SUMMARY: The Department of Labor (Department), as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 [44 U.S.C. 3506(c)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

Currently, ETA is soliciting comments concerning the collection of data supporting the NFJP (expires December 31, 2012). A copy of the proposed information collection request (ICR) can be obtained by contacting the office listed below in the addresses section of this notice.

DATES: Written comments must be submitted to the office listed in the addresses section below on or before November 6, 2012.

SUPPLEMENTARY INFORMATION:**I. Background**

Under the Information Collection Review process, each grantee receiving NFJP funds for employment and training activities is required to submit the following:

- The BIS (ETA-9093) is submitted as part of the annual grant plan, and is used to collect information on how grant funds will be spent during the program year.
- The PPS (ETA-9094) is submitted as part of the annual grant plan, and is used to project the number of participants and the array of services to be provided for the program year.
- The PSS (ETA-9095) is submitted each quarter and is used to collect data on actual participant numbers and services. ETA has added a short section to Form 9095 to collect narrative information on grant activities.
- The WIASPR is submitted each quarter and collects individual participant records containing demographic, service, and outcome data on individuals who exit the program. Data from the WIASPR are used by ETA to calculate the common performance measures for entered employment, retention, and earnings.
- The HAS (ETA-9164), is a new quarterly reporting form for grantees receiving NFJP funds for housing assistance activities. This report will collect data on the number of individuals and families served and narrative information on grant activities.
- All NFJP grantees are required by regulation to submit a grant plan narrative covering the two-year grant period cycle. The grant plan narrative is a comprehensive service delivery plan and a projection of participant services and expenditures. ETA provides guidance to the grantees regarding the

content of the annual plan narrative and submission requirements.

II. Review Focus

The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

SUPPLEMENTARY INFORMATION:

II. Background Information

Interim staff guidance (ISG), Final Japan Lessons-Learned Project Directorate Interim Staff Guidance (JLD-ISG), JLD-ISG-2012-01, "Compliance with Order EA-12-049, Order Modifying Licenses with Regard to Requirements for Mitigation Strategies for Beyond-Design-Basis External Events," (ADAMS Accession No. ML12229A174) is being issued to describe to the public methods acceptable to the Nuclear Regulatory Commission (NRC) staff for complying with Order EA-12-049, "Order Modifying Licenses with Regard to Requirements for Mitigation Strategies for Beyond-Design-Basis External Events (Effective Immediately)" (Order EA-12-049), issued March 12, 2012. This ISG endorses the methodologies described in the industry guidance document, Nuclear Energy Institute (NEI) 12-06, *Diverse and Flexible Coping Strategies (FLEX) Implementation Guide* (NEI 12-06), Revision 0 (ADAMS Accession No. ML12242A378) submitted on August 21, 2012. The ISG is not a substitute for the requirements in Order EA-12-049, and compliance with this ISG is not required.

The NRC issued Order EA-12-049 following the NRC staff's evaluation of the earthquake and tsunami, and resulting nuclear accident, at the Fukushima Dai-ichi nuclear power plant in March 2011. Order EA-12-049 requires all licensees and construction permit (CP) holders to develop a three-phase approach for mitigating beyond-design-basis external events. The initial phase requires the use of installed equipment and resources to maintain or restore core cooling, containment, and SFP cooling. The transition phase requires providing sufficient, portable,
