

the effects that a proposed action may have on the listed ESU. The best available information in the Final Recovery Plan on the natural history, threats, and potential limiting factors, and priorities for recovery can be used to help assess risks. Consistent with the adoption of this Final Recovery Plan for Central California Coast coho salmon, we will implement relevant actions for which we have authority, work cooperatively on implementation of other actions, and encourage other

Federal and state agencies to implement recovery actions for which they have responsibility and authority.

Recovery of Central California Coast coho salmon will require a long-term effort in cooperation and coordination with Federal, state, tribal and local government agencies, and the community.

Conclusion

NMFS has reviewed the Plan for compliance with the requirements of

ESA section 4(f), determined that it does incorporate the required elements and is therefore adopting it as the Final Recovery Plan for Central California Coast coho salmon.

The five-year permit authorizes research on leatherback, loggerhead, green, hawksbill, and Kemp's ridley sea turtles in mid-Atlantic waters from North Carolina to New Jersey. The purposes of the research are to: (1) Update current knowledge of loggerhead and Kemp's ridley sea turtle abundance, distribution, health, and nutrition in Chesapeake Bay and nearshore Virginia waters, (2) compare the relative abundance, size distribution, sex ratio, health parameters and genetic diversity of loggerhead and Kemp's ridley sea turtles in U.S. mid-Atlantic coastal waters, and (3) build baseline data on less common sea turtle species in the region. Turtles will be captured using tangle nets or hand/dip nets. Subject turtles may also be acquired from other legal sources: Virginia pound net fisheries and dredge mitigating trawls. The following procedures may be conducted on sea turtles prior to release: Epibiota removal, satellite tag, temporarily mark the carapace, attach flipper and passive integrated transponder tags, measure, photograph, oral swab, weigh, and sample blood, feces, keratin, and tissue.
