BILLING CODE P

NUCLEAR REGULATORY COMMISSION

[Docket No. 150-00017; NRC-2012-0200]

In the Matter of Quality Inspection and Testing, Inc., New Iberia, LA; General License Pursuant to 10 CFR 150.20 EA-11-124; Confirmatory Order (Effective Immediately)

I

Quality Inspection & Testing, Inc. (QIT), is the holder of a general license

issued by the U.S. Nuclear Regulatory Commission (NRC or Commission) pursuant to § 150.20 of Title 10 of the *Code of Federal Regulations* (10 CFR). This general license was granted to QIT at various times during calendar years 2010 and 2011. This Confirmatory Order is the result of an agreement reached during an alternative dispute resolution (ADR) mediation session conducted on June 27, 2012, at the NRC Region IV office in Arlington, Texas.

II

On October 27, 2010, the NRC conducted an inspection at a temporary job site located near Rock Springs, Wyoming. As a result of this inspection, QIT conducted an internal investigation and reported the results to the NRC in a letter dated January 27, 2011 (ML110940552). In response to QIT's investigation results, the NRC issued a Confirmatory Action Letter (CAL-4-11-001) on February 11, 2011 (ML110420261). QIT responded to the Confirmatory Action Letter in a letter dated February 15, 2011 (ML110530442). In addition, the NRC Office of Investigations (OI), Region IV, conducted an investigation (Case 4-2011-031).

By letter dated June 5, 2012, the NRC transmitted the results of the inspection and investigation in NRC Inspection Report 150-00017/2010-004 and Investigation Report 4-2011-031 [Reference redacted, not publicly available]. Based on the results of the inspection and investigation, the NRC determined that four apparent violations of NRC requirements had occurred. The apparent violations involved failure to: (1) Control and maintain constant surveillance of licensed material that is not in storage as required by 10 CFR 20.1802; (2) comply with security-related requirements as discussed in the Appendix to this Order; (3) wear, on the trunk of the body, a direct reading dosimeter, operating alarm ratemeter and a personal dosimeter while conducting radiographic operations in accordance with the requirements of 10 CFR 34.47(a); and (4) maintain copies of the specified records and documents required at a temporary jobsite as required by 10 CFR 34.89(b). Furthermore, the NRC is concerned that willfulness may be associated with the first three apparent violations. Finally, the inspection and investigation evidence also provided the basis for NRC identified apparent security violations of NRC requirements. The violations are described in the Appendix to this Order. (The Appendix includes Security-Related information; therefore, it is not publicly available.)
