

DEPARTMENT OF TRANSPORTATION**Federal Transit Administration****Bus and Bus Facilities Discretionary Program Funds**

AGENCY: Federal Transit Administration (FTA), DOT.

ACTION: Bus Livability and State of Good Repair Initiatives: Announcement of Project Selections.

SUMMARY: The U.S. Department of Transportation's (DOT) Federal Transit Administration (FTA) announces the selection of capital projects for the State of Good Repair (SGR) and Bus Livability (BLIV) initiatives funded under the Section 5309 Bus and Bus Facilities program, which is authorized by 49 U.S.C. 5309(b), as amended by Section 3011 of the Safe, Affordable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), Public Law 109-59, August 10, 2005.

On February 7, 2012, FTA published a Notice of Funding Availability (NOFA) for its State of Good Repair and Bus Livability Initiatives (77 FR 6178). The NOFA explained the requirements and procedures for eligible applicants to apply for the funds made available by the Surface and Air Transportation Programs Extension Act of 2011. In sum, the FY 2012 State of Good Repair Initiative made available approximately \$650 million of Section 5309 Bus and Bus Facilities Program funds. The NOFA indicated FTA's intent to award the funds for capital investments aimed at replacing or rehabilitating transit infrastructure for buses, bus facilities, bus-related equipment, and transit asset management systems. The FY 2012 Bus Livability Initiative made available approximately \$125 million of Section 5309 Bus and Bus Facilities Program funds. As outlined in the NOFA, the Section 5309 funds would be awarded for capital investments for buses, bus facilities, and bus related equipment.

FOR FURTHER INFORMATION CONTACT:

Successful applicants should contact the appropriate FTA Regional office for specific information regarding applying for the funds. A list of Regional offices can be found at www.fta.dot.gov.

Unsuccessful applicants may contact FTA to arrange a proposal debriefing within 30 days of this announcement; SGR applicants may contact Sam Snead, Office of Program Management at (202)

366-1089, email:

samuel.snead@dot.gov; BLIV applicants may contact Bryce McNitt, Office of Budget and Policy at (202) 366-2618, email: bryce.mcnitt@dot.gov. For general program information on the Bus and Bus Facilities Program, contact Samuel Snead, A TDD is available at 1-800-877-8339 (TDD/FIRS).

SUPPLEMENTARY INFORMATION:

State of Good Repair Program: In response to its NOFA, FTA received 568 eligible proposals requesting \$2.99 billion in federal funds, indicating significant demand for funds. The proposals came from 48 states plus the District of Columbia, Puerto Rico, and the Virgin Islands. Project proposals were evaluated based on the criteria detailed in the February 2, 2012 NOFA. FTA is funding 194 projects for a total of \$651.7 million, including 13 asset management projects. The selected projects shown in Table 1 will provide funds to help maintain the nation's public transportation bus fleet, infrastructure, and equipment in a state of good repair. Funds must be used consistent with the competitive proposal and for the eligible purposes defined under 49 U.S.C. 5309(b)(3).

Bus Livability Program: In response to the NOFA, FTA received 266 eligible proposals requesting \$1.03 billion in federal funds, indicating significant demand for funds. The proposals came from 47 states plus the District of Columbia. Project proposals were evaluated based on the criteria detailed in the February 2, 2012 NOFA. FTA is funding 61 projects for a total of approximately \$135.6 million. The selected projects shown in Table 2 will provide mobility choices, improve economic competitiveness, support existing communities, create partnerships and enhance the value of communities and neighborhoods. Funds must be used consistent with the competitive proposal and for the eligible purposes defined under 49 U.S.C. 5309(b)(3). In selecting projects for funding using Bus Program funds, FTA ensured that at least 5.5 percent of the FY 2012 Section 5309 funds, or \$6.9 million, is being allocated to projects that are not in urbanized areas.

Project Implementation: Grantees selected for competitive discretionary funding should work with their FTA regional office to finalize the grant application in FTA's Transportation

Electronic Award Management system (TEAM) so that funds can be obligated expeditiously. Grant applications must only include eligible activities applied for in the original project application. In cases where the allocation amount is less than the proposer's requested amount, grantees should work with the regional office to reduce scope or scale the project such that a complete phase or project is accomplished. A discretionary project identification number has been assigned to each project for tracking purposes and must be used in the TEAM application. Selected projects have pre-award authority no earlier than July 23, 2012. Pre-award authority is also contingent upon other requirements, such as planning and environmental, having been met.

For more about FTA's policy on pre-award authority, please see the FTA Fiscal Year 2012 Apportionments, Allocations, and Program notice found in 77 FR 1785 (January 11, 2012). Additionally, for the Bus Livability projects, although several projects contained related housing or livable communities' initiatives, FTA funds may only be used for eligible purposes defined under 49 U.S.C. 5309(b)(3) and described in FTA C. 9030.1D. For any Bus Livability projects that will be implemented as a joint-development project, please also refer to the agency's joint-development guidance found in 72 FR 5788 (February 7, 2007) for more information.

Post-award reporting requirements include submission of the Financial Federal Report and Milestone reports in TEAM as appropriate (see FTA.C.5010.1D). The grantee must comply with all applicable Federal statutes, regulations, executive orders, FTA circulars, and other Federal administrative requirements in carrying out the project supported by the FTA grant. FTA emphasizes that grantees must follow all third-party procurement guidance, as described in FTA.C.4220.1F. Funds allocated in this announcement must be obligated in a grant by September 30, 2014.

Issued in Washington, DC, this August 3, 2012.

Peter Rogoff,
Administrator.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[U.S. DOT Docket No. NHTSA-2012-0094]

Reports, Forms, and Record Keeping Requirements

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Request for public comment on proposed collection of information.

SUMMARY: Before a Federal agency can collect certain information from the public, it must receive approval from the Office of Management and Budget (OMB). Under procedures established by the Paperwork Reduction Act of 1995, before seeking OMB approval, Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatements of previously approved collections.

This document describes the collection of information for which NHTSA intends to seek OMB approval.

DATES: Comments must be received on or before October 15, 2012.

ADDRESSES: You may submit comments identified by DOT Docket ID Number NHTSA-2012-0094 using any of the following methods:

Electronic submissions: Go to <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.

Mail: Docket Management Facility, M-30, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12-140, Washington, DC 20590.

Hand Delivery: West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1-202-493-2251.

Instructions: Each submission must include the Agency name and the Docket number for this Notice. Note that all comments received will be posted without change to <http://www.regulations.gov> including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Mr. Alan Block, Contracting Officer's Technical Representative, Office of Behavioral Safety Research (NTI-131), National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE., W46-499, Washington, DC

20590. Mr. Block's phone number is 202-366-6401 and his email address is alan.block@dot.gov

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995, before an agency submits a proposed collection of information to OMB for approval, it must publish a document in the *Federal Register* providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has promulgated regulations describing what must be included in such a document. Under OMB's regulations (at 5 CFR 1320.8(d)), an agency must ask for public comment on the following:

(i) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) How to enhance the quality, utility, and clarity of the information to be collected; and

(iv) How to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

In compliance with these requirements, NHTSA asks public comment on the following proposed collection of information:

Survey of DWI Courts

Type of Request—New information collection requirement.

OMB Clearance Number—None.

Form Number—NHTSA 1175.

Requested Expiration Date of Approval—3 years from date of approval.

Summary of the Collection of Information—The National Highway Traffic Safety Administration (NHTSA) proposes to collect information from specialized (or problem solving) courts known as DWI Courts and Hybrid DWI/Drug Courts to obtain an inventory of their current operational practices. All known operating DWI Courts and Hybrid DWI/Drug Courts will be contacted by mail and/or email and asked to go to a designated Web site to fill out the questionnaire. The most recent figures (from the National Association of Drug Court Professionals (NADCP)) show 598 Courts operating in the United States that are either

designated DWI Courts (192) or else Hybrid DWI/Drug Courts (406) as of December 2010. That number is projected to increase to approximately 650 Courts by the time the survey is ready to enter the field. The survey will ask about case flow, eligibility criteria, management information systems, program staffing, treatment, testing, courtroom practices, sanctions, and other relevant program characteristics. The average amount of time for respondents to complete the survey is estimated to be 40 minutes.

The survey will be conducted on-line, with the on-line technology serving to reduce length and minimize recording errors. No information will be collected that could be used to identify any clients participating in the court programs. The information provided will either describe program practices/characteristics, or provide information aggregated across all cases.

Description of the Need for the Information and Proposed Use of the Information—NHTSA was established to reduce the number of deaths, injuries, and economic losses resulting from motor vehicle crashes on the Nation's highways. As part of this statutory mandate, NHTSA is authorized to conduct research as a foundation for the development of motor vehicle standards and traffic safety programs.

DWI Courts are a relatively new intervention to combat alcohol-impaired driving and are authorized under MAP-21, the current DOT authorization. Borrowing from the Drug Court Model, they are directed at repeat offenders and offenders having high blood alcohol concentration levels (BACs) at time of arrest. These Courts attack the source of the problem by taking a comprehensive approach to changing behavior that includes treatment. There is a body of research that now exists to show that Drug Courts are effective. However, Drug Courts and DWI Courts may treat different populations, and questions about the effectiveness of DWI Courts and their services have yet to be adequately answered. NHTSA is presently designing a program to evaluate DWI Courts to directly answer key questions pertaining to their effectiveness. But in order to do that, the agency first needs detailed information on how the DWI Courts are operating.

NHTSA will use the findings from this proposed collection of information to guide the design of an evaluation program to answer key questions regarding the effectiveness of DWI Courts.

Description of the Likely Respondents (Including Estimated Number, and Proposed Frequency of Response to the
