DATES: *Comments.* Written comments must be received on or before September 26, 2012.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-

OAR-2012-0632, by one of the following methods:

II. Background

The Renewable Fuel Standard (RFS) program began in 2006 pursuant to the Energy Policy Act of 2005 (EPAAct), which added provisions in section 211(o) of the Clean Air Act (CAA, or "Act"), for a renewable fuel program, commonly referred to as RFS1. The statutory provisions for the RFS program were subsequently modified through the Energy Independence and Security Act of 2007 (EISA), and EPA published revised regulatory requirements on March 26, 2010 (75 FR 14670) (referred to as RFS2). The transition from the RFS1 requirements of EPAAct to the RFS2 requirements of EISA generally occurred on July 1, 2010. EISA establishes annual national renewable fuel volumes required through 2022 for four categories of renewable fuel: cellulosic biofuel, biomass based diesel, advanced biofuel, and total renewable fuel. Though EISA establishes a schedule of increasing national volume mandates over time, it also requires the Administrator to set the specific volume requirements for refiners and importers annually. The applicable volume standards under the RFS program for the 2012 compliance year were published in the **Federal**
