SUPPLEMENTARY INFORMATION: Searchlight Wind Energy, LLC (SWE), a wholly-owned subsidiary of Duke Energy, applied to the BLM for a right-of-way (ROW) grant on public lands to develop a 200-megawatt (MW) wind energy facility. The ROW application area encompasses approximately 18,790 acres of BLM-administered public lands adjacent to Searchlight, Nevada, about 60 miles southeast of Las Vegas, in Clark County, Nevada. In connection with the SWE proposal, the Western Area Power Administration (Western) has submitted a ROW application to the BLM for construction and operation of an electrical interconnection facility/switchyard adjacent to the existing Davis-Mead transmission line. The Western application is also analyzed as part of the EIS. The proposed project is in conformance with the 1998 Las Vegas Resource Management Plan and Record of Decision.

The proposed wind turbines located on the SWE project would be up to 262-foot tall from the ground to the hub with blades extending an additional 153 feet, for a total turbine height of up to 415 feet. In addition to the wind turbines, the proposed project would require the construction of pad mounted transformers at the base of each turbine, underground collection lines, new access roads, two electrical substations, an overhead transmission line
