Consult With Other Agencies & the Public

NSF has not consulted with other agencies but has gathered information from its grantee community through attendance at PI conferences. A request for public comments will be solicited through announcement of data collection in the **Federal Register**.

Background

All NSF grantees are required to use the FastLane Project Reports System for reporting progress, accomplishments, participants, and activities annually and at the conclusion of their project. Information from annual and final reports provides yearly updates on project inputs, activities, and outcomes for agency reporting purposes. If project participants include undergraduate students supported by the Research Experiences for Undergraduates (REU) Sites Program or by an REU Supplement, then the grantees and their students are required to complete the REU Reporting Module.

Respondents: Individuals (Principal Investigators and REU undergraduate student participants).

Number of Principal Investigator Respondents: 2,000.

Burden on the Public: 650 total hours.

Number of REU Student Participant Respondents: 7,250.

Burden on the Public: 1,810 total hours.

Dated: August 14, 2012.

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC-2012-0166]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of pending NRC action to submit an information collection request to the Office of Management and Budget (OMB) and solicitation of public comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) invites public

comment about our intention to request the OMB's approval for renewal of an existing information collection that is summarized below. We are required to publish this notice in the **Federal Register** under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* NRC's Policy Statement Cooperation with States at Commercial Nuclear Power Plants and Other Nuclear Production and Utilization Facilities

2. *Current OMB approval number:* 3150-0163.

3. *How often the collection is required:* On occasion, when a State wishes to observe NRC inspections or perform inspections for the NRC.

4. *Who is required or asked to report:* Nuclear Power Plant Licensees, Materials Security Licensees and those States interested in observing or performing inspections.

5. *The number of annual respondents:* 55.

6. *The number of hours needed annually to complete the requirement or request:* 1,000.

7. *Abstract:* States are involved and interested in monitoring the safety status of nuclear power plants and radioactive materials. This involvement is, in part, in response to the States' public health and safety responsibilities and, in part, in response to their citizens' desire to become more knowledgeable about the safety of nuclear power plants and radioactive materials. States have identified NRC inspections as one possible source of knowledge for their personnel regarding plant and materials licensee activities, and the NRC, through the policy statement on Cooperation with States, has been amenable to accommodating the States' needs in this regard. Additionally, the NRC has entered into reimbursable Agreements with certain States under Section 274i of the Act, as amended, to employ their resources to conduct radioactive materials security inspections against NRC Orders.

Submit, by October 16, 2012, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated

collection techniques or other forms of information technology?
