10. Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

11. Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. Energy Effects

This action is not a "significant energy action" under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

13. Technical Standards

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023-01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321-4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves the creation of three temporary safety zones that will be enforced for a total of 31 minutes. This rule is categorically excluded, under figure 2-1, paragraph (34)(g), of the Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination is available in the docket where indicated

under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

SUPPLEMENTARY INFORMATION:

I. Does this action apply to me?

The Agency included in the final rule a list of those who may be potentially affected by this action.

II. What does this technical correction do?

EPA issued a final rule in the **Federal Register** on October 3, 2012, establishing tolerances for residues of the insecticide chlorantraniliprole in or on multiple commodities. (77 FR 60311). That rule incorrectly established tolerances for “Rapeseed subgroup 20B” and “Sunflower subgroup 20C.” Under

EPA’s crop group regulation there are no such crop groups or subgroups. Rather, as correctly indicated several times in the preamble to the rule, including in the description of the action being taken by the Agency and the amendatory instruction for § 180.628, the correct regulatory crop subgroup designation is “Rapeseed subgroup 20A” and “Sunflower subgroup 20B.” The rule also incorrectly established the tolerance level for the Sunflower subgroup as 0.3 parts per million (ppm) instead of 2.0 ppm, as indicated in the preamble. Both the correct crop subgroup names and the 2.0 tolerance level for the Sunflower subgroup tolerance were included in the publication of the notice of the petition. (77 FR 20344, April 4, 2012). The October 3, 2012 rule also incorrectly established tolerances for “Vegetable, foliage of legume, group 7, forage” and “Vegetable, foliage of legume, group 7, hay”. Under EPA’s crop group regulation there are no such crop groups. Rather, there is only a crop group for “Vegetable, foliage of legume, group 7.” The petition correctly requested a tolerance for “Vegetable, foliage of legume, group 7.” Therefore, this correction is replacing those two incorrect crop group designations and tolerances with “Vegetable, foliage of legume, group 7” at a tolerance of 90 ppm.

In addition, despite indicating that EPA was granting the petitioner’s request for the revocation of existing tolerances made redundant by the establishment of crop group tolerances, EPA failed to remove from § 180.628 the tolerances for cotton, undelinted seed, and lunaria, seed, even though tolerances for Cottonseed subgroup 20C and Rapeseed subgroup 20A, which cover cotton, undelinted seed and lunaria seed were granted. Therefore, EPA is revoking the tolerances for cotton, undelinted seed, and lunaria, seed, to address these redundancies.
