Abstract: In response to the Presidential memorandum, the eRulemaking Program launched the *Regulations.gov* 'feedback exchange' Web site in May 2009. This interactive Web site showcases new technologies being considered for the Regulations.gov 'feedback exchange' and Regulations.gov, as well as other agency-specific initiatives and rulemaking activities. The 'feedback exchange' serves as a learning laboratory for open government, enabling the public to provide input on the *Regulations.gov* interface, build a community of practice on the Federal regulatory development process, and ensure that the eRulemaking Program can efficiently manage federal resources by testing new tools before they are launched.

New technologies considered for *Regulations.gov* and the *Regulations.gov* 'feedback exchange' include: User Profiles; Comment Threads and Wikis; Ratings, Polls, and Tagging; an interactive Educational Tool; and Information Export and Sharing capabilities, such as application programming interfaces (or APIs). These technologies have been deployed iteratively, with components deployed upon the site's release in May 2009, and others deployed during updates throughout the last three years. Other components are still being considered and will be released during subsequent upgrades to the *Regulations.gov* 'feedback exchange' and *Regulations.gov*. User profiles enable the public to register on the site and pre-load submitter information for later use as well as save their own personalized searches, RSS feeds, and email alerts without the use of persistent cookies. Comment Threads allow the public to enter into virtual conversations with one another about a topic. Wikis enable the public to collaboratively develop and modify narrative descriptions about a topic. Ratings and Polls allow the public to indicate a preference for a topic or issue via the selection of stars or thumbs up/thumbs down icons which graphically provide an at-a-glance indication of public sentiment and can simplify navigation. Tagging provides the public with the ability to tag or label information they or someone else has posted to the site to ease navigation and to promote the formation of common interest categories. The Educational Tool will inform the public about the Federal rulemaking process through interactive text and images. The Data Export capability enables the public to download and review the contents of a rulemaking docket as well
