

Records should be revised to modify Categories of Records in the System, Purpose(s), Retrievability, Retention and Disposal, and the System Manager(s) and Address.

I. Background

In its continuing effort to improve its value-added services, the Postal Service will launch two new programs in 2012. The first will assist business mailers with tracking mail pieces sent to their customers. The tracking of these mail pieces will utilize the 11-digit ZIP Code and/or an Intelligent Mail Barcode. The second will strengthen the digital relationship with consumers and aid all customers with package tracking and visibility within the Postal Service network and through other carrier networks.

Additionally, in June, 2012, the Postal Service made additional management and organizational changes.

II. Rationale for Changes to USPS Privacy Act Systems of Records

The Postal Service is enhancing our customers' visibility of their mailings. The first program will automate the process to provide business mailers with mail piece induction information. The second program will integrate tracking information from multiple carriers.

Lastly, in regards to the system manager title update, there is a continuing need to reflect changes in the identity or title of responsible officials.

III. Description of Changes to Systems of Records

The Postal Service is modifying one system of records listed below. Pursuant to 5 U.S.C. 552a(e)(11), interested persons are invited to submit written data, views, or arguments on this proposal. A report of the proposed modifications has been sent to Congress and to the Office of Management and Budget for their evaluation. The Postal Service does not expect this amended notice to have any adverse effect on individual privacy rights. The affected system is as follows:

USPS 820.200

SYSTEM NAME:

Mail Management and Tracking Activity.

Accordingly, for the reasons stated, the Postal Service proposes changes in the existing system of records as follows:
