k. *Description of Request:* Northern Indiana Public Service Company, licensee for the Norway-Oakdale Hydroelectric Project, requests the Commission to grant an extension of time to a temporary variance of license Article 403 that was granted by the Commission on October 4, 2012, due to continued regional drought conditions. In that order, the Commission granted a temporary variance of license article 403 until December 31, 2012. Article 403, in part, requires the licensee to operate the project in a run-of-river manner where, project outflow is equal to project inflow and to maintain lake elevations of Lake Shafer within ± 0.25 feet of elevation 647.47 feet National Geodetic Vertical Datum (NGVD) and Lake Freeman within ± 0.25 feet of elevation 612.45 NGVD. The U.S. Fish and Wildlife Service and the Indiana Department of Natural Resources have requested that the licensee release a minimum flow of 200 cubic feet per second (cfs) from the Oakdale Dam for the preservation of federally endangered mussel species which inhabit the Tippecanoe River downstream of the project reservoirs. Due to the potential continuation of regional drought conditions affecting the project watershed, the release of 200 cfs

downstream of the project, at times, may not be equal to project inflow and therefore may result in the lake elevations decreasing below 0.25 feet NGVD as permitted by Article 403 of the project license. The licensee is requesting that the temporary variance be extended to December 1, 2013.
