

EPA infrastructure IT service providers (e.g. VoIP, PBX, switches, routers, hubs, Wireless LANs, network wiring, mobile telephone services, landline telephones, audio/video equipment and services). In accordance with 40 CFR 2.306(j), EPA has determined that under EPA contract number GS-35F-0601K, Order Number EP-G12H-00442, ECS and its identified subcontractors will require access to CBI submitted to EPA under all sections of TSCA to perform successfully the duties specified under the contract. ECS and its identified subcontractors' personnel will be given access to information submitted to EPA under all sections of TSCA. Some of the information may be claimed or determined to be CBI.

EPA is issuing this notice to inform all submitters of information under all sections of TSCA that EPA may provide ECS and its identified subcontractors access to these CBI materials on a need-to-know basis only. All access to TSCA CBI under this contract will take place at EPA Headquarters and the Research Triangle Park facilities in accordance with EPA's *TSCA CBI Protection Manual*.

Access to TSCA data, including CBI, will continue until September 30, 2016. If the contract is extended, this access will also continue for the duration of the extended contract without further notice.

ECS and its identified subcontractors' personnel will be required to sign nondisclosure agreements and will be briefed on appropriate security procedures before they are permitted access to TSCA CBI.

Agency Information Collection Activities; Proposed Renewal of Several Currently Approved Collections; Comment Request

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the
Paperwork Reduction Act (PRA), this

document announces that EPA is planning to submit requests to renew several currently approved Information Collection Request (ICR) to the Office of Management and Budget (OMB). The ICRs are identified in this document by their corresponding titles, EPA ICR numbers, OMB Control numbers, and related docket identification (ID) numbers. Before submitting these ICRs to OMB for review and approval, EPA is soliciting comments on specific aspects of the information collection activities that are summarized in this document. The ICRs and accompanying material are available for public review and comment in the relevant dockets identified in this document for the ICR.

DATES: Comments must be received on or before January 22, 2013.

ADDRESSES: Submit your comments, identified by the docket identification (ID) number for the corresponding ICR as identified in this document, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001.

- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.htm>.

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT:
Scott Drewes, Field and External Affairs (7506P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; telephone number: (703) 347-0107; fax number: (703) 308-5884; email address: drewes.scott@epa.gov.

SUPPLEMENTARY INFORMATION:

I. What information is EPA particularly interested in?

Pursuant to PRA section 3506(c)(2)(A) (44 U.S.C. 3506(c)(2)(A)), EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including

whether the information will have practical utility.

2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

3. Enhance the quality, utility, and clarity of the information to be collected.

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

II. What should I consider when I prepare my comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Submit your comments by the deadline identified under **DATES**.

6. Identify the docket ID number assigned to the ICR action in the subject line on the first page of your response. You may also provide the ICR title and related EPA and OMB numbers.

III. What do I need to know about PRA?

An Agency may not conduct or sponsor and a person is not required to respond to a collection of information subject to PRA approval unless it displays a currently valid OMB control number. The OMB control numbers for the EPA regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the preamble of the final rule, are further displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instruments or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in a list at 40 CFR 9.1.

As used in the PRA context, burden is defined in 5 CFR 1320.3(b).

IV. Which ICRs are being renewed?

EPA is planning to submit a number of currently approved ICRs to OMB for review and approval under PRA. In addition to specifically identifying the ICRs by title and corresponding ICR, OMB and docket ID numbers, this unit provides a brief summary of the information collection activity and the Agency's estimated burden. The Supporting Statement for each ICR, a copy of which is available in the corresponding docket, provides a more detailed explanation.

A. Docket ID Number EPA-HQ-OPP-2012-0544

Title: Notice of Supplemental Distribution of a Registered Pesticide Product.

ICR number: EPA ICR No. 0278.11.

OMB control number: OMB Control No. 2070-0044.

ICR status: The approval for this ICR is scheduled to expire on July 31, 2013.

Abstract: This information collection activity provides EPA with notification of supplemental registration of distributors of pesticide products. EPA is responsible for the regulation of pesticides as mandated by the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. Section 3(e) of FIFRA (see 7 U.S.C. 136a(e)), allows pesticide registrants to distribute or sell a registered pesticide product under a different name instead of or in addition to the name under the original registration. Such distribution and sale is termed "supplemental distribution" and the product is termed a "distributor product." EPA requires the pesticide registrant to submit a supplemental statement (EPA Form 8570-5, Notice of Supplemental Distribution of a Registered Pesticide Product) when the registrant has entered into an agreement with a second company that will distribute the registrant's product under the second company's name and product name.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.32 hours per response. The ICR, a copy of which is available in the docket, provides a detailed explanation of this estimate, which is only briefly summarized here:

Respondents/Affected entities: Entities potentially affected by this ICR include those identified in the North American Industrial Classification System (NAICS) code 325320 as businesses participating in this program as pesticide and other agricultural chemical manufacturing.

Estimated total number of potential respondents: 1,451.

Frequency of response: On occasion.
Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 387 hours.

Estimated total annual costs: \$34,505. This includes an estimated burden cost of \$34,505 and an estimated cost of \$0 for non-burden hour paperwork costs, e.g., investment or maintenance and operational costs.

Changes in the estimates from the last approval: The renewal of this ICR will result in an overall decrease of 68 hours in the total estimated respondent burden identified in the currently approved ICR. This decrease reflects the decrease in the number of applications the Agency expects to receive in the next 3 years. This change is an adjustment.

B. Docket ID Number EPA-HQ-OPP-2012-0737

Title: Standards for Pesticide Containers and Containment.

ICR number: EPA ICR No. 1632.04.

OMB control number: OMB Control No. 2070-0133.

ICR status: The approval for this ICR is scheduled to expire on July 31, 2013.

Abstract: This information collection request covers the information collection activities associated with the container design and residue removal requirements and containment structure requirements. With respect to the container design and residue removal requirements, the information collection activities are associated with the requirement that businesses subject to the container regulations (pesticide registrants) and repackaging regulations (pesticide registrants and refillers) maintain records of test data, cleaning procedures, certain data when a container is refilled, and other supporting information. These records are subject to both call-in by EPA and on-site inspection by EPA and its representatives. EPA has not established a regular schedule for the collection of these records, and there is no reporting.

With respect to the containment structure requirements, the information collection activities are associated with the requirement that businesses subject to the containment structure regulations maintain records of the: (1) Monthly inspection and maintenance of each containment structure and all stationary bulk containers; (2) duration over which non-stationary bulk containers holding pesticide and not protected by a secondary containment unit remain at the same location; and (3) construction date of the containment structure.

The businesses subject to the containment structure regulations

include agrichemical retailers and refilling establishments, custom blenders, and commercial applicators of agricultural pesticides. The records have to be maintained by the owners and operators of such businesses. There is no regular schedule for the collection of either of these records, nor does EPA anticipate a call-in of records at some future date. Instead, the records would be available to inspectors to ensure that businesses are in compliance with containment requirements. These inspections are generally conducted by the states, which enforce FIFRA regulations through cooperative agreements with EPA.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average from 2 to 7.5 hours per response. The ICR, a copy of which is available in the docket, provides a detailed explanation of this estimate, which is only briefly summarized here:

Respondents/Affected entities: Entities potentially affected by this ICR include pesticide registrants and businesses which formulate pesticide products or pesticide formulation intermediates (NAICS code 325320), farm supply wholesalers (NAICS code 422910), swimming pool applicators (classified under NAICS codes 561790, 453998, and 235990), and agricultural (aerial and ground) commercial applicators (classified under NAICS code 115112).

Estimated total number of potential respondents: 23,586.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 169,660 hours.

Estimated total annual costs: \$6,248,079. This includes an estimated burden cost of \$5,561,578 for container regulations and an estimated cost of \$686,501 for containment regulations.

Changes in the estimates from the last approval: The renewal of this ICR will result in an overall decrease of 4,890.5 hours in the total estimated respondent burden identified in the currently approved ICR. This decrease reflects three revisions to the estimated annual burden. First, EPA received very few waiver requests for complying with the non-refillable container regulations, so the estimated rate of registrants requesting waivers decreased from 5% to 1%. The decrease in waiver requests resulted in a corresponding decrease in the associated burden. Second, since registrant repackaging activities are similar to the repackaging activities conducted by refillers and swimming pool supply companies, EPA increased

the average annual burden per registrant respondent from 1 hour to 7.5 hours per respondent to be consistent with the average burden per refiller or swimming pool supply company. Third, for entities subject to the containment requirements, some activities in the previous ICR were completed by the compliance date of August 16, 2009. This ICR is focusing only on the ongoing annual information collection activities for the containment requirements, resulting in a corresponding decrease in the estimated annual burden per respondent from the previous ICR. This change is an adjustment.

C. Docket ID Number EPA-HQ-OPP-2012-0744

Title: Tolerance Petitions for Pesticides on Food/Feed Crops and New Inert Ingredients.

ICR number: EPA ICR No. 0597.11.

OMB control number: OMB Control No. 2070-0024.

ICR status: The approval for this ICR is scheduled to expire on July 31, 2013.

Abstract: The use of pesticides to increase crop production often results in pesticide residues in or on the crop. To protect the public health from unsafe pesticide residues, EPA sets limits on the nature and level of residues permitted pursuant to section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA). A pesticide may not be used on food or feed crops unless the Agency has established a tolerance (maximum residue limit) for the pesticide residues on that crop or established an exemption from the requirement to have a tolerance.

Under the law, EPA is responsible for ensuring that the maximum residue levels likely to be found in or on food/feed are safe for human consumption through a careful review and evaluation of residue chemistry and toxicology data. In addition, EPA must ensure that adequate enforcement of the tolerance can be achieved through the testing of submitted analytical methods. If the data are adequate for EPA to determine that there is a reasonable certainty that no harm will result from aggregate exposure, the Agency will establish the tolerance or grant an exemption from the requirement of a tolerance.

This ICR only applies to the information collection activities associated with the submission of a petition for a tolerance action. While EPA is authorized to set pesticide tolerances, the Food and Drug Administration (FDA) is responsible for their enforcement. Food or feed commodities found to contain pesticide residues in excess of established tolerances are considered adulterated,

and are subject to seizure by FDA, and may result in civil penalties.

Trade secret or CBI is frequently submitted to EPA in support of a tolerance petition because submissions usually include the manufacturing process, product formulation, and supporting data. When such information is provided to the Agency, the information is protected from disclosure under FIFRA section 10. CBI data submitted to the EPA is handled strictly in accordance with the provisions of the FIFRA Confidential Business Information Security Manual.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average from 1,726 hours for each petitioner response and 1,739 hours for each IR-4 response. The ICR, a copy of which is available in the docket, provides a detailed explanation of this estimate, which is only briefly summarized here:

Respondents/Affected entities: Entities potentially affected by this ICR include anyone who files a petition asking EPA to take a specific tolerance action. While any entity can file a petition with EPA, petitions typically come from those businesses engaged in the manufacturing of pesticides and the Interregional Research Project No. 4 (IR-4). The NAICS codes for the most frequent type of respondent are 325320 (pesticide and other agricultural chemical manufacturing) and 541600 (management, scientific, and technical consulting services).

Estimated total number of potential respondents: 137.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 236,800 hours.

Estimated total annual costs: \$21,280,921. This is the estimated burden cost; there is no cost for capital investment or maintenance and operational costs in this information collection.

Changes in the estimates from the last approval: The renewal of this ICR will result in an overall increase of 58,515 hours in the total estimated respondent burden identified in the currently approved ICR. This increase reflects EPA's updating of burden estimate to account for an increase from 103 to 137 in the estimated average number of tolerance petitions submitted annually, which resulted in a change to the annual burden hours for respondents from 178,285 in the previous renewal to 236,800 in the current renewal. This change is an adjustment.

V. What is the next step in the process for these ICRs?

EPA will consider the comments received and amend the individual ICRs as appropriate. The final ICR packages will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of these ICRs to OMB and the opportunity for the public to submit additional comments for OMB consideration. If you have any questions about any of these ICRs or the approval process in general, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

List of Subjects

Environmental protection, Reporting and recordkeeping requirements.

Dated: November 15, 2012.

James Jones,

Acting Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPP-2012-0631; FRL-9361-9]

Agency Information Collection Activities; Proposed Collection; Comment Request

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA), this document announces that EPA is planning to submit a request for a new Information Collection Request (ICR) to the Office of Management and Budget (OMB). This ICR is entitled: "Pesticide Spray Drift Reduction Technologies," and identified by EPA ICR No. 2472.01 and OMB Control No. 2070-NEW. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection that is summarized in this document. The ICR and accompanying material are available in the docket for public review and comment.

DATES: Comments must be received on or before January 22, 2013.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPP-2012-0631 by one of the following methods:
