CARB has repeatedly demonstrated the existence of compelling and extraordinary conditions in California. EPA has not received any adverse comments to suggest that California no longer suffers from compelling and extraordinary conditions. Because EPA has not received adverse public comment, or any other relevant information, challenging the need for CARB’s own motor vehicle pollution control program based on lack of compelling and extraordinary conditions for the purposes of this waiver request, I cannot deny the waiver based on a lack of compelling and extraordinary conditions.

CARB stated in its request letter that the amendments and accompanying enforcement procedures do not raise any concerns of technological infeasibility, inadequate lead time or impose any inconsistent certification requirements. Because EPA has not received adverse public comment, or any other relevant information regarding the consistency of California’s HD OBD amendments with section 202(a) of the Clean Air Act, I cannot find that CARB’s HD OBD regulations, as noted, would cause the California motor vehicle emissions standards to be inconsistent with section 202(a).

Therefore, as to the amendments that create new, more stringent requirements for the 2013 and later MYs, and the new enforcement procedures, there is insufficient basis to deny a full waiver of preemption under the criteria set forth in section 209(b) of the Act. A full explanation of EPA’s decision is contained in a Decision Document which may be obtained as explained above.

The Administrator has delegated the authority to grant California section 209(b) waivers of preemption to the Assistant Administrator for Air and Radiation. After evaluating California’s HD OBD amendments and CARB’s submission, EPA is taking the following actions. First, EPA is confirming that the amendments that relax the HD OBD requirements for 2010–2012 MYs are within the scope of the previous waiver of preemption. Second, EPA is granting a new waiver of preemption for the amendments to the HD OBD regulations that create new, more stringent requirements for MY 2013 and later, along with the accompanying enforcement procedures.

My decision will affect not only persons in California but also the manufacturers outside the State who must comply with California’s requirements in order to produce heavy-duty vehicles and engines for sale in California. For this reason, I hereby determine and find that this is a final action of national applicability for the purposes of section 307(b)(1) of the Act. Pursuant to section 307(b)(1) of the Act, judicial review of this final action may be sought only in the United States Court of Appeals for the District of Columbia Circuit. Petitions for review must be filed by February 8, 2013. Judicial review of this action may not be obtained in subsequent enforcement proceedings, pursuant to section 307(b)(2) of the Act.

As with past waiver decisions, this action is not a rule as defined by Executive Order 12866. Therefore, it is exempt from review by the Office of Management and Budget as required for rules and regulations by Executive Order 12866.

In addition, this action is not a rule as defined in the Regulatory Flexibility Act, 5 U.S.C. 601(2). Therefore, EPA has not prepared a supporting regulatory flexibility analysis addressing the impact of this action on small business entities.

Further, the Congressional Review Act, 5 U.S.C. 801, et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, does not apply because this action is not a rule for the purposes of 5 U.S.C. 804(3).

Gina McCarthy,
Assistant Administrator, Office of Air and Radiation.
collection and assessment of these data are ongoing, the recently released Ownership Report signifies a substantial improvement in minority and female ownership data. We anticipate going forward that these and additional ownership reports will provide useful periodic “snapshots” of minority and female ownership in the broadcast industry. We expect that our continuing efforts to reform and refine our ownership data collection will yield more and better data to support trend analyses in the future.

4. The Ownership Report was released to the public on November 14, 2012 and parties have submitted material in the record concerning the data. Several parties have requested an additional, formal opportunity to comment on the Ownership Report. Thus, while this proceeding has provided numerous opportunities for public input and participation, we will establish a further comment cycle for this limited purpose. Comments are due December 26, 2012; reply comments are due January 4, 2013.
