predicated on the finding of the EA. Should an RMP amendment be necessary, it will be based on the following preliminary planning criteria:

- The RMP amendment will focus only on VRM class designations;
- The RMP amendment will comply with NEPA, FLPMA, and other applicable laws, executive orders, regulations and policy;
- The RMP amendment will recognize valid existing rights;
- The BLM will use a collaborative and multi-jurisdictional approach, where possible to determine the desired future condition of the public lands;
- The BLM will consider the management prescriptions on adjoining lands to minimize inconsistent management; and
- Management prescriptions will focus on the relative values of resources and not necessarily the combination of uses that will give the greatest economic return or economic output.

The purpose of the public scoping process is to determine relevant issues and planning criteria that will influence the scope of the environmental analysis, including alternatives, and guide the process for developing the EA. At present, the BLM has identified the following preliminary issues: cultural resources; crucial deer, elk, greater sage-grouse and upland game habitat; migratory bird habitat; special status species; surface water quality; recreation; socioeconomics; soil erosion; riparian areas; forestry; vegetation management; wilderness character; and visual resources.

You may submit comments on issues and planning criteria in writing to the BLM at any public scoping meeting, or you may submit them to the BLM using one of the methods listed in the ADDRESS section above. To be most helpful, comments should be submitted by the close of the 30-day scoping period or within 15 days after the last public meeting, whichever is later.

The BLM will use NEPA public participation requirements to assist the agency in satisfying the public involvement requirements under Section 106 of the National Historic Preservation Act (NHPA) (16 U.S.C. 470(f)) pursuant to 36 CFR 800.2(d)(3). The information about historic and cultural resources within the area potentially affected by the proposed project will assist the BLM in identifying and evaluating impacts to such resources in the context of both NEPA and Section 106 of the NHPA.

The BLM will consult with Indian tribes on a government-to-government basis in accordance with Executive Order 13175 and other policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will be given due consideration. Federal, State, and local agencies, along with tribes and other stakeholders that may be interested in or affected by the proposed project that the BLM is evaluating, are invited to participate in the scoping process and, if eligible, may request or be requested by the BLM to participate in the development of the environmental analysis as a cooperating agency.

Before including an address, phone number, email address, or other personal identifying information in your comment, be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us to withhold personal identifying information from public review, we cannot guarantee that we will be able to do so.
