Title: NSPS for Fossil Fuel Fired Steam Generating Units (Renewal).

ICR Numbers: EPA ICR Number 1052.10, OMB Control Number 2060-0026.

ICR Status: This ICR is scheduled to expire on January 31, 2013. Under OMB regulations, the Agency may continue to either conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A and any changes, or additions to the Provisions specified at 40 CFR part 60, subpart D. Owners or operators of the affected facilities must make an initial notification report, performance tests, periodic reports, and maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are also required semiannually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 54 hours per response. "Burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with

any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Owners or operators of fossil fuel fired steam generating units.

Estimated Number of Respondents: 660.

Frequency of Response: Initially, occasionally and semiannually.

Estimated Total Annual Hour Burden: 70,777.

Estimated Total Annual Cost: \$16,753,220, which includes \$6,853,220 in labor costs, no capital/startup costs, and \$9,900,000 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an increase in respondent burden from the most recently approved ICR due to an adjustment of respondent labor hours. The previous ICR assumed that labor hours accounted for all technical, managerial, and clerical hours. To be consistent with the estimation methodology used in other ICRs, this ICR assumes that labor hours account for technical hours only. Clerical and managerial hours require additional time, and equal 10 and 5 percent of technical hours, respectively. This ICR updates these labor hours and their associated labor rates, resulting in an increase of total labor costs.

Director, Collection Strategies Division.
