entries during this review period. Failure to comply with this requirement could result in the Secretary’s presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

This notice also serves as a reminder to parties subject to administrative protective order (“APO”) of their responsibility concerning the return or destruction of proprietary information disclosed under the APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction. The Department is issuing and publishing these final results of administrative review in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Paul Piquado,
Assistant Secretary for Import Administration.

Appendix

ACTION: Notice of Availability and notice of public meetings.

SUMMARY: NMFS announces the adoption of a Final Endangered Species Act (ESA) recovery plan for the Central California Coast coho salmon (Oncorhynchus kisutch) Evolutionarily Significant Unit (ESU). The Final Recovery Plan for Central California Coast coho salmon (Final Recovery Plan) is now available. In addition, informative public meetings will be held (see below for dates and locations).

CD-ROM of the Final Recovery Plan can be obtained by emailing a request to Andrea.Berry@noaa.gov with the subject line “CD-ROM Request for CCC coho Salmon Recovery Plan”, by phone at 707–200–2788, or by writing to NMFS Protected Resources Division, 777 Sonoma Avenue, Room 325, Santa Rosa, CA 95404 ATTN: Recovery Coordinator.

FOR FURTHER INFORMATION CONTACT:
Charlotte Ambrose, Central California Coast Recovery Coordinator by email to Charlotte.A.Ambrose@noaa.gov or by phone at 707–575–6068.

SUPPLEMENTARY INFORMATION:

Background

The Endangered Species Act of 1973 (ESA), as amended (16 U.S.C. 1531 et seq.) requires that we (NOAA) develop and implement recovery plans for the conservation and survival of threatened and endangered species under our jurisdiction, unless it is determined that such plans would not result in the conservation of the species. We designated Central California Coast coho salmon as threatened in the Federal Register on October 21, 1996 (61 FR 56138). Due to severe declines, we uplisted the species to endangered status on June 28, 2005 (70 FR 37160). We published a Notice of Availability of the Draft Recovery Plan in the Federal Register on March 18, 2010 (75 FR 13081) and held three public meetings to obtain comments on the Draft Plan. In response to multiple requests, we extended the public comment period for an additional 60 days on May 7, 2010 (75 FR 25204). We received extensive comments on the Draft Plan, summarized the comments and identified the comments that prompted revisions for the Final Recovery Plan. We revised the Draft Plan based on the comments received, and this final version now constitutes the Recovery Plan for the Evolutionarily Significant Unit of Central California Coast Coho Salmon.

The Final Plan

The ESA requires that recovery plans incorporate, to the extent practicable: (1) Objective, measurable criteria which, when met, would result in a determination that the species is no longer threatened or endangered; (2) site-specific management actions necessary to achieve the plan’s goals; and (3) estimates of the time required and costs to implement recovery actions. Our goal is to restore endangered Central California Coast coho salmon to the point where they are again secure, self-sustaining members of their ecosystems and no longer need the protections of the ESA.

The Final Recovery Plan provides background on the natural history of Central California Coast coho salmon, population trends and the potential threats to their viability. The Final Recovery Plan lays out a recovery strategy to address the potential threats based on the best available science and includes goals that incorporate objective, measurable criteria which, when met, would result in a determination that the species be removed from the list. The Final Recovery Plan is not regulatory, but presents guidance for use for agencies and interested parties to assist in the recovery of Central California Coast coho salmon. The Final Recovery Plan identifies substantive actions needed to achieve recovery by addressing the threats to the species. The strategy for recovery includes a linkage between management actions and an active research and monitoring program intended to fill data gaps and assess effectiveness. The Final Recovery Plan incorporates an adaptive management framework by which management actions and other elements will evolve and adapt as we gain information through research and monitoring and it describes the agency guidance on timeline for reviews of the status of species and recovery plans. To address threats related to the species, the Final Recovery Plan references many of the significant efforts already underway to restore Central California Coast coho salmon access to high quality habitat and to improve habitat previously degraded.

We expect the Final Recovery Plan to help us and other Federal agencies take a consistent approach to section 7 consultations under the ESA and to other ESA decisions. For example, the Final Recovery Plan will provide information on the biological context for
the effects that a proposed action may have on the listed ESU. The best available information in the Final Recovery Plan on the natural history, threats, and potential limiting factors, and priorities for recovery can be used to help assess risks. Consistent with the adoption of this Final Recovery Plan for Central California Coast coho salmon, we will implement relevant actions for which we have authority, work cooperatively on implementation of other actions, and encourage other Federal and state agencies to implement recovery actions for which they have responsibility and authority.

Recovery of Central California Coast coho salmon will require a long-term effort in cooperation and coordination with Federal, state, tribal and local government agencies, and the community.

**Conclusion**

NMFS has reviewed the Plan for compliance with the requirements of ESA section 4(f), determined that it does incorporate the required elements and is therefore adopting it as the Final Recovery Plan for Central California Coast coho salmon.

**Public Meetings**

Public meetings are planned for Ukiah, Santa Cruz, and Santa Rosa, CA. Workshops will be held at the locations and dates listed below:

- **September 5, 2012, 10 a.m.–12 p.m.**: Hilton Santa Cruz/Scotts Valley, Pine/Oak Room, 6001 La Madrona Drive, Santa Cruz, CA 95060.
- **September 6, 2012, 10 a.m.–12 p.m.**: Wells Fargo Center for the Arts, Carlson Cabaret Room, 50 Mark West Springs Road Santa Rosa, CA 95403.
- **September 11, 2012, 10 a.m.–12 p.m.**: Redwood Empire Fairgrounds, Fair Arts Building, 1055 State Street, Ukiah, CA, 95482.

Information on exact locations, dates and times will also be posted on the above Web site.

**Authority**: 16 U.S.C. 1531 et seq.

**Dated**: August 29, 2012.

Angela Somma,
Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

**DEPARTMENT OF COMMERCE**

**National Oceanic and Atmospheric Administration**

RIN 0648–XC215

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

**AGENCY**: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION**: Notice of a public meeting.

**SUMMARY**: The Mid-Atlantic Fishery Management Council (Council) Staff will hold the second meeting of the Visioning and Strategic Planning Working Group. During this meeting, the group will finalize draft vision and mission statements, perform an abridged analysis of the Council’s strengths, weaknesses, opportunities, and threats, and develop a goal structure for the strategic plan.

**DATES**: The meeting will be held on Friday, September 21, 2012, from 9 a.m. to 5 p.m.

**ADDRESSES**: The meeting will be held at O’Callaghan Hotel, 174 West Street, Annapolis, MD 21401; telephone: (866) 782–9624.

**Council address**: Mid-Atlantic Fishery Management Council, 800 N. State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331.

**FOR FURTHER INFORMATION CONTACT**: Dr. Christopher M. Moore, Executive Director, Mid-Atlantic Fishery Management Council, 800 N. State Street, Suite 201, Dover, DE 19901; telephone: (302) 526–5255.

**SUPPLEMENTARY INFORMATION**: This meeting of the Visioning and Strategic Planning Working Group is the second in a series of strategic planning meetings convened by MAFMC with facilitation services provided by RESOLVE. The purpose of the Working Group meetings is to develop a draft 10-year strategic plan and corresponding tactical plan through discussion of issues, opportunities, and objectives as they relate to the MAFMC’s management responsibilities. In this meeting, the Working Group will final the Vision and Mission statements drafted at the first meeting held on August 13. The group will perform an abridged analysis of strengths, weaknesses, opportunities, and threats, and will develop a goal structure for the strategic plan. Time permitting, the Working Group may develop the goal, objective, strategy and tactical associations that support the development of a strategic goal on public engagement.

No formal actions will be taken by the Visioning and Strategic Planning Working Group at this meeting. Any documents produced by the Working Group will be reviewed by the full-Council following a period of public comment.

**Special Accommodations**

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to M. Jan Saunders at the Mid-Atlantic Council Office, (302) 526–5251, at least 5 days prior to the meeting date.

Dated: August 30, 2012.

Tracey L. Thompson, Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
