SUPPLEMENTARY INFORMATION: The Prohibited Transaction Class Exemption for Cross-Trades of Securities by Index and Model-Driven Funds permits cross-trades of securities between index and model-driven funds managed by investment managers and among such funds and certain large accounts to which such investment managers act as a trading adviser in connection with a specific portfolio-restructuring program. To ensure managers have complied with exemption requirements, the DOL has included in the exemption certain recordkeeping and disclosure obligations designed to safeguard plan assets by periodically providing information to plan fiduciaries, who generally must be independent about the cross-trading program.

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 811(c), provides that a mine operator or a representative of miners may petition the Secretary of Labor (Secretary) to modify the application of a mandatory safety standard. A petition for modification may be granted if the Secretary determines (1) that an alternative method of achieving the results of the standard exists and that it will guarantee, at all times, no less than the same measure of protection for the miners affected as that afforded by the standard, or (2) that the application of the standard will result in a diminution of safety to the miners affected.

Upon receipt of a petition, MSHA publishes a notice in the **Federal Register** advising interested parties that they may provide comments or other relevant information on the proposed modification. Thereafter, MSHA conducts an investigation to determine the merits of the petition for the purpose of deciding whether or not to grant it and, if granted, whether there is a need for any additional terms or conditions. This information collection addresses the recordkeeping associated with 30 CFR 49.9, 44.10, and 44.11.

II. Desired Focus of Comments

The Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to this safety standard on petitions for modification of mandatory safety standards. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;
- Evaluate the accuracy of the MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Address the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submissions of responses) to minimize the burden of the collection of information on those who are to respond.
