SUPPLEMENTARY INFORMATION:

Subject of Challenge Competition

ONC's Managing Meds Video Challenge invites you to create short, inspiring videos sharing how you use technology to manage your medications effectively or support individuals to take their medications as directed, improving patient health and safety.

If you are a consumer or patient, you can participate by creating a video demonstrating how you can use technology for medication management. For example, you could describe:

- E-prescribing tools your provider uses to send your order directly to the pharmacy so it's ready when you arrive and to avoid potential medication errors from illegible handwriting on a paper script.
- Electronic tools such as mobile apps that help you keep track of the medications you are taking and when it's time to take them, or that notify you when it's time to refill a prescription so you don't run out of your meds.
- Emailing your provider in between visits to notify them you've stopped taking the medication that was prescribed because of side effects.
- Logging on to your provider's portal and viewing your list of medications on file and sending a request to update the list to reflect which meds you are no longer taking or may have been prescribed by another doctor.

If you are a health care provider, such as a doctor, nurse or pharmacist, you

can also participate by demonstrating how you use health information technology (health IT), such as e-prescribing and electronic health record systems, to support prescribing patients the right medications and dosage, and to prevent drug-drug interactions.
