SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 811(c), provides that a mine operator or a representative of miners may petition the Secretary of Labor (Secretary) to modify the application of a mandatory safety standard. A petition for modification may be granted if the Secretary determines (1) that an alternative method of achieving the results of the standard exists and that it will guarantee, at all times, no less than the same measure of protection for the miners affected as that afforded by the standard, or (2) that the application of the standard will result in a diminution of safety to the miners affected.

Upon receipt of a petition, MSHA publishes a notice in the **Federal Register** advising interested parties that they may provide comments or other relevant information on the proposed modification. Thereafter, MSHA conducts an investigation to determine the merits of the petition for the purpose of deciding whether or not to grant it and, if granted, whether there is a need for any additional terms or conditions. This information collection addresses the recordkeeping associated with 30 CFR 49.9, 44.10, and 44.11.

II. Desired Focus of Comments

The Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to this safety standard on petitions for modification of mandatory safety standards. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;
- Evaluate the accuracy of the MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Address the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submissions of responses) to minimize the burden of the collection of information on those who are to respond.

The public may examine publicly available documents, including the public comment version of the supporting statement, at MSHA, Office of Standards, Regulations, and Variances, 1100 Wilson Boulevard, Room 2350, Arlington, VA 22209-3939. OMB clearance requests are available on MSHA's Web site at <http://www.msha.gov> under "Rules & Regs" on the right side of the screen by selecting *Information Collections Requests, Paperwork Reduction Act Supporting Statements*. The document will be available on MSHA's Web site for 60 days after the publication date of this notice. Comments submitted in writing or in electronic form will be made available for public inspection. Because comments will not be edited to remove any identifying or contact information, MSHA cautions the commenter against including any information in the submission that should not be publicly disclosed. Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

III. Current Actions

The information contained in an approved petition for modification is used by MSHA during inspections to determine compliance with the relevant safety standard. MSHA has updated the data with respect to the number of respondents and responses, as well as the total burden hours and total annual cost burden supporting this information collection extension request.

SUPPLEMENTARY INFORMATION: On June 20, 2012, representatives of the Phase I claimant categories (the "Phase I

Claimants")¹ filed with the Judges a motion requesting a partial distribution of 50% of the 2010 satellite royalty funds pursuant to section 801(b)(3)(C) of the Copyright Act, 17 U.S.C. 801(b)(3)(C). That section requires that the Judges publish a notice in the **Federal Register** seeking responses to the motion for partial distribution to ascertain whether any claimant entitled to receive such fees has a reasonable objection to the requested distribution before ruling on the motion. Consequently, this Notice seeks comments from interested claimants on whether any reasonable objection exists that would preclude the distribution of 50% of the 2010 satellite royalty funds to the Phase I Claimants. The Judges must be advised of the existence and extent of all such objections by the end of the comment period. The Judges will not consider any objections with respect to the partial distribution motion that come to their attention after the close of that period.

The Judges also seek comment on the existence and extent of any controversies to the 2010 satellite royalty funds at Phase I or Phase II with respect to those funds that would remain if the motion for partial distribution is granted.

The Motion of the Phase I Claimants for Partial Distribution is posted on the Copyright Royalty Board Web site at <http://www.loc.gov/crb>.

Dated: July 30, 2012.

Chief U.S. Copyright Royalty Judge.

¹ The "Phase I Claimants" are Program Suppliers, Joint Sports Claimants, Broadcaster Claimants Group, Music Claimants (represented by American Society of Composers, Authors and Publishers, Broadcast Music, Inc., and SESAC, Inc.), and Devotional Claimants. In Phase I of a satellite royalty distribution proceeding, royalties are allocated among certain categories of broadcast programming that have been retransmitted by satellite systems. The categories have traditionally been movies and syndicated television series, sports programming, commercial broadcaster-owned programming, religious programming, and music. Public Television Claimants, Canadian Claimants, and National Public Radio, which traditionally have received Phase I shares of cable royalties, do not claim Phase I shares of the satellite royalty funds. In Phase II of a satellite royalty distribution proceeding, royalties are allocated among claimants within each of the Phase I categories.
