The proposed project would consist of the following: (1) Up to 8 proposed RISEC kinetic energy-to-electrical energy conversion devices having a total installed capacity of 40 kilowatts; (2) a proposed transmission line that will either connect directly to the IVC diesel power plant or a 1,000-foot-long transmission line interconnecting with the Iguigig Village electric distribution system (depending on the location of the RISEC devices); and (3) appurtenant facilities. The proposed project would have an estimated average annual generation of 250 megawatt-hours.
