SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations: The NASDAQ Stock Market LLC: Notice of Filing and Immediate Effectiveness of Proposed Rule Change for the NASDAQ Options Market (“NOM”) With Respect to the Authority of the Exchange or Nasdaq Options Services LLC (“NOS”) To Cancel Orders When a Technical or System Issue Occurs and To Describe the Operation of an Error Account for NOM

December 10, 2012.

Pursuant to Section 19(b)(1)1 of the Securities Exchange Act of 1934 (the “Act”)2 and Rule 19b–4 thereunder,3 notice is hereby given that, on November 29, 2012, The NASDAQ Stock Market LLC (the “Exchange”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes a proposal relating to the authority of NASDAQ or Nasdaq Options Services to cancel orders on NOM when a technical or system issue occurs and to describe the operation of an error account for. NASDAQ will implement the proposed rule change thirty days after the date of the filing. The text of the proposed rule change is available at http://nasdaq.cchwallstreet.com, at NASDAQ’s principal office, and at the Commission’s Public Reference Room. 4

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Chapter VI, Section 11, Order Routing, by adding a new paragraph (g) that addresses the authority of the Exchange or NOM to cancel options orders when a technical or systems issue occurs and to describe the operation of an error account for NOM.4

NOS is the approved routing broker of the Exchange, subject to the conditions listed in Chapter VI, Section 11. The Exchange relies on NOM to provide outbound routing services from itself to routing destinations of NOM (“routing destinations”).5 When NOM routes orders to a routing destination, it does so by sending a corresponding order in its own name to the routing destination. In the normal course, routed orders that are executed at routing destinations are submitted for clearance and settlement in the name of NOM, and NOM arranges for any resulting securities positions to be delivered to the member that submitted the corresponding order to the Exchange. From time to time, however, the Exchange and NOM encounter situations in which it becomes necessary to cancel orders and resolve error positions.6

Example of Circumstances That May Lead to Canceled Orders

A technical or systems issue may arise at NOM, a routing destination, or the Exchange that may cause the Exchange or NOM to take steps to cancel orders if the Exchange or NOM determines that such action is necessary to maintain a fair and orderly market. The examples set forth below describe some of the circumstances in which the Exchange or NOM may decide to cancel orders.

Example 1. If NOM or a routing destination experiences a technical or systems issue that results in NOM not receiving responses to immediate or cancel (“IOC”) orders that it sent to the routing destination, and that issue is not resolved in a timely manner, NOM or the Exchange would seek to cancel the routed orders affected by the issue. For instance, if NOM experiences a connectivity issue affecting the manner in which it sends or receives order messages to or from routing destinations, it may be unable to receive timely execution or cancellation reports from the routing destinations, and NOM or the Exchange may consequently seek to cancel the affected routed orders. Once the decision is made to cancel those routed orders, any cancellation that a member submitted to the Exchange on its initial order during such a situation would be honored.8

Example 2. If the Exchange experiences a systems issue, the Exchange may take steps

5 The examples described in this filing are not intended to be exclusive. Proposed Chapter VI, Section 11(g) would provide general authority for the Exchange or NOM to cancel orders in order to maintain fair and orderly markets when technical and systems issues are occurring, and Chapter VI, Section 11(g) also would set forth the manner in which error positions may be handled by the Exchange or NOM. The proposed rule change is not limited to addressing order cancellation or error positions resulting only from the specific examples described in this filing.

6 Examples of Circumstances That May Lead to Canceled Orders

1. A technical or systems issue may arise at NOM, a routing destination, or the Exchange that may cause the Exchange or NOM to take steps to cancel orders if the Exchange or NOM determines that such action is necessary to maintain a fair and orderly market.

2. The examples set forth below describe some of the circumstances in which the Exchange or NOM may decide to cancel orders.

Example 1. If NOM or a routing destination experiences a technical or systems issue that results in NOM not receiving responses to immediate or cancel (“IOC”) orders that it sent to the routing destination, and that issue is not resolved in a timely manner, NOM or the Exchange would seek to cancel the routed orders affected by the issue. For instance, if NOM experiences a connectivity issue affecting the manner in which it sends or receives order messages to or from routing destinations, it may be unable to receive timely execution or cancellation reports from the routing destinations, and NOM or the Exchange may consequently seek to cancel the affected routed orders. Once the decision is made to cancel those routed orders, any cancellation that a member submitted to the Exchange on its initial order during such a situation would be honored.

Example 2. If the Exchange experiences a systems issue, the Exchange may take steps...
to cancel all outstanding orders affected by that issue and notify affected members of the cancellations. In those cases, the Exchange would seek to cancel any routed orders related to the members’ initial orders.

Examples of Circumstances That May Lead to Error Positions

In some instances, the technical or systems issue at NOS, a routing destination, the Exchange, or a non-affiliate third-party Routing Broker may also result in NOS acquiring an error position that it must resolve. The examples set forth below describe some of the circumstances in which error positions may arise.

Example A. Error positions may result from routed orders that the Exchange or NOS attempts to cancel, but which are executed before the routing destination receives the cancellation message or that are executed because the routing destination is unable to process the cancellation message. Using the situation described in Example 1 above, assume that the Exchange seeks to cancel an order routed to a routing destination because it is not receiving timely execution or cancellation reports from the routing destination. In such a situation, NOS may still receive executions from the routing destination after connectivity is restored, which would not then allocate to members because of the Exchange’s decision to cancel the affected routed orders. Instead, NOS would post those positions into its error account and resolve the positions in the manner described below.

Example B. Error positions may result from an order processing issue at a routing destination. For instance, if a routing destination experienced a systems problem that affects its order processing, it may transmit back a message purporting to cancel a routed order, but then subsequently submit an execution of that same order (i.e., a locked-in trade) to The Options Clearing Corporation (“OCC”) for clearance and settlement. In such a situation, the Exchange would not then allocate the execution to the member for the earlier cancellation message from the routing destination. Instead, NOS would post those positions into its error account and resolve the positions in the manner described below.

Example C. Error positions may result if NOS receives an execution report from a routing destination but does not receive clearing instructions for the execution from the routing destination. For instance, assume that a member sends the Exchange an order to buy 100 contracts overlying ABC stock, which causes NOS to send an order to a routing destination that is subsequently executed, cleared, and closed out by that routing destination, and the execution is ultimately communicated back to that member. On the next trading day (T+1), if the routing destination does not provide clearing instructions for execution, NOS would still be responsible for settling that member’s purchase, but would be left with a short position in its error account. NOS would resolve the position in the manner described below.

Example D. Error positions may result from a technical or systems issue that causes orders to be executed in the name of NOS that are not related to NOS function as the Exchange’s routing broker and are not related to any corresponding orders of members. As a result, NOS would not be able to assign any positions resulting from such an issue to members. Instead, NOS would post those positions into its error account and resolve the positions in the manner described below.

Example E. Error positions may result from a technical or systems issue through which the Exchange does not receive sufficient quote/order, NOS would post those positions into its error account and resolve the positions in the manner described below.

Example F. Error positions may result from a technical or systems issue at the Exchange that does not involve routing of orders through NOS. For example, a situation may arise in which a quoted quote/order was validly cancelled but the system erroneously matched that quote/order with an order that was seeking to access it. In such a situation, NOS would have to assume the side of the trade opposite the order seeking to access the cancelled quote/order. NOS would post the position in its error account and resolve the position in the manner described below.

In the circumstances described above, neither the Exchange nor NOS may learn about an error position until T+1, either: (1) During the clearing process when a routing destination has submitted to OCC a transaction for clearance and settlement for which NOS never received an execution confirmation; or (2) when a routing destination does not recognize a transaction submitted to OCC for clearance and settlement. Moreover, the affected members’ trade may not be nullified absent express authority under Exchange rules.

Proposed Amendments to Chapter VI, Section 11

The Exchange proposes to amend Chapter VI, Section 11 to add new paragraph (g) to address the cancellation of orders due to technical or systems issues and the use of an error account by NOS.

Specifically, under paragraph (g)(1) of the proposed rule, the Exchange or NOS would be expressly authorized to cancel orders as may be necessary to maintain fair and orderly markets if a technical or systems issue occurred at the Exchange, NOS, or a routing destination. The Exchange or NOS would be required to provide notice of the cancellation to affected members as soon as practicable.

Paragraph (g)(2) of the proposed rule would permit NOS to maintain an error account for the purpose of addressing positions that result from a technical or systems issue at NOS, the Exchange, a routing destination, or a non-affiliate third-party Routing Broker that affects one or more error positions (“error positions”). By definition, an error position would not include any position that results from an order submitted by a member to the Exchange that is executed on the Exchange and automatically processed for clearance and settlement on a locked-in basis. NOS also would not be permitted to accept any positions in its error account from an account of a member and could not permit any member to transfer any positions from the member’s account to NOS’s error account under the proposed rule.

However, if a technical or systems issue results in the Exchange not having valid

11 Such a situation may not cause the Exchange to declare self-help against the routing destination pursuant to Chapter XII, Section 11, if the Exchange determines to cancel orders routed to a routing destination under proposed Chapter VI, Section 11(g), but does not declare self-help against that routing destination, the Exchange would continue to be subject to the trade-through requirements in the Options Order Protection and Locked/Crossed Markets Plan and Chapter XII, Section 2 with respect to that routing destination.

12 The purpose of this provision is to clarify that NOS may address error positions under the proposed rule that are caused by a technical or systems issue, but that NOS may not accept from a member positions that are delivered to the member through the clearance and settlement process, even if those positions may have been routed to a technical or executed by the Exchange, a routing destination of NOS, or a non-affiliate third-party Routing Broker. This provision would not apply, however, to situations like the one described in Example C in which NOS incurred a short position to settle a member’s purchase, as the member did not yet have a position in its account as a result of the purchase at the time of NOS’s action (i.e., NOS’s action was necessary for the purchase to settle into the member’s account). Similarly, the provision would not apply to situations like the one described in Example F, where a system issue caused one member to receive an execution for which there was not an available contraparty, in which case action by NOS would be necessary for the position to settle into that member’s account. Moreover, to the extent a member receives locked-in positions in connection with a technical or systems issue, that member may seek to rely on Chapter V, Section 9 if it experiences a loss. That rule references NASDAQ Rule 4626, which provides members with the ability to file claims against the Exchange for “losses directly resulting from the Systems’ actual failure to correctly process an order, Quote/Order, message, or other data, provided the Nasdaq Market Center has acknowledged receipt of the order, Quote/Order, message, or data.”
clearing instructions for a member to a trade, NOS may assume that member’s side of the trade so that the trade can be processed for clearance and settlement on a locked-in basis.\footnote{See Example E above.}

Under paragraph (g)(3), in connection with a particular technical or systems issue, NOS or the Exchange would be permitted to either (i) assign all resulting error positions to members, or (ii) have all resulting error positions liquidated, as described below. Any determination to assign or liquidate error positions, as well as any resulting assignments, would be required to be made in a nondiscriminatory fashion.

NOS or the Exchange would be required to assign all error positions resulting from a particular technical or systems issue to the applicable members affected by that technical or systems issue if NOS or the Exchange:

- Determined that it has accurate and sufficient information (including valid clearing information) to assign the positions to all of the applicable members affected by that technical or systems issue;
- Determined that it has sufficient time pursuant to normal clearance and settlement deadlines to evaluate the information necessary to assign the positions to all of the applicable members affected by that technical or systems issue; and
- Had not determined to cancel all orders affected by that technical or systems issue.

For example, a technical or systems issue of limited scope or duration may occur at a routing destination, and the resulting trades may be submitted for clearance and settlement by such routing destination to OCC. If there were a small number of trades, there may be sufficient time to match positions with member orders and avoid using the error account.

There may be scenarios, however, where NOS determines that it is unable to assign all error positions resulting from a particular technical or systems issue to all of the affected members, or determines to cancel all affected routed orders. For example, in some cases, the volume of questionable executions and positions resulting from a technical or systems issue might be such that the research necessary to determine which members to assign those executions to could be expected to extend past the normal settlement cycle for such executions. Furthermore, if a routing destination experiences a technical or systems issue after NOS has transmitted IOC orders to it that prevents NOS from receiving responses to those orders, NOS or the Exchange may determine to cancel all routed orders affected by that issue. In such a situation, NOS or the Exchange would not pass on to the members any executions on the routed orders received from the routing destination.

The proposed rule also would require NOS to liquidate error positions as soon as practicable.\footnote{\textit{15 U.S.C. 78f(b)}} In liquidating error positions, NOS would be required to provide complete time and price discretion for the trading to liquidate the error positions to a third-party broker-dealer and could not attempt to exercise any influence or control over the timing or methods of trading to liquidate the error positions.\footnote{\textit{15 U.S.C. 78f(b)(5)}} NOS also would be required to establish and enforce policies and procedures reasonably designed to restrict the flow of confidential and proprietary information between the third-party broker-dealer and NOS/the Exchange associated with the liquidation of the error positions.

Under the proposed paragraph (g)(4), NOS and the Exchange would be required to make and keep records to document all determinations to treat positions as error positions and all determinations for the assignment of error positions to members or the liquidation of error positions, as well as records associated with the liquidation of error positions through the third-party broker-dealer.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b)\footnote{\textit{15 U.S.C. 78f(b)}} of the Securities Exchange Act of 1934 (the “Act”), in general, and furthers the objectives of Section 6(b)(5),\footnote{\textit{15 U.S.C. 78f(b)(5)}} in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest, and it is not designed to permit unfair discrimination among customers, brokers, or dealers. The Exchange believes that this proposal is in keeping with those principles because NOS’s or the Exchange’s ability to cancel orders during a technical or systems issue and to maintain an error account facilitates the smooth and efficient operations of the market.

Specifically, the Exchange believes that allowing NOS or the Exchange to cancel orders during a technical or systems issue would allow the Exchange to maintain fair and orderly markets. Moreover, the Exchange believes that allowing NOS to assume error positions in an error account and to liquidate those positions, subject to the conditions set forth in the proposed amendments to Chapter VI, Section 11, would be the least disruptive means to correct these errors, except in cases where NOS can assign all such error positions to all affected members of the Exchange. Overall, the proposed amendments are designed to ensure full trade certainty for market participants and to avoid disrupting the clearance and settlement process. The proposed amendments are also designed to provide a consistent methodology for handling error positions in a manner that does not discriminate among members. The proposed amendments are also consistent with Section 6 of the Act insofar as they would require NOS to establish controls to restrict the flow of any confidential information between the third-party broker and NOS/the Exchange associated with the liquidation of error positions.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of...
the filing, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act \textsuperscript{18} and Rule 19b–4(f)(6) \textsuperscript{19} thereunder.

The Exchange has requested that the Commission waive the 30-day operative delay. \textsuperscript{20} The Commission believes that waiver of the operative delay is consistent with the protection of investors and the public interest. Such waiver would allow the Exchange, without delay, to implement the proposed rule change, which is designed to provide a consistent methodology for handling error positions in a manner that does not discriminate among members. The Commission also notes that the proposed rule change is based on, and substantially similar to, NASDAQ Equity Rule 4758(d), which the Commission recently approved. \textsuperscript{21}

Accordingly, the Commission designates the proposal operative upon filing. \textsuperscript{22}

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s Internet comment form (http://www.sec.gov/rules/sro.shtml); or
- Send an email to rule-comments@sec.gov. Please include File Number SR–NASDAQ–2012–134 on the subject line.

\textsuperscript{16} 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.
\textsuperscript{19} For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule change’s impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).
\textsuperscript{20} 17 CFR 200.30–3(a)(12).
\textsuperscript{22} 17 CFR 240.19b–4.

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; National Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Fee and Rebate Schedule

December 10, 2012.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Exchange Act”) \textsuperscript{2} and Rule 19b–4 thereunder,\textsuperscript{2} notice is hereby given that on December 3, 2012, National Stock Exchange, Inc. (“NSX®” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change, as described in Items I, II, and III below, which items have been prepared by the Exchange. The Commission is publishing this notice to solicit comment on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange is proposing to amend its Fee and Rebate Schedule (the “Fee Schedule”) issued pursuant to Exchange Rule 16.1(a) to: (1) Modify the Quotation Update Fee charged for each quotation update \textsuperscript{3} transmitted to the Exchange by an Equity Trading Permit (“ETP”) \textsuperscript{4} Holder using the Exchange’s Order Delivery mode (“Order Delivery Mode”); and (2) cap the Quotation Update Fee to the first 150 million quotation updates entered by each ETP Holder per month. The text of the proposed rule change is available on the Exchange’s Web site at www.nsx.com, at the Exchange’s principal office, and at the Commission’s public reference room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed

\textsuperscript{4} A “quotation update” includes any change to the price, size or side of a quotation or submission of an updated quote with the same price, size or side. A quotation update does not include posting of a new quote to replace a quote that was fully executed.
\textsuperscript{5} *Exchange Rule 1.5 defines the term “ETP” as an Equity Trading Permit issued by the Exchange for effecting approved securities transactions on the Exchange’s Trading Facilities.
