DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

[Docket ID FEMA-2010-0003; Internal Agency Docket No. FEMA-B-1145]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule; correction.

SUMMARY: On October 7, 2010, FEMA published in the **Federal Register** a proposed rule that contained an erroneous table. This notice provides corrections to that table, to be used in lieu of the information published at 75 FR 62061. The table provided here represents the flooding sources, location of referenced elevations, effective and modified elevations, and communities affected for Cecil County, Maryland, and Incorporated Areas. Specifically, it addresses the following flooding sources: Back Creek, Big Elk Creek, Bohemia River, Chesapeake and Delaware Canal, Christina River, Dogwood Run, Gravelly Run, Hall Creek, Herring Creek, Laurel Run, Little Bohemia Creek, Little Elk Creek, Little Northeast Creek, Long Creek, Mill Creek, Mill Creek (Tributary to Little Elk Creek), Northeast Creek, Perch Creek, Plum Creek, Susquehanna River, Tributary 1 to Stone Run, Unnamed Tributary to Laurel Run, West Branch

Christina River, and West Branch Laurel Run.

DATES: Comments are to be submitted on or before November 26, 2012.

ADDRESSES: You may submit comments, identified by Docket No. FEMA-B-1145, to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-4064 or (email) Luis.Rodriguez3@fema.dhs.gov.

FOR FURTHER INFORMATION CONTACT: Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-4064 or (email) Luis.Rodriguez3@fema.dhs.gov.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) publishes proposed determinations of Base (1% annual-chance) Flood Elevations (BFEs) and modified BFEs for communities participating in the National Flood Insurance Program (NFIP), in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are minimum requirements. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood

insurance premium rates for new buildings built after these elevations are made final, and for the contents in those buildings.

Corrections

In the proposed rule published at 75 FR 62061, in the October 7, 2010, issue of the **Federal Register**, FEMA published a table under the authority of 44 CFR 67.4. The table, entitled "Cecil County, Maryland, and Incorporated Areas" addressed the following flooding sources: Back Creek, Big Elk Creek, Bohemia River, Chesapeake and Delaware Canal, Christina Creek, Dogwood Run, Gravelly Run, Hall Creek, Herring Creek, Laurel Run, Little Bohemia Creek, Little Elk Creek, Little Northeast Creek, Long Creek, Mill Creek, Mill Creek (Tributary to Little Elk Creek), Northeast Creek, Perch Creek, Plum Creek, Susquehanna River, Tributary 1 to Stone Run, Unnamed Tributary to Laurel Run, West Branch Christina River, and West Branch Laurel Run.

That table contained inaccurate information as to the location of referenced elevation, effective and modified elevation in feet, and/or communities affected for the following flooding sources: Big Elk Creek, Christina Creek, Dogwood Run, Little Elk Creek, Little Northeast Creek, Mill Creek, Northeast Creek, Tributary 1 to Stone Run, and West Branch Christina River. It also did not include the flooding source Tributary 2 to Stone Run, and the flooding source Christina River was erroneously referred to as Christina Creek. Additionally, the Town of Perryville has been added as a community affected by Mill Creek. In this notice, FEMA is publishing a table containing the accurate information, to address these prior errors. The information provided below should be used in lieu of that previously published.
