SUPPLEMENTARY INFORMATION: The two meetings will be conducted jointly by the NRC and FEMA, to solicit input from stakeholders and interested members of the public on the scope of a proposed revision to "Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants," NUREG-0654/FEMA-REP-1, Rev. 1. The document is available online at <http://www.regulations.gov> (Docket ID FEMA-2012-0026).

NUREG-0654/FEMA-REP-1, Rev.1 is a joint NRC/FEMA policy document that provides guidance on the sixteen Planning Standards referenced in FEMA's regulations at 44 CFR 350.5, and the NRC's regulations at 10 CFR part 50. Both agencies use these Planning Standards, and associated Evaluation Criteria, to evaluate the adequacy of emergency preparedness plans of commercial nuclear power plant owners and operators, and the State, local, and Tribal jurisdictions in which commercial nuclear power plants are sited.

Since the publication of NUREG-0654/FEMA-REP-1, Rev.1 in November 1980, four supplementary documents and one addendum have been issued that update and modify specific planning and procedural elements. These documents are available online at <http://www.regulations.gov> (Docket ID FEMA-2012-0026). Considering stakeholder interest and the various emergency planning and preparedness lessons learned since its initial publication, FEMA and the NRC are considering revising NUREG-0654/FEMA-REP-1, Rev.1.

The purpose of these public meetings is to: (1) Solicit input from stakeholders and interested members of the public on the scope of future revisions to NUREG-0654/FEMA-REP-1, Rev.1; (2) describe the proposed timeline for the revisions to NUREG-0654/FEMA-REP-1, Rev.1; and (3) promote transparency, public participation, and collaboration during the NUREG-0654/FEMA-REP-1, Rev.1 revision process. To make oral statements at the public meeting, please send a request to the contact person listed under the **FOR FURTHER INFORMATION CONTACT** section by close of business August 17, 2012 for the first meeting and by September 7, 2012 for the second meeting.

II. Background

Generally, plantings such as trees, shrubs, and other vegetation are not eligible for replacement under Section 406 of the Robert T. Stafford Relief and Emergency Disaster Assistance Act (Stafford Act) (Repair, Restoration, and Replacement of Damaged Facilities). FEMA acknowledges the economic and environmental benefits of replacing trees, shrubs, and other plantings, but has determined that replacement of trees, shrubs, and other plantings damaged or destroyed by a disaster does not impact essential services. This policy defines ineligible work related to trees, shrubs, and other plantings, and defines the limited eligibility for replacement of grass and sod associated with facilities eligible for repair and restoration.

Limited instances when plantings are eligible include grass and sod replacement if it is an integral part of the repair of an eligible recreational facility (e.g., publicly owned football, soccer, baseball fields, golf courses); plantings when they are part of an emergency protective measure or the repair of an eligible facility for the purposes of stabilizing slopes (including dunes on eligible improved beaches), erosion control, or minimizing sediment runoff; and plantings required for the mitigation of environmental impacts such as impacts to wetlands or endangered species habitat. Eligibility of the above plantings is limited to plantings that are required under a Federal, State, Tribal, or local government code or regulation.

This policy was previously issued on July 18, 2007. The policy was reviewed according to the established schedule for FEMA Public Assistance policies.
