Records should be revised to modify Categories of Records in the System, Purpose(s), Retrievability, Retention and Disposal, and the System Manager(s) and Address.

I. Background

In its continuing effort to improve its value-added services, the Postal Service will launch two new programs in 2012. The first will assist business mailers with tracking mail pieces sent to their customers. The tracking of these mail pieces will utilize the 11-digit ZIP Code and/or an Intelligent Mail Barcode. The second will strengthen the digital relationship with consumers and aid all customers with package tracking and visibility within the Postal Service network and through other carrier networks.

Additionally, in June, 2012, the Postal Service made additional management and organizational changes.

II. Rationale for Changes to USPS Privacy Act Systems of Records

The Postal Service is enhancing our customers’ visibility of their mailings. The first program will automate the process to provide business mailers with mail piece induction information. The second program will integrate tracking information from multiple carriers.

Lastly, in regards to the system manager title update, there is a continuing need to reflect changes in the identity or title of responsible officials.
