

procedures and making these procedures accessible to workers; reviewing operating procedures as often as necessary and certifying the procedures annually; developing and implementing safe work practices; preparing training records; informing contract employers of known hazards and applicable provisions of the emergency action plan; maintaining a contract worker injury and illness log; establishing written procedures to maintain the integrity of and documenting inspections and tests of process equipment; providing information on permits issued for hot work operations; establishing and implementing written procedures to manage changes; preparing reports at the conclusion of incident investigations, documenting resolutions and corrective measures, and reviewing the reports with affected personnel; establishing and implementing an emergency action plan; developing a compliance audit report and certifying compliance; and disclosing information necessary to comply with the Standard to persons responsible for compiling process safety information.

## II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

## III. Proposed Actions

OSHA is requesting an adjustment increase in burden hours from 4,795,505 hours to 4,862,147 hours (a total increase of 66,642 hours). Although the number of estimated establishments and employees covered by the Standard decreased based on updated data, the estimated number of new and existing PSM processes increased, resulting in a burden hour increase.

## **NUCLEAR REGULATORY COMMISSION**

**[NRC-2012-0265; Dockets No. 50-003, 50-247, and 50-286; License Nos. DPR-5, DPR-26, and DPR-64]**

### **In the Matter of Entergy Nuclear Operations, Inc.; Entergy Nuclear Indian Point 2, LLC; Entergy Nuclear Indian Point 3, LLC; Indian Point Nuclear Generating, Units 1, 2, and 3; Director's Decision**

#### **I. Introduction**

By electronic transmission dated March 28, 2011 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML110890871), Eric T. Schneiderman, Attorney General for the State of New York, the Petitioner, submitted a petition under section 2.206 of Title 10 of the *Code of Federal Regulations* (10

CFR), "Requests for Action under This Subpart," to Mr. R. W. Borchardt, Executive Director for Operations, U.S. Nuclear Regulatory Commission (NRC, or the Commission). The Petitioner requested that the NRC take enforcement action to correct alleged noncompliance with fire protection regulations at Indian Point Nuclear Generating, Units 1, 2, and 3.

#### *Actions Requested*

The Petitioner asked the NRC to take immediate action and issue an Order requiring the following actions regarding Indian Point Nuclear Generating, Units 1, 2, and 3:

- Identify the violations of paragraphs F and G of Section III of Appendix R, "Fire Protection Program for Nuclear Power Facilities Operating Prior to January 1, 1979," to 10 CFR Part 50, "Domestic Licensing of Production and Utilization Facilities," which exist as of the date of the petition (March 28, 2011) at Indian Point Units 1, 2, and 3.
- Compel Entergy Nuclear Operations, Inc. (Entergy, or the licensee), and its affiliates to comply on or before September 20, 2011, with the requirements in paragraphs F and G for all fire zones in Indian Point Units 2 and 3, and any Indian Point Unit 1 fire zone or system, structure, or component that Indian Point Units 2 and 3 rely upon.

- Convene an evidentiary hearing before the Commission to adjudicate the violation of paragraphs F and G at Indian Point Units 1, 2, and 3, by Entergy and its affiliates.

As the basis for the request, the Petitioner stated, in part, the following:

- The Petitioner noted that the NRC's fire safety regulations found in 10 CFR 50.48(b) and Appendix R to 10 CFR Part 50 have been in effect since 1980 and the Indian Point reactors still do not comply with the prescriptive requirements.

- The Petitioner cited the population centers adjacent to the Indian Point facility and the associated consequences of a major fire and radiological release at Indian Point. According to the Petitioner, more than 17 million people live within 50 miles of the Indian Point site, which has the highest surrounding population of any operating reactor site in the country. The Petitioner also notes that Indian Point is located within 5 miles of the New Croton Reservoir in Westchester County, which provides drinking water for New York City.

- The Petitioner noted that Indian Point was built before the NRC or its predecessor, the Atomic Energy Commission, developed siting criteria. The Petitioner questioned if the
