Nature of Decision To Be Made

If the BLM adopts the new FERC EIS for the Pacific Connector pipeline project (in Docket No. PF12–17–000), the BLM Oregon/Washington State Director will make the following decisions and determinations:

- Determine whether to amend the LRMPs for the BLM Coos Bay, Roseburg, and Medford Districts and the Klamath Falls Resource Area of the Lakeview District as proposed or as described in an alternative to the Proposed Action; and
- Respond to the Pacific Connector application with concurrence of the Bureau of Reclamation and the Forest Service by issuing a right-of-way grant, granting the right-of-way with conditions, or denying the application. If the Forest Service adopts the new FERC EIS for the Pacific Connector pipeline project (in Docket No. PF12–17–000), the Forest Supervisor of the Umpqua National Forest will make the following decisions and determinations:
  - Decide whether to amend the LRMPs of the Umpqua, Rogue River, and Winema National Forests as proposed or as described in an alternative; and
  - Determine the significance of the proposed amendments or alternatives in accordance with national forest planning regulation 36 CFR 219.10(f) (1982 procedures) using criteria in Forest Service Manual 1926.5.

Scoping Process: The BLM and the Forest Service seek public input on issues and planning criteria related to issuance of the Right-of-Way Grant. The BLM and the Forest Service seek public input on issues and planning criteria related to amendment of their district and forest land management plans related to the Pacific Connector pipeline project. All comments received related to actions of the BLM and the Forest Service will be considered in the preparation of land management plan amendments and issuance of a right-of-way grant for the Project.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency’s preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer’s concerns and contentions. Your comments should focus on the potential changes in the goods and services that are provided by affected BLM districts and National Forests, reasonable alternatives, and measures to avoid or lessen any adverse changes in the goods and services produced. The more specific your comments, the more useful they will be.

Currently Identified Issues Specific to Proposed BLM and Forest Service Land Management Plan Amendments

The purpose of the public scoping process is to determine relevant issues that will influence the scope of the environmental analysis, including alternatives, and guide the plan amendment process. Preliminary issues for the plan amendments have been identified by BLM and Forest Service personnel, Federal, State, and local agencies, and other stakeholders. The issues include:

- Effects of proposed amendments on Survey and Manage species and their habitat;
- Effects of proposed amendments on contiguous existing or recruitment habitat for marbled murrelets within 0.5 mile of occupied marbled murrelet sites;
- Effects of proposed amendments on habitat in Known Owl Activity Centers, and
- Effects of the proposed amendments on Late Successional Reserves.

Preliminary BLM and Forest Service planning criteria include:

- Evaluation of significance of proposed amendments to Forest Service LRMPs in the context of LRMP goals and objectives. Whether a plan amendment is significant is guided by several factors, including the timing and duration of the proposed change, the location and size of the project, and how the proposed change could alter multiple-use goals and objectives for long-term land and resource management.
- Likelihood of persistence of affected Survey and Manage species within the range of the northern spotted owl.
- Amount and quality of marbled murrelet habitat affected by construction and operation of the Pacific Connector pipeline project.
- Amount and quality of habitat in Known Owl Activity Centers affected by construction and operation of the Pacific Connector pipeline project.
- Functionality of LSRs.
- Impacts on Connectivity and Diversity Blocks on BLM lands.

Decisions by the BLM and the Forest Service to amend land management plans are subject to administrative review. In accordance with 36 CFR 219.59, the Forest Service has elected to use the administrative review procedures (otherwise known as protest procedures) of the BLM. Administrative objections to Forest Service land management plan amendment decisions and protests of BLM land management plan amendment decisions may be filed under the provisions of 43 CFR 1610.5–2. The BLM’s decision on the application for a right-of-way grant may be appealed to the Interior Board of Land Appeals in accordance with 43 CFR part 4.

The submission of timely and specific comments can affect a reviewer’s ability to participate in subsequent administrative appeal or judicial review. Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered; however, anonymous comments will not provide the respondent with standing to object to the subsequent decision.

Michael S. Mottice,
Acting BLM State Director, Oregon/ Washington.

Alice B. Carlton,
FS Forest Supervisor, Umpqua National Forest.
