

with the Sam Rayburn and Robert D. Willis Dams, two Corps projects that are isolated hydraulically, electrically, and financially from the Integrated System, are repaid by separate rate schedules.

Following Department of Energy guidelines, Southwestern prepared a 2012 Current Power Repayment Study using the existing Sam Rayburn Dam Project rate schedule. The PRS shows the cumulative amortization through FY 2011 at \$24,993,504 on a total investment of \$30,254,778. The FY 2012 Revised Power Repayment Study indicates the need for an increase in annual revenues of \$193,896, or 4.9 percent, to meet repayment criteria.

Southwestern proposes to defer the indicated rate adjustment because it falls within Southwestern's plus-or-minus five percent isolated project rate adjustment threshold and extend the current rate through September 30, 2013. The threshold was developed to add efficiency to the process of maintaining adequate rates and is consistent with cost recovery criteria within DOE Order Number RA 6120.2 regarding rate adjustment plans. The extension is required because the current rate expires September 30, 2012. Southwestern proposes to defer this rate adjustment of 4.9 percent, or \$193,896 per year in accordance with Southwestern's isolated project rate adjustment threshold, extend the current rate through September 30, 2013, and reevaluate the ability of the existing rate to provide sufficient revenues to satisfy costs projected in the FY 2013 Power Repayment Studies.

On March 30, 2009, the current rate schedule for the Sam Rayburn Dam Project was confirmed and approved by the FERC on a final basis for a period that ends September 30, 2012. In accordance with title 10, part 903, subpart A of the Code of Federal Regulations (10 CFR part 903) sections 903.22(h) and 903.23(a)(3), the Deputy Secretary may extend existing rates on an interim basis beyond the period specified by the FERC. As a result of the benefits obtained by a rate adjustment deferral (reduced Federal expense and rate stability) and the Deputy Secretary's authority to extend a previously approved rate, Southwestern's Administrator is proposing to extend the current Sam Rayburn Dam Project rate schedule. The schedule is to be effective for the one-year period beginning October 1, 2012, and extending through September 30, 2013.

Opportunity is presented for Southwestern's customers and other interested parties to receive copies of the study data for the Sam Rayburn Dam Project. If you desire a copy of the

repayment study data package for the Sam Rayburn Dam Project, submit your request to the Director, Division of Resources and Rates, Office of Corporate Operations, Southwestern Power Administration, One West Third, Tulsa, OK 74103, (918) 595-6680 or via email to [swparates@swpa.gov](mailto:swparates@swpa.gov).

Following review and consideration of the written comments, Southwestern will submit a rate action proposal for the Sam Rayburn Dam Project to the Deputy Secretary of Energy for confirmation and approval.

Dated: August 9, 2012.

**Title:** Data Reporting Requirements for State and Local Vehicle Emission Inspection and Maintenance (I/M) Programs (Renewal).

**ICR numbers:** EPA ICR No. 1613.04, OMB Control No. 2060-0252.

**ICR Status:** This ICR is scheduled to expire on August 31, 2012. Under OMB

regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** To provide general oversight and support to state and local I/M programs, the Transportation and Climate Division (TCD), Office of Transportation and Air Quality, Office of Air and Radiation, U. S. Environmental Protection Agency, requires that state or local program management for both basic and enhanced I/M programs prepare and submit two varieties of reports to EPA. The first reporting requirement is the submittal of an annual report providing general program operating data and summary statistics, addressing the program's current design and coverage; a summary of testing data, enforcement program efforts, quality assurance and quality control efforts; and other miscellaneous information allowing for an assessment of the program's relative effectiveness. The second reporting requirement is a biennial report on any changes to the program over the two-year period and the impact of such changes, including any weaknesses discovered and corrections made or planned.

General program effectiveness is determined by the degree to which a program misses, meets, or exceeds the emission reductions committed to in the state's approved SIP, which, in turn, must meet or exceed the minimum emission reductions expected from the relevant performance standard, as promulgated under EPA's revisions to 40 CFR part 51, in response to requirements established in section 182 of the Clean Air Act Amendments of 1990. This information will be used by EPA to determine a program's progress toward meeting requirements under 40 CFR part 51, as well as to assess national trends in the area of basic and enhanced I/M programs and to provide background information in support of periodic site visits and evaluations.

**Burden Statement:** The annual public reporting and recordkeeping burden for

this collection of information is estimated to average 86 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

**Respondents/Affected Entities:**

**Estimated Number of Respondents:** 28.

**Frequency of response:** Annual and Biennial.

**Estimated Total Annual Hour Burden:** 2,408 hours.

**Estimated Total Annual Cost:** \$144,564. This includes an estimated burden cost of \$144,564 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

**Changes in the Estimates:** There is a decrease of 482 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to (1) a mathematical error discovered in the previous ICR renewal; and (2) a decrease in the number of respondents due to areas redesignating to attainment for the criteria pollutant(s) that triggered the original I/M program requirement and either dropping the program or converting the program to a maintenance measure.
