intersection of the line with the R24E and R25E common line at the southwest corner of section 36, T21N/R24E; then
(4) Proceed south along the R24E and R25E common line for approximately 22.5 miles, over the Winchester and Winchester SW maps, onto the Royal City map, passing over the West Canal and into the Frenchman Hills, to the southwest corner of section 12, T17N/R24E (concurrent with the intersection of the R24E and R25E common line and a single transmission line); then
(5) Proceed west in a straight line along the section boundaries (marked for 3 sections by the single transmission line) for approximately 4 miles, onto the Beverly NE map, to the southwest corner of section 9, T17N/R24E; then
(6) Proceed north in a straight line along the section boundary for approximately 1 mile to the northwest corner of section 9, T17N/R24E; then
(7) Proceed west in a straight line along the section boundaries for approximately 7.9 miles, onto the Vantage map, crossing over Interstate Route 90 and Columbia River, to the western shoreline of the Columbia River, at Hole in the Wall in Kittitas County, section 6, T17N/R24E; and then
(8) Proceed north along the western shoreline of the meandering Columbia River for approximately 23.3 miles, crossing over the Ginkgo and Cape Horn SE maps, and onto the West Bar map, returning to the beginning point.

Signed: September 18, 2012.

John J. Manfreda,
Administrator.

Approved: September 27, 2012.

Timothy E. Skud,
Deputy Assistant Secretary, (Tax, Trade, and Tariff Policy).

DEPARTMENT OF HOMELAND SECURITY
Coast Guard

33 CFR Part 117
[USCG–2012–0909]

Drawbridge Operation Regulations; Long Island, New York Inland Waterway From East Rockaway Inlet to Shinnecock Canal, Hempstead, NY

AGENCY: Coast Guard, DHS.

ACTION: Notice of temporary deviation from regulations.

SUMMARY: The Commander, First Coast Guard District, has issued a temporary deviation from the regulation governing the operation of the Wantagh State Parkway Bridge across the Sloop Channel, mile 15.4, at Jones Beach, New York. The deviation is necessary to install bascule girders at the bridge. This deviation allows the bridge to remain in the closed position.

DATES: This deviation is effective from October 8, 2012 through November 16, 2012.

ADDRESSES: Documents mentioned in this preamble as being available in the docket are part of docket USCG–2012–0909 and are available online at www.regulations.gov, inserting USCG–2012–0909 in the “Keyword” and then clicking “Search”. They are also available for inspection or copying at the Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Ms. Judy Leung-Yee, Project Officer, First Coast Guard District, judy.k.leung-yee@uscg.mil, telephone (212) 668–7165. If you have questions on viewing the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION: The Wantagh State Parkway Bridge has a vertical clearance in the closed position of 20 feet at mean high water and 23 feet at mean low water. The existing drawbridge operation regulations are listed at 33 CFR 117.5.

The New York Department of Transportation requested a temporary deviation to facilitate installation and painting of bascule girders at the bridge. The waterway has seasonal recreational vessels and fishing vessels of various sizes. We contacted the New York Marine Trades Association and no objections were received. We did not receive 30-days advance notice for this temporary deviation; however, the Coast Guard is approving this temporary deviation because this girder installation and painting must be performed during mild climate conditions to facilitate the painting operations and allow the new bridge construction to continue on schedule. Additional notice to the public will be provided in the Local Notice to Mariners and via a broadcast notice to mariners.

Under this temporary deviation the Wantagh State Parkway Bridge at mile 15.4, across Sloop Channel, shall operate between October 8, 2012 and November 16, 2012, as follows:

Monday through Friday the bridge may remain closed to vessel traffic from 6:30 a.m. through 12 p.m. and from 12:15 p.m. through 5 p.m.

Saturday and Sunday the bridge shall open on signal between 7:30 a.m. and 8:30 p.m. after at least a thirty minute advance notice is given by calling the number posted at the bridge.

At all other times the bridge shall open on signal after at least a thirty minute advance notice is given by calling the number posted at the bridge.

Vessels that can pass under the bridge during the closed periods without a bridge opening may do so at all times. There are no alternate routes for vessel traffic.

In accordance with 33 CFR 117.35(e), the bridge must return to its regular operating schedule immediately at the end of the designated time period. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: October 5, 2012.

Gary Kassof,
Bridge Program Manager, First Coast Guard District.

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

Determination of Attainment of the 1-Hour Ozone National Ambient Air Quality Standards in the Sacramento Metro Nonattainment Area in California

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is determining that the Sacramento Metro 1-hour ozone nonattainment area (Sacramento Metro Area) has attained the revoked National Ambient Air Quality Standard (1-hour ozone NAAQS or standard), and to exclude certain 2008 data caused by wildfire exceptional events. These air quality determinations were proposed in conjunction with a proposed determination to terminate the State of California’s obligations regarding 1-hour ozone section 185 fee program SIP provisions for the Sacramento Metro Area. In this notice, EPA is finalizing only that portion of its notice of proposed rulemaking that determines that the Sacramento Metro Area has attained the 1-hour ozone standard, and that excludes certain exceedances as caused by ozone exceptional events.
These air quality determinations were addressed separately in the proposed rulemaking and are severable from the other issues that relate to termination of section 185 1-hour ozone requirements. EPA is not at this time taking final action on other aspects of our notice of proposed rulemaking that address termination of 1-hour ozone section 185 fee requirements. EPA intends to address any other issues relating to Sacramento Metro Area 1-hour ozone section 185 requirements, and their termination, in a separate future rulemaking.

DATES: This rule will be effective on November 19, 2012.

ADDRESSES: EPA has established docket number EPA–R09–OAR–2011–0372 for this action. Generally, documents in the docket for this action are available electronically at http://www.regulations.gov or in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents in the docket are listed at http://www.regulations.gov, some information may be publicly available only at the hard copy location (e.g., copyrighted material, large maps, multi-volume reports), and some may not be available in either location (e.g., confidential business information (CBI)). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the FOR FURTHER INFORMATION CONTACT section.

FOR FURTHER INFORMATION CONTACT: John J. Kelly, EPA Region IX, (415) 947–4151, kelly.john@epa.gov.

SUPPLEMENTARY INFORMATION:
Throughout this document, “we,” “us” and “our” refer to EPA.

I. EPA’s Proposed Action
II. Public Comments
III. EPA Action
IV. Statutory and Executive Order Reviews

I. EPA’s Proposed Action

On May 18, 2011 (76 FR 28696), EPA proposed to determine that the Sacramento Metro Area attained the 1-hour ozone standard in 2009 based on complete, quality-assured and certified ambient air quality monitoring data for the 2007–2009 monitoring period, excluding exceedances of the 1-hour ozone standard that occurred due to wildfire exceptional events in 2008. In making its proposed determination, EPA proposed to exclude from use certain air quality monitoring data for 2008, because they meet the criteria for ozone exceptional events that are caused by wildfires. These air quality determinations were addressed separately in the proposal and are severable from the other issues and criteria in the May 18, 2011 notice of proposed rulemaking that relate to termination of section 185 1-hour ozone requirements.

EPA further proposed to determine that the State of California is no longer required to submit or implement section 185 fee program State Implementation Plan (SIP) provisions for the Sacramento Metro Area to satisfy anti-backsliding requirements for the revoked 1-hour ozone national ambient air quality standard (1-hour ozone NAAQS or standard). EPA’s proposal to terminate the section 185 fee requirements for the area identified certain criteria—(1) whether the area attained and (2) that any such attainment was due to permanent and enforceable emissions reductions—on which to base termination, and addressed each of these separately. With respect to the criterion of attainment of the 1-hour standard, in a section titled, “1-Hour Ozone Attainment” EPA stated:

EPA proposes to determine that the Sacramento Metro Area has attained the 1-hour ozone standard; that is, the number of expected exceedances at any site in the nonattainment area is not greater than one per year. 

May 18, 2011, 76 FR 28700.

The May 18, 2011 proposal presented monitoring data for the Sacramento Metro Area for 2007–2009, along with EPA’s explication that showed the area attained the 1-hour ozone NAAQS, and continued to attain through 2010. Table 1 shows that the Sacramento Metro Area has continued to attain the 1-hour ozone NAAQS since that time, based on complete, quality-assured and certified data for 2008–2010, 2009–2011 and preliminary data available for 2010–2012.

1 EPA proposed that the area continued in attainment based on complete, quality-assured data for 2010.
2 On the same day that EPA’s proposal was published in the Federal Register, EPA published a separate interim final determination “to defer CAA section 179 sanctions associated with the Sacramento Metro Area’s 1-hour Ozone CAA section 185 obligation based on our concurrent proposal to approve a CAA section 185 termination determination which would remove the obligation of the state to submit a section 185 SIP when finalized.” May 18, 2011, 76 FR 28661.
3 Preliminary data on the California Air Resources Board (CARB) Web site show a single exceedance (0.128 ppm) of the 1-hour ozone NAAQS on August 13, 2012 at the Sloughhouse Road monitoring site. Since there were no exceedances at this site in 2010 or 2011, this one exceedance in 2012 would not by itself constitute a violation of the 1-hour ozone NAAQS for the period 2010–2012.
Two other issues in the May 18, 2011 notice were addressed separately: (1) Whether, separate from determining whether the area attained the standard based on monitored air quality data, EPA could determine that such attainment was due to permanent and enforceable emissions reductions; and (2) whether EPA’s proposed determinations regarding attainment and permanent and enforceable emissions reductions could support termination of the area’s 1-hour ozone section 185 anti-backsliding requirements.

II. Public Comments

EPA’s proposed action provided a 30-day public comment period. During this period, the following parties submitted comments:

1. Paul Cort, Earthjustice, submitted on behalf of Natural Resources Defense Council (NRDC); letter dated June 16, 2011.
2. Tim Shestek, American Chemistry Council (ACC); letter dated June 17, 2011.

No adverse comments were directed at EPA’s proposal to determine, based on complete, quality-assured air quality data, that the Sacramento Metro Area has attained the 1-hour ozone standard. Similarly, no adverse comments were directed at EPA’s proposal to exclude certain monitored exceedances in 2008 as due to exceptional events.

NRDC submitted adverse comments relating to EPA’s proposal to terminate 1-hour ozone section 185 requirements for the area, and set forth NRDC’s contentions regarding additional criteria and legal bases for termination. No comments disputed EPA’s proposed determination that the area has attained the 1-hour ozone standard. No adverse comments address the component of EPA’s notice of proposed rulemaking that is the sole subject of today’s final action—EPA’s determination that the area has attained the 1-hour ozone standard based on monitored air quality data and does not finalize, any other portion of the proposal that is the sole subject of today’s final action—EPA’s determination that the area has attained the 1-hour ozone standard based on monitored air quality monitoring data for 2008, because they relate to the exceptional wildfire events. These air quality determinations were addressed separately and are severable from the other issues and criteria in the May 18, 2011 notice of proposed rulemaking that relate to termination of section 185 1-hour ozone requirements. Apart from EPA’s determination of attainment based on air quality,§ EPA is not in this notice taking final action on any other aspects of its proposed determination to terminate the 1-hour ozone section 185 fee program requirements for the Sacramento Metro Area.

IV. Statutory and Executive Order Reviews

This action makes a determination based on air quality data and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

• Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
• Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
• Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
• Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

§ This includes EPA’s determination with respect to the 2008 exceedances caused by wildfire exceptional events.
SUMMARY: EPA is finalizing a limited approval and limited disapproval of revisions to the Clark County portion of the applicable state implementation plan (SIP) for the State of Nevada. The submitted revisions include new and amended rules governing the issuance of permits for stationary sources, including review and permitting of major sources and major modifications under parts C and D of title I of the Clean Air Act (CAA). The effect of this limited approval and limited disapproval action is to update the applicable SIP with current Clark County permitting rules and to set the stage for remedying certain deficiencies in these rules. This limited disapproval action triggers an obligation on EPA to promulgate a Federal Implementation Plan unless the State of Nevada corrects the deficiencies, and EPA approves the related plan revisions, within two years of the final action, and for certain deficiencies the limited disapproval also triggers sanctions under section 179 of the CAA unless the State of Nevada submits (on behalf of Clark County) and we approve SIP revisions that correct the deficiencies within 18 months of final action.

DATES: Effective Date: This rule is effective on November 19, 2012.

ADDRESSES: EPA has established docket number EPA–R09–OAR–2012–0566 for this action. Generally, documents in the docket for this action available electronically at www.regulations.gov and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents in the docket are listed at www.regulations.gov, some information may be publicly available only at the hard copy location (e.g., copyrighted material), and some may not be publicly available at either location (e.g., CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the FOR FURTHER INFORMATION CONTACT section.

FOR FURTHER INFORMATION CONTACT: Laura Yannayon, EPA Region IX, 75 Hawthorne Street (AIR–3), San Francisco, CA 94105, phone number (415) 972–3534, fax number (415) 947–3579, or by email at yannayon.laura@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document, the terms “we,” “us,” and “our” refer to EPA.

III. Final Action
IV. Statutory and Executive Order Reviews

I. Summary of Proposed Action

On July 24, 2012 (77 FR 43206), EPA proposed a limited approval and limited disapproval of revisions to the Clark County portion of the Nevada State Implementation Plan (SIP). The submittals included new and amended regulations governing the issuance of permits for stationary sources under the jurisdiction of the Clark County Department of Air Quality (Clark or DAQ), including review and permitting

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

Limited Approval and Disapproval of Air Quality Implementation Plans; Nevada; Clark County; Stationary Source Permits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is finalizing a limited approval and limited disapproval of revisions to the Clark County portion of the applicable state implementation plan (SIP) for the State of Nevada. The submitted revisions include new and amended rules governing the issuance of permits for stationary sources, including review and permitting of major sources and major modifications under parts C and D of title I of the Clean Air Act (CAA). The effect of this
