Edgemont Public Library, 412 2nd Avenue, Edgemont, SD 57735.

Rapid City Public Library, 610 Quincy Street, Rapid City, SD 57701-3630.

Hot Springs Public Library, 145 N. Chicago Street, Hot Springs, SD 57747.

Oglala Lakota College Library, P.O. Box 310, Kyle, SD 57752.

The Draft SEIS was prepared in response to an application submitted by Powertech on August 10, 2009. The applicant proposes the construction, operation, aquifer restoration, and decommissioning of an ISR facility.

The Draft SEIS was prepared by the NRC and its contractor, the Center for Nuclear Waste Regulatory Analyses, in cooperation with the U.S. Bureau of Land Management (BLM). The NRC has prepared this Draft SEIS in compliance with NEPA and the NRC's regulations for implementing NEPA (10 CFR Part 51).

The proposed Dewey-Burdock ISR Project will be located approximately 21 kilometers (13 miles) north-northwest of Edgemont, South Dakota, in northern Fall River and southern Custer Counties. The proposed facility would encompass approximately 4,282 hectares (10,580 acres), which consists of two contiguous mining units: the Burdock Unit and the Dewey Unit.

The Draft SEIS is being issued as part of the NRC's process to decide whether to issue a license to Powertech pursuant to 10 CFR Part 40. In this Draft SEIS, the NRC staff has assessed the potential environmental impacts from the construction, operation, aquifer restoration, and decommissioning of the proposed Dewey-Burdock Project. The NRC staff assessed the impacts of the proposed action and its alternatives on land use; historical and cultural resources; visual and scenic resources; climatology, meteorology and air

quality; geology, minerals and soils; water resources; ecological resources; socioeconomic; environmental justice; noise; traffic and transportation; public and occupational health and safety; and waste management. Additionally, the Draft SEIS analyzes and compares the benefits and costs of the proposed action.

In doing so, the NRC staff evaluated site-specific data and information on the Dewey-Burdock ISR Project to determine if Powertech's proposed activities and the site characteristics were consistent with those evaluated in the GEIS. NRC then determined which relevant sections of, and impact conclusions in, the GEIS could be incorporated by reference. The NRC staff also determined if additional data or analysis was needed to assess the potential environmental impacts for a specific environmental resource area. The NRC documented its assessments and conclusions in the Draft SEIS.

In addition to the action proposed by Powertech, the NRC staff addressed the no-action alternative, as well as alternative wastewater disposal options under the proposed action. All the alternatives were analyzed in detail. The no-action alternative serves as a baseline for comparing the potential environmental impacts of the proposed action.

After weighing the impacts of the proposed action and comparing the alternatives, the NRC staff, in accordance with 10 CFR 51.71(f), sets forth its preliminary recommendation regarding the proposed action. Unless safety issues mandate otherwise, the NRC staff preliminarily recommends that the proposed action be approved (*i.e.*, the NRC should issue a source material license for the proposed Dewey-Burdock ISR Project).

This Draft SEIS is being issued for public comment. The public comment period on the Draft SEIS begins with publication of this notice and continues until January 10, 2013. Written comments should be submitted as described in the **ADDRESSES** section of this document. The NRC will consider comments received or postmarked after that date to the extent practical.

Dated at Rockville, Maryland, this 8th day of November 2012.

For the Nuclear Regulatory Commission.

Aby Mohseni,

Deputy Director, Environmental Protection and Performance Assessment Directorate, and Environmental Protection, Office of Federal and State Materials.
