

the access road to the communication facilities. The proposed facility would include a backup 20 kilowatt diesel generator for use in the event of interruption of commercial power.

It is anticipated that facility construction would take three to four months and would occur in a single summer season.

Possible Alternatives

The Environmental Impact Statement will analyze the proposed action, No Action (no communication site on Middle Bald Mountain), and other action alternatives that may be developed after scoping. Other action alternatives could consider alternative power sources, powerline alignments, and installation methods; alternative access road alignments and designs; alternative building designs; and alternative site locations for the tower and building near the summit of Middle Bald Mountain.

Responsible Official

The responsible official is the Forest Supervisor for the Arapaho and Roosevelt National Forests and Pawnee National Grassland.

Nature of Decision To Be Made

The responsible official will decide whether or not to permit the proposed action or other action alternative that may be developed by the Forest Service as a result of scoping.

Permits or Licenses Required

A Special Use permit from the Forest Service would be required to implement the proposal or other action alternative that may be developed by the Forest Service after scoping. A non-significant Forest Plan amendment would also be necessary if the decision is to permit a communication site on Middle Bald Mountain.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. The Forest Service is soliciting comments from Federal, State, and local agencies, and other individuals or organizations who may be interested in or affected by implementation of the proposed project. Input provided by interested and/or affected individuals, organizations, and governmental agencies will be used to identify resource issues that will be analyzed in the Draft EIS. The Forest Service will identify key issues raised during the scoping process and use them to formulate alternatives, prescribe mitigation measures and project design

features, and analyze environmental effects.

It is important that reviewers provide their comments at such times and in such a manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions. There will be two public open houses approximately three weeks into the scoping period, at which written public comments will be accepted. Those meeting dates, times, and locations will be announced locally.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered.
