SUPPLEMENTARY INFORMATION: CNCS is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of CNCS, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are expected to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submissions of responses).

Background

The proposed instrument will collect information from a sample of Senior Companion clients and caregivers. The purpose of the survey is to assess the feasibility of conducting a longitudinal, quasi-experimental evaluation of the impact of independent living and respite services on clients' social ties and perceived social support. The information will be collected by trained interviewers using multi-modal formats including paper, online, or telephone survey. The results of the survey may also be used to inform the feasibility of using a similar instrument to measure client and caregiver outcomes for an evaluation of RSVP.

The instrument uses items from the Health and Retirement Study (HRS), an ongoing study funded by the National Institute on Aging/NIH (NIA U01AG009740) and Social Security Administration.
