Estimated Number and Description of Respondents: Approximately 50 University or College faculty annually and approximately 45 State Geological Surveys.

Annual Burden Hours: 5,220 hours.

Estimated Annual Reporting and Recordkeeping “Hour” Burden: We expect to receive approximately 50 applications for EDMAP and 45 applications for STATEMAP each year which takes each applicant approximately 36 hours to complete, totaling 3,420 hours. This includes the time for project conception and development, proposal writing and reviewing, and submitting a project narrative through Grants.gov. We expect to issue 45 EDMAP and 45 STATEMAP grants per year. The grant recipients are also required to submit a final technical report which takes each grant recipient approximately 20 hours to complete, totaling 1,800 hours.

Estimated Annual Reporting and Recordkeeping “Non-Hour Cost”**: We have not identified any “non-hour cost” burdens associated with this collection of information.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, et seq.) provides that an agency may not conduct or sponsor and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Comments: To comply with the public consultation process, on February 27, 2012, we published a Federal Register notice (77 FR 11565) announcing our intent to submit this information collection to OMB for approval. In that notice we solicited public comments for 60 days, ending on April 27, 2012. The USGS received one comment. The comment was a general invective about the Federal government. It did not address, and was not germane to, this information collection. Therefore, we have not changed the collection in response to the comment.

We again invite comments concerning this IC on: (a) Whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) the accuracy of the agency’s estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, usefulness, and clarity of the information to be collected; and (d) ways to minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology. Please note that any comments submitted in response to this notice are a matter of public record.

Before including your address, phone number, email address or other personal identifying information in your comment, you should be aware that your entire comment including your personal identifying information, may be made publically available at any time. While you can ask OMB to withhold your personal identifying information from public review, we cannot guarantee that will be done.

Dated: August 20, 2012.

Douglas A. Howard, Associate Program Coordinator, National Cooperative Geologic Mapping Program.

The Tribe proposes to take into trust 164.22 acres of land located within the municipal limits of the City of South Bend, Indiana pursuant to Section 6 of the Pokagon Restoration Act (25 U.S.C. 1300–5). The proposed trust acquisition of the property is for the development of a Tribal Village, which will include 44 housing units, a multi-purpose facility, health service and other tribal government facilities. Proposed development for the property also includes a Class III gaming facility with a hotel, restaurants, meeting space, and a parking garage.

The property is located approximately 5.25 miles from Interstate 80/90 and approximately 2.5 miles southwest of downtown South Bend and consists of 17 contiguous parcels of land that are bounded on the northwest by Indiana State Road 23, on the southwest by U.S. Highway 31/20, and on the east by Locust Street. The site of the gaming facility is proposed to be accessible from Indiana State Road 23 and the Tribal Village is proposed to be accessible from Locust Road.

The purpose of the proposed action is to improve access to essential tribal government services, provide housing, economic development, and employment opportunities for the Pokagon Band tribal community residing in northern Indiana. Areas of environmental concern so far identified that the EIS will address include soils and geology, air quality, water supply, wastewater and storm water, biological resources, traffic and transportation, cultural and historic resources, socioeconomics, public health and safety, noise, and visual resources/aesthetics. Alternatives identified for analysis include the proposed action, a no-action alternative, a non-gaming alternative, and an alternate gaming site.
alternative. The range of issues addressed in the EIS may also be revised based on comments received at the public scoping meeting and in response to this notice. The Tribe consists of approximately 4,400 members and is governed by a Tribal Council under a constitution. The United States presently holds approximately 2,883 acres of land in the lower peninsula of the State of Michigan in trust for the Tribe.

Public Comment Availability

Comments, including names and addresses of respondents, will be available for public review at all of the mailing addresses shown in the ADDRESSES section (except those for the public meetings) during business hours, 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request your comment to exclude personal identifying information from public review, BIA cannot guarantee our ability to do so under the guidelines of the Freedom of Information Act.

Authority

This notice is published in accordance with section 1503.1 of the Council of Environmental Quality regulations (40 CFR parts 1500 through 1508) and Sec. 46.305 of the Department of Interior Regulations (43 CFR part 46) implementing the procedural requirements of the National Environmental Policy Act of 1969, as amended (NEPA), and the Federal Land Policy and Management Act of 1976, as amended (FLPMA), the Bureau of Land Management (BLM) Cedar City Field Office, Cedar City, Utah, intends to prepare an Environmental Assessment (EA) and possible Resource Management Plan (RMP) amendment and by this notice is announcing the beginning of the scoping process to solicit public comments and identify issues.

DATES: This notice initiates the public scoping process for the EA and possible RMP amendment. Comments on issues may be submitted in writing until September 24, 2012. The date(s) and location(s) of any scoping meetings will be announced at least 15 days in advance through local media, newspapers and the BLM Web site at: https://www.ut.blm.gov/enbb/index.php. In order to be included in the EA, all comments must be received prior to the close of the scoping period or 14 days after the last public meeting, whichever is later.

ADDRESSES: You may submit comments related to the Cameron to Milford—138 kV Transmission Line Project and Possible Amendment to the Cedar Beaver Garfield Antimony Resource Management Plan for the Cedar City Field Office, Cedar City, UT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent.

SUMMARY: In compliance with the National Environmental Policy Act of 1969, as amended (NEPA), and the Federal Land Policy and Management Act of 1976, as amended (FLPMA), Rocky Mountain Power has identified alternative routes between the two substations. These routes would affect Federal, State, and private lands. The requested ROW width on Federal lands is 60 feet except for a portion of one alternative route. The requested width for that portion is 100 feet where it passes over steep terrain. Rocky Mountain Power proposes to use predominately single wood pole structures, approximately 55 to 90 feet in height with average spans between poles of 350 to 500 feet. No new permanent roads would be constructed. Temporary spur routes approximately 12 feet wide and temporary workspace would be needed during construction for material storage, conductor-tensioning sites, and to accommodate vehicles and equipment.

Authorization of this proposal may require amending the Cedar Beaver Garfield Antimony RMP, approved in 1986, by changing approximately 594 acres of an existing 27,494-acre Visual Resource Management (VRM) Class II to Class III or IV. This would occur in the Mineral Mountains along the existing Pass Road, which is a Beaver County, Utah, recorded Class B Road. By this notice, the BLM is complying with the requirements in 43 CFR 1610.2(c) to notify the public of potential amendments to land use plans.

Notice of Intent To Prepare an Environmental Assessment for the Proposed Cameron to Milford—138 kV Transmission Line Project and Possible Amendment to the Cedar Beaver Garfield Antimony Resource Management Plan for the Cedar City Field Office, Cedar City, UT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent.

SUMMARY: In compliance with the National Environmental Policy Act of 1969, as amended (NEPA), and the Federal Land Policy and Management Act of 1976, as amended (FLPMA), the Bureau of Land Management (BLM) Cedar City Field Office, Cedar City, Utah, intends to prepare an Environmental Assessment (EA) and possible Resource Management Plan (RMP) amendment and by this notice is announcing the beginning of the scoping process to solicit public comments and identify issues.

DATES: This notice initiates the public scoping process for the EA and possible RMP amendment. Comments on issues may be submitted in writing until September 24, 2012. The date(s) and location(s) of any scoping meetings will be announced at least 15 days in advance through local media, newspapers and the BLM Web site at: https://www.ut.blm.gov/enbb/index.php. In order to be included in the EA, all comments must be received prior to the close of the scoping period or 14 days after the last public meeting, whichever is later.

ADDRESSES: You may submit comments related to the Cameron to Milford—138 kV Transmission Line Project by any of the following methods:

• Email: kkunze@blm.gov.

• Fax: 435–865–3058.

• Mail: Bureau of Land Management, Cedar City Field Office, 176 East DL Sargent Drive, Cedar City, Utah 84721, ATTN: Karen McAdams-Kunze.

Documents pertinent to this proposal may be examined at the Cedar City Field Office.

FOR FURTHER INFORMATION CONTACT: For further information and/or to have your name added to our mailing list, contact Karen McAdams-Kunze, telephone 435–865–3073; Bureau of Land Management, Cedar City Field Office, 176 East DL Sargent Drive, Cedar City, Utah; email kkunze@blm.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The applicant PacifiCorp, doing business as Rocky Mountain Power, has requested a right-of-way (ROW) authorization to construct, operate, maintain, and decommission a 138 kV single-circuit overhead transmission line on Federal lands. The project would provide an additional 27 megawatts of reliable electrical capacity by 2014 to resolve current system constraints and respond to anticipated load growth in western Beaver County, Utah. The proposed project would begin at the existing Cameron Substation near Beaver, Utah, and terminate at the existing Milford Substation near the town of Milford, Utah. The project area would span approximately 19 miles, about 12 of which would be on BLM-administered lands, depending on the route selected. Rocky Mountain Power has identified alternative routes between the two substations. These routes would affect Federal, State, and private lands. The requested ROW width on Federal lands is 60 feet except for a portion of one alternative route. The requested width for that portion is 100 feet where it passes over steep terrain. Rocky Mountain Power proposes to use predominately single wood pole structures, approximately 55 to 90 feet in height with average spans between poles of 350 to 500 feet. No new permanent roads would be constructed. Temporary spur routes approximately 12 feet wide and temporary workspace would be needed during construction for material storage, conductor-tensioning sites, and to accommodate vehicles and equipment.

Authorization of this proposal may require amending the Cedar Beaver Garfield Antimony RMP, approved in 1986, by changing approximately 594 acres of an existing 27,494-acre Visual Resource Management (VRM) Class II to Class III or IV. This would occur in the Mineral Mountains along the existing Pass Road, which is a Beaver County, Utah, recorded Class B Road. By this notice, the BLM is complying with the requirements in 43 CFR 1610.2(c) to notify the public of potential amendments to land use plans.
