

plans to address flooding issues in Findlay and Ottawa by evaluating a series of flood risk management measures within the vicinity of these two affected areas.

Proposed Action: In accordance with 40 CFR parts 1500–1508 and Engineer Regulation 200–2–2, an EIS is being prepared for the Federal Flood Risk Management Study within the Blanchard River watershed including the communities of Findlay and Ottawa to ensure full and fair consideration of significant environmental impacts. This EIS will inform decision-makers and the public of reasonable alternatives to reduce the risk of loss of life and property damage from flooding in these areas and that would also avoid or minimize adverse impacts and/or enhance the quality of the human environment. The proposed EIS will focus on the implementation of flood risk management measures associated with the Blanchard River in and within the vicinity of Findlay and Ottawa. The EIS will be consistent with sound engineering practices and will be drafted concurrently with actions to achieve compliance with other applicable Federal environmental compliance requirements, including those established by Section 404 of the Clean Water Act. In addition, the EIS will be consistent with State and local plans.

Reasonable Alternatives: It is Corps of Engineers planning policy to consider practicable and relevant alternative management measures, including a no action alternative. While the preferred alternative has not yet been established, the alternative plans considered in the EIS will consist of an array of structural and nonstructural measures for both Findlay and Ottawa. Structural measures may include, but are not limited to, channel realignment/diversion, levees and floodwall creation, culvert modification, and the creation of flood storage areas, including wetlands, bermed containment areas, and water detention areas/reservoirs. Nonstructural measures may include, but not be limited to, elevating existing buildings, relocation or acquisition of flood-prone structures, wet and dry floodproofing, as well as the development and implementation of a flood warning system or flood emergency preparedness plan.

Scoping Process: The Corps of Engineers invites affected Federal, State and local agencies, interested Indian Nations, and other concerned organizations and individuals to participate in development of the EIS. An initial Scoping Document was distributed in June 2008 and the Corps

of Engineers will be conducting a second round of scoping, and four public scoping meetings in December, 2012, which include: (1) 6:30 p.m. on December 10, 2012 at the Ottawa-Glandorf High School Auditorium, 630 Glendale Ave. Ottawa, OH; (2) 9:00 a.m. on December 11, 2012 at the Putnam County Educational Service Center, 124 Putnam Parkway, Ottawa, OH; (3) 7:00 a.m. on December 11, 2012 at the Findlay High School Auditorium, 1200 Broad Avenue, Findlay, OH; and, (4) 9:00 a.m. December 12, 2012 at the Hancock County Agricultural Service Center, 7868 County Road 140, Findlay, OH. All written comments received by the Corps of Engineers during the scoping period and throughout the EIS process will be considered in the preparation of the EIS.

The Draft EIS is tentatively scheduled to be available for public review in December 2013. The Final EIS is tentatively scheduled to be available for public review in September 2014.

Dated: November 20, 2012.
