SUMMARY: This action extends the comment period for a notice of availability that was published in the **Federal Register** on December 7, 2012. Background

On November 29, 2012, the FAA issued a Notice entitled "Policy Statement on Occupational Safety and Health Standards for Aircraft Cabin Crewmembers" that published in the **Federal Register** on December 7, 2012 (77 FR 72998). Comments to that document were to be received on or before January 7, 2013.

By letter dated December 7, 2012, the Regional Airline Association (RAA), on behalf of its member airlines, requested that the FAA extend the comment period for a minimum of 30 days. The petitioner stated that the additional time is necessary so that their members can assess the extent of the proposed changes, as well as develop questions and comments.

By letter dated December 10, 2012, Airlines for America (A4A), the RAA, and the National Air Carrier Association (NACA) also requested an extension of the comment period, as the 30-day comment period over the holiday season will make it extremely difficult for their respective members to evaluate the impacts and implications of the proposed policy and provide meaningful input to the FAA.

While the FAA concurs with the petitioners' requests for an extension of the comment period, it does not support a 30-day extension. The FAA finds that providing additional time until January 22, 2013 is sufficient for these petitioners to analyze the proposed policy statement and provide meaningful comment.

Absent unusual circumstances, the FAA does not anticipate any further extension of the comment period for this notice.

Extension of Comment Period

In accordance with § 11.47(c) of title 14, Code of Federal Regulations, the FAA has reviewed the petitions made by A4A, RAA, and NACA for extension of the comment period. These petitioners have shown a substantive interest in the proposed policy statement and good cause for the extension. The FAA has determined that extension of the comment period is consistent with the public interest, and that good cause exists for taking this action.

Accordingly, the comment period is extended until January 22, 2013.

Additional Information*A. Comments Invited*

The FAA invites interested persons to participate by submitting written comments, data, or views on the policy statement. The most helpful comments reference a specific portion of the policy statement, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should send only one copy of written comments, or if comments are filed electronically, commenters should submit only one time.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this notice. The FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The agency may change this proposal in light of the comments it receives.

SUPPLEMENTARY INFORMATION:

Background Information

Gulf of the Farallones National Marine Sanctuary (GFNMS), designated in 1981, and Cordell Bank National Marine Sanctuary (CBNMS), designated in 1989, are federally protected marine areas along and offshore of California's north-central coast. Centered along an important upwelling area, the sanctuaries are able to support important commercial and recreational fisheries, tourism and recreation industries, and coastal economies and communities. Sanctuary personnel contribute greatly to ocean and coastal management by engaging in public outreach and education to promote stewardship, conducting scientific and applied research initiatives, and developing and supporting programs that strengthen resource protection for the long-term health of the region.

NOAA is considering expansion of GFNMS and CBNMS to an area north of

the existing sanctuaries that extends from Bodega Bay in Sonoma County, to Alder Creek in Mendocino County, and west to the edge of the continental shelf. This area encompasses the Point Arena upwelling center that consistently produces the most intense upwelling in all of North America.

The nutrients brought to the surface during upwelling events at Point Arena are carried south into the sanctuaries by the prevailing California Current; these nutrients fuel an incredibly productive ocean area protected by GFNMS and CBNMS. The sanctuaries are destination feeding areas for endangered blue whales and humpback whales, sharks, salmon, and seabirds like albatrosses and shearwaters that travel tens of thousands of miles. Food that results from the Point Arena upwelling center also supports the largest assemblage of breeding seabirds in the contiguous United States on the Farallon Islands. Living reefs of corals, sponges and a myriad of other invertebrates cover hard bottom areas and these sessile invertebrate communities are washed with food rich water from the north. These invertebrate reefs also provide structure and habitat for many species of juvenile and adult rockfish that prosper in these productive waters. Sanctuary waters also support valuable commercial fisheries for salmon and Dungeness crab. Local ports and coastal communities all derive socioeconomic benefits from these healthy ocean habitats. The rich diversity and health of this thriving marine ecosystem depends on the cold nutrient rich source water originating from the Point Arena upwelling center.

In 2008, the joint management plan review for CBNMS and GFNMS determined that managers in these sanctuaries would facilitate a public process in the next five years to ensure that "current boundaries were inclusive of the area's natural resource and ecological qualities, including the biogeographic representation of the area." Sanctuary advisory councils from both sites have regularly discussed the boundary expansion alternative and have expressed support for boundary expansion when proposed by local congressional members.

In accordance with Section 304(e) of the NMSA, NOAA is now initiating a review of the boundaries for CBNMS and GFNMS to evaluate and assess a proposed expansion of the sanctuaries. As noted above, NOAA is considering extending the boundaries of the two sanctuaries to add the northern area from Bodega Bay, Sonoma County to Alder Creek, Mendocino County, and west to the edge of the continental shelf
