FOR FURTHER INFORMATION CONTACT: Joselyd Garcia-Reyes or Kristy Beard, (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222–226).

The NEFSC is requesting a five-year permit to conduct scientific research on 38 species of cetaceans, four species of pinnipeds, and five species of sea turtles in the US EEZ from Florida to Maine and Canadian waters in the Bay of Fundy and Scotian Shelf. The research is designed to meet the NEFSC's mandates under the MMPA and ESA and primarily focuses on stock assessment. Specific objectives are to determine the abundance, distribution, movement patterns, dive behavior, demographic parameters, trends in recruitment, and stock structure of marine mammals in U.S. waters of the western North Atlantic. Twelve of the 47 species to be targeted for research are listed as threatened or endangered: blue whale (*Balaenoptera musculus*), fin whale (*B. physalus*), humpback whale (*Megaptera novaeangliae*), North Atlantic right whale (*Eubalaena glacialis*), sei whale (*B. borealis*), sperm whale (*Physeter macrocephalus*), bowhead whale (*Balaena mysticetus*), green sea turtle (*Chelonia mydas*), hawksbill sea turtle (*Eretmochelys imbricata*), loggerhead sea turtle (*Caretta caretta*), Kemp's ridley sea turtle (*Lepidochelys kempii*), and leatherback sea turtle (*Dermochelys coriacea*). See the application for specific take numbers by location and species/stock. Types of take would include harassment by survey approach during aerial and vessel-based surveys, passive acoustic recording, behavioral observations, photo-identification, suction-cup tagging, and biopsy sampling. Research platforms would include large ships, small vessels, and aircrafts. Import and export of marine

mammal parts from the U.S. and other countries is requested for research purposes. The permit would be valid for a period of five years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: September 14, 2012.

National Oceanic and Atmospheric Administration

RIN 0648-XX47

Marine Mammals; File No. 14097

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of permit amendment.

SUMMARY: Notice is hereby given that a major amendment to Permit No. 14097-01 has been issued to National Marine Fisheries Service, Southwest Fisheries Science Center (SWFSC) (Responsible Party: Lisa Ballance, Ph.D.), Protected Resources Division, 8901 La Jolla Shores Drive, La Jolla, CA 92037.

ADDRESSES: The permit amendment and related documents are available for review upon written request or by appointment in the following offices: See **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Kristy Beard or Amy Hapeman, (301) 427-8401.

SUPPLEMENTARY INFORMATION: On July 11, 2012, notice was published in the **Federal Register** (77 FR 40859) that a request for an amendment to Permit No. 14097-01 to conduct research on 5 pinniped species, 57 cetacean species, and 5 sea turtle species in U.S. territorial and international waters of the Pacific, Southern, Indian, and Arctic Oceans had been submitted by the

above-named organization. The requested permit amendment has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

The amendment authorizes: (1) The attachment of dart/barb tags or implantable tags on Arnoux's beaked whales (*Berardius arnuxii*) in the Southern Ocean; and (2) an increase in the takes of pinniped species encountered during aerial, ground, and vessel surveys in the Pacific Ocean, to account for ten additional surveys per year. The amended permit expires June 30, 2015.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a determination was made that issuance of the permit is consistent with the Proposed Action Alternative in the Environmental Assessment (EA) for Issuance of a Scientific Research Permit [File No. 14097] for Pinniped, Cetacean, and Sea Turtle Studies (NMFS 2010) and the Final Programmatic Environmental Impact Statement for Steller Sea Lion and Northern Fur Seal Research (NMFS 2007). Based on that analysis, NMFS determined that issuance of the permit would not significantly impact the quality of the human environment and that preparation of an environmental impact statement was not required. That determination is documented in a Finding of No Significant Impact (FONSI), signed on July 1, 2010.

As required by the ESA, issuance of this permit was based on a finding that such permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.
