SUPPLEMENTARY INFORMATION:

Background

The Act (16 U.S.C. 1531 *et seq.*) prohibits activities with endangered and threatened species unless a Federal

permit allows such activity. Along with our implementing regulations in the Code of Federal Regulations (CFR) at 50 CFR 17, the Act provides for permits, and requires that we invite public comment before issuing these permits.

A permit granted by us under section 10(a)(1)(A) of the Act authorizes applicants to conduct activities with U.S. endangered or threatened species for scientific purposes, enhancement of propagation or survival, or interstate commerce (the latter only in the event that it facilitates scientific purposes or enhancement of propagation or survival). Our regulations implementing section 10(a)(1)(A) for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Documents and other information the applicants have submitted with these applications are available for review, subject to the requirements of the Privacy Act (5 U.S.C. 552a) and Freedom of Information Act (5 U.S.C. 552).

Permit Application Number: 79842A

National Environmental Policy Act (NEPA)

In compliance with the NEPA (42 U.S.C. 4321 *et seq.*), we have made an initial determination that the proposed activities in these permits are

categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement (516 DM 6 Appendix 1, 1.4C(1)).

SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we continue the CCP process for Presquile NWR. We published our original notice of intent to prepare a CCP in the **Federal Register** on April 14, 2011 (76 FR 21001).

The 1,329-acre Presquile NWR is an island in the James River near Hopewell, Virginia, 20 miles southeast of Richmond. It was established in 1953 as "an inviolate sanctuary, or for any other management purpose, for migratory birds." It is one of many important migratory bird stopover sites along the Atlantic Flyway and provides protected breeding habitat for Federal and State-listed threatened and endangered species, as well as many neotropical migrant bird species. The refuge is comprised of a variety of wildlife habitats, including the open waters of the James River, tidal swamp forest, tidal freshwater marshes, grasslands, mixed mesic forest, and river escarpment.
