### SUPPLEMENTARY INFORMATION:

#### I. Background

As part of its license renewal, the  
licensee has requested an exemption  
from the requirement in 10 CFR 30.32(g)  
to list sealed sources by their  
manufacturer and model number as  
registered under the provisions of  
section 10 CFR 32.210 of Title 10, Code  
of Federal Regulations (10 CFR). The  
licensee requested this exemption in a  
letter dated October 19, 2011. The NRC  
has prepared an Environmental  
Assessment (EA) in support of this  
proposed action in accordance with the  
requirements in 10 CFR part 51. Based  
on the EA, the NRC has concluded that  
a Finding of No Significant Impact  
(FONSI) is appropriate with respect to  
the proposed action. The license  
renewal and amendment, addressing the  
approval of the exemption request, will  
be issued to the licensee following the  
publication of this FONSI and EA in the  
**Federal Register**.

#### II. Environmental Assessment

##### Identification of Proposed Action

The proposed action would renew  
License No. 45-25134-01 and grant a  
license amendment, approving of the  
licensee's request for exemption dated,  
October 19, 2011. License No. 45-  
25134-01 was issued on February 25,  
1991, pursuant to 10 CFR Parts 30, 40,  
and 70, and has been amended  
periodically since that time. This  
license authorizes the licensee to  
receive, store, use and transfer specified  
radioactive materials incident to  
research and development as defined in  
10 CFR 30.4. On June 20, 2011, the  
licensee submitted its renewal  
application for License No. 45-25134-  
01. In a letter dated October 19, 2011,  
submitted in response to an inquiry  
from the NRC, the licensee requested an  
exemption from the requirement in 10  
CFR 30.32(g) to list sealed sources by  
their manufacturer and model number  
as registered under the provisions of 10  
CFR 32.210. In requesting this  
exemption, the licensee states that the  
purpose of possessing the sealed sources  
is to “remove and store devices of  
foreign manufacture for further testing  
and evaluation.” The licensee receives  
material in the form of painted disks,  
sealed tubes, sealed calibration sources,  
plated foils, and other previously  
manufactured military and civilian
