2012, we announced the date and location for nine upcoming workshops in the Caribbean, Gulf of Mexico, and Atlantic area to introduce the new reporting system to HMS dealers. In this notice, we announce the date and location for an additional training workshop in St. Thomas, U.S.V.I. Future training workshops will be held throughout the Northeast, Mid-Atlantic and Southeast regions at a later date and will be announced in a future notice.

These workshops will be physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Delisse Ortiz at (301) 425–8503, or Jackie Wilson at (240) 338–3936, at least 7 days prior to the workshop date. The public is reminded that NMFS expects participants at the workshop to conduct themselves appropriately. At the beginning of the workshop, a representative of NMFS will explain the ground rules (e.g., alcohol is prohibited from the hearing room; each attendee will have an opportunity to ask questions; and attendees should not interrupt one another). Attendees are expected to respect the ground rules; if they do not, they will be asked to leave the workshop.

Authority: 16 U.S.C, 1801 *et seq.*

Dated: July 25, 2012.

James P. Burgess,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 12–C0008]

Burlington Coat Factory Warehouse Corporation, Provisional Acceptance of a Settlement Agreement and Order

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: It is the policy of the Commission to publish settlements which it provisionally accepts under the Consumer Product Safety Act in the **Federal Register** in accordance with the terms of 16 CFR 1118.20(e). Published below is a provisionally accepted Settlement Agreement with Burlington Coat Factory Warehouse Corporation, containing a civil penalty of $1,500,000.00, within twenty (20) days of service of the Commission's final Order accepting the Settlement Agreement.

DATES: Any interested person may ask the Commission not to accept this agreement or otherwise comment on its contents by filing a written request with the Office of the Secretary by August 14, 2012.

ADDRESSES: Persons wishing to comment on this Settlement Agreement should send written comments to the Comment 12–C0008, Office of the Secretary, Consumer Product Safety Commission, 4330 East West Highway, Room 820, Bethesda, Maryland 20814–4408.

FOR FURTHER INFORMATION CONTACT: Seth B. Popkin, Lead Trial Attorney, Division of Compliance, Office of the General Counsel, Consumer Product Safety Commission, 4330 East West Highway, Bethesda, Maryland 20814–4408; telephone (301) 504–7612.

SUPPLEMENTARY INFORMATION: The text of the Agreement and Order appears below.

Dated: July 25, 2012.

Todd A. Stevenson,

Secretary.

UNITED STATES OF AMERICA

CONSUMER PRODUCT SAFETY COMMISSION

In the Matter of Burlington Coat Factory Warehouse Corporation

CPSC Docket No. *12–C0008*

Settlement Agreement

1. In accordance with the Consumer Product Safety Act, 15 U.S.C. §§ 2051–2089 (''CPSA''), and 16 CFR § 1118.20, Burlington Coat Factory Warehouse Corporation (''Burlington'') and staff (''Staff'') of the U.S. Consumer Product Safety Commission (''Commission'') enter into this Settlement Agreement (''Agreement''). The Agreement and the incorporated attached Order (''Order'') resolve Staff's allegations set forth below.

Parties

2. Staff is staff of the Commission, an independent federal regulatory agency established pursuant to, and responsible for the enforcement of, the CPSA.

3. Burlington is a corporation, organized and existing under the laws of Delaware, with its principal offices located in Burlington, New Jersey.

Staff Allegations

4. On multiple occasions and during various periods from November 2003 to January 2012, Burlington and its subsidiaries sold and/or held for sale various styles, models, and quantities of children's upper outerwear products with drawstrings at the neck, including, but not limited to, the following: Liberty Apparel Company, Inc.—Jewel hooded sweatshirts; Jason Evans Associates, LLC—Bay Trading hooded sweatshirts and jackets; Koman Sportswear Manufacturing Corporation—hooded sweatshirts and jackets; Fashion Options, Inc.—Beverly Hills Polo Club hooded sweatshirts; Allura Imports, Inc.—Major Diva hooded sweatshirts; Baycreek, Inc.—Attitude Gold hooded sweatshirts; Franshaw, Inc.—Blue Heart and Just a Girl hooded sweatshirts; Bobens Trading Company, Inc.—Old Skool hooded sweatshirts; Weeplay Kids, LLC—Candy Queen and AKDMKS hooded sweatshirts; Ten West Apparel, Inc.—hooded jackets; Brand Evolution LLC—All Over Locks, All Over Skaters, and Rock Mask Hoody hooded sweatshirts; Regaliti, Inc.—Betty Blue hooded jackets; Byer California—jackets; Haselson International Trading, Inc.—Kani Gold and Roadblock hooded sweatshirts; Bubblegum USA—hooded jackets; North-Sportif, Inc.—hooded jackets; Five Star Apparel—hooded jackets; Trendset Originals LLC—Shampoo hooded jackets; Hind Fashions, Inc.—Hind leather and Lil Phat hooded jackets; Lollytogs, Ltd.—Rim Rocka hooded sweatshirts; S. Rothschild & Company, Inc.—wool coats; AJS Group LLC—Apple Bottom hooded jackets; Millennium Apparel Group Inc.—Disney Winnie the Pooh hooded jackets; and Winco USA, Inc.—Sergio Benini hooded jackets. The products identified in this paragraph are collectively referred to herein as ''Garments.''

5. Burlington sold the Garments, and/or held the Garments for sale, to consumers.

6. The Garments are ''consumer product[s],'' and, at all relevant times, Burlington was a ''retailer'' of those consumer products, which were ''distributed in commerce,'' as those terms are defined in CPSA sections 3(a)(5), (8), and (13), 15 U.S.C. § 2052(a)(5), (8), and (13).

7. In February 1996, Staff issued the Guidelines for Drawstrings on Children's Upper Outerwear (''Guidelines'') to help prevent children from strangling or entangling on neck and waist drawstrings. The Guidelines state that drawstrings can cause, and have caused, injuries and deaths when they catch on items such as playground equipment, bus doors, or cribs. In the Guidelines, Staff recommends that no children's upper outerwear in sizes 2T to 12 be manufactured or sold to consumers with hood and neck drawstrings.

8. In June 1997, ASTM adopted a voluntary standard (ASTM F1816–97) incorporating the Guidelines. The Guidelines state that firms should be aware of the hazards associated with drawstrings and should ensure that garments they sell conform to the voluntary standard.

9. On May 19, 2006, the Commission posted on its Web site a letter from the Commission's Director of the Office of Compliance to manufacturers, importers, and retailers of children's upper outerwear. The letter urges them to make certain that all children's upper outerwear sold in the United States complies with ASTM F1816–97. The letter states that Staff considers children's upper outerwear with drawstrings at the hood or neck area to be defective and to present a substantial risk of injury to young children under Federal Hazardous Substances Act (''FHSA'') section 15(c), 15 U.S.C. § 1274(c). The letter also references the CPSA's section 15(b) (15 U.S.C. § 2064(b)) reporting requirements.

10. Staff provided Burlington with multiple direct notifications of the hazards associated with drawstrings on children's upper outerwear.

11. Burlington's distribution in commerce of the Garments did not comply with the Guidelines or ASTM F1816–97, failed to comport with Staff's May 2006 defect notice, and posed strangulation hazards to children.

12. Burlington informed the Commission that there had been no reported incidents or injuries associated with the Garments.

13. The Commission, in cooperation with Burlington and/or other firms that were the Garments' manufacturers, importers, or distributors, announced recalls of the Garments.

14. Based in part on information available through the sources set forth in paragraphs 7 through 10, Burlington had presumed and actual knowledge that the Garments distributed in commerce posed strangulation hazards and presented substantial risks of injury to children under FHSA section 15(c)(1), 15 U.S.C. § 1274(c)(1). Burlington obtained information that reasonably supported the conclusion that the Garments contained defects that could create substantial product hazards or that the Garments created unreasonable risks of serious injury or death. Pursuant to CPSA sections 15(b)(3) and (4), 15 U.S.C. § 2064(b)(3) and (4), Burlington was required to inform the Commission immediately of these defects and risks.

15. Burlington knowingly and repeatedly failed to inform the Commission immediately about the Garments, as required by CPSA sections 15(b)(3) and (4), 15 U.S.C. § 2064(b)(3) and (4), and as the term ''knowingly'' is defined in CPSA section 20(d), 15 U.S.C. § 2069(d). These knowing failures violated CPSA section 19(a)(4), 15 U.S.C. § 2068(a)(4). Pursuant to CPSA section 20, 15 U.S.C. § 2069, these knowing failures subjected Burlington to civil penalties.

16. On repeated occasions from in or about September 2008 to January 2012, Burlington offered Garments for sale, sold Garments, and/or otherwise distributed Garments in commerce that were subject to voluntary corrective actions taken by the Garments' manufacturers in consultation with the Commission. The Commission had notified the public of those voluntary corrective actions.

17. Burlington knowingly engaged in the acts alleged in paragraph 16, as the term ''knowingly'' is defined in CPSA section 20(d), 15 U.S.C. § 2069(d). These knowing acts violated CPSA section 19(a)(2)(B), 15 U.S.C. § 2068(a)(2)(B). Pursuant to CPSA section 20, 15 U.S.C. § 2069, these knowing acts subjected Burlington to civil penalties.

18. Staff denies and/or does not concur with Burlington's responsive allegations below.

Burlington Responsive Allegations

19. Burlington denies Staff's allegations above, including but not limited to any claim that Burlington failed to timely report to the Commission the sale or distribution of any children's upper outerwear products with drawstrings pursuant to § 15(b) of the CPSA, or that Burlington knowingly offered Garments for sale, knowingly sold Garments, and/or otherwise knowingly distributed Garments in commerce that were subject to voluntary corrective actions.

20. Burlington enters into the Agreement to settle this matter without the expense of litigation. Burlington enters into the Agreement and agrees to pay the amount referenced below in compromise of disputed and unproven allegations. Burlington's entering into the Agreement is not an admission of liability of any kind, whether legal or factual.

21. Burlington did not manufacture the Garments. It purchased them from vendors and other suppliers. Consistent with practice in the retail industry, Burlington contractually required the Garment vendors to supply products that complied with all federal, state, and local laws, regulations, and standards, and relied on its suppliers to provide compliant products, as the suppliers were in the best position to know and understand the many legal requirements that were or potentially were applicable to their products.

22. Since the Commission first issued the Guidelines in 1996, Burlington's children's apparel purchasing policy has prohibited Burlington's apparel buyers from purchasing children's upper outerwear with drawstrings. Prior to 2009, Burlington's management had procedures in place that it reasonably believed prevented the purchase of children's upper outerwear products with drawstrings. Upon learning in 2009 that, despite such procedures, certain Garments had been discovered in Burlington's stores, Burlington undertook an extensive manual audit of all children's upper outerwear in all of its stores to determine whether it had unknowingly purchased other products subject to the Guidelines. This audit was a massive undertaking, as Burlington's personnel in all of its approximately 450 stores at that time had to visually inspect all items of children's upper outerwear, and the Guidelines and ASTM standard contain ambiguities that made it difficult to determine whether certain items failed to comply.

23. Prior to the audit, Burlington's product compliance and safety personnel and children's apparel buyers had no knowledge, whether actual or constructive, that the Garments actually supplied by Burlington's suppliers contained drawstrings. Burlington promptly notified the Commission pursuant to § 15(b) of the CPSA upon discovering as a result of the audit that it had purchased and sold many of the Garments.

24. Burlington is unaware of any incidents or injuries associated with the Garments.

Agreement of the Parties

25. Under the CPSA, the Commission has jurisdiction over this matter and over Burlington.

26. The parties enter into the Agreement for settlement purposes only. The Agreement does not constitute an admission by Burlington, or a determination by the Commission, that Burlington knowingly violated the CPSA.

27. The Agreement is a full and complete resolution between Staff and Burlington, and its parents, shareholders, divisions, subdivisions, subsidiaries, partners, sister companies and their successors and assigns of all claims for civil penalties that have been or could have been asserted based on the facts contained in Staff's allegations above, with regard to the failure to report the Garments or sale of the Garments after corrective action.

28. In settlement of Staff's allegations, Burlington shall pay a civil penalty in the amount of one million five hundred thousand dollars ($1,500,000.00). The civil penalty shall be paid within twenty (20) calendar days of service of the Commission's final Order accepting the Agreement. The payment shall be made via www.pay.gov.

29. Burlington agrees that it will not seek or accept, directly or indirectly, indemnification, reimbursement, insurance, or any other form of compensation or payment, including, but not limited to, cash, account credit, or set-off, from any vendor or supplier from which Burlington acquired the Garments, or from any other firm or person, for the civil penalty that Burlington agrees and is ordered to pay pursuant to the Agreement and Order.

30. Upon provisional acceptance of the Agreement, the Agreement shall be placed on the public record and published in the **Federal Register**, in accordance with the procedures set forth in 16 C.F.R. § 1118.20(e). In accordance with 16 C.F.R. § 1118.20(f), if within fifteen (15) calendar days, the Commission does not receive any written request not to accept the Agreement, the Agreement shall be deemed finally accepted on the sixteenth (16th) calendar day after the date it is published in the **Federal Register**.

31. Upon the Commission's final acceptance of the Agreement and issuance of the final Order, Burlington knowingly, voluntarily, and completely waives any rights it may have in this matter to the following: (1) An administrative or judicial hearing; (2) judicial review or other challenge or contest of the validity of the Order or of the Commission's actions; (3) a determination by the Commission of whether Burlington failed to comply with the CPSA and its underlying regulations; (4) a statement of findings of fact and conclusions of law; and (5) any claims under the Equal Access to Justice Act.

32. The Commission may publicize the terms of the Agreement and the Order.

33. The Agreement and the Order shall apply to, and be binding upon, Burlington and each of its successors and assigns.

34. The Commission issues the Order under the provisions of the CPSA, and a violation of the Order may subject Burlington and each of its successors and assigns to appropriate legal action.

35. The Agreement may be used in interpreting the Order. Understandings, agreements, representations, or interpretations apart from those contained in the Agreement and the Order may not be used to vary or contradict their terms. The Agreement shall not be waived, amended, modified, or otherwise altered without written agreement thereto executed by the party against whom such waiver, amendment, modification, or alteration is sought to be enforced. The Agreement may be executed in counterparts.

36. If any provision of the Agreement and the Order is held to be illegal, invalid, or unenforceable under present or future laws effective during the terms of the Agreement and the Order, such provision shall be fully severable. The balance of the Agreement and the Order shall remain in full force and effect, unless the Commission and Burlington agree that severing the provision materially affects the purpose of the Agreement and the Order.

UNITED STATES OF AMERICA

CONSUMER PRODUCT SAFETY COMMISSION

In the Matter of Burlington Coat Factory Warehouse Corporation

CPSC Docket No. *12–C0008*

ORDER

Upon consideration of the Settlement Agreement entered into between Burlington Coat Factory Warehouse Corporation (''Burlington'') and U.S. Consumer Product Safety Commission (''Commission'') staff, and the Commission having jurisdiction over the subject matter and over Burlington, and it appearing that the Settlement Agreement and the Order are in the public interest, it is

Ordered, that the Settlement Agreement be, and hereby is, accepted; and it is

Further ordered, that Burlington shall pay a civil penalty in the amount of one million five hundred thousand dollars ($1,500,000.00) within twenty (20) calendar days of service of the Commission's final Order accepting the Agreement. The payment shall be made via *www.pay.gov.* Upon the failure of Burlington to make the foregoing payment when due, interest on the unpaid amount shall accrue and be paid by Burlington at the federal legal rate of interest set forth at 28 U.S.C. § 1961(a) and (b).

Provisionally accepted and provisional Order issued on the *25th* day of *July,* 2012.

By Order of the Commission:

_____

Todd A. Stevenson,
Secretary, U.S. Consumer Product Safety Commission.

DEPARTMENT OF EDUCATION

Application for New Awards; Charter Schools Program (CSP)—Charter School Exemplary Collaboration Awards

AGENCY: Office of Innovation and Improvement, Department of Education.

ACTION: Notice.

Overview Information

Charter Schools Program (CSP)—Charter School Exemplary Collaboration Awards

Notice inviting applications for new awards for fiscal year (FY) 2012.

Catalog of Federal Domestic Assistance (CFDA) Number: 84.282P.

DATES: *Applications Available:* July 30, 2012.

Date of Pre-Application Webinar: August 6, 2012 from 2:30 p.m. to 4:30 p.m.

Deadline for Transmittal of Applications: August 29, 2012.

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The purpose of the Charter Schools Program (CSP) is to increase national understanding of the charter schools model by—

(1) Providing financial assistance for the planning, program design, and initial implementation of charter schools;

(2) Evaluating the effects of charter schools, including the effects on students, student academic achievement, staff, and parents;

(3) Expanding the number of high-quality charter schools available to students across the Nation; and

(4) Encouraging the States to provide support to charter schools for facilities financing in an amount that is more commensurate with the amount States have typically provided for traditional public schools.

The purpose of the Collaboration Awards competition (CFDA 84.282P) is to encourage high-quality public charter schools (as defined in this notice) to partner with non-chartered public schools and non-chartered LEAs to share and transfer best educational and operational practices, and to disseminate information about such practices. By promoting strong partnerships and supporting the dissemination of information about the activities carried out through these partnerships, these Collaboration Awards should facilitate the exchange of best practices between public charter schools, non-chartered public schools, and non-chartered LEAs; and help the United States Department of Education (Department) identify and publicize successful collaborations. The Collaboration Awards competition is designed to encourage public charter schools, non-chartered public schools, and non-chartered LEAs to share resources and responsibilities; build trust and teamwork; boost academic excellence; and provide students and their parents with a range of effective educational options. The Department, through the Collaboration Awards competition, aims to increase national understanding of the charter school model.

Priority: This notice includes one competitive preference priority from the notice of final supplemental priorities and definitions for discretionary grant programs published in the **Federal Register** on December 15, 2010 (75 FR 78486), and corrected on May 12, 2011 (76 FR 27637).

Competitive Preference Priority: For FY 2012 and any subsequent year in which we make awards based on the list of unfunded applicants from this competition, this priority is a competitive preference priority. Under 34 CFR 75.105(c)(2)(i) we award up to 5 points to an applicant, depending on how well the applicant meets this competitive preference priority.

Note: In order to receive preference under this competitive preference priority, the applicant must specify that it is responding to this competitive preference priority.

Competitive Preference Priority 1—-Turning Around Persistently Lowest-Achieving Schools (up to 5 points).

To meet this priority, projects must be designed to address one or more of the following priority areas:

(a) Improving student achievement (as defined in this notice) in persistently lowest-achieving schools (as defined in this notice).

(b) Increasing graduation rates (as defined in this notice) and college enrollment rates for students in persistently lowest-achieving schools (as defined in this notice).

(c) Providing services to students enrolled in persistently lowest-achieving schools.

Note: For purposes of this priority, the Department considers schools that are identified as Tier I or Tier II schools under the School Improvement Grants Program (see 75 FR 66363) as part of a State's approved FY 2009 or FY 2010 applications to be persistently lowest-achieving schools. A list of these Tier I and Tier II schools can be found on the Department's Web site at *http://www2.ed.gov/programs/sif/index.html.*

Definitions: In addition to the definitions in section 5210 of the Elementary and Secondary Education Act of 1965, as amended (ESEA), which include the definition of ''charter school,'' the following definitions apply to this Collaboration Awards competition. These definitions are from the notice of final supplemental priorities and definitions for discretionary grant programs, published in the **Federal Register** on December 15, 2010 (75 FR 78486), and corrected on May 12, 2011 (76 FR 27637); and from the final definitions, requirements, and selection criteria for this program, published elsewhere in this issue of the **Federal Register**.

Collaboration means the activities of a partnership in which two or more organizations or entities work together to accomplish a common goal, which may involve sharing or transferring best practices or strategies.

Graduation rate is the four-year or extended-year adjusted cohort graduation rate as defined by 34 CFR 200.19(b)(1) and may also include an extended-year adjusted cohort graduation rate consistent with 34 CFR 200.19(b)(1)(v) if the State in which the proposed project is implemented has been approved by the Secretary to use such a rate under Title I of the ESEA.

High-quality charter school means a charter school (as defined in section 5210(1) of the ESEA) that has no significant compliance issue (as defined in this notice) and shows evidence of strong academic results for the past three years (or over the life of the school if the school has been open for fewer than three years), based on the following factors:

(1) Increased student achievement (as defined in this notice) and attainment for all students, including, as applicable, educationally disadvantaged students served by the charter school.

(2) Either—

(i) Demonstrated success in closing historic achievement gaps for the subgroups of students described in section 1111(b)(2)(C)(v)(II) of the ESEA at the charter school; or

(ii) No significant achievement gaps between any of the subgroups of students described in section 1111(b)(2)(C)(v)(II) of the ESEA at the charter school and significant gains in student achievement (as defined in this notice) with all populations of students served by the charter school.

(3) Results (including, where applicable and available, performance on statewide tests, attendance and retention rates, high school graduation rates, college attendance rates, and college persistence rates) for low-income and other educationally disadvantaged students served by the charter school that are above the average achievement results for such students in the State.

Persistently lowest-achieving school means, as determined by the State: (i) Any Title I school in improvement, corrective action, or restructuring that (a) is among the lowest-achieving five percent of Title I schools in improvement, corrective action, or

restructuring or the lowest-achieving five Title I schools in improvement, corrective action, or restructuring in the State, whichever number of schools is greater; or (b) is a high school that has had a graduation rate as defined in 34 CFR 200.19(b) that is less than 60 percent over a number of years; and (ii) any secondary school that is eligible for, but does not receive, Title I funds that (a) is among the lowest-achieving five percent of secondary schools or the lowest-achieving five secondary schools in the State that are eligible for, but do not receive, Title I funds, whichever number of schools is greater; or (b) is a high school that has had a graduation rate as identified in 34 CFR 200.19(b) that is less than 60 percent over a number of years.

To identify the persistently lowest-achieving schools, a State must take into account both: (i) The academic achievement of the ''all students'' group in a school in terms of proficiency on the State's assessments under section 1111(b)(3) of the ESEA in reading/language arts and mathematics combined; and (ii) the school's lack of progress on those assessments over a number of years in the ''all students'' group.

Non-chartered local educational agency (LEA) means an LEA that does not qualify as a charter school as defined in section 5210(1) of the ESEA or under State law.

Non-chartered public school means a public school that does not qualify as a charter school under section 5210(1) of the ESEA or under State law.

Significant compliance issue means a violation that did, will, or could lead to the revocation of a school's charter.

Student achievement means—

(a) For tested grades and subjects: (1) A student's score on the State's assessments under the ESEA; and (2) as appropriate, other measures of student learning, such as those described in paragraph (b) of this definition, provided they are rigorous and comparable across schools.

(b) For non-tested grades and subjects: Alternative measures of student learning and performance, such as student scores on pre-tests and end-of-course tests; student performance on English language proficiency assessments; and other measures of student achievement that are rigorous and comparable across schools.

Program Authority: The CSP is authorized under 20 U.S.C. 7221–7221i; CSP national activities are authorized under 20 U.S.C. 7221d.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 76, 77, 79, 80, 81, 82, 84, 86, 97, 98, and 99. (b) The Education Department suspension and debarment regulations in 2 CFR part 3485. (c) The notice of final definitions, requirements, and selection criteria for this program published elsewhere in this issue of the **Federal Register**. (d) The notice of final supplemental priorities and definitions for discretionary grant programs, published in the **Federal Register** on December 15, 2010 (75 FR 78486), and corrected on May 12, 2011 (76 FR 27637).

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian tribes.

Note: The regulations in 34 CFR part 86 apply to institutions of higher education only.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: $500,000.

Contingent upon the availability of funds and the quality of applications, we may make additional awards in FY 2013 from the list of unfunded applicants from this competition.

Estimated Range of Awards: $50,000 to $200,000 per award.

Estimated Number of Awards: 3 to 5.

Note: The Department is not bound by any estimates in this notice.

Project Period: 12 to 24 months.

III. Eligibility Information

1. *Eligible Applicants:*

(a) Eligible applicants must be high-quality charter schools (as defined in this notice) that apply in partnership with at least one non-chartered public school (as defined in this notice) or non-chartered LEA (as defined in this notice) and have the support of the partner(s) to participate in the Collaboration Awards competition in accordance with the requirements in the Application Requirements section of this notice. Other public charter schools that do not qualify as high-quality charter schools may be included in the collaboration so long as: (1) The lead applicant is a high-quality charter school; (2) the lead applicant is separate and distinct from any other charter schools included as partners in the collaboration; and (3) at least one non-chartered public school (as defined in this notice) or non-chartered LEA (as defined in this notice) also is a part of the collaboration.

(b) The partnership must comply with the requirements for group applications set forth in 34 CFR 75.127–75.129.

Note: Only an eligible entity (a high-quality charter school) may apply for a grant or be the fiscal agent for a grant. Thus, neither a non-chartered public school (as defined in this notice) nor a non-chartered LEA (as defined in this notice) is eligible to serve as the lead applicant or fiscal agent for a Collaboration Award. Nor is a public charter school that is not a high-quality charter school eligible to serve as the lead applicant or fiscal agent.

(c) Eligible applicants may not have any significant compliance issues (as defined in this notice), including in the areas of student safety, financial management, and statutory or regulatory compliance.

2. *Cost Sharing or Matching:* This program does not require cost sharing or matching.

IV. Application and Submission Information

1. *Address to Request Application Package:*

Nancy Paulu or Erin Pfeltz, U.S. Department of Education, 400 Maryland Avenue SW., room 4W246, Washington, DC 20202–5970. Emails and telephone numbers: *nancy.paulu@ed.gov* or (202) 205–5392; *erin.pfeltz@ed.gov* or (202) 205–3525.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

Individuals with disabilities can obtain a copy of the application package in an accessible format (e.g., braille, large print, audiotape, or compact disc) by contacting either of the program contact persons listed in this section.

2. *Content and Form of Application Submission:* Requirements concerning the content of an application, together with the forms you must submit, are in the application package for this competition. Additional requirements can be found under the heading, Application Requirements in this document.

Page Limit: The application narrative (Part III of the application) is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. The Secretary strongly encourages applicants to limit Part III to the equivalent of no more than 30 pages, using the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.

• Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).

• Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The page limit does not apply to Part I, the cover sheet; Part II, the budget section, including the narrative budget justification; Part IV, the assurances and certifications; or the one-page abstract, the resumes, the bibliography, or the letters of support. However, you must include all of all of the application narrative in Part III.

3. *Submission of Proprietary Information:* Given the types of projects that may be proposed in an application for the Collaboration Awards competition, your application may include business information that you consider to be proprietary. The Department's regulations define ''business information'' in 34 CFR 5.11.

Note: Because the Department plans to make successful applications and information about their activities available to the public, you may wish to request confidentiality of business information.

Consistent with Executive Order 12600, please designate in your application any information that you feel is exempt from disclosure under Exemption 4 of the Freedom of Information Act. In the appropriate Appendix section of your application, under ''Other Attachments Form,'' please list the page number or numbers on which we can find this information. For additional information please see 34 CFR 5.11(c).

4. *Submission Dates and Times:*

Applications Available: July 30, 2012.

Date of Pre-Application Webinar: The Department will hold a pre-application webinar for prospective applicants on the following date: August 6, 2012 from 2:30 p.m. to 4:30 p.m. Individuals interested in attending the webinar are encouraged to pre-register by emailing their name, organization, and contact information with the subject heading COLLABORATION AWARDS PRE-APPLICATION WEBINAR to Charterschools.ed.gov. There is no registration fee for participating in the webinar.

For further information about the pre-application webinar, contact Nancy Paulu or Erin Pfeltz, U.S. Department of Education, 400 Maryland Avenue SW., room 4W246, Washington, DC 20202–5970. Emails and telephone numbers: *nancy.paulu@ed.gov* or (202) 205–5392; *erin.pfeltz@ed.gov* or (202) 205–3525.

Deadline for Transmittal of Applications: August 29, 2012.

Applications for grants under this program must be submitted electronically using the Grants.gov Apply site (Grants.gov). For information (including dates and times) about how to submit your application electronically, or in paper format by mail or hand delivery if you qualify for an exception to the electronic submission requirement, please refer to section IV. 7. *Other Submission Requirements* of this notice.

We do not consider an application that does not comply with the deadline requirements.

Individuals with disabilities who need an accommodation or auxiliary aid in connection with the application process should contact either of the persons listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice. If the Department provides an accommodation or auxiliary aid to an individual with a disability in connection with the application process, the individual's application remains subject to all other requirements and limitations in this notice.

5. *Intergovernmental Review:* This competition is subject to Executive Order 12372 and the regulations in 34 CFR part 79. However, for this competition, intergovernmental review has been waived so that awards can be made by September 30, 2012, the end of the fiscal year.

6. *Funding Restrictions:* A Collaboration Award recipient must use the grant funds for one or more of the following:

(a) Continuing the collaboration for which it received the award, as described in its grant application;

(b) Modifying the collaboration for which it received the award, as described in the grant application;

(c) Expanding the collaboration for which it received the award by adding additional areas of collaboration, as described in the grant application;

(d) Expanding the collaboration for which it received the award by adding additional partners (i.e., non-chartered public schools (as defined in this notice), non-chartered LEAs (as defined in this notice) or public charter schools that are not high-quality charter schools (as defined in this notice)), as described in the grant application. Collaboration Award recipients also must use a portion of the grant funds to disseminate information about the collaboration activities to other public schools, including public charter schools, non-chartered public schools (as defined in this notice), and non-chartered LEAs (as defined in this notice). All activities carried out under the Collaboration Awards must fall within the scope of authorized activities set forth in section 5205(a) of the ESEA.

We reference other regulations outlining funding restrictions in the Applicable Regulations section in this notice.

7. *Data Universal Numbering System Number, Taxpayer Identification Number, Central Contractor Registry, and System for Award Management:* To do business with the Department of Education, you must—

a. Have a Data Universal Numbering System (DUNS) number and a Taxpayer Identification Number (TIN);

b. Register both your DUNS number and TIN with the Central Contractor Registry (CCR)—and, after July 24, 2012, with the System for Award Management (SAM), the Government's primary registrant database;

c. Provide your DUNS number and TIN on your application; and

d. Maintain an active CCR or SAM registration with current information while your application is under review by the Department and, if you are awarded a grant, during the project period.

You can obtain a DUNS number from Dun and Bradstreet. A DUNS number can be created within one business day.

If you are a corporate entity, agency, institution, or organization, you can obtain a TIN from the Internal Revenue Service. If you are an individual, you can obtain a TIN from the Internal Revenue Service or the Social Security Administration. If you need a new TIN, please allow 2–5 weeks for your TIN to become active.

The CCR or SAM registration process may take five or more business days to complete. If you are currently registered with the CCR, you may not need to make any changes. However, please make certain that the TIN associated with your DUNS number is correct. Also note that you will need to update your registration annually. This may take three or more business days to complete. Information about SAM is available at SAM.gov.

In addition, if you are submitting your application via Grants.gov, you must (1) be designated by your organization as an Authorized Organization Representative (AOR); and (2) register yourself with Grants.gov as an AOR. Details on these steps are outlined at the following Grants.gov Web page: *www.grants.gov/applicants/get_registered.jsp.*

8. *Other Submission Requirements.* Applications for grants under this program must be submitted electronically unless you qualify for an exception to this requirement in accordance with the instructions in this section.

a. Electronic Submission of Applications

Applications for grants under the Exemplary Charter School Collaboration Awards competition, CFDA number 84.282P, must be submitted electronically using the Governmentwide Grants.gov Apply site at *www.Grants.gov.* Through this site, you will be able to download a copy of the application package, complete it offline, and then upload and submit your application. You may not email an electronic copy of a grant application to us.

We will reject your application if you submit it in paper format unless, as described elsewhere in this section, you qualify for one of the exceptions to the electronic submission requirement *and* submit, no later than two weeks before the application deadline date, a written statement to the Department that you qualify for one of these exceptions. Further information regarding calculation of the date that is two weeks before the application deadline date is provided later in this section under *Exception to Electronic Submission Requirement.*

You may access the electronic grant application for CSP at *www.Grants.gov.* You must search for the downloadable application package for this program by the CFDA number. Do not include the CFDA number's alpha suffix in your search (e.g., search for 84.282, not 84.282P).

Please note the following:

• When you enter the Grants.gov site, you will find information about submitting an application electronically through the site, as well as the hours of operation.

• Applications received by Grants.gov are date and time stamped. Your application must be fully uploaded and submitted and must be date and time stamped by the Grants.gov system no later than 4:30:00 p.m., Washington, DC time, on the application deadline date. Except as otherwise noted in this section, we will not accept your application if it is received—that is, date and time stamped by the Grants.gov system—after 4:30:00 p.m., Washington, DC time, on the application deadline date. We do not consider an application that does not comply with the deadline requirements. When we retrieve your application from Grants.gov, we will notify you if we are rejecting your application because it was date and time stamped by the Grants.gov system after 4:30:00 p.m., Washington, DC time, on the application deadline date.

• The amount of time it can take to upload an application will vary depending on a variety of factors, including the size of the application and the speed of your Internet connection. Therefore, we strongly recommend that you do not wait until the application deadline date to begin the submission process through Grants.gov.

• You should review and follow the Education Submission Procedures for submitting an application through Grants.gov that are included in the application package for this program to ensure that you submit your application in a timely manner to the Grants.gov system. You can also find the Education Submission Procedures pertaining to Grants.gov under News and Events on the Department's G5 system home page at *www.G5.gov.*

• You will not receive additional point value because you submit your application in electronic format, nor will we penalize you if you qualify for an exception to the electronic submission requirement, as described elsewhere in this section, and submit your application in paper format.

• You must submit all documents electronically, including all information you typically provide on the following forms: The Application for Federal Assistance (SF 424), the Department of Education Supplemental Information for SF 424, Budget Information—Non-Construction Programs (ED 524), and all necessary assurances and certifications.

• You must upload any narrative sections and all other attachments to your application as files in a PDF (Portable Document) read-only, non-modifiable format. Do not upload an interactive or fillable PDF file. If you upload a file type other than a read-only, non-modifiable PDF or submit a password-protected file, we will not review that material.

• Your electronic application must comply with any page-limit requirements described in this notice.

• After you electronically submit your application, you will receive from Grants.gov an automatic notification of receipt that contains a Grants.gov tracking number. (This notification indicates receipt by Grants.gov only, not receipt by the Department.) The Department then will retrieve your application from Grants.gov and send a second notification to you by email. This second notification indicates that the Department has received your application and has assigned your application a PR/Award number (an ED-specified identifying number unique to your application).

• We may request that you provide us original signatures on forms at a later date.

Application Deadline Date Extension in Case of Technical Issues with the Grants.gov System: If you are experiencing problems submitting your application through Grants.gov, please contact the Grants.gov Support Desk, toll free, at 1–800–518–4726. You must obtain a Grants.gov Support Desk Case Number and must keep a record of it.

If you are prevented from electronically submitting your application on the application deadline date because of technical problems with the Grants.gov system, we will grant you an extension until 4:30:00 p.m., Washington, DC time, the following business day to enable you to transmit your application electronically or by hand delivery. You also may mail your application by following the mailing instructions described elsewhere in this notice.

If you submit an application after 4:30:00 p.m., Washington, DC time, on the application deadline date, please contact the person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice and provide an explanation of the technical problem you experienced with Grants.gov, along with the Grants.gov Support Desk Case Number. We will accept your application if we can confirm that a technical problem occurred with the Grants.gov system and that that problem affected your ability to submit your application by 4:30:00 p.m., Washington, DC time, on the application deadline date. The Department will contact you after a determination is made on whether your application will be accepted.

Note: The extensions to which we refer in this section apply only to the unavailability of, or technical problems with, the Grants.gov system. We will not grant you an extension if you failed to fully register to submit your application to Grants.gov before the application deadline date and time or if the technical problem you experienced is unrelated to the Grants.gov system.

Exception to Electronic Submission Requirement: You qualify for an exception to the electronic submission requirement, and may submit your application in paper format, if you are unable to submit an application through the Grants.gov system because

• You do not have access to the Internet; or

• You do not have the capacity to upload large documents to the Grants.gov system;

and

• No later than two weeks before the application deadline date (14 calendar days or, if the fourteenth calendar day before the application deadline date

falls on a Federal holiday, the next business day following the Federal holiday), you mail or fax a written statement to the Department, explaining which of the two grounds for an exception prevent you from using the Internet to submit your application.

If you mail your written statement to the Department, it must be postmarked no later than two weeks before the application deadline date. If you fax your written statement to the Department, we must receive the faxed statement no later than two weeks before the application deadline date.

Address and mail or fax your statement to: Nancy Paulu or Erin Pfeltz, U.S. Department of Education, 400 Maryland Avenue SW., Room 4W246, Washington, DC 20202–5970. FAX: (202) 205–5630.

Your paper application must be submitted in accordance with the mail or hand delivery instructions described in this notice.

b. Submission of Paper Applications by Mail

If you qualify for an exception to the electronic submission requirement, you may mail (through the U.S. Postal Service or a commercial carrier) your application to the Department. You must mail the original and two copies of your application, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: CFDA Number 84.282P, LBJ Basement Level 1, 400 Maryland Avenue SW., Washington, DC 20202–4260.

You must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary of the U.S. Department of Education.

If you mail your application through the U.S. Postal Service, we do not accept either of the following as proof of mailing:

(1) A private metered postmark.

(2) A mail receipt that is not dated by the U.S. Postal Service.

If your application is postmarked after the application deadline date, we will not consider your application.

Note: The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, you should check with your local post office.

c. Submission of Paper Applications by Hand Delivery

If you qualify for an exception to the electronic submission requirement, you (or a courier service) may deliver your paper application to the Department by hand. You must deliver the original and two copies of your application by hand, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: CFDA Number 84.282P, 550 12th Street SW., Room 7041, Potomac Center Plaza, Washington, DC 20202–4260.

The Application Control Center accepts hand deliveries daily between 8:00 a.m. and 4:30:00 p.m., Washington, DC time, except Saturdays, Sundays, and Federal holidays.

Note for Mail or Hand Delivery of Paper Applications: If you mail or hand deliver your application to the Department—

(1) You must indicate on the envelope and—if not provided by the Department—in Item 11 of the SF 424 the CFDA number, including suffix letter, if any, of the competition under which you are submitting your application; and

(2) The Application Control Center will mail to you a notification of receipt of your grant application. If you do not receive this notification within 15 business days from the application deadline date, you should call the U.S. Department of Education Application Control Center at (202) 245–6288.

V. Application Review Information

1. *Application Requirements:* An applicant for a Collaboration Award must—

(a) Provide a detailed narrative describing (i) the applicant's past or existing collaboration (which may involve more than one partner); (ii) the applicant's proposal to continue, modify, or expand (by adding new areas of collaboration or new partners) the collaboration; and (iii) the applicant's plan to disseminate information about the collaboration (which may include information about best practices) to other public schools, including public charter schools, non-chartered public schools, and non-chartered LEAs. The proposed collaboration may focus on a wide range of areas within the scope of activities authorized under section 5205(a) of the ESEA. The list of potential areas includes, but is not limited to, curriculum and instruction, data management and sharing, organization and management, personnel, facilities, finances, Federal programs, standards, assessments, special education services and access to charter schools by students with disabilities, English learners, student transportation, professional development and training, and school climate.

(b) Provide written assurances from authorized officials of the entities involved in the partnership that all participants—

- Agree to submit an application for an award under the competition and have read, understand, and agree with the application for the competition; and
- Authorize the executive summary or narrative of the application, with proprietary information redacted, to be published on the U.S. Department of Education's Web site (ed.gov), data.ed.gov, the National Charter School Resource Center Web site (charterschoolcenter.org), or any other Web site or publication deemed appropriate by the Secretary;

(c) Submit a partnership agreement that meets the requirements of 34 CFR 75.128(b);

(d) Provide a clear description of the goals and desired outcomes of the proposed collaboration and current or proposed measures that would be used to gauge success in meeting those goals and desired outcomes;

(e) Describe any past, existing, or anticipated obstacles to implementing the collaboration or to disseminating information about the collaboration, and the strategies that were or will be used to overcome those obstacles;

(f) Specify how the award money will be used to implement the collaboration and to disseminate information about the collaboration in accordance with section 5205(a) of the ESEA; and

(g) Specify how the award money will be allocated between the lead applicant and the partner(s) named in the application, including the specific activities that will be carried out by the lead applicant and its partner(s).

2. *Selection Criteria:* The selection criteria for this competition (84.282P) are from the notice of final definitions, requirements, and selection criteria for this program; published elsewhere in this issue of the **Federal Register**; as well as from section 34 CFR 75.210 of EDGAR. The maximum possible score for addressing all of the criteria in this section is 95 points (up to 5 additional points can be awarded under the competitive preference priority). The maximum possible score for each criterion is indicated in parentheses following the criterion.

The Secretary may make awards to the top-rated applications proposing to carry out activities in specific areas of focus (e.g., curriculum and instruction, data management and sharing, organization and management) within the scope of authorized activities under

section 5205(a) of the ESEA. In a particular year, the Secretary may restrict applications to one or more areas of focus. Additionally, in making awards, the Secretary may fund applications out of rank order in order to ensure that the Collaboration Awards are distributed throughout each area of the Nation or a State.

In evaluating an application for a Collaboration Award, the Secretary considers the following criteria:

(a) *Record of and potential for success of collaboration (up to 15 points).*

(1) The extent to which the applicant's past or existing collaboration has improved educational outcomes and operational practices; and

(2) The extent to which the applicant's proposed collaboration and dissemination plan will achieve one or more of the following demonstrable results:

(i) Improved operational practices and productivity among all partners in such areas as financial performance and sustainability, governing board performance and stewardship, and parent and community engagement;

(ii) Improved student achievement (as defined in this notice);

(iii) Improved student attendance and retention, and improved high school graduation rates;

(iv) Improved rates of college matriculation and college graduation;

(v) Improved rates of attendance and graduation from other postsecondary (i.e., non-college) institutions or programs.

(b) *Quality of the lead applicant (up to 15 points).*

(1) The degree, including the consistency over the past three years, to which the applicant has demonstrated success in significantly increasing student achievement (as defined in this notice) and attainment for all students, including, as applicable, educationally disadvantaged students served by the charter school.

(2) Either—

(i) The degree, including the consistency over the past three years, to which the applicant has demonstrated success in closing historic achievement gaps for the subgroups of students described in section 1111(b)(2)(C)(v)(II) of the ESEA at the charter school; or

(ii) The degree, including the consistency over the past three years, to which there have not been significant achievement gaps between any of the subgroups of students described in section 1111(b)(2)(C)(v)(II) of the ESEA at the charter school and to which significant gains in student achievement (as defined in this notice) have been made with all populations of students served by the charter school.

(3) The degree, including the consistency over the past three years, to which the applicant has achieved results (including, where applicable and available, performance on statewide tests, student attendance and retention rates, high school graduation rates, college attendance rates, and college persistence rates) for students from low-income families and other educationally disadvantaged students served by the charter school that are above the average academic achievement results for such students attending other public schools in the State.

(c) *Quality of the project design (up to 15 points).* The extent to which the applicant proposes a high-quality plan to use its Collaboration Award funds to improve educational outcomes and operational practices in public schools, including public charter schools.

(d) *Potential for scalability (up to 15 points).* The extent to which the applicant's proposed collaboration can be replicated or adapted beyond the participating partners by other public schools or LEAs, including public charter schools and charter school LEAs, and sustained over the long-term.

(e) *Innovation (up to 15 points).* The extent to which the applicant demonstrates that its proposed collaboration, as well as its dissemination plan, are either (i) substantially different from other efforts in its area of focus; or (ii) substantially more effective than similar efforts in its area of focus.

(f) *Quality of project personnel (up to 10 points).* The Secretary considers the quality of the personnel who will carry out the proposed project. In determining the quality of project personnel, the Secretary considers the extent to which the applicant encourages applications from persons who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability. In addition, the Secretary considers the following factors:

(i) The qualifications, including relevant training and experience, of the project director or principal investigator; and

(ii) The qualifications, including relevant training and experience, of key project personnel.

(g) *Quality of the management plan (up to 10 points).* The Secretary considers the quality of the management plan for the proposed project. In determining the quality of the management plan for the proposed, the Secretary considers the adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks.

3. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary also requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department of Education (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

4. *Special Conditions:* Under 34 CFR 74.14 and 80.12, the Secretary may impose special conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 34 CFR parts 74 or 80, as applicable; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN). We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the Applicable Regulations section of this notice.

We reference the regulations outlining the terms and conditions of an award in the Applicable Regulations section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to

comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multi-year award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

4. *Performance Measures:* One goal of the CSP is to support the creation and development of a large number of high-quality charter schools (as defined in this notice) that are free from State or local rules that inhibit flexible operation, are held accountable for enabling students to reach challenging State performance standards, and are open to all students. The Secretary has two performance indicators to measure progress toward this goal: (1) The number of high-quality charter schools in operation around the Nation, and (2) the percentage of fourth- and eighth-grade charter school students who are achieving at or above the proficient level on State examinations in mathematics and in reading/language arts. Additionally, the Secretary has established the following measure to examine the efficiency of the CSP: Federal cost per student in implementing a successful school (defined as a school in operation for three or more consecutive years).

5. *Continuation Awards:* The Secretary may make continuation awards under this competition. In making a continuation award, the Secretary may consider, under 34 CFR 75.253, the extent to which a grantee has made ''substantial progress toward meeting the objectives in its approved application.'' This consideration includes the review of a grantee's progress in meeting the targets and projected outcomes in its approved application, and whether the grantee has expended funds in a manner that is consistent with its approved application and budget. In making a continuation grant, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

VII. Agency Contact

FOR FURTHER INFORMATION CONTACT: Nancy Paulu or Erin Pfeltz, U.S. Department of Education, 400 Maryland Avenue SW., Room 4W246, Washington, DC 20202–5970. Emails and telephone numbers: *nancy.paulu@ed.gov* or (202) 205–5392; *erin.pfeltz@ed.gov* or (202) 205–3525.

If you use a TDD or TTY, call the FRS, toll free, at 1–800–877–8339.

VIII. Other Information

Accessible Format: Individuals with disabilities can obtain this document and a copy of the application package in an accessible format (e.g., Braille, large print, audiotape, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: July 25, 2012.

James H. Shelton, III,

Assistant Deputy Secretary for Innovation and Improvement.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Agency Information Collection Extension

AGENCY: U.S. Department of Energy.

ACTION: Submission for Office of Management and Budget (OMB) review; comment request.

SUMMARY: The Department of Energy (DOE) has submitted an information collection request to OMB for extension under the provisions of the Paperwork Reduction Act of 1995. The information collection requests a three-year extension of its Labor Relations collection. The collection requests information from the Department of Energy Management and Operation and Facilities Management Contractors for contract administration, management oversight and cost control. The information collection will assist the Department in evaluating the implementation of the contractors' work force collective bargaining agreements, and apprise the Department of significant labor-management developments at DOE contractor sites. This information is used to ensure that Department contractors maintain good labor relations and retain a workforce in accordance with the terms of their contract and in compliance with statutory and regulatory requirements as identified by contract.

DATES: Comments regarding this collection must be received on or before August 29, 2012. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, please advise the OMB Desk Officer of your intention to make a submission as soon as possible. The Desk Officer may be telephoned at 202–395–4650.

ADDRESSES: Written comments should be sent to the DOE Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10102, 735 17th Street NW., Washington, DC 20503. And to: Eva M. Auman, Attorney-Advisor (Labor), GC–63, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, or by fax at 202–586–0971 or by email to *eva.auman@hq.doe.gov.*

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to: Eva M. Auman, Attorney-Advisor (Labor), GC–63, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, or by fax at 202–586–0971 or by email to *eva.auman@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: This information collection request contains: (1) OMB No. 1910–5143; (2) *Information Collection Request Title:* This information collection was originally titled Legacy Management Labor Relations, but due to the transfer of this function from the Office of Legacy Management to the Office of General

Counsel, the title has been shortened to Labor Relations; (3) *Type of Request:* Renewal; (4) *Purpose:* The proposed collection will request information from the Department of Energy Facilities Management Contractors for contract administration, management oversight and cost control. This information is used to ensure that Department contractors maintain good labor relations and retain a workforce in accordance with the terms of their contract and in compliance with statutory and regulatory requirements as identified by contract. The respondents are Department Management and Operations and Facility Management Contractors; (5) *Annual Estimated Number of Respondents:* 35; (6) *Annual Estimated Number of Total Responses:* 35; (7) *Annual Estimated Number of Burden Hours:* 1.84 per respondent for total of 64.4 per year; (8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* $8,310.80.

Statutory Authority: 42 U.S.C. 7254, 7256.

Issued in Washington, DC, on: July 25, 2012.

Jean S. Stucky,

Assistant General Counsel for Labor and Pension Law, Office of the General Counsel.

[FR Doc. 2012–18496 Filed 7–27–12; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Briefings on Preliminary Findings of 2012 National Electric Transmission Congestion Study

AGENCY: Office of Electricity Delivery and Energy Reliability, Department of Energy (DOE).

ACTION: Notice of upcoming webinars.

SUMMARY: Section 216(a)(1) of the Federal Power Act (FPA) requires the Department of Energy (Department or DOE) to complete a study of electric transmission congestion every three years. DOE previously issued the 2006 and 2009 studies and is currently developing the 2012 study. DOE, as part of the consultation process, will host three webinars in August 2012 to receive input and suggestions concerning the preliminary findings of the study. After the webinars, DOE will release a draft of the study for public comment. After reviewing and considering the comments received, DOE will publish a final version of the study.

DATES: The webinars are open to the public and will be held on three dates in August:

- Tuesday, August 7, from 2:00 to 3:30 p.m. Eastern.
- Thursday, August 16, from 2:00 to 3:30 p.m. Eastern.
- Tuesday, August 21, from 2:00 to 3:30 p.m. Eastern.

ADDRESSES: Those wishing to participate in these webinars should register in advance at this Web site, *http://energy.gov/node/378523* or use the link to the registration available at the Department's Congestion Study Web site, *http://energy.gov/oe/congestion-study-2012*. At these webinars, DOE will set aside time to allow participants to make comments and direct questions to the presenters. Federal law requires DOE to consult with the states in the preparation of the Congestion Study. Accordingly, although stakeholders may participate in any of the webinars, two of these webinars (August 7 and 21) will focus in particular on state officials' comments and concerns. The third Webinar (August 16) will provide an opportunity to discuss the comments and concerns of all stakeholders.

FOR FURTHER INFORMATION CONTACT: David Meyer, DOE Office of Electricity Delivery and Energy Reliability, *david.meyer@hq.doe.gov,* or call 202–586–1411.

SUPPLEMENTARY INFORMATION: The Energy Policy Act of 2005 (Pub. L. 109–58) (EPAct) added several new provisions to the Federal Power Act (16 U.S.C. 824p) (FPA), including FPA section 216. FPA section 216(a) requires the Secretary of Energy to conduct a study of electric transmission congestion (''National Electric Transmission Congestion Study'' or (Congestion Study)) within one year from the date of enactment of EPAct and every three years thereafter. The 2006 and 2009 Congestion Studies reviewed congestion nationwide except for the portion of Texas covered by the Electricity Reliability Council of Texas, to which FPA section 216 does not apply. The 2012 Congestion Study is being developed with a similar scope. FPA section 216(a) requires the congestion study be conducted in consultation with affected States and regional entities identified in FPA section 215.

DOE intends to release a draft version of the 2012 Congestion Study later in 2012 for public comment. After reviewing and considering the comments received, DOE will issue a final version of the study.

Issued in Washington, DC, on July 20, 2012.

Patricia A. Hoffman,

Assistant Secretary, Office of Electricity Delivery and Energy Reliability.

[FR Doc. 2012–18569 Filed 7–27–12; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Office of Energy Efficiency and Renewable Energy

[Case No. RF–024]

Petition for Waiver of LG Electronics, Inc. From the Department of Energy Residential Refrigerator and Refrigerator-Freezer Test Procedure and Grant of Interim Waiver

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of Petition for Waiver, Notice of Granting Application for Interim Waiver, and Request for Public Comments.

SUMMARY: This notice announces receipt of a petition for waiver from LG Electronics, Inc. (LG) regarding specified portions of the U.S. Department of Energy (DOE) test procedure for determining the energy consumption of electric refrigerators and refrigerator-freezers. It also grants LG with an interim waiver from that procedure. The waiver request pertains to the basic models set forth in LG's petition that incorporate dual compressors. In its petition, LG provides an alternate test procedure that addresses difficulties in testing dual compressor systems according to the DOE test procedure. DOE solicits comments, data, and information concerning LG's petition and the suggested alternate test procedure.

DATES: DOE will accept comments, data, and information with respect to the LG Petition until, but no later than August 29, 2012.

ADDRESSES: You may submit comments, identified by case number ''RF–024,'' by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Email: AS_Waiver_Requests@ee.doe.gov.* Include the case number [Case No. RF–024] in the subject line of the message.
- *Mail:* Ms. Brenda Edwards, U.S. Department of Energy, Building Technologies Program, Mailstop EE–2J/1000 Independence Avenue SW., Washington, DC 20585–0121. Telephone: (202) 586–2945. Please submit one signed original paper copy.
- *Hand Delivery/Courier:* Ms. Brenda Edwards, U.S. Department of Energy, Building Technologies Program, 950 L'Enfant Plaza SW., Suite 600, Washington, DC 20024. Please submit one signed original paper copy.

Docket: For access to the docket to review the background documents

relevant to this matter, you may visit the U.S. Department of Energy, 950 L'Enfant Plaza SW., Washington, DC 20024; (202) 586–2945, between 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays. Available documents include the following items: (1) This notice; (2) public comments received; (3) the petition for waiver and application for interim waiver; and (4) prior DOE rulemakings regarding similar refrigerator-freezers. Please call Ms. Brenda Edwards at the above telephone number for additional information.

FOR FURTHER INFORMATION CONTACT: Mr. Bryan Berringer, U.S. Department of Energy, Building Technologies Program, Mail Stop EE–2J, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585–0121. Telephone: (202) 586–0371. Email: *Bryan.Berringer@ee.doe.gov*.

Ms. Elizabeth Kohl, U.S. Department of Energy, Office of the General Counsel, Mail Stop GC–71, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585–0103. Telephone: (202) 586–7796. Email: *Elizabeth.Kohl@hq.doe.gov*.

SUPPLEMENTARY INFORMATION:

I. Background and Authority

Title III, Part B of the Energy Policy and Conservation Act of 1975 (EPCA), Public Law 94–163 (42 U.S.C. 6291–6309, as codified, established the Energy Conservation Program for Consumer Products Other Than Automobiles, a program covering most major household appliances, which includes the electric refrigerators and refrigerator-freezers that are the focus of this notice.[1] Part B includes definitions, test procedures, labeling provisions, energy conservation standards, and the authority to require information and reports from manufacturers. Further, Part B authorizes the Secretary of Energy to prescribe test procedures that are reasonably designed to produce results which measure the energy efficiency, energy use, or estimated annual operating costs of a covered product, and that are not unduly burdensome to conduct. (42 U.S.C. 6293(b)(3)). The current test procedure for electric refrigerators and electric refrigerator-freezers is contained in 10 CFR part 430, subpart B, appendix A1.

DOE's regulations for covered products contain provisions allowing a person to seek a waiver for a particular basic model from the test procedure requirements for covered consumer products when (1) the petitioner's basic model for which the petition for waiver was submitted contains one or more design characteristics that prevent testing according to the prescribed test procedure, or (2) when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption characteristics as to provide materially inaccurate comparative data. 10 CFR 430.27(a)(1). Petitioners must include in their petition any alternate test procedures known to the petitioner to evaluate the basic model in a manner representative of its energy consumption characteristics. 10 CFR 430.27(b)(1)(iii).

The Assistant Secretary for Energy Efficiency and Renewable Energy (the Assistant Secretary) may grant a waiver subject to conditions, including adherence to alternate test procedures. 10 CFR 430.27(l). Waivers remain in effect pursuant to the provisions of 10 CFR 430.27(m).

Any interested person who has submitted a petition for waiver may also file an application for interim waiver of the applicable test procedure requirements. 10 CFR 430.27(a)(2). The Assistant Secretary will grant an interim waiver request if it is determined that the applicant will experience economic hardship if the interim waiver is denied, if it appears likely that the petition for waiver will be granted, and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the petition for waiver. 10 CFR 430.27(g).

II. Petition for Waiver of Test Procedure

On May 10, 2012, LG filed a petition for waiver from the test procedure applicable to residential electric refrigerators and refrigerator-freezers set forth in 10 CFR Part 430, Subpart B, Appendix A1. On June 28, 2012, LG amended its request by revising the list of particular models covered by its request. The May 2012 request initially covered a number of LG and Kenmore-branded products; the June 2012 request revised this list to include only certain LG models. LG is seeking a waiver because it is developing new refrigerator-freezers that incorporate a dual compressor design that is not contemplated under DOE's test procedure. In its petition, LG seeks a waiver from the existing DOE test procedure applicable to refrigerators and refrigerator-freezers under 10 CFR Part 430 for LG's dual compressor products. LG states that its dual compressor products use shared compressor systems that are controlled by a 3-way valve. This type of system, LG argues, differ from the independent, sealed systems that the DOE test procedure is designed to address. In its petition, LG has set forth an alternate test procedure and notes in support of its petition that DOE has already granted Sub-Zero a similar waiver pertaining to the use of dual compressor-equipped refrigerators. See 76 FR 71335 (November 17, 2011) (interim waiver) and 77 FR 5784 (February 6, 2012) (Decision and Order).

III. Application for Interim Waiver

LG also requested an interim waiver from the existing DOE test procedure. Under 10 CFR 430.27(b)(2), each application for interim waiver must demonstrate likely success of the petition for waiver and address the economic hardship and/or competitive disadvantage that is likely to result absent a favorable determination on the application for interim waiver.'' An interim waiver may be granted if it is determined that the applicant will experience economic hardship if the application for interim waiver is denied; if it appears likely that the petition for waiver will be granted; and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination of the petition for waiver. 10 CFR 430.27(g).

DOE has determined that LG's application for interim waiver does not provide sufficient market, equipment price, shipments and other manufacturer impact information to permit DOE to evaluate the economic hardship LG might experience absent a favorable determination on its application for interim waiver. DOE recognizes, however, that the DOE test procedure for dual compressor systems primarily addresses independent, sealed systems, which differ from the shared system used by the models listed in LG's petition. As a result, it is not possible to test these products using the DOE test procedure, and use of the test procedure would provide test results so unrepresentative as to provide materially inaccurate comparative data. DOE reviewed the alternate procedure and determined that it will alleviate the testing problems associated with LG's implementation of a dual compressor system. Therefore, it appears likely that LG's petition for waiver will be granted.

For the reasons stated above, DOE grants LG's application for interim waiver from testing of its refrigerator-freezer product line containing dual compressors. Therefore, *it is ordered that:*

[1] For editorial reasons, upon codification in the U.S. Code, Part B was re-designated Part A.

The application for interim waiver filed by LG is hereby granted for LG's refrigerator-freezer product lines that incorporate dual compressors subject to the following specifications and conditions:

(1) LG shall be required to test and rate its refrigerator-freezer product line containing dual compressors according to the alternate test procedure as set forth in section IV, ''Alternate test procedure.''

(2) The interim waiver applies to the following basic model groups:

LG Brand

LFX32955**
LFX33955**
LFX34955**
LMX32955**
LMX33955**
LMX34955**

Note: Each ''*'' represents a letter.

DOE makes decisions on waivers and interim waivers for only those models specifically set out in the petition, not future models that may be manufactured by the petitioner. LG may submit a new or amended petition for waiver and request for grant of interim waiver, as appropriate, for additional models of refrigerator-freezers for which it seeks a waiver from the DOE test procedure. In addition, DOE notes that granting of an interim waiver or waiver does not release a petitioner from the certification requirements set forth at 10 CFR part 429.

Further, this interim waiver is conditioned upon the presumed validity of statements, representations, and documents provided by the petitioner. DOE may revoke or modify this interim waiver at any time upon a determination that the factual basis underlying the petition for waiver is incorrect, or upon a determination that the results from the alternate test procedure are unrepresentative of the basic models' true energy consumption characteristics.

IV. Alternate Test Procedure

For the duration of the interim waiver, LG shall be required to test the products listed above according to the test procedures for residential electric refrigerator-freezers prescribed by DOE at 10 CFR part 430, subpart B, Appendix A1, except that, for the LG products listed above only, replace the multiple defrost system section 5.2.1.4 of Appendix A1 with the following:

5.2.1.4 Dual Compressor Systems with Dual Automatic Defrost. The two-part test method in section 4.2.1 must be used, and the energy consumption in kilowatt-hours per day shall be calculated equivalent to:

$$ET = (144O \times EP1/T1) + \sum_{i=1}^{D} [(EP2_i - (EP1 \times T2_i/T1)) \times (12/CT_i)]$$

Where:

- 1440 = number of minutes in a day;
- ET is the test cycle energy (kWh/day);
- i is the variable that can equal to 1, 2 or more that identifies the compartment with distinct defrost system;
- D is the total number of compartments with distinct defrost systems;
- EP1 is the dual compressor energy expended during the first part of the test (it is calculated for a whole number of freezer compressor cycles at least 24 hours in duration and may be the summation of several running periods that do not include any precool, defrost, or recovery periods);
- T1 is the length of time for EP1 (minutes);
- EP2i is the total energy consumed during the second (defrost) part of the test being conducted for compartment i. (kWh);
- T2i is the length of time (minutes) for the second (defrost) part of the test being conducted for compartment i.
- CTi is the compressor on time between defrosts for only compartment i. CTi for compartment i with long time automatic defrost system is calculated as per 10 CFR Part 430, Subpart B, Appendix A1 clause 5.2.1.2. CTi for compartment i with variable defrost system is calculated as per 10 CFR part 430 subpart B appendix A1 clause 5.2.1.3. (hours rounded to the nearest tenth of an hour).

Stabilization:

The test shall start after a minimum 24 hours stabilization run for each temperature control setting.

Steady State for EP1:

The temperature average for the first and last compressor cycle of the test period must be within 1.0 [degrees] F (0.6 [degrees] C) of the test period temperature average for each compartment. Make this determination for the fresh food compartment for the fresh food compressor cycles closest to the start and end of the test period. If multiple segments are used for test period 1, each segment must comply with above requirement.

Steady State for EP2i:

The second (defrost) part of the test must be preceded and followed by regular compressor cycles. The temperature average for the first and last compressor cycle of the test period must be within 1.0 [degrees] F (0.6 [degrees] C) of the EP1 test period temperature average for each compartment.

Test Period for EP2i, T2i:

EP2i includes precool, defrost, and recovery time for compartment i, as well as sufficient dual compressor steady state run cycles to allow T2i to be at least 24 hours. The test period shall start at the end of a regular freezer compressor on-cycle after the previous defrost occurrence (refrigerator or freezer). The test period also includes the target defrost and following regular freezer compressor cycles, ending at the end of a regular freezer compressor on-cycle before the next defrost occurrence (refrigerator or freezer). If the previous condition does not meet 24 hours time, additional EP1 steady state segment data could be included. Steady state run cycle data can be utilized in EP1 and EP2i.

Test Measurement Frequency Measurements shall be taken at regular interval not exceeding 1 minute.
[End of 5.2.1.4]

V. Summary and Request for Comments

Through today's notice, DOE grants LG an interim waiver from the specified portions of the test procedure applicable to LG's line of refrigerator-freezers with dual compressors and announces receipt of LG's petition for waiver from those same portions of the test procedure. DOE publishes LG's petition for waiver pursuant to 10 CFR 430.27(b)(1)(iv). The petition includes a suggested alternate test procedure to determine the energy consumption of LG's specified refrigerator-freezers with dual compressors. LG is required to follow this alternate procedure as a condition of its interim waiver, and DOE is considering including this alternate procedure in its subsequent Decision and Order.

DOE solicits comments from interested parties on all aspects of the petition, including the suggested alternate test procedure and calculation methodology. Pursuant to 10 CFR 430.27(b)(1)(iv), any person submitting written comments to DOE must also send a copy of such comments to the petitioner. The contact information for the petitioner is: John I. Taylor, Vice President, Government Relations and Communications, LG Electronics USA, Inc., 1776 K Street NW., Washington,

DC 20006. All submissions received must include the agency name and case number for this proceeding. Submit electronic comments in WordPerfect, Microsoft Word, Portable Document Format (PDF), or text (American Standard Code for Information Interchange (ASCII)) file format and avoid the use of special characters or any form of encryption. Wherever possible, include the electronic signature of the author. DOE does not accept telefacsimiles (faxes).

According to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit two copies to DOE: one copy of the document including all the information believed to be confidential, and one copy of the document with the information believed to be confidential deleted. DOE will make its own determination about the confidential status of the information and treat it according to its determination.

Issued in Washington, DC, on July 16, 2012.

Kathleen B. Hogan,

Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.

May 10, 2012
The Honorable David Danielson
Assistant Secretary, Energy Efficiency and Renewable Energy
United States Department of Energy
Mail Station EE–1
Forrestal Building
1000 Independence Avenue SW
Washington, DC 20585
Re: Petition for Waiver and Application for Interim Waiver, *Test Procedure for Refrigerators, Refrigerator-Freezers, and Freezers*
Dear Assistant Secretary Danielson:

LG Electronics, Inc. (LG) respectfully submits this Petition for Waiver and Application for Interim Waiver, pursuant to 10 C.F.R. § 430.27, as related to DOE's test procedure for refrigerators, refrigerator-freezers, and freezers. 10 C.F.R. Part 430, Subpart B, Appendix A1. This request concerns LG refrigerator-freezers that use dual compressors. DOE has already granted Sub-Zero such waivers. 77 Fed. Reg. 5784 (Feb. 6, 2012) (waiver); 76 Fed. Reg. 71335 (Nov. 17, 2011) (interim waiver). LG requests expedited treatment of the Petition and Application.

LG is a manufacturer of refrigerator-freezers and other products sold worldwide, including in the United States. LG's U.S. operations are LG Electronics USA, Inc., with headquarters at 1000 Sylvan Avenue, Englewood Cliffs, NJ 07632 (tel. 201–816–2000). Its worldwide headquarters are located at LG Twin Towers 20, Yoido-dong, Youngdungpo-gu Seoul, Korea 150–721; (tel. 011–82–2–3777–1114); URL: *http.www.LGE.com.* LG's principal brands include LG® and OEM brands, including GE® and Kenmore®.

As DOE states in its grant of a waiver to Sub-Zero, DOE's test procedure for dual compressors under 10 C.F.R. Part 430 assumes independent, sealed systems. In contrast, Sub-Zero's dual compressor products have shared systems. In such circumstances, DOE recognized that it is not possible to test such dual compressor products using the DOE test procedure, and use of the test procedure would provide test results so unrepresentative as to provide materially inaccurate comparative data. 77 Fed. Reg. at 5784–85. DOE determined that an alternative test procedure set forth in the waiver would alleviate the testing problems associated with Sub-Zero's implementation of a dual compressor system while accurately measuring the energy consumption of these dual products. Id. at 5785.

The factors in the Sub-Zero waiver apply equally to LG dual compressor products. LG's dual compressor products have shared compressor systems, controlled by a 3-way valve, and do not have the independent, sealed systems assumed under the DOE test procedure. Therefore, as recognized by DOE, it is not possible to test such products using the DOE test procedure, and use of the test procedure would provide test results so unrepresentative as to provide materially inaccurate comparative data.

LG requests that DOE grant a waiver that would provide for its dual compressor products set forth in Appendix I of this waiver request the following alternative test procedure consistent with the waiver provided to Sub-Zero:

LG shall be required to test the products listed in Appendix I of this waiver request according to the test procedures for electric refrigerator-freezers prescribed by DOE at 10 CFR Part 430, Subpart B, Appendix A1, except that, for the LG products listed in Appendix I of this waiver request only, replace the multiple defrost system section 5.2.1.4 of Appendix A1 with the following:

5.2.1.4 Dual Compressor Systems with Dual Automatic Defrost. The two-part test method in section 4.2.1 must be used, and the energy consumption in kilowatt-hours per day shall be calculated equivalent to:

$$ET = (144O \times EP1/T1) + \sum_{i=1}^{D} [(EP2_i - (EP1 \times T2_i/T1)) \times (12/CT_i)]$$

Where:

- **1440 = number of minutes in a day**
- **ET is the test cycle energy (kWh/day);**
- **i is the variable that can equal to 1, 2 or more that identifies the compartment with distinct defrost system;**
- **D is the total number of compartments with distinct defrost systems;**
- **EP1 is the dual compressor energy expended during the first part of the test (it is calculated for a whole number of freezer compressor cycles at least 24 hours in duration and may be the summation of several running periods that do not include any precool, defrost, or recovery periods);**
- **T1 is the length of time for EP1 (minutes);**
- **EP2i is the total energy consumed during the second (defrost) part of the test being conducted for compartment i. (kWh);**
- **T2i is the length of time (minutes) for the second (defrost) part of the test being conducted for compartment i.**
- **CTi is the compressor on time between defrosts for only compartment i. CTi for compartment i with long time automatic defrost system is calculated as per 10 CFR Part 430, Subpart B, Appendix A1 clause 5.2.1.2. CTi for compartment i with variable defrost system is calculated as per 10 CFR part 430 subpart B appendix A1 clause 5.2.1.3. (hours rounded to the nearest tenth of an hour).**

Stabilization:

The test shall start after a minimum 24 hours stabilization run for each temperature control setting.

Steady State for EP1:

The temperature average for the first and last compressor cycle of the test

period must be within 1.0 [degrees] F (0.6 [degrees] C) of the test period temperature average for each compartment. Make this determination for the fresh food compartment for the fresh food compressor cycles closest to the start and end of the test period. If multiple segments are used for test period 1, each segment must comply with above requirement.

Steady State for EP2i:

The second (defrost) part of the test must be preceded and followed by regular compressor cycles. The temperature average for the first and last compressor cycle of the test period must be within 1.0 [degrees] F (0.6 [degrees] C) of the EP1 test period temperature average for each compartment.

Test Period for EP2i, T2i:

EP2i includes precool, defrost, and recovery time for compartment i, as well as sufficient dual compressor steady state run cycles to allow T2i to be at least 24 hours. The test period shall start at the end of a regular freezer compressor on-cycle after the previous defrost occurrence (refrigerator or freezer). The test period also includes the target defrost and following regular freezer compressor cycles, ending at the end of a regular freezer compressor on-cycle before the next defrost occurrence (refrigerator or freezer). If the previous condition does not meet 24 hours time, additional EP1 steady state segment data could be included. Steady state run cycle data can be utilized in EP1 and EP2i.

Test Measurement Frequency Measurements shall be taken at regular interval not exceeding 1 minute.

* * * * *

The waiver should continue until DOE adopts an applicable amended test procedure.

LG also requests an interim waiver for its testing and rating of the foregoing models. The petition for waiver is likely to be granted, as evidenced not only by its merits, but also because DOE has granted such a waiver and interim waiver to Sub-Zero. Hence, grant of an interim waiver for LG is appropriate.

We would be pleased to discuss this request with DOE and provide further information as needed.

LG requests expedited treatment of the Petition and Application. In that regard, DOE states in its March 7, 2011 notice concerning its certification, compliance and enforcement rule, ''The Department renews its commitment to act swiftly on waiver requests.'' 76 Fed. Reg. 12422, 12442.[2] LG appreciates this commitment by DOE.

We hereby certify that all manufacturers of domestically marketed units of the same product type have been notified by letter of this petition and application, copies of which letters are set forth in Appendix II hereto.

Sincerely,
John I. Taylor,
Vice President, Government Relations and Communications, LG Electronics USA, Inc., 1776 K Street NW., Washington, DC 20006, Phone: 202–719–3490, Fax: 847–941–8177, Email: john.taylor@lge.com.

Of counsel:

John A. Hodges,
Wiley Rein LLP, 1776 K Street NW., Washington, DC 20006, Phone: 202–719–7000, Fax: 202–719–7049, Email: jhodges@wileyrein.com.

Appendix I

The waiver and interim waiver requested herein should apply to testing and rating of the following model series of refrigerator-freezers. Please note that the actual model numbers will vary to account for such factors as year of manufacture, product color, or other features. Nonetheless, they will always have dual compressors.

Re: Petition for Waiver and Application for Interim Waiver, *Test Procedure for Refrigerators, Refrigerator-Freezers, and Freezers*
Dear Assistant Secretary Danielson:

LG Electronics, Inc. (LG) hereby respectfully amends its May 10, 2012 Petition for Waiver and Application for Interim Waiver, pursuant to 10 C.F.R. § 430.27, as related to DOE's test procedure for refrigerators, refrigerator-freezers, and freezers. 10 C.F.R. Part 430, Subpart B, Appendix A1. Specifically, LG requests that DOE grant a waiver that would provide for its dual compressor products set forth in Appendix I hereto (rather than the products set forth in Appendix I to its May 10, 2012 submission).

Thank you for consideration of LG's waiver request.

Sincerely,
John I. Taylor,
Vice President, Government Relations and Communications, LG Electronics USA, Inc., 1776 K Street NW., Washington, DC 20006, Phone: 202–719–3490, Fax: 847–941–8177, Email: john.taylor@lge.com.

[Docket No. EL12–87–000]

Los Angeles Department of Water and Power v. PacifiCorp; Notice of Complaint

Take notice that on July 23, 2012, pursuant to section 206 of the Rules of Practice and Procedure of the Federal Energy Regulatory Commission (Commission), 18 CFR 385.206 and section 206 of the Federal Power Act, 16 U.S.C. 824(e), the Los Angeles Department of Water and Power (Complainant) filed a formal complaint against PacifiCorp (Respondent) alleging that, the Respondent is in violation of its Commission approved Open Access Transmission Tariff in attempting to collect unreserved use penalties from the Complainant that function to compensate the Respondent for the difference between its maximum path transfer capacity and the system Operating limits recognized by the Western Electricity Coordinating Council, the regional reliability coordinator.

The Complainant certifies that copies of the complaint were served on the contacts for the Respondent as listed on the Commission's list of Corporate Officials.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions, or protests must be filed on or before the comment date. The Respondent's answer, motions to intervene, and protests must be served on the Complainants.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5:00 p.m. Eastern Time on August 13, 2012.

[Docket No. PR12–31–000]

Enbridge Pipelines (North Texas) L.P.; Notice of Compliance Filing

Take notice that on July 13, 2012, Enbridge Pipelines (North Texas) L.P. filed a revised Statement of Operating Conditions to comply with a Commission order issued in Docket No. PR09–26–000 on June 13, 2012, (139 FERC ¶ 61,216) as more fully detailed in the filing.

Any person desiring to participate in this rate proceeding must file a motion to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the date as indicated below. Anyone filing an intervention or protest must serve a copy of that document on the Applicant. Anyone filing an intervention or protest on or before the intervention or protest date need not serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 7 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2662–012–CT; Project No. 12968–001–CT]

Notice of Availability of Draft Environmental Assessment

FirstLight Hydro Generating Company, Project No. 2662–012–CT.
City of Norwich Dept. of Public Utilities, Project No. 12968–001–CT.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed competing applications for a new license for the Scotland Hydroelectric Project (Commission Project Nos. 2662–012 and 12968–001). The Scotland Hydroelectric Project is located on the Shetucket River, in Windham County, Connecticut. The existing licensee for the Scotland Hydroelectric Project No. 2662 is FirstLight Hydro Generating Company (FirstLight). The competitor applicant for the Scotland Hydroelectric Project No. 12968 is the City of Norwich Department of Public Utilities (Norwich Public Utilities).

Staff prepared a draft environmental assessment (EA), which analyzes the potential environmental effects of licensing the project with either FirstLight's or Norwich Public Utilities' proposals, and concludes that licensing the project with either proposal, with appropriate environmental protection measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the draft EA is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at *www.ferc.gov* using the ''eLibrary'' link. Enter the docket number for either project, excluding the last three digits, in the docket number field to access the document. For assistance, contact Commission Online Support at *CommissionOnlineSupport@ferc.gov;* toll-free at 1–866–208–3676; or for TTY, 202–502–8659.

You may also register online at *www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to these or other pending projects. For assistance, contact Commission Online Support.

Any comments should be filed within 30 days from the date of this notice. Comments may be filed electronically via the Internet. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site *http://www.ferc.gov/doc-filing/efiling.asp*. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp*. You must include your name and contact information at the end of your comments. For assistance, please contact Commission Online Support. Although the Commission strongly encourages electronic filing, documents may also be paper-filed. To paper-file, mail an original and seven copies to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. Please affix Scotland Hydroelectric Project, P–2662–012 and P–12968–001 to all comments.

For further information, contact Janet Hutzel at (202) 502–8675 or by email at *janet.hutzel@ferc.gov*.

Dated: July 20, 2012.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER12–2261–000]

Russell City Energy Company, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding, of Russell City Energy Company, LLC's application for market-based rate authority, with an accompanying rate schedule, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability is August 13, 2012.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St. NE., Washington, DC 20426.

The filings in the above-referenced proceeding(s) are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of International Meeting

The Federal Energy Regulatory Commission hereby gives notice that the agency will host an international meeting of the Asia Pacific Energy Regulatory (APER) Forum on August 1–2, 2001 at its headquarters, 888 First Street NE., Washington, DC 20426. Commissioners and staff will take part in this event. Commissioner Philip Moeller and Commissioner John R. Norris are co-chairs of the event.

The meetings are expected to begin at 8:30 a.m. and end at 5:00 p.m. Eastern Time on both days. An agenda of the conference is attached to this notice.

Those wishing to attend this event are encouraged to register using the on-line form located at: *https://www.ferc.gov/aper-forum/aper-8-1-12-form.asp.*

The APER Forum was established as a recommendation at the 3rd Energy Regulatory and Market Development Forum, which operated under the Asia-Pacific Partnership on Clean Development and Climate (APP). The APP was an international partnership between the United States, South Korea, Japan, India, Canada, China and Australia aimed at addressing the challenges of climate change, energy security and air pollution in a way that encouraged economic development and reduced poverty. The APER Forum builds upon the work begun under the APP.

The APER Forum is designed to bring together policymakers, regulators, energy industry participants, academics, regulatory research organizations, and grid and market operators from Asian and Pacific countries to engage in meaningful information exchanges on matters relating both to electricity and to natural gas. The APER Forum is voluntary in nature and intends to provide an ongoing experience for information exchange on the development and application of best practices in regulatory and market arrangements. The first meeting was sponsored by Australia and held in 2010.

This year marks the second biennial meeting of the APER Forum. The event will include delegations from the United States, Canada, Australia, China, India, New Zealand, Thailand and Singapore. Other attendees include regulators from Pakistan, Ghana and the Czech Republic. It will focus on three major issues:

Transitioning to a Low-Carbon Economy—examining policy, regulatory arrangements and standards that encourage energy efficiency and clean energy technologies and promote clean investment/delivery (including renewable and alternative energy) with the aim of reducing greenhouse gas emissions.

Energy Infrastructure and Market Regulatory Arrangements—examining challenges and reforms to the operation and design of energy systems within the context of a market.

Competition Reform—examining regulatory, policy and standards matters that influence and encourage competition (wholesale and retail) growth in the market.

The conference will not be transcribed. However, there will be a free webcast. Anyone with Internet access who desires to watch the conference and download presentations can do so by going to the calendar of events on the FERC Web site (*www.ferc.gov*). The Capitol Connection provides technical support for webcasts and offers the option of listening to the meeting via phone-bridge for a fee. If you have any questions, visit *www.CapitolConnection.org* or call 703–993–3100.

Commission conferences are accessible under section 508 of the Rehabilitation Act of 1973. For accessibility accommodations, please send an email to *accessibility@ferc.gov* or call toll free 1–866–208–3372 (voice) or 202–208–1659 (TTY), or send a FAX to 202–208–2106 with the required accommodations.

For more information, please contact:

Sarah McKinley, Secretariat, APER Forum, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, (202) 502–8004 or 8368, *Sarah.McKinley@ferc.gov.*

Dated: July 20, 2012.

Secretary.

Asia Pacific Energy Regulatory (APER) Forum, Meeting Agenda, Sponsored by the Federal Energy Regulatory Commission

August 1–2, 2012

Day 1, Wednesday, August 1, 2012—Morning

8:30 a.m. Opening Remarks
- Philip Moeller, Commissioner, U.S. Federal Energy Regulatory Commission
- John R. Norris, Commissioner, U.S. Federal Energy Regulatory Commission
- Joseph T. Kelliher, Executive Vice President, Federal Regulatory Affairs, NextEra Energy, former Chairman, U.S. Federal Energy Regulatory Commission and Head of U.S. Delegation, 2010 APER Forum Meeting

Theme—Overview of Energy and Regulatory Structures/APER Members

9:00 a.m. Energy and Regulatory Overview of the United States: Philip Moeller, Commissioner, U.S. Federal Energy Regulatory Commission

9:20 a.m. Energy and Regulatory Overview of Australia: Brendan Morling, Head of Energy and Environment Division, Department of Resources, Energy and Tourism, Australia

9:40 a.m. Energy and Regulatory Overview of China: HE Yang, Director, Department of Power Market Regulation, State Electricity Regulatory Commission, China

10:00 a.m. Break

10:20 a.m. Energy and Regulatory Overview of Canada: John Foran, Director, Natural Resources Canada

10:40 a.m. Energy/Electricity Regulatory Overview of India: Dr. Pramod Deo, Chairman, Central Electricity Regulatory Commission, India

11:00 a.m. Energy and Regulatory Overview of Thailand: Dr. Pallapa Ruanrong, Commissioner, Energy Regulatory Commission

11:20 a.m. Energy and Regulatory Overview of New Zealand: Carl Hansen, Chief Executive, Electricity Authority of New Zealand

12:15 noon Lunch Break

Day 1, Wednesday, August 1, 2012—Afternoon

Theme—Transitioning to a Low-Carbon Economy

2:00 p.m. Carbon Trading and Policies for Low-Carbon Consumption
- Panel Moderator: Brendan Morling, Head of Energy and Environment Division, Department of Resources, Energy and Tourism, Australia
- ○ Presentation on regional carbon trading in California and the U.S. Northeast: Dallas Burtraw, Darius Gaskins Senior Fellow, Resources for the Future, United States
- ○ Guided discussion about carbon policies with the heads of all the delegations

3:00 p.m. Break

3:15 p.m. Smart Grid Technologies that Enhance Efficiency
- Panel Moderator: W. Terry Boston, President and Chief Executive Officer, PJM Interconnection, L.L.C., U.S.
- ○ Presentation: Working toward industry standards for interoperability—David Wollman, Deputy Director, Smart Grid and Cyber-Physical Systems Programs Office, U.S. National Institute of Standards and Technology
- ○ Presentation: Canada smart grid roadmap standards—Michel Fernand Girard, Vice-President, Policy and Stakeholder Relations, Standards Council of Canada
- ○ Presentation: Impacts of new technologies on security of supply—Dr. Brian Spalding, Commissioner, Australian Energy Market Commission (AEMC)
- ○ Discussion with heads of delegation

5:00 p.m. Adjourn

Day 2, Thursday, August 2, 2012—Morning

8:30 a.m. Opening Remarks—Day 2
- Philip Moeller, Commissioner, U.S. Federal Energy Regulatory Commission
- John R. Norris, Commissioner, U.S. Federal Energy Regulatory Commission
- David A. Wright, President, South Carolina Public Service Commission and President of the National Association of Regulatory Utility Commissioners (NARUC)

Theme—Energy Infrastructure and Market Regulations

9:00 a.m. Grid Reliability
- Panel Moderator: John R. Norris, Commissioner, U.S. Federal Energy Regulatory Commission
- ○ Enhancing grid reliability: Cheryl LaFleur, Commissioner, U.S. Federal Energy Regulatory Commission
- ○ Presentation: Network Investments for the Long-Term Interests of Consumers—Andrew Reeves, Chairman, Australian Energy Regulator
- ○ Discussion with heads of delegation

10:00 a.m. Break

10:15 a.m. Renewables in the New Markets
- Panel Moderator: John Pierce, Chairman, Australian Energy Market Commission
- ○ Presentation: Integrating variable energy resources into existing grids—Jon Wellinghoff, Chairman, U.S. Federal Energy Regulatory Commission
- ○ Presentation: Integrating renewables from a reliability perspective—Darren Finkbeiner, Manager, Market Development, Ontario Independent Electricity System Operator (IESO), Canada
- ○ Presentation: Incorporating new technologies onto the grid—Kai

XIE, President, New York Office, State Grid Corporation of China (SGCC)

○ Discussion with heads of delegation

11:45 p.m. Lunch Break

Day 2, Thursday, August 2, 2012—Afternoon

Theme—Competition Reform

1:30 p.m. Market Regulation—Oil and Gas Developments

Panel Moderator: S. Krishnan, Chairperson, Petroleum and Natural Gas Regulatory Board (PNGRB), India

○ Oil Developments in Canada: John Foran, Director, Natural Resources Canada

○ Presentation: Regulatory Framework in Oil & Natural Gas Sector in India—Challenges & Opportunities: Konedana Rajeswara Rao, Petroleum & Natural Gas Regulatory Board (PNGRB), India

○ Impacts of the Shale Gas Revolution Mike McGehee, Director, Division of Pipeline Certificates, Office of Energy Projects, U.S. Federal Energy Regulatory Commission

○ Discussion with heads of delegation

3:00 p.m. Break

3:15 p.m. Impact of Competition on Reliability of Supply

Panel Moderator: Carl Hansen, Chief Executive, Electricity Authority of New Zealand

○ Presentation: Energy network regulation policy and consumer prices—Mr. Brendan Morling, Head of Energy and Environment Division, Department of Resources, Energy and Tourism, Australia

○ Presentation: Building efficient wholesale markets, the RTO/ISO model—Andrew L. Ott, Senior Vice President for Markets, PJM Interconnection L.L.C., United States

○ Discussion with heads of delegation

4:45 p.m. Concluding Remarks

Philip Moeller, Commissioner, U.S. Federal Energy Regulatory Commission

John R. Norris, Commissioner, U.S. Federal Energy Regulatory Commission

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–ORD–2012–0579; FRL–9706–3]

Notice of Availability of the External Review Draft of Framework for Human Health Risk Assessment To Inform Decision Making

AGENCY: U.S. Environmental Protection Agency.

ACTION: Notice of availability.

SUMMARY: The U.S. Environmental Protection Agency (EPA) Office of the Science Advisor (OSA) announces a 60-day public comment period for the external review draft of ''*A Framework for Human Health Risk Assessment to Inform Decision Making.''* This document was developed as part of an agencywide program by the EPA Risk Assessment Forum. The EPA is releasing this draft document solely for the purpose of seeking public comment prior to external peer review. The document will undergo independent peer review during an expert peer review meeting that will be convened, organized, and conducted by a contractor of the EPA in 2012. The date of the external peer review meeting will be announced in a subsequent **Federal Register** notice. All comments received by the docket closing date September 28, 2012, will be shared with the external peer review panel for their consideration. Comments received after the close of the comment period may be considered by the agency when it finalizes the document. This document has not been formally disseminated by the EPA. This draft document does not represent and should not be construed to represent the EPA policy, viewpoint, or determination. Members of the public may obtain the external review draft from *www.regulations.gov;* or *www.epa.gov/raf/FrameworkHHRA.htm* or from Julie Fitzpatrick via the contact information below.

This draft document describes a framework for conducting human health risk assessments that are responsive to the needs of decision making processes at the EPA. The document was developed by the EPA, to provide guidance to scientists and decision makers in the EPA.

DATES: All comments received by the docket closing date September 28, 2012 will be shared with the external peer review panel for their consideration. Comments received beyond that time may be considered by the EPA when it finalizes the document.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–ORD–2012–0579, and by one of the following methods:

- *Internet:* Follow the online instructions for submitting comments in *www.regulations.gov.*
- *Email: ORD.Docket@epa.gov.*
- *Mail:* ORD Docket, U.S. Environmental Protection Agency, Mail Code: 28221T, 1200 Pennsylvania Avenue NW., Washington, DC 20460.
- *Hand Delivery:* The EPA Docket Center (EPA/DC), Room 3334, EPA West Building, 1301 Constitution Avenue NW., Washington, DC 20004, Attention Docket ID EPA–HQ–ORD–2012–0579. Deliveries are only accepted from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. Special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID EPA–HQ–ORD–2012–0579. The EPA policy is that all comments received will be included in the public docket without change and may be made available online at *www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected by statute through *www.regulations.gov* or email. The *www.regulations.gov* Web site is an ''anonymous access'' system, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA, without going through *www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the *www.regulations.gov* index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly

available only in hard copy. Publicly available docket materials are available either electronically in *www.regulations.gov* or in hard copy at the ORD Docket, EPA/DC, EPA West, Room 3334, 1301 Constitution Avenue NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the ORD Docket is (202) 566–1752.

FOR FURTHER INFORMATION CONTACT: Julie Fitzpatrick, Office of the Science Advisor, Mail Code 8105R, U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue NW., Washington, DC 20460; telephone number: (202) 564–4212; fax number: (202) 564–2070, Email: *fitzpatrick.julie@epa.gov*.

SUPPLEMENTARY INFORMATION: The EPA has an established history of conducting human health risk assessments. The *Framework* is intended to foster increased implementation of existing agency guidance for conducting human health risk assessments and improve the utility of risk assessment in the decision making process.

In developing the *Framework* the recommendations presented in the National Research Council's report *Science and Decisions: Advancing Risk Assessment* have been taken into consideration. Specifically, this *Framework* addresses the recommendations that the EPA formalize and implement planning, scoping and problem formulations in the risk assessment process and that the agency adopt a framework for risk-based decision making.

The *Framework* highlights the important roles of planning and scoping as well as problem formulation in designing a risk assessment. In accordance with longstanding agency policy, it also emphasizes the importance of scientific review and public involvement. The *Framework* presents the concept of ''fit for purpose'' to address the development of risk assessments and associated products that are suitable and useful for informing risk management decisions. This *Framework* will enhance the agency's emphasis on the importance of transparency of the human health risk assessment and decision making.

This document is not intended to supersede existing agency guidance; rather by citing and discussing existing guidance in the context of the framework it is intended to foster increased implementation of agency guidance.

Dated: July 20, 2012.

Glenn Paulson,

Science Advisor.

BILLING CODE 6560–50–P

EXPORT-IMPORT BANK OF THE UNITED STATES

Economic Impact Policy

This notice is to inform the public that the Export-Import Bank of the United States has received an application to support the export of approximately $2.3 billion in U.S. petrochemical equipment and services to expand petrochemical production at an existing facility in India. The financed amount associated with the U.S. export contract is expected to total approximately $2 billion.

The U.S. exports will enable the foreign buyer to increase its annual production of the following products: 550,000 metric tons of linear low density polyethylene (LLDPE); 400,000 metric tons of low density polyethylene (LDPE); 733,000 metric tons of monoethylene glycol (MEG); 1,800,000 metric tons of paraxylene (PX); and 152,000 metric tons of polypropylene (PP). Available information indicates the Indian petrochemical producer plans to sell its output as follows: the majority of LDPE will be consumed in India with the balance exported to China, Europe and Africa; about half of LLDPE production will be consumed in India with the remainder going to China, Europe and Africa; the entire MEG production will be consumed in India; the PX production will be exported to South and North East Asia; and the majority of the PP production will be consumed in India with the balance exported to China, Africa and Europe.

Interested parties may submit comments on this application by email to *economic.impact@exim.gov* or by mail to 811 Vermont Avenue NW., Room 432, Washington, DC 20571, within 14 days of the date this notice appears in the **Federal Register**.

Kathryn Hoff-Patrinos,

Deputy General Counsel.

BILLING CODE 6690–01–P

FEDERAL COMMUNICATIONS COMMISSION

Information Collection(s) Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burden and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the Federal Communications Commission invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s). Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information burden for small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid OMB control number.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before September 28, 2012. If you anticipate that you will be submitting PRA comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the FCC contact listed below as soon as possible.

ADDRESSES: Submit your PRA comments to Judith B. Herman, Federal Communications Commission, via the Internet at *Judith-b.herman@fcc.gov*. To submit your PRA comments by email send them to: *PRA@fcc.gov*.

FOR FURTHER INFORMATION CONTACT: Judith B. Herman, Office of Managing Director, (202) 418–0214.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0999.

Title: Hearing Aid Compatibility Status Report and Section 20.19, Hearing Aid-Compatible Mobile Handsets (Hearing Aid Compatibility Act).

Form Number: FCC Form 655.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 925 respondents; 925 responses.

Estimated Time per Response: 13.041081 hours per response (average).

Frequency of Response: On occasion and annual reporting requirements and third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. Sections 151, 154(i), 157, 160, 201, 202, 214, 301, 303, 308, 309(j), 310 and 610 of the Communications Act of 1934, as amended.

Total Annual Burden: 12,063 hours.

Total Annual Cost: N/A.

Privacy Impact Assessment: N/A.

Nature and Extent of Confidentiality: Information requested in the reports may include confidential information. However, covered entities are allowed to request that such materials submitted to the Commission be withheld from public inspection.

Needs and Uses: The Commission will submit this information collection to the Office of Management and Budget (OMB) as a revision after this comment period to obtain the three year clearance from them.

The Commission is modifying the FCC Form 655 to collect information that is relevant to the newly effective provision of the rule and to clarify and streamline existing fields. Specifically, manufacturers and service providers will be asked to provide new or different responses on the FCC Form 655 in the following areas:

(1) The FCC Form 655 currently collects information on which version of the ANSI standard was used to test the handsets offered during a reporting period. The 2011 ANSI standard will be added as an option on the Handset Model Information portion of FCC Form 655. In addition, the order of the questions has been changed so that manufacturers will only have to specify once what version of the ANSI standard was used for each handset.

(2) The *de minimis* exception section will be expanded by adding questions necessary to determine whether a filer is eligible under the new version of the exception that becomes effective on September 8, 2012. These questions will address whether a filer is a small entity and how long it has been offering handsets. In addition, the text of the existing question will be modified to make clear that manufacturers must report all handsets that they offer in the United States.

(3) The Air Interfaces and Frequency Bands fields on the Handset Model Information portion of FCC Form 655 will be expanded to add ''LTE'', ''Wi-FI'', ''WiMax'', ''2.4 GHz'', and ''2.5 GHz''. In addition, the question whether the handset operates over additional air interfaces and frequency bands will be eliminated as no longer necessary.

(4) A new question will be added to the Handset Model Information portion of FCC Form 655 asking whether the handset meets the criteria for a M3 rating for operations over GSM at 1900 MHz by enabling the user optionally to reduce the maximum power at which the handset will operate by no more than 2.5 decibels, except for emergency calls to 911. This information will help the Commission ensure that such handsets are counted correctly, as well as to monitor compliance with related disclosure requirements.

(5) In order to determine whether a filer is fully in compliance with the disclosure requirements, the Product Labeling portion of FCC Form 655 will be expanded. New questions will be added to determine whether appropriate disclosure/labeling was met for any handsets that let the consumer reduce maximum transmit power for GSM operations in the 1900 MHz band by up to 2.5 decibels, any handsets that a manufacturer may have tested under the 2011 version of the ANSI standard and found not to meet hearing aid compatibility criteria for those operations, and any handsets that were certified for inductive coupling under the 2011 ANSI standard without testing VoLTE transmissions.

Federal Communications Commission.

Bulah P. Wheeler,

Deputy Manager,Office of the Secretary,Office of Managing Director.

FEDERAL COMMUNICATIONS COMMISSION

[DA 12–1171]

Notice of Debarment

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: The Enforcement Bureau (the ''Bureau'') debars Ms. Gloria F. Harper from the schools and libraries universal service support mechanism (or ''E-Rate Program'') for a period of three years. The Bureau takes this action to protect the E-Rate Program from waste, fraud, and abuse.

DATES: Debarment commences on the date Ms. Gloria F. Harper receives the debarment letter or August 29, 2012, whichever date comes first, for a period of three years.

FOR FURTHER INFORMATION CONTACT: Joy M. Ragsdale, Attorney Advisor, Federal Communications Commission, Enforcement Bureau, Investigations and Hearings Division, Room 4–C330, 445 12th Street SW., Washington, DC 20554. Joy Ragsdale may be contacted by telephone at (202) 418–1697 or by email at *Joy.Ragsdale@fcc.gov.* If Ms. Ragsdale is unavailable, you may contact Ms. Theresa Cavanaugh, Chief, Investigations and Hearings Division, by telephone at (202) 418–1420 and by email at *Theresa.Cavanaugh@fcc.gov.*

SUPPLEMENTARY INFORMATION: The Bureau debarred Ms. Gloria F. Harper from the schools and libraries service support mechanism for a period of three years pursuant to 47 CFR 54.8. Attached is the debarment letter, DA 12–1171, which was mailed to Ms. Harper and released on July 20, 2012. The complete text of the notice of debarment is available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portal II, 445 12th Street SW., Room CY–A257, Washington, DC 20554. In addition, the complete text is available on the FCC's Web site at *http://www.fcc.gov.* The text may also be purchased from the Commission's duplicating inspection and copying during regular business hours at the contractor, Best Copy and Printing, Inc., Portal II, 445 12th Street SW., Room CY–B420, Washington, DC 20554, telephone (202) 488–5300 or (800) 378–3160, facsimile (202) 488–5563, or via email *http://www.bcpiweb.com.*

Federal Communications Commission.

Theresa Z. Cavanaugh,

Chief, Investigations and Hearings Division, Enforcement Bureau.

July 20, 2012

DA 12–1171

VIA CERTIFIED MAIL RETURN RECEIPT REQUESTED AND EMAIL

Ms. Gloria F. Harper, c/o Ms. Cynthia Marie Cimino, Federal Public Defender, Hale Boggs Federal Building, 500 Poydras Street, Room 318, New Orleans, LA 70130.

Re: Notice of Debarment, File No. EB–12–IH–0400

Dear Ms. Harper: The Federal Communications Commission (Commission)

hereby notifies you that, pursuant to § 54.8 of its rules, you are prohibited from participating in the schools and libraries universal service support mechanism (E-Rate program) for three years from either the date of your receipt of this Notice of Debarment, or of its publication in the **Federal Register**, whichever is earlier in time (Debarment Date).[1]

On March 22, 2012, the Commission's Enforcement Bureau (Bureau) sent you a Notice of Suspension and Initiation of Debarment Proceeding (Notice of Suspension)[2] that was published in the **Federal Register** on April 23, 2012.[3] The Notice of Suspension suspended you from participating in activities associated with or relating to the E-Rate program. It also described the basis for initiating debarment proceedings against you, the applicable debarment procedures, and the effect of debarment.

As discussed in the Notice of Suspension, in June 2011 you pled guilty to conspiring with others to fraudulently obtain $4.5 million in E-Rate contracts through your companies, Computer Training and Associates and Global Networking Technologies.[4] In addition, you admitted to bribing school officials in exchange for control of the E-Rate application and competitive bidding process.[5] Your fraudulent scheme adversely affected 20 schools and school districts located throughout six states.[6] Pursuant to § 54.8(c) of the Commission's rules, your conviction of criminal conduct in connection with the E-Rate program is the basis for this debarment.[7]

In accordance with the Commission's debarment rules, you were required to file with the Commission any opposition to your suspension or its scope, or to your proposed debarment or its scope, no later than 30 calendar days from either the date of your receipt of the Notice of Suspension or of its publication in the **Federal Register**, whichever date occurred first.[8] The Commission did not receive any such opposition.

For the foregoing reasons, you are debarred from participating in the E-Rate program for three years from the Debarment Date.[9] During this period, you are excluded from participating in any activities associated with or related to the E-Rate program, including the receipt of funds or discounted services through the E-Rate program, or consulting with, assisting, or advising applicants or service providers regarding the E-Rate program.[10]

Sincerely,

Theresa Z. Cavanaugh,

Chief, Investigations and Hearings Division, Enforcement Bureau.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Information Collection Activities: Proposed Collection Renewals; Comment Request; Activities and Investments of Insured State Banks; Privacy of Consumer Financial Information

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice and request for comment.

SUMMARY: The FDIC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on renewal of existing information collections, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35). Currently, the FDIC is soliciting comments on renewal of the information collections described below.

DATES: Comments must be submitted on or before September 28, 2012.

ADDRESSES: Interested parties are invited to submit written comments to the FDIC by any of the following methods:

- *http://www.FDIC.gov/regulations/laws/federal/notices.html.*
- *Email: comments@fdic.gov.* Include the name of the collection in the subject line of the message.
- *Mail:* Leneta G. Gregorie (202–898–3719), Counsel, Room NYA–5050, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.
- *Hand Delivery:* Comments may be hand-delivered to the guard station at the rear of the 17th Street Building (located on F Street), on business days between 7 a.m. and 5 p.m.

All comments should refer to the relevant OMB control number. A copy of the comments may also be submitted to the OMB desk officer for the FDIC: Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Leneta Gregorie, at the FDIC address above.

SUPPLEMENTARY INFORMATION:

Proposal to renew the following currently approved collection of information:

1. *Title:* Activities and Investments of Insured State Banks.

OMB Number: 3064–0111.

Form Numbers: None.

Frequency of Response: On occasion.

Affected Public: Insured state nonmember banks.

Estimated Number of Respondents: 110.

Estimated Time per Response: 8 hours.

Total Annual Burden: 880 hours.

General Description of Collection: With certain exceptions, section 24 of the FDI Act (12 U.S.C. 1831a) limits the direct equity investments of state chartered banks to equity investments that are permissible for national banks. In addition, the statute prohibits an insured state bank from directly engaging as principal in any activity that is not permissible for a national bank or indirectly through a subsidiary in an activity that is not permissible for a subsidiary of a national bank unless the bank meets its minimum capital requirements and the FDIC determines that the activity does not pose significant risk to the Deposit Insurance Fund. The FDIC can make such a determination for exception by regulation or by order. The FDIC's implementing regulation for section 24 is 12 CFR part 362. It details the activities that insured state nonmember banks or their subsidiaries may engage in, under certain criteria and conditions, and identifies the information that banks must furnish to the FDIC in order to obtain the FDIC's approval or non-objection.

2. *Title:* Privacy of Consumer Financial Information.

OMB Number: 3064–0136.

Form Numbers: None.

Frequency of Response: On occasion.

Affected Public: Insured state nonmember banks, state savings & loan institutions, and consumers.

Estimated Number of Respondents: Initial notice, 208; annual notice and change in terms 5,156; opt-out notice, 866; consumer opt-out/status update, 212,432.

Estimated Average Time per Response: Initial notice, 80 hours; annual notice and change in terms, 8 hours; opt-out notice, 8 hours; consumer opt-out/status update, 30 minutes.

Estimated Number of Responses: 218,662.

Total Annual Burden: 171,032 hours.

General Description of Collection: The elements of this collection are required under section 504 of the Gramm-Leach-Bliley Act, Public Law l06–102. The collection mandates notice requirements and restrictions on a financial institution's ability to disclose nonpublic personal information about consumers to nonaffiliated third parties. The collection also identifies affirmative actions that consumers must take to exercise their right to prevent banks from sharing their information with nonaffiliated parties.

Request for Comment

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collection, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.

Dated at Washington, DC, this 25th day of July 2012.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than August 14, 2012.

A. Federal Reserve Bank of New York (Ivan Hurwitz, Vice President) 33 Liberty Street, New York, New York 10045–0001:

1. *Muhammad Habib, Kusnacht, Switzerland; Hamza Habib, and Khadijah Jumani, both of Dubai, United Arab Emirates; and Fazilat Jumani,* London, England; to retain control of Maham Beteiligungsgessellschaft AG, Zurich, Switzerland, and thereby indirectly retain control of Habib American Bank, New York, New York.

Board of Governors of the Federal Reserve System, July 25, 2012.

Robert deV. Frierson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP): Initial Review

The meeting announced below concerns the World Trade Center Health Program Outreach and Education Plan RFA–OH12–1201, initial review.

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) announces the aforementioned meeting:

Time and Date: 8:00 a.m.–5:00 p.m., August 28, 2012 (Closed).

Place: Embassy Suites—Old Town Alexandria, 1900 Diagonal Road, Alexandria, Virginia 22314, Telephone: (703) 684–5900.

Status: The meeting will be closed to the public in accordance with provisions set forth in Section 552b(c)(4) and (6), Title 5 U.S.C., and the Determination of the Director, Management Analysis and Services Office, CDC, pursuant to Public Law 92–463.

Matters to be Discussed: The meeting will include the initial review, discussion, and evaluation of applications received in response to ''World Trade Center Health Program Outreach and Education Plan RFA–OH12–1201.''

Contact Person for More Information: Nina Turner, Ph.D., Scientific Review Officer, National Institute for Occupational Safety and Health, CDC, 1095 Willowdale Road, Mailstop G800, Morgantown, West Virginia 26505–2845, Telephone: (304) 285–5976.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Dated: July 18, 2012.

Elaine L. Baker,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

RIN 0938–AR21

Medicare Program; Inpatient Rehabilitation Facility Prospective Payment System for Federal Fiscal Year 2013

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This notice updates the payment rates for inpatient rehabilitation facilities (IRFs) for Federal fiscal year (FY) 2013 (for discharges occurring on or after October 1, 2012 and on or before September 30, 2013) as required under section 1886(j)(3)(C) of the Social Security Act (the Act). Section 1886(j)(5) of the Act requires the Secretary to publish in the **Federal Register** on or before the August 1 that precedes the start of each fiscal year, the classification and weighting factors for the IRF prospective payment system's (PPS) case-mix groups and a description of the methodology and data used in computing the prospective payment rates for that fiscal year.

DATES: *Effective Date:* The updated IRF prospective payment rates are effective for IRF discharges occurring on or after October 1, 2012 and on or before September 30, 2013 (FY 2013).

FOR FURTHER INFORMATION CONTACT: Gwendolyn Johnson, (410) 786–6954, for general information about the notice. Susanne Seagrave, (410) 786–0044, for information about the payment policies and payment rates.

SUPPLEMENTARY INFORMATION:

Executive Summary

I. Purpose

This notice updates the payment rates for inpatient rehabilitation facilities (IRFs) for Federal fiscal year (FY) 2013 (for discharges occurring on or after October 1, 2012 and on or before September 30, 2013) as required under section 1886(j)(3)(C) of the Social Security Act (the Act). Section 1886(j)(5) of the Act requires the Secretary to publish in the **Federal Register** on or before the August 1 that precedes the start of each fiscal year, the classification and weighting factors for the IRF prospective payment system's (PPS) case-mix groups and a description of the methodology and data used in computing the prospective payment rates for that fiscal year.

Summary of Major Provisions

In this notice, we use the methods described in the FY 2012 IRF PPS final rule (76 FR 47836) to update the Federal prospective payment rates for FY 2013 using updated FY 2011 IRF claims and the most recent available IRF cost report data. No policy changes are being proposed in this notice. Furthermore, we explain the self-implementing changes resulting from the provisions in section 1886(j)(3)(C) and (D) of the Act.

Summary of Cost and Benefits

Provision description	Total costs	Total benefits
FY 2013 IRF PPS payment rate update	The overall economic impact of this notice is an estimated $140 million in increased payments to IRFs during FY 2013.	The benefits of this notice include a net increase in payments to IRF providers. Overall, no IRFs are estimated to experience a net decrease in payments as a result of the updates in this notice.

In the past, the Addenda referred to throughout the preamble of our annual IRF PPS proposed and final rules and notices were included in the printed **Federal Register**. However, effective with the FY 2013 IRF notice, the IRF Addenda will no longer appear in the **Federal Register**. Instead these Addenda to the annual proposed and final rules and notices will be available through the Internet. The IRF PPS Addenda along with other supporting documents and tables referenced in this notice are available through the Internet on the CMS Web site at *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/InpatientRehabFacPPS/*.

To assist readers in referencing sections contained in this document, we are providing the following Table of Contents.

I. Background

A. Historical Overview of the Inpatient Rehabilitation Facility Prospective Payment System (IRF PPS)

Section 1886(j) of the Social Security Act (the Act) provides for the implementation of a per discharge prospective payment system (PPS) for inpatient rehabilitation hospitals and inpatient rehabilitation units of a hospital (hereinafter referred to as IRFs).

Payments under the IRF PPS encompass inpatient operating and capital costs of furnishing covered rehabilitation services (that is, routine, ancillary, and capital costs) but not direct graduate medical education costs, costs of approved nursing and allied health education activities, bad debts, and other services or items outside the scope of the IRF PPS. Although a complete discussion of the IRF PPS provisions appears in the original FY 2002 IRF PPS final rule (66 FR 41316) and the FY 2006 IRF PPS final rule (70 FR 47880), we are providing below a general description of the IRF PPS for fiscal years (FYs) 2002 through 2012.

Under the IRF PPS from FY 2002 through FY 2005, as described in the FY 2002 IRF PPS final rule (66 FR 41316), the Federal prospective payment rates were computed across 100 distinct Case-Mix Groups (CMGs). We constructed 95 CMGs using rehabilitation impairment categories (RICs), functional status (both motor and cognitive), and age (in some cases, cognitive status and age may not be a factor in defining a CMG). In addition, we constructed 5 special CMGs to account for very short stays and for patients who expire in the IRF.

For each of the CMGs, we developed relative weighting factors to account for a patient's clinical characteristics and expected resource needs. Thus, the weighting factors accounted for the relative difference in resource use across all CMGs. Within each CMG, we created tiers based on the estimated effects that certain comorbidities would have on resource use.

We established the Federal PPS rates using a standardized payment conversion factor (formerly referred to as the budget neutral conversion factor). For a detailed discussion of the budget neutral conversion factor, please refer to our FY 2004 IRF PPS final rule (68 FR 45684 through 45685). In the FY 2006 IRF PPS final rule (70 FR 47880), we discussed in detail the methodology for determining the standard payment conversion factor.

We applied the relative weighting factors to the standard payment conversion factor to compute the unadjusted Federal prospective payment rates under the IRF PPS from FYs 2002 through 2005. Within the structure of the payment system, we then made adjustments to account for interrupted stays, transfers, short stays, and deaths. Finally, we applied the applicable adjustments to account for geographic variations in wages (wage index), the percentage of low-income patients, location in a rural area (if applicable), and outlier payments (if applicable) to the IRF's unadjusted Federal prospective payment rates.

For cost reporting periods that began on or after January 1, 2002 and before October 1, 2002, we determined the final prospective payment amounts using the transition methodology prescribed in section 1886(j)(1) of the Act. Under this provision, IRFs transitioning into the PPS were paid a blend of the Federal IRF PPS rate and the payment that the IRF would have received had the IRF PPS not been implemented. This provision also allowed IRFs to elect to bypass this blended payment and immediately be paid 100 percent of the Federal IRF PPS rate. The transition methodology expired as of cost reporting periods

beginning on or after October 1, 2002 (FY 2003), and payments for all IRFs now consist of 100 percent of the Federal IRF PPS rate.

We established a CMS Web site as a primary information resource for the IRF PPS. The Web site URL is *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/InpatientRehabFacPPS/* and may be accessed to download or view publications, software, data specifications, educational materials, and other information pertinent to the IRF PPS.

Section 1886(j) of the Act confers broad statutory authority upon the Secretary to propose refinements to the IRF PPS. In the FY 2006 IRF PPS final rule (70 FR 47880) and in correcting amendments to the FY 2006 IRF PPS final rule (70 FR 57166) that we published on September 30, 2005, we finalized a number of refinements to the IRF PPS case-mix classification system (the CMGs and the corresponding relative weights) and the case-level and facility-level adjustments. These refinements included the adoption of the Office of Management and Budget's (OMB) Core-Based Statistical Area (CBSA) market definitions, modifications to the CMGs, tier comorbidities, and CMG relative weights, implementation of a new teaching status adjustment for IRFs, revision and rebasing of the market basket index used to update IRF payments, and updates to the rural, low-income percentage (LIP), and high-cost outlier adjustments. Beginning with the FY 2006 IRF PPS final rule (70 FR 47908 through 47917) until it was rebased and revised in the FY 2012 IRF PPS final rule (76 FR 47838), the IRF PPS used the 2002-based market basket as the market basket index to reflect the operating and capital cost structures for freestanding IRFs, freestanding inpatient psychiatric facilities (IPFs), and long-term care hospitals (LTCHs) (hereafter referred to as the rehabilitation, psychiatric, and long-term care (RPL) market basket). Any reference to the FY 2006 IRF PPS final rule in this notice also includes the provisions effective in the correcting amendments. For a detailed discussion of the final key policy changes for FY 2006, please refer to the FY 2006 IRF PPS final rule (70 FR 47880 and 70 FR 57166).

In the FY 2007 IRF PPS final rule (71 FR 48354), we further refined the IRF PPS case-mix classification system (the CMG relative weights) and the case-level adjustments, to ensure that IRF PPS payments would continue to reflect as accurately as possible the costs of care. For a detailed discussion of the FY 2007 policy revisions, please refer to the FY 2007 IRF PPS final rule (71 FR 48354).

In the FY 2008 IRF PPS final rule (72 FR 44284), we updated the Federal prospective payment rates and the outlier threshold, revised the IRF wage index policy, and clarified how we determine high-cost outlier payments for transfer cases. For more information on the policy changes implemented for FY 2008, please refer to the FY 2008 IRF PPS final rule (72 FR 44284), in which we published the final FY 2008 IRF Federal prospective payment rates.

After publication of the FY 2008 IRF PPS final rule (72 FR 44284), section 115 of the Medicare, Medicaid, and SCHIP Extension Act of 2007 (MMSEA, Pub. L. 110–173, enacted December 29, 2007), amended section 1886(j)(3)(C) of the Act to apply a zero percent increase factor for FYs 2008 and 2009, effective for IRF discharges occurring on or after April 1, 2008. Section 1886(j)(3)(C) of the Act requires the Secretary to develop an increase factor to update the IRF Federal prospective payment rates for each FY. Based on the legislative change to the increase factor, we revised the FY 2008 Federal prospective payment rates for IRF discharges occurring on or after April 1, 2008. Thus, the final FY 2008 IRF Federal prospective payment rates that were published in the FY 2008 IRF PPS final rule (72 FR 44284) were effective for discharges occurring on or after October 1, 2007 and on or before March 31, 2008; and the revised FY 2008 IRF Federal prospective payment rates were effective for discharges occurring on or after April 1, 2008 and on or before September 30, 2008. The revised FY 2008 Federal prospective payment rates are available on the CMS Web site at *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/InpatientRehabFacPPS/Data-Files.html.*

In the FY 2009 IRF PPS final rule (73 FR 46370), we updated the CMG relative weights, the average length of stay values, and the outlier threshold; clarified IRF wage index policies regarding the treatment of ''New England deemed'' counties and multi-campus hospitals; and revised the regulation text in response to section 115 of the MMSEA to set the IRF compliance percentage at 60 percent (''the 60 percent rule'') and continue the practice of including comorbidities in the calculation of compliance percentages. We also applied a zero percent market basket increase factor for FY 2009 in accordance with section 115 of the MMSEA. For more information on the policy changes implemented for FY 2009, please refer to the FY 2009 IRF PPS final rule (73 FR 46370), in which we published the final FY 2009 IRF Federal prospective payment rates.

In the FY 2010 IRF PPS final rule (74 FR 39762) and in correcting amendments to the FY 2010 IRF PPS final rule (74 FR 50712) that we published on October 1, 2009, we updated the Federal prospective payment rates, the CMG relative weights, the average length of stay values, the rural, LIP, and teaching status adjustment factors, and the outlier threshold; implemented new IRF coverage requirements for determining whether an IRF claim is reasonable and necessary; and revised the regulation text to require IRFs to submit patient assessments on Medicare Advantage (Medicare Part C) patients for use in the 60 percent rule calculations. Any reference to the FY 2010 IRF PPS final rule in this notice also includes the provisions effective in the correcting amendments. For more information on the policy changes implemented for FY 2010, please refer to the FY 2010 IRF PPS final rule (74 FR 39762 and 74 FR 50712), in which we published the final FY 2010 IRF Federal prospective payment rates.

After publication of the FY 2010 IRF PPS final rule (74 FR 39762), section 3401(d) of the Patient Protection and Affordable Care Act (Pub. L. 111–148, enacted on March 23, 2010) (Affordable Care Act), as amended by section 10319 of the same act and by section 1105 of the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152, enacted on March 30, 2010) (collectively, hereafter referred to as ''The Affordable Care Act''), amended section 1886(j)(3)(C) of the Act and added section 1886(j)(3)(D) of the Act. Section 1886(j)(3)(C)(ii)(I) of the Act requires the Secretary to estimate a multi-factor productivity adjustment to the market basket increase factor, and to apply other adjustments as defined by the Act. The productivity adjustment applies to FYs from 2012 forward. The other adjustments apply to FYs 2010–2019.

Sections 1886(j)(3)(C)(ii)(II) and 1886(j)(3)(D)(i) of the Act defined the adjustments that were to be applied to the market basket increase factors in FYs 2010 and 2011. Under these provisions, the Secretary was required to reduce the market basket increase factor in FY 2010 by a 0.25 percentage point adjustment. Notwithstanding this provision, in accordance with section 3401(p) of the Affordable Care Act, the adjusted FY 2010 rate was only to be applied to discharges occurring on or after April 1, 2010. Based on the self-implementing legislative changes to

section 1886(j)(3) of the Act, we adjusted the FY 2010 Federal prospective payment rates as required, and applied these rates to IRF discharges occurring on or after April 1, 2010 and on or before September 30, 2010. Thus, the final FY 2010 IRF Federal prospective payment rates that were published in the FY 2010 IRF PPS final rule (74 FR 39762) were used for discharges occurring on or after October 1, 2009 and on or before March 31, 2010; and the adjusted FY 2010 IRF Federal prospective payment rates applied to discharges occurring on or after April 1, 2010 and on or before September 30, 2010. The adjusted FY 2010 Federal prospective payment rates are available on the CMS Web site at *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/InpatientRehabFacPPS/Data-Files.html.*

In addition, sections 1886(j)(3)(C) and (D) of the Act also affected the FY 2010 IRF outlier threshold amount because they required an adjustment to the FY 2010 RPL market basket increase factor, which changed the standard payment conversion factor for FY 2010. Specifically, the original FY 2010 IRF outlier threshold amount was determined based on the original estimated FY 2010 RPL market basket increase factor of 2.5 percent and the standard payment conversion factor of $13,661. However, as adjusted, the IRF prospective payments are based on the adjusted RPL market basket increase factor of 2.25 percent and the revised standard payment conversion factor of $13,627. In order to maintain estimated outlier payments for FY 2010 equal to the established standard of 3 percent of total estimated IRF PPS payments for FY 2010, we revised the IRF outlier threshold amount for FY 2010 for discharges occurring on or after April 1, 2010. The revised IRF outlier threshold amount for FY 2010 was $10,721.

Sections 1886(j)(3)(ii)(II) and 1886(j)(3)(D)(i) also required the Secretary to reduce the market basket increase factor in FY 2011 by a 0.25 percentage point adjustment. The FY 2011 IRF PPS notice (75 FR 42836) and the correcting amendments to the FY 2011 IRF PPS notice (75 FR 70013, November 16, 2010) described the required adjustments to the FY 2011 and FY 2010 IRF PPS Federal prospective payment rates and outlier threshold amount for IRF discharges occurring on or after April 1, 2010 and on or before September 30, 2011. It also updated the FY 2011 Federal prospective payment rates, the CMG relative weights, and the average length of stay values. Any reference to the FY 2011 IRF PPS notice in this proposed rule also includes the provisions effective in the correcting amendments. For more information on the FY 2010 and FY 2011 adjustments or the updates for FY 2011, please refer to the FY 2011 IRF PPS notice (75 FR 42836 and 75 FR 70013).

In the FY 2012 IRF PPS final rule (76 FR 47836), we updated the IRF Federal prospective payment rates, rebased and revised the RPL market basket, and established a new quality reporting program for IRFs in accordance with section 1886(j)(7) of the Act. We also revised regulations text for the purpose of updating and providing greater clarity. For more information on the policy changes implemented for FY 2012, please refer to the FY 2012 IRF PPS final rule (76 FR 47836), in which we published the final FY 2012 IRF Federal prospective payment rates.

B. Provisions of the Affordable Care Act Affecting the IRF PPS in FY 2012 and Beyond

The Affordable Care Act included several provisions that affect the IRF PPS in FYs 2012 and beyond. Section 3401(d) of the Affordable Care Act also added section 1886(j)(3)(C)(ii)(I) of the Act (providing for a ''productivity adjustment'' for fiscal year 2012 and each subsequent fiscal year). The productivity adjustment and the 0.1 percentage point reduction are both discussed in section V.A. of this notice. Section 1886(j)(3)(C)(ii)(II) of the Act notes that the application of these adjustments to the market basket update may result in an update that is less than 0.0 for a fiscal year and in payment rates for a fiscal year being less than payment rates for the preceding fiscal year.

Section 3004(b) of the Affordable Care Act also addressed the IRF PPS program. It reassigned the previously-designated section 1886(j)(7) of the Act to section 1886(j)(8) and inserted a new section 1886(j)(7), which contains new requirements for the Secretary to establish a quality reporting program for IRFs. Under that program, data must be submitted in a form and manner, and at a time specified by the Secretary. Beginning in FY 2014, section 1886(j)(7)(A)(i) will require application of a 2 percentage point reduction of the applicable market basket increase factor for IRFs that fail to comply with the quality data submission requirements. Application of the 2 percentage point reduction may result in an update that is less than 0.0 for a fiscal year and in payment rates for a fiscal year being less than such payment rates for the preceding fiscal year. Reporting-based reductions to the market basket increase factor will not be cumulative; they will only apply for the FY involved.

Under section 1886(j)(7)(D)(i) and (ii) of the Act, the Secretary is generally required to select quality measures for the IRF quality reporting program from those that have been endorsed by the consensus-based entity which holds a performance measurement contract under section 1890(a) of the Act. This contract is currently held by the National Quality Forum (NQF). So long as due consideration is given to measures that have been endorsed or adopted by a consensus-based organization, section 1886(j)(7)(D)(ii) of the Act authorizes the Secretary to select non-endorsed measures for specified areas or medical topics when there are no feasible or practical endorsed measure(s). Under section 1886(j)(7)(D)(iii) of the Act, the Secretary is required to publish the measures that will be used in FY 2014 no later than October 1, 2012.

Section 1886(j)(7)(E) of the Act requires the Secretary to establish procedures for making the IRF PPS quality reporting data available to the public. In so doing, the Secretary must ensure that IRFs have the opportunity to review any such data prior to its release to the public. Future rulemaking will address these public reporting obligations.

C. Operational Overview of the Current IRF PPS

As described in the FY 2002 IRF PPS final rule, upon the admission and discharge of a Medicare Part A fee-for-service patient, the IRF is required to complete the appropriate sections of a patient assessment instrument (PAI), designated as the Inpatient Rehabilitation Facility-Patient Assessment Instrument (IRF–PAI). In addition, beginning with IRF discharges occurring on or after October 1, 2009, the IRF is also required to complete the appropriate sections of the IRF–PAI upon the admission and discharge of each Medicare Part C (Medicare Advantage) patient, as described in the FY 2010 IRF PPS final rule. All required data must be electronically encoded into the IRF–PAI software product. Generally, the software product includes patient classification programming called the GROUPER software. The GROUPER software uses specific IRF–PAI data elements to classify (or group) patients into distinct CMGs and account for the existence of any relevant comorbidities.

The GROUPER software produces a five-digit CMG number. The first digit is an alpha-character that indicates the comorbidity tier. The last four digits

represent the distinct CMG number. Free downloads of the Inpatient Rehabilitation Validation and Entry (IRVEN) software product, including the GROUPER software, are available on the CMS Web site at *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/InpatientRehabFacPPS/Software.html.*

Once a patient is discharged, the IRF submits a Medicare claim as a Health Insurance Portability and Accountability Act of 1996 (Pub. L. 104–191, enacted August 21, 1996)(HIPAA), compliant electronic claim or, if the Administrative Simplification Compliance Act of 2002 (Pub. L. 107–105, enacted December 27, 2002)(ASCA) permits, a paper claim (a UB–04 or a CMS–1450 as appropriate) using the five-digit CMG number and sends it to the appropriate Medicare fiscal intermediary (FI) or Medicare Administrative Contractor (MAC). Claims submitted to Medicare must comply with both ASCA and HIPAA.

Section 3 of the ASCA amends section 1862(a) of the Act by adding paragraph (22) which requires the Medicare program, subject to section 1862(h) of the Act, to deny payment under Part A or Part B for any expenses for items or services ''for which a claim is submitted other than in an electronic form specified by the Secretary.'' Section 1862(h) of the Act, in turn, provides that the Secretary shall waive such denial in situations in which there is no method available for the submission of claims in an electronic form or the entity submitting the claim is a small provider. In addition, the Secretary also has the authority to waive such denial ''in such unusual cases as the Secretary finds appropriate.'' For more information we refer the reader to the final rule, ''Medicare Program; Electronic Submission of Medicare Claims'' (70 FR 71008, November 25, 2005). CMS instructions for the limited number of Medicare claims submitted on paper are available at: *http://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/downloads//clm104c25.pdf.*)

Section 3 of the ASCA operates in the context of the administrative simplification provisions of HIPAA, which include, among others, the requirements for transaction standards and code sets codified in 45 CFR, parts 160 and 162, subparts A and I through R (generally known as the Transactions Rule). The Transactions Rule requires covered entities, including covered healthcare providers, to conduct covered electronic transactions according to the applicable transaction standards. (See the program claim memoranda issued and published by CMS at: *http://www.cms.gov/Medicare/Billing/ElectronicBillingEDITrans/index.html?redirect=/ElectronicBillingEDITrans/* and listed in the addenda to the Medicare Intermediary Manual, Part 3, section 3600).

The Medicare FI or MAC processes the claim through its software system. This software system includes pricing programming called the ''PRICER'' software. The PRICER software uses the CMG number, along with other specific claim data elements and provider-specific data, to adjust the IRF's prospective payment for interrupted stays, transfers, short stays, and deaths, and then applies the applicable adjustments to account for the IRF's wage index, percentage of low-income patients, rural location, and outlier payments. For discharges occurring on or after October 1, 2005, the IRF PPS payment also reflects the teaching status adjustment that became effective as of FY 2006, as discussed in the FY 2006 IRF PPS final rule (70 FR 47880).

II. Summary of Provisions of the Notice

In this notice, we use the methods described in the FY 2012 IRF PPS final rule (76 FR 47836) to update the Federal prospective payment rates for FY 2013 using updated FY 2011 IRF claims and the most recent available IRF cost report data. No policy changes are being proposed in this notice. Furthermore, we explain the self-implementing changes resulting from the provisions in section 1886(j)(3)(C) and (D) of the Act, as described above and in section V.A. of this notice.

In summary, this notice will:

- Update the FY 2013 IRF PPS relative weights and average length of stay values using the most current and complete Medicare claims and cost report data in a budget neutral manner, as discussed in section III of this notice.
- Update the FY 2013 IRF PPS payments rates by a market basket increase factor, based upon the most current data available, with a 0.1 percentage point reduction as required by sections 1886(j)(3)(C)(ii)(II) and 1886(j)(3)(D)(ii) of the Act and a 0.8 percent productivity adjustment required by section 1886(j)(3)(C)(ii)(I) of the Act, as described in section V.A. of this notice.
- Discuss the Secretary's Recommendation for updating IRF PPS payments for FY 2013, in accordance with the statutory requirements, as described in section V.A. of this notice.
- Update the FY 2013 IRF PPS payment rates by the FY 2013 wage index and the labor-related share in a budget neutral manner, as discussed in sections V.B and V.C of this notice.
- Describe the calculation of the IRF Standard Payment Conversion Factor for FY 2013, as discussed in section V.D of this notice.
- Update the outlier threshold amount for FY 2013, as discussed in section VI.A. of this notice.
- Update the cost-to-charge ratio (CCR) ceilings and urban/rural average CCRs for FY 2013, as discussed in section VI.B. of this notice.

This notice does not contain any revisions to existing regulation text.

III. Update to the Case-Mix Group (CMG) Relative Weights and Average Length of Stay Values for FY 2013

As specified in 42 CFR 412.620(b)(1), we calculate a relative weight for each CMG that is proportional to the resources needed by an average inpatient rehabilitation case in that CMG. For example, cases in a CMG with a relative weight of 2, on average, will cost twice as much as cases in a CMG with a relative weight of 1. Relative weights account for the variance in cost per discharge due to the variance in resource utilization among the payment groups, and their use helps to ensure that IRF PPS payments support beneficiary access to care as well as provider efficiency.

As required by statute, we always use the most recent available data to update the CMG relative weights and average lengths of stay. For FY 2013, we used FY 2011 IRF claims and the most recent available IRF cost report data. These data are the most current and most complete data available at this time. Currently, only a small portion of the FY 2011 IRF cost report data are available for analysis, but the majority of the FY 2011 IRF claims data are available for analysis.

We will apply these data using the methodologies that we have used to update the CMG relative weights and average length of stay values in the FY 2010 IRF PPS final rule (74 FR 39762), the FY 2011 notice (75 FR 42836), and the FY 2012 final rule (76 FR 47836). In calculating the CMG relative weights, we use a hospital-specific relative value method to estimate operating (routine and ancillary services) and capital costs of IRFs. The process used to calculate the CMG relative weights for this notice is as follows:

Step 1. We calculate the CMG relative weights by estimating the effects that comorbidities have on costs.

Step 2. We adjust the cost of each Medicare discharge (case) to reflect the effects found in the first step.

Step 3. We use the adjusted costs from the second step to calculate CMG relative weights, using the hospital-specific relative value method.

Step 4. We normalize the FY 2013 CMG relative weights to the same average CMG relative weight from the CMG relative weights implemented in the FY 2012 IRF PPS final rule (76 FR 47836).

Consistent with the methodology that we have used to update the IRF classification system in each instance in the past, we are updating the CMG relative weights for FY 2013 in such a way that total estimated aggregate payments to IRFs for FY 2013 are the same with or without the changes (that is, in a budget neutral manner) by applying a budget neutrality factor to the standard payment amount. To calculate the appropriate budget neutrality factor for use in updating the FY 2013 CMG relative weights, we use the following steps:

Step 1. Calculate the estimated total amount of IRF PPS payments for FY 2013 (with no changes to the CMG relative weights).

Step 2. Calculate the estimated total amount of IRF PPS payments for FY 2013 by applying the changes to the CMG relative weights (as discussed above).

Step 3. Divide the amount calculated in step 1 by the amount calculated in step 2 to determine the budget neutrality factor (1.0000) that maintains the same total estimated aggregate payments in FY 2013 with and without the updates to the CMG relative weights.

Step 4. Apply the budget neutrality factor (1.0000) to the FY 2012 IRF PPS standard payment amount after the application of the budget-neutral wage adjustment factor.

In section V.D of this notice, we discuss the use of the existing methodology to calculate the standard payment conversion factor for FY 2013.

The CMG relative weights and average length of stay values for FY 2013 are presented in Table 1. The average length of stay for each CMG is used to determine when an IRF discharge meets the definition of a short-stay transfer, which results in a per diem case level adjustment.

TABLE 1—RELATIVE WEIGHTS AND AVERAGE LENGTH OF STAY VALUES FOR CASE-MIX GROUPS

CMG	CMG Description (M = motor, C = cognitive, A = age)	Relative weight				Average length of stay			
		Tier 1	Tier 2	Tier 3	None	Tier 1	Tier 2	Tier 3	None

Generally, updates to the CMG relative weights result in some increases and some decreases to the CMG relative weight values. Table 2 shows how the application of the revisions for FY 2013 will affect particular CMG relative weight values, which affect the overall distribution of payments within CMGs and tiers. Note that, because we are implementing the CMG relative weight revisions in a budget neutral manner (as described above), total estimated aggregate payments to IRFs for FY 2013 will not be affected as a result of the CMG relative weight revisions. However, the revisions will affect the distribution of payments within CMGs and tiers.

TABLE 2—DISTRIBUTIONAL EFFECTS OF THE CHANGES TO THE CMG RELATIVE WEIGHTS

[FY 2012 values compared with FY 2013 values]

Percentage change	Number of cases affected	Percentage of cases affected
Increased by 15% or more	1,894	0.5
Increased by between 5% and 15%	3,932	1.0
Changed by less than 5%	359,907	95.5
Decreased by between 5% and 15%	11,307	3.0
Decreased by 15% or more	0	0.0

Note: Percentages may not sum to 100% due to rounding.

As Table 2 shows, over 95 percent of all IRF cases are in CMGs and tiers that will experience less than a 5 percent change (either increase or decrease) in the CMG relative weight value as a result of the revisions for FY 2013. The largest increase in the CMG relative weight values affecting the most cases is a 2.8 percent increase in the CMG relative weight value for CMG 0802—Replacement of Lower Extremity Joint, with a motor score between 37.05 and 49.55—in the ''no comorbidity'' tier. In the FY 2011 data, 9,851 IRF discharges were classified into this CMG and tier. We believe that the higher costs reported by IRFs for this CMG and tier in FY 2011, compared with the costs reported in FY 2010, may continue to reflect the IRF trend away from admitting lower-severity joint replacement cases in favor of higher-severity joint replacement cases. We believe that this may be evidence of a response, at least in part, to Medicare's ''60 percent'' rule, and the increased focus on the medical review of IRF cases. These policies likely increase the complexity of patients being admitted to IRFs, especially among the lower-extremity joint replacement cases with no comorbidities, which often do not meet the 60 percent rule criteria and have been the focus of a lot of the medical review activities.

The largest decrease in a CMG relative weight value affecting the most cases is a 2.3 percent decrease in the CMG relative weight for CMG D2004—Miscellaneous, with motor score less than 27.85. In the FY 2011 IRF claims data, this change affects 6,967 cases.

The changes in the average length of stay values for FY 2013, compared with the FY 2012 average length of stay values, are small and do not show any particular trends in IRF length of stay patterns.

IV. Updates to the Facility-Level Adjustment Factors

Section 1886(j)(3)(A)(v) of the Act confers broad authority upon the Secretary to adjust the per unit payment rate ''by such * * * factors as the Secretary determines are necessary to properly reflect variations in necessary costs of treatment among rehabilitation facilities.'' For example, we adjust the Federal prospective payment amount

associated with a CMG to account for facility-level characteristics such as an IRF's LIP percentage, teaching status, and location in a rural area, if applicable, as described in § 412.624(e).

In the FY 2010 IRF PPS final rule (74 FR 39762), we updated the adjustment factors for calculating the rural, LIP, and teaching status adjustments based on the most recent three consecutive years worth of IRF claims data (at that time, FY 2006, FY 2007, and FY 2008) and the most recent available corresponding IRF cost report data. As discussed in the FY 2010 IRF PPS proposed rule (74 FR 21060 through 21061), we observed relatively large year-to-year fluctuations in the underlying data used to compute the adjustment factors, especially the teaching status adjustment factor. Therefore, we implemented a 3-year moving average approach to updating the facility-level adjustment factors in the FY 2010 IRF PPS final rule (74 FR 39762) to provide greater stability and predictability of Medicare payments for IRFs.

Each year, we review the major components of the IRF PPS to maintain and enhance the accuracy of the payment system. For FY 2010, we implemented a change to our methodology that was designed to decrease the IRF PPS volatility by using a 3-year moving average to calculate the facility-level adjustment factors. For FY 2011, we issued a notice to update the payment rates, which did not include any policy changes or changes to the IRF facility-level adjustments. However, in the FY 2012 IRF PPS proposed rule (76 FR 24214 at 24225 through 24226), we analyzed the use of a weighting methodology, which assigns greater weight to some facilities than to others, in the regression analysis used to estimate the facility-level adjustment factors. As we found that this weighting methodology inappropriately exaggerated the cost differences among different types of IRF facilities, we proposed to remove the weighting factor from our analysis and update the IRF facility-level adjustment factors for FY 2012 using an un-weighted regression analysis. However, after carefully considering all of the comments that we received on the proposed FY 2012 updates to the facility-level adjustment factors, we decided to hold the facility-level adjustment factors at FY 2011 levels for FY 2012 in order to conduct further research on the underlying data and the best methodology for calculating the facility-level adjustment factors. We based this decision, in part, on comments we received about the financial hardships that the proposed updates would create for facilities with teaching programs and a higher disproportionate share of low-income patients. Thus, in the FY 2012 final rule (76 FR 47836 at 47845), we held the FY 2012 facility-level adjustment factors at FY 2011 levels. We also stated in the FY 2012 final rule that we would conduct further research on the underlying data and the best methodology for calculating the facility level adjustment factors. Our research efforts are still ongoing, as we continue to consider the best methodology for calculating the facility level adjustment factors. As a result, we are not making changes to the facility-level adjustments for FY 2013.

V. FY 2013 IRF PPS Federal Prospective Payment Rates

A. Market Basket Increase Factor, Productivity Adjustment, Other Adjustment, and Secretary's Recommendation for FY 2013

Section 1886(j)(3)(C) of the Act requires the Secretary to establish an increase factor that reflects changes over time in the prices of an appropriate mix of goods and services included in the covered IRF services, which is referred to as a market basket index. According to section 1886(j)(3)(A)(i) of the Act, the increase factor shall be used to update the IRF Federal prospective payment rates for each FY. Sections 1886(j)(3)(C)(ii)(II) and (D)(ii) of the Act require the application of a 0.1 percentage point reduction to the market basket increase factor for FYs 2012 and 2013. In addition, section 1886(j)(3)(C)(ii)(I) of the Act requires the application of a productivity adjustment, as described below. Thus, in this notice, we are updating the IRF PPS payments for FY 2013 by a market basket increase factor based upon the most current data available, with a productivity adjustment as required by section 1886(j)(3)(C)(ii)(I) of the Act, as described below, and a 0.1 percentage point reduction as required by sections 1886(j)(3)(C)(ii)(II) and 1886(j)(3)(D)(ii) of the Act.

For this notice, we have used the same methodology described in the FY 2012 IRF PPS final rule (76 FR 47836 at 47848 through 47863) to compute the FY 2013 market basket increase factor and labor-related share. In that final rule, we rebased the RPL market basket from a 2002 base year to a 2008 base year. Using this method and the IHS Global Insight, Inc. forecast for the second quarter of 2012 of the 2008-based RPL market basket, the FY 2013 RPL market basket increase factor is 2.7 percent. IHS Global Insight (IGI) is an economic and financial forecasting firm that contracts with CMS to forecast the components of providers' market baskets.

In accordance with section 1886(j)(3)(C)(ii)(I) of the Act, and using the methodology described in the FY 2012 IRF PPS final rule (76 FR 47836, 47858 through 47859), we apply a productivity adjustment to the FY 2013 RPL market basket increase factor. The statute defines the productivity adjustment to be equal to the 10-year moving average of changes in annual economy-wide private nonfarm business multifactor productivity (MFP) (as projected by the Secretary for the 10-year period ending with the applicable FY cost reporting period, or other annual period)(the ''MFP adjustment''). The Bureau of Labor Statistics (BLS) is the agency that publishes the official measure of private nonfarm business MFP. We refer readers to the BLS Web site at *http://www.bls.gov/mfp* to obtain the historical BLS-published MFP data. The projection of MFP is currently produced by IGI, using the methodology described in the FY 2012 IRF PPS final rule (76 FR 47836, 47859). The MFP adjustment (the 10-year moving average of MFP for the period ending FY 2013) that we apply to the market basket increase factor for FY 2013 is 0.7 percent, which was calculated using the methodology described in the FY 2012 IRF PPS final rule (76 FR 47836, 47858 through 47859) and is based on IGI's second quarter 2012 forecast.

Thus, in accordance with section 1886(j)(3)(C) of the Act, we will base the FY 2013 market basket update, which is used to determine the applicable percentage increase for the IRF payments, on the second quarter 2012 forecast of the FY 2008-based RPL market basket (estimated to be 2.7 percent). This percentage increase is then reduced by the MFP adjustment (the 10-year moving average of MFP for the period ending FY 2013) of 0.7 percent, which was calculated as described in the FY 2012 IRF PPS final rule (76 FR 47836, 47859) and based on IGI's second quarter 2012 forecast. Following application of the productivity adjustment, the applicable percentage increase is further reduced by 0.1 percentage point, as required by sections 1886(j)(3)(C)(ii)(II) and 1886(j)(3)(D)(ii) of the Act. Therefore, the final FY 2013 IRF update is 1.9 percent (2.7 percent market basket update less 0.7 percentage point MFP adjustment less 0.1 percentage point legislative adjustment).

Secretary's Final Recommendation

For FY 2013, the Medicare Payment Advisory Commission (MedPAC) recommends that a 0 percent update be

applied to IRF PPS payment rates for FY 2013. As discussed above, and in accordance with sections 1886(j)(3)(C) and 1886(j)(3)(D) of the Act, the Secretary is updating IRF PPS payment rates for FY 2013 by an adjusted market basket increase factor of 1.9 percent because section 1886(j)(3)(C) of the Act does not provide the Secretary with the authority to apply a different update factor to IRF PPS payment rates for FY 2013.

B. Labor-Related Share for FY 2013

Using the methodology described in the FY 2012 IRF PPS final rule (76 FR 47836, 47860 through 47863), we are updating the IRF labor-related share for FY 2013. Using this method and the IHS Global Insight, Inc. forecast for the second quarter of 2012 of the 2008-based RPL market basket, the IRF labor-related share for FY 2013 is the sum of the FY 2013 relative importance of each labor-related cost category. This figure reflects the different rates of price change for these cost categories between the base year (FY 2008) and FY 2013. As shown in Table 3, the FY 2013 labor-related share is 69.981 percent.

TABLE 3—FY 2013 IRF RPL LABOR-RELATED SHARE RELATIVE IMPORTANCE

Cost category	FY 2013 IRF labor-related share relative importance
Wages and Salaries	48.796
Employee Benefits	13.021
Professional Fees: Labor-Related	2.070
Administrative and Business Support Services	0.417
All Other: Labor-Related Services	2.077
SUBTOTAL	66.381
Labor-Related Share of Capital Costs (.46)	3.600
TOTAL	69.981

Source: IHS GLOBAL INSIGHT, INC, 2nd QTR, 2012; Historical Data through 1st QTR, 2012.

C. Area Wage Adjustment

Section 1886(j)(6) of the Act requires the Secretary to adjust the proportion of rehabilitation facilities' costs attributable to wages and wage-related costs (as estimated by the Secretary from time to time) by a factor (established by the Secretary) reflecting the relative hospital wage level in the geographic area of the rehabilitation facility compared to the national average wage level for those facilities. The Secretary is required to update the IRF PPS wage index on the basis of information available to the Secretary on the wages and wage-related costs to furnish rehabilitation services. Any adjustments or updates made under section 1886(j)(6) of the Act for a FY are made in a budget neutral manner.

In the FY 2009 IRF PPS final rule (73 FR 46378), we maintained the methodology described in the FY 2006 IRF PPS final rule to determine the wage index, labor market area definitions, and hold harmless policy consistent with the rationale outlined in the FY 2006 IRF PPS final rule (70 FR 47880, 47917 through 47933).

For FY 2013, we are maintaining the policies and methodologies described in the FY 2012 IRF PPS final rule relating to the labor market area definitions and the wage index methodology for areas with wage data. Thus, we are using the CBSA labor market area definitions and the FY 2012 pre-reclassification and pre-floor hospital wage index data. In accordance with section 1886(d)(3)(E) of the Act, the FY 2012 pre-reclassification and pre-floor hospital wage index is based on data submitted for hospital cost reporting periods beginning on or after October 1, 2007 and before October 1, 2008 (that is, 2008 cost report data).

The labor market designations made by the OMB include some geographic areas where there are no hospitals and, thus, no hospital wage index data on which to base the calculation of the IRF PPS wage index. We will continue to use the same methodology discussed in the FY 2008 IRF PPS final rule (72 FR 44299) to address those geographic areas where there are no hospitals and, thus, no hospital wage index data on which to base the calculation of the FY 2013 IRF PPS wage index.

If applicable, we will continue to use the CBSA changes published in the most recent OMB bulletin that applies to the hospital wage data used to determine the current IRF PPS wage index. The OMB bulletins are available online at *http://www.whitehouse.gov/omb/bulletins/index.html*.

To calculate the wage-adjusted facility payment for the payment rates set forth in this notice, we multiply the unadjusted Federal payment rate for IRFs by the FY 2013 labor-related share based on the FY 2008-based RPL market basket (69.981 percent) to determine the labor-related portion of the standard payment amount. We then multiply the labor-related portion by the applicable IRF wage index from the tables in the addendum to this notice. These tables are available through the Internet on the CMS Web site at *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/InpatientRehabFacPPS/*. Table A is for urban areas and Table B is for rural areas.

Adjustments or updates to the IRF wage index made under section 1886(j)(6) of the Act must be made in a budget neutral manner. We calculate a budget neutral wage adjustment factor as established in the FY 2004 IRF PPS final rule (68 FR 45689), codified at § 412.624(e)(1), as described in the steps below. We use the listed steps to ensure that the FY 2013 IRF standard payment conversion factor reflects the update to the wage indexes (based on the FY 2008 hospital cost report data) and the labor-related share in a budget neutral manner:

Step 1. Determine the total amount of the estimated FY 2012 IRF PPS rates, using the FY 2012 standard payment conversion factor and the labor-related share and the wage indexes from FY 2012 (as published in the FY 2012 IRF PPS final rule (76 FR 47836)).

Step 2. Calculate the total amount of estimated IRF PPS payments using the FY 2012 standard payment conversion factor and the FY 2013 labor-related share and CBSA urban and rural wage indexes.

Step 3. Divide the amount calculated in step 1 by the amount calculated in step 2. The resulting quotient is the FY 2013 budget neutral wage adjustment factor of 1.0000.

Step 4. Apply the FY 2013 budget neutral wage adjustment factor from step 3 to the FY 2012 IRF PPS standard payment conversion factor after the application of the adjusted market

basket update to determine the FY 2013 standard payment conversion factor.

We discuss the calculation of the standard payment conversion factor for FY 2013 in section V.D. of this notice.

D. Description of the IRF Standard Payment Conversion Factor and Payment Rates for FY 2013

To calculate the standard payment conversion factor for FY 2013, as illustrated in Table 4, we begin by applying the adjusted market basket increase factor for FY 2013 that was adjusted in accordance with sections 1886(j)(3)(C) and (D) of the Act, to the standard payment conversion factor for FY 2012 ($14,076). Applying the 1.9 percent adjusted market basket increase factor for FY 2013 to the revised standard payment conversion factor for FY 2012 of $14,076 yields a standard payment amount of $14,343. Then, we apply the budget neutrality factor for the FY 2013 wage index and labor related share of 1.0000, which keeps the standard payment amount at $14,343. Finally, we apply the budget neutrality factor for the revised CMG relative weights of 1.0000, which results in a final standard payment conversion factor of $14,343 for FY 2013.

TABLE 4—CALCULATIONS TO DETERMINE THE FINAL FY 2013 STANDARD PAYMENT CONVERSION FACTOR

Explanation for adjustment	Calculations
Standard Payment Conversion Factor for FY 2012	$14,076
Market Basket Increase Factor for FY 2013 (2.7 percent), reduced by 0.1 percentage point in accordance with sections 1886(j)(3)(C) and (D) of the Act and a 0.7 percent reduction for the productivity adjustment as required by section 1886(j)(3)(C)(ii)(I) of the Act	× 1.019
Budget Neutrality Factor for the Wage Index and Labor-Related Share	× 1.0000
Budget Neutrality Factor for the Revisions to the CMG Relative Weights	× 1.0000
Final FY 2013 Standard Payment Conversion Factor	= $14,343

After the application of the CMG relative weights described in section III of this notice, the resulting unadjusted IRF prospective payment rates for FY 2013 are shown below in Table 5, ''FY 2013 Payment Rates.''

TABLE 5—FY 2013 PAYMENT RATES

CMG	Payment rate Tier 1	Payment rate Tier 2	Payment rate Tier 3	Payment rate no comorbidity
0101	$11,513.13	$10,315.49	$9,381.76	$8,970.11
0102	14,314.31	12,825.51	11,663.73	11,153.12

E. Example of the Methodology for Adjusting the Federal Prospective Payment Rates

Table 6 illustrates the methodology for adjusting the Federal prospective payments (as described in sections V.A through V.D of this notice). The following examples are based on two hypothetical Medicare beneficiaries, both classified into CMG 0110 (without comorbidities). The unadjusted Federal prospective payment rate for CMG 0110 (without comorbidities) appears in Table 5 above.

Example: One beneficiary is in Facility A, an IRF located in rural Spencer County, Indiana, and another beneficiary is in Facility B, an IRF located in urban Harrison County, Indiana. Facility A, a rural non-teaching hospital has a disproportionate share hospital (DSH) percentage of 5 percent (which would result in a LIP adjustment of 1.0228), a wage index of 0.8551, and a rural adjustment of 18.4 percent. Facility B, an urban teaching hospital, has a DSH percentage of 15 percent (which would result in a LIP adjustment of 1.0666), a wage index of 0.8900, and a teaching status adjustment of 0.0610.

To calculate each IRF's labor and non-labor portion of the Federal prospective payment, we begin by taking the unadjusted Federal prospective payment rate for CMG 0110 (without comorbidities) from Table 5 above. Then, we multiply the labor-related share for FY 2013 (69.981 percent) described in section V.B of this notice by the unadjusted Federal prospective payment rate. To determine the non-labor portion of the Federal prospective payment rate, we subtract the labor

portion of the Federal payment from the unadjusted Federal prospective payment.

To compute the wage-adjusted Federal prospective payment, we multiply the labor portion of the Federal payment by the appropriate wage index found in Table A and Table B. These tables are available through the Internet on the CMS Web site at *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/InpatientRehabFacPPS/*. The resulting figure is the wage-adjusted labor amount. Next, we compute the wage-adjusted Federal payment by adding the wage-adjusted labor amount to the non-labor portion.

Adjusting the wage-adjusted Federal payment by the facility-level adjustments involves several steps. First, we take the wage-adjusted Federal prospective payment and multiply it by the appropriate rural and LIP adjustments (if applicable). Second, to determine the appropriate amount of additional payment for the teaching status adjustment (if applicable), we multiply the teaching status adjustment (0.0610, in this example) by the wage-adjusted and rural-adjusted amount (if applicable). Finally, we add the additional teaching status payments (if applicable) to the wage, rural, and LIP-adjusted Federal prospective payment rates. Table 6 illustrates the components of the adjusted payment calculation.

TABLE 6—EXAMPLE OF COMPUTING THE IRF FY 2013 FEDERAL PROSPECTIVE PAYMENT

Steps		Rural Facility A (Spencer Co., IN)	Urban Facility B (Harrison Co., IN)
1	Unadjusted Federal Prospective Payment	$30,513.30	$30,513.30
2	Labor Share	× 0.69981	× 0.69981
3	Labor Portion of Federal Payment	= $21,353.51	= $21,353.51
4	CBSA Based Wage Index (shown in the Addendum, Tables 1 and 2)	× 0.8551	× 0.8900
5	Wage-Adjusted Amount	= $18,259.39	= $19,004.63
6	Nonlabor Amount	+ $9,159.79	+ $9,159.79
7	Wage-Adjusted Federal Payment	= $27,419.18	= $28,164.41
8	Rural Adjustment	× 1.184	× 1.000
9	Wage- and Rural-Adjusted Federal Payment	= $32,464.30	= $28,164.41
10	LIP Adjustment	× 1.0228	× 1.0666
11	FY 2013 Wage-, Rural- and LIP-Adjusted Federal Prospective Payment Rate	= $33,204.49	= $30,040.16
12	FY 2013 Wage- and Rural-Adjusted Federal Prospective Payment	$32,464.30	$28,164.41
13	Teaching Status Adjustment	× 0	× 0.0610
14	Teaching Status Adjustment Amount	= $0.00	= $1,718.03
15	FY 2013 Wage-, Rural-, and LIP-Adjusted Federal Prospective Payment Rate	+ $33,204.49	+ $30,040.16
16	Total FY 2013 Adjusted Federal Prospective Payment	= $33,204.49	= $31,758.19

Thus, the adjusted payment for Facility A would be $33,204.49 and the adjusted payment for Facility B would be $31,758.19.

VI. Update to Payments for High-Cost Outliers Under the IRF PPS

A. Update to the Outlier Threshold Amount for FY 2013

Section 1886(j)(4) of the Act provides the Secretary with the authority to make payments in addition to the basic IRF prospective payments for cases incurring extraordinarily high costs. A case qualifies for an outlier payment if the estimated cost of the case exceeds the adjusted outlier threshold. We calculate the adjusted outlier threshold by adding the IRF PPS payment for the case (that is, the CMG payment adjusted by all of the relevant facility-level adjustments) and the adjusted threshold amount (also, adjusted by all of the relevant facility-level adjustments). Then, we calculate the estimated cost of a case by multiplying the IRF's overall CCR by the Medicare allowable covered charge. If the estimated cost of the case is higher than the adjusted outlier threshold, we make an outlier payment for the case equal to 80 percent of the difference between the estimated cost of the case and the outlier threshold.

In the FY 2002 IRF PPS final rule (66 FR 41362 through 41363), we discussed our rationale for setting the outlier threshold amount for the IRF PPS so that estimated outlier payments would equal 3 percent of total estimated payments. For the 2002 IRF PPS final rule, we analyzed various outlier policies using 3, 4, and 5 percent of the total estimated payments, and we concluded that an outlier policy set at 3 percent of total estimated payments would optimize the extent to which we could reduce the financial risk to IRFs of caring for high-cost patients, while still providing for adequate payments for all other (non-high cost outlier) cases.

Subsequently, we updated the IRF outlier threshold amount in the FYs 2006 through 2012 IRF PPS final rules (70 FR 47880, 70 FR 57166, 71 FR 48354, 72 FR 44284, 73 FR 46370, 74 FR 39762, 75 FR 42836, 75 FR 42836, and 76 FR 47836, respectively) to maintain estimated outlier payments at 3 percent of total estimated payments. We also stated in the FY 2009 final rule (73 FR 46370 at 46385) that we would continue to analyze the estimated outlier payments for subsequent years and adjust the outlier threshold amount as appropriate to maintain the 3 percent target.

To update the IRF outlier threshold amount for FY 2013, we use FY 2011 claims data and the same methodology that we used to set the initial outlier threshold amount in the FY 2002 IRF PPS final rule (66 FR 41316 and 41362 through 41363), which is also the same methodology that we used to update the outlier threshold amounts for FYs 2006 through 2012. Based on an analysis of this updated data, we estimate that IRF outlier payments as a percentage of total estimated payments are approximately 2.8 percent in FY 2012. Therefore, we will update the outlier threshold amount to $10,466 to maintain estimated outlier payments at approximately 3 percent of total estimated aggregate IRF payments for FY 2013.

B. Update to the IRF Cost-to-Charge Ratio Ceilings

In accordance with the methodology stated in the FY 2004 IRF PPS final rule (68 FR 45674, 45692 through 45694), we apply a ceiling to IRFs' CCRs. Using the methodology described in that final rule, we update the national urban and rural CCRs for IRFs, as well as the national CCR ceiling for FY 2013, based

on analysis of the most recent data that is available. We apply the national urban and rural CCRs in the following situations:

- New IRFs that have not yet submitted their first Medicare cost report.
- IRFs whose overall CCR is in excess of the national CCR ceiling for FY 2013, as discussed below.
- Other IRFs for which accurate data to calculate an overall CCR are not available.

Specifically, for FY 2013, we estimate a national average CCR of 0.659 for rural IRFs, which we calculated by taking an average of the CCRs for all rural IRFs using their most recently submitted cost report data. Similarly, we estimate a national average CCR of 0.514 for urban IRFs, which we calculated by taking an average of the CCRs for all urban IRFs using their most recently submitted cost report data. We apply weights to both of these averages using the IRFs' estimated costs, meaning that the CCRs of IRFs with higher costs factor more heavily into the averages than the CCRs of IRFs with lower costs. For this notice, we have used the most recent available cost report data (FY 2010). This includes all IRFs whose cost reporting periods began on or after October 1, 2009, and before October 1, 2010. If, for any IRF, the FY 2010 cost report was missing or had an ''as submitted'' status, we used data from the latest settled cost report for FY 2004 through FY 2009. We do not use cost report data from before FY 2004 for any IRF because changes in IRF utilization since FY 2004 resulting from the 60 percent rule and IRF medical review activities suggest that these older data do not adequately reflect the current cost of care.

In accordance with past practice, we set the national CCR ceiling at 3 standard deviations above the mean CCR. Using this method, the national CCR ceiling is set at 1.57 for FY 2013. This means that, if an individual IRF's CCR exceeds this ceiling of 1.57 for FY 2013, we would replace the IRF's CCR with the appropriate national average CCR (either rural or urban, depending on the geographic location of the IRF). We calculate the national CCR ceiling by:

Step 1. Taking the national average CCR (weighted by each IRF's total costs, as discussed above) of all IRFs for which we have sufficient cost report data (both rural and urban IRFs combined).

Step 2. Estimating the standard deviation of the national average CCR computed in step 1.

Step 3. Multiplying the standard deviation of the national average CCR computed in step 2 by a factor of 3 to compute a statistically significant reliable ceiling.

Step 4. Adding the result from step 3 to the national average CCR of all IRFs for which we have sufficient cost report data, from step 1.

VII. Collection of Information Requirements

This document does not impose any new information collection requirements. However, it does provide detailed information about a currently approved information collection request pertaining to the IRF PPS. Specifically, section I.C. of this notice references the Inpatient Rehabilitation Facility-Patient Assessment Instrument (IRF–PAI). As stated in section I.C of this notice, IRFs are required to complete the IRF–PAI upon the admission and discharge of a Medicare Part A fee-for-service patients and upon admission and discharge of each Medicare Part C (Medicare Advantage) patient. The IRF–PAI is currently approved under OMB control number: 0938–0842.

VIII. Waiver of Notice and Comment

We ordinarily publish a notice of proposed rulemaking in the **Federal Register** to provide a period for public comment before the provisions of a rule take effect. We can waive this procedure, however, if we find good cause that notice and comment procedures are impracticable, unnecessary, or contrary to the public interest and we incorporate a statement of finding and its reasons in the notice. We find that it is unnecessary to undertake notice and comment rulemaking for the updates in this notice because the updates contained in this Notice do not make any substantive changes in policy, but merely reflect the application of previously established methodologies. In addition, we applied the statutorily-required adjustments to the update to the IRF–PPS increase factor in sections 1886(j)(3)(C) and (D) of the Act in this notice. We find that notice and comment rulemaking is unnecessary to implement these statutory provisions because they are self-implementing provisions of law, not requiring the exercise of any discretion on the part of the Secretary. Finally, in accordance with 1886(e)(5)(B), we noted MEDPAC's recommendations regarding an appropriate update for the FY 2013 IRF PPS, and the Secretary's inability to implement those recommendations due to the requirements in 1886(j) regarding the establishment of an update factor. As such, the Secretary's recommendation (to follow the statutory requirements thereby applying a 1.9 percent update rather than MEDPAC's recommended 0 percent update) need not be published in a proposed and final rule as such publication is unnecessary in the absence of any discretion regarding the establishment of the update factor. Therefore, under 5 U.S.C. 553(b)(3)(B), for good cause, we waive notice and comment procedures.

IX. Regulatory Impact Analysis

A. Statement of Need

This notice updates the IRF prospective payment rates for FY 2013 as required under section 1886(j)(3)(C) of the Act. It responds to Section 1886(j)(5) of the Act, which requires the Secretary to publish in the **Federal Register** on or before the August 1 that precedes the start of each fiscal year, the classification and weighting factors for the IRF PPS's case-mix groups and a description of the methodology and data used in computing the prospective payment rates for that fiscal year.

This notice also implements sections 1886(j)(3)(C) and (D) of the Act. Section 1886(j)(3)(C)(ii)(I) of the Act requires the Secretary to apply a multi-factor productivity adjustment to the market basket increase factor, and to apply other adjustments as defined by the Act. The productivity adjustment applies to FYs from 2012 forward. The other adjustments apply to FYs 2010 through 2019.

B. Overall Impact

We have examined the impacts of this notice as required by Executive Order 12866 (September 30, 1993, Regulatory Planning and Review), Executive Order 13563 (January 18, 2011, Improving Regulation and Regulatory Review), the Regulatory Flexibility Act (RFA, September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), Executive Order 13132 on Federalism (August 4, 1999), and the Congressional Review Act (5 U.S.C. 804(2)).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. A regulatory impact analysis (RIA) must be prepared for a major notice with

economically significant effects ($100 million or more in any one year). We estimate the total impact of the updates described in this notice by comparing the estimated payments in FY 2013 with those in FY 2012. This analysis results in an estimated $140 million increase for FY 2013 IRF PPS payments. As a result, this notice is designated as economically ''significant'' under section 3(f)(1) of Executive Order 12866, and hence a major notice under the Congressional Review Act.

The Regulatory Flexibility Act (RFA) requires agencies to analyze options for regulatory relief of small entities, if a rule has a significant impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Most IRFs and most other providers and suppliers are small entities, either by having revenues of $7 million to $34.5 million in any 1 year, or by being nonprofit organizations that are not dominant in their markets. (For details, see the Small Business Administration's final rule that set forth size standards for health care industries, at 65 FR 69432 at *http://www.sba.gov/sites/default/files/files/Size_Standards_Table.pdf,* effective March 26, 2012.) Because we lack data on individual hospital receipts, we cannot determine the number of small proprietary IRFs or the proportion of IRFs' revenue that is derived from Medicare payments. Therefore, we assume that all IRFs (an approximate total of 1,200 IRFs, of which approximately 60 percent are nonprofit facilities) are considered small entities and that Medicare payment constitutes the majority of their revenues. The Department of Health and Human Services generally uses a revenue impact of 3 to 5 percent as a significance threshold under the RFA. As shown in Table 7, we estimate that the net revenue impact of this notice on all IRFs is to increase estimated payments by approximately 2.1 percent, with three categories of IRFs (6 rural IRFs in the New England region, 29 rural IRFs in the West North Central region, and 8 rural IRFs in the Mountain region) estimated to receive an increase in estimated payments of 3 percent or more (3.2 percent, 3.0 percent, and 3.1, respectively). As a result, we anticipate this notice would have a positive impact on a substantial number of small entities. Medicare fiscal intermediaries, Medicare Administrative Contractors, and carriers are not considered to be small entities. Individuals and States are not included in the definition of a small entity.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 100 beds. As discussed in detail below, the rates and policies set forth in this notice will not have an adverse impact on rural hospitals based on the data of the 169 rural units and 20 rural hospitals in our database of 1,139 IRFs for which data were available.

Section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–04, enacted on March 22, 1995) also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any one year of $100 million in 1995 dollars, updated annually for inflation. In 2012, that threshold level is approximately $139 million. This notice will not impose spending costs on State, local, or tribal governments, in the aggregate, or by the private sector, of greater than $139 million.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a final rule that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. As stated above, this notice will not have a substantial effect on State and local governments, preempt State law, or otherwise have a Federalism implication.

C. Anticipated Effects of the Notice

1. Basis and Methodology of Estimates

This notice sets forth updates to the IRF PPS rates contained in the FY 2012 final rule (76 FR 47836). Specifically, this notice sets forth updates to the CMG relative weights and average length of stay values, the wage index, and the outlier threshold for high-cost cases. This notice also applies a productivity adjustment to the FY 2013 RPL market basket increase factor in accordance with section 1886(j)(3)(C)(ii)(I) of the Act, and a 0.1 percentage point reduction to the FY 2013 RPL market basket increase factor in accordance with sections 1886(j)(3)(C)(ii)(II) and (D)(ii) of the Act.

We estimate that the FY 2013 impact will be a net increase of $140 million in payments to IRF providers. The impact analysis in Table 7 of this notice represents the projected effects of the updates to IRF PPS payments for FY 2013 compared with the estimated IRF PPS payments in FY 2012. We determine the effects by estimating payments while holding all other payment variables constant. We use the best data available, but we do not attempt to predict behavioral responses to these changes, and we do not make adjustments for future changes in such variables as number of discharges or case-mix.

We note that certain events may combine to limit the scope or accuracy of our impact analysis, because such an analysis is future-oriented and, thus, susceptible to forecasting errors because of other changes in the forecasted impact time period. Some examples could be legislative changes made by the Congress to the Medicare program that would impact program funding, or changes specifically related to IRFs. Although some of these changes may not necessarily be specific to the IRF PPS, the nature of the Medicare program is such that the changes may interact, and the complexity of the interaction of these changes could make it difficult to predict accurately the full scope of the impact upon IRFs.

In updating the rates for FY 2013, we are implementing standard annual revisions described in this notice (for example, the update to the wage and market basket indexes used to adjust the Federal rates). We are also implementing a productivity adjustment to the FY 2013 RPL market basket increase factor in accordance with section 1886(j)(3)(C)(ii)(I) of the Act, and a 0.1 percentage point reduction to the FY 2013 RPL market basket increase factor in accordance with sections 1886(j)(3)(C)(ii)(II) and (D)(ii) of the Act. We estimate the total increase in payments to IRFs in FY 2013, relative to FY 2012, will be approximately $140 million.

This estimate is derived from the application of the FY 2013 RPL market basket increase factor, as reduced by a productivity adjustment in accordance with section 1886(j)(3)(C)(ii)(I) of the Act, and a 0.1 percentage point reduction in accordance with sections 1886(j)(3)(C)(ii)(II) and (D)(ii) of the Act, which yields an increase of aggregate payments to IRFs of $130 million. Furthermore, there is an additional estimated $10 million increase in aggregate payments to IRFs due to the update in the outlier threshold amount. Outlier payments are estimated to increase from approximately 2.8 percent in FY 2012 to 3.0 percent in FY 2013. Therefore, summed together, these

updates will result in a net increase in estimated payments of $140 million from FY 2012 to FY 2013.

The effects of the updates that impact IRF PPS payment rates are shown in Table 7. The following updates that affect the IRF PPS payment rates are discussed separately below:

- The effects of the update to the outlier threshold amount, from approximately 2.8 percent to 3.0 percent of total estimated payments for FY 2013, consistent with section 1886(j)(4) of the Act.
- The effects of the annual market basket update (using the RPL market basket) to IRF PPS payment rates, as required by section 1886(j)(3)(A)(i) and sections 1886(j)(3)(C) and (D) of the Act, including a productivity adjustment in accordance with section 1886(j)(3)(C)(i)(I) of the Act, and a 0.1 percentage point reduction in accordance with sections 1886(j)(3)(C) and (D) of the Act.
- The effects of applying the budget-neutral labor-related share and wage index adjustment, as required under section 1886(j)(6) of the Act.
- The effects of the budget-neutral changes to the CMG relative weights and average length of stay values, under the authority of section 1886(j)(2)(C)(i) of the Act.
- The total change in estimated payments based on the FY 2013 payment updates relative to the estimated FY 2012 payments.

2. Description of Table 7

The table below categorizes IRFs by geographic location, including urban or rural location, and location with respect to CMS's nine census divisions (as defined on the cost report) of the country. In addition, the table divides IRFs into those that are separate rehabilitation hospitals (otherwise called freestanding hospitals in this section), those that are rehabilitation units of a hospital (otherwise called hospital units in this section), rural or urban facilities, ownership (otherwise called for-profit, non-profit, and government), by teaching status, and by disproportionate share patient percentage (DSH PP). The top row of the table shows the overall impact on the 1,139 IRFs included in the analysis.

The next 12 rows of Table 7 contain IRFs categorized according to their geographic location, designation as either a freestanding hospital or a unit of a hospital, and by type of ownership; all urban, which is further divided into urban units of a hospital, urban freestanding hospitals, and by type of ownership; and all rural, which is further divided into rural units of a hospital, rural freestanding hospitals, and by type of ownership. There are 950 IRFs located in urban areas included in our analysis. Among these, there are 739 IRF units of hospitals located in urban areas and 211 freestanding IRF hospitals located in urban areas. There are 189 IRFs located in rural areas included in our analysis. Among these, there are 169 IRF units of hospitals located in rural areas and 20 freestanding IRF hospitals located in rural areas. There are 383 for-profit IRFs. Among these, there are 324 IRFs in urban areas and 59 IRFs in rural areas. There are 697 non-profit IRFs. Among these, there are 579 urban IRFs and 118 rural IRFs. There are 59 government-owned IRFs. Among these, there are 47 urban IRFs and 12 rural IRFs.

The remaining four parts of Table 7 show IRFs grouped by their geographic location within a region, by teaching status, and by DSH PP. First, IRFs located in urban areas are categorized with respect to their location within a particular one of the nine Census geographic regions. Second, IRFs located in rural areas are categorized with respect to their location within a particular one of the nine Census geographic regions. In some cases, especially for rural IRFs located in the New England, Mountain, and Pacific regions, the number of IRFs represented is small. IRFs are then grouped by teaching status, including non-teaching IRFs, IRFs with an intern and resident to average daily census (ADC) ratio less than 10 percent, IRFs with an intern and resident to ADC ratio greater than or equal to 10 percent and less than or equal to 19 percent, and IRFs with an intern and resident to ADC ratio greater than 19 percent. Finally, IRFs are grouped by DSH PP, including IRFs with zero DSH PP, IRFs with a DSH PP less than 5 percent, IRFs with a DSH PP between 5 and less than 10 percent, IRFs with a DSH PP between 10 and 20 percent, and IRFs with a DSH PP greater than 20 percent.

The estimated impacts of each payment update described in this notice to the facility categories listed above are shown in the columns of Table 7. The description of each column is as follows:

- Column (1) shows the facility classification categories described above.
- Column (2) shows the number of IRFs in each category in our FY 2011 analysis file.
- Column (3) shows the number of cases in each category in our FY 2011 analysis file.
- Column (4) shows the estimated effect of the adjustment to the outlier threshold amount.
- Column (5) shows the estimated effect of the update to the IRF PPS payment rates, which includes a productivity adjustment in accordance with section 1886(j)(3)(C)(ii)(I) of the Act, and a 0.1 percentage point reduction in accordance with sections 1886(j)(3)(C)(ii)(II) and (D)(ii) of the Act.
- Column (6) shows the estimated effect of the update to the IRF labor-related share and wage index, in a budget neutral manner.
- Column (7) shows the estimated effect of the update to the CMG relative weights and average length of stay values, in a budget neutral manner.
- Column (8) compares our estimates of the payments per discharge, incorporating all of the payment updates reflected in this notice for FY 2013 to our estimates of payments per discharge in FY 2012.

The average estimated increase for all IRFs is approximately 2.1 percent. This estimated net increase includes the effects of the RPL market basket increase factor for FY 2013 of 2.7 percent, reduced by a productivity adjustment of 0.7 percent in accordance with section 1886(j)(3)(C)(ii)(I) of the Act, and further reduced by 0.1 percentage point in accordance with sections 1886(j)(3)(C)(ii)(II) and (D)(ii) of the Act. It also includes the approximate 0.2 percent overall estimated increase in estimated IRF outlier payments from the update to the outlier threshold amount. Since we are making the updates to the IRF wage index and the CMG relative weights in a budget-neutral manner, they will not affect total estimated IRF payments in the aggregate. However, as described in more detail in each section, they will affect the estimated distribution of payments among providers.

TABLE 7—IRF IMPACT TABLE FOR FY 2013

[Columns 4–8 in %]

Facility classification	Number of IRFs	Number of cases	Outlier	Adjusted market basket increase factor for FY 2013 [1]	FY 2013 CBSA wage index and labor-share	CMG	Total percent change
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)

TABLE 7—IRF IMPACT TABLE FOR FY 2013—Continued

[Columns 4–8 in %]

Facility classification	Number of IRFs	Number of cases	Outlier	Adjusted market basket increase factor for FY 2013 [1]	FY 2013 CBSA wage index and labor-share	CMG	Total percent change
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
DSH PP greater than 20%	229	61,051	0.2	1.9	0.0	−0.1	2.0

[1] This column reflects the impact of the RPL market basket increase factor for FY 2013 of 1.9 percent, which includes a market basket update of 2.7 percent, a 0.1 percentage point reduction in accordance with sections 1886(j)(3)(C)(ii)(II) and 1886(j)(3)(D)(ii) of the Act and a 0.7 percent reduction for the productivity adjustment as required by section 1886(j)(3)(C)(ii)(I) of the Act.

[2] A map of states that comprise the 9 geographic regions can be found at: *http://www.census.gov/geo/www/us_regdiv.pdf*.

3. Impact of the Update to the Outlier Threshold Amount

The outlier threshold adjustment is presented in column 4 of Table 7. In the FY 2012 IRF PPS final rule (76 FR 47867 through 47868), we used FY 2010 IRF claims data (the best, most complete data available at that time) to set the outlier threshold amount for FY 2012 so that estimated outlier payments would equal 3 percent of total estimated payments for FY 2012.

For this notice, we are updating our analysis using FY 2011 IRF claims data and, based on this updated analysis, we estimate that IRF outlier payments as a percentage of total estimated IRF payments are 2.8 percent in FY 2012. Thus, we are adjusting the outlier threshold amount in this notice to set total estimated outlier payments equal to 3 percent of total estimated payments in FY 2013. The estimated change in total IRF payments for FY 2013, therefore, includes an approximate 0.2 percent increase in payments because the estimated outlier portion of total payments is estimated to increase from approximately 2.8 percent to 3 percent.

The impact of this outlier adjustment update (as shown in column 4 of Table 7) is to increase estimated overall payments to IRFs by about 0.2 percent. We estimate the largest increase in payments from the update to the outlier threshold amount to be 0.6 percent for rural IRFs in the Pacific region. We do not estimate that any group of IRFs will experience a decrease in payments from this update.

4. Impact of the Market Basket Update to the IRF PPS Payment Rates

The adjusted market basket update to the IRF PPS payment rates is presented in column 5 of Table 7. In the aggregate the update would result in a net 1.9 percent increase in overall estimated payments to IRFs. This net increase reflects the estimated RPL market basket increase factor for FY 2013 of 2.7 percent, reduced by the 0.1 percentage point in accordance with sections 1886(j)(3)(C)(ii)(II) and 1886(j)(3)(D)(ii) of the Act, and further reduced by a 0.7 percent productivity adjustment as required by section 1886(j)(3)(C)(ii)(I) of the Act.

5. Impact of the CBSA Wage Index and Labor-Related Share

In column 6 of Table 7, we present the effects of the budget neutral update of the wage index and labor-related share. The changes to the wage index and the labor-related share are discussed together because the wage index is applied to the labor-related share portion of payments, so the changes in the two have a combined effect on payments to providers. As discussed in section V.B of this notice, the labor-related share decreased from 70.199 percent in FY 2012 to 69.981 percent in FY 2013.

In the aggregate, since these updates to the wage index and the labor-related share are applied in a budget-neutral manner as required under section 1886(j)(6) of the Act, we do not estimate that these updates will affect overall estimated payments to IRFs. However, we estimate that these updates will have small distributional effects. For example, we estimate the largest increase in payments from the update to the CBSA wage index and labor-related share of 0.9 percent for rural IRFs in the New England region. We estimate the largest decrease in payments from the update to the CBSA wage index and labor-related share to be a 0.7 percent decrease for rural IRFs in the South Atlantic region.

6. Impact of the Update to the CMG Relative Weights and Average Length of Stay Values

In column 7 of Table 7, we present the effects of the budget neutral update of the CMG relative weights and average length of stay values. In the aggregate we do not estimate that these updates will affect overall estimated payments to IRFs. However, we estimate that these updates will have small distributional effects. The largest estimated decrease in payments as a result of these updates is a 0.2 percent decrease to urban freestanding IRFs. The largest estimated increase in payments as a result of these updates is a 0.5 percent increase to rural IRFs in the Mountain region.

D. Alternatives Considered

As stated in section 1X. B of this notice, the notice results in a positive economic impact on IRFs. The overall impact on all IRFs is an estimated increase in FY 2013 payments of 2.1 percent, relative to FY 2012, with three categories of IRFs (6 rural IRFs in the New England region, 29 rural IRFs in the West North Central region, and 8 rural IRFs in the Mountain region) estimated to receive an increase in estimated payments of 3 percent or more (3.2 percent, 3.0 percent, 3.1 percent, respectively). The following is a discussion of the alternatives considered to the IRF PPS updates contained in this notice.

Section 1886(j)(3)(C) of the Act requires the Secretary to update the IRF PPS payment rates by an increase factor that reflects changes over time in the prices of an appropriate mix of goods and services included in the covered IRF services. Thus, we did not consider alternatives to updating payments using the estimated RPL market basket increase factor for FY 2013. However, as noted previously in this notice, section 1886(j)(3)(C)(ii)(I) requires the Secretary to apply a productivity adjustment to the market basket increase factor for FY 2013 and sections 1886(j)(3)(C)(ii)(II) and 1886(j)(3)(D)(ii) of the Act require the Secretary to apply a 0.1 percentage point reduction to the market basket increase factor for FY 2013. Thus, in accordance with section 1886(j)(3)(C) of the Act, we are updating IRF Federal prospective payments in this notice by

1.9 percent (which equals the 2.7 percent estimated RPL market basket increase factor for FY 2013 reduced by 0.1 percentage points, and further reduced by a 0.7 percent productivity adjustment as required by section 1886(j)(3)(C)(ii)(I) of the Act).

We considered maintaining the existing CMG relative weights and average length of stay values for FY 2013. However, in light of recently available data and our desire to ensure that the CMG relative weights and average length of stay values are as reflective as possible of recent changes in IRF utilization and case mix, we believe that it is appropriate to update the CMG relative weights and average length of stay values at this time to ensure that IRF PPS payments continue to reflect as accurately as possible the current costs of care in IRFs.

We considered maintaining the existing outlier threshold amount for FY 2013. However, analysis of updated FY 2011 data indicates that estimated outlier payments would be lower than 3 percent of total estimated payments for FY 2012, by approximately 0.2 percent, unless we updated the outlier threshold amount. Consequently, we are adjusting the outlier threshold amount in this notice to reflect a 0.2 percent increase thereby setting the total outlier payments equal to 3 percent, instead of 2.8 percent, of aggregate estimated payments in FY 2013.

E. Accounting Statement

As required by OMB Circular A–4 (available at *http://www.whitehouse.gov/sites/default/files/omb/assets/omb/circulars/a004/a-4.pdf*), in Table 8 below, we have prepared an accounting statement showing the classification of the expenditures associated with the provisions of this notice. This table provides our best estimate of the increase in Medicare payments under the IRF PPS as a result of the updates presented in this notice based on the data for 1,139 IRFs in our database.

TABLE 8—ACCOUNTING STATEMENT: CLASSIFICATION OF ESTIMATED EXPENDITURES, FROM THE 2012 IRF PPS FISCAL YEAR TO THE 2013 IRF PPS FISCAL YEAR

Category	Transfers
Annualized Monetized Transfers	$140 million.
From Whom to Whom?	Federal Government to IRF Medicare Providers.

F. Conclusion

Overall, the estimated payments per discharge for IRFs in FY 2013 are projected to increase by 2.1 percent, compared with the estimated payments in FY 2012, as reflected in column 8 of Table 7. IRF payments per discharge are estimated to increase 2.0 percent in urban areas and 2.2 percent in rural areas, compared with estimated FY 2012 payments. Payments per discharge to rehabilitation units are estimated to increase 2.2 percent in urban areas and 2.3 percent in rural areas. Payments per discharge to freestanding rehabilitation hospitals are estimated to increase 1.9 percent in urban areas and 1.7 percent in rural areas.

Overall, no IRFs are estimated to experience a net decrease in payments as a result of the updates in this notice. The largest payment increase is estimated to be a 3.2 percent increase for rural IRFs located in the New England region. This is due to the larger than average positive effect of the FY 2013 CBSA wage index and labor-related share updates for rural IRFs in this region.

In accordance with the provisions of Executive Order 12866, this notice was reviewed by the Office of Management and Budget.

Authority: (Catalog of Federal Domestic Assistance Program No. 93.773, Medicare—Hospital Insurance; and Program No. 93.774, Medicare—Supplementary Medical Insurance Program).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2012–D–0049]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Reporting Harmful and Potentially Harmful Constituents in Tobacco Products and Tobacco Smoke Under the Federal Food, Drug, and Cosmetic Act

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under Paperwork Reduction Act of 1995.

DATES: Fax written comments on the collection of information by August 29, 2012.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be faxed to the Office of Information and Regulatory Affairs, OMB, Attn: FDA Desk Officer, FAX: 202–395–7285, or emailed to *oira_submission@omb.eop.gov.* All comments should be identified with the OMB control number 0910–NEW and title ''Reporting Harmful and Potentially Harmful Constituents in Tobacco Products and Tobacco Smoke Under the Federal Food, Drug, and Cosmetic Act.'' Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Daniel Gittleson, Office of Information Management, Food and Drug Administration, 1350 Piccard Dr., PI50–400B, Rockville, MD 20850, 301–796–5156, *Daniel.Gittleson@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

Reporting Harmful and Potentially Harmful Constituents in Tobacco Products and Tobacco Smoke Under the Federal Food, Drug, and Cosmetic Act—(OMB Control Number 0910–NEW)

On June 22, 2009, the President signed the Family Smoking Prevention and Tobacco Control Act (Public Law 111–31) into law. This law amends the Federal Food, Drug, and Cosmetic Act (FD&C Act) and grants FDA authority to

regulate the manufacture, marketing, and distribution of tobacco products to protect public health generally and to reduce tobacco use by minors. Section 904(a)(3) of the FD&C Act (21 U.S.C. 387d(a)(3)) requires each tobacco product manufacturer or importer, or an agent, to begin reporting to FDA no later than June 22, 2012, ''all constituents, including smoke constituents, identified by [FDA] as harmful or potentially harmful to health in each tobacco product, and as applicable in the smoke of each tobacco product.'' Reports must be by the brand and by quantity in each brand and subbrand. Section 904(c)(1) of the FD&C Act states that manufacturers of tobacco products not on the market as of June 22, 2009, must also provide information reportable under section 904(a)(3) at least 90 days prior to introducing the product into interstate commerce.

FDA has taken several steps to identify harmful and potentially harmful constituents (HPHCs) to be reported under sections 904(a)(3) and (c)(1) of the FD&C Act, including issuing a final guidance discussing FDA's current thinking on the meaning of ''harmful and potentially harmful constituent'' in the context of implementing the HPHC list requirement (76 FR 5387, January 31, 2011). The guidance is available on the Internet at *http://www.fda.gov/TobaccoProducts/GuidanceComplianceRegulatoryInformation/ucm241339.htm.* In addition, in the **Federal Register** of April 3, 2012 (77 FR 20034), FDA published a notice (the HPHC list notice) announcing the established list of HPHCs as required by section 904(e) of the FD&C Act and describing the criteria we used in identifying the HPHCs for the established list. Previously, FDA sought comment on both the criteria that would be used to identify HPHCs for the established list and a list of chemicals and chemical compounds that met the proposed criteria.

In the **Federal Register** of April 3, 2012 (77 FR 20030), FDA announced the availability of a draft guidance entitled ''Guidance for Industry: Reporting Harmful and Potentially Harmful Constituents in Tobacco Products and Tobacco Smoke Under Section 904(a)(3) of the Federal Food, Drug, and Cosmetic Act'' (904(a)(3) draft guidance) discussing the information to be reported on HPHCs in tobacco products and tobacco smoke under sections 904(a)(3) and (c)(1) of the FD&C Act. The 904(a)(3) draft guidance discusses, among other things: The statutory requirement for testing and reporting quantities of HPHCs, who tests and reports quantities of HPHCs to FDA, what HPHCs will be the focus of FDA enforcement at this time, when reports are submitted to FDA, what information is reported to FDA, and how the reports should be submitted to FDA. The 904(a)(3) draft guidance notifies manufacturers and importers that, at this time, while industry is developing laboratory capacity to comply with section 904(a)(3) of the FD&C Act, FDA does not intend to enforce the statutory requirement to submit quantities of all constituents identified by FDA as HPHCs by June 22, 2012, where manufacturers or importers complete testing and reporting for an abbreviated list of HPHCs as set forth in the 904(a)(3) draft guidance. In particular, at this time, for products that were first marketed before June 22, 2012, FDA does not intend to enforce the section 904(a)(3) requirement to test and report quantities of all HPHCs on FDA's established list where: (1) A manufacturer or importer (or agents thereof), other than a small tobacco product manufacturer, submits quantities of the HPHCs on an abbreviated list described in the guidance for all of its products, by brand and subbrand, no later than September 22, 2012 or (2) a small tobacco product manufacturer (or agents thereof) submits quantities of HPHCS on the abbreviated list for all of its products, by brand and subbrand, by December 22, 2012. In addition, for products first marketed on or after June 22, 2012, the 904(a)(3) draft guidance explains that FDA does not intend, at this time, to enforce the requirement in section 904(c)(1) of the FD&C Act to test and report quantities of all HPHCs on FDA's established list for products not previously on the market if a manufacturer or importer reports quantities for the abbreviated list of HPHCs at least 90 days prior to marketing the product in the United States. The 904(a)(3) draft guidance explains that, at this time, FDA intends to enforce the HPHC reporting requirements with respect to manufacturers of finished tobacco products for consumer use—cigarettes, smokeless tobacco, and roll-your-own tobacco—and not with respect to manufacturers and importers of other products, such as components sold to manufacturers or consumers for incorporation into finished products.

The purpose of the proposed information collection is for FDA to collect statutorily mandated information regarding HPHCs in tobacco products and tobacco smoke, by quantity in each brand and subbrand. The 904(a)(3) draft guidance provides an abbreviated list of HPHCs on which FDA intends to focus enforcement at this time for each of the following: Cigarette smoke, smokeless tobacco products, and roll-your-own tobacco and cigarette filler.

To facilitate the submission of HPHC information, FDA has developed Form 3787 in both paper and electronic formats. Manufacturers or importers, or an agent, may submit information either electronically or in paper format. The FDA eSubmitter tool provides electronic forms to streamline the data entry and submission process for reporting HPHCs. Users of eSubmitter may also populate an Excel file and import data into eSubmitter. FDA also provides paper forms for the submission of section 904(a)(3) reports. FDA placed draft copies of the paper forms and screen shots of the electronic form and spreadsheet in this docket. Whether respondents decide to submit reports electronically or on paper, each form provides instructions for filling out and submitting HPHC information to FDA. The forms contain fields for company information, product information, and HPHC information (including the specific HPHCs identified in the 904(a)(3) draft guidance).

The **Federal Register** notice announcing the availability of the 904(a)(3) draft guidance included a 60-day notice requesting public comment on the proposed collection of information. FDA received 16 comments that were PRA-related, including but not limited to the following issues:

- Suggestions to enhance the quality, utility, and clarity of the information to be collected (i.e., comments specific to FDA's eSubmitter tool and paper forms);
- Cost associated with the collection of information to comply with section 904(a)(3) of the FD&C Act, particularly for small tobacco product manufacturers; and
- Use of the proposed information collection, especially because specific test methods are not prescribed to determine HPHC quantities.

Section 904(a)(3) of the FD&C Act requires HPHC testing and reporting. We have stated that we intend to exercise enforcement discretion for manufacturers who test for 20 rather than 93 HPHCs at this time. In addition, we have recognized that small tobacco product manufacturers are likely to rely on contract testing laboratories and intend to exercise enforcement discretion for those who submit quantities of HPHCs 6 months after the statutory deadline (i.e., December 22, 2012), and 3 months after submissions by other tobacco product manufacturers. Our abbreviated list of HPHCs, along with the timeframes described in the

draft guidance, represent a reasonable approach to implementing section 904(a)(3) of the FD&C Act.

Based on comments received, FDA has revised the instructions for FDA Form 3787 to explain that if the HPHC quantity is below the limit of detection or limit of quantitation, zero should be entered in the space identified for form. We have also made minor cosmetic changes to clarify instructions and to allow accurate data entry. FDA has not revised the burden estimate for this collection of information.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

Information collected	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Part 1—Section 904(a)(3) of the FD&C Act (Annualized estimate of one-time reporting) [2]					
1. Reporting of Manufacturer/Importer Company and Product Information by Completing Submission Forms					
Cigarette	120	10.10	1,212	2	2,424
Roll-Your-Own	46	3.22	148	2	296
Smokeless	200	1.44	288	2	576
Total					3,296
2. Testing of HPHC Quantities in Products					
Cigarette Filler	120	10.1	1,212	9.42	11,417
Roll-Your-Own	46	3.22	148	9.42	1,394
Smokeless	200	1.44	288	12.06	3,473
Total					16,284
3. Testing of HPHC Quantities in Mainstream Smoke					
Cigarette: International Organization for Standardization (ISO) Regimen	120	10.1	1,212	23.64	28,652
Cigarette: Health Canada Regimen	120	10.1	1,212	23.64	28,652
Total					57,304
Total Section 904(a)(3) Annualized One-Time Burden					76,884
Part 2—Reporting of Section 904(c)(1) New Products (15% of One-Time Burden Totals) [3]					
1. Reporting of Manufacturer/Importer Company and Product Information by Completing Submission Forms					
Cigarette	18	10.10	182	2	364
Roll-Your-Own	7	3.22	23	2	46
Smokeless	30	1.44	43	2	86
Total					496
2. Reporting of HPHC Quantities in Products					
Cigarette Filler	18	10.1	182	9.42	1,714
Roll-Your-Own	7	3.22	23	9.42	217
Smokeless	30	1.44	43	12.06	519
Total					2,450
3. Reporting of HPHC Quantities in Mainstream Smoke					
Cigarette: ISO Regimen	18	10.1	182	23.64	4,302
Cigarette: Health Canada Regimen	18	10.1	182	23.64	4,302
Total					8,604
Total Section 904(c)(1) Burden					11,550
Total Reporting Burden Hours					88,434

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

[2] One-time actual first year burden hours have been annualized over the 3-year OMB period of approval to avoid over counting the burden each year.

[3] Annual new product reporting under section 904(c)(1) of the FD&C Act is estimated to be 15 percent of the annualized one-time burden.

FDA estimates the one-time reporting burden for this guidance would be 230,652 hours during the first year for section 904(a)(3) of the FD&C Act reporting plus ongoing annual burden of 11,550 hours for section 904(c)(1) reporting. The burden estimate for this collection of information includes the time it will take to read the guidance document, test the products, and prepare the HPHC report.

To avoid overcounting the one-time reporting burden, FDA has annualized the one-time burden over the 3-year expected OMB period of approval. The annualized one-time burden of 76,884 hours is located in part one of table 1 of this document, and includes burden for collections of information gathered under section 904(a)(3) of the FD&C Act. The total annual burden for this collection of information is estimated to be 88,434 hours, which is the annualized one-time burden estimate for section 904(a)(3) of the FD&C Act associated with the submission of HPHC reports and the annual burden estimate for section 904(c)(1). Table 1 of this document estimates 366 respondents will submit HPHC reports on a one-time basis. Table 1 of this document addresses the time required for manufacturers and importers to report their company information. We estimate that the burden is no more than 2 hours per response to report company and product information, regardless of whether the paper or electronic form (Form FDA 3787) is used. This estimate is not dependent on product type, so the estimated burden is the same for cigarettes, roll-your-own tobacco, and smokeless tobacco products. We also estimate that 3,636 cigarette subbrands, 445 roll-your-own tobacco subbrands, and 861 smokeless tobacco subbrands (4,942 total subbrands) must comply with section 904(a)(3) of the FD&C Act. Therefore, the total annualized burden for reporting company and product information is 3,296 hours.

Table 1 of this document also addresses the time required for manufacturers and importers to report quantities of HPHCs in their products. The burden hour estimates include the time needed to test the tobacco products, draft testing reports, draft the report for FDA, and submit the report to FDA. For cigarette filler, smokeless, and roll-your-own products, we estimate the burden to test the product, draft testing reports, draft the report for FDA, and submit the report to FDA to be 16,284 annualized burden hours. The burden for each product type reflects our estimate of the burden to test the tobacco products (i.e., carry out laboratory work).

In addition to addressing the time required to report quantities of HPHCs in tobacco products, table 1 of this document addresses the time required for manufacturers and importers to report quantities for HPHCs in cigarette smoke. The burden estimates include testing the tobacco products, drafting testing reports, drafting the report for FDA, and submitting the report to FDA. We estimate the annualized burden for this section to be 57,304 hours. The annualized burden reflects our estimate of the burden to test the tobacco products (i.e., carry out laboratory work). The burden estimate assumes that manufacturers and importers report HPHC quantities in cigarette mainstream smoke according to the two recommended smoking regimens. The total annualized burden for part one of table 1 (section 904(a)(3) reporting) is 76,884 hours.

Table 1 of this document also contains estimates for new product information received annually under section 904(c)(1) of the FD&C Act. Manufacturers and importers must report HPHC information under section 904(c)(1) of the FD&C Act at least 90 days prior to delivery for introduction into interstate commerce. We estimate that approximately 15 percent of FDA currently regulated tobacco products in any given year will require submission of this information. The estimated total annual burden for section 904(c)(1) of the FD&C Act is 11,550 hours, which includes reporting manufacturer/importer company and product information, reporting HPHC quantities in products, and reporting HPHC quantities in mainstream smoke.

The estimated total annual burden for the reporting of HPHC under section 904(a)(3) and (c)(1) of the FD&C Act is 88,434 hours, which includes the section 904(a)(3) annualized reporting burden plus the section 904(c)(1) annual reporting burden.

We have not estimated any capital costs because we do not believe there are any capital costs associated with this collection. However, you may comment on any specific capital costs that you have identified.

Dated: July 24, 2012.

Leslie Kux,

Assistant Commissioner for Policy.

BILLING CODE 4160–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2012–N–0001]

Pediatric Advisory Committee; Notice of Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). The meeting will be open to the public.

Name of Committee: Pediatric Advisory Committee.

General Function of the Committee: To provide advice and recommendations to the Agency on FDA's regulatory issues.

Date and Time: The meeting will be held on September 11, 2012, from 8:30 a.m. to 4 p.m.

Location: DoubleTree by Hilton Hotel, 8727 Colesville Rd., Silver Spring, MD 20910. The hotel's telephone number is 301–589–5200.

Contact Person: Walter Ellenberg, Office of Pediatric Therapeutics, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Rm. 5154, Silver Spring, MD. 20993, 301–796–0885, or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area), to find out further information regarding FDA advisory committee information. A notice in the **Federal Register** about last minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check the Agency's Web site at *http://www.fda.gov/AdvisoryCommittees/default.htm* and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before coming to the meeting.

Agenda: On September 11, 2012, the Pediatric Advisory Committee will meet to discuss pediatric-focused safety reviews, as mandated by the Best Pharmaceuticals for Children Act (Public Law 107–109) and the Pediatric Research Equity Act (Public Law 108–155), for Kapvay (clonidine hydrochloride), Vyvanse (lisdexamfetamine dimesylate), Ofirmev (acetaminophen), ella (ulipristal acetate), Beyaz (drospirenone/ethinyl estradiol/levomefolate calcium tablets and levomefolate calcium tablets), Lo

Loestrin Fe (norethindrone acetate and ethinyl estradiol ethinyl estradiol and ferrous fumarate), Aridol (mannitol inhalation powder), Augmentin XR (amoxicillin/clavulanate potassium), Afinitor (everolimus), Moxeza (moxifloxacin hydrochloride), and Lastacaft (alcaftadine).

As mandated by the Food and Drug Administration Amendments Act, Title III, Pediatric Medical Device Safety and Improvement Act of 2007 (Public Law 110–85), the committee will discuss the safety of and the ongoing propriety of the humanitarian device exemption for the Melody Transcatheter Pulmonary Valve and Ensemble Delivery System and the Elana Surgical Kit.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its Web site prior to the meeting, the background material will be made publicly available at the location of the advisory committee meeting, and the background material will be posted on FDA's Web site after the meeting. Background material is available at *http://www.fda.gov/AdvisoryCommittees/Calendar/default.htm*. Scroll down to the appropriate advisory committee link.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person on or before September 4, 2012. Oral presentations from the public will be scheduled between approximately 11:30 a.m. and 12:30 p.m. on September 11, 2012. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before August 24, 2012. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by August 27, 2012.

Persons attending FDA's advisory committee meetings are advised that the Agency is not responsible for providing access to electrical outlets.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Walter Ellenberg (*walter.ellenberg@fda.hhs.gov*) or 301–796–0885 at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our Web site at *http://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm* for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: July 24, 2012.

Jill Hartzler Warner,

Acting Associate Commissioner for Special Medical Programs.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS–2012–0001]

Critical Infrastructure Private Sector Clearance Program Request

AGENCY: National Protection and Programs Directorate, DHS.

ACTION: 30-day notice and request for comments;

Reinstatement, with change, of a previously approved collection.

SUMMARY: The Department of Homeland Security (DHS), National Protection and Programs Directorate (NPPD), Office of Infrastructure Protection (IP) will submit the following Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chapter 35). NPPD is soliciting comments concerning Reinstatement, with change, of a previously approved ICR for the Critical Infrastructure Private Sector Clearance Program (PSCP). DHS previously published this ICR in the **Federal Register** on April 12, 2012, for a 60-day public comment period. DHS received no comments. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until August 29, 2012. This process is conducted in accordance with 5 CFR 1320.10.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, OMB. Comments should be addressed to OMB Desk Officer, DHS, Office of Civil Rights and Civil Liberties. Comments must be identified by DHS–2012–0001 and may be submitted by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.*
- *Email: oira_submission@omb.eop.gov*. Include the docket number in the subject line of the message.
- *Fax:* (202) 395–5806.

Instructions: All submissions received must include the words ''Department of Homeland Security'' and the docket number for this action. Comments received will be posted without alteration at *http://www.regulations.gov*, including any personal information provided.

OMB is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

FOR FURTHER INFORMATION CONTACT: Monika Junker, DHS/NPPD/IP, *monika.junker@dhs.gov*, (703) 235–8229.

SUPPLEMENTARY INFORMATION: PSCP sponsors clearances for private sector partners who are responsible for critical infrastructure protection but would not otherwise be eligible for a clearance under Executive Order 12829. These partners are subject matter experts within specific industries and sectors. The PSCP requires individuals to complete a clearance request form that initiates the clearance process. DHS Sector Specialists or Protective Security Advisors email the form to the individual who then emails back the completed form, minus their date and place of birth and social security number. The clearance request form is signed by both the Federal official who nominated the applicant and the Assistant Secretary for Infrastructure Protection. Upon approval to process, the PSCP Administrator contacts the nominee to obtain the social security number, date and place of birth, and will then enter this data into e-QIP—Office of Personnel Management's secure portal for investigation processing. Once the data is entered in e-QIP, the applicant can complete the online security questionnaire. The PSCP maintains all applicants' information in the Master Roster, which contains all the information found on the clearance request form in addition to their clearance information (date granted, level of clearance, date non-disclosure agreements signed, and type/date of investigation). The Administrator of the Master Roster maintains the information to track clearance processing and investigation information and to have the most current contact information for the participants from each sector.

Analysis

Agency: Department of Homeland Security, National Protection and Programs Directorate, Office of Infrastructure Protection.

Title: Critical Infrastructure Private Sector Clearance Program.

OMB Number: 1670–0013.

Frequency: Once.

Affected Public: Designated private sector employees of critical infrastructure entities or organizations.

Number of Respondents: 450 (estimate).

Estimated Time Per Respondent: 10 minutes.

Total Burden Hours: 75.

Total Burden Cost (capital/startup): $0.

Total Recordkeeping Burden: $0.

Total Burden Cost (operating/maintaining): $0.

Dated: July 24, 2012.

Scott Libby,

Acting Chief Information Officer, National Protection and Programs Directorate, Department of Homeland Security.

BILLING CODE 9110–9P–P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS–2012–0037]

President's National Security Telecommunications Advisory Committee

AGENCY: National Protection and Programs Directorate, DHS.

ACTION: Committee Management; Notice of an Open Federal Advisory Committee Teleconference.

SUMMARY: The President's National Security Telecommunications Advisory Committee (NSTAC) will meet on Thursday, August 16, 2012, via a conference call. The meeting will be open to the public.

DATES: The NSTAC will meet Thursday, August 16, 2012, from 2:00 p.m. to 3:15 p.m. Please note that the meeting may close early if the committee has completed its business.

ADDRESSES: The meeting will be held via a conference call. For access to the

conference bridge, contact Ms. Deirdre Gallop-Anderson by email at *deirdre.gallop-anderson@dhs.gov* by 5:00 p.m. on August 9, 2012.

To facilitate public participation, we are inviting public comment on the issues to be considered by the committee as listed in the ''Supplementary Information'' section below. Documents associated with the issues to be discussed during the conference will be available at *www.ncs.gov/nstac* for review by August 10, 2012. Written comments must be received by the NSTAC Designated Federal Officer no later than August 30, 2012 and may be submitted by any *one* of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting written comments.
- *Email: NSTAC@hq.dhs.gov*. Include the docket number in the subject line of the email message.
- *Fax:* (703) 235–4981.
- *Mail:* Alternate Designated Federal Officer, National Communications System, National Protection and Programs Directorate, Department of Homeland Security, 245 Murray Lane, Mail Stop 0615, Arlington, VA 20598–0615.

Instructions: All submissions received must include the words ''Department of Homeland Security'' and the docket number for this action. Comments received will be posted without alteration at *www.regulations.gov*, including any personal information provided.

Docket: For access to the docket, including all documents and comments received by the NSTAC, go to *www.regulations.gov*.

A public comment period will be held during the meeting on August 16, 2012, from 2:55 p.m. to 3:10 p.m. Speakers who wish to participate in the public comment period must register in advance no later than 5:00 p.m. on August 9, 2012, by emailing Deirdre Gallop-Anderson at *deirdre.gallop-anderson@dhs.gov*. Speakers are requested to limit their comments to three minutes and will speak in order of registration as time permits. Please note that the public comment period may end before the time indicated, following the last call for comments.

FOR FURTHER INFORMATION CONTACT: Allen F. Woodhouse, NSTAC Alternate Designated Federal Officer, Department of Homeland Security, telephone (703) 235–4900.

SUPPLEMENTARY INFORMATION: Notice of this meeting is given under the Federal Advisory Committee Act, 5 U.S.C. App. (Pub. L. 92–463). The NSTAC advises the President on matters related to national security and emergency preparedness telecommunications policy.

Agenda: The NSTAC members will receive an update on progress made to date by the Nationwide Public Safety Broadband Network (NPSBN) Research Subcommittee. The NPSBN Research Subcommittee is focusing on what National Security Emergency Preparedness (NS/EP) policy changes should be considered in order to: (1) Facilitate priority access that may be required across the diverse community of potential NPSBN users, particularly during NS/EP situations; (2) support NPSBN access, interoperability, security, reliability, and resiliency; and (3) help ensure the deployment and evolution of the NPSBN is in such a manner that accounts for each state and local jurisdiction's diverse capabilities, while helping to ensure scalability to the national level.

Next, NSTAC members will discuss the findings of their review of the Department of Homeland Security's (DHS) National Cybersecurity and Communications Integration Center (NCCIC). During the NSTAC meeting on May 15, 2012, the National Security Staff asked the NSTAC to conduct a review of the NCCIC to determine if it is operating in ways consistent with the NSTAC's proposed Joint Collaboration Center that the NSTAC envisioned in its 2009 Cybersecurity Collaboration Report.

The NSTAC, in coordination with senior leaders from the White House and DHS, will also address potential NSTAC taskings such as the National Security Staff's request for the NSTAC to examine how commercial off-the-shelf technologies and private sector best practices can be used to secure unclassified communications between and among Federal civilian departments and agencies.

Additionally, there will be a discussion regarding whether further study is warranted of the NSTAC's recommendation to develop a separate ''out-of-band'' data network supporting communications among carriers, Internet service providers, vendors, and additional critical infrastructure owners and operators during a severe cyber incident that renders the Internet unusable.

Dated: July 23, 2012.

Michael Echols,

Alternate Designated Federal Officer for the NSTAC.

BILLING CODE 9110–9P–P

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

[Docket No. DHS–2012–0045]

Privacy Act of 1974; Department of Homeland Security U.S. Customs and Border Protection-DHS/CBP–009 Electronic System for Travel Authorization (ESTA) System of Records

AGENCY: Privacy Office, Department of Homeland Security.

ACTION: Notice of Privacy Act system of records.

SUMMARY: In accordance with the Privacy Act of 1974, the Department of Homeland Security (DHS) proposes to update and reissue a current DHS system of records titled, ''Department of Homeland Security/U.S. Customs and Border Protection-DHS/CBP–009 Electronic System for Travel Authorization (ESTA) System of Records.'' This system collects and maintains a record of nonimmigrant aliens seeking to travel to the United States under the Visa Waiver Program. The system is used to determine whether the applicant is eligible to travel to the United States under the Visa Waiver Program by vetting the application information against selected security and law enforcement databases using U.S. Customs and Border Protection (CBP) TECS and the Automated Targeting System (ATS). In addition, ATS retains a copy of ESTA application data to identify potential high-risk ESTA applicants. DHS/CBP is updating this system of records notice to clarify the categories of individuals and remove unnecessary language, add the Internet Protocol address associated with the submitted ESTA application as a category of records, provide more specific legal authorities, clarify the purposes to include the identification of high-risk applicants, include an additional routine use for judicial proceedings and update and clarify other routine uses, clarify the retention of records in ESTA and the Nonimmigrant Information System (DHS/CBP–016—Nonimmigrant Information System December 19, 2008 73 FR 77739), update the notification procedures to explain the extension of access procedures to international travelers, allow limited direct access and amendment of ESTA application data, and add the CPB access request address; eliminate unnecessary language from the record source categories, and clarify which exemptions will be used for which provisions of the Privacy Act.

The Department of Homeland Security issued a Final Rule to exempt this system of records from certain provisions of the Privacy Act on August 31, 2009 (74 Fed. Reg. 45069). These regulations remain in effect. This updated system will be included in the DHS inventory of record systems.

DATES: Submit comments on or before August 29, 2012. This revised system will be effective August 29, 2012.

ADDRESSES: You may submit comments, identified by docket number DHS–2012–0045 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 703–483–2999.
- *Mail:* Mary Ellen Callahan, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

Instructions: All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

Docket: For access to the docket to read background documents or comments received, visit *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: For general questions please contact: Laurence E. Castelli (202) 325–0280, CBP Privacy Officer, Office of International Trade, U.S. Customs and Border Protection, Mint Annex, 799 Ninth Street NW., Washington, DC 20229. For privacy issues please contact: Mary Ellen Callahan (703) 235–0780, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS), U.S. Customs and Border Protection (CBP) proposes to update and reissue an existing DHS system of records titled, ''DHS/CBP–009 Electronic System for Travel Authorization (ESTA) System of Records.''

ESTA is a web-based system that DHS/CBP developed in 2008 to determine the eligibility of aliens to travel under the Visa Waiver Program (VWP) to the United States by air or sea. The authority to collect information required in an ESTA application may be found in Section 217(h)(3) of the Immigration and Nationality Act (INA), 8 U.S.C. 1187(h)(3). An eligibility determination under ESTA is made prior to a visitor boarding a carrier en route to the United States, and is accomplished by vetting the information against selected security and law enforcement databases using CBP TECS and the Automated Targeting System (ATS) to determine whether such travel poses a law enforcement or security risk. In addition, ATS retains a copy of ESTA application data to identify potential high-risk ESTA applicants. DHS/CBP previously issued an updated SORN for ESTA on November 2, 2011 (76 FR 67751).

In order to determine whether the applicant is eligible to travel to the United States under the VWP, an applicant provides biographic and other requested information, as well as payment information, using the online application process available at *https://esta.cbp.dhs.gov.* CBP vets applicant information against various security and law enforcement databases. Payment information is sent to the Department of the Treasury's Pay.gov, and CBP a payment status and tracking number in return. CBP is updating the category of records in this system of records to now include the Internet Protocol address (IP address) associated with the submitted ESTA application. As of the effective date of this updated SORN, the IP address will be used as part of the DHS/CBP vetting process. A copy of the application data, including the IP address, will be sent to the ATS in order to identify possible high risk applicants as part of the vetting process.

DHS/CBP is updating this system of records notice to clarify the categories of individuals and remove unnecessary language. DHS/CBP is updating the categories of records for this system of records notice to permit the collection and use of the IP address associated with an ESTA application. DHS/CBP is also providing more specific legal authorities to collect ESTA information, and clarifying the purposes to include the identification of high-risk applicants.

The routine uses are being updated to add general language ensuring that ''[a]ny disclosure of information must be made consistent with the official duties of the person making the disclosure.'' Routine uses A, D, E, and J are being reworded to provide greater clarity and make non-substantive grammatical changes. Routine use C is being updated to change ''other federal government agencies'' to ''General Services Administration'' to better reflect the statutory authorities and the fact that records will be shared with the National Archives and Records Administration (NARA) where NARA maintains the records as permanent records. Routine uses G, K, and M are being reworded to provide greater clarity and remove the now superfluous condition that the ''disclosure is appropriate to the proper performance of the official duties of the person making the disclosure.'' Finally, a new routine use P is being inserted to permit DHS to share this information with a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to opposing counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations, in response to a subpoena, or in connection with criminal law proceedings.

DHS/CBP is also updating this SORN by clarifying the retention of records in ESTA and the Non-Immigrant Information System (NIIS) into which ESTA data may be incorporated based on actual travel to the United States; updating and clarifying the notification procedures to explain the extension of access procedures to international travelers, allow limited direct access and amendment of ESTA application data, and add the CPB access request address; eliminating unnecessary language from the record source categories describing the use of payment information between ESTA, Pay.gov, and the CBP Credit and Debit Card Data System for payment reconciliation purposes; and clarifying that the Department is exempting the system from sections (c)(3), (e)(8), and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2), and is exempting the system from (c)(3) of the Privacy Act pursuant to 5 U.S.C. 552a(k)(2).

DHS previously published a Final Rule exempting this system of records from certain provisions of the Privacy Act. 74 FR 45069 (Aug. 31, 2009). That Final Rule remains in effect and applicable to this updated system.

The purpose of this system of records is to determine the eligibility of aliens to travel under the VWP to the United States by air or sea. DHS/CBP has authority to operate this system under Title IV of the Homeland Security Act of 2002, 6 U.S.C. 201, et. seq., and Section 217(h)(3) of the Immigration and Nationality Act, 8 U.S.C. 1187(h)(3).

Consistent with DHS' information sharing mission, information stored in ESTA may be shared with other DHS components, as well as appropriate federal, state, local, tribal, territorial, foreign, or international government agencies. This sharing will only take place after DHS determines that the recipient has a need to know the information to carry out functions consistent with the exceptions under

the Privacy Act of 1974, 5 U.S.C. 552a(b), and the routine uses set forth in this system of records notice.

II. Privacy Act

The Privacy Act embodies fair information practice principles in a statutory framework governing the means by which the federal government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. This system only collects information pertaining to persons in nonimmigrant status, that is, persons who are not covered by the protections of the Privacy Act at the time they provide their information. However, given the importance of providing privacy protections to international travelers, DHS has decided to administratively apply the privacy protections and safeguards outlined in this notice to all international travelers subject to ESTA.

This newly-updated system will be included in the Department of Homeland Security's inventory of record systems.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of Management and Budget and to Congress.

System of Records

Department of Homeland Security (DHS)/U.S. Customs and Border Protection (CBP)—009

SYSTEM NAME:

DHS/CBP–009 Electronic System for Travel Authorization (ESTA)

SECURITY CLASSIFICATION:

Unclassified. The data may be retained on the classified networks but this does not change the nature and character of the data until it is combined with classified information.

SYSTEM LOCATION:

Records are maintained in the operational system at CBP Headquarters in Washington, DC and at CBP field offices. Records are replicated from the operational system and maintained on the DHS unclassified and classified networks.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Categories of individuals covered by this system include foreign nationals who seek to enter the United States by air or sea under the VWP.

CATEGORIES OF RECORDS IN THE SYSTEM:

- Full Name (First, Middle, and Last);
- Date of birth;
- Gender;
- Email address;
- Phone number;
- Travel document type (e.g., passport), number, issuance date, expiration date and issuing country;
- Country of Citizenship;
- IP address;
- ESTA application number;
- Department of Treasury Pay.gov Payment Tracking Number (i.e., confirmation of payment; absence of payment confirmation will result in a ''not cleared'' determination);
- Country of Birth;
- Date of Anticipated Crossing;
- Airline and Flight Number;
- City of Embarkation;
- Address while visiting the United States (Number, Street, City, State);
- Whether the individual has a communicable disease, physical or mental disorder, or is a drug abuser or addict;
- Whether the individual has been arrested or convicted for a moral turpitude crime, drug possession or use, or has been sentenced for a period longer than five years;
- Whether the individual has engaged in espionage, sabotage, terrorism or Nazi activity between 1933 and 1945;
- Whether the individual is seeking work in the U.S.;
- Whether the individual has been excluded or deported, or attempted to obtain a visa or enter U.S. by fraud or misrepresentation;
- Whether the individual has ever detained, retained, or withheld custody of a child from a U.S. citizen granted custody of the child;
- Whether the individual has ever been denied a U.S. visa or entry into the U.S., or had a visa cancelled, and, if so, the location and date of that denial or cancellation;
- Whether the individual has ever asserted immunity from prosecution;
- Any change of address while in the U.S.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title IV of the Homeland Security Act of 2002, 6 U.S.C. 201 *et seq.;* the INA, as amended, including 8 U.S.C. 1187(a)(11) and (h)(3), and implementing regulations contained in Part 217, title 8, Code of Federal Regulations; and the Travel Promotion Act of 2009, Public Law 111–145, 22 U.S.C. 2131.

PURPOSE(S):

The purpose of this system is to collect and maintain a record of nonimmigrant aliens who want to travel to the United States under the VWP, and to determine whether applicants are eligible to travel to the United States under the VWP by vetting their information against various security and law enforcement databases and identifying high-risk applicants. This vetting includes consideration of IP address, along with the other application data.

The Department of Treasury Pay.gov tracking number (associated with the payment information provided to Pay.gov and stored in the Credit/Debit Card Data System, DHS/CBP–003—Credit/Debit Card Data System (CDCDS), 76 Fed. Reg. 67755 (November 2, 2011)) will be used to process ESTA and third party administrator fees and to reconcile issues regarding payment between ESTA, CDCDS, and Pay.gov. Payment information will not be used for vetting purposes and is stored in a separate system (CDCDS) from the ESTA application data.

DHS maintains a replica of some or all of the data in the operating system on the unclassified and classified DHS networks to allow for analysis and vetting consistent with the above stated purposes and this published notice.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3). Any disclosure of information must be made consistent with the official duties of the person making the disclosure. The routine uses are as follows:

A. To the Department of Justice (DOJ), including the United States Attorney Offices, or other federal agency conducting litigation or in proceedings before any court, adjudicative or administrative body, when it is relevant or necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;

2. Any employee of DHS in his/her official capacity;

3. Any employee of DHS in his/her individual capacity where DOJ or DHS has agreed to represent the employee; or

4. The United States or any agency thereof.

B. To a congressional office from the record of an individual in response to a written inquiry from that congressional office made pursuant to a Privacy Act waiver from the individual to whom the record pertains.

C. To NARA or the General Services Administration pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906 and for records that NARA maintains as permanent records.

D. To an agency or organization for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. DHS has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) or harm to the individuals that rely upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To an appropriate federal, state, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, where a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations.

H. To appropriate federal, state, local, tribal, or foreign governmental agencies or multilateral governmental organizations for the purpose of protecting the vital health interests of a data subject or other persons (e.g., to assist such agencies or organizations in preventing exposure to or transmission of a communicable or quarantinable disease or to combat other significant public health threats; appropriate notice will be provided of any identified health threat or risk);

I. To third parties during the course of a law enforcement investigation to the extent necessary to obtain information pertinent to the investigation;

J. To a federal, state, tribal, local, international, or foreign government agency or entity for the purpose of consulting with that agency or entity: (1) To assist in making a determination regarding redress for an individual in connection with the operations of a DHS component or program; (2) for the purpose of verifying the identity of an individual seeking redress in connection with the operations of a DHS component or program; or (3) for the purpose of verifying the accuracy of information submitted by an individual who has requested such redress on behalf of another individual;

K. To federal and foreign government intelligence or counterterrorism agencies or components where DHS becomes aware of an indication of a threat or potential threat to national or international security to assist in countering such threat, or to assist in anti-terrorism efforts;

L. To the Department of State in the processing of petitions or applications for benefits under the Immigration and Nationality Act, and all other immigration and nationality laws including treaties and reciprocal agreements;

M. To an organization or individual in either the public or private sector, either foreign or domestic, where there is a reason to believe that the recipient is or could become the target of a particular terrorist activity or conspiracy, to the extent the information is relevant to the protection of life or property;

N. To the carrier transporting an individual to the United States, but only to the extent that CBP provides information that the ESTA status is not applicable to the traveler, or, if applicable, that the individual is authorized to travel, not authorized to travel, pending, or has not applied.

O. To the Department of Treasury's Pay.gov, for payment processing and payment reconciliation purposes.

P. To a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to opposing counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations, or in response to a subpoena, or in connection with criminal law proceedings;

Q. To the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel, when there exists a legitimate public interest in the disclosure of the information or when disclosure is necessary to preserve confidence in the integrity of DHS or is necessary to demonstrate the accountability of DHS's officers, employees, or individuals covered by the system, except to the extent it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records in this system are stored electronically in the operational system as well as on the unclassified and classified network or on paper in secure facilities in a locked drawer behind a locked door. The records are stored on magnetic disc, tape, digital media, and CD–ROM.

RETRIEVABILITY:

These records may be retrieved by any of the data elements supplied by the applicant. The Pay.gov payment tracking number may be used to track the amount of payment associated with an ESTA application and to reconcile payment discrepancies.

SAFEGUARDS:

Records in this system are safeguarded in accordance with applicable rules and policies, including all applicable DHS automated systems security and access policies. Strict controls have been imposed to minimize the risk of compromising the information stored. Access to the computer system containing the records is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

RETENTION AND DISPOSAL:

Application information submitted to ESTA generally expires and is deemed ''inactive'' two years after the initial submission of information by the applicant. In the event that a traveler's passport remains valid for less than two years from the date of the ESTA approval, the ESTA travel authorization will expire concurrently with the passport. Information in ESTA will be retained for one year after the ESTA travel authorization expires. After this period, the inactive account information will be purged from online access and archived for 12 years. Data linked at any time during the 15-year retention period (generally 3 years active, 12 years archived), to active law enforcement lookout records, CBP matches to enforcement activities, and/or investigations or cases, including ESTA applications that are denied authorization to travel, will remain accessible for the life of the law enforcement activities to which they may become related. NARA guidelines for retention and archiving of data will apply to ESTA and CBP continues to negotiate with NARA for approval of the ESTA data retention and archiving plan. Records replicated on the unclassified and classified networks will follow the same retention schedule.

Payment information is not stored in ESTA, but is forwarded to Pay.gov and stored in CBP's financial processing system, CDCDS, pursuant to the DHS/CBP–018, CDCDS system of records notice.

In those instances where a VWP traveler's ESTA data is used for purposes of processing their application for admission to the United States, the ESTA data will be used to create a corresponding admission record in the DHS/CBP–016 Non-Immigrant Information System (NIIS). This corresponding admission record will retained in accordance with the NIIS retention schedule, which is 75 years.

SYSTEM MANAGER AND ADDRESS:

Director, Office of Automated Systems, U.S. Customs and Border Protection Headquarters, 1300 Pennsylvania Avenue NW., Washington, DC 20229.

NOTIFICATION PROCEDURE:

This system only collects information pertaining to persons in nonimmigrant status, that is, persons who are not covered by the protections of the Privacy Act at the time they provide their information. However, given the importance of providing privacy protections to international travelers, DHS has decided to administratively apply the privacy protections and safeguards outlined in this notice to all international travelers subject to ESTA.

Applicants may access their ESTA information to view and amend their applications by providing their ESTA number, birth date, and passport number. Once they have provided their ESTA number, birth date, and passport number, applicants may view their ESTA status (authorized to travel, not authorized to travel, pending) and submit limited updates to their travel itinerary information. If an applicant does not know his/her application number, he/she can provide his or her name, passport number, date of birth, and passport issuing country to retrieve his/her application number.

In addition to using the ESTA system directly to access information provided to DHS/CBP, individuals may submit requests and receive information maintained in this system as it relates to data submitted by or on behalf of a person who travels to the United States and crosses the border, as well as the resulting determination (authorized to travel, pending, or not authorized to travel). However, the Secretary of Homeland Security has exempted portions of this system from certain provisions of the Privacy Act related to providing the accounting of disclosures to individuals, because it is a law enforcement system. CBP will, however, consider individual requests to determine whether or not information may be released. In processing requests for access to information in this system, CBP will review not only the records in the operational system but also the records that were replicated on the unclassified and classified networks, and based on this notice provide appropriate access to the information.

Individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to the Headquarters or component FOIA Officer, whose contact information can be found at *http://www.dhs.gov/foia* under ''contacts.'' If an individual believes more than one component maintains Privacy Act records concerning him or her the individual may submit the request to the Chief Privacy Officer and Chief Freedom of Information Act Officer, Department of Homeland Security, 245 Murray Drive SW., Building 410, STOP–0655, Washington, DC 20528. Requests under the Privacy Act and FOIA specifically for CBP should be addressed to: U.S. Customs and Border Protection (CBP), Freedom of Information Act (FOIA) Division, 1300 Pennsylvania Avenue NW., Washington, DC 20229.

When seeking records about yourself from this system of records or any other Departmental system of records your request must conform with the Privacy Act regulations set forth in 6 CFR Part 5. You must first verify your identity, meaning that you must provide your full name, current address and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. § 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Chief Privacy Officer and Chief Freedom of Information Act Officer, *http://www.dhs.gov* or 1–866–431–0486. In addition, you should:

- Explain why you believe the Department would have information on you;
- Identify which component(s) of the Department you believe may have the information about you;
- Specify when you believe the records would have been created;
- Provide any other information that will help the FOIA staff determine which DHS component agency may have responsive records; and
- If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without the above information, the component(s) may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

RECORD ACCESS PROCEDURES:

See ''Notification procedure'' above.

CONTESTING RECORD PROCEDURES:

See ''Notification procedure'' above.

RECORD SOURCE CATEGORIES:

The system obtains information from the online ESTA application submitted by the applicant. This information is processed by the Automated Targeting System (ATS) to identify terrorists or threats to aviation and border security, and TECS (for matches to persons identified to be of law enforcement interest), and the vetting result of ''authorized to travel,'' ''not authorized to travel,'' or ''pending'' is maintained in ESTA. ''Pending'' will be resolved to ''authorized to travel'' or ''not authorized to travel'' based on further research by CBP. Pay.gov provides the Pay.gov tracking number once payment

information has been forwarded to it and processed.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

No exemption shall be asserted with respect to information maintained in the system as it relates to data submitted by or on behalf of a person who travels to visit the United States and crosses the border, nor shall an exemption be asserted with respect to the resulting determination (authorized to travel, pending, or not authorized to travel). Information in the system may be shared with law enforcement and/or intelligence agencies pursuant to the above routine uses. The Privacy Act requires DHS to maintain an accounting of the disclosures made pursuant to all routines uses. Disclosing the fact that a law enforcement or intelligence agency has sought and been provided particular records may affect ongoing law enforcement activities. As such, pursuant to 5 U.S.C. 552a(j)(2), DHS will claim exemption from Sections (c)(3), (e)(8), and (g) of the Privacy Act of 1974, as amended, as is necessary and appropriate to protect this information. Further, DHS will claim exemption from Section (c)(3) of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(k)(2) as is necessary and appropriate to protect this information.

Dated: July 18, 2012.

Mary Ellen Callahan,

Chief Privacy Officer, Department of Homeland Security.

BILLING CODE 9110–06–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2012–0024; OMB Number 1660–0108]

Agency Information Collection Activities: Proposed Collection; Comment Request, National Emergency Family Registry and Locator System (NEFRLS)

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a revision of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning the FEMA National Emergency Family Registry and Locator System (NEFRLS), which allows adults that have been displaced by a Presidentially-declared disaster or emergency to reunify with their families.

DATES: Comments must be submitted on or before September 28, 2012.

ADDRESSES: To avoid duplicate submissions to the docket, please use only one of the following means to submit comments:

(1) *Online.* Submit comments at *www.regulations.gov* under Docket ID FEMA–2012–0024. Follow the instructions for submitting comments.

(2) *Mail.* Submit written comments to Docket Manager, Office of Chief Counsel, DHS/FEMA, 500 C Street SW., Room 835, Washington, DC 20472–3100.

(3) *Facsimile.* Submit comments to (703) 483–2999.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy Act notice that is available via the link in the footer of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Earnest Poindexter, Information Technology Specialist, Recovery Directorate, Individual Assistance Division, (202) 212–4883. You may contact the Records Management Division for copies of the proposed collection of information at facsimile number (202) 646–3347 or email address: *FEMA-Information-Collections-Management@dhs.gov.*

SUPPLEMENTARY INFORMATION: The Post-Katrina Emergency Management Reform Act of 2006, in Title VI of the DHS Appropriations Act of 2007 (the Post Katrina Reform Act), Public Law 109–295, Section 689c, 120 Stat. 1355 at 1451 is the legal basis for FEMA to provide a National Emergency Family Registry and Locator System (NEFRLS). NEFRLS allows adults (including medical patients), that have been displaced by a Presidentially-declared major disaster or emergency, to voluntarily register by submitting personal information to be entered into a database that could be used by others to help reunify them with their families. Children who are traveling with their families during a Presidentially-declared major disaster or emergency can be listed in NEFRLS. NEFRLS allows a registrant to designate up to 7 individuals who are authorized to search for and access the registrant's information in the system. The ability to list children within NEFRLS is only to indicate which family members are together and safe.

Collection of Information

Title: National Emergency Family Registry and Locator System.

Type of Information Collection: Revision of a currently approved information collection.

OMB Number: 1660–0108.

Form Titles and Numbers: None.

Abstract: NEFRLS is a Web-based database enabling FEMA to provide a nationally available and recognized database allowing adults (including medical patients) that have been displaced by a Presidentially-declared major disaster or emergency to voluntarily register via the Internet or a toll-free number. This database will then allow designated individuals to search for displaced friends, family, and household members.

Affected Public: Individuals and households.

Number of Respondents: 56,000.

Number of Responses: NEFRLS Tele-registration: 42,000; NEFRLS Internet Registration: 14,000.

Estimated Total Annual Burden Hours: 4,600 hours.

Estimated Cost: There are no annual record keeping, capital, startup, nor maintenance costs associated with this information collection.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology,

e.g., permitting electronic submission of responses.

Dated: July 24, 2012.

Charlene D. Myrthil,

Director, Records Management Division, Mission Support Bureau, Federal Emergency Management Agency, Department of Homeland Security.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4068–DR; Docket ID FEMA–2012–0002]

Florida; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Florida (FEMA–4068–DR), dated July 3, 2012, and related determinations.

DATES: *Effective Date:* July 3, 2012.

FOR FURTHER INFORMATION CONTACT: Peggy Miller, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–3886.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated July 3, 2012, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

I have determined that the damage in certain areas of the State of Florida resulting from Tropical Storm Debby beginning on June 23, 2012, and continuing, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of Florida.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance in the designated areas and Hazard Mitigation throughout the State. Consistent with the requirement that Federal assistance is supplemental, any Federal funds provided under the Stafford Act for Hazard Mitigation and Other Needs Assistance will be limited to 75 percent of the total eligible costs.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Gracia B. Szczech, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of Florida have been designated as adversely affected by this major disaster:

Baker, Bradford, Columbia, Pasco, and Wakulla Counties for Individual Assistance.

All counties and Indian Tribes within the State of Florida are eligible to apply for

assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

W. Craig Fugate,

Administrator, Federal Emergency Management Agency.

[Docket ID FEMA–2012–0003; Internal Agency Docket No. FEMA–B–1259]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings.

DATES: Comments are to be submitted on or before October 29, 2012.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

You may submit comments, identified by Docket No. FEMA–B–1259, to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–4064, or (email) *Luis.Rodriguez3@fema.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–4064, or (email) *Luis.Rodriguez3@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of

experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at *www.fema.gov/pdf/media/factsheets/2010/srp_fs.pdf.*

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5603–N–50]

Continuum of Care Homeless Assistance Grant Application—Technical Submission

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

Information to be used to obtain more detailed technical information not contained in the original Continuum of Care Homeless Assistance Grant Application.

DATES: *Comments Due Date:* August 29, 2012.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB approval Number (2506–0183) and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202–395–5806. Email: *OIRA_Submission@omb.eop.gov* fax: 202–395–5806.

FOR FURTHER INFORMATION CONTACT: Colette Pollard., Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov*. or telephone (202) 402–3400. This is not a toll-free number. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that the Department of Housing and Urban Development has submitted to OMB a request for approval of the Information collection described below. This notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This notice also lists the following information:

Title of Proposal: Continuum of Care Homeless Assistance Grant Application—Technical Submission.

OMB Approval Number: 2506–0183.

Form Numbers: HUD–40090–3a., HUD–40090–3b.

Description of the Need for the Information and Its Proposed

Information to be used to obtain more detailed technical information not contained in the original Continuum of Care Homeless Assistance Grant Application.

[Docket No. FR–5603–N–52]

Rental Assistance Demonstration (RAD) Application Form

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

The Rental Assistance Demonstration allows Public Housing and Moderate Rehabilitation (Mod Rehab) properties to convert to long-term Section 8 rental assistance contracts; and Rent Supplement (Rent Supp), Rental Assistance Payment (RAP), and Mod Rehab properties, upon contract expiration or termination, to convert tenant protection vouchers (TPVs) to project-based vouchers (PBVs). Participation in the initiative will be voluntary. Public Housing Agencies and Mod Rehab owners interested in participating in the Demonstration are required to submit applications to HUD. HUD intends through the conversion process, to assure the physical and financial sustainability of properties and enable owners to leverage private financing to address immediate and long-term capital needs, improve operations, and implement energy efficiency improvements. The RAD applications are Excel based and will be interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

DATES: *Comments Due Date: August 29, 2012.*

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB approval Number (2577–Pending) and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202–395–5806. Email: *OIRA_Submission@omb.eop.gov* fax: 202–395–5806.

FOR FURTHER INFORMATION CONTACT: Colette Pollard., Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov*. or telephone (202) 402–3400. This is not a toll-free number. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that the Department of Housing and Urban Development has submitted to OMB a request for approval of the Information collection described below. This notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of

information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This notice also lists the following information:

Title of Proposal: Rental Assistance Demonstration (RAD) Application Form.

OMB Approval Number: 2577–Pending.

Form Numbers: HUD 5260, HUD 5261.

Description of the Need for the Information and Its Proposed Use

The Rental Assistance Demonstration allows Public Housing and Moderate Rehabilitation (Mod Rehab) properties to convert to long-term Section 8 rental assistance contracts; and Rent Supplement (Rent Supp), Rental Assistance Payment (RAP), and Mod Rehab properties, upon contract expiration or termination, to convert tenant protection vouchers (TPVs) to project-based vouchers (PBVs). Participation in the initiative will be voluntary. Public Housing Agencies and Mod Rehab owners interested in participating in the Demonstration are required to submit applications to HUD. HUD intends through the conversion process, to assure the physical and financial sustainability of properties and enable owners to leverage private financing to address immediate and long-term capital needs, improve operations, and implement energy efficiency improvements. The RAD applications are Excel based and will be interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

[Docket No. FR–5603–N–51]

FY 2012 Notice of Funding Availability (NOFA) for Rural Capacity Building Program

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

The Narratives associated with Rural Capacity Building program will allow CPD to accurately assess the experience, expertise, and overall capacity of national organizations with expertise in rural housing, including experience working with rural housing organizations, local governments, and Indian tribes. HUD requires information in order to ensure the eligibility of Rural Capacity Building program applicants and proposals, to rate and rank applications, and to select applicants for grant awards. The Rural Capacity Building NOFA requires applicants to submit specific forms and narrative responses.

DATES: Comments Due Date: August 29, 2012.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB approval Number (2506–Pending) and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202–395–5806. Email: *OIRA_Submission@omb.eop.gov* fax: 202–395–5806.

FOR FURTHER INFORMATION CONTACT: Colette Pollard., Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov*. or telephone (202) 402–3400. This is not a toll-free number. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that the Department of Housing and Urban Development has submitted to OMB a request for approval of the Information collection described below. This notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This notice also lists the following information:

Title of Proposal: FY 2012 Notice of Funding Availability (NOFA) for Rural Capacity Building Program.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5643–N–01]

Notice of Annual Factors for Determining Public Housing Agency Administrative Fees for the Section 8 Housing Choice Voucher and Moderate Rehabilitation Programs

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice.

SUMMARY: This Notice announces the monthly per unit fee amounts for use in determining the on-going administrative fee for housing agencies administering the rental voucher and moderate rehabilitation programs, including Single Room Occupancy during Calendar Year (CY) 2012.

DATES: *Effective Date:* January 1, 2012.

FOR FURTHER INFORMATION CONTACT: Miguel Fontanez, Director, Housing Voucher Financial Management Division, Office of Public Housing and Voucher Programs, Office of Public and Indian Housing, Department of Housing and Urban Development, Room 4222, 451 Seventh Street SW., Washington, DC 20410–8000, telephone number 202–402–2934. (This is not a toll-free number). Hearing or speech impaired individuals may call TTY number 800–877–8337.

SUPPLEMENTARY INFORMATION:

A. Purpose and Substantive Description

This **Federal Register** Notice provides the Department's methodology to determine the Calendar Year 2012 administrative fees rates by area, which the Office of Housing Voucher Programs (OHVP) will utilize to compensate public housing agencies (PHAs) for administering the Housing Choice Voucher (HCV) program. PIH Notice 2012–9 entitled, Implementation of the Federal Fiscal Year (FY) 2012 Funding Provision for the Housing Choice Voucher Program, issued on February 8, 2012,[1] describes the settlement process for this compensation, which will be a result of the mandate enacted in the ''Consolidated and Furthering Continuing Appropriations Act, 2012'' (Pub. L. 112–55, approved November 18, 2011) (FY 2012 Appropriation Act).

B. Methodology History

Section 8 Administrative Fees are based on the higher of the FY 1993 Fair Market Rent (FMR) for a two-bedroom unit in a PHA's market area or the FY 1994 FMR for a two-bedroom unit, but not more than 103.5 percent of the FY 1993 FMR. This Fee Base is also subject to a $428 minimum and a $811 maximum. (The average FMR in 1993 was $555).

FMR areas (Fee Base areas) were updated in 2005 to new OMB metropolitan area definitions. Where a new metropolitan area is made up of more than one old metropolitan area, the fee base for the largest of the old areas in the new area was used.

Prior to 2005, the Quality Housing and Work Responsibility Act of 1998 (Pub. L. 105–276) (QHWRA) required renewals to be based on the per unit cost from a PHA's latest year-end settlement statement for 100 percent of expiring annual contribution contract (ACC) units. Since then, HUD has made changes to how it calculates the administrative fees for PHAs administering the Section 8 programs. These changes have been caused by budgetary mandates rather than research on what it actually costs to administer a well-run program.

When the voucher program was introduced, administrative fees were set at 6.5% of the two-bedroom FMR. Administrative Fees had three components, ongoing, preliminary, and hard-to-house fees. In FY 2003, a flat fee was implemented, which was calculated based on the amount each PHA was eligible to receive in CY 2003. This calculation used the Column A and Column B published rates to determine the fees. This change meant that PHAs would receive a set amount regardless of leasing. This methodology for calculating administrative fees was the basis for determining fee funding in 2004 through 2007.

The Consolidated Appropriations Act, 2008 (Pub. L. 110–161, approved December 26, 2007), changed the methodology again for calculating fees back to Section 8 (q) pre-QHWRA where fees are now based on the leasing reported in the Voucher Management System. This same methodology has been applied in each year since 2007 because Congress has continued to require that the same standard be used in the relevant appropriations acts.

The Fee Base numbers are updated annually using Bureau of Labor Statistics data on average local government wages at the State metropolitan and nonmetropolitan level. The Congress has changed the percentage of the fee base used to reimburse administrative costs three times since the current system was established. The following chart shows the history of admin fee rates for Column A and Column B.

Fiscal year	First 600 units (percent)	Additional units (percent)
1995 and 1996	8.2	7.79
1997	7.5	7
1998 and 1999	7.65	7
2000 through 2012	7.5	7

[1] PIH Notice 2012–9 is available online at: *http://portal.hud.gov/hudportal/HUD?src=/program_offices/public_indian_housing/publications/notices.*

In 1998 HUD, with OMB's approval, began to apply the State nonmetropolitan minimum FMR to metropolitan areas for fee determination purposes. Fees for PHA-owned units will be determined in the same manner as all other units.

Fees are updated with Bureau of Labor Statistics (BLS) local government wage change factors aggregated to the metropolitan/nonmetropolitan level. The Year-end 1993 is used as the base to account for the two-year lag between data availability and the year updating was to start (FY 1995).

C. FY 2012 Methodology

For CY 2012, in accordance with the FY 2012 Appropriations Act, administrative fees will be paid on the basis of units leased as of the first day of each month; this data will be extracted from the Voucher Management System (VMS) at the close of each reporting cycle.

Two fee rates are provided for each housing authority (HA). The first rate, Column A, applies to the first 7,200 unit months leased in CY 2012. The second rate, Column B, applies to all remaining unit months leased in CY 2012. In years prior to 2010, a Column C rate was also provided, which applied to all unit months leased in units owned by the HA. For CY 2012 there are no Column C administrative fee rates. Fees for leased HA-owned units will be earned in the same manner and at the same Column A and Column B rates as for all other leasing.

The fee rates calculated for CY 2012, using the standard procedure, in many cases resulted in rates lower than those provided for CY 2011. In those cases, the affected HAs are being held harmless at the CY 2011 rates.

The fee rates for each HA are those rates covering the areas in which each HA has the greatest proportion of its participants, based on PIC data. In some cases, HAs have participants in more than one fee area. If an HA so chooses, the HA may request that the Department establish a blended fee rate schedule that will consider proportionately all areas in which participants are located. Once a blended rate schedule is calculated, it will be used to determine the HA's fee eligibility for all months of CY 2012.

PHAs that operate over a large geographic area were permitted to request a higher administrative fee rate if eligible under the circumstances as described in the CY 2012 implementation notice, PIH Notice 2012–9. Additionally, PHAs serving multiple administrative fee areas were permitted, in lieu of the fee determined for their agency, to request a blended rate based on the actual location of their assisted units. These fee rates also apply to the Moderate Rehabilitation program and the 5-Year Mainstream Program.

Paperwork Reduction Act Statement

The information collection requirements contained in this document are pending approval by the Office of Management and Budget (OMB) in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), and have been assigned OMB control number 2502–0348. In accordance with the Paperwork Reduction Act, HUD may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection displays a currently valid control number.

Accordingly, the Department publishes the monthly per unit fee amount to be used for determining HA administrative fees under the Housing Choice Voucher and Moderate Rehabilitation programs as set forth on the Appendix to this notice.

Dated: July 6, 2012.

Deborah Hernandez,

General Deputy Assistant Secretary for Public and Indian Housing.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–CR–10734; 2200–3210–665]

60-Day Notice of Intention To Request Clearance of Collection of Information; Opportunity for Public Comment

AGENCY: National Park Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: We (National Park Service) will ask the Office of Management and Budget (OMB) to approve the information collection (IC) described below. To comply with the Paperwork Reduction Act of 1995 and as a part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to comment on this IC. We may not conduct or sponsor and a person is not required to respond to a collection unless it displays a currently valid OMB control number.

DATES: Please submit your comment on or before September 28, 2012.

ADDRESSES: Please send your comments on the proposed information collection to Madonna Baucum, Information Collection Clearance Officer, National Park Service, 1849 C Street NW., Mailstop 2605 (Rm. 1242), Washington, DC 20240 (mail); via fax at 202/371–6741, or via email to *madonna_baucum@nps.gov.* Please reference Information Collection ''1024–New, National Historic Landmark Nomination Process'' in the subject line.

FOR FURTHER INFORMATION CONTACT: Patricia Henry, Historian, National Historic Landmark Program, 1849 C Street NW., Washington, DC 20240. You may send an email to *patty_henry@nps.gov* or contact her by telephone at (202/354–2216) or via fax at (202/371–2229).

SUPPLEMENTARY INFORMATION:

I. Abstract

The purpose of this information collection is to assist the National Park Service (NPS) in managing the National Historic Landmarks (NHL) program. The information requested will allow the NPS to evaluate properties nominated as NHLs and provide documentation for the proposed designation.

NHLs are nationally significant historic places designated by the Secretary of the Interior because they possess exceptional value or quality in illustrating or interpreting the heritage of the United States and they have significance to all citizens of our nation. The Historic Sites Act of 1935 charged the Department of the Interior with the responsibility for designating nationally significant historic buildings, structures, sites, and objects and promoting their preservation for the inspiration and benefit of the people of the United States. The NPS administers the NHL Program for the Secretary of the Interior.

All NHLs are also listed in the National Register of Historic Places, the official Federal list of districts, sites, buildings, structures, and objects significant in American history, architecture, archeology, engineering, and culture. Thus, NHLs must also be considered in the planning for Federal or Federally assisted projects, and NHL designation provides for eligibility for Federal rehabilitation tax incentives. Designation as a NHL provides formal recognition of a property's national significance in history, architecture, engineering, or archeology based on national standards. The designation places no obligations on private property owners, and there are no restrictions on the use, treatment, transfer, or disposition of private property.

Nominations for the designation of NHLs come from private individuals

and organizations, local governments, State Historic Preservation Officers, Federal Preservation Officers for properties owned or controlled by the United States Government, and Tribal Historic Preservation Officers and American Indian tribes for properties on tribal lands. Regulations at 36 CFR 65 establish the criteria and guidelines for designating National Historic Landmarks. The request to OMB to approve this existing information collection in use without approval will include one form, the National Historic Landmark Nomination Form, which is used to nominate properties and provide documentation for the proposed designation.

Nomination forms will be submitted to the National Historic Landmarks staff in the Washington, DC and regional offices. These offices determine if the property may or may not meet the NHL criteria or if more information is needed to make a determination. Once a nomination is considered complete by the NPS staff, it will be peer reviewed by leading scholars through a blind peer review process. The Landmarks Committee of the National Park System Advisory Board will review all nominations prior to referring those properties to the Advisory Board that they believe meet the NHL criteria. The Advisory Board will review the properties and the Landmarks Committee's recommendations to make their own recommendations to the Secretary of the Interior who has the ultimate authority to designate National Historic Landmarks.

II. Data

OMB Control Number: 1024–New.

Title: National Historic Landmark Nomination Process.

Form(s): National Historic Landmark Nomination Form.

Type of Request: Existing collection in use without approval.

Automated Data Collection: No.

Will the Information Be Collected Electronically? Yes.

Description of Respondents: Private individuals; state, tribal, and local governments; businesses; educational institutions; and nonprofit organizations.

Respondent's Obligation: Required to obtain or retain benefits.

Frequency of Collection: On Occasion.

Description of Need: The purpose of this information collection is to provide documentation in order to consider properties for designation as National Historic Landmarks.

III. Comments

We invite comments concerning this IC on:

- Whether or not the collection of information is necessary, including whether or not the information will have practical utility;
- The accuracy of our estimate of the burden for this collection of information;
- Ways to enhance the quality, utility, and clarity of the information to be collected; and
- Ways to minimize the burden of the collection of information on respondents.

Please note that the comments submitted in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask OMB in your comment to withhold your personal identifying information from public review, we cannot guarantee that it will be done.

Dated: July 24, 2012.

Madonna L. Baucum,

Information Collection Clearance Officer, National Park Service.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–CR–10633; 2200–3210–665]

Information Collection Activities: National Historic Landmarks (NHL) Condition Survey

AGENCY: National Park Service (NPS), Interior.

ACTION: Notice; request for comments.

SUMMARY: We (National Park Service) will ask the Office of Management and Budget (OMB) to approve the Information Collection (IC) described below. This collection will consist of a survey instrument. As required by the Paperwork Reduction Act of 1995, and as part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to take this opportunity to comment on this IC.

DATES: To ensure that your comments on this IC are considered, we must receive them on or before September 28, 2012.

ADDRESSES: Please send your comments to Phadrea Ponds, Information Collections Coordinator, National Park Service, 1201 Oakridge Drive, Fort Collins, CO 80525 (mail); or *phadrea_ponds@nps.gov* (email). Please reference Information Collection 1024–NEW, National *Historic Landmarks (NHL) Condition Survey* in the subject line.

FOR FURTHER INFORMATION CONTACT: Barbara Wyatt, Historian, National Historic Landmarks Program, 1201 Eye St. NW., Washington, DC 20005. You may send an email to *barbara_wyatt@nps.gov* (email) or 202–371–2229 (fax).

SUPPLEMENTARY INFORMATION:

I. Abstract

National Historic Landmarks (NHL) are nationally significant historic places designated by the Secretary of the Interior because they possess exceptional value or quality in illustrating or interpreting the heritage of the United States. Today, 2,501 historic places bear this national distinction. Working with citizens throughout the nation, the National Historic Landmarks Program draws upon the expertise of National Park Service staff who work to nominate new landmarks and provide assistance to stewards of existing landmarks. Nominations are submitted by property owners and property stewards to the National Park Service. They are reviewed by qualified subject experts prior to their review by the NHL Advisory Board.

The NPS and NHL staff is required by The Historic Sites Act to collect information regarding the condition of designated landmarks. A questionnaire will be designed and used to collect information from owners or other stewards so the condition of NHLs can be monitored over time. The regional offices of NPS assist in the collection of the condition data. Regional NPS staff contributed to the design of the questionnaire that is the subject of this request.

II. Data

OMB Control Number: 1024—New.

Title: National Historic Landmarks (NHL) Condition Survey.

Type of Request: Existing collection in use without an OMB Control Number.

Description of Respondents: State, tribal, and local governments; businesses; nonprofit organizations; and individuals.

Respondent's Obligation: Voluntary.

Frequency of Collection: One time.

Estimated Number of Responses: 1,625.

Annual Burden Hours: 271 hours. We estimate an average of 10 minutes per response.

Estimated Reporting and Recordkeeping ''Non-Hour Cost'' Burden: We have not identified any ''non-hour cost'' burdens associated with this collection of information.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number and current expiration date.

III. Request for Comments

We invite comments concerning this IC on: (a) Whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) how to enhance the quality, usefulness, and clarity of the information to be collected; and (d) how to minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

Please note that the comments submitted in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask OMB in your comment to withhold your personal identifying information from public review, we cannot guarantee that it will be done.

Dated: July 23, 2012.

Madonna L. Baucum,

Information Collection Clearance Officer, National Park Service.

Bureau of Ocean Energy Management

Notice of Availability of the Proposed Notice of Sale for Outer Continental Shelf (OCS) Oil and Gas Lease Sale 229 in the Western Planning Area (WPA) in the Gulf of Mexico; Correction

AGENCY: Bureau of Ocean Energy Management (BOEM), Interior.

ACTION: Notice; correction.

SUMMARY: The Bureau of Ocean Energy Management published a notice that appeared for Public Inspection on July 23, 2012 and published in the **Federal Register** July 24, 2012. It contained a typographical mistake. This document corrects the error.

FOR FURTHER INFORMATION CONTACT: Donna Dixon, Leasing Division Chief, *Donna.Dixon@boem.gov.*

SUPPLEMENTARY INFORMATION: In FR Doc. 2012–No. 142, published July 24, 2012, at 77 FR 43355, there was a typographical error. The second sentence of the **SUMMARY** section is corrected to read: ''This sale will be the first under the Proposed Final OCS Oil and Gas Leasing Program for 2012–2017.'' All other portions of the Notice remain unchanged.

Dated: July 24, 2012.

Tommy P. Beaudreau,

Director, Bureau of Ocean Energy Management.

BILLING CODE 4310–MR–P

INTERNATIONAL TRADE COMMISSION

[Docket No. 2904]

Certain Wireless Consumer Electronics Devices and Components Thereof; Notice of Receipt of Complaint; Solicitation of Comments Relating to the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has received a complaint entitled Certain Wireless Consumer Electronics Devices and Components Thereof, DN 2904; the Commission is soliciting comments on any public interest issues raised by the complaint or complainant's filing under section 210.8(b) of the Commission's Rules of Practice and Procedure (19 CFR 210.8(b)).

FOR FURTHER INFORMATION CONTACT: Lisa R. Barton, Acting Secretary to the Commission, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. The public version of the complaint can be accessed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov,* and will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000.

General information concerning the Commission may also be obtained by accessing its Internet server (*http://www.usitc.gov*). The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission has received a complaint and a submission pursuant to section 210.8(b) of the Commission's Rules of Practice and Procedure filed on behalf of Technology Properties Limited LLC, Phoenix Digital Solutions LLC and Patriot Scientific Corporation on July 24, 2012. The complaint alleges violations of section 337 of the Tariff Act of 1930 (19 U.S.C. § 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain wireless consumer electronics devices and components thereof. The complaint names as respondents Acer, Inc. of Taiwan; Acer America Corporation of CA; Amazon.com, Inc. of WA; Barnes & Noble, Inc. of NY; Garmin Ltd. of Switzerland; Garmin International, Inc. of KS; Garmin USA, Inc. of KS; HTC Corporation of Taiwan; HTC America of WA; Huawei Technologies Co., Ltd. of China; Huawei North America of TX; Kyocera Corporation of Japan; Kyocera Communications, Inc. of CA; LG Electronics, Inc. of Korea; LG Electronics U.S.A., Inc. of NJ; Nintendo Co., Ltd. of Japan; Nintendo of America, Inc. of WA; Novatel Wireless, Inc. of CA; Samsung Electronics Co., Ltd. of Korea; Samsung Electronics America, Inc. of NJ; Sierra Wireless, Inc. of Canada, Sierra Wireless America, Inc. of CA; ZTE Corporation of China; and ZTE (USA) Inc. of TX.

Proposed respondents, other interested parties, and members of the public are invited to file comments, not to exceed five (5) pages in length, inclusive of attachments, on any public interest issues raised by the complaint or section 210.8(b) filing. Comments should address whether issuance of the relief specifically requested by the complainant in this investigation would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the

United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) Explain how the articles potentially subject to the requested remedial orders are used in the United States;

(ii) Identify any public health, safety, or welfare concerns in the United States relating to the requested remedial orders;

(iii) Identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) Indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the requested exclusion order and/or a cease and desist order within a commercially reasonable time; and

(v) Explain how the requested remedial orders would impact United States consumers.

Written submissions must be filed no later than by close of business, eight calendar days after the date of publication of this notice in the **Federal Register**. There will be further opportunities for comment on the public interest after the issuance of any final initial determination in this investigation.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit 8 true paper copies to the Office of the Secretary by noon the next day pursuant to section 210.4(f) of the Commission's Rules of Practice and Procedure (19 CFR 210.4(f)). Submissions should refer to the docket number (''Docket No. 2904'') in a prominent place on the cover page and/or the first page. (See Handbook for Electronic Filing Procedures, *http://www.usitc.gov/secretary/fed_reg_notices/rules/handbook_on_electronic_filing.pdf*). Persons with questions regarding filing should contact the Secretary (202–205–2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. See 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. § 1337), and of sections 201.10 and 210.8(c) of the Commission's Rules of Practice and Procedure (19 CFR 201.10, 210.8(c)).

By order of the Commission.

Issued: July 25, 2012.

Lisa R. Barton,

Acting Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under the Clean Water and Clean Air Acts

Notice is hereby given that on July 24, 2012, a proposed Consent Decree in *United States, et al.* v. *Shenango Incorporated,* Civil Action No. 2:12–cv–01029–GLL was lodged with the United States District Court for the Western District of Pennsylvania.

Shenango Incorporated (''Shenango'') is a company located in the greater Pittsburgh area which owns and operates a single battery containing 56 coke ovens in which it converts coal to coke. The Consent Decree obligates Shenango to implement a program of ceramic welding to address opacity violations at the coke ovens and combustion stack at the facility, and to adhere to various protocols for inspection, maintenance, and operation of the coke ovens. The settlement

further obligates Shenango to install certain interim measures at its wastewater treatment plant and, after issuance of a new and revised National Pollutant Discharge Elimination System (''NPDES'') permit, to install biological treatment in the wastewater treatment plant. In addition, Shenango will pay a civil penalty of $1,750,000 to resolve its violations of the Clean Air Act and the Clean Water Act. The Allegheny County Health Department (''ACHD'') and the Pennsylvania Department of Environmental Protection (''PADEP'') are co-plaintiffs with the United States.

The Consent Decree resolves civil claims for violations alleged in a Complaint filed concurrently with the Consent Decree. In the Complaint, Plaintiffs allege that Shenango violated regulations of ACHD, which are incorporated into the Pennsylvania State Implementation Plan (''SIP''), because Shenango had visible emissions in excess of those allowed under the ACHD regulations, from charging, from the door areas, from offtake piping, from pushing, and at the combustion stack. In addition, Plaintiffs allege that Shenango violated the limits on flaring, mixing or combustion of coke oven gas. Under the Clean Water Act, Plaintiffs allege that Shenango violated the effluent limitations in the NPDES Permit issued to it, that Shenango also discharged polluted stormwater without authorization into the Ohio River, and that Shenango failed to properly operate and maintain its wastewater treatment plant in violation of the terms of its NPDES permit.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and either emailed to *pubcomment-ees.enrd@usdoj.gov* or mailed to P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611, and should refer to *United States et al.* v. *Shenango Incorporated,* D.J. Ref. 90–5–2–3–1099/3.

During the public comment period, the Consent Decree may also be examined on the following Department of Justice Web site, to *http://www.usdoj.gov/enrd/Consent_Decrees.html.* A copy of the Consent Decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611 or by faxing or emailing a request to ''Consent Decree Copy''(*EESCDCopy.ENRD@usdoj.gov*), fax no. (202) 514–0097, phone confirmation number (202) 514–5271. If requesting a copy from the Consent Decree Library by mail, please enclose a check in the amount of $ 15.75 for the Consent Decree and $100.00 for the Appendices thereto (25 cents per page reproduction cost) payable to the U.S. Treasury or, if requesting by email or fax, forward a check in that amount to the Consent Decree Library at the address given above.

Robert Brook,

Assistant Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

Notice of Lodging Proposed Consent Decree

In accordance with Departmental Policy, 28 CFR 50.7, notice is hereby given that a proposed Consent Decree in *American Bottom Conservancy* v. *Jackson,* Civil Action No. 3:12–cv–00296–GPM–SCW, was lodged with the United States District Court for the Southern District of Illinois on July 23, 2012.

This proposed Consent Decree concerns a complaint filed by American Bottom Conservancy (''ABC'') against Lisa P. Jackson, in her official capacity as Administrator of the Environmental Protection Agency (''EPA''), pursuant to Section 304(a)(2) of the Clean Air Act (''CAA''), 42 U.S.C. § 7604(a)(2), to obtain injunctive relief to require EPA to respond to an administrative petition filed by ABC challenging an air pollution permit issued by the Illinois Environmental Protection Agency for the U.S. Steel Corporation's Granite City Works facility, Permit No. 96030056. The proposed Consent Decree resolves these allegations by requiring EPA to act on the administrative petition on or before December 3, 2012.

The Department of Justice will accept written comments relating to this proposed Consent Decree for thirty (30) days from the date of publication of this Notice. Please address comments to Perry M. Rosen, Trial Attorney, United States Department of Justice, Environment and Natural Resources Division, P.O. Box 7611, Washington, DC 20044 and refer to *ABC* v. *Jackson,* DJ # 90–5–2–4–19402.

The proposed Consent Decree may be examined at the Clerk's Office, United States District Court for the Southern District of Illinois, 750 Missouri Avenue, East St. Louis, Illinois 62201. In addition, the proposed Consent Decree may be examined electronically at *http://www.justice.gov/enrd/Consent_Decrees.html.*

Cherie L. Rogers,

Assistant Section Chief, Environmental Defense Section, Environment & Natural Resources Division.

DEPARTMENT OF JUSTICE

Office of Justice Programs

[OJP (BJA) Docket No. 1597]

Meeting of the Department of Justice National Motor Vehicle Title Information System Federal Advisory Committee

AGENCY: Office of Justice Programs (OJP), Justice.

ACTION: Notice of meeting.

SUMMARY: This is an announcement of a meeting of Department of Justice's (DOJ's) National Motor Vehicle Title Information System (NMVTIS) Federal Advisory Committee to discuss various issues relating to the operation and implementation of NMVTIS.

DATES: The meeting will take place on Tuesday, September 11, 2012, from 8:30 a.m. to 4:30 p.m. et.

ADDRESSES: The meeting will take place at the Office of Justice Programs (OJP), 810 7th Street NW., Washington, DC 20531.

FOR FURTHER INFORMATION CONTACT: Todd Brighton, Designated Federal Employee (DFE), Bureau of Justice Assistance, Office of Justice Programs, 810 7th Street NW., Washington, DC 20531; Phone: (202) 616–3879 [**Note:** this is not a toll-free number]; Email: *Todd.Brighton@usdoj.gov.*

SUPPLEMENTARY INFORMATION: This meeting is open to the public. Members of the public who wish to attend this meeting must register with Mr. Brighton at the above address at least seven (7) days in advance of the meeting. Registrations will be accepted on a space available basis. Access to the meeting will not be allowed without registration. Please bring photo identification and allow extra time prior to the meeting. Interested persons whose registrations have been accepted may be permitted to participate in the discussions at the discretion of the meeting chairman and with approval of the DFE.

Anyone requiring special accommodations should notify Mr. Brighton at least seven (7) days in advance of the meeting.

Purpose

The NMVTIS Federal Advisory Committee will provide input and recommendations to the Office of Justice Programs (OJP) regarding the operations and administration of NMVTIS. The primary duty of the NMVTIS Federal Advisory Committee is to advise the Bureau of Justice Assistance (BJA) Director on NMVTIS-related issues, including but not limited to: Implementation of a system that is self-sustainable with user fees; options for alternative revenue-generating opportunities; determining ways to enhance the technological capabilities of the system to increase its flexibility; and options for reducing the economic burden on current and future reporting entities and users of the system.

Todd Brighton,

NMVTIS Enforcement Coordinator, Bureau of Justice Assistance, Office of Justice Programs.

DEPARTMENT OF JUSTICE

National Institute of Corrections

Solicitation for a Cooperative Agreement—National Institute of Corrections Inaugural Virtual Conference: Event Planning and Delivery

AGENCY: National Institute of Corrections, U.S. Department of Justice.

ACTION: Solicitation for a Cooperative Agreement.

SUMMARY: The National Institute of Corrections (NIC) is soliciting proposals from organizations, companies, or agencies to enter into a cooperative agreement for a 9-month project period for the design, scheduling, promotion, production, and delivery of an NIC Virtual Conference entitled ''Handcuff Key to Door Key: A Systems Approach to Re-Entry.''

DATES: Applications must be received by 4:00 p.m. EST on Wednesday, August 8, 2012.

ADDRESSES: Applicants are encouraged to submit their proposals electronically via *http://www.grants.gov.* Mailed applications must be sent to: Director, National Institute of Corrections, 320 First Street NW., Room 5002, Washington, DC 20534. If submitted in hard copy, there must be an original and three unbound copies of the full proposal. The original should have the applicant's signature in blue ink. Applicants are encouraged to use Federal Express, UPS, or similar service to ensure delivery by the due date. Faxed applications will not be accepted.

FOR FURTHER INFORMATION CONTACT: A copy of this announcement can be downloaded from the NIC Web site at *www.nicic.gov.* All technical or programmatic questions concerning this announcement should be directed to Bernie Iszler, Correctional Program Specialist, National Institute of Corrections. She can be reached by calling 303–338–6618 or by email at *biszler@bop.gov.* All questions, answers, and additional information on this solicitation will be posted on NIC's Web site at *www.nicic.gov* for public review (the names of those submitting questions will not be posted). The Web site will be updated regularly and postings will remain on the Web site until the closing date of this cooperative agreement solicitation. Only questions received by 12:00 p.m. (EDT) on August 3, 2012 will be posted on the NIC Web site.

SUPPLEMENTARY INFORMATION:

Background: The National Institute of Corrections has been providing technical assistance, training, and information to the corrections field since 1974 by using a variety of delivery strategies, including networks, Web sites, and other outreach tools. As information technology has advanced, NIC has adopted the use of synchronous and asynchronous learning platforms, electronic networks, e-newsletters, and soon-to-be-added NIC mobile applications (e.g., smart phone apps). The Inaugural Virtual Conference is another step NIC is taking in using new technologies to deliver services to the field as effectively and efficiently as possible. The National Institute of Corrections target date for hosting its Inaugural Virtual Conference is April 2013. Titled ''Handcuff Key to Door Key: A Systems Approach to Re-Entry,'' the conference will cater to criminal justice and corrections professionals, service providers, and stakeholders in the field of corrections. NIC staff and corrections subject matter experts will be providing the content for the virtual conference. NIC is seeking to produce a half-day virtual conference (approximately 5 hours in length) that will include (1) a fully branded convention center with a video greeting; (2) Virtual exhibit hall with scheduled live staff interaction (staff from all NIC divisions); (3) Auditorium with live and/or prerecorded keynote speakers and other presenters; (4) Resource center with downloadable content including white papers, NIC documents, and links in formats including but not limited to .pdf, .doc, .ppt, and .wmv; (5) Communications center with networking opportunities, scheduled discussions, group chat, and forums; and (6) Workshops with live and prerecorded presentations.

Scope of Work: The goals and tasks of this work will include (1) a program manager, a team of event facilitators, and support personnel to manage the virtual conference through design, scheduling, promotion, and delivery; (2) In-studio and/or onsite production staff to create and capture video greetings and workshop sessions; (3) Technical and streaming expertise in delivering content; (4) Event scheduling expertise; (5) Expertise in best practices and communication tips for presenters; (6) Chat-based and phone-based technical support for the event. Proposals will outline in a project plan a detailed chart and description of a project management structure and team roles, a task plan that addresses the planning phase with specific deliverables, delivery phase with specific deliverables, and post conference phase with specific deliverables. In all phases of the project planning, development, and delivery, NIC involvement and approval benchmarks will be included in the overarching project plan.

The deliverables for this project include (1) a fully branded convention center with a video greeting; (2) Virtual exhibit hall with scheduled live staff interaction (staff from all NIC divisions); (3) Auditorium with live and/or prerecorded keynote speakers and other presenters; (4) Resource center with downloadable content including NIC documents and links in formats including .pdf, .doc, .ppt, and wmv; (5) Communications center with networking opportunities, scheduled discussions, group chat, and forums; (6) Workshops with live and prerecorded presentations; (7) Post-conference reports outlining lessons learned (both technical and programmatic); and (8) Registration of attendees and metrics of attendees (e.g., number of hours of attendance per attendee).

Specific Requirements: Requirements include event platform product and technical expertise in virtual conference event planning, scheduling, promotion, and delivery.

Document Requirements: Documents or other media produced under this award must follow these guidelines: Prior to the preparation of the final draft of any document or other media, the awardee must consult with NIC's writer/editor concerning the acceptable formats for manuscript submissions and the technical specifications for electronic media. The awardee must follow the guidelines listed herein, as well as

follow (1) the Guidelines for Preparing and Submitting Manuscripts for Publication as found in the ''General Guidelines for Cooperative Agreements,'' which can be found on our Web site at *www.nicic.gov/cooperativeagreements* and (2) NIC recommendations for producing media using plain language, which can be found at *www.nicici.gov/plainlanguage.*

All final documents and other media submitted under this project may be posted on the NIC Web site and must meet the Federal Government's requirement for accessibility (e.g., 508 PDFs or HTML files). The awardee must provide descriptive text interpreting all graphics, photos, graphs, and/or multimedia that will be included with or distributed alongside the materials and must provide transcripts for all applicable audio/visual works.

Application Requirements: Applications should be concisely written, typed double spaced and reference the project by the ''NIC Opportunity Number'' and title in this announcement. The package must include a cover letter that identifies the audit agency responsible for the applicant's financial accounts as well as the audit period or fiscal year that the applicant operates under (e.g., July 1 through June 30); a program narrative not to exceed 30 pages in response to the statement of work; and a budget narrative explaining projected costs. Applicants may submit a description of the project team's qualifications and expertise relevant to the project but should not attach lengthy resumes. Large attachments to the proposal describing the organization are discouraged.

The following forms must also be included: OMB Standard Form 424, Application for Federal Assistance; OMB Standard Form 424A, Budget information—Non-Construction Programs; OMB Standard Form 424B, Assurances—Non-Construction Programs (these forms are available at *http://www.grants.gov*) and DOJ/NIC Certification Regarding Lobbying; Debarment, Suspension and Other Responsibility Matters; and the Drug-Free Workplace Requirements available at *http://nicic.gov/Downloads/General/certif-frm.pdf.* Failure to supply all required forms with the application package will result in disqualification of the application from consideration.

Authority: Pub. L. 93–415.

Funds Available: NIC is seeking the applicant's best ideas regarding accomplishment of the scope of work and the related costs for achieving the goals of this solicitation. Funds may be used only for the activities that are linked to the desired outcome of the project.

Eligibility of Applicants: An eligible applicant is any public or private agency, educational institution, organization, individual, or team with expertise in the described areas.

Review Considerations: Applications received under this announcement will be subject to the NIC review process. Proposals that fail to provide sufficient information to have them evaluated under the criteria below may be judged non-responsive and disqualified. The criteria for the evaluation of each application will be as follows: Programmatic (40%)

Are all of the goals and project tasks adequately discussed? Is there a clear statement of how each task will be accomplished, including major sub-tasks, the strategies to be employed, required staffing, and other required resources? Are there any innovative approaches, techniques, or design aspects proposed that will enhance the project? Organizational (35%)

Does the proposed project staff possess the skills, knowledge, and expertise necessary to complete the tasks listed under the scope of work? Does the applicant organization, group, or individual have the organizational capacity to achieve all five project tasks? Are the proposed project management and staffing plans realistic and sufficient to complete the project within the project time frame?

Project Management/Administration (25%)

Does the applicant identify reasonable objectives, milestones, and measures to track progress? If the applicant proposes consultants and/or partnerships, is there a reasonable justification for their inclusion in the project and a clear structure to ensure effective coordination? Is the proposed budget realistic, does it provide a sufficient cost detail/narrative, and does it represent good value relative to the anticipated results?

Note: NIC will NOT award a cooperative agreement to an applicant who does not have a Dun and Bradstreet Database Universal Number (DUNS) and is not registered in the Central Contractor Registry (CCR).

A DUNS number can be received at no cost by calling the dedicated toll-free DUNS number request line at 1–800–333–0505 (if you are a sole proprietor, you would dial 1–866–705–5711 and select option 1).

Registration in the CRR can be done online at the CCR Web site: http://www.bpn.gov/ccr. A CCR Handbook and worksheet can also be reviewed at the Web site.

Number of Awards: One.

NIC Opportunity Number: 12AC07. This number should appear as a reference line in the cover letter, where indicated on Standard Form 424, and outside of the envelope in which the application is sent.

Catalog of Federal Domestic Assistance Number: 16.601.

Executive Order 12372: This project is not subject to the provisions of Executive Order 12372.

Jimmy L. Cosby,

Acting Director, National Institute of Corrections.

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request: Site Visit Data Collection Request for American Recovery and Reinvestment Act Funded Grants; Job Training Evaluations

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Employment and Training Administration (ETA) sponsored information collection request (ICR) revision titled, ''Site Visit Data Collection Request for American Recovery and Reinvestment Act funded Grants; Job Training Evaluations,'' to the Office of Management and Budget (OMB) for review and approval for use in accordance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501 *et seq.*).

DATES: Submit comments on or before August 29, 2012.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained from the RegInfo.gov Web site, *http://www.reginfo.gov/public/do/PRAMain,* on the day following publication of this notice or by contacting Michel Smyth by telephone at 202–693–4129 (this is not a toll-free number) or sending an email to *DOL_PRA_PUBLIC@dol.gov.*

Submit comments about this request to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL–ETA, Office of Management and Budget, Room 10235,

725 17th Street NW., Washington, DC 20503, Telephone: 202–395–6929/Fax: 202–395–6881 (these are not toll-free numbers), email: *OIRA_submission@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: Michel Smyth by telephone at 202–693–4129 (this is not a toll-free number) or by email at *DOL_PRA_PUBLIC@dol.gov.*

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: The ETA seeks approval to collect site visit data from organizations that received grants issued under the American Recovery and Reinvestment Act: Pathways Out of Poverty (POP), Energy Training Partnership (ETP), State Energy Sector Partnership (SESP), and Health Care and Other High Growth and Emerging Industries Training grant initiative. POP, ETP, and SESP are all Green Jobs training programs. The overall aim of these evaluations is to determine the extent to which enrollees achieve increases in employment, earnings, and career advancement because of their participation in the training provided and to identify promising best practices and strategies for replication.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information if the collection of information does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1205–0486. The current approval is scheduled to expire on July 31, 2012; however, it should be noted that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional information, see the related notice published in the **Federal Register** on April 20, 2012 (77 FR 23764).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within 30 days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1205–0486. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Agency: DOL–ETA.

Title of Collection: Site Visit Data Collection Request for American Recovery and Reinvestment Act funded Grants; Job Training Evaluations.

DEPARTMENT OF LABOR

Employee Benefits Security Administration

162nd Meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans; Notice of Meeting

Pursuant to the authority contained in Section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, the 162nd open meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans (also known as the ERISA Advisory Council) will be held on August 28–30, 2012.

The three-day meeting will take place in C5521 Room 4, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210. The meeting will run from 9:00 a.m. to approximately 5:30 p.m. on August 28 and 29 and from 8:30 a.m. to approximately 4:30 p.m. on August 30, with a one hour break for lunch each day. The purpose of the open meeting is for Advisory Council members to hear testimony from invited witnesses and to receive an update from the Employee Benefits Security Administration (EBSA).

The Advisory Council is studying the following issues: (1) Managing Disability Risks in an Environment of Individual Responsibility; (2) Current Challenges and Best Practices Concerning Beneficiary Designations in Retirement and Life Insurance Plans; and (3) Examining Income Replacement During Retirement Years in a Defined Contribution Plan System. The schedule for testimony and discussion of these issues generally will be one issue per day in the order noted above. Descriptions of these topics are available on the Advisory Council page of the EBSA web site, at *www.dol.gov/ebsa/aboutebsa/erisa_advisory_council.html*. The EBSA update is scheduled for the afternoon of August 29, subject to change.

Organizations or members of the public wishing to submit a written statement may do so by submitting 30 copies on or before August 14 to Larry Good, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Suite N–5623, 200 Constitution Avenue NW., Washington, DC 20210. Statements also may be submitted as email attachments in text or pdf format transmitted to *good.larry@dol.gov.* It is requested that statements not be included in the body of an email. Statements deemed relevant by the Advisory Council and received on or before August 14 will be included in the record of the meeting and made available in the EBSA Public Disclosure Room, along with witness statements. Do not include any personally identifiable information (such as name, address, or other contact information) or confidential business information that you do not want publicly disclosed. Written statements submitted by invited witnesses will be posted on the Advisory Council page of the EBSA web site, without change, and can be retrieved by most Internet search engines.

Individuals or representatives of organizations wishing to address the Advisory Council should forward their requests to the Executive Secretary by email or telephone (202) 693–8668. Oral presentations will be limited to ten minutes, time permitting, but an extended statement may be submitted for the record. Individuals with

disabilities who need special accommodations should contact the Executive Secretary by August 21.

Signed at Washington, DC, this 23rd day of July 2012.

Michael L. Davis,

Deputy Assistant Secretary, Employee Benefits Security Administration.

Quad/Graphics Inc.,Including On-Site Leased Workers From Staff Mart and A.I.D.,Jonesboro, AR; Amended Certification Regarding EligibilityTo Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended (''Act''), 19 U.S.C. 2273, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on June 21, 2012, applicable to workers of Quad/Graphics Inc., Jonesboro, Arkansas. The Department's notice of determination was published in the **Federal Register** on July 10, 2012 (77 FR 40641).

At the request of a state workforce office, the Department reviewed the certification for workers of the subject firm. The workers were engaged in activities related to the production of printed material such as magazines and catalogues.

The company reports that workers leased from Staff Mart and A.I.D. were employed on-site at the Jonesboro, Arkansas location of Quad/Graphics, Inc. The Department has determined that these workers were sufficiently under the control of the subject firm to be considered leased workers.

Based on these findings, the Department is amending this certification to include workers leased from Staff Mart and A.I.D. working on-site at the Jonesboro, Arkansas location of Quad/Graphics, Inc.

The amended notice applicable to TA–W–81,482 is hereby issued as follows:

All workers of Staff Mart and A.I.D., reporting to Quad/Graphics, Inc., Jonesboro Arkansas, who became totally or partially separated from employment on or after April 5, 2011 through June 21, 2014, and all workers in the group threatened with total or partial separation from employment on the date of certification through two years from the date of certification, are eligible to apply for adjustment assistance under Chapter 2 of Title II of the Trade Act of 1974, as amended.

Signed in Washington, DC, this 19th day of July 2012.

Elliott S. Kushner,

Certifying Officer, Office ofTrade Adjustment Assistance.

RG Steel Sparrows Point LLC,Formerly Known as Severstal Sparrows Point LLC,a Subsidiary of RG Steel LLC,Including On-Site Leased Workers From Echelon Service Company, Sun Associated Industries, Inc., MPI Consultants LLC, Alliance Engineering, Inc., Washington Group International, Javan & Walter, Inc., Kinetic Technical Resources Co., Innovative Practical Approach, Inc., CPSI, Accounts International, Adecco, Aerotek, Booth Consulting, Crown Security, Eastern Automation, EDS(HP), Teksystems, and URS Corporation,Sparrows Point, MD; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended (''Act''), 19 U.S.C. 2273, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on February 9, 2011, applicable to workers and former workers of Severstal International, Sparrows Point, Maryland. The workers are engaged in activities related to the production of rolled steel. On June 22, 2012, the Department issued a Notice of Amended Certification applicable to the subject firm to reflect the change in name due to a change in ownership.

Subsequent to the issuance of the amendment, the Department received new information regarding on-site leased workers at the Sparrows Point, Maryland facility. As a result, the Department reviewed the certification for workers of the subject firm.

New information shows that Accounts International, Adecco, Aerotek, Booth Consulting, Crown Security, Eastern Automation, EDS(HP), TekSystems, and URS Corporation are under the operational control of RG Steel Sparrows Point LLC, Sparrows Point, Maryland.

Accordingly, the Department is amending this certification to properly reflect this matter.

The intent of the Department's certification is to include all workers of the subject firm, including on-site leased workers, who were adversely affected by increased company imports of flat rolled steel.

The amended notice applicable to TA–W–74,919 is hereby issued as follows:

All workers of RG Steel Sparrows Point LLC, formerly known as Severstal Sparrows Point LLC, a subsidiary of RG Steel LLC, including on-site leased workers from Echelon Service Company, Sun Associated Industries, Inc., MPI Consultants LLC, Alliance Engineering, Inc., Washington Group International, Javan & Walter, Inc., Kinetic Technical Resources Co., Innovative Practical Approach, Inc., CPSI, Accounts International, Adecco, Aerotek, Booth Consulting, Crown Security, Eastern Automation, EDS(HP), TekSystems, and URS Corporation, Sparrows Point, Maryland who became totally or partially separated from who became totally or partially separated from employment on or after November 22, 2009 through February 9, 2013, and all workers in the group threatened with total or partial separation from employment on February 9, 2011 through February 9, 2013, are eligible to apply for adjustment assistance under Chapter 2 of Title II of the Trade Act of 1974, as amended.

Signed at Washington, DC, this 18th day of July 2012.

[TA–W–81,546]

Lawson Software, Inc., Including Workers Whose Unemployment Insurance (UI) Wages Were Reported Through Lawson Software Americas, Inc. and Infor, Inc., St. Paul, MN; Including Off-Site Workers From Arizona, Arkansas, California, Colorado, Connecticut, Florida, Illinois, Indiana, Iowa, Kansas, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Utah, Virginia, Washington, and Wisconsin Reporting to St. Paul, MN; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended (''Act''), 19 U.S.C. 2273, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on June 29, 2012, applicable to workers of Lawson Software, Inc., including workers whose unemployment insurance (UI) wages were reported through Lawson Software Americas, Inc. and Infor, Inc., and including remote workers working from home throughout the United States reporting to St. Paul, Minnesota. The Department's notice of determination was published in the **Federal Register** on July 18, 2012 (77 FR 42336).

The Department reviewed the certification for workers of the subject firm. The workers are engaged in activities related to the production of software.

New information shows that worker separations occurred involving employees under the control of the subject firm working off-site specifically working in the following states: Arizona, Arkansas, California, Colorado, Connecticut, Florida, Illinois, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Utah, Virginia, Washington, and Wisconsin. The employees support Lawson Software, Inc., including workers whose unemployment insurance (UI) wages were reported through Lawson Software Americas, Inc. and Infor, Inc., St. Paul, Minnesota engaged in activities related to the production of software.

The intent of the Department's certification is to include all workers of the subject firm who were adversely affected by a shift in production of software.

Based on these findings, the Department is amending this certification to include employees of the subject firm's St. Paul, Minnesota facility working off-site in Arizona, Arkansas, California, Colorado, Connecticut, Florida, Illinois, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Utah, Virginia, Washington, and Wisconsin.

The amended notice applicable to TA–W–81,546 is hereby issued as follows:

All workers of Lawson Software, Inc., including workers whose unemployment insurance (UI) wages were reported through Lawson Software Americas, Inc. and Infor, Inc., St. Paul, Minnesota, including off-site workers from Arizona, Arkansas, California, Colorado, Connecticut, Florida, Illinois, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Utah, Virginia, Washington, and Wisconsin reporting to St. Paul, Minnesota who became totally or partially separated from employment on or after April 26, 2011 through June 29, 2014, and all workers in the group threatened with total or partial separation from employment on date of certification through two years from the date of certification, are eligible to apply for adjustment assistance under Chapter 2 of Title II of the Trade Act of 1974, as amended.

Signed in Washington, DC, this 19th day of July 2012.

Elliott S. Kushner,

Certifying Officer, Office of Trade Adjustment Assistance.

[TA–W–81,097]

Kimberly-Clark Worldwide, Inc.,a Subsidiary of Kimberly-Clark Corporation,Everett Mill,Including On-Site Leased Workers From Injury Free, Incorporated, Ventilation Power Cleaning, Inc., Covenant Security Services, Healthforce, UNISEVE Corporation, Jacobs Engineering, STAFFLOGIX Corporation, and Swift Trucking,Everett, WA; Amended Certification Regarding EligibilityTo Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended (''Act''), 19 U.S.C. 2273, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on December 16, 2011, applicable to workers of Kimberly-Clark Worldwide, Inc., a subsidiary of Kimberly-Clark Corporation, Everett Mill, including on-site leased workers from Injury Free, Incorporated, Ventilation Power Cleaning, Inc., Covenant Security Services, Healthforce, UNISEVE Corporation, and Jacobs Engineering, Everett, Washington. The Department issued an amended certification on January 25, 2012 to include on-site leased workers from STAFFLOGIX Corporation. The subject firm produces tissue products and wood pulp.

Following the allegation that workers of Swift Trucking are part of the subject worker group, the Department reviewed the certification for workers of the subject firm.

The company reports that workers leased from Swift Trucking were employed on-site at the Everett, Washington location of Kimberly-Clark Worldwide, Inc., a subsidiary of Kimberly-Clark Corporation, Everett Mill. The Department has determined that these workers were sufficiently under the control of the subject firm to be considered leased workers.

Based on these findings, the Department is amending this certification to include workers leased from Swift Trucking working on-site at the Everett, Washington location of the subject firm.

The amended notice applicable to TA–W–81,097 is hereby issued as follows:

All workers of Kimberly-Clark Worldwide, Inc., a subsidiary of Kimberly-Clark Corporation, Everett Mill, including on-site leased workers from Injury Free,

Incorporated, Ventilation Power Cleaning, Inc., Covenant Security Services, Healthforce, UNISEVE Corporation, Jacobs Engineering, STAFFLOGIX Corporation, and Swift Trucking, Everett, Washington, who became totally or partially separated from employment on or after February 13, 2012, through December 16, 2013, and all workers in the group threatened with total or partial separation from employment on the date of certification through two years from the date of certification, are eligible to apply for adjustment assistance under Chapter 2 of Title II of the Trade Act of 1974, as amended.

Signed in Washington, DC, this 18th day of July 2012.

Suntron Corporation, Including On-Site Leased Workers From Manpower, Nesco, TPI and Robert Half, Sugarland, TX; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended (''Act''), 19 U.S.C. 2273, the Department of Labor (Department) issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on November 17, 2011, applicable to workers and former workers of Suntron Corporation, including on-site leased workers from Manpower, Sugarland, Texas. The Department's Notice of determination was published in the **Federal Register** on December 6, 2012 (Vol. 76, No. 234 FR 76186).

At the request of a state workforce official, the Department reviewed the certification for workers of the subject firm. The workers were engaged in activities related to the production of circuit boards.

The company reports that workers leased from NESCO, TPI, and Robert Half were employed on-site at the Sugarland, Texas location of Suntron Corporation. The Department has determined that these workers were sufficiently under the control of the subject firm to be considered leased workers.

Based on these findings, the Department is amending this certification to include workers leased from NESCO, TPI, and Robert Half working on-site at the Sugarland, Texas location of the subject firm.

The amended notice applicable to TA–W–80,510 is hereby issued as follows:

All workers of Suntron Corporation, including on-site leased workers from Manpower, NESCO, TPI, and Robert Half, Sugar Land, Texas, who became totally or partially separated from employment on or after October 12, 2010, through November 17, 2013, and all workers in the group threatened with total or partial separation from employment on the date of certification through two years from the date of certification, are eligible to apply for adjustment assistance under Chapter 2 of Title II of the Trade Act of 1974, as amended.

Signed in Washington, DC, this 16th day of July 2012.

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding EligibilityTo Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers by (TA–W) number issued during the period of *July 9, 2012 through July 13, 2012.*

In order for an affirmative determination to be made for workers of a primary firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of Section 222(a) of the Act must be met.

I. Under Section 222(a)(2)(A), the following must be satisfied:

(1) A significant number or proportion of the workers in such workers' firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) The sales or production, or both, of such firm have decreased absolutely; and

(3) One of the following must be satisfied:

(A) Imports of articles or services like or directly competitive with articles produced or services supplied by such firm have increased;

(B) Imports of articles like or directly competitive with articles into which one or more component parts produced by such firm are directly incorporated, have increased;

(C) Imports of articles directly incorporating one or more component parts produced outside the United States that are like or directly competitive with imports of articles incorporating one or more component parts produced by such firm have increased;

(D) Imports of articles like or directly competitive with articles which are produced directly using services supplied by such firm, have increased; and

(4) The increase in imports contributed importantly to such workers' separation or threat of separation and to the decline in the sales or production of such firm; or

II. Section 222(a)(2)(B) all of the following must be satisfied:

(1) A significant number or proportion of the workers in such workers' firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) One of the following must be satisfied:

(A) There has been a shift by the workers' firm to a foreign country in the production of articles or supply of services like or directly competitive with those produced/supplied by the workers' firm;

(B) There has been an acquisition from a foreign country by the workers' firm of articles/services that are like or directly competitive with those produced/supplied by the workers' firm; and

(3) The shift/acquisition contributed importantly to the workers' separation or threat of separation.

In order for an affirmative determination to be made for adversely affected workers in public agencies and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of Section 222(b) of the Act must be met.

(1) A significant number or proportion of the workers in the public agency have become totally or partially separated, or are threatened to become totally or partially separated;

(2) The public agency has acquired from a foreign country services like or directly competitive with services which are supplied by such agency; and

(3) The acquisition of services contributed importantly to such workers' separation or threat of separation.

In order for an affirmative determination to be made for adversely affected secondary workers of a firm and

a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of Section 222(c) of the Act must be met.

(1) A significant number or proportion of the workers in the workers' firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) The workers' firm is a Supplier or Downstream Producer to a firm that employed a group of workers who received a certification of eligibility under Section 222(a) of the Act, and such supply or production is related to the article or service that was the basis for such certification; and

(3) Either—

(A) The workers' firm is a supplier and the component parts it supplied to the firm described in paragraph (2) accounted for at least 20 percent of the production or sales of the workers' firm; or

(B) A loss of business by the workers' firm with the firm described in paragraph (2) contributed importantly to the workers' separation or threat of separation.

In order for an affirmative determination to be made for adversely affected workers in firms identified by the International Trade Commission and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of Section 222(f) of the Act must be met.

(1) The workers' firm is publicly identified by name by the International Trade Commission as a member of a domestic industry in an investigation resulting in—

(A) An affirmative determination of serious injury or threat thereof under section 202(b)(1);

(B) An affirmative determination of market disruption or threat thereof under section 421(b)(1); or

(C) An affirmative final determination of material injury or threat thereof under section 705(b)(1)(A) or 735(b)(1)(A) of the Tariff Act of 1930 (19 U.S.C. 1671d(b)(1)(A) and 1673d(b)(1)(A));

(2) The petition is filed during the 1-year period beginning on the date on which—

(A) A summary of the report submitted to the President by the International Trade Commission under section 202(f)(1) with respect to the affirmative determination described in paragraph (1)(A) is published in the **Federal Register** under section 202(f)(3); or

(B) Notice of an affirmative determination described in subparagraph (1) is published in the **Federal Register**; and

(3) The workers have become totally or partially separated from the workers' firm within—

(A) The 1-year period described in paragraph (2); or

(B) Notwithstanding section 223(b)(1), the 1-year period preceding the 1-year period described in paragraph (2).

81,720	Federal-Mogul Corporation, Global Aftermarket Division, Home-Based Workers Reporting to this Location.	Southfield, MI	

Determinations Terminating Investigations of Petitions for Worker Adjustment Assistance

After notice of the petitions was published in the **Federal Register** and on the Department's Web site, as required by Section 221 of the Act (19 U.S.C. 2271), the Department initiated investigations of these petitions.

The following determinations terminating investigations were issued in cases where these petitions were not filed in accordance with the requirements of 29 CFR 90.11. Every petition filed by workers must be signed by at least three individuals of the petitioning worker group. Petitioners separated more than one year prior to

the date of the petition cannot be covered under a certification of a petition under Section 223(b), and therefore, may not be part of a petitioning worker group. For one or more of these reasons, these petitions were deemed invalid.

TA–W No.	Subject firm	Location	Impact date
81,781	CDI Engineering Corporation	Virginia Beach, VA.	

I hereby certify that the aforementioned determinations were issued during the period of *July 9, 2012 through July 13, 2012.* These determinations are available on the Department's Web site tradeact/taa/taa search form.cfm under the searchable listing of determinations or by calling the Office of Trade Adjustment Assistance toll free at 888–365–6822.

Dated: July 18, 2012.

Investigations Regarding Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 (''the Act'') and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 9, 2012.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 9, 2012.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, Room N–5428, 200 Constitution Avenue NW., Washington, DC 20210.

Signed at Washington, DC, this 20th day of July 2012.

Michael W. Jaffe,

Certifying Officer, Office of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–80,308; TA–W–80,308A]

Notice of Investigation Regarding Termination of Certification

TA–W–80,308, Roseburg Forest Products, Composite Panel Division, Including On-Site Leased Workers of Robert Half, Orangeburg, SC;
TA–W–80,308A, Roseburg Forest Products, Composite Panel Division, Including On-Site Leased Workers of Robert Half, Russellville, SC.

On its own motion, the Department of Labor (Department) has initiated an investigation regarding the possible termination of certification regarding workers' eligibility to apply for Trade Adjustment Assistance (TAA) applicable to workers and former workers of Roseburg Forest Products, Composite Panel Division, Orangeburg, South Carolina and Russellville, South Carolina (hereafter collectively referred to as the subject firm). The certification was issued on August 12, 2011. The Department's Notice of determination was published in the **Federal Register** on September 2, 2011 (76 FR 54796).

The certification was based on the Department's findings that aggregate industry imports of articles like or directly competitive with softwood and hardwood lumber products produced by the subject firm had contributed importantly to worker separations at the subject firm.

Subsequent to the issuance of the certification, the Department received new information that the aggregate industry imports analyzed by the Department are not specific to the subset of the industry in which the subject firm is situated.

Based on a careful review of new information and previously submitted information, the Department has reason to believe that the total or partial separations at the subject firm are no longer attributable to the conditions specified in Section 222 of the Trade Act of 1974, as amended, and 29 CFR 90(b). Consequently, the Department is conducting an investigation pursuant to 29 CFR 90.17.

Conclusion

After careful review, I conclude that the evidence is of sufficient weight to justify the investigation regarding the termination of certification regarding workers' eligibility to apply for Trade Adjustment Assistance applicable to workers and former workers of Roseburg Forest Products, Composite Panel Division, Orangeburg, South Carolina (TA–W–80,308) and Roseburg Forest Products, Composite Panel Division, Russellville, South Carolina (TA–W–80,308A).

Signed at Washington, DC, this 17th day of July, 2012.

Del Min Amy Chen,

Certifying Officer, Office of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–81,264]

Phillips-Van Heusen Corporation, IZOD Dress Furnishings Division, New York, NY; Notice of Negative Determination on Reconsideration

On May 21, 2012, the Department of Labor issued an Affirmative Determination Regarding Application for Reconsideration for the workers and former workers of Phillips-Van Heusen Corporation, IZOD Women's Wholesale Division, New York, New York. The Department's Notice of determination was published in the **Federal Register** on April 19, 2012 (77 FR 23511).

Pursuant to 29 CFR 90.18(c), reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The initial Trade Adjustment Assistance (TAA) investigation resulted in a negative determination based on the findings that with respect to Section 222(a)(2)(A)(ii) of the Act, imports of services like or directly competitive with the design, sourcing, and sales services supplied by Phillips-Van Heusen Corporation, IZOD Women's Wholesale Division, New York, New York has not increased.

In the request for reconsideration, the worker on whose behalf the New York State Department of Labor filed the initial TAA petition claimed that the worker group in the original investigation (workers of Phillips-Van Heusen Corporation, IZOD Women's Wholesale Division, New York, New York) was incorrect, that the subject workers are part of the ''Color Department'' of the ''Men's Dress Shirt Division'' at Phillips-Van Heusen Corporation, New York, New York, and that the separated workers were affected by a shift in the supply of color approval services to China.

Information obtained during the reconsideration investigation confirmed that Phillips-Van Heusen Corporation, Izod Dress Furnishings Division, New York, New York is the correct subject of the TAA investigation.

The reconsideration investigation revealed that, with respect to Section 222(a) and Section 222(b) of the Act, Criterion (1) has not been met. The investigation revealed that a significant number or proportion of the workers in Phillips-Van Heusen Corporation, Izod Dress Furnishings Division, New York, New York, have not become totally or partially separated, nor are they threatened to become totally or partially separated.

Significant number or proportion of the workers means at least three workers in a firm (or appropriate subdivision of the firm) with a work force of fewer than fifty workers or, in a firm (or appropriate subdivision of the firm) with a work force of fifty or more workers, at least five percent of the workers or fifty workers (whichever is less). 29 CFR 90.2

Therefore, after careful review of the request for reconsideration, the Department determines that 29 CFR 90.18(c) has not been met.

Conclusion

After careful review, I determine that the requirements of Section 222 of the Act, 19 U.S.C. 2272, have not been met and, therefore, deny the petition for group eligibility of Phillips-Van Heusen Corporation, Izod Dress Furnishings Division, New York, New York, to apply for adjustment assistance, in accordance with Section 223 of the Act, 19 U.S.C. 2273.

Signed in Washington, DC, on this 16th day of July 2012.

Del Min Amy Chen,

Certifying Officer, Office of Trade Adjustment Assistance.

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–81,287]

American Woodmark Corporation, Moorefield, WV; Notice of Negative Determination on Reconsideration

On May 21, 2012, the Department of Labor (Department) issued an Affirmative Determination Regarding Application for Reconsideration for the workers and former workers of American Woodmark Corporation, Moorefield, West Virginia (subject firm). The Department's Notice was published in the**Federal Register** on June 6, 2012 (77 FR 33491). The workers are engaged in employment related to the production of kitchen and bath cabinetry products.

Pursuant to 29 CFR 90.18(c), reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The initial investigation resulted in a negative determination based on the findings that worker separations were not attributable to increased imports of kitchen and bath cabinetry, or articles like or directly competitive, by the subject firm or its declining customers. Further, worker separations were not attributable to a shift of production of kitchen and bath cabinetry, or articles like or directly competitive, to a foreign country, or a foreign acquisition of these products by the workers' firm.

In the request for reconsideration, petitioners alleged that workers at the subject firm were impacted by increased import competition of kitchen and bath cabinetry products or like or directly competitive articles.

During the reconsideration investigation, the Department reviewed and confirmed information collected during the initial investigation and collected additional information from the subject firm.

The reconsideration investigation findings confirmed that the subject firm and its major customers did not import articles like or directly competitive with kitchen and bath cabinetry products in the period under investigation. Additionally, the reconsideration investigation findings confirmed that the subject firm did not shift the production of kitchen and bath cabinetry products, or like or directly competitive articles, to a foreign country or acquire the production of such articles from a foreign country.

After careful review of the request for reconsideration, previously-submitted information, and information obtained during the reconsideration investigation, the Department determines that 29 CFR 90.18(c) has not been met.

Conclusion

After careful review, I determine that the requirements of Section 222 of the Act, 19 U.S.C. 272, have not been met and, therefore, deny the petition for group eligibility of to apply for adjustment assistance, in accordance with Section 223 of the Act, 19 U.S.C. 2273.

Signed in Washington, DC, on this 13th day of July, 2012.

Del Min Amy Chen,

Certifying Officer, Office of Trade Adjustment Assistance.

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–81,448]

General Dynamics Itronix Corporation; A Subsidiary of General Dynamics Corporation, Including Remote Workers Reporting to Sunrise, FL; Notice of Revised Determination on Reconsideration

On June 22, 2012, the Department of Labor issued a Notice of Affirmative Determination Regarding Application for Reconsideration applicable to workers and former workers of General Dynamics Itronix Corporation, a subsidiary of General Dynamics Corporation, Sunrise, Florida (subject firm). The workers' firm is engaged in activities related to the supply of program management services for rugged laptop computers and rugged mobile devices. The worker group includes remote workers reporting to Sunrise, Florida.

Based on information provided during the reconsideration investigation, the Department determines that worker separations at the subject firm are related to increased imports of articles which are produced using services supplied by the subject firm.

Section 222(a)(1) has been met because a significant number or proportion of the workers in General Dynamics Itronix Corporation, Sunrise, Florida have become totally or partially separated, or are threatened to become totally or partially separated.

Section 222(a)(2)(A)(i) has been met because the sales and/or production by General Dynamics Itronix Corporation, Sunrise, Florida have decreased absolutely.

Section 222(a)(2)(A)(ii) has been met because company imports of articles like or directly competitive with those which are/were produced by using the services supplied by workers of General Dynamics Itronix Corporation, Sunrise, Florida have increased during the relevant period.

Finally, Section 222(a)(2)(A)(iii) has been met because increased company imports contributed importantly to the worker group separations and sales/production declines at General Dynamics Itronix Corporation, Sunrise, Florida.

Conclusion

After careful review of the additional facts obtained on reconsideration, I determine that workers of General Dynamics Itronix Corporation, a subsidiary of General Dynamics Corporation, including remote workers reporting to, Sunrise, Florida, who are/were engaged in employment related to the supply of program management services for rugged laptop computers and rugged mobile devices, meet the worker group certification criteria under Section 222(a) of the Act, 19 U.S.C. 2272(a). In accordance with Section 223 of the Act, 19 U.S.C. 2273, I make the following certification:

All workers of General Dynamics Itronix Corporation, a subsidiary of General Dynamics Corporation, including remote workers reporting to, Sunrise, Florida, who became totally or partially separated from employment on or after March 23, 2011, through two years from the date of certification, and all workers in the group threatened with total or partial separation from employment on the date of certification through two years from the date of certification, are eligible to apply for adjustment assistance under Chapter 2 of Title II of the Trade Act of 1974, as amended.

Signed in Washington, DC, this 16th day of July 2012.

Del Min Amy Chen,

Certifying Officer, Office of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–81,066]

ConocoPhillips Company, Trainer Refinery, Including On-Site Leased Workers From Shrack, Young, and Associates, Inc., and Project Control Associates, Trainer, PA; Notice of Revised Determination on Reconsideration

On April 30, 2012, the Department of Labor issued a Notice of Affirmative Determination Regarding Application for Reconsideration applicable to workers and former workers of ConocoPhillips Company, Trainer Refinery, Trainer, Pennsylvania (subject firm). The subject firm is engaged in activities related to the production of gasoline, distillate, and heavy oil. The subject worker group includes on-site leased workers from Shrack, Young, and Associates, Inc. and Project Control Services.

Based on information obtained during the reconsideration investigation, the Department determines that increased imports of articles like or directly competitive with gasoline, distillate, and heavy oil contributed importantly to workers' separations.

Section 222(a)(1) has been met because a significant number or proportion of the workers in such workers' firm have become totally or partially separated, or are threatened to become totally or partially separated.

Section 222(a)(2)(A)(i) has been met because the sales and/or production of gasoline, distillate, and heavy oil by ConocoPhillips Company, Trainer Refinery, Trainer, Pennsylvania have decreased absolutely.

Section 222(a)(2)(A)(ii) has been met because imports by ConocoPhillips Company of articles like or directly competitive with those produced by ConocoPhillips Company, Trainer Refinery, Trainer, Pennsylvania, have increased during the relevant period.

Finally, Section 222(a)(2)(A)(iii) has been met because the increased imports contributed importantly to the worker group separations and sales/production declines at ConocoPhillips Company, Trainer Refinery, Trainer, Pennsylvania.

Conclusion

After careful review of the additional facts obtained on reconsideration, I determine that workers of ConocoPhillips Company, Trainer Refinery, Trainer, Pennsylvania, who were engaged in employment related to the production of gasoline, distillate, and heavy oil, meet the worker group certification criteria under Section 222(a) of the Act, 19 U.S.C. 2272(a). In accordance with Section 223 of the Act, 19 U.S.C. 2273, I make the following certification:

All workers of ConocoPhillips Company, Trainer Refinery, including on-site leased workers from Shrack, Young, and Associates, Inc. and Project Control Services, Trainer, Pennsylvania Pennsylvania, who became totally or partially separated from employment on or after February 13 2010, through two years from the date of this certification, and all workers in the group threatened with total or partial separation from employment on date of certification through two years from the date of certification, are eligible to apply for adjustment assistance under Chapter 2 of Title II of the Trade Act of 1974, as amended.

Signed in Washington, DC, this 16th day of July 2012.

Del Min Amy Chen,

Certifying Officer, Office of Trade Adjustment Assistance.

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Brookwood-Sago Mine Safety Grants

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Solicitation for Grant Applications (SGA).

Announcement Type: New.
Funding Opportunity Number: SGA 12–3BS.

Catalog of Federal Domestic Assistance (CFDA) Number: 17.603

SUMMARY: The U.S. Department of Labor, Mine Safety and Health Administration (MSHA), is making $1,250,000 available in grant funds for educational and training programs to help identify, avoid, and prevent unsafe working conditions in and around mines. The focus of these grants for the Fiscal Year (FY) 2012 will be on training and training materials for mine emergency preparedness and mine emergency prevention for all underground mines. Applicants for the grants may be States and nonprofit (private or public) entities.

The number of grants awarded will be determined by MSHA's evaluation of grant applications. The amount of each individual grant will be at least $50,000.00. The maximum amount for a 12-month period of performance is $250,000. MSHA may award both annual and renewal (two-year) grants. This notice contains all of the information needed to apply for grant funding, including those eligible grantees awarded a 2011 renewal grant.

DATES: The closing date for applications will be August 31, 2012, (no later than 11:59 p.m. EDST). MSHA will award grants on or before September 30, 2012.

ADDRESSES: Applications for grants submitted under this competition must be submitted electronically using the Government-wide site at *http://www.grants.gov*. If applying online poses a hardship to any applicant, the MSHA Directorate of Educational Policy and Development will provide assistance to help applicants submit online.

FOR FURTHER INFORMATION CONTACT: Any questions regarding this solicitation for grant applications (SGA 12–3BS) should be directed to Robert Glatter at *glatter.robert@dol.gov* or at 202–693–9570 (this is not a toll-free number) or the Grant Officer, Valoree Lilley, at *lilley.valoree@dol.gov* or at 202–693–9831 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: This solicitation provides background information and the requirements for projects funded under the solicitation. This solicitation consists of nine parts:

- Part I provides background information on the Brookwood-Sago grants.
- Part II describes the size and nature of the anticipated awards.
- Part III describes the qualifications of an eligible applicant.
- Part IV provides information on the application and submission process for FY 2012 annual and renewal grants.
- Part V explains the review process and rating criteria that will be used to evaluate the FY 2012 applications.
- Part VI provides information for FY 2011 renewal grantees to apply for FY 2012 funding.
- Part VII provides award administration information.
- Part VIII contains MSHA contact information.
- Part IX addresses Office of Management and Budget information collection requirements.

I. Funding Opportunity Description

A. Overview of the Brookwood-Sago Mine Safety Grant Program

Responding to several coal mine disasters, Congress enacted the Mine Improvement and New Emergency Response Act of 2006 (MINER Act). When Congress passed the MINER Act, it expected that requirements for new and advanced technology, e.g., fire-resistant lifelines and increased breathable air availability in escapeways

would increase safety in mines. The MINER Act also required that every underground coal mine have persons trained in emergency response. Congress emphasized its commitment to training for mine emergencies when it strengthened the requirements for the training of mine rescue teams. Recent events demonstrate that training is the key for proper and safe emergency response and that all miners working underground should be trained in emergency response.

Under Section 14 of the MINER Act, the Secretary of Labor (Secretary) is required to establish a competitive grant program called the ''Brookwood-Sago Mine Safety Grants'' (Brookwood-Sago grants). This program provides funding of education and training programs to better identify, avoid, and prevent unsafe working conditions in and around mines. This program will use grant funds to establish and implement education and training programs or to create training materials and programs. The MINER Act requires the Secretary to give priority to mine safety demonstrations and pilot projects with broad applicability. It also mandates that the Secretary emphasize programs and materials that target miners in smaller mines, including training mine operators and miners on new MSHA standards, high-risk activities, and other identified safety priorities.

B. Grant Structures

MSHA funds the Brookwood-Sago grants annually for 12 months of performance through two types of grants. For the first type, ''annual grants,'' MSHA requires an applicant to compete each year for the available funds. For the second type, ''renewal grants,'' MSHA awards a grant eligible for two separate years of funding with two separate 12-month performance periods.

For renewal grants, the awardees' eligibility for the second year of funding in FY 2013 is contingent on certain conditions being met. MSHA will award funding for the second year of performance based on the following requirements:

1. The first-year grant topics are still a priority with MSHA for training under the Brookwood-Sago grants;

2. Funds are available for the Brookwood-Sago grant program; and

3. The grantee has demonstrated acceptable performance under the first year of the grant.

If MSHA funds the second year of renewal grants, it will advise, in the FY 2013 Brookwood-Sago SGA, those grantees eligible for renewal grants of the documentation necessary to obtain their second year of funding. If a renewal grantee chooses not to pursue the second year of funding, the grantee may still compete for a new Brookwood-Sago grant in FY 2013. MSHA would not penalize an eligible renewal grantee for not applying for its second year of funding under the renewal grant and would permit the grantee to compete for another annual or renewal Brookwood-Sago grant.

C. Educational and Training Program Priorities

MSHA priorities for the FY 2012 funding of the annual Brookwood-Sago grants will focus on training or training materials for mine emergency preparedness and mine emergency prevention for all underground mines. MSHA expects Brookwood-Sago annual grantees to develop training materials or to develop and provide mine safety training or educational programs, recruit mine operators and miners for the training, and conduct and evaluate the training.

For the renewal grants, MSHA's priorities will focus on training for mine emergency preparedness and mine emergency prevention for all underground mines. Except for creating very innovative educational material or equipment, MSHA expects that renewal grants will focus primarily on training mine operators and miners. A renewal grant may include a request for creating educational materials or equipment, but the purpose of these grants is to provide training for as many mine operators and miners as possible. MSHA also expects grantees with renewal grants to recruit mine operators and miners for the training, conduct training, and evaluate the grant program on mine emergency preparedness or mine emergency prevention.

For both annual and renewal grant programs, grantees are also expected to conduct follow-up evaluations with the people who received training in their programs to measure how the training promotes the Secretary's goal of ensuring a safe and healthy workplace. The evaluation will focus on determining how effective their training was in either reducing hazards, improving skills for the selected training topics, or in improving the conditions in mines. Grantees must also cooperate fully with MSHA evaluators of their programs.

II. Award Information

A. Award Amount for FY 2012

MSHA is providing $1,250,000 to award new FY 2012 annual and renewal grants and to fund the second year of eligible FY 2011 renewal grants. The number of grants awarded will be determined by MSHA's evaluation of grant applications. The amount of each individual grant will be no less than $50,000.00 for a 12-month performance period; and the maximum award for a 12-month performance period is $250,000. Applicants requesting less than $50,000 or more than $250,000 for a 12-month performance period will not be considered for funding.

B. Extension of Period of Performance

For annual awards, MSHA may approve a request for a one time no-cost extension to grantees for an additional period of up to 12 months from the expiration date of the annual award based on the success of the project and other relevant factors. See 29 CFR 95.25(e)(2). At the end of the second year of funding for a renewal grant, MSHA may approve a request for a no-cost extension for an additional period of performance of up to 12 months based on the success of the project and other relevant factors.

III. Eligibility Information

A. Eligible Applicants

Applicants for the grants may be States and nonprofit (private or public) entities. Eligible entities may apply for funding independently or in partnership with other eligible organizations. For partnerships, a lead organization must be identified.

Applicants other than States and State-supported or local government-supported institutions of higher education will be required to submit evidence of nonprofit status, preferably from the Internal Revenue Service (IRS). A nonprofit entity as described in 26 U.S.C. 501(c)(4), which engages in lobbying activities, is not eligible for a grant award. See 2 U.S.C. 1611.

B. Cost-Sharing or Matching

Cost-sharing or matching of funds is not required for eligibility.

C. Other Eligibility Requirements

1. Dun and Bradstreet Number (DUNS)

Under 2 CFR 25.200, every applicant for a Federal funding opportunity is required to include a DUNS number with its application. The DUNS number is a nine-digit identification number that uniquely identifies business entities. An applicant's DUNS number is to be entered into Block 8 of Standard Form (SF) 424. There is no charge for obtaining a DUNS number. To obtain a DUNS number, call 1–866–705–5711 or access the following Web site: *http://*

fedgov.dnb.com/webform/displayHomePage.do.

After receiving a DUNS number, all grant applicants must also register as a vendor with the Central Contractor Registration (CCR) through the Web site at *http://www.ccr.gov.* 2 CFR 25.200. Grant applicants must create a user account and then complete and submit the online registration. Once you have submitted the registration, it will take three to five business days to process. The applicant will receive an email notice that the registration is active.

2. Legal Rules Pertaining to Inherently Religious Activities by Organizations That Receive Federal Financial Assistance

The Government generally is prohibited from providing direct Federal financial assistance for inherently religious activities. See 29 CFR Part 2, Subpart D. Grants under this solicitation may not be used for religious instruction, worship, prayer, proselytizing, or other inherently religious activities. Neutral, non-religious criteria that neither favor nor disfavor religion will be employed in the selection of grant recipients and must be employed by grantees in the selection of contractors and subcontractors.

3. Non-Compliant Applications

Applications for new FY 2012 annual and renewal grants that are lacking any of the required elements or do not follow the format prescribed in IV.B will not be reviewed.

4. Late Applications

Applications received after the deadline will not be reviewed unless it is determined to be in the best interest of the Government.

IV. Application and Submission Information for New FY 2012 Annual and Renewal Grants

A. Application Forms

This announcement includes all information and links needed to apply for this funding opportunity. (The information regarding the second-year funding of the FY 2011 renewal grants is located in Part VI.) The full application is available through the Grants.gov Web site *http://www.grants.gov/* under ''Apply for Grants''. The Catalog of Federal Domestic Assistance (CFDA) number needed to locate the appropriate application for this opportunity is 17.603. If an applicant has problems downloading the application package from Grants.gov, contact Grants.gov Contact Center at 1–800–518–4726 or by email at *support@grants.gov.*

The full application package is also available on-line at *www.msha.gov:* Select ''Education & Training,'' click on ''Courses,'' select ''Brookwood-Sago Mine Safety Grants,'' then select ''SGA 12–3BS.'' This Web site also includes all forms and all regulations that are referenced in this SGA. Applicants, however, must apply for this funding opportunity through the Grants.gov Web site.

B. Content and Form of the FY 2012 Application

Each grant application must address mine emergency preparedness or mine emergency prevention for underground mines. The applicant must identify that an application is for an annual or a renewal grant. Applicants must submit a separate application for each topic and each type of grant. The application must consist of three separate and distinct sections. The three required sections are:

- Section 1—Project Forms and Financial Plan (No page limit).
- Section 2—Executive Summary (Not to exceed two pages).
- Section 3—Technical Proposal (Not to exceed 12 pages). Illustrative material can be submitted as an attachment.

The following are mandatory requirements for each section.

1. Project Forms and Financial Plan

This section contains the forms and budget section of the application. The Project Financial Plan will not count against the application page limits. A person with authority to bind the applicant must sign the grant application and forms. Applications submitted electronically through Grants.gov do not need to be signed manually; electronic signatures will be accepted.

(a) Completed SF–424, ''Application for Federal Assistance.'' This form is part of the application package on Grants.gov and is also available at *www.msha.gov.* The SF–424 must identify the applicant clearly and be signed by an individual with authority to enter into a grant agreement. Upon confirmation of an award, the individual signing the SF–424 on behalf of the applicant shall be considered the representative of the applicant.

(b) Completed SF–424A, ''Budget Information for Non-Construction Programs.'' The project budget should demonstrate clearly that the total amount and distribution of funds is sufficient to cover the cost of all major project activities identified by the applicant in its proposal, and must comply with the Federal cost principles and the administrative requirements set forth in this SGA. (Copies of all regulations that are referenced in this SGA are available on-line at *http://www.msha.gov.* Select ''Education & Training,'' click on ''Courses,'' then select ''Brookwood-Sago Mine Safety Grants.'')

For renewal grant applications, applicants must include all the renewal grants information on the SF–424 forms. For example, if the applicant is applying for a renewal grant, the total amount of the grant might be $100,000, and each year's funding could be $50,000. When filling out the SF–424 Application for Federal Assistance form, the proposed project start date in Item No. 17 for renewal grants is 9/30/2012, and the end date is 9/29/2014. The estimated funding in Item No. 18 would be $100,000. On the SF–424A Budget Information for Non-Construction Programs, the applicant would list a total of $50,000 for the first-year funding and $50,000 for the second-year funding.

(c) Budget Narrative. The applicant must provide a concise narrative explaining the request for funds. The budget narrative should separately attribute the Federal funds to each of the activities specified in the technical proposal and it should discuss precisely how any administrative costs support the project goals. Administrative costs may not exceed 15% of the total grant budget. Indirect cost charges must be supported with a copy of an approved Indirect Cost Rate Agreement.

If applicable, the applicant must provide a statement about its program income.

The amount of Federal funding requested for the entire period of performance must be shown on the SF–424 and SF–424A forms.

(d) Completed SF–424B, ''Assurances for Non-Construction Programs.'' Each applicant for these grants must certify compliance with a list of assurances. This form is part of the application package on *http://www.Grants.gov* and also is available at *http://www.msha.gov.*

(e) Supplemental Certification Regarding Lobbying Activities Form. If any funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with the making of a grant or cooperative agreement, the applicant shall complete and submit SF–LLL, ''Disclosure Form to Report Lobbying,'' in accordance with

its instructions. This form is part of the application package on *http://www.Grants.gov* and is also available at *http://www.msha.gov.* Select ''Education & Training,'' click on ''Courses,'' then select ''Brookwood-Sago Mine Safety Grants.''

(f) Non-profit status. Applicants must provide evidence of non-profit status, preferably from the IRS, if applicable.

(g) Accounting System Certification. An organization that receives less than $1 million annually in Federal grants must attach a certification stating that the organization (directly or through a designated qualified entity) has a functioning accounting system that meets the criteria below. The certification should attest that the organization's accounting system provides for the following:

(1) Accurate, current and complete disclosure of the financial results of each Federally sponsored project.

(2) Records that identify adequately the source and application of funds for Federally sponsored activities.

(3) Effective control over and accountability for all funds, property, and other assets.

(4) Comparison of outlays with budget amounts.

(5) Written procedures to minimize the time elapsing between transfers of funds.

(6) Written procedures for determining the reasonableness, allocability, and allowability of cost.

(7) Accounting records, including cost accounting records that are supported by source documentation.

(h) Attachments. The application may include attachments such as resumes of key personnel or position descriptions, exhibits, information on prior government grants, and signed letters of commitment to the project.

2. Executive Summary

The executive summary is a short one-to-two page abstract that succinctly summarizes the proposed project. MSHA will publish, as submitted, all grantees' executive summaries on the DOL Web site. The executive summary must include the following information:

(a) Applicant. Provide the organization's full legal name and address.

(b) Funding requested. List how much Federal funding is being requested. If requesting a renewal grant, include the total for the two years of funding and list each year's requested funding levels.

(c) Grant Topic. List the grant topic and the location and number of mine operators and miners that the organization has selected to train or describe the training materials or equipment to be created with these funds.

(d) Program Structure. Identify the type of grant: An annual or a renewal grant.

(e) Summary of the Proposed Project. Write a brief summary of the proposed project. This summary must identify the key points of the proposal, including an introduction describing the project activities and the expected results. If requesting a renewal grant, also provide a summary of the key points of the second-year's activities and expected outcomes.

3. Technical Proposal

The technical proposal must demonstrate the applicant's capabilities to plan and implement a project or create educational materials or equipment to meet the objectives of this solicitation. MSHA's focus for these grants is on training mine operators and miners and developing training materials for mine emergency preparedness or mine emergency prevention for underground mines. MSHA has two program goals, described below, that will be considered indicators of the success of the program as a whole. The following table explains the types of data grantees must provide and their relationship with the Agency's program goals and performance measures for the Brookwood-Sago grants.

MSHA's program goals	MSHA's performance measures	DATA grantee provides each reporting period
1. Agency creates more effective training to ensure workplaces are safe.	Increase overall number of trainers trained.	Number of training events. Number of trainers trained.
	Increase the number of mine operators and miners trained.	Number of mine operators and miners trained. Number of course days of training provided to industry.
	Provide quality training with clearly stated goals and objectives for improving safety.	Pre- and post-assessment results of trainees. Course evaluations of trainer and training materials. A description of the extent to which others replicate (i.e., adopt or adapt) or institutionalize and continue the training or educational programs after grant funding ends.
2. Agency creates training materials to provide more effective training to ensure workplaces are safe.	Increase number of quality educational materials developed.	Pre- and post-assessment results of the training materials.
	Provide quality training materials with clearly stated goals and objectives for improving safety.	Evaluation of training materials to include the target audience, statement of goals and objectives, learning level, instructions for using, additional material requirements, secondary purposes, adult learning principles and usability in the mine training environment.
	Develop training materials that are reproducible or adaptable.	A description of the extent to which others will replicate (i.e., adopt or adapt) the funded training materials.

The technical proposal narrative is not to exceed 12 single-sided, double-spaced pages, using 12-point font, and must contain the following sections: Program Design, Overall Qualifications of the Applicant, and Output and Evaluation. Any pages over the 12-page limit will not be reviewed. Attachments to the technical proposal are not counted toward the 12-page limit. Major sections and sub-sections of the proposal should be divided and clearly identified. And as required in Section VII subpart I ''Transparency,'' a grantee's final technical proposal will be posted as is on MSHA's Web site unless MSHA receives a version redacting any proprietary, confidential business, or personally identifiable information by October 19, 2012.

MSHA will review and rate the technical proposal in accordance with the selection criteria specified in Part V.

(a) Program Design

(1) Statement of Problem/Need for Funds. Applicants must identify a clear and specific need for proposed activities. They must identify whether they are providing a training program or creating training materials or both. They also must identify whether their application is for an annual or a renewal Brookwood-Sago grant. Applicants also must identify the number of individuals expected to benefit from their training and education program; this should

include identifying the type of underground mines, the geographic locations, and the number of mine operators and miners. Applicants must also identify other Federal funds they receive for similar activities.

(2) Quality of the Project Design. MSHA requires that each applicant include a 12-month workplan that correlates with the grant project period that will begin September 30, 2012, and end September 29, 2013. Renewal grant applicants must also include a second 12-month workplan covering the period from September 30, 2013, and ending September 29, 2014. An outline of specific items required in the workplan follows.

(i) Plan Overview. Describe the plan for grant activities and the anticipated results. The plan should describe such things as the development of training materials, the training content, recruiting of trainees, where or how training will take place, and the anticipated benefits to mine operators and miners receiving the training.

(ii) Activities. Break the plan down into activities or tasks. For each activity, explain what will be done, who will do it, when it will be done, and the anticipated results of the activity. For training, discuss the subjects to be taught, the length of the training sessions, type of training (e.g., Mine Emergency Response Development exercise), and training locations (e.g., classroom, worksites). Describe how the applicant will recruit mine operators and miners for the training. (**Note:** Any commercially developed training materials the applicant proposes to use in its training must undergo an MSHA review before being used.)

(iii) Quarterly Projections. For training and other quantifiable activities, estimate the quantities involved using the table located in Part IV.B.3 for data required to meet the grant goals. For example, estimate how many classes will be conducted and how many mine operators and miners will be trained each quarter of the grant (grant quarters match calendar quarters, i.e., January to March, April to June; but the first quarter is the date of award to December 31, 2012). Also, provide the training number totals for the full year. Quarterly projections are used to measure the actual performance against the plan. Applicants planning to conduct a train-the-trainer program should estimate the number of individuals to be trained during the grant period by those who received the train-the-trainer training. These second-tier training numbers should be included only if the organization is planning to follow up with the trainers to obtain this data during the grant period.

(iv) Materials. Describe each educational material, including any piece of equipment (e.g., mine simulator) to be produced under the grant. Provide a timetable for developing and producing the material. The timetable must include provisions for an MSHA review of draft and camera-ready products or evaluation of equipment. MSHA must review and approve training materials or equipment for technical accuracy and suitability of content before use in the grant program. Whether or not an applicant's project is to develop training materials only, the applicant should provide an overall plan that includes time for MSHA to review any materials produced.

(b) Qualifications of the Applicant

(1) Applicant's Background. Describe the applicant, including its mission, and a description of its membership, if any. Provide an organizational chart (the chart may be included as a separate page which will not count toward the page limit). Identify the following:

(i) Project Director. The project director is the person who will be responsible for the day-to-day operation and administration of the program. Provide the name, title, street address and mailing address (if it is different from the organization's street address), telephone and fax numbers, and email address of the project director.

(ii) Certifying Representative. The certifying representative is the official in the organization who is authorized to enter into grant agreements. Provide the name, title, street address and mailing address (if it is different from the organization's street address), telephone and fax numbers, and email address of the certifying representative.

(2) Administrative and Program Capability. Briefly describe the organization's functions and activities, i.e., the applicant's management and internal controls. Relate this description of functions to the organizational chart. If the applicant has received any other government (Federal, State or local) grant funding, the application must have, as an attachment (which will not count towards the page limit), information regarding these previous grants. This information must include each organization for which the work was done and the dollar value of each grant. If the applicant does not have previous grant experience, it may partner with an organization that has grant experience to manage the grant. If the organization uses this approach, the management organization must be identified and its grant program experience discussed. Lack of past experience with Federal grants is not a determining factor, but an applicant should show a successful experience relevant to the opportunity offered in the application. Such experience could include staff members' experiences with other organizations.

(3) Program Experience. Describe the organization's experience conducting the proposed mine training program or other relevant experience. Include program specifics such as program title, numbers trained, and duration of training. If creating training materials, include the title of other materials developed. Nonprofit organizations, including community-based and faith-based organizations that do not have prior experience in mine safety may partner with an established mine safety organization to acquire safety expertise.

(4) Staff Experience. Describe the qualifications of the professional staff you will assign to the program. Attach resumes of staff already employed (resumes will not count towards the page limit). If some positions are vacant, include position descriptions and minimum hiring qualifications instead of resumes. Staff should have, at a minimum, mine safety experience, training experience, or experience working with the mining community.

(c) Outputs and Evaluations. There are two types of evaluations that must be conducted. First, describe the methods, approaches, or plans to evaluate the training sessions and/or training materials to meet the data requirements listed in the table above. Second, describe plans to assess the long-term effectiveness of the training materials and/or training conducted. The type of training given will determine whether the evaluation should include a process-related outcome or a result-related outcome or both. This will involve following up with an evaluation, or on-site review, if feasible, of miners trained. The evaluation should focus on what changes the trained miners made to abate hazards and improve workplace conditions, or to incorporate the training in the workplace, or both.

For training materials, include an evaluation from individuals trained on the clarity of the presentation, organization, and the quality of the information provided on the subject matter and whether they would continue to use the training materials. Include timetables for follow-up and for submitting a summary of the assessment results to MSHA.

For renewal grants, applicants must describe how the program will address the feedback from its or MSHA's

evaluations to improve its training program, materials (including equipment), or both during the second year.

C. Submission Date, Times, and Addresses

The closing date for receipt of applications under this announcement is August 31, 2012 (no later than 11:59 p.m. EDST). Grant applications must be submitted electronically through the Grants.gov Web site. The Grants.gov site provides all the information about submitting an application electronically through the site as well as the hours of operation. Interested parties can locate the downloadable application package by the CFDA number 17.603.

Applications received by Grants.gov are electronically date and time stamped. An application must be fully uploaded and submitted (and must be date and time stamped by the Grants.gov system) before the application deadline date. Once an interested party has submitted an application, Grants.gov will notify the interested party with an automatic notification of receipt that contains a Grants.gov tracking number. MSHA then will retrieve the application from Grants.gov and send a second notification to the interested party by email.

D. Intergovernmental Review

The Brookwood-Sago grants are not subject to Executive Order 12372, ''Intergovernmental Review of Federal Programs.'' MSHA, however, reminds applicants that if they are not operating MSHA-approved State training grants, they should contact the State grantees and coordinate any training or educational program. Information about each state grant and the entity operating the state grant is provided online at: *http://www.msha.gov/TRAINING/STATES/STATES.asp.*

E. Funding Restrictions

MSHA will determine whether costs are allowable under the applicable Federal cost principles and other conditions contained in the grant award.

1. Allowable Costs

Grant funds may be spent on conducting training, conducting outreach and recruiting activities to increase the number of mine operators and miners participating in the program, developing educational materials, and on necessary expenses to support these activities. Allowable costs are determined by the applicable Federal cost principles identified in Part VII.B.

Program income earned during the award period shall be retained by the recipient, added to funds committed to the award, and used for the purposes and under the conditions applicable to the use of the grant funds.

2. Unallowable Costs

Grant funds may not be used for the following activities under this grant program:

(a) Any activity inconsistent with the goals and objectives of this SGA;

(b) Training on topics that are not targeted under this SGA;

(c) Purchasing any equipment unless pre-approved and in writing bythe MSHA grant officer;

(d) Administrative costs that exceed 15% of the total grant budget; and

(e) Any pre-award costs.

Unallowable costs also include any cost determined by MSHA as not allowed according to the applicable cost principles or other conditions in the grant.

V. Application Review Information for New FY 2012 Grants

A. Evaluation Criteria

MSHA will screen all applications to determine whether all required proposal elements are present and clearly identifiable. Those that do not comply with mandatory requirements will not be evaluated. The technical panels will review grant applications against the criteria listed below on the basis of 100 maximum points for annual grants and the annual portion of the renewal grants and 20 maximum points for the renewal portion of the grant applications.

MSHA will evaluate the applications for annual grants and the annual portion of the two-year applications using the first four categories below. From this group, MSHA will select applicants to receive one-year funding. From these selectees, MSHA will review those that applied for option year (renewal) grants against the criteria listed in category 5 on the basis of 20 maximum points. Please note that MSHA may offer an annual grant to applicants that may not be selected for renewal grants.

1. Program Design—40 Points Total

(a) Statement of Problem/Need for Funds (3 Points)

The proposed training and education program or training materials must address either mine emergency preparedness or mine emergency prevention.

(b) Quality of the Project Design (25 Points)

(1) The proposal to train mine operators and miners clearly estimates the number to be trained and clearly identifies the types of mine operators and miners to be trained.

(2) If the proposal contains a train-the-trainer program, the following information must be provided:

- What ongoing support the grantee will provide to new trainers;
- The number of individuals to be trained as trainers;
- The estimated number of courses to be conducted by the new trainers;
- The estimated number of students to be trained by these new trainers and a description of how the grantee will obtain data from the new trainers documenting their classes and student numbers if conducted during the grant period.

(3) The work plan activities and training are described.

- The planned activities and training are tailored to the needs and levels of the mine operators and miners to be trained. Any special constituency to be served through the grant program is described, e.g., smaller mines, limited English proficiency miners, etc. Organizations proposing to develop materials in languages other than English also will be required to provide an English version of the materials.
- If the proposal includes developing training materials, the work plan must include time during development for MSHA to review the educational materials for technical accuracy and suitability of content. If commercially developed training products will be used for a training program, applicants should also plan for MSHA to review the materials before using the products in their grant programs.
- The utility of the educational materials is described.
- The outreach or process to find mine operators, miners or trainees to receive the training is described.

(c) Replication (4 Points)

The potential for a project to serve a variety of mine operators, miners, or mine sites and/or the extent others may replicate the project.

(d) Innovativeness (3 Points)

The originality and uniqueness of the approach used.

(e) MSHA's Performance Goals (5 Points)

The extent the proposed project will contribute to MSHA's performance goals.

2. Budget—20 Points Total

(a) The Budget Presentation Is Clear and Detailed (15 Points)

- The budgeted costs are reasonable.

• No more than 15% of the total budget is for administrative costs.

• The budget complies with Federal cost principles (which can be found in the applicable Office of Management and Budget (OMB) Circulars and with MSHA budget requirements contained in the grant application instructions).

(b) The Application Demonstrates That the Applicant Has Strong Financial Management and Internal Control Systems (5 Points)

3. Overall Qualifications of the Applicant—25 Points Total

(a) Grant Experience (6 Points)

The applicant has administered, or will work with an organization that has administered, a number of different Federal or State grants. The applicant may demonstrate this experience by having project staff that has experience administering Federal or State grants.

(b) Mine Safety Training Experience (13 Points)

The applicant applying for the grant demonstrates experience with mine safety teaching or providing mine safety educational programs. Applicants that do not have prior experience in providing mine safety training to mine operators or miners may partner with an established mine safety organization to acquire mine safety expertise.

• Project staff has experience in mine safety, the specific topic chosen, or in training mine operators and miners.

• Project staff has experience in recruiting, training, and working with the population the organization proposes to serve.

• Applicant has experience in designing and developing mine safety training materials for a mining program.

• Applicant has experience in managing educational programs.

(c) Management (6 Points)

Applicant demonstrates internal control and management oversight of the project.

4. Outputs and Evaluations—15 Points Total

The proposal should include provisions for evaluating the organization's progress in accomplishing the grant work activities and accomplishments, evaluating training sessions, and evaluating the program's effectiveness and impact to determine if the safety training and services provided resulted in workplace change or improved workplace conditions. The proposal should include a plan to follow up with trainees to determine the impact the program has had in abating hazards and reducing miner injuries and illnesses.

5. Renewal Grants: Second-Year Request—20 Points Total

A renewal proposal must include a description of the project design and budget for the second-year funding. The applicant must also describe how it will obtain input and feedback from first-year training recipients and how it will improve its program based on its or MSHA evaluations.

B. Review and Selection Process for New FY 2012 Grants

A technical panel will rate each complete application against the criteria described in this SGA. One or more applicants may be selected as grantees on the basis of the initial application submission or a minimally acceptable number of points may be established. MSHA may request final revisions to the applications, and then evaluate the revised applications. MSHA may consider any information that comes to its attention in evaluating the applications.

The panel recommendations are advisory in nature. The Deputy Assistant Secretary of Labor for Mine Safety and Health will make a final selection determination based on what is most advantageous to the government, considering factors such as panel findings, geographic presence of the applicants or the areas to be served, Agency priorities, and the best value to the government, cost, and other factors. The Deputy Assistant Secretary's determination for award under this SGA is final.

C. Anticipated Announcement and Award Dates

Announcement of these awards is expected to occur by September 29, 2012. The grant agreement will be signed no later than September 30, 2012.

VI. FY 2011 Renewal Grantees' Process for FY 2012 Funding

A. General

In this section, MSHA is providing the eligible FY 2011 renewal grantees the procedures and required documentation that they must submit to receive their FY 2012 funding. MSHA will notify all renewal grantees of their eligibility. The grantees are reminded that they are not required to apply for the second year of funding. If they do not wish to apply for the second-year funding, the grantees may apply for a new grant under the FY 2012 annual and/or renewal grant program instead.

B. The Process and Required Documentation

1. Documentation

Using its current grant number, each grantee must provide:

(a) A revised SF–424 and SF–424A forms; and

(b) If necessary, a revised workplan.

2. Submission Date, Times, and Addresses

The closing date for receipt of applications under this announcement is August 31, 2012 (no later than 11:59 p.m. EDST). The renewal grantee must submit its application for FY 2012 funding electronically through the Grants.gov Web site.

C. Award Information

Announcement of these awards is expected to occur by

September 29, 2012. The amendment to the FY 2011 grant agreement will be signed no later than September 30, 2012.

VII. Award Administration Information

A. Award Process

Organizations selected as potential grant recipients will be notified by a representative of the Deputy Assistant Secretary, usually the Grant Officer or her staff. An applicant whose proposal is not selected will be notified in writing. The fact that an organization has been selected as a potential grant recipient does not necessarily constitute approval of the grant application as submitted (revisions may be required).

Before the actual grant award, MSHA may enter into negotiations with the potential grant recipient concerning such matters as program components (including the type of grant), staffing and funding levels, and administrative systems. If the negotiations do not result in an acceptable submittal, the Deputy Assistant Secretary reserves the right to terminate the negotiations and decline to fund the proposal.

B. Administrative and National Policy Requirements

All grantees will be subject to applicable Federal laws and regulations (including provisions of appropriations law) and applicable OMB Circulars. The grants awarded under this competitive grant program will be subject to the following administrative standards and provisions, if applicable:

• 29 CFR Part 2, subpart D, Equal Treatment for Religious Organizations.

• 29 CFR Parts 31, 32, 35 and 36, Nondiscrimination.

• 29 CFR Part 93, Restrictions on Lobbying.

- 29 CFR Part 94, Drug-free Workplace.
- 29 CFR Part 95, Uniform Grant Requirements for Nonprofit Organizations.
- 29 CFR Parts 96 and 99, Audits.
- 29 CFR Part 97, Uniform Grant Requirements for States.
- 29 CFR Part 98, Debarment and Suspension.
- 2 CFR Part 25, Universal Identifier and Central Contractor Registration.
- 2 CFR Part 170, Reporting Subawards.
- 2 CFR Part 175, Award Term for Trafficking in Persons.
- 2 CFR Part 220, Cost Principles for Educational Institutions.
- 2 CFR Part 225, Cost Principles for State and Local Governments.
- 2 CFR Part 230, Cost Principles for Other Nonprofit Organizations.
- Federal Acquisition Regulation (FAR) Subpart 31.2, Cost Principles for Commercial Organizations (codified at 48 CFR Subpart 31.2).

Administrative costs for these grants may not exceed 15%. Unless specifically approved, MSHA's acceptance of a proposal or MSHA's award of Federal funds to sponsor any program does not constitute a waiver of any grant requirement or procedure. For example, if an application identifies a specific sub-contractor to provide certain services, the MSHA award does not provide a basis to sole-source the procurement (to avoid competition).

C. Special Program Requirements

1. MSHA Review of Educational Materials

MSHA will review all grantee-produced educational and training materials for technical accuracy and suitability of content during development and before final publication. MSHA also will review training curricula and purchased training materials for technical accuracy and suitability of content before the materials are used. Grantees developing training materials must follow all copyright laws and provide written certification that their materials are free from copyright infringement.

When grantees produce training materials, they must provide copies of completed materials to MSHA before the end of the grant period. Completed materials should be submitted to MSHA in hard copy and in digital format (CD–ROM/DVD) for publication on the MSHA Web site. Two copies of the materials must be provided to MSHA. Acceptable formats for training materials include Microsoft XP Word, PDF, PowerPoint, and any other format agreed upon by MSHA.

2. License

As listed in 29 CFR 95.36, the Department of Labor reserves a royalty-free, nonexclusive, and irrevocable right to reproduce, publish, or otherwise use for Federal purposes any work produced under a grant, and to authorize others to do so. Grantees must agree to provide the Department of Labor a paid-up, nonexclusive, and irrevocable license to reproduce, publish, or otherwise use for Federal purposes all products developed, or for which ownership was purchased, under an award. Such products include, but are not limited to, curricula, training models, technical assistance products, and any related materials. Such uses include, but are not limited to, the right to modify and distribute such products worldwide by any means, electronic, or otherwise.

3. Acknowledgement on Printed Materials

All approved grant-funded materials developed by a grantee shall contain the following disclaimer: ''This material was produced under grant number XXXXX from the Mine Safety and Health Administration, U.S. Department of Labor. It does not necessarily reflect the views or policies of the U.S. Department of Labor, nor does mention of trade names, commercial products, or organizations imply endorsement by the U.S. Government.''

When issuing statements, press releases, request for proposals, bid solicitations, and other documents describing projects or programs funded in whole or in part with Federal money, all grantees receiving Federal funds must clearly state:

(a) The percentage of the total costs of the program or project that will be financed with Federal money;

(b) The dollar amount of Federal financial assistance for the project or program; and

(c) The percentage and dollar amount of the total costs of the project or program that will be financed by non-governmental sources.

4. Use of U.S. Department of Labor (USDOL) and MSHA Logos

MSHA may allow the USDOL or the MSHA logo to be applied to the grant-funded material including posters, videos, pamphlets, research documents, national survey results, impact evaluations, best practice reports, and other publications. Before the DOL or MSHA logos are used on grant-funded materials, the grantees must consult with MSHA. In no event shall the USDOL or the MSHA logo be placed on any item until MSHA has given the grantee written permission to use either logo on the item.

5. Reporting

Grantees are required by Departmental regulations to submit financial and project reports, as described below, each quarter (grant quarters match calendar quarters, i.e., January to March, April to June).

(a) Financial Reports

All financial reports are due no later than 30 days after the end of the quarter and shall be submitted to MSHA electronically. Grantees will be contacted with instructions on how to submit reports.

(b) Technical Project Reports

After signing the agreement, the grantee shall submit technical project reports to MSHA no later than 30 days after the end of each quarter. Technical project reports provide both quantitative and qualitative information and a narrative assessment of performance for the preceding three-month period. See 29 CFR 95.51 and 29 CFR 97.40. This should include the current grant progress against the overall grant goals as provided in Part IV.B.3.

Between reporting dates, the grantee shall immediately inform MSHA of significant developments or problems affecting the organization's ability to accomplish the work. See 29 CFR 95.51(f) and 29 CFR 97.40(d).

(c) Final Reports

At the end of each 12-month performance period, each grantee must provide a final financial report, a summary of its technical project reports, and an evaluation report. These final reports are due no later than 90 days after the end of the 12-month performance period.

In addition to these requirements, in its second-year final technical report, renewal grantees must provide the total outputs for the two years, a list of best practices used, and any changes made as a result of evaluation feedback.

H. Freedom of Information

Any information submitted in response to this SGA will be subject to the provisions of the Freedom of Information Act, as appropriate.

I. Transparency in the Grant Process

DOL is committed to conducting a transparent grant award process and publicizing information about program outcomes. Posting awardees' grant applications on public Web sites is a means of promoting and sharing innovative ideas. Under this SGA, DOL

will publish the awardees' Executive Summaries, selected information from their SF–424s, and a version of awardees' Technical Proposals on the Department's Web site or similar location. None of the Attachments to the Technical Proposal provided with the applications will be published. The Technical Proposals and Executive Summaries will not be published until after the grants are awarded. In addition, information about grant progress and results may also be made publicly available.

DOL recognizes that grant applications sometimes contain information that an applicant may consider proprietary or business confidential information, or may contain personally identifiable information. Proprietary or business confidential information is information that is not usually disclosed outside your organization and disclosing this information is likely to cause you substantial competitive harm.

Personally identifiable information is any information that can be used to distinguish or trace an individual's identity, such as name, social security number, date and place of birth, mother's maiden name, or biometric records; and any other information that is linked or linkable to an individual, such as medical, educational, financial, and employment information.[1]

Executive Summaries will be published in the form originally submitted, without any redactions. Applicants should not include any proprietary or confidential business information or personally identifiable information in this summary. In the event that an applicant submits proprietary or confidential business information or personally identifiable information, DOL is not liable for the posting of this information contained in the Executive Summary. The submission of the grant application constitutes a waiver of the applicant's objection to the posting of any proprietary or confidential business information contained in the Executive Summary. Additionally, the applicant is responsible for obtaining all authorizations from relevant parties for publishing all personally identifiable information contained within the Executive Summary. In the event the Executive Summary contains proprietary or confidential business or personally identifiable information, the applicant is presumed to have obtained all necessary authorizations to provide this information and may be liable for any improper release of this information.

By submission of this grant application, the applicant agrees to indemnify and hold harmless the United States, the U.S. Department of Labor, its officers, employees, and agents against any liability or for any loss or damages arising from this application. By such submission of this grant application, the applicant further acknowledges having the authority to execute this release of liability.

In order to ensure that proprietary or confidential business information or personally identifiable information is properly protected from disclosure when DOL posts the winning Technical Proposals, applicants whose Technical Proposals will be posted will be asked to submit a second redacted version of their Technical Proposal, with any proprietary or confidential business information and personally identifiable information redacted. All non-public information about the applicant's staff or other individuals should be removed as well.

The Department will contact the applicants whose Technical Proposals will be published by letter or email, and provide further directions about how and when to submit the redacted version of the Technical Proposal.

Submission of a redacted version of the Technical Proposal will constitute permission by the applicant for DOL to make the redacted version publicly available. We will also assume that the applicant has obtained the agreement to the redacted version of the applicant's Technical Proposal. If an applicant fails to provide a redacted version of the Technical Proposal by October 19, 2012, DOL will publish the original Technical Proposal in full, after redacting only personally identifiable information. (Note that the original, unredacted version of the Technical Proposal will remain part of the complete application package, including an applicant's proprietary and confidential business information and any personally identifiable information.)

Applicants are encouraged to disclose as much of the grant application information as possible, and to redact only information that clearly is proprietary, confidential commercial/business information, or capable of identifying a person. The redaction of entire pages or sections of the Technical Proposal is not appropriate, and will not be allowed, unless the entire portion merits such protection. Should a dispute arise about whether redactions are appropriate, DOL will follow the procedures outlined in the Department's Freedom of Information Act (FOIA) regulations (29 CFR Part 70).

Redacted information in grant applications will be protected by DOL from public disclosure in accordance with federal law, including the Trade Secrets Act (18 U.S.C. 1905), FOIA, and the Privacy Act (5 U.S.C. 552a). If DOL receives a FOIA request for your application, the procedures in DOL's FOIA regulations for responding to requests for commercial/business information submitted to the government will be followed, as well as all FOIA exemptions and procedures. 29 CFR 70.26. Consequently, it is possible that application of FOIA rules may result in release of information in response to a FOIA request that an applicant redacted in its ''redacted copy.''

VIII. Agency Contacts

Any questions regarding this solicitation for grant applications (SGA 12–3BS) should be directed to Robert Glatter at *glatter.robert@dol.gov* or at 202–693–9570 (this is not a toll-free number) or the Grant Officer, Valoree Lilley at *lilley.valoree @dol.gov* or at 202–693–9831 (this is not a toll-free number). MSHA's Web page at *www.msha.gov* is a valuable source of background for this initiative.

IX. Office of Management and Budget Information Collection Requirements

This SGA requests information from applicants. This collection of information is approved under OMB Control No. 1225–0086 (expires November 30, 2012).

In accordance with the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. Public reporting burden for the grant application is estimated to average 20 hours per response, for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Each recipient who receives a grant award notice will be required to submit nine progress reports to MSHA. MSHA estimates that each report will take approximately two and half hours to prepare.

Send comments regarding the burden estimated or any other aspect of this collection of information, including suggestions for reducing this burden, to the OMB Desk Officer for MSHA, Office of Management and Budget, Room 10235, Washington, DC 20503 and MSHA, electronically to Robert Glatter

[1] OMB Memorandum 07–16 and 06–19. GAO Report 08–536, *Privacy: Alternatives Exist for Enhancing Protection of Personally Identifiable Information,* May 2008, *http://www.gao.gov/assets/280/275558.pdf.*

at *glatter.robert@dol.gov* or the Grant Officer, Valoree Lilley at *lilley.valoree @dol.gov* or by mail to Robert Glatter, Room 2148, 1100 Wilson Boulevard, Arlington, Virginia 22209.

This information is being collected for the purpose of awarding a grant. The information collected through this ''Solicitation for Grant Applications'' will be used by the Department of Labor to ensure that grants are awarded to the applicant best suited to perform the functions of the grant. Submission of this information is required in order for the applicant to be considered for award of this grant. Unless otherwise specifically noted in this announcement, information submitted in the respondent's application is not considered to be confidential.

Authority: 30 U.S.C. 965.

Dated: July 24, 2012.

Patricia W. Silvey,

Deputy Assistant Secretary for Operations, Mine Safety and Health.

BILLING CODE 4510–43–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. They authorize the preservation of records of continuing value in the National Archives of the United States and the destruction, after a specified period, of records lacking administrative, legal, research, or other value. Notice is published for records schedules in which agencies propose to destroy records not previously authorized for disposal or reduce the retention period of records already authorized for disposal. NARA invites public comments on such records schedules, as required by 44 U.S.C. 3303a(a).

DATES: Requests for copies must be received in writing on or before August 29, 2012. Once the appraisal of the records is completed, NARA will send a copy of the schedule. NARA staff usually prepare appraisal memorandums that contain additional information concerning the records covered by a proposed schedule. These, too, may be requested and will be provided once the appraisal is completed. Requesters will be given 30 days to submit comments.

ADDRESSES: You may request a copy of any records schedule identified in this notice by contacting Records Management Services (ACNR) using one of the following means:

Mail: NARA (ACNR), 8601 Adelphi Road, College Park, MD 20740–6001.

Email: request.schedule@nara.gov.

FAX: 301–837–3698.

Requesters must cite the control number, which appears in parentheses after the name of the agency which submitted the schedule, and must provide a mailing address. Those who desire appraisal reports should so indicate in their request.

FOR FURTHER INFORMATION CONTACT: Margaret Hawkins, Director, National Records Management Program (ACNR), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740–6001. Telephone: 301–837–1799. Email: *request.schedule@nara.gov.*

SUPPLEMENTARY INFORMATION: Each year Federal agencies create billions of records on paper, film, magnetic tape, and other media. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA's approval, using the Standard Form (SF) 115, Request for Records Disposition Authority. These schedules provide for the timely transfer into the National Archives of historically valuable records and authorize the disposal of all other records after the agency no longer needs them to conduct its business. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

The schedules listed in this notice are media neutral unless specified otherwise. An item in a schedule is media neutral when the disposition instructions may be applied to records regardless of the medium in which the records are created and maintained. Items included in schedules submitted to NARA on or after December 17, 2007, are media neutral unless the item is limited to a specific medium. (See 36 CFR 1225.12(e).)

No Federal records are authorized for destruction without the approval of the Archivist of the United States. This approval is granted only after a thorough consideration of their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and whether or not they have historical or other value.

Besides identifying the Federal agencies and any subdivisions requesting disposition authority, this public notice lists the organizational unit(s) accumulating the records or indicates agency-wide applicability in the case of schedules that cover records that may be accumulated throughout an agency. This notice provides the control number assigned to each schedule, the total number of schedule items, and the number of temporary items (the records proposed for destruction). It also includes a brief description of the temporary records. The records schedule itself contains a full description of the records at the file unit level as well as their disposition. If NARA staff has prepared an appraisal memorandum for the schedule, it too includes information about the records. Further information about the disposition process is available on request.

Schedules Pending

1. Department of Agriculture, Forest Service (N1–95–10–8, 32 items, 31 temporary items). Records related to agency programs such as waste prevention, recycling, safety and health, and road maintenance. Proposed for permanent retention are case files pertaining to Native American claims.

2. Department of Agriculture, Forest Service (N1–95–10–9, 84 items, 63 temporary items). Records related to various programs throughout the agency, including general correspondence, reports, case files, plans, and studies. Proposed for permanent retention are law enforcement reports and plans; boundary modification case files; land transfer, title, and status files; significant controlled correspondence; planned technology reports; aerial photographs; remote sensing data and imagery; maps; and channel and dam project design case files.

3. Department of the Army, Agency-wide (N1–AU–09–20, 1 item, 1 temporary item). Master files of an electronic system used to track equal opportunity complaints.

4. Department of the Army, Agency-wide (N1–AU–10–11, 1 item, 1 temporary item). Master files of an electronic information system containing force management data, including personnel and equipment requirements and authorizations.

5. Department of the Army, Agency-wide (N1–AU–10–38, 1 item, 1 temporary item). Master files of an electronic information system used to track real property planning criteria, including category codes, design criteria, and land use information.

6. Department of Defense, Office of the Secretary of Defense (N1–330–11–6, 44 items, 38 temporary items). Records relating to administrative functions of the Special Inspector General for Iraq Reconstruction, including office management files, record locators, reference publications, and routine budget and finance files. Proposed for permanent retention are publications, Congressional correspondence, policy files, organizational planning and structure files, press materials, budget justification files, legislative program files, and legal opinions.

7. Department of Homeland Security, U.S. Coast Guard (N1–26–12–1, 2 items, 1 temporary item). Routine search and rescue records which are not fully included in marine information tracking systems. Proposed for permanent retention are records of historically significant search and rescue case files.

8. Department of Homeland Security, U.S. Coast Guard (N1–26–12–3, 5 items, 5 temporary items). Records of the Coast Guard Exchange System scholarship committee, including files for accepted and rejected applicants and committee and conference files.

9. Department of the Interior, Bureau of Land Management, (N1–49–09–17, 5 items, 4 temporary items). Master files of an electronic information system used for wildfire management activities on public lands. Proposed for permanent retention are fire reports from the major Federal fire-fighting agencies.

10. Department of the Interior, Office of the Secretary (DAA–0048–2012–0002, 4 items, 1 permanent item). Records of the Office of Restoration and Damage Assessment, including administrative files, duplicate copies of consent decrees, and allocation records. Proposed for permanent retention are the designation records of the authorized official delegated to act on the behalf of the Secretary of the Interior, including official damage assessments, high level correspondence, final implementation orders of corrective actions, and all supporting documentation.

11. Department of Justice, Criminal Division (DAA–0060–2012–0007, 1 item, 1 temporary item). Master files of an electronic information system used to manage correspondence.

12. Department of Justice, United States Attorneys' Offices (N1–118–11–1, 6 items, 6 temporary items). Master files of electronic information systems providing administrative tracking of grand jury activity.

13. Department of the Navy, Agency-wide (DAA–0343–2012–0001, 6 items, 2 temporary items). Duplicate copies of engineering drawings and technical reports. Proposed for permanent retention are record copies of engineering drawings and technical reports.

14. Department of Transportation, National Highway Traffic Safety Administration (N1–416–05–4, 18 items, 15 temporary items). Records of the Office of the Chief Counsel, including routine litigation files, confidentiality requests, and administrative files. Proposed for permanent retention are legislative rulemaking and review files and significant litigation case files.

15. Department of the Treasury, Internal Revenue Service (N1–58–11–12, 4 items, 4 temporary items). Master files and system documentation of an electronic information system used to rank and score tax returns and identify improperly filed returns and appropriate treatments.

16. Department of the Treasury, Internal Revenue Service (N1–58–11–13, 14 items, 14 temporary items). Collection activity reports used for tracking and reporting purposes.

17. Department of the Treasury, Internal Revenue Service (N1–58–12–7, 4 items, 4 temporary items). Master files, inputs, outputs, and system documentation of an electronic information system used to allocate, bill, and collect fees from pharmaceutical companies for the Medicare Part B Trust Fund.

18. Department of the Treasury, Internal Revenue Service (N1–58–12–8, 5 items, 5 temporary items). Master files and system documentation of electronic information systems used to analyze and monitor excise tax compliance.

19. Department of the Treasury, Internal Revenue Service (N1–58–12–9, 2 items, 2 temporary items). Records documenting privacy protections for information systems, Web sites, and other automated systems that collect personally identifiable information.

20. Department of the Treasury, Internal Revenue Service (N1–58–12–11, 3 items, 3 temporary items). Master files and system documentation of an electronic information system used to track and send correspondence regarding Supplemental Group Ruling Information to exempt organizations.

21. Department of the Treasury, Internal Revenue Service (N1–58–12–12, 2 items, 2 temporary items). Records relating to forms used for the New Markets Tax Credit program that document taxpayers' equity investments and events requiring recapture of tax credit.

22. Department of the Treasury, Internal Revenue Service (N1–58–12–13, 1 item, 1 temporary item). Records including forms and letters used to alert exempt organizations of inadequate record keeping practices and legal requirements.

23. Department of the Treasury, Internal Revenue Service (N1–58–12–14, 2 items, 2 temporary items). Master files and system documentation of an electronic information system used to support strategic planning, budgeting, and performance management processes.

24. Department of the Treasury, Internal Revenue Service (N1–58–12–15, 1 item, 1 temporary item). Records including reports used to identify and track debit vouchers and accounting issues.

25. Consumer Financial Protection Bureau, Agency-wide (N1–587–12–2, 1 item, 1 temporary item). Master files of an electronic information system containing interstate land registration records.

26. Nuclear Regulatory Commission, Office of Nuclear Reactor Regulation (N1–431–09–2, 1 item, 1 temporary item). Master files of an electronic information system containing information on the structural integrity of reactor pressure vessels in licensed nuclear power plants.

Dated: July 23, 2012.

Paul M. Wester, Jr.,

Chief Records Officer for the U.S. Government.

BILLING CODE 7515–01–P

OFFICE OF NATIONAL DRUG CONTROL POLICY

Revised Meeting Notice: Leadership Meeting on Maternal, Fetal, and Infant Opioid Exposure and Neonatal Abstinence Syndrome

AGENCY: Office of National Drug Control Policy.

ACTION: Revised notice.

SUMMARY: An ONDCP Leadership Meeting on Maternal, Fetal and Infant

Opioid Exposure and Neonatal Abstinence Syndrome (NAS) will bring together leaders in the field of policy, opioid exposed infants, pain treatment during pregnancy, and addiction treatment during and after pregnancy. The meeting will be held on Thursday, August 30th 2012 in the Indian Treaty Room, Eisenhower Executive Office Building, 17th Street and Pennsylvania Avenue NW., Washington D.C, 20500 starting at 9:00 a.m. and concluding at 5:30 p.m. The overall objectives of the meeting are to review the state of science and policy and discuss the remaining challenges to the field concerning the upswing in maternal prescription drug abuse and dependence and resulting increases in opioid exposed babies with NAS and possibly other consequences. Misuse and abuse of, and dependence upon, prescription opioid drugs adversely affect the health of millions of Americans and their families.

The specific conference objectives are: (1) To share research findings concerning the NAS epidemic and its costs; (2) to begin a national discussion concerning promising and best practices for treating opioid exposed babies; (3) to raise awareness about opioid misuse and dependence during pregnancy and the need for women with drug use disorders to access treatment through family medicine and gynecological practitioners, and specialty treatment providers; (4) to discuss legal and policy issues related to opioid using pregnant women and mothers including barriers to accessing treatment; (5) to promote awareness among regulatory agencies and insurers concerning the risks and benefits of opioids to developing fetuses and the likelihood of neonatal abstinence syndrome resulting from long term opioid use during pregnancy; and (6) to raise awareness about risk prevention opportunities among practitioners and regulators. Members of the public who wish to attend this meeting should telephone ONDCP's Maternal, Fetal, and Infant Opioid Exposure and Neonatal Abstinence Syndrome telephone line at (202) 395–7454 to arrange building access no later than Friday, August 10, 2012. Seating for members of the public is limited and will be assigned on a first come, first served basis.

To Attend or For Further Information Contact: Cecelia Spitznas, Ph.D. at (202) 395–7454 or email *rsvp@ondcp.eop.gov*.

Dated: July 24, 2012.

Linda V. Priebe,

Deputy General Counsel.

BILLING CODE 3180–W1–P

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review, Request for Comments

Summary: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the Railroad Retirement Board (RRB) is forwarding three Information Collection Requests (ICR) to the Office of Information and Regulatory Affairs (OIRA), Office of Management and Budget (OMB). Our ICR describes the information we seek to collect from the public. Review and approval by OIRA ensures that we impose appropriate paperwork burdens.

The RRB invites comments on the proposed collections of information to determine (1) the practical utility of the collections; (2) the accuracy of the estimated burden of the collections; (3) ways to enhance the quality, utility, and clarity of the information that is the subject of collection; and (4) ways to minimize the burden of collections on respondents, including the use of automated collection techniques or other forms of information technology. Comments to the RRB or OIRA must contain the OMB control number of the ICR. For proper consideration of your comments, it is best if the RRB and OIRA receive them within 30 days of the publication date.

1. *Title and purpose of information collection:* Employee Representative's Status and Compensation Reports; OMB 3220–0014.

Under Section 1(b)(1) of the Railroad Retirement Act (RRA), the term ''employee'' includes an individual who is an employee representative. As defined in Section 1(c) of the RRA, an employee representative is an officer or official representative of a railway labor organization other than a labor organization included in the term ''employer,'' as defined in the RRA, who before or after August 29, 1935, was in the service of an employer under the RRA and who is duly authorized and designated to represent employees in accordance with the Railway Labor Act, or, any individual who is regularly assigned to or regularly employed by such officer or official representative in connection with the duties of his or her office. The requirements relating to the application for employee representative status and the periodic reporting of the compensation resulting from such status is contained in 20 CFR part 209.10.

The RRB utilizes Forms DC–2a, *Employee Representative's Status Report,* and DC–2, *Employee Representative's Report of Compensation,* to obtain the information needed to determine employee representative status and to maintain a record of creditable service and compensation resulting from such status. Completion is required to obtain or retain a benefit. One response is requested of each respondent.

Previous Requests for Comments: The RRB has already published the initial 60-day notice (76 FR 40657 on July 10, 2012) required by 44 U.S.C. 3506(c)(2). That request elicited no comments.

Information Collection Request (ICR)

Title: Employee Representative's Status and Compensation Reports.

OMB Control Number: 3220–0014.

Form(s) submitted: DC–2 and DC–2a.

Type of request: Revision of a currently approved collection of information.

Affected public: Private Sector; Businesses or other for-profits.

Abstract: Benefits are provided under the Railroad Retirement Act (RRA) for individuals who are employee representatives as defined in section 1 of the RRA. The collection obtains information regarding the status of such individuals and their compensation.

Changes proposed: The RRB proposes a minor editorial change to both Forms DC–2 and DC–2a.

The burden estimate for the ICR is as follows:

Form No.	Annual responses	Time (minutes)	Burden (hours)
DC–2a	3	15	1
DC–2	65	30	33
Total	68	.....	34

2. *Title and Purpose of information collection:* Nonresident Questionnaire; OMB 3220–0145.Under Public Laws 98–21 and 98–76, benefits under the Railroad Retirement Act payable to annuitants living outside the United States may be subject to taxation under United States income tax laws. Whether the social security equivalent and non-social security equivalent portions of Tier I, Tier II, vested dual benefit, or supplemental annuity payments are subject to tax withholding, and whether the same or different rates are applied to each payment, depends on a beneficiary's citizenship and legal residence status, and whether exemption under a tax treaty between the United States and the country in which the beneficiary is a legal resident has been claimed. To effect the required tax withholding, the Railroad Retirement Board (RRB) needs to know a nonresident's citizenship and legal residence status.

To secure the required information, the RRB utilizes Form RRB–1001, *Nonresident Questionnaire,* as a supplement to an application as part of the initial application process, and as an independent vehicle for obtaining the needed information when an annuitant's residence or tax treaty status changes. Completion is voluntary. One response is requested of each respondent.

Previous Requests for Comments: The RRB has already published the initial 60-day notice (76 FR 40658 on July 10, 2012) required by 44 U.S.C. 3506(c)(2). That request elicited no comments.

Information Collection Request (ICR)

Title: Nonresident Questionnaire.
OMB Control Number: 3220–0145.
Form(s) submitted: RRB–1001.
Type of request: Extension without change of a currently approved collection.
Affected public: Individuals or Households.
Abstract: Under the Railroad Retirement Act, the benefits payable to an annuitant living outside the United States may be subject to withholding under Public Laws 98–21 and 98–76. The form obtains the information needed to determine the amount to be withheld.
Changes proposed: The RRB proposes no changes to Form RRB–1001.
The burden estimate for the ICR is as follows:

Form No.	Annual responses	Time (minutes)	Burden (hours)
RRB–1001	1,300	30	650

3. *Title and Purpose of information collection:* Statement of Claimant or Other Person; OMB 3220–0183

To support an application for an annuity under Section 2 of the Railroad Retirement Act (RRA) or for unemployment benefits under Section 2 of the Railroad Unemployment Insurance Act (RUIA), pertinent information and proofs must be furnished for the RRB to determine benefit entitlement. Circumstances may require an applicant or other person(s) having knowledge of facts relevant to the applicant's eligibility for an annuity or benefits to provide written statements supplementing or changing statements previously provided by the applicant. Under the railroad retirement program these statements may relate to a change in an annuity beginning date(s), date of marriage(s), birth(s), prior railroad or non-railroad employment, an applicant's request for reconsideration of an unfavorable RRB eligibility determination for an annuity or various other matters. The statements may also be used by the RRB to secure a variety of information needed to determine eligibility to unemployment and sickness benefits. Procedures related to providing information needed for RRA annuity or RUIA benefit eligibility determinations are prescribed in 20 CFR parts 217 and 320 respectively.

The RRB utilizes Form G–93, *Statement of Claimant or Other Person,* to obtain from applicants or other persons, the supplemental or corrective information needed to determine applicant eligibility for an RRA annuity or RUIA benefits. Completion is voluntary. One response is requested of each respondent.

Previous Requests for Comments: The RRB has already published the initial 60-day notice (76 FR 40658 on July 10, 2012) required by 44 U.S.C. 3506(c)(2). That request elicited no comments.

Information Collection Request (ICR)

Title: Statement of Claimant or Other Person.
OMB Control Number: 3220–0183.
Form(s) submitted: G–93.
Type of request: Extension without change of a currently approved collection.
Affected public: Individuals or Households.
Abstract: Under Section 2 of the Railroad Retirement Act and the Railroad Unemployment Insurance Act, pertinent information and proofs must be submitted by an applicant so that the Railroad Retirement Board can determine his or her entitlement to benefits. The collection obtains information supplementing or changing information previously provided by an applicant.
Changes proposed: The RRB proposes no revisions to Form G–93.
The burden estimate for the ICR is as follows:

Form No.	Annual responses	Time (minutes)	Burden (hours)
G–93	900	15	225

Additional Information or Comments: Copies of the forms and supporting documents can be obtained from Dana Hickman at (312) 751–4981 or *Dana.Hickman@RRB.GOV*.

Comments regarding the information collection should be addressed to Charles Mierzwa, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611–2092 or *Charles.Mierzwa@RRB.GOV* and to the OMB Desk Officer for the RRB, Fax: 202–395–6974, Email address: *OIRA_Submission@omb.eop.gov*.

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review, Request for Comments

Summary: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the Railroad Retirement Board (RRB) is forwarding an Information Collection Request (ICR) to the Office of Information and Regulatory Affairs (OIRA), Office of Management and Budget (OMB). Our ICR describes the information we seek to collect from the public. Review and approval by OIRA ensures that we impose appropriate paperwork burdens.

The RRB invites comments on the proposed collection of information to determine (1) the practical utility of the collection; (2) the accuracy of the estimated burden of the collection; (3) ways to enhance the quality, utility, and clarity of the information that is the subject of collection; and (4) ways to minimize the burden of collections on respondents, including the use of automated collection techniques or other forms of information technology. Comments to the RRB or OIRA must contain the OMB control number of the ICR. For proper consideration of your comments, it is best if the RRB and OIRA receive them within 30 days of the publication date.

Under Section 6 of the Railroad Retirement Act (RRA), lump-sum death benefits are payable to surviving widow(er)s, children, and certain other dependents. Lump-sum death benefits are payable after the death of a railroad employee *only* if there are no qualified survivors of the employee immediately eligible for annuities. With the exception of the residual death benefit, eligibility for survivor benefits depends on whether the deceased employee was ''insured'' under the RRA at the time of death. If the deceased employee was not insured, jurisdiction of any survivor benefits payable is transferred to the Social Security Administration and survivor benefits are paid by that agency instead of the RRB. The requirements for applying for benefits are prescribed in 20 CFR 217, 219, and 234.

The collection obtains the information required by the RRB to determine entitlement to and amount of the survivor death benefits applied for. To collect the information, the RRB uses Forms AA–11a, *Designation for Change of Beneficiary for Residual Lump-Sum;* AA–21, *Application for Lump-Sum Death Payment and Annuities Unpaid at Death;* AA–21cert, *Application Summary and Certification;* G–131, *Authorization of Payment and Release of All Claims to a Death Benefit or Accrued Annuity Payment;* and G–273a, *Funeral Director's Statement of Burial Charges.* One response is requested of each respondent. Completion is required to obtain benefits.

Previous Requests for Comments: The RRB has already published the initial 60-day notice (76 FR 31898 on May 30, 2012) required by 44 U.S.C. 3506(c)(2). That request elicited no comments.

Information Collection Request (ICR)

Title: Application for Survivor Death Benefits.

OMB Control Number: 3220–0031.

Form(s) submitted: AA–11a, AA–21cert, AA–21, G–131, G–273a.

Type of request: Extension without change of a currently approved collection.

Affected public: Individuals or Households.

Abstract: The collection obtains the information needed to pay death benefits and annuities due but unpaid at death under the Railroad Retirement Act. Benefits are paid to designated beneficiaries or to survivors in a priority designated law.

Changes proposed: The RRB proposes no changes to the forms in the collection.

The burden estimate for the ICR is as follows:

Form No.	Annual responses	Time (minutes)	Burden (hours)
AA–11a	100	10	17
AA–21cert (with assistance)	4,500	20	1,500
AA–21 (without assistance)	300	40	200
G–131	600	5	50
G–273a	5,000	10	833
Total	10,500	.....	2,600

Additional Information or Comments: Copies of the forms and supporting documents can be obtained from Dana Hickman at (312) 751–4981 or *Dana.Hickman@RRB.GOV.*

Comments regarding the information collection should be addressed to Charles Mierzwa, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois, 60611–2092 or *Charles.Mierzwa@RRB.GOV* and to the OMB Desk Officer for the RRB, Fax: 202–395–6974, email address: *OIRA_Submission@omb.eop.gov.*

BILLING CODE 7905–01–P

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549–0213.

Extension:

Form 11–K, OMB Control No. 3235–0082, SEC File No. 270–101.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management Budget for extension and approval.

Form 11–K (17 CFR 249.311) is the annual report designed for use by employee stock purchase, savings and similar plans to comply with the reporting requirements under Section 15(d) of the Securities and Exchange Act of 1934 (the ''Exchange Act'') (15 U.S.C. 78o(d)). Section 15(d) establishes a periodic reporting obligation for every issuer of a class of securities registered under the Securities Act of 1933 (the ''Securities Act'') (15 U.S.C. 77a *et seq.*). Form 11–K provides employees of an issuer with financial information so that they can assess the performance of the investment vehicle or stock plan. Form 11–K takes approximately 30 burden hours per response and is filed by 2,000

respondents for total of 60,000 burden hours.

Written comments are invited on: (a) Whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden imposed by the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collections of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Thomas Bayer, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 6432 General Green Way, Alexandria, Virginia 22312; or send an email to: *PRA_Mailbox@sec.gov*.

Dated: July 24, 2012.

Kevin M. O'Neill,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549–0213.

Extension:

Rules 17h–1T and 17h–2T, SEC File No. 270–359, OMB Control No. 3235–0410.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (''PRA''), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for extension of the previously approved collection of information provided for in Rules 17h–1T and 17h–2T (17 CFR 240.17h–1T and 17 CFR 240.17h–2T), under the Securities and Exchange Act of 1934 (17 U.S.C. 78a *et seq.*) (''Exchange Act'').

Rule 17h–1T requires a broker-dealer to maintain and preserve records and other information concerning certain entities that are associated with the broker-dealer. This requirement extends to the financial and securities activities of the holding company, affiliates and subsidiaries of the broker-dealer that are reasonably likely to have a material impact on the financial or operational condition of the broker-dealer. Rule 17h–2T requires a broker-dealer to file with the Commission quarterly reports and a cumulative year-end report concerning the information required to be maintained and preserved under Rule 17h–1T.

The collection of information required by Rules 17h–1T and 17h–2T, collectively referred to as the ''risk assessment rules,'' is necessary to enable the Commission to monitor the activities of a broker-dealer affiliate whose business activities are reasonably likely to have a material impact on the financial or operational condition of the broker-dealer. Without this information, the Commission would be unable to assess the potentially damaging impact of the affiliate's activities on the broker-dealer.

There are currently 275 respondents that must comply with Rules 17h–1T and 17h–2T. Each of these 275 respondents requires approximately 10 hours per year, or 2.5 hours per quarter, to maintain the records required under Rule 17h–1T, for an aggregate annual burden of 2,750 hours (275 respondents × 10 hours). In addition, each of these 275 respondents must make five annual responses under Rule 17h–2T. These five responses require approximately 14 hours per respondent per year, or 3.5 hours per quarter, for an aggregate annual burden of 3,850 hours (275 respondents × 14 hours).

In addition, there are approximately twenty-five new respondents per year that must draft an organizational chart required under Rule 17h–1T and establish a system for complying with the risk assessment rules. The staff estimates that drafting the required organizational chart requires one hour and establishing a system for complying with the risk assessment rules requires three hours, thus requiring an aggregate of 100 hours (25 new respondents × 4 hours). Thus, the total compliance burden per year is approximately 6,700 burden hours (2,750 + 3,850 + 100).

Rule 17h–1T specifies that the records required to be maintained under the Rule must be preserved for a period of not less than three years. There is no specific retention period or record keeping requirement for Rule 17h–2T. The collection of information is mandatory and the information required to be provided to the Commission pursuant to the risk assessment rules is deemed confidential, notwithstanding any other provision of law under Section 17(h)(5) of the Exchange Act (15 U.S.C. 78q(h)(5)) and Section 552(b)(3)(B) of the Freedom of Information Act (5 U.S.C. 552(b)(3)(B)).

The Commission may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

Background documentation for this information collection may be viewed at the following Web site: *www.reginfo.gov.* Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503, or by sending an email to: *Shagufta_Ahmed@omb.eop.gov;* and (ii) Thomas Bayer, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 6432 General Green Way, Alexandria, VA 22312 or send an email to: *PRA_Mailbox@sec.gov.* Comments must be submitted to OMB within 30 days of this notice.

Dated: July 24, 2012.

Kevin M. O'Neill,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon Written Request, Copies Available From: U.S. Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549–0213.

Extension:

Rule 17g–5, SEC File No. 270–581, OMB Control No. 3235–0649.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for approval of extension of the previously approved collection of information provided for in Rule 17g–5 (17 CFR 240.17g–5) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*) (''Exchange Act'').

The Credit Rating Agency Reform Act of 2006 (Pub. L. 109–291) (''Rating Agency Act''), enacted on September 29, 2006, defines the term ''nationally recognized statistical rating organization,'' or ''NRSRO'' and

provides authority for the Commission to implement registration, recordkeeping, financial reporting, and oversight rules with respect to registered credit rating agencies.

In 2009, the Commission adopted amendments to Rule 17g–5. Rule 17g–5, as amended, imposes additional requirements on NRSROs in order to address concerns about the integrity of their credit rating procedures and methodologies in light of the role they played in determining credit ratings for securities collateralized by or linked to subprime residential mortgages.

Rule 17g–5, as amended, requires NRSROs to disclose and manage certain conflicts of interest. The collection of information obligation imposed by Rule 17g–5 is mandatory for credit rating agencies that are applying to register or are registered with the Commission as NRSROs. Registration with the Commission as an NRSRO is voluntary.

The Rating Agency Act added a new Section 15E, ''Registration of Nationally Recognized Statistical Rating Organizations'' (15 U.S.C. 78o–7) to the Exchange Act. Exchange Act Section 15E(h)(2) provides the Commission with authority to prohibit, or require the management and disclosure of, any potential conflict of interest relating to the issuance of credit ratings by an NRSRO (15 U.S.C. 78o–7(h)(2)).

Rule 17g–5, as amended, requires the disclosure and establishment of procedures to manage an additional conflict of interest and prohibits an NRSRO from issuing a rating for a structured finance product unless information about the transaction and the assets underlying the rated security are disclosed to certain persons. The Commission estimates that it will take 10 NRSROs approximately 300 hours to develop a system, as well as the policies and procedures, for the disclosures required by Rule 17g–5, resulting in a total one-time hour burden of 3,000.

Rule 17g–5, as amended, also requires disclosures on a transaction by transaction basis. The Commission estimates that the total number of structured finance ratings issued by all NRSROs in a given year would be 14,880 and that it would take 1 hour per transaction to make the information publicly available resulting in a total aggregate annual burden to the industry of 14,880 hours.

Rule 17g–5, as amended, also requires arrangers to disclose certain information. The Commission estimates that it would take 200 arrangers subject to the rule approximately 300 hours to develop a system, as well as the policies and procedures, for the disclosures required by Rule 17g–5, resulting in a total one-time hour burden of 60,000.

Rule 17g–5, as amended, also requires disclosures by arrangers on a transaction by transaction basis. The Commission estimates that 200 arrangers would arrange approximately 20 new transactions per year and that it would take 1 hour per transaction to make the information publicly available, resulting in a total aggregate annual burden of 4,000 hours.

Rule 17g–5, as amended, also requires disclosure of information by arrangers on an ongoing basis that is used by an NRSRO to undertake credit rating surveillance on the structured finance product. The Commission estimates this disclosure would be required for approximately 125 transactions a month, and it would take each respondent approximately 0.5 hours per transaction to disclose the information. Therefore, the Commission estimates that it would take each respondent approximately 750 hours on an annual basis to disclose such information, for a total aggregate annual burden of 150,000 hours.

Finally, Rule 17g–5, as amended, requires NRSROs to submit an annual certification to the Commission. The Commission estimates that it would take each NRSRO approximately 2 hours to complete the certification, resulting in a total aggregate annual burden of 20 hours.

Accordingly, the total estimated burden associated with Rule 17g–5 is 63,000 hours on a one-time basis (3,000 + 60,000 = 63,000) and 168,900 on an annual basis (14,880 + 150,000 + 4,000 + 20 = 168,900).

The Commission may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

The public may view background documentation for this information collection at the following Web site, *www.reginfo.gov.* Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503 or by sending an email to: *Shagufta_Ahmed@omb.eop.gov;* and (ii) Thomas Bayer, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 6432 General Green Way, Alexandria, VA 22312 or send an email to *PRA_Mailbox@sec.gov.* Comments must be submitted within 30 days of this notice.

Dated: July 24, 2012.

Kevin M. O'Neill,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 30145; 812–14022]

Saratoga Investment Corp., et al.; Notice of Application

July 23, 2012.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice of an application for an order under section 6(c) of the Investment Company Act of 1940 (the ''Act'') for an exemption from sections 18(a) and 61(a) of the Act.

APPLICANTS: Saratoga Investment Corp. (the ''Company''), Saratoga Investment Advisors, LLC (the ''Investment Adviser''), Saratoga Investment Corp. SBIC GP, LLC (the ''General Partner''), and Saratoga Investment Corp. SBIC LP (''Saratoga SBIC'').

SUMMARY OF THE APPLICATION: The Company requests an order to permit it to adhere to a modified asset coverage requirement.

FILING DATES: The application was filed April 2, 2012. Applicants have agreed to file an amendment during the notice period, the substance of which is reflected in this notice.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on August 17, 2012, and should be accompanied by proof of service on the Applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Elizabeth M. Murphy, Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090. Applicants: 535 Madison Avenue, NY, NY 10022.

FOR FURTHER INFORMATION CONTACT: Lewis B. Reich, Senior Counsel, at (202) 551–6919, or Jennifer L. Sawin, Branch Chief, at (202) 551–6821 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or for an applicant using the Company name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Applicants' Representations

1. The Company, a Maryland corporation, is an externally managed, non-diversified, closed-end management investment company that has elected to be regulated as a business development company (''BDC'') under the Act.[1] The Company seeks to generate both current income and capital appreciation on its investments primarily through mezzanine debt, leveraged loans and to a lesser extent equity. The Investment Adviser, a Delaware limited liability company, is the investment adviser to the Company. The Investment Adviser is registered under the Investment Advisers Act of 1940.

2. Saratoga SBIC, a Delaware limited partnership, is a small business investment company (''SBIC'') licensed by the Small Business Administration (''SBA'') to operate under the Small Business Investment Act of 1958 (''SBIA''). Saratoga SBIC is excluded from the definition of investment company by section 3(c)(7) of the Act. The Company directly owns 99% of Saratoga SBIC in the form of a limited partnership interest and is the sole member of the General Partner. The General Partner, a Delaware limited liability company that is a wholly-owned subsidiary of the Company, owns 1% of Saratoga SBIC in the form of a general partnership interest. The Company acts as manager of and investment adviser to Saratoga SBIC.

Applicants' Legal Analysis

1. The Company requests an exemption pursuant to section 6(c) of the Act from the provisions of sections 18(a) and 61(a) of the Act to permit it to adhere to a modified asset coverage requirement with respect to any direct or indirect wholly owned subsidiary of the Company that is licensed by the SBA to operate under the SBIA as a SBIC and relies on Section 3(c)(7) for an exception from the definition of ''investment company'' under the 1940 Act (each, a ''SBIC Subsidiary'').[2] Applicants state that companies operating under the SBIA, such as SBIC Subsidiaries, will be subject to the SBA's substantial regulation of permissible leverage in their capital structure.

2. Section 18(a) of the Act prohibits a registered closed-end investment company from issuing any class of senior security or selling any such security of which it is the issuer unless the company complies with the asset coverage requirements set forth in that section. Section 61(a) of the Act makes section 18 applicable to BDCs, with certain modifications. Section 18(k) exempts an investment company operating as an SBIC from the asset coverage requirements for senior securities representing indebtedness that are contained in section 18(a)(1)(A) and (B).

3. Applicants state that the Company may be required to comply with the asset coverage requirements of section 18(a) (as modified by section 61(a)) on a consolidated basis because the Company may be deemed to be an indirect issuer of any class of senior security issued by Saratoga SBIC or another SBIC Subsidiary. Applicants state that applying section 18(a) (as modified by section 61(a)) on a consolidated basis generally would require that the Company treat as its own all assets and any liabilities held directly either by itself, by Saratoga SBIC, or by another SBIC Subsidiary. Accordingly, the Company requests an order under section 6(c) of the Act exempting the Company from the provisions of section 18(a) (as modified by section 61(a)), such that senior securities issued by each SBIC Subsidiary that would be excluded from the SBIC Subsidiary's asset coverage ratio by section 18(k) if it were itself a BDC would also be excluded from the Company's consolidated asset coverage ratio.

4. Section 6(c) of the Act, in relevant part, permits the Commission to exempt any transaction or class of transactions from any provision of the Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicants state that the requested relief satisfies the section 6(c) standard. Applicants contend that, because the SBIC Subsidiary would be entitled to rely on section 18(k) if it were a BDC itself, there is no policy reason to deny the benefit of that exemption to the Company.

Applicants' Condition

Applicants agree that any order granting the requested relief will be subject to the following condition:

The Company shall not issue or sell any senior security and the Company shall not cause or permit Saratoga SBIC or any other SBIC Subsidiary to issue or sell any senior security of which the Company, Saratoga SBIC or any other SBIC Subsidiary is the issuer except to the extent permitted by section 18 (as modified for BDCs by section 61) of the Act; provided that, immediately after the issuance or sale by any of the Company, Saratoga SBIC or any other SBIC Subsidiary of any such senior security, the Company, individually and on a consolidated basis, shall have the asset coverage required by section 18(a) of the Act (as modified by section 61(a)). In determining whether the Company has the asset coverage on a consolidated basis required by section 18(a) of the Act (as modified by section 61(a)), any senior securities representing indebtedness of Saratoga SBIC or another SBIC Subsidiary shall not be considered senior securities and, for purposes of the definition of ''asset coverage'' in section 18(h), shall be treated as indebtedness not represented by senior securities.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Kevin M. O'Neill,

Deputy Secretary.

[FR Doc. 2012–18449 Filed 7–27–12; 8:45 am]

BILLING CODE 8011–01–P

[1] Section 2(a)(48) defines a BDC to be any closed-end investment company that operates for the purpose of making investments in securities described in section 55(a)(1) through 55(a)(3) of the Act and makes available significant managerial assistance with respect to the issuers of such securities.

[2] All existing entities that currently intend to rely on the order are named as applicants. Any other existing or future entity that may rely on the order in the future will comply with the terms and condition of the order.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–67490; File No. SR–NYSEArca–2012–75]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Proposed Rule Change Amending NYSE Arca Equities Rule 7.37(c) To Provide That the Tracking Order Process Is Available Only for Orders That Are Eligible To Route to an Away Market

July 24, 2012.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that, on July 11, 2012, NYSE Arca, Inc. (the ''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend NYSE Arca Equities Rule 7.37(c) to provide that the Tracking Order Process is available only for orders that are eligible to route to an away market. The text of the proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend NYSE Arca Equities Rule 7.37(c) to provide that the Tracking Order Process is available only for orders that are eligible to route to an away market.

NYSE Arca Equities Rule 7.37 (''Rule 7.37'') sets forth the Order Execution process at the Exchange. Rule 7.37(c) specifies that during Core Trading Hours only, if an order has not been executed in its entirety pursuant to the Directed Order Process (Rule 7.37(a)), the Display Order Process (Rule 7.37(b)(1)), or the Working Order Process (Rule 7.37(b)(2)), such order may be matched and executed in the Tracking Order Process in price/time priority. The rule specifies that any portion of an order received from another market center or market participant shall be cancelled immediately, and an incoming order that is designated as an ISO will not interact in the tracking order process. Incoming orders that enter the Tracking Order Process execute against Tracking Orders, which are undisplayed, priced round lot orders that are eligible for execution in the Tracking Order Process against orders equal to or less than the aggregate size of the Tracking Order interest at that price.[3]

The Exchange proposes to amend Rule 7.37(c) to specify that only orders that are eligible to route to an away market would participate in the Tracking Order Process. Because the rule would specify that only interest that is eligible to route to an away market would participate, the Exchange proposes to delete the provision that states that incoming orders designated as an ISO will not interact in the Tracking Order Process. In addition, the Exchange proposes to delete the provision concerning the cancellation of any order received from another market center or market participant as moot in today's market structure. The Exchange previously included that rule language to address the operation of the markets under the Intermarket Trading System (''ITS''). ITS was decommissioned in connection with the implementation of Regulation NMS on July 9, 2007. Now that the markets operate pursuant to Regulation NMS, orders received from other market centers are marked as intermarket sweep orders, which by definition, are not routable orders. Accordingly, with the proposed amendment to clarify that the tracking order process is applicable only to routable orders, the existing rule text is now obviated.

The Exchange notes that the proposed rule change is consistent with the manner by which the Exchange operates the Tracking Order Process and would not necessitate any changes to order processing.[4]

2. Statutory Basis

The statutory basis for the proposed rule change is Section 6(b)(5) of the Securities Exchange Act of 1934 (the ''Act''),[5] which requires the rules of an exchange to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes that the proposed rule change removes impediments to and perfects the mechanism of a free and open market by providing transparency regarding which orders are eligible to interact in the Tracking Order Process. In particular, the proposed rule change eliminates rule text that is obsolete in today's market structure and replaces it with updated rule text.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i)

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* NYSE Arca Equities Rule 7.31(f).

[4] The Exchange notes that when it adopted the Tracking Order Process, the Exchange explained in its rule filing that after the Tracking Order Process, an order would be routed to an away market: ''[a]fter the order has been matched against any Tracking Orders, if the order has not been executed in its entirety and the remaining part of the order is an odd lot, the odd lot order would be executed in the Odd Lot Tracking Order Process, as described below. Otherwise *the order would be routed pursuant to the final step of the execution algorithm.*'' *See* Securities Exchange Act Release No. 43608 (Nov. 21, 2000), 65 FR 78822 at 78828 (Dec. 15, 2000) (SR–PCX–00–25) (emphasis added).

[5] 15 U.S.C. 78f(b)(5).

as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–NYSEArca–2012–75 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2012–75. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2012–75 and should be submitted on or before August 20, 2012.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[6]

Kevin M. O'Neill,

Deputy Secretary.

BILLING CODE 8011–01–P

SUSQUEHANNA RIVER BASIN COMMISSION

Public Hearing

AGENCY: Susquehanna River Basin Commission.

ACTION: Notice.

SUMMARY: The Susquehanna River Basin Commission will hold a public hearing on August 23, 2012, in Harrisburg, Pennsylvania. At this public hearing, the Commission will hear testimony on the projects listed in the **SUPPLEMENTARY INFORMATION** section of this notice. Such projects are intended to be scheduled for Commission action at its next business meeting, tentatively scheduled for September 20, 2012, which will be noticed separately. The public should take note that this public hearing will be the only opportunity to offer oral comment to the Commission for the listed projects. The deadline for the submission of written comments is September 4, 2012.

DATES: The public hearing will convene on August 23, 2012, at 2:30 p.m. The public hearing will end at 5:00 p.m. or at the conclusion of public testimony, whichever is sooner. The deadline for the submission of written comments is September 4, 2012.

ADDRESSES: The public hearing will be conducted at the North Office Building, Hearing Room 1 (Ground Level), North Street (at Commonwealth Avenue), Harrisburg, PA 17120.

FOR FURTHER INFORMATION CONTACT: Richard A. Cairo, General Counsel, telephone: (717) 238–0423, ext. 306; fax: (717) 238–2436.

Information concerning the applications for these projects is available at the SRBC Water Resource Portal at *www.srbc.net/wrp.* Materials and supporting documents are available to inspect and copy in accordance with the Commission's Access to Records Policy at *www.srbc.net/pubinfo/docs/2009-02%20Access%20to%20Records%20Policy%209-10-09.PDF.*

Opportunity To Appear and Comment

Interested parties may appear at the hearing to offer comments to the Commission on any project listed below. The presiding officer reserves the right to limit oral statements in the interest of time and to otherwise control the course of the hearing. Ground rules will be posted on the Commission's web site, *www.srbc.net,* prior to the hearing for review. The presiding officer reserves the right to modify or supplement such rules at the hearing. Written comments on any project listed below may also be mailed to Mr. Richard Cairo, General Counsel, Susquehanna River Basin Commission, 1721 North Front Street, Harrisburg, Pa 17102–2391, or submitted electronically through *http://www.srbc.net/pubinfo/publicparticipation.htm.* Comments mailed or electronically submitted must be received by the Commission on or before September 4, 2012, to be considered.

SUPPLEMENTARY INFORMATION: The public hearing will cover the following projects:

Projects for Action

1. Project Sponsor and Facility: Borough of Adamstown, Adamstown Borough, Lancaster County, Pa. Application for renewal of groundwater withdrawal of up to 0.099 mgd (30-day average) from Well 4 (Docket No. 19801104).

2. Project Sponsor and Facility: Anadarko E&P Company LP (Second Fork Larrys Creek), Mifflin Township, Lycoming County, Pa. Application for surface water withdrawal of up to 0.499 mgd (peak day).

3. Project Sponsor and Facility: Cabot Oil & Gas Corporation (Susquehanna River), Susquehanna Depot Borough, Susquehanna County, Pa. Application for renewal of surface water withdrawal of up to 1.500 mgd (peak day) (Docket No. 20080908).

4. Project Sponsor and Facility: Cabot Oil & Gas Corporation (Susquehanna River), Great Bend Township, Susquehanna County, Pa. Application for renewal of surface water withdrawal of up to 2.000 mgd (peak day) (Docket No. 20080905).

5. Project Sponsor and Facility: Caernarvon Township Authority, Caernarvon Township, Berks County, Pa. Application for renewal of groundwater withdrawal of up to 0.035 mgd (30-day average) from Well 6 (Docket No. 19820912).

[6] 17 CFR 200.30–3(a)(12).

6. Project Sponsor and Facility: Carrizo (Marcellus), LLC (Muddy Run), Gulich Township, Clearfield County, Pa. Application for surface water withdrawal of up to 0.720 mgd (peak day).

7. Project Sponsor and Facility: East Hempfield Township Municipal Authority, East Hempfield Township, Lancaster County, Pa. Application for groundwater withdrawal of up to 0.070 mgd (30-day average) from S–1 (Baker Spring).

8. Project Sponsor and Facility: East Hempfield Township Municipal Authority, East Hempfield Township, Lancaster County, Pa. Application for groundwater withdrawal of up to 0.288 mgd (30-day average) from Well W–1.

9. Project Sponsor and Facility: East Hempfield Township Municipal Authority, East Hempfield Township, Lancaster County, Pa. Application for groundwater withdrawal of up to 0.792 mgd (30-day average) from Well W–2.

10. Project Sponsor and Facility: East Hempfield Township Municipal Authority, East Hempfield Township, Lancaster County, Pa. Application for groundwater withdrawal of up to 0.288 mgd (30-day average) from Well W–3.

11. Project Sponsor and Facility: East Hempfield Township Municipal Authority, East Hempfield Township, Lancaster County, Pa. Application for groundwater withdrawal of up to 0.331 mgd (30-day average) from Well W–4.

12. Project Sponsor and Facility: East Hempfield Township Municipal Authority, East Hempfield Township, Lancaster County, Pa. Application for renewal of groundwater withdrawal of up to 0.792 mgd (30-day average) from Well W–5 (Docket No. 19810203).

13. Project Sponsor and Facility: Enerplus Resources (USA) Corporation (West Branch Susquehanna River), East Keating Township, Clinton County, Pa. Application for surface water withdrawal of up to 2.000 mgd (peak day).

14. Project Sponsor and Facility: EQT Production Company (Pine Creek), Porter Township, Lycoming County, Pa. Application for surface water withdrawal of up to 1.000 mgd (peak day).

15. Project Sponsor and Facility: EXCO Resources (PA), LLC (Larrys Creek), Mifflin Township, Lycoming County, Pa. Application for renewal of surface water withdrawal with modification to increase by an additional 0.413 mgd, for a total of 0.499 mgd (peak day) (Docket No. 20080936).

16. Project Sponsor and Facility: Falling Springs Water Works, Inc. (Falling Springs Reservoir), Ransom Township, Lackawanna County, Pa. Application for surface water withdrawal of up to 0.800 mgd (peak day).

17. Project Sponsor and Facility: Forest Springs Water Company, Wayne Township, Schuylkill County, Pa. Application for groundwater withdrawal of up to 0.075 mgd (30-day average) from Borehole BH–1.

18. Project Sponsor and Facility: Forest Springs Water Company, Wayne Township, Schuylkill County, Pa. Modification to consumptive water use approval removing previous sources Spring 1 and Spring 2 and adding new source Borehole BH–1 (Docket No. 20010206).

19. Project Sponsor and Facility: Gaberseck Brothers (Odin Pond 2), Keating Township, Potter County, Pa. Application for surface water withdrawal of up to 0.249 mgd (peak day).

20. Project Sponsor and Facility: Houtzdale Municipal Authority (Beccaria Springs), Gulich Township, Clearfield County, Pa. Application for surface water withdrawal of up to 10.000 mgd (peak day).

21. Project Sponsor: Hydro Recovery-Antrim LP. Project Facility: Antrim Treatment Plant, Duncan Township, Tioga County, Pa. Modification to project features and to increase surface water withdrawal by an additional 1.152 mgd, for a total of 1.872 mgd (peak day) (Docket No. 20090902).

22. Project Sponsor and Facility: Keystone Clearwater Solutions, LLC (Lycoming Creek), Lewis Township, Lycoming County, Pa. Modification to increase surface water withdrawal by an additional 1.308 mgd, for a total of 2.600 mgd (peak day) (Docket No. 20110616).

23. Project Sponsor and Facility: Keystone Clearwater Solutions, LLC (Moshannon Creek), Snow Shoe Township, Centre County, Pa. Application for renewal of surface water withdrawal of up to 2.000 mgd (peak day) (Docket No. 20080946).

24. Project Sponsor and Facility: Keystone Clearwater Solutions, LLC (West Branch Susquehanna River), Goshen Township, Clearfield County, Pa. Application for renewal of surface water withdrawal of up to 2.160 mgd (peak day) (Docket No. 20080944).

25. Project Sponsor and Facility: Roaring Spring Water—Division of Roaring Spring Blank Book, Roaring Spring Borough, Blair County, Pa. Modification to increase consumptive water use by an additional 0.125 mgd, for a total of 0.255 mgd (peak day) (Docket No. 20120309).

26. Project Sponsor and Facility: Roaring Spring Water—Division of Roaring Spring Blank Book (Roaring Spring), Roaring Spring Borough, Blair County, Pa. Modification to increase surface water withdrawal by an additional 0.131 mgd, for a total of 0.302 mgd (peak day) (Docket No. 20120309).

27. Project Sponsor and Facility: Southwestern Energy Production Company (Middle Lake), New Milford Township, Susquehanna County, Pa. Application for surface water withdrawal of up to 0.720 mgd (peak day).

28. Project Sponsor and Facility: Talisman Energy USA Inc. (Susquehanna River), Sheshequin Township, Bradford County, Pa. Application for renewal of surface water withdrawal of up to 2.000 mgd (peak day) (Docket No. 20080909).

Authority: Pub. L. 91–575, 84 Stat. 1509 *et seq.,* 18 CFR parts 806–808.

Dated: July 23, 2012.

BILLING CODE 7040–01–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Generalized System of Preferences (GSP): Notice of Initiation of the 2012 Annual GSP Product and Country Practices Review; Deadlines for Filing Petitions

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of procedures for submission of petitions from the public.

SUMMARY: This notice announces that the Office of the United States Trade Representative (USTR) is prepared to receive petitions to modify the list of products that are eligible for duty-free treatment under the GSP program and to modify the GSP status of certain GSP beneficiary developing countries because of country practices. USTR is also prepared to receive petitions requesting waivers of competitive need limitations (CNLs).

FOR FURTHER INFORMATION CONTACT: Tameka Cooper, GSP Program, Office of the United States Trade Representative, 600 17th Street NW., Washington, DC 20508. The telephone number is (202) 395–6971; the fax number is (202) 395–9674, and the email address is *Tameka_Cooper@ustr.eop.gov.*

DATES: The GSP regulations (15 CFR part 2007) provide the timetable for conducting an annual review, unless otherwise specified by notice in the **Federal Register**. Notice is hereby given that, in order to be considered in the

2012 Annual GSP Review, all petitions to modify the list of articles eligible for duty-free treatment under GSP or to review the GSP status of any beneficiary developing country must be received by the GSP Subcommittee of the Trade Policy Staff Committee no later than 5:00 p.m. on October 5, 2012. Petitions requesting waivers of CNLs must be received by the GSP Subcommittee of the Trade Policy Staff Committee no later than 5:00 p.m. on November 21, 2012. Petitions submitted after the respective deadlines will not be considered for review. Decisions on which petitions are accepted for review, along with a schedule for any related public hearings and the opportunity for the public to provide comments will be announced at a later date.

SUPPLEMENTARY INFORMATION:

The 2012 Annual GSP Review

GSP Product Review Petitions. Interested parties, including foreign governments, may submit petitions to: (1) Designate additional articles as eligible for GSP benefits, including to designate articles as eligible for GSP benefits only if imported from countries designated as least-developed beneficiary developing countries, or only from countries designated as beneficiary sub-Saharan African countries under the African Growth and Opportunity Act (AGOA); (2) withdraw, suspend or limit the application of duty-free treatment accorded under the GSP with respect to any article; (3) waive the CNL for individual beneficiary developing countries with respect to specific GSP-eligible articles (these limits do not apply to least-developed beneficiary developing countries or AGOA beneficiary sub-Saharan African countries); and (4) otherwise modify GSP coverage.

As specified in 15 CFR 2007.1, all product petitions must include, *inter alia,* a detailed description of the product and the eight-digit subheading of the Harmonized Tariff Schedule of the United States (HTSUS) under which the product is classified.

As noted above, product petitions requesting CNL waivers for GSP-eligible articles imported from beneficiary developing countries that exceed the CNLs in 2012 must be received on or before the November 21, 2012, deadline described above. Before submitting petitions for CNL waivers, prospective petitioners may wish to review the year-to-date import trade data for products of interest. This data is available via the U.S. International Trade Commission's ''Dataweb'' database at *http://dataweb.usitc.gov/.*

Country Practices Review Petitions Any interested party may submit a petition to review the GSP eligibility of any beneficiary developing country with respect to any of the designation criteria listed in sections 502(b) or 502(c) of the Trade Act (19 U.S.C. 2462(b) and (c)). As noted above, such petitions are due no later than 5:00 p.m. on Friday, October 5, 2012.

Requirements for Submissions

All submissions for the GSP Annual Review must conform to the GSP regulations set forth at 15 CFR part 2007, except as modified below. These regulations are available on the USTR Web site at *http://www.ustr.gov/trade-topics/trade-development/preference-programs/generalized-system-preference-gsp/gsp-program-inf.* The GSP Guidebook also contains general instructions on how to submit a GSP petition. Any person or party making a submission is strongly advised to review the GSP regulations and the GSP Guidebook, available at the same link.

All submissions in response to this notice must be submitted electronically via *http://www.regulations.gov*, using docket number USTR–2012–0013. Hand-delivered submissions will not be accepted. Submissions must be submitted in English to the Chairman of the GSP Subcommittee of the Trade Policy Staff Committee by the applicable deadlines set forth in this notice. Submissions that do not provide the information required by sections 2007.0 and 2007.1 of the GSP regulations will not be accepted for review, except upon a detailed showing in the submission that the petitioner made a good faith effort to obtain the information required.

To make a submission using *http://www.regulations.gov*, enter docket number USTR–2012–0013 in the ''Search for'' field on the home page and click ''Search.'' The site will provide a search-results page listing all documents associated with this docket. Find a reference to this notice by selecting ''Notice'' under ''Document Type'' in the ''Filter Results by'' section on the left side of the screen and click on the link entitled ''Comment Now.'' The ''*http://www.regulations.gov''* Web site offers the option of providing comments by filling in a ''Type Comment'' field or by attaching a document using the ''Upload file(s)'' field. Given the detailed nature of the information sought by the GSP Subcommittee, the Subcommittee prefers that submissions be provided in an attached document. Submissions must include at the beginning of the submission, or on the first page (if an attachment), the following text (in bold and underlined): (1) ''2012 GSP Annual Review''; and (2) the eight-digit HTSUS subheading number in which the product is classified (for product petitions) or the name of the country (for country practice petitions). Furthermore, interested parties submitting petitions that request action with respect to specific products should also list at the beginning of the submission, or on the first page (if an attachment) the following information: (1) The requested action; and (2) if applicable, the beneficiary developing country. Submissions should not exceed 30 single-spaced, standard letter-size pages in 12-point type, including attachments. Any data attachments to the submission should be included in the same file as the submission itself, and not as separate files.

Each submitter will receive a submission tracking number upon completion of the submissions procedure at *http://www.regulations.gov.* The tracking number will be the submitter's confirmation that the submission was received into *http://www.regulations.gov.* The confirmation should be kept for the submitter's records. USTR is not able to provide technical assistance for the Web site. Documents not submitted in accordance with these instructions may not be considered in this review. If an interested party is unable to provide submissions as requested, please contact the GSP Program at USTR to arrange for an alternative method of transmission.

Business Confidential Petitions

An interested party requesting that information contained in a petition be treated as business confidential information must certify that such information is business confidential and would not customarily be released to the public by the submitter. Confidential business information must be clearly designated as such. The submission must be marked ''BUSINESS CONFIDENTIAL'' at the top and bottom of the cover page and each succeeding page, and the submission should indicate, via brackets, the specific information that is confidential. Additionally, ''Business Confidential'' must be included in the ''Type Comment'' field. Any submission containing business confidential information must be accompanied by a *separate,* non-confidential version of the confidential submission, indicating where confidential information has been redacted. The non-confidential version will be placed in the docket and open to public inspection.

Public Viewing of Review Submissions

Submissions in response to this notice, except for information granted ''business confidential'' status under 15 CFR 2003.6, will be available for public viewing pursuant to 15 CFR 2007.6 at *www.regulations.gov* upon completion of processing and no later than approximately two weeks after the relevant due date. Such submissions may be viewed by entering the docket number USTR–2012–0013 in the search field at: *www.regulations.gov*.

James Sanford,

Assistant U.S. Trade Representative for Small Business, Market Access & Industrial Competitiveness,Office of the U.S. Trade Representative.

BILLING CODE 3290–F2–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

[Dispute No. WTO/DS431]

WTO Dispute Settlement Proceeding Regarding China—Measures Related to the Exportation of Rare Earths, Tungsten and Molybdenum

AGENCY: Office of the United States Trade Representative.

ACTION: Notice; request for comments.

SUMMARY: The Office of the United States Trade Representative (''USTR'') is providing notice that the United States has requested the establishment of a dispute settlement panel under the *Marrakesh Agreement Establishing the World Trade Organization* (''WTO Agreement''). That request may be found at *www.wto.org* contained in a document designated as WT/DS431/6. USTR invites written comments from the public concerning the issues raised in this dispute.

DATES: Although USTR will accept any comments received during the course of the dispute settlement proceedings, comments should be submitted on or before August 27, 2012, to be assured of timely consideration by USTR.

ADDRESSES: Public comments should be submitted electronically to *www.regulations.gov,* docket number USTR–2012–0005. If you are unable to provide submissions by *www.regulations.gov,* please contact Sandy McKinzy at (202) 395–9483 to arrange for an alternative method of transmission.

If (as explained below) the comment contains confidential information, then the comment should be submitted by fax only to Sandy McKinzy at (202) 395–3640.

FOR FURTHER INFORMATION CONTACT: Jared Wessel, Assistant General Counsel, or Ben Kostrzewa, Assistant General Counsel, Office of the United States Trade Representative, 600 17th Street NW., Washington, DC 20508, (202) 395–3150.

SUPPLEMENTARY INFORMATION: Section 127(b) of the Uruguay Round Agreements Act (''URAA'') (19 U.S.C. 3537(b)(1)) requires that notice and opportunity for comment be provided after the United States submits or receives a request for the establishment of a WTO dispute settlement panel. Consistent with this obligation, USTR is providing notice that a dispute settlement panel has been requested pursuant to the WTO *Understanding on Rules and Procedures Governing the Settlement of Disputes* (''DSU''). The panel will hold its meetings in Geneva, Switzerland.

Major Issues Raised by the United States

On June 27, 2012, the United States requested the establishment of a panel regarding China's restraints on the export from China of various forms of rare earths, tungsten and molybdenum (collectively, the ''materials''). These export restraints include export duties on the materials; quantitative restrictions such as quotas on the export of the materials; and additional requirements that impose restrictions on the trading rights of enterprises seeking to export various forms of rare earths and molybdenum, such as prior export performance and minimum registered capital requirements. In addition, China administers these export quotas on the materials in a manner that is not uniform, impartial, or reasonable, such as by the use of criteria in the application and allocation process that lack definition or do not contain sufficient guidelines or standards in how they should be applied.

Forms of rare earths include, but are not limited to, items falling under the following eight-digit HS numbers identified in the *Announcement No. 27 Issuing the 2012 Tariff Implementation Program* (State Council Customs Tariff Commission, shuiweihui, No. 27, issued December 9, 2011, effective January 1, 2012) (hereinafter, the ''*2012 Tariff Implementation Program''*): 25309020, 26122000, 28053011, 28053012, 28053013, 28053014, 28053015, 28053016, 28053017, 28053019, 28053021, 28053029, 28461010, 28461020, 28461030, 28461090, 28469011, 28469012, 28469013, 28469014, 28469015, 28469016, 28469017, 28469019, 28469021, 28469022, 28469023, 28469024, 28469025, 28469026, 28469028, 28469029, 28469031, 28469032, 28469033, 28469034, 28469035, 28469036, 28469039, 28469041, 28469042, 28469043, 28469044, 28469045, 28469046, 28469048, 28469049, 28469091, 28469092, 28469093, 28469094, 28469095, 28469096, 28469099, 72029911, 72029919, 72029991 and 72029999. Forms of rare earths also include, but are not limited to, items falling under the following 10-digit Chinese Customs Commodity Codes (''CCC Codes''), as identified in the *Notice on Issuing the ''2012 Export Licensing Management Commodities List''* (Ministry of Commerce and General Administration of Customs Notice No. 98 (December 30, 2011)), (hereinafter the ''*2012 Export Licensing Management Commodities List''*): 2530902010, 2530902090, 2612200000, 2805301100, 2805301200, 2805301300, 2805301400, 2805301510, 2805301590, 2805301600, 2805301700, 2805301913, 2805301914, 2805301915, 2805301990, 2805302110, 2805302190, 2805302910, 2805302990, 2846101000, 2846102000, 2846103000, 2846109010, 2846109090, 2846901100, 2846901200, 2846901300, 2846901400, 2846901500, 2846901600, 2846901700, 2846901920, 2846901930, 2846901940, 2846901970, 2846901980, 2846901991, 2846901992, 2846901999, 2846902100, 2846902200, 2846902300, 2846902400, 2846902500, 2846902600, 2846902810, 2846902890, 2846902900, 2846903100, 2846903200, 2846903300, 2846903400, 2846903500, 2846903600, 2846903900, 2846904100, 2846904200, 2846904300, 2846904400, 2846904500, 2846904600, 2846904810, 2846904890, 2846904900, 2846909100, 2846909200, 2846909300, 2846909400, 2846909500, 2846909600, 2846909910, 2846909990, 7202991100, 7202991200, 7202999191 and 7202999199.

Forms of tungsten include, but are not limited to, items falling under the following eight-digit HS numbers, as identified in the *2012 Tariff Implementation Program:* 26209910, 28259011, 28259012, 28259019, 28418010, 28418020, 28418030, 28418040, 28418090, 28499020, 72028010, 72028020, 81011000, 81019400 and 81019700. Forms of tungsten also include, but are not limited to, items falling under the following 10-digit CCC Codes, as identified in the *2012 Export Licensing Management Commodities List:* 2611000000, 2620991000, 2825901100, 2825901200, 2825901910, 2841801000, 2841802000, 2841803000, 2841804000, 2849902000, 8101100010, 8101100090, 8101940000 and 8101970000.

Forms of molybdenum include, but are not limited to, items falling under the following eight-digit HS numbers, as identified in the *2012 Tariff Implementation Program:* 26131000, 26139000, 28257000, 28417010, 28417090, 72027000, 81021000, 81029400 and 81029700. Forms of molybdenum also include, but are not limited to, items falling under the following 10-digit CCC Codes, as identified in the *2012 Export Licensing Management Commodities List:* 2613100000, 2613900000, 2825700000, 2841701000, 2841709000, 7202700000, 8102100000, 8102940000 and 8102970000.

USTR believes that these export restraints and China's administration of and manner of imposing these export restraints are inconsistent with China's obligations under Articles X and XI of the *General Agreement on Tariffs and Trade 1994;* paragraphs 2(A)2, 5.1 and 11.3 of Part I of the *Protocol on the Accession of the People's Republic of China* (''Accession Protocol''); and the provisions of paragraph 1.2 of Part I of the Accession Protocol (which incorporates commitments in paragraphs 83, 84, 162 and 165 of the *Report of the Working Party on the Accession of China*).

Public Comment: Requirements for Submissions

Interested persons are invited to submit written comments concerning the issues raised in this dispute. Persons may submit public comments electronically to *www.regulations.gov* docket number USTR–2012–0005. If you are unable to provide submissions by *www.regulations.gov,* please contact Sandy McKinzy at (202) 395–9483 to arrange for an alternative method of transmission.

To submit comments via *www.regulations.gov,* enter docket number USTR–2012–0005 on the home page and click ''search''. The site will provide a search-results page listing all documents associated with this docket. Find a reference to this notice by selecting ''Notice'' under ''Document Type'' on the left side of the search-results page, and click on the link entitled ''Submit a Comment.'' (For further information on using the *www.regulations.gov* Web site, please consult the resources provided on the Web site by clicking on ''How to Use This Site'' on the left side of the home page.)

The *www.regulations.gov* site provides the option of providing comments by filling in a ''Type Comments'' field, or by attaching a document using an ''upload file'' field. It is expected that most comments will be provided in an attached document. If a document is attached, it is sufficient to type ''See attached'' in the ''Type Comments'' field.

A person requesting that information contained in a comment submitted by that person be treated as confidential business information must certify that such information is business confidential and would not customarily be released to the public by the submitter. Confidential business information must be clearly designated as such and the submission must be marked ''BUSINESS CONFIDENTIAL'' at the top and bottom of the cover page and each succeeding page. Any comment containing business confidential information must be submitted by fax to Sandy McKinzy at (202) 395–3640. A non-confidential summary of the confidential information must be submitted to *www.regulations.gov.* The non-confidential summary will be placed in the docket and open to public inspection.

Information or advice contained in a comment submitted, other than business confidential information, may be determined by USTR to be confidential in accordance with section 135(g)(2) of the Trade Act of 1974 (19 U.S.C. 2155(g)(2)). If the submitter believes that information or advice may qualify as such, the submitter B

(1) Must clearly so designate the information or advice;

(2) Must clearly mark the material as ''SUBMITTED IN CONFIDENCE'' at the top and bottom of the cover page and each succeeding page; and

(3) Must provide a non-confidential summary of the information or advice. Any comment containing confidential information must be submitted by fax. A non-confidential summary of the confidential information must be submitted to *www.regulations.gov.* The non-confidential summary will be placed in the docket and open to public inspection.

Pursuant to section 127(e) of the Uruguay Round Agreements Act (19 U.S.C. 3537(e)), USTR will maintain a docket on this dispute settlement proceeding accessible to the public at *www.regulations.gov,* docket number USTR–2012–0005. The public file will include non-confidential comments received by USTR from the public with respect to the dispute. If a dispute settlement panel is convened or in the event of an appeal from such a panel, the U.S. submissions, any non-confidential submissions, or non-confidential summaries of submissions, received from other participants in the dispute, will be made available to the public on USTR's Web site at *www.ustr.gov,* and the report of the panel, and, if applicable, the report of the Appellate Body, will be available on the Web site of the World Trade Organization, *www.wto.org.* Comments open to public inspection may be viewed on the *www.regulations.gov* Web site.

Bradford L. Ward,

Assistant United States Trade Representative for Monitoring and Enforcement.

BILLING CODE 3290–F2–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Commercial Space Transportation Advisory Committee—Public Teleconference

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Commercial Space Transportation Advisory Committee Teleconference.

SUMMARY: Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C. App. 2), notice is hereby given of three teleconferences of the Systems Working Group of the Commercial Space Transportation Advisory Committee (COMSTAC). The teleconferences will take place on: Tuesday August 14, 2012, Tuesday September 18, 2012, and Tuesday October 23, 2012. All teleconferences will begin at 1:00 p.m. Eastern Daylight Time and will last approximately one hour. Individuals who plan to participate should contact Susan Lender, Designated Federal Officer (DFO), (the Contact Person listed below) by phone or email for the teleconference call in number.

The purpose of these three teleconferences is to assist the FAA early in its development of regulations to protect occupants of commercial suborbital and orbital spacecraft. Although the FAA has not yet targeted a date for proposing regulations to protect the health and safety of crew and space flight participants, the FAA believes that the development of sound and appropriate regulations for human space flight can only be achieved with a deliberate, multi-year effort. Moreover, the FAA believes that early industry input into this regulatory effort before any formal proposal by the FAA is critical.

Thus, the FAA would like to engage with COMSTAC on a periodic basis,

approximately once per month, on specific topics. The topics for the first three teleconferences are as follows:

(1) *What Level of Safety Should FAA Target*? We will discuss whether the FAA should regulate to one or multiple levels of space flight safety, what level or levels of safety the FAA should attempt to achieve, and whether the level or levels of safety should be quantified. We will also discuss what level of care, short of a fatality, the FAA should be concerned with.

(2) *What Should FAA Oversight Look Like*? Aircraft-like certification is not feasible at this time, due to current technology and the FAA's statutory mandate only to pursue minimal regulations that take into consideration the evolving standards of safety in the commercial space flight industry. 51 U.S.C. 50905(c)(3). We will discuss what a licensing process should look like in terms of FAA oversight, whether such oversight could or should be called a ''certification,'' and for how long informed consent should remain in effect.

(3) *What Types of Requirements and Associated Guidance Material Should FAA Develop*? In general, the FAA favors space transportation regulations that are performance or process based. We will discuss the level of empirical or analytical data necessary to justify any performance-based human space flight regulation, the possible use of Advisory Circulars to add clarity to regulations, and what place government and industry standards should have in FAA licensing.

Interested members of the public may submit relevant written statements for the COMSTAC working group members to consider under the advisory process. Statements may concern the issues and agenda items mentioned above or additional issues that may be relevant for the U.S. commercial space transportation industry. Interested parties wishing to submit written statements should contact Susan Lender, DFO, (the Contact Person listed below) in writing (mail or email) by August 7, 2012, for the August 14 teleconference, September 11, 2012, for the September 18 teleconference, and October 16, 2012, for the October 23 teleconference. This way the information can be made available to COMSTAC members for their review and consideration before each teleconference. Written statements should be supplied in the following formats: one hard copy with original signature or one electronic copy via email. The FAA may schedule up to 10 more teleconferences in the coming months to allow the U.S. commercial space transportation industry to share views with the FAA on a number of specific topics related to commercial human space flight safety.

An agenda will be posted on the FAA Web site at *http://www.faa.gov/go/ast.*

Individuals who plan to participate and need special assistance should inform the Contact Person listed below in advance of the meeting.

FOR FURTHER INFORMATION CONTACT: Susan Lender (AST–5), Office of Commercial Space Transportation (AST), 800 Independence Avenue SW., Room 331, Washington, DC 20591, telephone (202) 267–8029; Email *susan.lender@faa.gov*. Complete information regarding COMSTAC is available on the FAA Web site at: *http://www.faa.gov/about/office_org/headquarters_offices/ast/advisory_committee/*.

Issued in Washington, DC, July 23, 2012.

George C. Nield,

Associate Administrator for Commercial Space Transportation.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2012–0106]

Qualification of Drivers; Exemption Applications; Vision

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of final disposition.

SUMMARY: FMCSA announces its decision to exempt 12 individuals from the vision requirement in the Federal Motor Carrier Safety Regulations (FMCSRs). They are unable to meet the vision requirement in one eye for various reasons. The exemptions will enable these individuals to operate commercial motor vehicles (CMVs) in interstate commerce without meeting the prescribed vision requirement in one eye. The Agency has concluded that granting these exemptions will provide a level of safety that is equivalent to or greater than the level of safety maintained without the exemptions for these CMV drivers.

DATES: The exemptions are effective July 30, 2012. The exemptions expire on July 30, 2014.

FOR FURTHER INFORMATION CONTACT: Elaine M. Papp, Chief, Medical Programs Division, (202)–366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–224, Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m. Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Electronic Access

You may see all the comments online through the Federal Document Management System (FDMS) at *http://www.regulations.gov.*

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* at any time or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The FDMS is available 24 hours each day, 365 days each year. If you want acknowledgement that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: Anyone may search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or of the person signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's Privacy Act Statement for the FDMS published in the **Federal Register** on January 17, 2008 (73 FR 3316), or you may visit *http://edocket.access.gpo.gov/2008/pdf/E8-785.pdf.*

Background

On June 4, 2012, FMCSA published a notice of receipt of exemption applications from certain individuals, and requested comments from the public (77 FR 33017). That notice listed 12 applicants' case histories. The 12 individuals applied for exemptions from the vision requirement in 49 CFR 391.41(b)(10), for drivers who operate CMVs in interstate commerce.

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption for a 2-year period if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' The statute also allows the Agency to renew exemptions at the end of the 2-year period. Accordingly, FMCSA has evaluated the 12 applications on their merits and made a determination to grant exemptions to each of them.

Vision and Driving Experience of the Applicants

The vision requirement in the FMCSRs provides:

A person is physically qualified to drive a commercial motor vehicle if that person has distant visual acuity of at least 20/40 (Snellen) in each eye without corrective lenses or visual acuity separately corrected to 20/40 (Snellen) or better with corrective lenses, distant binocular acuity of a least 20/40 (Snellen) in both eyes with or without corrective lenses, field of vision of at least 70° in the horizontal meridian in each eye, and the ability to recognize the colors of traffic signals and devices showing requirement red, green, and amber (49 CFR 391.41(b)(10)).

FMCSA recognizes that some drivers do not meet the vision requirement but have adapted their driving to accommodate their vision limitation and demonstrated their ability to drive safely. The 12 exemption applicants listed in this notice are in this category. They are unable to meet the vision requirement in one eye for various reasons, including complete loss of vision, corneal scarring, amblyopia, retinal detachment, optic nerve atrophy, presbyopia, enucleation and retinal damage. In most cases, their eye conditions were not recently developed. Nine of the applicants were either born with their vision impairments or have had them since childhood. The individuals that sustained their vision conditions as adults have had it for a period of 25 to 39 years.

Although each applicant has one eye which does not meet the vision requirement in 49 CFR 391.41(b)(10), each has at least 20/40 corrected vision in the other eye, and in a doctor's opinion, has sufficient vision to perform all the tasks necessary to operate a CMV. Doctors' opinions are supported by the applicants' possession of valid commercial driver's licenses (CDLs) or non-CDLs to operate CMVs. Before issuing CDLs, States subject drivers to knowledge and skills tests designed to evaluate their qualifications to operate a CMV.

All of these applicants satisfied the testing requirements for their State of residence. By meeting State licensing requirements, the applicants demonstrated their ability to operate a CMV, with their limited vision, to the satisfaction of the State.

While possessing a valid CDL or non-CDL, these 12 drivers have been authorized to drive a CMV in intrastate commerce, even though their vision disqualified them from driving in interstate commerce. They have driven CMVs with their limited vision for careers ranging from 5 to 38 years. In the past 3 years, two of the drivers were involved in crashes, and one was convicted of a moving violation in a CMV.

The qualifications, experience, and medical condition of each applicant were stated and discussed in detail in the June 4, 2012 notice (77 FR 33017).

Basis for Exemption Determination

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the vision requirement in 49 CFR 391.41(b)(10) if the exemption is likely to achieve an equivalent or greater level of safety than would be achieved without the exemption. Without the exemption, applicants will continue to be restricted to intrastate driving. With the exemption, applicants can drive in interstate commerce. Thus, our analysis focuses on whether an equal or greater level of safety is likely to be achieved by permitting each of these drivers to drive in interstate commerce as opposed to restricting him or her to driving in intrastate commerce.

To evaluate the effect of these exemptions on safety, FMCSA considered the medical reports about the applicants' vision as well as their driving records and experience with the vision deficiency.

To qualify for an exemption from the vision requirement, FMCSA requires a person to present verifiable evidence that he/she has driven a commercial vehicle safely with the vision deficiency for the past 3 years. Recent driving performance is especially important in evaluating future safety, according to several research studies designed to correlate past and future driving performance. Results of these studies support the principle that the best predictor of future performance by a driver is his/her past record of crashes and traffic violations. Copies of the studies may be found at Docket Number FMCSA–1998–3637.

We believe we can properly apply the principle to monocular drivers, because data from the Federal Highway Administration's (FHWA) former waiver study program clearly demonstrate the driving performance of experienced monocular drivers in the program is better than that of all CMV drivers collectively (See 61 FR 13338, 13345, March 26, 1996). The fact that experienced monocular drivers demonstrated safe driving records in the waiver program supports a conclusion that other monocular drivers, meeting the same qualifying conditions as those required by the waiver program, are also likely to have adapted to their vision deficiency and will continue to operate safely.

The first major research correlating past and future performance was done in England by Greenwood and Yule in 1920. Subsequent studies, building on that model, concluded that crash rates for the same individual exposed to certain risks for two different time periods vary only slightly (See Bates and Neyman, University of California Publications in Statistics, April 1952). Other studies demonstrated theories of predicting crash proneness from crash history coupled with other factors. These factors—such as age, sex, geographic location, mileage driven and conviction history—are used every day by insurance companies and motor vehicle bureaus to predict the probability of an individual experiencing future crashes (See Weber, Donald C., ''Accident Rate Potential: An Application of Multiple Regression Analysis of a Poisson Process,'' Journal of American Statistical Association, June 1971). A 1964 California Driver Record Study prepared by the California Department of Motor Vehicles concluded that the best overall crash predictor for both concurrent and nonconcurrent events is the number of single convictions. This study used 3 consecutive years of data, comparing the experiences of drivers in the first 2 years with their experiences in the final year.

Applying principles from these studies to the past 3-year record of the 12 applicants, two of the drivers were involved in crashes, and one was convicted of a moving violation in a CMV. All the applicants achieved a record of safety while driving with their vision impairment, demonstrating the likelihood that they have adapted their driving skills to accommodate their condition. As the applicants' ample driving histories with their vision deficiencies are good predictors of future performance, FMCSA concludes their ability to drive safely can be projected into the future.

We believe that the applicants' intrastate driving experience and history provide an adequate basis for predicting their ability to drive safely in interstate commerce. Intrastate driving, like interstate operations, involves substantial driving on highways on the interstate system and on other roads built to interstate standards. Moreover, driving in congested urban areas exposes the driver to more pedestrian and vehicular traffic than exists on interstate highways. Faster reaction to traffic and traffic signals is generally required because distances between them are more compact. These conditions tax visual capacity and

driver response just as intensely as interstate driving conditions. The veteran drivers in this proceeding have operated CMVs safely under those conditions for at least 3 years, most for much longer. Their experience and driving records lead us to believe that each applicant is capable of operating in interstate commerce as safely as he/she has been performing in intrastate commerce. Consequently, FMCSA finds that exempting these applicants from the vision requirement in 49 CFR 391.41(b)(10) is likely to achieve a level of safety equal to that existing without the exemption. For this reason, the Agency is granting the exemptions for the 2-year period allowed by 49 U.S.C. 31136(e) and 31315 to the 12 applicants listed in the notice of June 4, 2012 (77 FR 33017).

We recognize that the vision of an applicant may change and affect his/her ability to operate a CMV as safely as in the past. As a condition of the exemption, therefore, FMCSA will impose requirements on the 12 individuals consistent with the grandfathering provisions applied to drivers who participated in the Agency's vision waiver program.

Those requirements are found at 49 CFR 391.64(b) and include the following: (1) That each individual be physically examined every year (a) by an ophthalmologist or optometrist who attests that the vision in the better eye continues to meet the requirement in 49 CFR 391.41(b)(10) and (b) by a medical examiner who attests that the individual is otherwise physically qualified under 49 CFR 391.41; (2) that each individual provide a copy of the ophthalmologist's or optometrist's report to the medical examiner at the time of the annual medical examination; and (3) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file, or keep a copy in his/her driver's qualification file if he/she is self-employed. The driver must have a copy of the certification when driving, for presentation to a duly authorized Federal, State, or local enforcement official.

Discussion of Comments

FMCSA received no comments in this proceeding.

Conclusion

Based upon its evaluation of the 12 exemption applications, FMCSA exempts Robert F. Bennett (NJ), Dale W. Coblentz (MT), Michael L. Dean (MI), Damon G. Gallardo (CA), Marc D. Groszkrueger (IA), Daniel L. Grover (KS), James E. Modaffari (OR), Gerardus C. Molenaar (PA), James J. Narkewich (MA), Philip N. Polcastro (NY), Gregory A. Reinert (MN) and Scott J. Schlenker (WA) from the vision requirement in 49 CFR 391.41(b)(10), subject to the requirements cited above (49 CFR 391.64(b)).

In accordance with 49 U.S.C. 31136(e) and 31315, each exemption will be valid for 2 years unless revoked earlier by FMCSA. The exemption will be revoked if: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136 and 31315.

If the exemption is still effective at the end of the 2-year period, the person may apply to FMCSA for a renewal under procedures in effect at that time.

Issued on: July 18, 2012.

Larry W. Minor,

Associate Administrator for Policy.

Information Collection Activities (Depreciation Studies)

ACTION: 60-day notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995, 44 U.S.C. 3501–3519 (PRA), the Surface Transportation Board (Board) gives notice of its intent to request from the Office of Management and Budget (OMB) the information collection—Rail Depreciation Studies—further described below.

Comments are requested concerning (1) whether this collection of information is necessary for the proper performance of the functions of the Board, including whether the collection has practical utility; (2) the accuracy of the Board's burden estimates; (3) ways to enhance the quality, utility, and clarity of the information collected; and (4) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology, when appropriate. Submitted comments will be included and/or summarized in the Board's request for OMB approval.

DATES: Written comments are due on September 28, 2012.

ADDRESSES: Direct all comments to Marilyn Levitt, Surface Transportation Board, Suite 1260, 395 E Street SW., Washington, DC 20423–0001, or to *levittm@stb.dot.gov.* Comments should be identified as ''Paperwork Reduction Act Comments,'' and should refer to the title of the collection commented upon.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection(s) contact Paul Aguiar at (202) 245–0323 or *aguiarp@stb.dot.gov.* [Federal Information Relay Service (FIRS) for the hearing impaired: (800) 877–8339.]

Subjects: In this notice the Board is requesting comments on the following information collection:

Title: Rail Depreciation Studies.

OMB Control Number: 2140–XXXX.

Form Number: None.

Type of Review: Collection in existence without a Control Number.

Respondents: Class I railroads.

Number of Respondents: 7.

Estimated Time per Response: Between 500 and 540 hours annually, depending on whether the rail-carrier respondent has significant assistance from outside consultants, resulting in an average of 515 hours per response.

Frequency of Response: Every 3 years for equipment; every 6 years for other depreciable property.

Total Annual Hour Burden: 3,605 hours (515 hours × 7 Class I railroads).

Total Annual ''Non-Hour Burden'' Cost: Between $8,340 and $30,000 annually, depending on whether the rail-carrier respondent has significant assistance from outside consultants, resulting in an annual average of $20,500 and a cumulative total for all 7 Class I railroads of $143,500.

Needs and Uses: Under 49 U.S.C. 11145, the Board is required to identify those classes of property for which rail carriers may include depreciation charges under operating expenses and the Board must also prescribe a rate of depreciation that may be charged to those classes of property. Pursuant to the Board's authority under § 11145, Class I (large) rail carriers are required to submit to the Board Depreciation Studies. Information in these studies is not available from any other source. The Board uses the information in these studies to prescribe depreciation rates. These depreciation rate prescriptions state the period for which the depreciation rates therein are applicable. Class I railroads apply the prescribed depreciation rates to their investment base to determine monthly and annual depreciation expense. This expense is included in the railroads' operating expenses, which are reported

in their R–1 reports (OMB Control Number 2140–0009). Operating expenses are used to develop operating costs for application in various proceedings before the Board, such as in rate reasonableness cases and in the determination of railroad revenue adequacy.

SUPPLEMENTARY INFORMATION: Under the PRA, a Federal agency conducting or sponsoring a collection of information must display a currently valid OMB control number. A collection of information, which is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c), includes agency requirements that persons submit reports, keep records, or provide information to the agency, third parties, or the public. Under § 3506(c)(2)(A) of the PRA, Federal agencies are required, prior to submitting a collection to OMB for approval, to provide a 60-day notice and comment period through publication in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information.

Dated: July 24, 2012.

Jeffrey Herzig,

Clearance Clerk.

BILLING CODE 4915–01–P

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

July 25, 2012.

The Department of the Treasury will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, Public Law 104–13, on or after the date of publication of this notice.

DATES: Comments should be received on or before August 29, 2012 to be assured of consideration.

ADDRESSES: Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestion for reducing the burden, to (1) Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Treasury, New Executive Office Building, Room 10235, Washington, DC 20503, or email at *OIRA_Submission@OMB.EOP.GOV* and (2) Treasury PRA Clearance Officer, 1750 Pennsylvania Ave. NW., Suite 8140, Washington, DC 20220, or email at *PRA@treasury.gov.*

FOR FURTHER INFORMATION CONTACT: Copies of the submission(s) may be obtained by calling (202) 927–5331, email at *PRA@treasury.gov,* or the entire information collection request maybe found at *www.reginfo.gov.*

Internal Revenue Service (IRS)

OMB Number: 1545–0132.

Type of Review: Extension without change of a currently approved collection.

Title: Amended U.S. Corporation Income Tax Return.

Form: 1120–X.

Abstract: Domestic corporations use Form 1120X to correct a previously filed Form 1120 or 1120A. The data is used to determine if the correct tax liability has been reported.

Affected Public: Private Sector: Business or other for-profits.

Estimated Total Burden Hours: 300,582.

OMB Number: 1545–0140.

Type of Review: Extension without change of a currently approved collection.

Title: Form 2210, Underpayment of Estimated Tax by Individuals, Estate, and Trusts; Form 2210–F, Underpayment of Estimated Tax by Farmers and Fishermen.

Form: 2210, 2210–F.

Abstract: Internal Revenue Code section 6654 imposes a penalty for failure to pay estimated tax. These forms are used by taxpayers to determine whether they are subject to the penalty and to compute the penalty if it applies. The Service uses this information to determine whether the taxpayer is subject to the penalty, and to verify the penalty amount.

Affected Public: Private Sector: Business or other for-profits.

Estimated Total Burden Hours: 2,405,663.

OMB Number: 1545–0820.

Type of Review: Extension without change of a currently approved collection.

Title: REG–122917–02 (Final) Statutory Options.

Abstract: The affected public includes corporations that transfer stock to employees after 1979 pursuant to the exercise of a statutory stock option. The corporation must furnish the employee receiving the stock with a written statement describing the transfer. The statement will assist the employee in filing their tax return.

Affected Public: Private Sector: Business or other for-profits.

Estimated Total Burden Hours: 16,650.

OMB Number: 1545–1086.

Type of Review: Extension without change of a currently approved collection.

Title: Excise Tax on Greenmail.

Form: 8725.

Abstract: Form 8725 is used by persons who receive ''greenmail'' to compute and pay the excise tax on greenmail imposed under section 5881. IRS uses the information to verify that the correct amount of tax has been reported.

Affected Public: Private Sector: Business or other for-profits.

Estimated Total Burden Hours: 92.

OMB Number: 1545–1225.

Type of Review: Extension without change of a currently approved collection.

Title: Notice of Plan Merger or Consolidation, Spinoff, or Transfer of Plan Assets or Liabilities; Notice of Qualified Separate Lines of Business.

Form: 5310–A.

Abstract: Plan administrators are required to notify IRS of any plan mergers, consolidations, spinoffs, or transfers of plan assets or liabilities to another plan. Employers are required to notify IRS of separate lines of business for their deferred compensation plans. Form 5310–A is used to make these notifications.

Affected Public: Private Sector: Business or other for-profits.

Estimated Total Burden Hours: 158,800.

OMB Number: 1545–1227.

Type of Review: Extension without change of a currently approved collection.

Title: FI–104–90—Final Tax Treatment of Salvage and Reinsurance (TD 8390).

Abstract: The regulation provides a disclosure requirement for an insurance company that increases losses shown on its annual statement by the amount of estimated salvage recoverable taken into account.

Affected Public: Private Sector: Business or other for-profits.

Estimated Total Burden Hours: 5,000.

OMB Number: 1545–1241.

Type of Review: Extension without change of a currently approved collection.

Title: PS–92–90 (TD 8395) Special Valuation Rules.

Abstract: Section 2701 of the Internal Revenue Code allows various elections by family members who make gifts of common stock or partnership interests and retain senior interest. The elections affect the value of the gifted interests and the retained interests. This document contains final regulations relating to chapter 14 of the Internal

Revenue Code as enacted in the Omnibus Budget Reconciliation Act of 1990, Public Law 101–508, 104 Stat. 1388. These regulations provide special valuation rules for purposes of Federal estate and gift taxes imposed under chapter 1 and 12 of the Code. In addition these regulations provide rules involving lapsing rights and other transactions that are treated as completed transfers under chapter 14.

Affected Public: Individuals or Households.

Estimated Total Burden Hours: 496.

OMB Number: 1545–1380.

Type of Review: Extension without change of a currently approved collection.

Title: IA–17–90 (TD 8571) Reporting Requirements for Recipients of Points Paid on Residential Mortgages.

Abstract: To encourage compliance with the tax laws relating to the mortgage interest deduction, the regulations require the reporting on Form 1098 of points paid on residential mortgage. Only businesses that receive mortgage interest in the course of a trade or business are affected by this reporting requirement.

Affected Public: Private Sector: Business or other for-profits.

Estimated Total Burden Hours: 283,056.

OMB Number: 1545–1434.

Type of Review: Extension without change of a currently approved collection.

Title: CO–26–96 (TD 8825) Regulations Under Section 382 of the Internal Revenue Code of 1986; Application of Section 382 in Short Taxable Years and With Respect to Controlled Groups.

Abstract: Section 382 limits the amount of income that can be offset by loss carryovers after an ownership change. These regulations provide rules for applying section 382 in the case of short taxable years and with respect to controlled groups.

Affected Public: Private Sector: Business or other for-profits.

Estimated Total Burden Hours: 875.

OMB Number: 1545–1516.

Type of Review: Revision of a currently approved collection.

Title: Entity Classification Election.

Form: 8832.

Abstract: An eligible entity that chooses not to be classified under the default rules or that wishes to change its current classification must file Form 8832 to elect a classification.

Affected Public: Private Sector: Business or other for-profits.

Estimated Total Burden Hours: 35,900.

OMB Number: 1545–1536.

Type of Review: Extension without change of a currently approved collection.

Title: REG–209823–96 (TD 8791)—Guidance Regarding Charitable Remainder Trusts and Special Valuation Rules for Transfer of Interests in Trusts.

Abstract: The recordkeeping requirement in the regulation provides taxpayers with an alternative method for complying with Congressional intent regarding charitable remainder trusts. The recordkeeping alternative may be less burdensome for taxpayers.

Affected Public: Private Sector: Business or other for-profits.

Estimated Total Burden Hours: 75.

OMB Number: 1545–1822.

Type of Review: Extension without change of a currently approved collection.

Title: Revenue Procedure 2003–11, Offshore Voluntary Compliance Initiative.

Abstract: Revenue Procedure 2003–11 describes the Offshore Voluntary Compliance Initiative, which is directed at taxpayers that have under-reported their tax liability through financial arrangements outside the United States that rely on the use of credit, debit, or charge cards (offshore credit cards) or foreign banks, financial institutions, corporations, partnership, trusts, or other entities (offshore financial arrangements). Taxpayers that participate in the initiative and provide the information and material that their participation requires can avoid certain penalties.

Affected Public: Individuals or Households.

Estimated Total Burden Hours: 100,000.

OMB Number: 1545–1952.

Type of Review: Extension without change of a currently approved collection.

Title: Revenue Procedure 2005–50—Automatic Consent for Eligible Educational Institution to Change Reporting Methods.

Abstract: This revenue procedure prescribes how an eligible educational institution may obtain automatic consent from the Service to change its method of reporting under section 6050S of the Code and the Income Tax Regulations.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Total Burden Hours: 300.

OMB Number: 1545–1965.

Type of Review: Extension without change of a currently approved collection.

Title: REG–133446–03 (TD 9360)—Guidance on Passive Foreign Company (PFIC) Purging Elections.

Abstract: The IRS needs the information to substantiate the taxpayer's computation of the taxpayer's share of the PFIC's post-1986 earning and profits.

Affected Public: Individuals and Households.

Estimated Total Burden Hours: 250.

OMB Number: 1545–1979.

Type of Review: Extension without change of a currently approved collection.

Title: Energy Efficient New Home Credit.

Form: 8908.

Abstract: Contractors will use Form 8908 to claim the new energy efficient home credit for homes substantially completed after August 8, 2005, and sold for use as personal residences after January 1, 2006.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Total Burden Hours: 512,820.

OMB Number: 1545–2126.

Type of Review: Extension without change of a currently approved collection.

Title: Credit for Employer Differential Wage Payments.

Form: 8932.

Abstract: Qualified employers will file Form 8932 to claim the credit for qualified differential wage payments paid to qualified employees after June 17, 2008, and before January 1, 2010.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Total Burden Hours: 62,456.

OMB Number: 1545–2127.

Type of Review: Extension without change of a currently approved collection.

Title: Disqualified Corporate Interest Expense Disallowed Under Section 163(j) and Related Information.

Form: 8926.

Abstract: Pursuant to Congressional direction to determine whether the earnings stripping limitation rule of Code Section 163(j) was effective in curbing the erosion of the U.S. tax base, the Treasury created Form 8926, Disqualified Corporate Interest Expense Disallowed Under Section 163(j) and Related Information.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Total Burden Hours: 7,560,000.

OMB Number: 1545–2226.

Type of Review: Extension without change of a currently approved collection.

Title: Work Opportunity Credit for Qualified Tax-Exempt Organizations Hiring Qualified Veterans.

Form: 5884–C.

Abstract: Form 5884–C was developed as a result of VOW to Hire Heroes Act of 2011, Public Law 112–56. Section 261 of Public Law 112–56 expanded the Work Opportunity Credit to tax-exempt organizations that hire unemployed veterans. The tax credit is a reduction in payroll taxes paid by the tax-exempt organization. Form 5884–C allows a tax-exempt organization a way to claim the credit and provides the IRS the information to process the tax credit.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Total Burden Hours: 397,683.

Dawn D. Wolfgang,

Treasury PRA Clearance Officer.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

July 25, 2012.

The Department of the Treasury will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, Public Law 104–13, on or after the date of publication of this notice.

DATES: Comments should be received on or before August 29, 2012 to be assured of consideration.

ADDRESSES: Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestion for reducing the burden to the (1) Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Treasury, New Executive Office Building, Room 10235, Washington, DC 20503, or email at *OIRA_Submission@OMB.EOP.GOV* and the (2) Treasury PRA Clearance Officer, 1750 Pennsylvania Ave. NW., Suite 8140, Washington, DC 20220, or email at *PRA@treasury.gov*.

FOR FURTHER INFORMATION CONTACT: Copies of the submission(s) may be obtained by calling (202) 927–5331, email at *PRA@treasury.gov,* or the entire information collection request may be found at *www.reginfo.gov*.

Financial Management Service (FMS)

OMB Number: 1510–0037.

Type of Review: Extension without change of a currently approved collection.

Title: Voucher for Payment of Awards.

Form: TFS 5135.

Abstract: Awards certified to Treasury are paid annually as funds are received from foreign governments. Vouchers are mailed to award-holders showing payments due. Award-holders sign vouchers certifying that he/she is entitled to payment.

Affected Public: Individuals or Households.

Estimated Total Burden Hours: 700.

OMB Number: 1510–0043.

Type of Review: Revision of a currently approved collection.

Title: Notice of Reclamation and Debit Request for Recurring Benefit Payments.

Form: FMS 133, 135.

Abstract: A program agency authorizes Treasury to recover payments that have been issued after the death of the beneficiary. FMS Form 133 is used to notify the financial institution. If the financial institution does not respond to the 133, a debit request (Form 135) is sent to the Federal Reserve Bank.

Affected Public: Private Sector; Businesses or other for-profits.

Estimated Total Burden Hours: 29,750.

OMB Number: 1510–0045.

Type of Review: Revision of a currently approved collection.

Title: Trace Request for EFT Payments.

Form: FMS 150–1, 150–2.

Abstract: Used to notify the financial institutions that a beneficiary has claimed non-receipt of credit for a payment. The form is designed to help the financial institution locate any problem and to keep the beneficiary informed of any action taken.

Affected Public: Private Sector; Businesses or other for-profits.

Estimated Total Burden Hours: 27,163.

BILLING CODE 4810–35–P

DEPARTMENT OF THE TREASURY

Open Meeting of the Federal Advisory Committee on Insurance

AGENCY: Departmental Offices, Treasury.

ACTION: Notice of Open Meeting.

SUMMARY: The Department of the Treasury's Federal Advisory Committee on Insurance (FACI) will convene an open meeting on Monday, August 6, 2012 at the Department of the Treasury, Cash Room, 1500 Pennsylvania Avenue NW., Washington, DC, beginning at 1:30 p.m. Eastern Time. The meeting is open to the public and the site is accessible to individuals with disabilities.

In this meeting, the FACI members will follow up on the conclusions of the FACI meeting that occurred on March 30, 2012, and will provide direction on the expected work product of the Committee and each subcommittee, if any.

DATES: The meeting will be held on August 6, 2012, commencing at 1:30 p.m. Eastern Time.

Submission of Written Statements: The public is invited to submit written statements to the FACI. Written statements can be submitted by any of the following methods:

Electronic Statements

Email: FACI@treasury.gov, or

Paper Statements

Paper statements should be sent in triplicate to the Federal Advisory Committee on Insurance, Department of the Treasury, Room 2100, 1425 New York Avenue NW., Washington, DC 20220.

The Department of the Treasury will publish all statements in their original form on the Federal Insurance Office Web site, *http://www.treasury.gov/about/organizational-structure/offices/Pages/Federal-Insurance.aspx,* including any business or personal information provided such as names, addresses, email addresses, or telephone numbers. The Department of the Treasury will also make such statements available for public inspection and copying in the Department's Library, Room 1428, 1500 Pennsylvania Avenue NW., Washington, DC 20220, on official business days between the hours of 10:00 a.m. and 5:00 p.m. Eastern Time. You can make an appointment to inspect statements by calling (202) 622–0990. All statements received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. You should submit only information that you wish to make publicly available.

FOR FURTHER INFORMATION CONTACT: James P. Brown, Designated Federal Officer, Federal Advisory Committee on Insurance, Department of the Treasury, Room 2100, New York Avenue NW., Washington, DC 20220, at (202) 622–6910 (this is not a toll-free number). Persons who have difficulty hearing or speaking may access this number via TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

SUPPLEMENTARY INFORMATION: In accordance with the Federal Advisory Committee Act, 5 U.S.C. App. II, 10(a)(2), through implementing regulations at 41 CFR 102–3.150, James P. Brown, Designated Federal Officer of FACI, has ordered publication of this notice that the FACI will convene its quarterly meeting on Monday, August 6, 2012. The meeting will be held at the Department of the Treasury, Cash Room, 1500 Pennsylvania Avenue NW., Washington, DC 20220 at 1:30 p.m. Eastern Time.

The meeting will be held in a secured facility and members of the public who plan to attend the meeting must contact James P. Brown, the Designated Federal Officer, at (202) 622–6910 to provide the following information which is required to facilitate entry into the building: full name, organization represented (if any), date of birth, Social Security number, and country of citizenship. This information must be received by 5:00 p.m. Eastern Time on Monday, July 30, 2012. On the date of the meeting, attendees must present a government-issued photo ID, such as a driver's license or passport for entry into the building.

In this meeting, the FACI members will follow up on the conclusions of the FACI meeting that occurred on March 30, 2012, and will provide direction on the expected work product of the Committee and each subcommittee, if any. Due to the logistical difficulties of convening the members of the committee, the meeting is being announced with less than 15 days notice (see 41 CFR 102–3.150(b)).

Michael T. McRaith,

Director, Federal Insurance Office, Department of the Treasury.

[FR Doc. 2012–18460 Filed 7–27–12; 8:45 am]

BILLING CODE 4810–25–P

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

FEDERAL RESERVE SYSTEM

FEDERAL DEPOSIT INSURANCE CORPORATION

Proposed Agency Information Collection Activities; Comment Request

AGENCIES: Office of the Comptroller of the Currency (OCC), Treasury; Board of Governors of the Federal Reserve System (Board); and Federal Deposit Insurance Corporation (FDIC).

ACTION: Joint notice and request for comment.

SUMMARY: In accordance with the requirements of the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. chapter 35), the OCC, the Board, and the FDIC (collectively, the agencies) may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The Federal Financial Institutions Examination Council (FFIEC), of which the agencies are members, has approved the agencies' publication for public comment of a proposal to extend, with revision, the Foreign Branch Report of Condition (FFIEC 030 and FFIEC 030S), which is a currently approved information collection for each agency. The proposed panel changes would be effective for the FFIEC 030 and FFIEC 030S reports as of the December 31, 2012, report date. At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the FFIEC and the agencies should modify the proposed revisions prior to giving final approval. The agencies will then submit the proposed revisions to OMB for review and approval.

DATES: Comments must be submitted on or before September 28, 2012.

ADDRESSES: Interested parties are invited to submit written comments to any or all of the agencies. All comments should refer to the OMB control number and will be shared among the agencies.

OCC: You should direct all written comments to: Communications Division, Office of the Comptroller of the Currency, Public Information Room, Mailstop 2–3, Attention: 1557–0099, 250 E Street SW., Washington, DC 20219. In addition, comments may be sent by fax to (202) 874–5274, or by electronic mail to *regs.comments@occ.treas.gov.* You may personally inspect and photocopy the comments at the OCC, 250 E Street SW., Washington, DC 20219. For security reasons, the OCC requires that visitors make an appointment to inspect comments. You may do so by calling (202) 874–4700. Upon arrival, visitors will be required to present valid government-issued photo identification and submit to security screening in order to inspect and photocopy comments.

Board: You may submit comments, identified by FFIEC 030 or FFIEC 030S, by any of the following methods:

- *Agency Web Site: www.federalreserve.gov.* Follow the instructions for submitting comments on the *www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm.*
- *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.
- *Email: regs.comments@federalreserve.gov.* Include the OMB control number in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Jennifer J. Johnson, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW., Washington, DC 20551.

All public comments are available from the Board's Web site at *www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm* as submitted, unless modified for technical reasons. Accordingly, your comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper form in Room MP–500 of the Board's Martin Building (20th and C Streets NW.) between 9:00 a.m. and 5:00 p.m. on weekdays.

FDIC: You may submit comments, which should refer to ''Foreign Branch Report of Condition, 3064–0011,'' by any of the following methods:

- *Agency Web Site: www.FDIC.gov/regulations/laws/federal/notices.html.*
- *Email: comments@FDIC.gov.* Include ''Foreign Branch Report of Condition, 3064–0011'' in the subject line of the message.
- *Mail:* Gary A. Kuiper, (202) 898–3877, Counsel, Attn: Comments, Room NYA–5046, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.
- *Hand Delivery:* Comments may be hand delivered to the guard station at the rear of the 550 17th Street Building (located on F Street) on business days between 7:00 a.m. and 5:00 p.m.

Public Inspection: All comments received will be posted without change to *www.fdic.gov/regulations/laws/federal/notices/html* including any personal information provided. Comments may be inspected at the FDIC Public Information Center, Room E–1002, 3502 North Fairfax Drive, Arlington, VA 22226, between 9:00 a.m. and 5:00 p.m. on business days.

Additionally, commenters may send a copy of their comments to the OMB desk officer for the agencies by mail to the Office of Information and Regulatory Affairs, U.S. Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW.,

Washington, DC 20503 or by fax to (202) 395–6974.

FOR FURTHER INFORMATION CONTACT: For further information about the revisions discussed in this notice, please contact any of the agency clearance officers whose names appear below. In addition, copies of the report forms can be obtained at the FFIEC's Web site (*http://www.ffiec.gov/ffiec_report_forms.htm*).

OCC: Mary H. Gottlieb, OCC Clearance Officer, (202) 874–5090, Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 250 E Street SW., Washington, DC 20219.

Board: Cynthia Ayouch, Federal Reserve Board Clearance Officer, (202) 452–3829, Division of Research and Statistics, Board of Governors of the Federal Reserve System, 20th and C Streets NW., Washington, DC 20551. Telecommunications Device for the Deaf (TDD) users may call (202) 263–4869.

FDIC: Gary A. Kuiper, Counsel, (202) 898–3877, Legal Division, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

SUPPLEMENTARY INFORMATION: Proposal to extend for three years, with revision, the following currently approved collection of information:

Report Title: Foreign Branch Report of Condition.

Form Numbers: FFIEC 030 and FFIEC 030S.

Frequency of Response: Annually, and quarterly for significant branches.

Affected Public: Business or other for profit.

OCC

OMB Number: 1557–0099.

Estimated Number of Respondents: 123 annual branch respondents (FFIEC 030). 310 quarterly branch respondents (FFIEC 030). 34 annual branch respondents (FFIEC 030S).

Estimated Average Time per Response: 3.4 burden hours (FFIEC 030). 0.5 burden hours (FFIEC 030S).

Estimated Total Annual Burden: 4,651 burden hours.

Board

OMB Number: 7100–0071.

Estimated Number of Respondents: 22 annual branch respondents (FFIEC 030). 24 quarterly branch respondents (FFIEC 030). 14 annual branch respondents (FFIEC 030S).

Estimated Average Time per Response: 3.4 burden hours (FFIEC 030). 0.5 burden hours (FFIEC 030S).

Estimated Total Annual Burden: 408 burden hours.

FDIC

OMB Number: 3064–0011.

Estimated Number of Respondents: 12 annual respondents (FFIEC 030). 3 quarterly respondents (FFIEC 030). 11 annual respondents (FFIEC 030S).

Estimated Average Time per Response: 3.4 burden hours (FFIEC 030). 0.5 burden hours (FFIEC 030S).

Estimated Total Annual Burden: 87 burden hours.

General Description of Reports

This information collection is mandatory: 12 U.S.C. 321, 324, and 602 (Board); 12 U.S.C. 602 (OCC); and 12 U.S.C. 1828 (FDIC). This information collection is given confidential treatment pursuant to 5 U.S.C. 552(b)(8).

Abstract

The FFIEC 030 contains asset and liability information for foreign branches of insured U.S. banks and is required for regulatory and supervisory purposes. The information is used to analyze the foreign operations of U.S. banks. All foreign branches of U.S. banks regardless of charter type, file this report with the appropriate Federal Reserve District Bank. The Federal Reserve collects this information on behalf of the U.S. bank's primary federal bank regulatory agency. The FFIEC 030S contains five data items that branches with total assets between $50 million and $250 million file on an annual basis in lieu of the FFIEC 030 reporting form.

On July 21, 2011, supervisory responsibility for federal and state-chartered savings associations was transferred from the former Office of Thrift Supervision to the OCC and the FDIC, respectively, pursuant to Title III of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203. Accordingly, the Foreign Branch Report of Condition would be applicable to foreign branches, if any, of insured U.S. savings associations beginning as of the December 31, 2012, report date. No other changes are proposed to the FFIEC 030 or FFIEC 030S reporting forms or instructions.

Request for Comment

Public comment is requested on all aspects of this joint notice. Comments are invited on:

a. Whether the information collection is necessary for the proper performance of the agencies' functions, including whether the information has practical utility;

b. The accuracy of the agencies' estimates of the burden of the information collection, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or start up costs and costs of operation, maintenance, and purchase of services to provide the requested information.

Comments submitted in response to this notice will be shared among the agencies. All comments will become a matter of public record.

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Additional Designations, Foreign Narcotics Kingpin Designation Act

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (''OFAC'') is publishing the names of 10 individuals and nine entities whose property and interests in property have been blocked pursuant to the Foreign Narcotics Kingpin Designation Act (''Kingpin Act'') (21 U.S.C. §§ 1901–1908, 8 U.S.C. § 1182).

DATES: The designation by the Director of OFAC of the 10 individuals and nine entities identified in this notice pursuant to section 805(b) of the Kingpin Act is effective on July 24, 2012.

FOR FURTHER INFORMATION CONTACT: Assistant Director, Sanctions Compliance & Evaluation, Office of Foreign Assets Control, U.S. Department

of the Treasury, Washington, DC 20220, Tel: (202) 622–2490.

SUPPLEMENTARY INFORMATION:

Electronic and Facsimile Availability

This document and additional information concerning OFAC are available on OFAC's Web site at *http://www.treasury.gov/ofac* or via facsimile through a 24-hour fax-on-demand service at (202) 622–0077.

Background

The Kingpin Act became law on December 3, 1999. The Kingpin Act establishes a program targeting the activities of significant foreign narcotics traffickers and their organizations on a worldwide basis. It provides a statutory framework for the imposition of sanctions against significant foreign narcotics traffickers and their organizations on a worldwide basis, with the objective of denying their businesses and agents access to the U.S. financial system and the benefits of trade and transactions involving U.S. companies and individuals.

The Kingpin Act blocks all property and interests in property, subject to U.S. jurisdiction, owned or controlled by significant foreign narcotics traffickers as identified by the President. In addition, the Secretary of the Treasury, in consultation with the Attorney General, the Director of the Central Intelligence Agency, the Director of the Federal Bureau of Investigation, the Administrator of the Drug Enforcement Administration, the Secretary of Defense, the Secretary of State, and the Secretary of Homeland Security may designate and block the property and interests in property, subject to U.S. jurisdiction, of persons who are found to be: (1) Materially assisting in, or providing financial or technological support for or to, or providing goods or services in support of, the international narcotics trafficking activities of a person designated pursuant to the Kingpin Act; (2) owned, controlled, or directed by, or acting for or on behalf of, a person designated pursuant to the Kingpin Act; or (3) playing a significant role in international narcotics trafficking.

On July 24, 2012, the Director of OFAC designated the following 10 individuals and nine entities whose property and interests in property are blocked pursuant to section 805(b) of the Kingpin Act.

Individuals

1. ARAUJO MONZON, Elvira, Avenida Ramon Lopez Velarde No. 3240, Colonia Presidentes de Mexico, Culiacan, Sinaloa, Mexico; DOB 25 Jan 1961; POB Bacacoragua, Badiraguato, Sinaloa, Mexico; R.F.C. Electronic and Facsimile Availability

This document and additional information concerning OFAC are available from OFAC's Web site at *www.treasury.gov/ofac* or via facsimile through a 24-hour fax-on demand service at (202) 622–0077.

Background

On December 3, 1999, the Kingpin Act was signed into law by the President of the United States. The Kingpin Act provides a statutory framework for the President to impose sanctions against significant foreign narcotics traffickers and their organizations on a worldwide basis, with the objective of denying their businesses and agents access to the U.S. financial system and to the benefits of trade and transactions involving U.S. persons and entities.

The Kingpin Act blocks all property and interests in property, subject to U.S. jurisdiction, owned or controlled by significant foreign narcotics traffickers as identified by the President. In addition, the Secretary of the Treasury consults with the Attorney General, the Director of the Central Intelligence Agency, the Director of the Federal Bureau of Investigation, the Administrator of the Drug Enforcement Administration, the Secretary of Defense, the Secretary of State, and the Secretary of Homeland Security when designating and blocking the property or interests in property, subject to U.S. jurisdiction, of persons or entities found to be: (1) Materially assisting in, or providing financial or technological support for or to, or providing goods or services in support of, the international narcotics trafficking activities of a person designated pursuant to the Kingpin Act; (2) owned, controlled, or directed by, or acting for or on behalf of, a person designated pursuant to the Kingpin Act; and/or (3) playing a significant role in international narcotics trafficking.

On July 24, 2012, the Director of OFAC removed from the SDN List the ten individuals and nine entities listed below, whose property and interests in property were blocked pursuant to the Kingpin Act:

BILLING CODE 4810–AL–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Unblocking of Specially Designated Nationals and Blocked Persons Pursuant to Executive Order 12978

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury's Office of Foreign Assets Control (''OFAC'') is publishing the names of nine individuals and four entities whose property and interests in property have been unblocked pursuant to Executive Order 12978 of October 21, 1995, ''Blocking Assets and Prohibiting Transactions With Significant Narcotics Traffickers''.

DATES: The unblocking and removal from the list of Specially Designated Nationals and Blocked Persons (''SDN List'') of the nine individuals and four entities identified in this notice whose property and interests in property were blocked pursuant to Executive Order 12978 of October 21, 1995, is effective on July 24, 2012.

FOR FURTHER INFORMATION CONTACT: Assistant Director, Sanctions Compliance & Evaluation, Department of the Treasury, Office of Foreign Assets Control, Washington, DC 20220, Tel: (202) 622–2490.

SUPPLEMENTARY INFORMATION:

Electronic and Facsimile Availability

This document and additional information concerning OFAC are available from OFAC's Web site (*www.treasury.gov/ofac*) or via facsimile through a 24-hour fax-on demand service at (202) 622–0077.

Background

On October 21, 1995, the President, invoking the authority, *inter alia,* of the International Emergency Economic Powers Act (50 U.S.C. 1701–1706) (''IEEPA''), issued Executive Order 12978 (60 FR 54579, October 24, 1995) (the ''Order''). In the Order, the President declared a national emergency to deal with the threat posed by significant foreign narcotics traffickers centered in Colombia and the harm that they cause in the United States and abroad.

Section 1 of the Order blocks, with certain exceptions, all property and interests in property that are in the United States, or that hereafter come within the United States or that are or hereafter come within the possession or control of United States persons, of: (1) The foreign persons listed in an Annex

to the Order; (2) any foreign person determined by the Secretary of the Treasury, in consultation with the Attorney General and the Secretary of State: (a) To play a significant role in international narcotics trafficking centered in Colombia; or (b) to materially assist in, or provide financial or technological support for or goods or services in support of, the narcotics trafficking activities of persons designated in or pursuant to the Order; and (3) persons determined by the Secretary of the Treasury, in consultation with the Attorney General and the Secretary of State, to be owned or controlled by, or to act for or on behalf of, persons designated pursuant to the Order.

On July 24, 2012, the Director of OFAC removed from the SDN List the individuals and entities listed below, whose property and interests in property were blocked pursuant to the Order:

Individuals

1. CLAVIJO GARCIA, Hector Augusto, c/o GANADERIAS DEL VALLE S.A., Cali, Colombia; DOB 15 Dec 1958; Cedula No. 16613930 (Colombia) (individual) [SDNT]
2. DOMINGUEZ VELEZ, Jorge Enrique (a.k.a. ''EL ONLI''), c/o ERA DE LUZ LTDA. LIBRERIA CAFE, Cali, Colombia; DOB 09 Aug 1968; Cedula No. 16767305 (Colombia) (individual) [SDNT]
3. GALLEGO RAMOS, Luis Alfredo, Calle 83 No. 14–130, Cali, Colombia; c/o INTERCONTINENTAL DE AVIACION S.A., Bogota, Colombia; c/o AEROVIAS ATLANTICO LTDA., Bogota, Colombia; c/o AEROCOMERCIAL ALAS DE COLOMBIA LTDA., Bogota, Colombia; c/o GREEN ISLAND S.A., Bogota, Colombia; DOB 07 Aug 1954; POB Cali, Colombia; Cedula No. 16585721 (Colombia); Passport AF783512 (Colombia); alt. Passport AE187469 (Colombia); alt. Passport 16585721 (Colombia) (individual) [SDNT]
4. OSPINA PRADA, Maria del Carmen, c/o INVERSIONES INMOBILIARIA QUILICHAO S.A. Y CIA S.C.A., Cali, Colombia; c/o MIRACANA INMOBILIARIA QUILCHAO S.A. & CIA S.C.A., Cali, Colombia; Calle 98 No. 9–41, Apt. 1102, Bogota, Colombia; DOB 04 Jul 1953; POB San Luis, Tolima, Colombia; nationality Colombia; citizen Colombia; Cedula No. 41700627 (Colombia); Passport AH715906 (Colombia); alt. Passport AH456850 (Colombia) (individual) [SDNT]
5. RAMIREZ RIVERA, Sergio Alberto, Cali, Colombia; DOB 14 Jan 1964; POB Cali, Colombia; Cedula No. 16694220 (Colombia); Passport AF771317 (Colombia) (individual) [SDNT]
6. RESTREPO CLAVIJO, Carlos Umberto (a.k.a. RESTREPO CLAVIJO, Carlos Huberto; a.k.a. RESTREPO CLAVIJO, Carlos Humberto), Calle 8 No. 4–47, Cartago, Valle, Colombia; Cedula No. 16205322 (Colombia) (individual) [SDNT]
7. SANDOVAL SALAZAR, Ricardo, c/o AGROPECUARIA LINDARAJA S.A., Cali, Colombia; c/o TARRITOS S.A., Cali, Colombia; Cedula No. 16683550 (Colombia) (individual) [SDNT]
8. TORRES MORENO, Marisol, c/o PROVIDA E.U., Cali, Colombia; DOB 10 May 1969; Cedula No. 31992583 (Colombia); Passport 31992583 (Colombia) (individual) [SDNT]
9. ZAMBRANO MADRONERO, Carmen Alicia, c/o COSMEPOP, Bogota, Colombia; c/o PATENTES MARCAS Y REGISTROS S.A., Bogota, Colombia; c/o COPSERVIR LTDA., Bogota, Colombia; c/o CREDISOL, Bogota, Colombia; c/o DROMARCA Y CIA S.C.S., Bogota, Colombia; c/o FARMACOOP, Bogota, Colombia; c/o GLAJAN S.A., Bogota, Colombia; c/o SHARPER S.A., Bogota, Colombia; DOB 18 Nov 1967; Cedula No. 30738265 (Colombia); Passport 30738265 (individual) [SDNT]

Entities

1. C A V J CORPORATION LTDA., Calle 166 No. 38–50, Bogota, Colombia; NIT #830101426–9 (Colombia) [SDNT]
2. C.A.V.J. CORPORATION, Avenida 20 (detras del Country Club), Edificio Drcenca Barquisimeto, Lara, Venezuela; Calle 18, Zona Industrial 1, Intercomunal de Cabudare Barquisimeto, Lara, Venezuela; Calle 14, Zona Industrial 1, Intercomunal de Cabudare Barquisimeto, Lara, Venezuela; RIF #J–30460672–9 (Venezuela) [SDNT]
3. ERA DE LUZ LTDA. LIBRERIA CAFE, Calle 16 No. 100–98, Cali, Colombia; NIT #805015908–8 (Colombia) [SDNT]
4. VOL PHARMACYA LTDA. (a.k.a. VOL PHARMACIA LTDA.), Calle 12 No. 8–34/36, Cucuta, Colombia; NIT #807005617–4 (Colombia) [SDNT]

Dated: July 24, 2012.

Medicare Program; Revisions to Payment Policies Under the Physician Fee Schedule, DME Face to Face Encounters, Elimination of the Requirement for Termination of Non-Random Prepayment Complex Medical Review and Other Revisions to Part B for CY 2013; Hospital Outpatient Prospective and Ambulatory Surgical Center Payment Systems and Quality Reporting Programs; Electronic Reporting Pilot; Inpatient Rehabilitation Facilities Quality Reporting Program; Quality Improvement Organization Regulations; Proposed Rules

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Proposed rule.

SUMMARY: This major proposed rule addresses changes to the physician fee schedule, payments for Part B drugs, and other Medicare Part B payment policies to ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services. It would also implement provisions of the Affordable Care Act by establishing a face-to-face encounter as a condition of payment for certain durable medical equipment (DME) items. In addition, it would implement statutory changes regarding the termination of non-random prepayment review under the Medicare Prescription Drug, Improvement, and Modernization Act of 2003. Finally, this proposed rule also includes a discussion regarding the Chiropractic Services Demonstration program.

DATES: *Comment date:* To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on September 4, 2012.

ADDRESSES: In commenting, please refer to file code CMS–1590–P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov*. Follow the instructions for ''submitting a comment.''

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1590–P, P.O. Box 8013, Baltimore, MD 21244–8013.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1590–P, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

4. *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments before the close of the comment period to either of the following addresses:

a. For delivery in Washington, DC—Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244–1850.

If you intend to deliver your comments to the Baltimore address, please call telephone number (410) 786–7195 in advance to schedule your arrival with one of our staff members.

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

FOR FURTHER INFORMATION CONTACT: Corinne Axelrod, (410) 786–5620, for any physician payment issue not identified below.

Ryan Howe, (410) 786–3355, for issues related to practice expense methodology and direct practice expense inputs, telehealth services, and issues related to primary care and care coordination.

Sara Vitolo, (410) 786–5714, for issues related to potentially misvalued services, malpractice RVUs, molecular pathology, and payment for new preventive service HCPCS G-codes.

Ken Marsalek, (410) 786–4502, for issues related to the multiple procedure payment reduction and payment for the technical component of pathology services.

Michael Moore, (410) 786–6830, for issues related to geographic practice cost indices and the sustainable growth rate.

Pam West, (410) 786–2302, for issues related to therapy services.

Chava Sheffield, (410) 786–2298, for issues related to certified registered nurse anesthetists.

Roberta Epps, (410) 786–4503, for issues related to portable x-ray.

Anne Tayloe-Hauswald, (410) 786–4546, for issues related to ambulance fee schedule and Part B drug payment.

Amanda Burd, (410) 786–2074, for issues related to the DME provisions.

Debbie Skinner, (410) 786–7480, for issues related to non-random prepayment complex medical review.

Latesha Walker, (410) 786–1101, for issues related to ambulance coverage-physician certification statement.

Alexandra Mugge, (410) 786–4457, for issues related to physician compare.

Christine Estella, (410) 786–0485, for issues related to the physician quality reporting system, incentives for e-prescribing, and Medicare shared savings program.

Pauline Lapin, (410) 786–6883, for issues related to the chiropractic services demonstration budget neutrality issue.

Gift Tee, (410) 786–9316, for issues related to the Physician Feedback Reporting Program and Value-Based Payment Modifier.

Jamie Hermansen, (410) 786–2064, for issues related to Medicare coverage for hepatitis B vaccine.

Andrew Morgan, (410) 786–2543, for issues related to e-prescribing under Medicare Part D.

SUPPLEMENTARY INFORMATION: *Inspection of Public Comments:* All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following Web site as soon as possible after they have been received: *http://www.regulations.gov*. Follow the search instructions on that Web site to view public comments.

Comments received timely will also be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, phone 1–800–743–3951.

Addenda Available Only Through the Internet on the CMS Web site

In the past, the Addenda referred to throughout the preamble of our annual PFS proposed and final rules with comment period were included in the printed **Federal Register**. However, effective with the CY 2012 PFS proposed rule, the PFS Addenda no longer appear in the **Federal Register**. Instead these Addenda to the annual proposed and final rules with comment period will be available only through the Internet. The PFS Addenda along with other supporting documents and tables referenced in this proposed rule with comment period are available through the Internet on the CMS Web site at *http://www.cms.gov/PhysicianFeeSched/*. Click on the link on the left side of the screen titled, ''PFS Federal Regulations Notices'' for a chronological list of PFS **Federal Register** and other related documents. For the CY 2013 PFS proposed rule with comment period, refer to item CMS–1590–P. Readers who experience any problems accessing any of the Addenda or other documents referenced in this proposed rule with comment period and posted on the CMS Web site identified above should contact Corinne Axelrod at (410) 786–5620.

CPT (Current Procedural Terminology) Copyright Notice

Throughout this proposed rule, we use CPT codes and descriptions to refer to a variety of services. We note that CPT codes and descriptions are copyright 2011 American Medical Association. All Rights Reserved. CPT is a registered trademark of the American Medical Association (AMA). Applicable Federal Acquisition Regulations (FAR) and Defense Federal Acquisition Regulations (DFAR) apply.

I. Executive Summary and Background

A. Executive Summary

1. Purpose

This major proposed rule would revise payment polices under the Medicare Physician Fee Schedule (PFS) and make other policy changes related to Medicare Part B payment. These changes would be applicable to services furnished in CY 2013. It also would implement provisions of the Affordable Care Act by establishing a face-to-face encounter as a condition of payment for certain durable medical equipment (DME) items. In addition, it would implement statutory changes regarding the termination of non-random prepayment review.

2. Summary of the Major Provisions

The Social Security Act (Act) requires us to establish payments under the PFS based on national uniform relative value units (RVUs) and the relative resources used in furnishing a service. The Act requires that national RVUs be established for physician work, practice expense (PE), and malpractice (MP) expense. In this major proposed rule, we propose payment rates for CY 2013 for the PFS, payments for Part B drugs, and other Medicare Part B payment policies to ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services. It also proposes to implement provisions of the Affordable Care Act by establishing a face-to-face encounter as a condition of payment for certain durable medical equipment (DME) items, and by removing certain regulations regarding the termination of non-random prepayment review. It also proposes new claims-based data reporting requirements for therapy services to implement a provision in the Middle Class Tax Relief and Jobs Creation Act (MCTRCA). In addition, this rule proposes:

- Potentially Misvalued Codes to be Evaluated.
- Additional Multiple Procedure Payment Reductions (MPPR).
- Expanding Medicare Telehealth Services.
- Regulatory Changes regarding Payment for Technical Component of Certain Physician Pathology Services to Conform to Statute.
- Primary Care and Care Coordination Service.
- Payment rates for Newly Covered Preventive Services.
- Definition of Anesthesia and Related Care in the Certified Registered Nurse Anesthetists Benefit.
- Ordering Requirements for Portable X-ray Services.
- Updates to the Ambulance Fee Schedule.
- Part B Drug Payment Rates.
- Ambulance Coverage-Physician Certification Statement.
- Updating the—
  - ++ Physician Compare Web site.
  - ++ Physician Quality Reporting System.
  - ++ Electronic Prescribing (eRx) Incentive Program.
  - ++ Medicare Shared Savings Program.
- Providing Budget Neutrality Discussion on the Chiropractic Demonstration.
- Physician Value-Based Payment Modifier and the Physician Feedback Reporting Program.
- Medicare Coverage of Hepatitis B Vaccine.
- Updating Existing Standards for e-prescribing under Medicare Part D and Lifting the LTC Exemption.

3. Summary of Costs and Benefits

The statute requires that we establish by regulation each year payment amounts for all physicians' service. These payment amounts are required to be adjusted to reflect the variations in the costs of providing services in different geographic areas. The statute also requires that annual adjustments to PFS RVUs not cause annual estimated expenditures to differ by more than $20 million from what they would have been had the adjustments not been made. If adjustments to RVUs would cause expenditures to change by more than $20 million, we must make adjustments to preserve budget neutrality.

Several proposed changes would affect the specialty distribution of Medicare expenditures. This proposed rule reflects the Administration's priority on improving payment for primary care services. Overall, payments for primary care specialties would increase and payments to select other specialties would decrease due to several changes in how we propose to calculate payments for CY 2013. Primary care payments would increase because of a proposed payment for managing a beneficiary's care when the beneficiary is discharged from an inpatient hospital, a SNF, an outpatient hospital observation, partial hospitalization services, or a community mental health center. Primary care payments also would increase due to redistributions from proposed reductions in payments for other specialties. Because of the budget-neutral nature of this system, proposed decreases in payments in one service result in proposed increases in payments in others.

Payments to primary care specialties are also impacted by the completion of the 4-year transition to new PE RVUs using the new Physician Practice Information Survey (PPIS) data that was adopted in the CY 2010 PFS final rule with comment period. The projected impacts of using the new PPIS data are generally consistent with the impacts discussed in the CY 2012 final rule with comment period (76 FR 72452).

Proposed changes in how we calculate payment when certain services are furnished together would result in reductions in total payments projected to cardiologists and ophthalmologists. Capital-intensive specialties are projected to decrease due to proposed

changes in how the interest rate used in the PE calculation is estimated. Also, under our potentially misvalued codes initiative, we propose to adjust the payment rates for two common radiation oncology treatment delivery methods, intensity-modulated radiation treatment (IMRT), and stereotactic body radiation therapy (SBRT) to reflect more realistic time projections based upon publicly available data. The combined effect of the PPIS transition and the latter two proposals would be a reduction in payments to radiation therapy centers and radiation oncology.

B. Background

Since January 1, 1992, Medicare has paid for physicians' services under section 1848 of the Act, ''Payment for Physicians' Services.'' The Act requires that CMS make payments under the PFS using national uniform relative value units (RVUs) based on the relative resources used in furnishing a service. Section 1848(c) of the Act requires that national RVUs be established for physician work, PE, and MP expense. Before the establishment of the resource-based relative value system, Medicare payment for physicians' services was based on reasonable charges. We note that throughout this proposed rule, unless otherwise noted, the term ''practitioner'' is used to describe both physicians and nonphysician practitioners (such as physician assistants, nurse practitioners, clinical nurse specialists, certified nurse-midwives, psychologists, or clinical social workers) who are permitted to bill Medicare under the PFS for their services.

1. Development of the Relative Value System

a. Work RVUs

The concepts and methodology underlying the PFS were enacted as part of the Omnibus Budget Reconciliation Act (OBRA) of 1989 (Pub. L. 101–239), and OBRA 1990, (Pub. L. 101–508). The final rule published on November 25, 1991 (56 FR 59502) set forth the fee schedule for payment for physicians' services beginning January 1, 1992. Initially, only the physician work RVUs were resource-based, and the PE and MP RVUs were based on average allowable charges.

The physician work RVUs established for the implementation of the fee schedule in January 1992 were developed with extensive input from the physician community. A research team at the Harvard School of Public Health developed the original physician work RVUs for most codes in a cooperative agreement with the Department of Health and Human Services (HHS). In constructing the code-specific vignettes for the original physician work RVUs, Harvard worked with panels of experts, both inside and outside the Federal government, and obtained input from numerous physician specialty groups.

Section 1848(b)(2)(B) of the Act specifies that the RVUs for anesthesia services are based on RVUs from a uniform relative value guide, with appropriate adjustment of the conversion factor (CF), in a manner to assure that fee schedule amounts for anesthesia services are consistent with those for other services of comparable value. We established a separate CF for anesthesia services, and we continue to utilize time units as a factor in determining payment for these services. As a result, there is a separate payment methodology for anesthesia services.

We establish physician work RVUs for new and revised codes based, in part, on our review of recommendations received from the American Medical Association/Specialty Society Relative Value Update Committee (AMA RUC).

b. Practice Expense Relative Value Units (PE RVUs)

Section 121 of the Social Security Act Amendments of 1994 (Pub. L. 103–432), enacted on October 31, 1994, amended section 1848(c)(2)(C)(ii) of the Act and required us to develop resource-based PE RVUs for each physicians' service beginning in 1998. We were to consider general categories of expenses (such as office rent and wages of personnel, but excluding malpractice expenses) comprising PEs.

Section 4505(a) of the Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33), amended section 1848(c)(2)(C)(ii) of the Act to delay implementation of the resource-based PE RVU system until January 1, 1999. In addition, section 4505(b) of the BBA provided for a 4-year transition period from charge-based PE RVUs to resource-based PE RVUs.

We established the resource-based PE RVUs for each physicians'service in a final rule, published November 2, 1998 (63 FR 58814), effective for services furnished in 1999. Based on the requirement to transition to a resource-based system for PE over a 4-year period, resource-based PE RVUs did not become fully effective until 2002.

This resource-based system was based on two significant sources of actual PE data: The Clinical Practice Expert Panel (CPEP) data and the AMA's Socioeconomic Monitoring System (SMS) data. The CPEP data were collected from panels of physicians, practice administrators, and nonphysician health professionals (for example, registered nurses (RNs)) nominated by physician specialty societies and other groups. The CPEP panels identified the direct inputs required for each physicians' service. (We have since refined and revised these inputs based on recommendations from the AMA RUC.) The SMS data provided aggregate specialty-specific information on hours worked and PEs.

Separate PE RVUs are established for procedures that can be furnished in both a nonfacility setting, such as a physician's office, and a facility setting, such as a hospital outpatient department (HOPD). The difference between the facility and nonfacility RVUs reflects the fact that a facility typically receives separate payment from Medicare for its costs of furnishing the service, apart from payment under the PFS. The nonfacility RVUs reflect all of the direct and indirect PEs of furnishing a particular service.

Section 212 of the Balanced Budget Refinement Act of 1999 (BBRA) (Pub. L. 106–113) directed the Secretary of Health and Human Services (the Secretary) to establish a process under which we accept and use, to the maximum extent practicable and consistent with sound data practices, data collected or developed by entities and organizations to supplement the data we normally collect in determining the PE component. On May 3, 2000, we published the interim final rule (65 FR 25664) that set forth the criteria for the submission of these supplemental PE survey data. The criteria were modified in response to comments received, and published in the **Federal Register** (65 FR 65376) as part of a November 1, 2000 final rule. The PFS final rules published in 2001 and 2003, respectively, (66 FR 55246 and 68 FR 63196) extended the period during which we would accept these supplemental data through March 1, 2005.

In the CY 2007 PFS final rule with comment period (71 FR 69624), we revised the methodology for calculating direct PE RVUs from the top-down to the bottom-up methodology beginning in CY 2007. We adopted a 4-year transition to the new PE RVUs. This transition was completed in CY 2010. Direct PE RVUs were calculated for CY 2013 using this methodology, unless otherwise noted.

In the CY 2010 PFS final rule with comment period, we updated the practice expense per hour (PE/HR) data that are used in the calculation of PE RVUs for most specialties (74 FR 61749). For this update, we used the Physician Practice Information Survey

(PPIS) conducted by the AMA. The PPIS is a multispecialty, nationally representative, PE survey of both physicians and nonphysician practitioners (NPPs) using a survey instrument and methods highly consistent with those of the SMS and the supplemental surveys used prior to CY 2010. We note that in CY 2010, for oncology, clinical laboratories, and independent diagnostic testing facilities (IDTFs), we continued to use the supplemental survey data to determine PE/HR values (74 FR 61752). Beginning in CY 2010, we provided for a 4-year transition for the new PE RVUs using the updated PE/HR data. In CY 2013, the final year of the transition, PE RVUs are calculated based on the new data.

c. Resource-Based Malpractice RVUs

Section 4505(f) of the BBA amended section 1848(c) of the Act requires that we implement resource-based MP RVUs for services furnished on or after CY 2000. The resource-based MP RVUs were implemented in the PFS final rule with comment period published November 2, 1999 (64 FR 59380). The MP RVUs were based on malpractice insurance premium data collected from commercial and physician-owned insurers from all the States, the District of Columbia, and Puerto Rico.

d. Refinements to the RVUs

Section 1848(c)(2)(B)(i) of the Act requires that we review all RVUs no less often than every 5 years. Prior to CY 2013, we conducted periodic reviews of work RVUs and PE RVUs independently.

The First Five-Year Review of Work RVUs was published on November 22, 1996 (61 FR 59489) and was effective in 1997. The Second Five-Year Review of Work RVUs was published in the CY 2002 PFS final rule with comment period (66 FR 55246) and was effective in 2002. The Third Five-Year Review of Work RVUs was published in the CY 2007 PFS final rule with comment period (71 FR 69624) and was effective on January 1, 2007. The Fourth Five-Year Review of Work RVUs was published in the CY 2012 PFS final rule with comment period (76 FR 73026).

Initially refinements to the direct PE inputs relied on input from the AMA RUC-established the Practice Expense Advisory Committee (PEAC). Through March 2004, the PEAC provided recommendations to CMS for more than 7,600 codes (all but a few hundred of the codes included in the AMAs Current Procedural Terminology (CPT) codes). As part of the CY 2007 PFS final rule with comment period (71 FR 69624), we implemented a new bottom-up methodology for determining resource-based PE RVUs and transitioned the new methodology over a 4-year period. A comprehensive review of PE was undertaken prior to the 4-year transition period for the new PE methodology from the top-down to the bottom-up methodology, and this transition was completed in CY 2010. In CY 2010, we also incorporated the new PPIS data to update the specialty-specific PE/HR data used to develop PE RVUs, adopting a 4-year transition to PE RVUs developed using the PPIS data.

In the CY 2012 PFS final rule with comment period (76 FR 73057), we finalized a proposal to consolidate reviews of work and PE RVUs under section 1848(c)(2)(B) of the Act and reviews of potentially misvalued codes under section 1848(c)(2)(K) of the Act into one annual process.

In the CY 2005 PFS final rule with comment period (69 FR 66236), we implemented the first Five-Year Review of the MP RVUs (69 FR 66263). Minor modifications to the methodology were addressed in the CY 2006 PFS final rule with comment period (70 FR 70153). The second Five-Year Review and update of resource-based malpractice RVUs was published in the CY 2010 PFS final rule with comment period (74 FR 61758) and was effective in CY 2010.

In addition to the Five-Year Reviews, beginning for CY 2009, CMS and the AMA RUC have identified and reviewed a number of potentially misvalued codes on an annual basis based on various identification screens. This annual review of work and PE RVUs for potentially misvalued codes was supplemented by the amendments to Section 1848 of the Act, as enacted by section 3134 of the Affordable Care Act, which requires the agency to periodically identify, review and adjust values for potentially misvalued codes with an emphasis on the following categories: (1) Codes and families of codes for which there has been the fastest growth; (2) codes or families of codes that have experienced substantial changes in PEs; (3) codes that are recently established for new technologies or services; (4) multiple codes that are frequently billed in conjunction with furnishing a single service; (5) codes with low relative values, particularly those that are often billed multiple times for a single treatment; (6) codes which have not been subject to review since the implementation of the fee schedule (the so-called ''Harvard valued codes''); and (7) other codes determined to be appropriate by the Secretary.

e. Application of Budget Neutrality to Adjustments of RVUs

Budget neutrality (BN) typically requires that expenditures not increase or decrease as a result of changes or revisions to policy. However, section 1848(c)(2)(B)(ii)(II) of the Act requires adjustment only if the change in expenditures resulting from the annual revisions to the PFS exceeds a threshold amount. Specifically, adjustments in RVUs for a year may not cause total PFS payments to differ by more than $20 million from what they would have been if the adjustments were not made. In accordance with section 1848(c)(2)(B)(ii)(II) of the Act, if revisions to the RVUs would cause expenditures to change by more than $20 million, we make adjustments to ensure that expenditures do not increase or decrease by more than $20 million.

2. Components of the Fee Schedule Payment Amounts

To calculate the payment for each physicians' service, the components of the fee schedule (work, PE, and MP RVUs) are adjusted by geographic practice cost indices (GPCIs). The GPCIs reflect the relative costs of physician work, PE, and MP in an area compared to the national average costs for each component.

RVUs are converted to dollar amounts through the application of a CF, which is calculated by CMS' Office of the Actuary (OACT).

The formula for calculating the Medicare fee schedule payment amount for a given service and fee schedule area can be expressed as:

$$\text{Payment} = [(\text{RVU work} \times \text{GPCI work}) + (\text{RVU PE} \times \text{GPCI PE}) + (\text{RVU MP} \times \text{GPCI MP})] \times \text{CF}.$$

3. Most Recent Changes to the Fee Schedule

The CY 2012 PFS final rule with comment period (76 FR 73026) implemented changes to the PFS and other Medicare Part B payment policies. It also finalized many of the CY 2011 interim RVUs and implemented interim RVUs for new and revised codes for CY 2012 to ensure that our payment systems are updated to reflect changes in medical practice and the relative values of services. The CY 2012 PFS final rule with comment period also addressed other policies including certain statutory provisions including provisions of the Affordable Care Act and the Medicare Improvements for Patients and Providers Act (MIPPA) of 2008.

In the CY 2012 PFS final rule with comment period, we announced the

following for CY 2012: the total PFS update of −27.4 percent; the initial estimate for the sustainable growth rate (SGR) of −16.9 percent; and the conversion factor (CF) of $24.6712. These figures were calculated based on the statutory provisions in effect on November 1, 2011, when the CY 2012 PFS final rule with comment period was issued.

A correction notice was issued (77 FR 227) to correct several technical and typographical errors that occurred in the CY 2012 PFS final rule with comment period.

On December 23, 2011, the Temporary Payroll Tax Cut Continuation Act of 2011 (TPTCCA) (Pub. L. 112–78) was signed into law. Section 301 of the TPTCCA specified a zero percent update to the PFS claims from January 1, 2012 through February 29, 2012. As a result, the CY 2012 PFS conversion factor was revised to $34.0376 for claims with dates of service on or after January 1, 2012 through February 29, 2012. In addition, TPTCCA extended several provisions affecting Medicare services furnished on or after January 1, 2012 through February 29, 2012, including:

- Section 303—the 1.0 floor on the physician work geographic practice cost index;
- Section 304—the exceptions process for outpatient therapy caps;
- Section 305—the payment to independent laboratories for the TC of physician pathology services furnished to certain hospital patients, and
- Section 307—the five percent increase in payments for mental health services.

On February 22, 2012, the MCTRJCA was signed into law. Section 3003 extended the zero percent PFS update to the remainder of CY 2012. As a result of the MCTRJCA, the CY 2012 PFS CF was maintained as $34.0376 for claims with dates of service on or after March 1, 2012 through December 31, 2012. In addition:

- Section 3004 of MCTRJCA extended the 1.0 floor on the physician work geographic practice cost index through December 31, 2012;
- Section 3006 continued payment to independent laboratories for the TC of physician pathology services furnished to certain hospital patients through June 30, 2012; and
- Section 3005 extended the exceptions process for outpatient therapy caps through CY 2012 and made several other changes related to therapy claims and caps.

On March 1, 2012, as required by Section 1848(d)(1)(E) of the Act, we submitted to the Medicare Payment Advisory Committee (MedPAC) an estimate of the SGR and conversion factor applicable to Medicare payments for physicians' services for CY 2013. The actual values used to compute physician payments for CY 2013 will be based on later data and are scheduled to be published by November 1, 2012 as part of the CY 2013 PFS final rule.

II. Provisions of the Proposed Rule

A. Resource-Based Practice Expense (PE) Relative Value Units (RVUs)

1. Overview

Practice expense (PE) is the portion of the resources used in furnishing the service that reflects the general categories of physician and practitioner expenses, such as office rent and personnel wages but excluding malpractice expenses, as specified in section 1848(c)(1)(B) of the Act. Section 121 of the Social Security Amendments of 1994 (Pub. L. 103–432), enacted on October 31, 1994, required us to develop a methodology for a resource-based system for determining PE RVUs for each physician's service. We develop PE RVUs by looking at the direct and indirect physician practice resources involved in furnishing each service. Direct expense categories include clinical labor, medical supplies, and medical equipment. Indirect expenses include administrative labor, office expense, and all other expenses. The sections that follow provide more detailed information about the methodology for translating the resources involved in furnishing each service into service-specific PE RVUs. In addition, we note that section 1848(c)(2)(B)(ii)(II) of the Act provides that adjustments in RVUs for a year may not cause total PFS payments to differ by more than $20 million from what they would have otherwise been if the adjustments were not made. Therefore, if revisions to the RVUs cause expenditures to change by more than $20 million, we make adjustments to ensure that expenditures do not increase or decrease by more than $20 million. We refer readers to the CY 2010 PFS final rule with comment period (74 FR 61743 through 61748) for a more detailed explanation of the PE methodology.

2. Practice Expense Methodology

a. Direct Practice Expense

We use a ''bottom-up'' approach to determine the direct PE by adding the costs of the resources (that is, the clinical staff, equipment, and supplies) typically involved with furnishing each service. The costs of the resources are calculated using the refined direct PE inputs assigned to each CPT code in our PE database, which are based on our review of recommendations received from the AMA RUC. For a detailed explanation of the bottom-up direct PE methodology, including examples, we refer readers to the Five-Year Review of Work Relative Value Units Under the PFS and Proposed Changes to the Practice Expense Methodology proposed notice (71 FR 37242) and the CY 2007 PFS final rule with comment period (71 FR 69629).

b. Indirect Practice Expense per Hour Data

We use survey data on indirect PEs incurred per hour worked in developing the indirect portion of the PE RVUs. Prior to CY 2010, we primarily used the practice expense per hour (PE/HR) by specialty that was obtained from the AMA's Socioeconomic Monitoring Surveys (SMS). The AMA administered a new survey in CY 2007 and CY 2008, the Physician Practice Expense Information Survey (PPIS), which was expanded (relative to the SMS) to include nonphysician practitioners (NPPs) paid under the PFS.

The PPIS is a multispecialty, nationally representative, PE survey of both physicians and NPPs using a consistent survey instrument and methods highly consistent with those used for the SMS and the supplemental surveys. The PPIS gathered information from 3,656 respondents across 51 physician specialty and healthcare professional groups. We believe the PPIS is the most comprehensive source of PE survey information available to date. Therefore, we used the PPIS data to update the PE/HR data for almost all of the Medicare-recognized specialties that participated in the survey for the CY 2010 PFS.

When we began using the PPIS data beginning in CY 2010, we did not change the PE RVU methodology itself or the manner in which the PE/HR data are used in that methodology. We only updated the PE/HR data based on the new survey. Furthermore, as we explained in the CY 2010 PFS final rule with comment period (74 FR 61751), because of the magnitude of payment reductions for some specialties resulting from the use of the PPIS data, we finalized a 4-year transition (75 percent old/25 percent new for CY 2010, 50 percent old/50 percent new for CY 2011, 25 percent old/75 percent new for CY 2012, and 100 percent new for CY 2013) from the previous PE RVUs to the PE RVUs developed using the new PPIS data.

Section 1848(c)(2)(H)(i) of the Act requires us to use the medical oncology supplemental survey data submitted in 2003 for oncology drug administration services. Therefore, the PE/HR for medical oncology, hematology, and hematology/oncology reflects the continued use of these supplemental survey data.

We do not use the PPIS data for reproductive endocrinology and spine surgery since these specialties currently are not separately recognized by Medicare, nor do we have a method to blend these data with Medicare-recognized specialty data. Similarly, we do not use the PPIS data for sleep medicine since there is not a full year of Medicare utilization data for that specialty.

Supplemental survey data on independent labs, from the College of American Pathologists, were implemented for payments in CY 2005. Supplemental survey data from the National Coalition of Quality Diagnostic Imaging Services (NCQDIS), representing independent diagnostic testing facilities (IDTFs), were blended with supplementary survey data from the American College of Radiology (ACR) and implemented for payments in CY 2007. Neither IDTFs nor independent labs participated in the PPIS. Therefore, we continue to use the PE/HR that was developed from their supplemental survey data.

Consistent with our past practice, the previous indirect PE/HR values from the supplemental surveys for medical oncology, independent laboratories, and IDTFs were updated to CY 2006 using the MEI to put them on a comparable basis with the PPIS data.

Previously, we have established PE/HR values for various specialties without SMS or supplemental survey data by crosswalking them to other similar specialties to estimate a proxy PE/HR. For specialties that were part of the PPIS for which we previously used a crosswalked PE/HR, we instead use the PPIS-based PE/HR. We continue previous crosswalks for specialties that did not participate in the PPIS. However, beginning in CY 2010 we changed the PE/HR crosswalk for portable x-ray suppliers from radiology to IDTF, a more appropriate crosswalk because these specialties are more similar to each other for physician time.

For registered dietician services, the resource-based PE RVUs have been calculated in accordance with the final policy that crosswalks the specialty to the ''All Physicians'' PE/HR data, as adopted in the CY 2010 PFS final rule with comment period (74 FR 61752) and discussed in more detail in the CY 2011 PFS final rule with comment period (75 FR 73183).

There were five specialties whose utilization data were newly incorporated into ratesetting for CY 2012. In accordance with the final policies adopted in the CY 2012 final rule with comment period (76 FR 73036), we use proxy PE/HR values for these specialties by crosswalking values from other, similar specialties as follows: Speech Language Pathology from Physical Therapy; Hospice and Palliative Care from All Physicians; Geriatric Psychiatry from Psychiatry; Intensive Cardiac Rehabilitation from Cardiology, and Certified Nurse Midwife from Obstetrics/gynecology.

For CY 2013, there are two specialties whose utilization data will be newly incorporated into ratesetting. We are proposing to use proxy PE/HR values for these specialties by crosswalking values from other specialties that furnish similar services as follows: Cardiac Electrophysiology from Cardiology; and Sports Medicine from Family Practice. These proposed changes are reflected in the ''PE HR'' file available on the CMS Web site under the supporting data files for the CY 2013 PFS proposed rule at *http://www.cms.gov/PhysicianFeeSched/*.

As provided in the CY 2010 PFS final rule with comment period (74 FR 61751), CY 2013 is the final year of the 4-year transition to the PE RVUs calculated using the PPIS data. Therefore, the CY 2013 proposed PE RVUs were developed based entirely on the PPIS data, with the exceptions described in this section.

c. Allocation of PE to Services

To establish PE RVUs for specific services, it is necessary to establish the direct and indirect PE associated with each service.

(1) Direct Costs

The relative relationship between the direct cost portions of the PE RVUs for any two services is determined by the relative relationship between the sum of the direct cost resources (that is, the clinical staff, equipment, and supplies) typically involved with furnishing the services. The costs of these resources are calculated from the refined direct PE inputs in our PE database. For example, if one service has a direct cost sum of $400 from our PE database and another service has a direct cost sum of $200, the direct portion of the PE RVUs of the first service would be twice as much as the direct portion of the PE RVUs for the second service.

(2) Indirect Costs

Section II.A.2.b. of this proposed rule describes the current data sources for specialty-specific indirect costs used in our PE calculations. We allocated the indirect costs to the code level on the basis of the direct costs specifically associated with a code and the greater of either the clinical labor costs or the physician work RVUs. We also incorporated the survey data described earlier in the PE/HR discussion. The general approach to developing the indirect portion of the PE RVUs is described as follows:

- For a given service, we use the direct portion of the PE RVUs calculated as previously described and the average percentage that direct costs represent of total costs (based on survey data) across the specialties that furnish the service to determine an initial indirect allocator. For example, if the direct portion of the PE RVUs for a given service was 2.00 and direct costs, on average, represented 25 percent of total costs for the specialties that furnished the service, the initial indirect allocator would be 6.00 since 2.00 is 25 percent of 8.00 and 6.00 is 75 percent of 8.00.
- We then add the greater of the work RVUs or clinical labor portion of the direct portion of the PE RVUs to this initial indirect allocator. In our example, if this service had work RVUs of 4.00 and the clinical labor portion of the direct PE RVUs was 1.50, we would add 6.00 plus 4.00 (since the 4.00 work RVUs are greater than the 1.50 clinical labor portion) to get an indirect allocator of 10.00. In the absence of any further use of the survey data, the relative relationship between the indirect cost portions of the PE RVUs for any two services would be determined by the relative relationship between these indirect cost allocators. For example, if one service had an indirect cost allocator of 10.00 and another service had an indirect cost allocator of 5.00, the indirect portion of the PE RVUs of the first service would be twice as great as the indirect portion of the PE RVUs for the second service.
- We next incorporate the specialty-specific indirect PE/HR data into the calculation. As a relatively extreme example for the sake of simplicity, assume in our previous example that, based on the survey data, the average indirect cost of the specialties furnishing the first service with an allocator of 10.00 was half of the average indirect cost of the specialties furnishing the second service with an indirect allocator of 5.00. In this case, the indirect portion of the PE RVUs of

the first service would be equal to that of the second service.

d. Facility and Nonfacility Costs

For procedures that can be furnished in a physician's office, as well as in a hospital or facility setting, we establish two PE RVUs: facility and nonfacility. The methodology for calculating PE RVUs is the same for both the facility and nonfacility RVUs, but is applied independently to yield two separate PE RVUs. Because Medicare makes a separate payment to the facility for its costs of furnishing a service, the facility PE RVUs are generally lower than the nonfacility PE RVUs.

e. Services With Technical Components (TCs) and Professional Components (PCs)

Diagnostic services are generally comprised of two components: a professional component (PC) and a technical component (TC), each of which may be furnished independently or by different providers, or they may be furnished together as a ''global' service. When services have PC and TC components that can be billed separately, the payment for the global component equals the sum of the payment for the TC and PC. This is a result of using a weighted average of the ratio of indirect to direct costs across all the specialties that furnish the global components, TCs, and PCs; that is, we apply the same weighted average indirect percentage factor to allocate indirect expenses to the global components, PCs, and TCs for a service. (The direct PE RVUs for the TC and PC sum to the global under the bottom-up methodology.)

f. PE RVU Methodology

For a more detailed description of the PE RVU methodology, we refer readers to the CY 2010 PFS final rule with comment period (74 FR 61745 through 61746).

(1) Setup File

First, we create a setup file for the PE methodology. The setup file contains the direct cost inputs, the utilization for each procedure code at the specialty and facility/nonfacility place of service level, and the specialty-specific PE/HR data from the surveys.

(2) Calculate the Direct Cost PE RVUs

Sum the costs of each direct input.

Step 1: Sum the direct costs of the inputs for each service. Apply a scaling adjustment to the direct inputs.

Step 2: Calculate the current aggregate pool of direct PE costs. This is the product of the current aggregate PE (aggregate direct and indirect) RVUs, the CF, and the average direct PE percentage from the survey data.

Step 3: Calculate the aggregate pool of direct costs. This is the sum of the product of the direct costs for each service from Step 1 and the utilization data for that service.

Step 4: Using the results of Step 2 and Step 3 calculate a direct PE scaling adjustment so that the aggregate direct cost pool does not exceed the current aggregate direct cost pool and apply it to the direct costs from Step 1 for each service.

Step 5: Convert the results of Step 4 to an RVU scale for each service. To do this, divide the results of Step 4 by the CF. Note that the actual value of the CF used in this calculation does not influence the final direct cost PE RVUs, as long as the same CF is used in Step 2 and Step 5. Different CFs will result in different direct PE scaling factors, but this has no effect on the final direct cost PE RVUs since changes in the CFs and changes in the associated direct scaling factors offset one another.

(3) Create the Indirect Cost PE RVUs

Create indirect allocators.

Step 6: Based on the survey data, calculate direct and indirect PE percentages for each physician specialty.

Step 7: Calculate direct and indirect PE percentages at the service level by taking a weighted average of the results of Step 6 for the specialties that furnish the service. Note that for services with TCs and PCs, the direct and indirect percentages for a given service do not vary by the PC, TC, and global components.

Step 8: Calculate the service level allocators for the indirect PEs based on the percentages calculated in Step 7. The indirect PEs are allocated based on the three components: the direct PE RVUs, the clinical PE RVUs, and the work RVUs.

For most services the indirect allocator is: Indirect percentage * (direct PE RVUs/direct percentage) + work RVUs.

There are two situations where this formula is modified:

- If the service is a global service (that is, a service with global, professional, and technical components), then the indirect allocator is: Indirect percentage (direct PE RVUs/direct percentage) + clinical PE RVUs + work RVUs.
- If the clinical labor PE RVUs exceed the work RVUs (and the service is not a global service), then the indirect allocator is: indirect percentage (direct PE RVUs/direct percentage) + clinical PE RVUs.

(**Note:** For global services, the indirect allocator is based on both the work RVUs and the clinical labor PE RVUs. We do this to recognize that, for the PC service, indirect PEs will be allocated using the work RVUs, and for the TC service, indirect PEs will be allocated using the direct PE RVUs and the clinical labor PE RVUs. This also allows the global component RVUs to equal the sum of the PC and TC RVUs.)

For presentation purposes in the examples in Table 1, the formulas were divided into two parts for each service.

- The first part does not vary by service and is the indirect percentage (direct PE RVUs/direct percentage).
- The second part is either the work RVUs, clinical PE RVUs, or both depending on whether the service is a global service and whether the clinical PE RVUs exceed the work RVUs (as described earlier in this step).

Apply a scaling adjustment to the indirect allocators.

Step 9: Calculate the current aggregate pool of indirect PE RVUs by multiplying the current aggregate pool of PE RVUs by the average indirect PE percentage from the survey data.

Step 10: Calculate an aggregate pool of indirect PE RVUs for all PFS services by adding the product of the indirect PE allocators for a service from Step 8 and the utilization data for that service.

Step 11: Using the results of Step 9 and Step 10, calculate an indirect PE adjustment so that the aggregate indirect allocation does not exceed the available aggregate indirect PE RVUs and apply it to indirect allocators calculated in Step 8.

Calculate the indirect practice cost index.

Step 12: Using the results of Step 11, calculate aggregate pools of specialty-specific adjusted indirect PE allocators for all PFS services for a specialty by adding the product of the adjusted indirect PE allocator for each service and the utilization data for that service.

Step 13: Using the specialty-specific indirect PE/HR data, calculate specialty-specific aggregate pools of indirect PE for all PFS services for that specialty by adding the product of the indirect PE/HR for the specialty, the physician time for the service, and the specialty's utilization for the service across all services furnished by the specialty.

Step 14: Using the results of Step 12 and Step 13, calculate the specialty-specific indirect PE scaling factors.

Step 15: Using the results of Step 14, calculate an indirect practice cost index at the specialty level by dividing each specialty-specific indirect scaling factor by the average indirect scaling factor for the entire PFS.

Step 16: Calculate the indirect practice cost index at the service level to ensure the capture of all indirect costs. Calculate a weighted average of the practice cost index values for the specialties that furnish the service. (Note: For services with TCs and PCs, we calculate the indirect practice cost index across the global components, PCs, and TCs. Under this method, the indirect practice cost index for a given service (for example, echocardiogram) does not vary by the PC, TC, and global component.)

Step 17: Apply the service level indirect practice cost index calculated in Step 16 to the service level adjusted indirect allocators calculated in Step 11 to get the indirect PE RVUs.

(4) Calculate the Final PE RVUs

Step 18: Add the direct PE RVUs from Step 6 to the indirect PE RVUs from Step 17 and apply the final PE budget neutrality (BN) adjustment.

The final PE BN adjustment is calculated by comparing the results of Step 18 to the current pool of PE RVUs. This final BN adjustment is required in order to redistribute RVUs from step 18 to all PE RVUs in the PFS and because certain specialties are excluded from the PE RVU calculation for ratesetting purposes, but all specialties are included for purposes of calculating the final BN adjustment. (See ''Specialties excluded from ratesetting calculation'' later in this section.)

(5) Setup File Information

• *Specialties excluded from ratesetting calculation:* For the purposes of calculating the PE RVUs, we exclude certain specialties, such as certain nonphysician practitioners paid at a percentage of the PFS and low-volume specialties, from the calculation. These specialties are included for the purposes of calculating the BN adjustment. They are displayed in Table 1.

TABLE 1—SPECIALTIES EXCLUDED FROM RATESETTING CALCULATION

Specialty code	Specialty description
49	Ambulatory surgical center.
50	Nurse practitioner.
51	Medical supply company with certified orthotist.
52	Medical supply company with certified prosthetist.
53	Medical supply company with certified prosthetist-orthotist.
54	Medical supply company not included in 51, 52, or 53.
55	Individual certified orthotist.
56	Individual certified prosthetist.
57	Individual certified prosthetist-orthotist.
58	Individuals not included in 55, 56, or 57.
59	Ambulance service supplier, e.g., private ambulance companies, funeral homes, etc.
60	Public health or welfare agencies.
61	Voluntary health or charitable agencies.
73	Mass immunization roster biller.
74	Radiation therapy centers.
87	All other suppliers (e.g., drug and department stores).
88	Unknown supplier/provider specialty.
89	Certified clinical nurse specialist.
95	Competitive Acquisition Program (CAP) Vendor.
96	Optician.
97	Physician assistant.
A0	Hospital.
A1	SNF.
A2	Intermediate care nursing facility.
A3	Nursing facility, other.
A4	HHA.
A5	Pharmacy.
A6	Medical supply company with respiratory therapist.
A7	Department store.
1	Supplier of oxygen and/or oxygen related equipment.
2	Pedorthic personnel.
3	Medical supply company with pedorthic personnel.

We are proposing to calculate the specialty mix for low volume services (fewer than 100 billed services in the previous year) using the same methodology we use for non-low volume services. We previously have used the survey data from the dominant specialty for these low volume services. However, because these services have such low utilization, the dominant specialty tends to change from year to year. We are proposing to calculate a specialty mix for these services rather than use the dominant specialty in order to smooth year-to-year fluctuations in PE RVUs due to changes in the dominant specialty.

• *Crosswalk certain low volume physician specialties:* Crosswalk the utilization of certain specialties with relatively low PFS utilization to the associated specialties.

• *Physical therapy utilization:* Crosswalk the utilization associated with all physical therapy services to the specialty of physical therapy.

• *Identify professional and technical services not identified under the usual TC and 26 modifiers:* Flag the services that are PC and TC services, but do not use TC and 26 modifiers (for example, electrocardiograms). This flag associates the PC and TC with the associated global code for use in creating the indirect PE RVUs. For example, the professional service, CPT code 93010 (Electrocardiogram, routine ECG with at least 12 leads; interpretation and report only), is associated with the global service, CPT code 93000 (Electrocardiogram, routine ECG with at least 12 leads; with interpretation and report).

• *Payment modifiers:* Payment modifiers are accounted for in the creation of the file consistent with

current payment policy as implemented in claims processing. For example, services billed with the assistant at surgery modifier are paid 16 percent of the PFS amount for that service; therefore, the utilization file is modified to only account for 16 percent of any service that contains the assistant at surgery modifier. Similarly, for those services to which volume adjustments are made to account for the payment modifiers, time adjustments are applied as well. For time adjustments to surgical services, the intraoperative portion in the physician time file is used; where it is not present, the intraoperative percentage from the payment files used by Medicare contractors to process Medicare claims is used instead. Where neither is available, we use the payment adjustment ratio to adjust the time accordingly. Table 2 details the manner in which the modifiers are applied.

TABLE 2—APPLICATION OF PAYMENT MODIFIERS TO UTILIZATION FILES

Modifier	Description	Volume adjustment	Time adjustment
80, 81, 82	Assistant at Surgery	16%	Intraoperative portion.
AS	Assistant at Surgery—Physician Assistant.	14% (85% * 16%)	Intraoperative portion.
50 or LT and RT	Bilateral Surgery	150%	150% of physician time.
51	Multiple Procedure	50%	Intraoperative portion.
52	Reduced Services	50%	50%.
53	Discontinued Procedure	50%	50%.
54	Intraoperative Care only	Preoperative + Intraoperative Percentages on the payment files used by Medicare contractors to process Medicare claims.	Preoperative + Intraoperative portion.
55	Postoperative Care only	Postoperative Percentage on the payment files used by Medicare contractors to process Medicare claims.	Postoperative portion.
62	Co-surgeons	62.5%	50%.
66	Team Surgeons	33%	33%.

We also make adjustments to volume and time that correspond to other payment rules, including special multiple procedure endoscopy rules and multiple procedure payment reductions (MPPR) including the proposed ophthalmology and cardiovascular diagnostic services MPPR discussed in section II.B.4. of this proposed rule. We note that section 1848(c)(2)(B)(v) of the Act exempts certain reduced payments for multiple imaging procedures and multiple therapy services from the budget-neutrality calculation under section 1848(c)(2)(B)(ii)(II) of the Act. These multiple procedure payment reductions are not included in the development of the relative value units.

For anesthesia services, we do not apply adjustments to volume since the average allowed charge is used when simulating RVUs and therefore includes all discounts. A time adjustment of 33 percent is made only for medical direction of two to four cases since that is the only occasion where time units are duplicative.

- *Work RVUs:* The setup file contains the work RVUs from this proposed rule.

(6) Equipment Cost Per Minute

The equipment cost per minute is calculated as:

(1/(minutes per year * usage)) * price * ((interest rate/(1 − (1/((1 + interest rate)∧life of equipment)))) + maintenance)

Where:

minutes per year = maximum minutes per year if usage were continuous (that is, usage = 1); generally 150,000 minutes.

usage = 0.5 is the standard equipment utilization assumption; 0.75 for certain expensive diagnostic imaging equipment (see 74 FR 61753 through 61755 and section II.A.3. of the CY 2011 PFS final rule with comment period).

price = price of the particular piece of equipment.

interest rate = sliding scale (see proposal below)

life of equipment = useful life of the particular piece of equipment.

maintenance = factor for maintenance; 0.05.

The interest rate we have previously used was proposed and finalized during rulemaking for CY 1998 PFS (62 FR 33164). In the CY 2012 proposed rule (76 FR 42783), we solicited comment regarding reliable data on current prevailing loan rates for small businesses. In response to that request, the AMA RUC recommended that rather than applying the same interest rate across all equipment, CMS should consider a ''sliding scale'' approach which varies the interest rate based on the equipment cost, useful life, and SBA (Small Business Administration) maximum interest rates for different categories of loan size and maturity. The maximum interest rates for SBA loans are as follows:

- Fixed rate loans of $50,000 or more must not exceed Prime plus 2.25 percent if the maturity is less than 7 years, and Prime plus 2.75 percent if the maturity is 7 years or more.
- For loans between $25,000 and $50,000, maximum rates must not exceed Prime plus 3.25 percent if the maturity is less than 7 years, and Prime plus 3.75 percent if the maturity is 7 years or more.
- For loans of $25,000 or less, the maximum interest rate must not exceed Prime plus 4.25 percent if the maturity is less than 7 years, and Prime plus 4.75 percent, if the maturity is 7 years or more.

The current Prime rate is 3.25 percent.

Based on that recommendation, for CY 2013, we are proposing to use a ''sliding scale'' approach based on the current SBA maximum interest rates for different categories of loan size (price of the equipment) and maturity (useful life of the equipment). Additionally, we are proposing to update this assumption through annual PFS rulemaking to account for fluctuations in the Prime rate and/or changes to the SBA's formula to determine maximum allowed interest rates.

The effects of this proposal on direct equipment inputs are reflected in the CY 2013 proposed direct PE input database, available on the CMS Web site under the downloads for the CY 2013 PFS proposed rule at *http://www.cms.gov/PhysicianFeeSched/*. Additionally, we note that the proposed PE RVUs included in Addendum B to this proposed rule reflect the RVUs that result from application of this proposal.

(26) Adjusted Indirect	Step 17	= Adj.Ind Alloc * PCI	=(24) * (25)	0.80	12.76	0.37	0.29	0.08	0.22	0.16	0.06
(28) PE RVU	Step 18	=(Adj Dir + Adj Ind) * budn	=((14)+(26)) * budn	1.08	14.19	0.64	0.56	0.08	0.34	0.28	0.06

Note: PE RVUs in table 2, row 28, may not match Addendum B due to rounding. * The direct adj = [current pe rvus * CF * avg dir pct]/[sum direct inputs] = [Step 2]/[Step 3]** The indirect adj = [current pe rvus * avg ind pct]/[sum of ind allocators] = [Step 9]/[Step 10]

Note: The use of any particular conversion factor (CF) in Table 3 to illustrate the PE calculation has no effect on the resulting RVUs.

3. Changes to Direct PE Inputs for Specific Services

In this section, we discuss other specific CY 2013 proposals and changes related to direct PE inputs for specific services. We note that we will address comments on the interim direct PE inputs established in the CY 2012 PFS final rule with comment period in the CY 2013 PFS final rule.

a. Equipment Minutes for Interrogation Device Evaluation Services

It has come to our attention that the pacemaker follow-up system (EQ138) associated with two interrogation device management service codes does not have minutes allocated in the direct PE input database. Based on our analysis of these services, we believe that 10 minutes should be allocated to the equipment for each of the following CPT codes: 93294 (Interrogation device evaluation(s) (remote), up to 90 days; single, dual, or multiple lead pacemaker system with interim physician analysis, review(s) and report(s)), and 93295 (Interrogation device evaluation(s) (remote), up to 90 days; single, dual, or multiple lead implantable cardioverter-defibrillator system with interim physician analysis, review(s) and report(s)). Therefore, we are proposing to modify the direct PE input database to allocate 10 minutes to the pacemaker follow-up system for CPT codes 93294 and 93295.

The proposed CY 2013 direct PE input database reflects these changes and is available on the CMS Web site under the supporting data files for the CY 2013 PFS proposed rule with comment period at *http://www.cms.gov/PhysicianFeeSched/*. We also note that the proposed PE RVUs included in Addendum B to this proposed rule reflect the RVUs that result from application of this proposal.

b. Clinical Labor for Pulmonary Rehabilitation Services (HCPCS Code G0424)

It has come to our attention that the direct PE input database includes 15 minutes of clinical labor time in the nonfacility setting allocated for a CORF social worker/psychologist (L045C) associated with HCPCS code G0424 (Pulmonary rehabilitation, including exercise (includes monitoring), one hour, per session, up to two sessions per day). Based on our analysis of this service, we believe that these 15 minutes should be added to the 15 minutes currently allocated to the Respiratory Therapist (L042B) associated with this service. Therefore, we are proposing to modify the direct PE input database to allocate 15 additional minutes to the Respiratory Therapist (L042B) (for a total of 30 minutes) and delete the CORF social worker/psychologist (L045C) associated with HCPCS code G0424.

The proposed CY 2013 direct PE input database reflects these changes and is available on the CMS Web site under the supporting data files for the CY 2013 PFS proposed rule with comment period at *http://www.cms.gov/PhysicianFeeSched/*. We also note that the proposed PE RVUs included in Addendum B to this proposed rule reflect the RVUs that result from application of this proposal.

c. Transcranial Magnetic Stimulation Services

For CY 2011, the CPT Editorial Panel converted Category III CPT codes 0160T and 0161T to Category I status (CPT codes 90867 (Therapeutic Repetitive Transcranial Magnetic Stimulation (TMS) treatment; initial, including cortical mapping, motor threshold determination, delivery and management), and 90868 (Therapeutic Repetitive Transcranial Magnetic Stimulation (TMS) treatment; subsequent delivery and management, per session)), which were contractor priced on the PFS. For CY 2012, the CPT Editorial Panel modified CPT codes 90867 and 90868, and created CPT code 90869 ((Therapeutic Repetitive Transcranial Magnetic Stimulation (TMS) treatment; subsequent motor threshold re-determination with delivery and management.) In the CY 2012 PFS final rule with comment period, we established interim final values based on refinement of RUC recommended work RVUs, direct PE inputs, and malpractice risk factor crosswalks for these services (76 FR 73201).

Subsequent to the development of interim final PE RVUs, it came to our attention that the application of our usual PE methodology resulted in anomalous PE values for these services. As we explain in section II.A.2.c.2 of this proposed rule with comment period, for a given service, we use the direct costs associated with a service (clinical staff, equipment, and supplies) and the average percentage that direct costs represent of total costs (based on survey data) across the specialties that furnish the service to determine an initial indirect allocator.

For services almost exclusively furnished by one specialty, the average percentage of indirect costs relative to direct costs would ordinarily be used to determine the initial indirect allocator. For specialties that typically incur significant direct costs relative to indirect costs, the initial indirect allocator for their services is generally lower than for the specialties that typically incur lower direct costs relative to indirect costs. Relative to direct costs, the methodology generally allocates a greater proportion of indirect PE to services furnished by psychiatrists, for example, than to services furnished by specialties that typically incur significant direct costs, such as radiation oncologists. In the case of the TMS, however, the direct costs incurred by psychiatrists reporting the codes far exceed the direct costs typical to any other service predominantly furnished by psychiatrists. This drastic difference in the direct costs of TMS relative to most other services furnished by psychiatrists results in anomalous PE values since code-level indirect PE allocation relies on typical resource costs for the specialties that furnish the service. In other words, the amount of indirect PE allocated to TMS services is based on the proportion of indirect expense to direct expense that is typical of other psychiatric services, and is not on par with other services that require similar investments in capital equipment and high-cost, disposable supplies.

Historically, we have contractor-priced services with resource costs that cannot be appropriately valued within the generally applicable PE methodology used to price services across the PFS. Because there is no mechanism to develop appropriate payment rates for these services within our current methodology, we are proposing to contractor price these codes for CY 2013.

d. Spinal Cord Stimulation Trial Procedures in the Nonfacility Setting

Stakeholders have recently brought to our attention that CPT code 63650 (Percutaneous implantation of neurostimulator electrode array, epidural) is frequently furnished in the physician office setting but is not priced in that setting. We note that the valuation of a service under the PFS in particular settings does not address whether those services are medically reasonable and necessary in the case of individual patients, including being furnished in a setting appropriate to the patient's medical needs and condition. However, because these services are being furnished in the nonfacility setting, we believe that CPT code 63650 should be reviewed to establish appropriate nonfacility inputs. We propose to review CPT code 63650 and request recommendations from the AMA RUC and other public commenters

on the appropriate physician work RVUs (as measured by time and intensity), and facility and nonfacility direct PE inputs for this service. We understand that disposable leads comprise a significant resource cost for this service and are currently separately reportable to Medicare for payment purposes when the service is furnished in the physician office setting. Disposable medical supplies are not considered prosthetic devices paid under the Durable Medical Equipment, Prosthetic/Orthotic, and Supplies (DMEPOS) fee schedule and generally are incorporated as nonfacility direct PE inputs to PE RVUs. We seek comment on establishing nonfacililty PE RVUs for CPT code 63650.

B. Potentially Misvalued Codes Under the Physician Fee Schedule

1. Valuing Services Under the PFS

To value services under the PFS, section 1848(c) of the Act requires the Secretary to determine relative values for physicians' services based on three components: work; practice expense (PE); and malpractice. Section 1848(c)(1)(A) of the Act defines the work component to include ''the portion of the resources used in furnishing the service that reflects physician time and intensity in furnishing the service.'' In addition, section 1848(c)(2)(C)(i) of the Act specifies that ''the Secretary shall determine a number of work relative value units (RVUs) for the service based on the relative resources incorporating physician time and intensity required in furnishing the service.''

As discussed in detail in sections I.B.1.b. and I.B.1.c. of this proposed rule, the statute also defines the PE and malpractice components and provides specific guidance in the calculation of the RVUs for each of these components. Section 1848(c)(1)(B) of the Act defines the PE component as ''the portion of the resources used in furnishing the service that reflects the general categories of expenses (such as office rent and wages of personnel, but excluding malpractice expenses) comprising practice expenses.'' Section 1848(c)(1)(C) of the Act defines the malpractice component as ''the portion of the resources used in furnishing the service that reflects malpractice expenses in furnishing the service.'' Sections 1848 (c)(2)(C)(ii) and (iii) of the Act specify that PE and malpractice expense RVUs shall be determined based on the relative PE/malpractice expense resources involved in furnishing the service.

Section 1848(c)(2)(B) of the Act directs the Secretary to conduct a periodic review, not less often than every 5 years, of the RVUs established under the PFS. On March 23, 2010, the Affordable Care Act was enacted, further requiring the Secretary to periodically identify and review potentially misvalued codes and make appropriate adjustments to the relative values of those services identified as being potentially misvalued. Section 3134(a) of the Affordable Care Act added a new section 1848(c)(2)(K) to the Act, which requires the Secretary to periodically identify potentially misvalued services using certain criteria and to review and make appropriate adjustments to the relative values for those services. Section 3134(a) of the Affordable Care Act also added a new section 1848(c)(2)(L) to the Act which requires the Secretary to develop a process to validate the RVUs of certain potentially misvalued codes under the PFS, identified using the same criteria used to identify potentially misvalued codes, and to make appropriate adjustments.

As discussed in section I.B.1.a. of this proposed rule, each year we develop and propose appropriate adjustments to the RVUs, taking into account the recommendations provided by the American Medical Association Specialty Society Relative Value Scale Update Committee (AMA RUC), the Medicare Payment Advisory Commission (MedPAC), and others. For many years, the AMA RUC has provided us with recommendations on the appropriate relative values for new, revised, and potentially misvalued PFS services. We review these recommendations on a code-by-code basis and consider these recommendations in conjunction with analyses of data sources, such as claims data, to inform the decision-making process as authorized by the law. We may also consider analyses of physician time, work RVUs, or direct PE inputs using other data sources, such as Department of Veteran Affairs (VA) National Surgical Quality Improvement Program (NSQIP), the Society for Thoracic Surgeons (STS), and the Physician Quality Reporting Initiative (PQRI) databases. In addition to considering the most recently available data, we also assess the results of physician surveys and specialty recommendations submitted to us by the AMA RUC. We conduct a clinical review to assess the appropriate RVUs in the context of contemporary medical practice. We note that section 1848(c)(2)(A)(ii) of the Act authorizes the use of extrapolation and other techniques to determine the RVUs for physicians' services for which specific data are not available, in addition to taking into account the results of consultations with organizations representing physicians. In accordance with section 1848(c) of the Act, we determine appropriate adjustments to the RVUs, explain the basis of these adjustments, and respond to public comments in the PFS proposed and final rules.

2. Identifying, Reviewing, and Validating the RVUs of Potentially Misvalued Services on the PFS

a. Background
