

- Designate a multi-use utility corridor on 1,021 acres of public lands managed by the BLM south of SR 74 to address potential future BLM management considerations; and

- Change the existing VRM class designations of 2,362 acres north of SR 74 and 1,013 acres south of SR 74 from Class III to Class IV to allow for the newly established utility corridors.

Once the RMP were amended, the BLM would approve a 200-foot-wide ROW within the newly designated utility corridor on public lands managed by the BLM north of SR 74 and within the existing designated utility corridor northeast of the Sun Valley Substation.

The BLM will utilize and coordinate the NEPA comment period to satisfy the public involvement process for Section 106 of the National Historic Preservation Act (16 U.S.C. 470) as provided for in 36 CFR 800.2(d)(3). Native American tribal consultations will be conducted in accordance with policy, and tribal concerns, including impacts on Indian trust assets, will be given due consideration. Federal, State, and local agencies, along with other stakeholders that may be interested or affected by the BLM's decisions on this project, are invited to participate in the public comment process. The BLM has determined that public hearings to solicit comments on the Draft EIS are necessary. Accordingly, the BLM invites all interested persons to participate in one of the following public hearings:
