Amateur Service Rules**AGENCY:** Federal Communications Commission.**ACTION:** Proposed rule.

SUMMARY: In this document, the Commission proposes to amend the amateur radio service rules to grant examination credit for expired and beyond-the-grace-period-for renewal amateur radio operator licenses; to shorten the grace period during which an expired amateur license may be renewed to 180 days; to revise the time a call sign is not available to the vanity call sign system correspondingly; and to reduce to two the number of volunteer examiners needed to administer an amateur license examination. 1. The Commission initiated this proceeding to amend the part 97 Amateur Radio Service rules that apply to examination credit for amateur radio operator licenses, to shorten the grace period during which an expired amateur license may be renewed, to reduce the number of volunteer examiners needed to administer an amateur license examination, and to allow amateur stations to transmit additional emission types. The Commission found that certain provisions in the rules applicable to the examination credit for an expired license treat a former licensee differently than a licensee who passed the same examination(s) but continuously renewed his or her license and that the fact that an individual allowed his or her license to expire more than two years ago does not necessarily mean that the person no longer possess adequate knowledge of the subject. Specifically, the Commission proposed in this *NPRM* to amend the amateur service rules to revise § 97.505 to require that volunteer examiners (VEs) give examination credit to an applicant who can demonstrate that he or she formerly held a particular class of amateur radio operator license. It also proposed to reduce the grace period for renewal to six months (180 days), noting that it believes 180 days is a sufficient period of time for individuals who forget to renew or experience unforeseen difficulties when renewing their licenses.

2. The Commission also proposed to reduce the number of VEs required to administer an examination from three to two noting that reducing the number of required VEs can increase the availability of examination opportunities while not compromising the reasons the Commission decided that more than one VE is necessary. It

also noted that in the years since the VE system was established, methods that would allow a VE examiner to observe an examinee from afar have been developed, such as audio and video links, either hard-wired to a site or available through the use of wireless Internet or satellite technologies, and it requested comment on whether it should amend Section 97.509(c) to provide that, at the option of the administering VEs and the VEC coordinating the examination session, the VEs may be “present and observing” an examinee for purposes of the rule when they are using an audio and video system that can assure the proper conduct and necessary supervision of each examination.

3. The Commission also proposed to amend § 97.3(c)(5) to allow emission type FXE as a phone emission and to amend § 97.307(f)(8) to allow emission type FXD as a data emission. It noted that this proposed rule change would encourage licensees to more fully utilize time division multiple access (TDMA) technologies in experimentation and promote more efficient use of the radio spectrum currently allocated to the amateur service.

C. Paperwork Reduction Act

9. This document does not contain proposed information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104-13. In addition, therefore, it does not contain any proposed information collection burden "for small business concerns with fewer than 25 employees," pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, *see* 44 U.S.C. 3506(c)(4).

II. Initial Regulatory Flexibility Analysis

10. The Regulatory Flexibility Act requires an initial regulatory flexibility

analysis to be prepared for notice and comment rulemaking proceedings, unless the agency certifies that "the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities." The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction." In addition, the term "small business" has the same meaning as the term "small business concern" under the Small Business Act. A "small business concern" is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).

11. In this *NPRM*, we propose to amend the amateur service rules applicable to the license examination system and to matters concerning emission types that amateur stations may transmit. Because "small entities," as defined in the RFA, are not persons eligible for licensing in the amateur service, these proposed rules do not apply to "small entities." Rather, the rules apply exclusively to individuals who currently are amateur service licensees and individuals who may be interested in again becoming an amateur service licensee. Therefore, we certify that the proposals in this *Notice*, if adopted, will not have a significant economic impact on a substantial number of small entities.

III. Ordering Clauses

12. The Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, shall send a copy of this *Notice of Proposed Rulemaking and Order*, including the Initial Regulatory Flexibility Certification, to the Chief Counsel for Advocacy of the Small Business Administration.
