For further details with respect to this action, see the application for amendment dated November 4, 2010, as supplemented by letters dated October 19, 2011 (ADAMS Accession No. ML100202009), as supplemented by letters dated October 19, 2011 (ADAMS Accession No. ML11312A137), and January 31, 2012 (ADAMS Accession No. ML12039A091), for proposed amendment to Facility Operating License No. NPF–42 for the Wolf Creek Generating Station, located in Coffey County, Kansas.

The proposed amendment would have revised Technical Specification (TS) 5.6.5, “Core Operating Limits Report (COLR),” to replace the existing large break loss-of-coolant accident (LOCA) analysis methodology. Specifically, the proposed change adds a reference to WCAP–16009–P–A, “Realistic Large Break LOCA Evaluation Methodology Using Automated Statistical Treatment of Uncertainty Method (ASTRUM),” to TS 5.6.5b.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the Federal Register on December 28, 2010 (75 FR 81673). However, by letter dated August 23, 2012 (ADAMS Accession No. ML12248A261), the licensee withdrew the proposed change.
