related form provides a record of PHA Board approval of how the amounts shown on the operating budget were arrived at, as well as justification of certain specified amounts. The information is reviewed by HUD to determine if the plan of operation adopted by the PHA and amounts included therein are reasonable for the efficient and economical operation of the development(s), and the PHA is in compliance with HUD procedures to ensure that sound management practices will be followed in the operation of the development. A small number of PHAs (200) are still required to submit their operating budget packages to HUD, namely those that are troubled, those that are recently out of troubled status or at risk of becoming troubled, or those that are at risk of fiscal insolvency. PHAs are still required to prepare their operating budgets and submit them to their Board for approval prior to their operating subsidy being approved by HUD. The operating budgets must be kept on file for review, if requested.

SUPPLEMENTARY INFORMATION:

Searchlight Wind Energy, LLC (SWE), a wholly-owned subsidiary of Duke Energy, applied to the BLM for a right-of-way (ROW) grant on public lands to develop a 200-megawatt (MW) wind energy facility. The ROW application area encompasses approximately 18,790 acres of BLM-administered public lands adjacent to Searchlight, Nevada, about 60 miles southeast of Las Vegas, in Clark County, Nevada. In connection with the SWE proposal, the Western Area Power Administration (Western) has submitted a ROW application to the BLM for construction and operation of an electrical interconnection facility/switchyard adjacent to the existing Davis-Mead transmission line. The Western application is also analyzed as part of the EIS. The proposed project is in conformance with the 1998 Las Vegas Resource Management Plan and Record of Decision.

The proposed wind turbines located on the SWE project would be up to 262-feet tall from the ground to the hub with blades extending an additional 153 feet, for a total turbine height of up to 415 feet. In addition to the wind turbines, the proposed project would require the construction of pad mounted transformers at the base of each turbine, underground collection lines, new access roads, two electrical substations, an overhead transmission line
