V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. See 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this notice merely proposes to approve state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

[Docket ID FEMA-2011-0002; Internal Agency Docket No. FEMA-B-1100 and FEMA-B-1222]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule; correction.

SUMMARY: On May 25, 2010 and October 6, 2011, FEMA published in the **Federal Register** a proposed rule that contained an erroneous table. This notice provides corrections to those tables, to be used in lieu of the information previously published. The table provided here represents the flooding sources, location of referenced elevations, effective and modified elevations, and communities affected for Iron County, Utah, and Incorporated Areas. Specifically, it addresses the following flooding sources: Coal Creek, Coal Creek Overflow, Coal Creek to Fiddlers Split, Cross Hollow, Greens Lake, North Airport Canal, Old Quichapa Creek Lower, Old Quichapa Creek Upper, Parowan Creek, Quichapa Channel, Quichapa West, Red Creek, Shurtz Creek, Shurtz Creek Shallow, Squaw Creek and Water Canyon.

DATES: Comments are to be submitted on or before March 13, 2013.

ADDRESSES: You may submit comments, identified by Docket No. FEMA-B-1100 and FEMA-B-1222, to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-4064 or (email) luis.rodriguez3@dhs.gov.

FOR FURTHER INFORMATION CONTACT: Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-4064 or (email) luis.rodriguez3@dhs.gov.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) publishes proposed determinations of Base (1% annual-chance) Flood Elevations (BFEs) and modified BFEs for communities participating in the National Flood Insurance Program (NFIP), in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are minimum requirements. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in those buildings.

Correction

In the proposed rule published at 75 FR 29238 and 76 FR 62006, in the May 25, 2010 and October 6, 2011, issues of the **Federal Register**, respectively, FEMA published a table under the authority of 44 CFR 67.4. The tables, entitled "Iron County, Utah, and Incorporated Areas" addressed the following flooding sources: Coal Creek, Coal Creek Overflow, Coal Creek to Fiddlers Split, Cross Hollow, Greens Lake, North Airport Canal, Old Quichapa Creek Lower, Old Quichapa Creek Upper, Parowan Creek, Quichapa Channel, Quichapa West, Red Creek,

Shurtz Creek, Shurtz Creek Shallow, Squaw Creek and Water Canyon. The tables contained inaccurate information as to the location of referenced elevation, effective and modified

elevation in feet, and/or communities affected for that flooding source. In this notice, FEMA is publishing a table containing the accurate information, to address these errors. The information

provided below should be used in lieu of that previously published in both tables.

49 CFR Part 571

[Docket No. NHTSA-2012-0177]

RIN 2127-AK86

Federal Motor Vehicle Safety Standards; Event Data Recorders

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: In August 2006, NHTSA established a regulation that sets forth requirements for data elements, data capture and format, data retrieval, and data crash survivability for event data recorders (EDRs) installed in light vehicles. The requirements apply to light vehicles that are manufactured on or after September 1, 2012, and are equipped with EDRs. However, the regulation does not mandate the installation of EDRs in those vehicles. This notice of proposed rulemaking would establish a new safety standard mandating the installation of EDRs in most light vehicles manufactured on or after September 1, 2014. The EDRs in

those vehicles would be required by the new standard to meet the data elements, data capture and format, data retrieval, and data crash survivability requirements of the existing regulation. This proposal would not modify any of the requirements or specifications in the regulation for EDRs voluntarily installed between September 1, 2012 and September 1, 2014.

DATES: You should submit your comments early enough to be received not later than February 11, 2013. In compliance with the Paperwork Reduction Act, NHTSA is also seeking comment on a new information collection. See the Paperwork Reduction Act section under Rulemaking Analyses and Notices below. Please submit all comments relating to new information collection requirements to NHTSA and to the Office of Management and Budget (OMB) at the address listed in the **ADDRESSES** section on or before February 11, 2013. Comments to OMB are most useful if submitted within 30 days of publication.
